1.	OPENING AND WELCOME
-----------	----------------------------

The Speaker welcomed all present at the 38th Council meeting which was held in the Council Chamber.

2.	MAYORAL ADDRESS
-----------	------------------------

Opening & Seasonal Context

“Good morning / Molwen i/ Goeiemore- Honourable Speaker, Deputy Mayor, Chief whip of Council, All Members from my Mayoral committee, Our MPAC chairperson, All councillors present.

A warm welcome also to our Municipal Manager, Directors, Officials, and all our members of the public joining us in the gallery or online.

Honourable Speaker, I also want to extend a warm welcome to our international delegation from Sweden, who is present this morning to observe our council meeting. They are here for the week, as part of our collaboration with the Jönköping municipality, where we are partnering on various projects that aims to address social challenges within our communities and they are hosted by our Community Development department where they will be visiting various schools within our municipality. We wish them all the best during their stay- and we hope that they will also find some leisure time to experience our beautiful town and its residents.

- February is the heart of summer - hot, dry and firmly within fire season.
- Our fire crews have been exceptionally busy responding to incidents across our region.
- These conditions remind us how vulnerable we are during these dry months - and how deeply we depend on those who serve on the front lines.

1. Gratitude to Fire & Emergency Services

Colleagues- February month is the heart of summer - hot, dry and firmly within fire season.

- Our fire crews have been exceptionally busy responding to incidents across our region.
- These conditions remind us how vulnerable we are during these dry months and how deeply we depend on those who serve on the front lines.
- I want to sincerely thank our fire and emergency personnel.
- They have worked long hours in extreme heat and dangerous conditions. protecting lives, homes, farmland, and businesses.
- They are OUR true heroes in our community.
- On behalf of Council and our residents, we thank you for your courage and commitment.

2. Drought & Water Precautionary Measures

- Speaker, the heat we are experiencing is not only a fire risk - it forms part of a broader drought pattern.
- Dam levels are not where we would ideally like them to be.
- This is not just a local concern - it is a provincial one.
- Following the advice and leadership of the Western Cape Provincial Government, municipalities have been advised to consider precautionary measures to reduce water consumption.
- Today, this Council will be discussing measures aimed at curbing usage and encouraging conservation.
- These are proactive steps - taken early - to avoid stricter restrictions later.
- Across the province, dam levels remain under pressure.
- And even beyond our province, we are seeing severe drought conditions in parts of the Cape, and a particularly dire situation in many areas of the Eastern Cape.
- I want to drive this point clearly: we cannot wait for crisis before we act.
- Every litre of water saved today strengthens our position tomorrow.
- I call on residents, businesses, farmers and institutions to use water responsibly.

3. Tourism & Hospitality Season

- Speaker - February remains a vibrant tourism month.
- We continue to welcome local and international visitors to our town and our restaurants, wine farms, hotels and guesthouses are bustling with activities.
- Tourism sustains jobs, supports small businesses and strengthens our local economy.
- We thank everyone working in hospitality during this busy season and we thank you for continuously flying our Stellies flag high.

4. Universities & Students Return

- Our town comes alive again as students returned and resumes their academic studies.
- Orientation programmes and welcoming activities were underway - from the annual dream walk for the first year students to Vensters 2026 - It was absolutely amazing and well done to all our students.
- A warm greeting to all our Matie students as you begin the academic year.
- We look forward to events, residence activities and the excitement of Varsity sport.
- To all new students and residents - welcome to Stellenbosch.

5. Versus Road Run

- What a fantastic morning at the Versus Road Run here in Stellenbosch.
- I was proud to officially get the race underway, setting the tone for an incredible day filled with energy, enthusiasm and community spirit.
- With so many runners taking to our streets, the event truly showcased the beauty of our town - from our breathtaking winelands and great outdoors to the beautiful streets of Stellenbosch.
- A heartfelt thank you to everyone who participated, to the organisers who made it possible, and to all the supporters who came out to cheer along the route.

6. Wheelchair Seating Outreach- Cloetesville

- Yesterday, our Community Development Department proudly supported a collaborative wheelchair seating outreach initiative at Eikehall in Cloetesville.
- This initiative was undertaken in partnership with the Western Cape Department of Health and Wellness and ChangeAbility.
- The outreach provided essential wheelchair repair services and assisted residents with new wheelchair applications.
- Wheelchair users also received practical guidance on how to properly care for and maintain their wheelchairs.
- This initiative reflects our shared commitment to accessibility, independence and improved quality of life for persons with disabilities.
- Together, we continue building an inclusive Stellenbosch for all.

7. SALGA National Recognition

- We are incredibly proud that Stellenbosch Municipality has been shortlisted for two national communications awards by the South African Local Government Association.
- These awards form part of the SALGA Local Government Communications Forum taking place at the Cape Town International Convention Centre from tomorrow until Friday.
- We have been nominated for:
- Best Social Media in Local Government - across all platforms, including our new WhatsApp Channel.
- Most Innovative Team & Approach to Local Government Communications.
- We are humbled by this national recognition and proud to represent Stellenbosch on the national stage.
- Congratulations to all nominees - we look forward to the awards evening taking place tomorrow.

8. Investec SA Open Championship

- Excitement is growing in the Eikestad as the golfing world turns its attention to Stellenbosch.
- We are proud to host the 115th Investec SA Open Championship.
- We look forward to welcoming some of the best golf stars in the country and from abroad.
- The event takes place at Stellenbosch Golf Club from 26 February to 1 March 2026.
- Visitors can expect world-class golf, top-tier entertainment, and incredible food and wine in the heart of Stellenbosch.
- This is another opportunity to showcase our town on an international stage.

9. Lenten Message

- As the season of Lent begins, I extend heartfelt wishes to all members of our community observing this sacred time.
- Lent is a period of reflection, prayer and renewal.
- The values of humility and forgiveness strengthen not only individuals and families, but our entire community.
- May this season inspire renewal, kindness and continued unity.
- On behalf of the municipality, I wish you a peaceful and blessed Lenten season.

10. Ramadan Message

- As the holy month of Ramadan begins, I extend warmest wishes to all members of our community observing this sacred time.
- Ramadan is a month of reflection, compassion, generosity and unity.
- Our community is strengthened by its diversity - by the traditions, cultures and faiths represented here.
- On behalf of the municipality, I wish you and your families a peaceful and blessed Ramadan.
- Ramadan Mubarak.

11. Closing

- February is intense - hot, busy and demanding.
- It highlights both our challenges and our strengths.
- Let us continue working together to keep Stellenbosch safe, resilient, inclusive and thriving.

Thank you, Speaker."

3.	COMMUNICATIONS BY THE SPEAKER
-----------	--------------------------------------

OPENING AND WELCOME:

Executive Mayor

Deputy Mayor

Council whip

Members of the Mayoral Committee

MPAC Chair

All Councillors

Municipal Manager

Directors

Members of the Administration

Members of the public

COMMUNICATION BY THE SPEAKER

Permission was granted to Councillor N Mcombring to join Council meetings via the Teams link until further notice.

Notice of questions – submission should be 10 days before Council – day of submission cannot be counted as day one.

The 2026 Councillor Seasonal school will take place from 6 – 7 July 2026. The Speaker is awaiting . The venue still need to be confirmed.

ITEMS FOR NOTING

8.1

10.6.1

CONSENSUS ITEMS

10.8.2

12.1

12.4

BIRTHDAYS**FEBRUARY**

Councillor Wilhelmina Petersen - 8 February

Councillor Alwyn Hanekom – 21 February

4.	COMMUNICATIONS BY THE MUNICIPAL MANAGER
----	--

Swedish partnership

They will join us during the course of council meeting as they visiting a school in Franschoek now. Swedish delegation focusing on youth and youth participation in government and decision-making processes. As you know the president declare a national disaster for the western cape and as a result we need to focus saving measures for water.

Lent

"As you journey through this Lenten season, may your heart find peace in stillness, your spirit grow in faith, and your days be filled with acts of love and compassion. Let each moment draw you closer to the hope and joy of Easter."

Ramadan

Ramadan is a sacred month in Islam, a time of fasting, prayer, and spiritual reflection. As one of the five pillars, it is a time for Muslims to strengthen faith, seek forgiveness, and purify their hearts. Fasting during Ramadan is not only abstaining from food and drink, but also practicing self-discipline, kindness, and devotion.

Students

We welcome our students back to pour town but request that they be safe follow advise and buy in give responsibility campaign. Students to be vigilant at night and move in groups and call on campus security to assist late night

Human rights day

We pause to honour the courage, sacrifices, and resilience of those who fought for freedom, dignity, and equality. **Human Rights Day** is not only a reminder of our shared history but also a call to action — to protect and uphold the rights of every person, every day.

Let us use this day to:

- Stand against injustice in all its forms.
- Promote compassion, respect, and understanding in our communities.
- Work together to build a society where every voice matters and every life is valued.

May we remember that **human rights are not privileges — they are the foundation of a just and peaceful world**. The responsibility to protect them belongs to all of us.

Stellenbosch Football Club

Congratulation to Stellenbosch Football Club with the win over Kaizer Chiefs, second time in a row. Well done to the team and management, you are making us proud.

Investec SA Open Golf

Lastly, welcome to the Investec SA open golf players. Enjoy our beautiful town and all the best to all the players.

10.2.1	UPGRADING, DEVELOPMENT AND USE OF KAYAMANDI SPORT FACILITY BY OPEN PLAY FOUNDATION NPC
--------	--

Collaborator No: 800597
IDP KPA Ref No: Valley of Opportunity
Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: UPGRADING, DEVELOPMENT AND USE OF KAYAMANDI SPORT FACILITY BY OPEN PLAY FOUNDATION NPC

2. PURPOSE

- 2.1 To inform Council about the proposal and request from Open Play Foundation NPC to upgrade and invest in the Kayamandi Sports Facility for use by Open Play Foundation.
- 2.2 To obtain permission from Council to enter into an agreement with Open Play Foundation (OPF) for the use and upgrade of Kayamandi Sports Facility.

3. DELEGATED AUTHORITY

Stellenbosch Municipal Council.

4. EXECUTIVE SUMMARY

A request has been received from Open Play Foundation NPC to undertake capital investment and assume operational management of the Kayamandi Sports Facility.

In order for Open Play Foundation NPC to upgrade, invest in, and utilise the Kayamandi Sports Facility, approval is required from Stellenbosch Municipality. This will be formalised through a Memorandum of Understanding, to be drafted in compliance with all applicable municipal legislation.

The project has the full support of the Stellenbosch Sport and Recreation Association (SSRA) and the Kayamandi Sports Council. (see **ANNEXURE B AND C**).

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.2.1

During deliberations on the matter, the Speaker allowed the Democratic Alliance a 15 minute caucus.

When the meeting resumed, it was

RESOLVED (nem con)

- (a) that Council notes the Stellenbosch Sport and Recreation Association (SSRA) and the Kayamandi Sports Council support for this project; and
- (b) that Council grants permission to the Community Services Department to conclude a draft agreement through a Memorandum of Understanding with Open Play Foundation and bring it back to Council for consideration; and
- (c) that the municipality be afforded an opportunity to have 2 representatives on the board of overseers which includes Administration and the MMC of Youth, Sport and Culture.

10.5.1	PROPOSED INFILL HOUSING DEVELOPMENT OF THE FOLLOWING OF ERVEN 11554- 11570, LINDIDA, IDAS VALEY, STELLENBOSCH
--------	--

Collaborator No: 801526
 IDP KPA Ref No: Good Governance
 Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: PROPOSED INFILL HOUSING DEVELOPMENT OF THE FOLLOWING OF ERVEN 11554- 11570, LINDIDA, IDAS VALEY, STELLENBOSCH

2. PURPOSE

To report to Council on the feasibility and the suitability of the sites for residential development in Lindida, Idas Valley and for Council to consider disposing of these properties by way of Public Auction. (As part of this, a study was conducted to investigate and assess the availability of infrastructure services and to provide a cost analysis for any upgrades required. See cost analysis attached as **ANNEXURE 1.**)

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality is actively involved in creating housing opportunities for the disadvantaged, however, there are an array of challenges including but not limited to the availability of resources and allocations from National and Provincial Government as well as the availability of land for housing (Integrated Development Plan IDP, 5th Generation 2022- 2027). This project serves as a means to develop vacant and underdeveloped portions of land within Idas Valley to address the housing need.

The particular goal of this study was to perform an investigation to determine whether the proposed development of erven 11554 - 11570, Lindida, Idas Valley can be accommodated within the existing infrastructure systems or not. There was an urgent need for the properties to be investigated for an integrated urban development, providing housing opportunities. This will be achieved with due consideration for the environment within which the project is located, as well as the optimum development potential of the subject properties.

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.5.1**RESOLVED** (majority vote with 4 abstentions)

- (a) that erven 11554 -11570, Lindida, Idas Valey be identified as land not needed to provide the basic municipal services;
- (b) that Council in principle approves the disposal of erven 11554 – 11570 Lindida, Idas Valey by way of public auction subject to a public participation process during which the views/inputs of the public is solicited;
- (c) that the item return to Council after the public participation process for a final resolution by Council;
- (d) that the stormwater channel behind erven 11554 -11570 along Talana Street, Lindida, Idas Valley be upgraded as well as the installation of water, sewer and stormwater connections for each of the 17 erven;
- (e) that the funding to upgrade the infrastructure as mentioned in (d) above for the development of erven 11554 -11570, Lindida, Idas Valley has been made available during the adjustment budget process in January 2026; and
- (f) that the cost of approximately R1 000 000 be utilized from ukey 20250701027274, which is municipal funds.

10.6	INFRASTRUCTURE SERVICES : (PC : R PHEIFFER)
10.6.1	STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – FEBRUARY 2026

Collaborator No:

IDP KPA Ref No: Green & Sustainable Valley

Meeting Date: 18 February 2026 & 25 February 2026

1. SUBJECT: STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – FEBRUARY 2026

2. PURPOSE

For Council to note the progress of the Municipality's as well as the Provincial Government's initiatives regarding the Alternative Energy Programme projects which are underway.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

The Municipality's Alternative Energy Generation Programme is progressing well and significant strides have been achieved in the last quarter.

The 50 Megawatt Solar PV project was advertised for 6 months which is standard for a complex project of this nature, supported by the full Transaction Advisor Team appointed by the Provincial Government's Department of Infrastructure. The Bids are being evaluated by the Bid Evaluation Committee and will now serve at the Bid Evaluation Committee on 20 February 2026.

The 20 Megawatt Solar PV project does have a preferred bidder appointed, subject to the finalisation of the Power Purchase Agreement (PPA). The Municipality's appointed Legal Firm is providing advice to the Municipality's Finance Department to ensure that the appropriate levels of risk and accountability are incorporated into the Power Purchase Agreement. A meeting was held on 13 February 2026 between the CFO, Legal Advisor, Infrastructure Department, and the Municipality's appointed legal firm to interrogate the clauses of the Power Purchase Agreement, whereafter it will be sent back to the bidder for comment.

The Supervisory Control and Data Acquisition (SCADA) project is well underway with the Phase 3 installations, and these are on track to be completed by June 2026 as planned. The scope of works will enable remote monitoring and remote switching functionality at 11kV secondary substations. The following substations will be completed in Phase 3: Main substation; University substation; La Terra substation; Techo Park; Huguenot; Tennant Substations.

- 4.1** 50 MW Independent Power Producer Tender: The Request for Proposals closed on 30 September 2025. The first technical evaluation report was submitted to SCM on 29 October 2025 and an informal BEC meeting was held on 6 November 2025. The second technical evaluation report was submitted to SCM on 03 December 2025. The next BEC is scheduled for the 20 February 2026.

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.6.1**NOTED**

the latest progress with the Alternative Energy Generation projects is in implementation phase at present.

10.8.1	ADOPTION OF THE STELLENBOSCH MUNICIPALITY FINAL DRAFT PROBLEM PROPERTY BY-LAW 2026 AND ASSOCIATED SYSTEM OF DELEGATIONS
--------	--

Collaborator No: 801184
IDP KPA Ref No: Valley of Opportunity
Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: ADOPTION OF THE STELLENBOSCH MUNICIPALITY FINAL DRAFT PROBLEM PROPERTY BY-LAW 2026 AND ASSOCIATED SYSTEM OF DELEGATIONS

2. PURPOSE

Is for Council to consider the adoption of the Stellenbosch Municipality: Final Draft Problem Property By-Law (2026), as well as the associated system of delegations.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Following the internal review of the Stellenbosch Municipality: Problem Property By-Law (2020), the Department of Development Management proceeded to update the current problem property By-Law to address difficulties that are currently being experienced in the implementation of said By-Law, as well as to enhance the By-Law with relevant additions.

Following the necessary amendments the subject By-Law was adopted as a draft by Council for the purpose of a public participation process. No inputs, comments or objections were received.

The proposed draft Stellenbosch Municipality Problem Property By-Law (2026) is now being presented to Council for consideration to be adopted for the purpose of implementation.

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.8.1**RESOLVED** (majority vote with 2 abstentions)

- (a) that the final Draft Stellenbosch Municipality By-Law on Problem Properties 2026, duly introduced in terms of Section 12(1) of the Local government: Municipal Systems Act, 2000 (Act 32 of 2000) by the Portfolio Councillor for Planning, and attached as **ANNEXURE "A", BE APPROVED** in terms of section 12(2) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000); and
- (b) that the associated system of delegations for the Stellenbosch Municipality By-Law on Problem Properties 2026, attached as **ANNEXURE "B", BE APPROVED** in terms of Section 59 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000).

10.8.2	APPROVAL OF THE PROCESS PLAN AND TO ADVERTISE THE DRAFT KOELENHOF LOCAL SPATIAL DEVELOPMENT FRAMEWORK ("LSDF"), AND OVERLAY ZONE FOR PUBLIC PARTICIPATION
---------------	--

Collaborator No: 801206
 IDP KPA Ref No: Valley of Opportunity
 Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: APPROVAL OF THE PROCESS PLAN AND TO ADVERTISE THE DRAFT KOELENHOF LOCAL SPATIAL DEVELOPMENT FRAMEWORK ("LSDF"), AND OVERLAY ZONE FOR PUBLIC PARTICIPATION

2. PURPOSE

To request Council to approve the process plan and to advertise the Draft Koelenhof Local Spatial Development Framework ("LSDF") and Overlay Zone for public participation.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The purpose of the report is to provide Council with the pertinent facts to approve the process plan and the commencement of a Public Participation Process ("PPP") for the Draft Koelenhof Local Spatial Development Framework ("LSDF") and the accompanying Overlay Zone, as prescribed in terms of:

- Sections 9 and 10 of the Stellenbosch Municipality: By-Law on Municipal Land Use Planning, 2023 (SMLUPB); and -
- Sections 12 and 13 of the Municipal Systems Act (Act 32 of 2000) (MSA).

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.8.2

RESOLVED (majority vote with 2 abstentions)

- (a) that Council **approves** the commencement of the Public Participation Process ("PPP") for a period of sixty (60) days, to obtain comment in respect of the Draft Koelenhof Development Framework / LSDF and the Overlay Zone, attached as **APPENDIX 1** and **APPENDIX 2** to this report.
- (b) that Council **approves** the process plan for the adoption of the Draft Koelenhof Development Framework / LSDF and the Overlay Zone, attached as **APPENDIX 3**; and
- (c) that Council approve the Public Participation Process Plan, attached as **APPENDIX 4**.

10.8.3	APPROVAL TO RE-ADVERTISE THE DRAFT STELLENBOSCH MUNICIPALITY OUTDOOR ADVERTISING & SIGNAGE BY-LAW, 2025 FOR PUBLIC PARTICIPATION
--------	---

Collaborator No: 801206
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: APPROVAL TO RE-ADVERTISE THE DRAFT STELLENBOSCH MUNICIPALITY OUTDOOR ADVERTISING & SIGNAGE BY-LAW, 2025 FOR PUBLIC PARTICIPATION

2. PURPOSE

To request Council approval to re-advertise the Draft Stellenbosch Municipality Outdoor Advertising and Signage By-Law 2025 for public participation.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

Council adopted the Outdoor Advertising and Signage By-Law on 24 May 2023, promulgated in Provincial Gazette No. 8785 dated 30 June 2023. A high court application was launched against the By-Law by Out of Home Media South Africa NPC based on the previous public participation process in 2018 and 2021. Although the process was correctly followed, the advertisement referred to the By-Law as the Draft Poster By-Law. The applicants stated that due to the incorrect reference in the advertisement, they did not comment on the By-Law.

The legal advice received was that the By-Law must be re-advertised through a new public participation process, and Council approved this decision. The draft Outdoor Advertising and Signage By-Law 2023 was advertised on 2 November 2023 in the Paarl Post and the Eikestadnuus. The closing date was the 4th of December 2023. Six comments were received, summarized, and discussed with the legal firm appointed by the Municipal Legal Department to assist the Municipality with responding to these comments.

The Draft Outdoor Advertising By-Law 2024 was finalized and re-advertised on 6 March 2025 (**APPENDIX 1**) with a closing date of 6 April 2025. Several comments were received, along with a request that the municipality meet with the Advertising Companies to discuss the By-Law. A public meeting was held on 22 September 2025 (**APPENDIX 2**).

All the comments received before the public meeting and those that were recorded during the public meeting have been taken into consideration in the Draft Outdoor Advertising and Signage By-Law 2025 (**APPENDIX 3**). The Municipal Legal Services has advised that this latest draft is to be re-advertised for public participation before it can be approved by the Council and promulgated, as there have been substantial changes (**APPENDIX 4**) as per Sections 12 and 13 of the Municipal Systems Act (Act 32 of 2000) (MSA).

Any comments received from the public will be considered, and if there are no further substantial changes, then the Outdoor Advertising and Signage By-Law will be returned to the Council for approval and then promulgated.

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.8.3**RESOLVED** (nem con)

that Council **approves** the request to re-advertise the Draft Stellenbosch Municipality Outdoor Advertising By-Law, 2025.

10.8.4	ADDITIONAL IN-KIND SUPPORT SERVICES FOR THE INVESTEC SOUTH AFRICAN GOLF OPEN CHAMPIONSHIP IN STELLENBOSCH
---------------	--

Collaborator No:

IDP KPA Ref No: Good Governance

Meeting Date: 18 February 2026 and 25 February 2026

1. SUBJECT: ADDITIONAL IN-KIND SUPPORT SERVICES FOR THE INVESTEC SOUTH AFRICAN GOLF OPEN CHAMPIONSHIP IN STELLENBOSCH**2. PURPOSE**

To inform Council of additional requests received for in-kind support for sport and tourism related events hosted in Stellenbosch Municipality and to request Council's advice and direction regarding the nature and extent of support to be considered.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality continues to attract high-profile tourism, cultural, sporting, and film-related events. These events significantly contribute to the local economy, promote the Municipality as a destination of choice, and strengthen its international brand.

A recent approach from an organiser, the Investec South African Open Championship include requests for support in hosting tourism-driven activities. Such events have proven potential to generate socio-economic benefits, boost visitor numbers, create temporary employment opportunities, and increase exposure of Stellenbosch to global audiences.

The Municipality's in-kind support could include logistical services, permitting assistance, traffic and security management, waste removal, town beautification, tourism promotion, and facilitation of local service provider participation.

Council approved in kind services for this event on 26 November 2025.

38TH COUNCIL MEETING: 2026-02-25: ITEM 10.8.4**RESOLVED** (majority vote with 2 abstentions)

- (a) that Council notes and supports the additional request received for in-kind support in hosting the Investec South African Open Championship within Stellenbosch Municipality. That any support be guided by the Municipality's Cost Containment Measures, Supply Chain Management Policy, and applicable legislative frameworks;
- (b) that Council acknowledges the potential socio-economic, tourism, and branding benefits derived from supporting such events; and
- (c) that Council approves the waiver of applicable municipal rates and service charges related to such events, where appropriate, as part of the Municipality's in-kind contribution, subject to budget availability and compliance with relevant policies and regulations.

------	--

Collaborator No:

IDP KPA Ref No: Good Governance and Compliance

Meeting Date: 25 February 2026

1. SUBJECT: ESTABLISHMENT OF THE MUNICIPAL HONOURS AND MEDALS ADVISORY PANEL

2. PURPOSE

To establish the Municipal Honours and Medals Advisory Panel in terms of clause 5 of the Stellenbosch Municipal Honours By-Law of 2025.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The Stellenbosch Municipal Council in 2025 promulgated The Municipal Honours By-Law (**ANNEXURE A**) in terms of which Council can recognise and consider persons for exceptional achievements or for rendering of exceptional, meritorious service in the interest of the municipality. The By-Law requires that a Municipal Honours Advisory Panel should advise Council on the conferral of Municipal Honours. The municipality regularly receives applications for the consideration of Municipal Honours. However, since no advisory panel is currently approved by Council, the administration is unable to process applications.

38TH COUNCIL MEETING: 2026-02-25: ITEM 12.1

RESOLVED (majority vote with 4 abstentions)

Amended recommendation (b)

- (a) that Council establishes the Municipal Honours and Medals Advisory Panel;
- (b) that Council appoints the following five (5) Councillors, broadly representative of the Council, to serve on the Municipal Honours and Medals Advisory Panel, namely:

Ald JC Anthony; Cllrs A Ferns; E Groenewald, WF Pietersen and M Nkopane; and
- (c) that Council approves the nomination process for submission of names for consideration of five (5) people, broadly representative of the people of Stellenbosch Municipality, to serve on the Municipal Honours and Medals Advisory Panel.

12.2	IMPLEMENTATION OF WATER RESTRICTIONS – STELLENBOSCH MUNICIPALITY
------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date: 25 February 2026

1. SUBJECT: IMPLEMENTATION OF WATER RESTRICTIONS – STELLENBOSCH MUNICIPALITY

2. PURPOSE

To inform Council of the National State of Disaster, where the Western Cape, the Eastern Cape and Northern Cape have been declared Disaster Areas, and to obtain Council's approval for the implementation of water restrictions in the WC024 area.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

The country's Southern Region is experiencing a much lower rainfall within the 2024/25 season when compared to the same period last year. This has prompted the National Government to declare a National State of Disaster, where the Western Cape, the Eastern Cape and Northern Cape have been declared Disaster Areas, as stated in Annexure A. Stellenbosch Municipality, as with several other Western Cape Municipalities, is not immune to this and as a result the two Idas Valley Dams (1 & 2) started the summer season lower than normal within the 2025/26 season.

Proper rainfall is only expected in late April, and predictions are that the level of rain would be abnormally low. It is noted that the Idas Valley purification system only provides about 25% of all of Stellenbosch's water needs, and the remaining 75% of water sources are not under stress, at present. The Paradyskloof Treatment works is fed from the Theewaterskloof dam which is currently at 53,7% capacity at present, as well as from extraction from the Eerste River. In order to mitigate this, the following measures have been launched to reduce the demand from the Idas Valley treatment system:

- (a) A larger amount of water for the Idas Valley system is being "swung over" or redirected from the Paradyskloof Treatment works instead;
- (b) All of the borehole pumps within the affected area are being reactivated and will be used to supplement the system;
- (c) A further quota of Eerste River Water will be brought into the Idas Valley plant;
- (d) The public has been updated on the usage during the last week as well as targeted figures of desired consumption. However, even though the overall usage has been reduced on some days, it has not reached the desired target levels set;
- (e) As a last resort, the implementation of formal water restrictions would need to be activated across the Municipal area, which is the purpose of this Item.

The above is expected to drop the required water needed from the Idas Valley purification system, from 25% to 11% of the Municipality's total water supply. This means that all consumers within the Stellenbosch Municipal Area will be required to reduce consumption by at least 15% in order to not place the system under strain until the rainy season starts, and this also assumes a worst-case scenario where the winter rainfall arrives later than usual and is of a lower intensity than normal.

38TH COUNCIL MEETING: 2026-02-25: ITEM 12.2

RESOLVED (majority vote with 4 abstentions)

- (a) that Council notes the National State of Disaster, where the Western Cape, the Eastern Cape and Northern Cape have been declared Disaster Areas, as stated in Annexure A;
- (b) that Council approves the Municipality to implement Level 2 (20%) Water Restrictions, together with the already approved respective tariffs, from 01 March 2026, in order to effect the required potable water savings; and
- (c) that these restrictions remain in force until a change of these are announced by Council.

IDP KPA Ref No:

Meeting Date: 25 February 2026

1. SUBJECT: IN - KIND SUPPORT SERVICES FOR THE MONTREUX JAZZ FESTIVAL FRANSCHHOEK 2026**2. PURPOSE**

To inform Council of additional request received for in-kind support for sport and tourism related events hosted in Stellenbosch Municipality and to request Council's advice and direction regarding the nature and extent of support to be considered.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality continues to attract high-profile tourism, cultural, sporting, and film-related events. These events significantly contribute to the local economy, promote the Municipality as a destination of choice, and strengthen its international brand.

A recent approach from the organisers of the **Montreux Jazz Festival Franschhoek 2026** includes requests for municipal in-kind support to successfully host this globally recognised music and cultural event. The festival is scheduled to take place in Franschhoek from **27–29 March 2026** and is expected to attract significant domestic and international visitors.

Such events have proven potential to generate socio-economic benefits, boost visitor numbers, create temporary employment opportunities, and increase exposure of Stellenbosch Municipality to global audiences.

The Municipality's in-kind support could include logistical services, permitting assistance, traffic and security management, waste removal, town beautification, tourism promotion, and facilitation of local service provider participation.

38TH COUNCIL MEETING: 2026-02-25: ITEM 12.3**RESOLVED** (majority vote with 4 abstentions)

- (a) that Council notes and supports the request received for in-kind support in hosting the Montreux Jazz Festival Franschhoek 2026 within Stellenbosch Municipality. That any support be guided by the Municipality's Cost Containment Measures, Supply Chain Management Policy, and applicable legislative frameworks;
- (b) that Council acknowledges the potential socio-economic, tourism, and branding benefits derived from supporting such events.
- (c) that Council approves the waiver of applicable municipal rates and service charges related to such events, where appropriate, as part of the Municipality's in-kind contribution, subject to budget availability and compliance with relevant policies and regulations.

12.4	IMPLEMENTATION OF THE DETERMINATION OF UPPER LIMITS OF SALARIES, ALLOWANCES AND BENEFITS OF DIFFERENT MEMBERS OF MUNICIPAL COUNCILS
------	--

File ref:

Collaborator No:

IDP KPA Ref No: Good Governance and Compliance

Meeting Date: 25 February 2026

1. SUBJECT: IMPLEMENTATION OF THE DETERMINATION OF UPPER LIMITS OF SALARIES, ALLOWANCES AND BENEFITS OF DIFFERENT MEMBERS OF MUNICIPAL COUNCILS FROM 1 JULY 2025

2. PURPOSE OF REPORT

To inform Council of the provisions of Notice 54179 dated 20 February 2026 published in Government Gazette 728 in regard to the determination of the upper limits of salaries allowances and benefits for different members of Municipal Councils and to request Council to resolve on the implementation of the provisions from 1 July 2025.

3. DELEGATED AUTHORITY

The notice is published annually in terms of the Remuneration of Public Office Bearers Act, Act 20 of 1998. The notice requires Council to resolve on the implementation of the provisions in the Upper Limits Notice. The implementation can only take place after concurrence by the MEC for Local Government.

4. EXECUTIVE SUMMARY

The Minister of Cooperative Governance and Traditional Affairs annually publishes a notice that provides for the upper limits of salaries, allowances and benefits of different members of Municipal Councils. The notice for the 2025/2026 financial year was published on 20 February 2026 and is attached hereto as **APPENDIX 1**.

The provisions indicate a change in grading for the Municipality from a Grade 4 to a Grade 5. The cell phone allowances in the provisions are R3,600.00 per month and a data allowance of R317 per month, which is left unchanged from the previous upper limit publication. The increase is applicable from 1 July 2025 for the 2025/26 financial year, and the increase will be backdated.

Council resolved in 2017 to provide laptops to all councillors as a tool of the trade. Councillors received laptops after the elections in 2021. Agendas are distributed electronically, and councillors must use the data allowance to download council information as well as the attendance of Microsoft Teams meetings.

Based on updated calculations of total municipal income and population in accordance with the latest Upper Limits Notice, Stellenbosch Municipality now exceeds the Grade 4 threshold and will be classified as a Grade 5 municipality. This revised grading must be formally noted by Council and applied when determining councillor remuneration packages.

The tools of the trade make provision that security may be provided to the Executive Mayor, Speaker, and other councillors subject to a threat and risk analysis by the South African Police Service. In deciding on whether to grant tools of the trade Council has to take into account accessibility, affordability and cost control, equity, flexibility, simplicity, transparency, accountability and value of tools of trade.

38TH COUNCIL MEETING: 2026-02-25: ITEM 12.4**RESOLVED** (nem con)

- (a) that Council notes the provisions of Government Notice 54179 dated 20 February 2026;
- (b) that Council notes that, based on updated calculations, Stellenbosch Municipality now qualifies as a Grade 5 municipality;
- (c) that Council approves the implementation of the Upper Limits of the annual remuneration packages applicable to a Grade 5 municipality as set out in the Notice, with effect from 1 July 2025;
- (d) that Council confirms that the financial implications of implementing the revised grading are affordable and provided for within the approved budget;
- (e) that Council approves the cell phone allowance of R3 600 per month to all councillors;
- (f) that Council approves a data allowance of R317 per month for all councillors;
- (g) that the Administration be mandated to submit Council's resolution to the MEC for Local Government to obtain the required concurrence before implementation;
- (h) that upon receipt of MEC concurrence, the Administration implements the revised remuneration, allowances and benefits in accordance with the Notice;
- (i) that all other approved tools of trade, cell phone allowances and data allowances remain applicable in accordance with the Upper Limits Notice.
- (j) that it be noted that all councillors have been provided with the opportunity to receive a laptop as a tool of trade and that the tools of trade as set out in paragraph 15(1)(b),(d) be extended to councillors as indicated in the Notice as well as business cards and diaries to all councillors;
- (k) that Part-time Proportional Representation (PR) Councillors to have access to multi-digital facilities including facsimile, printer, photocopier and scanner through the office of the Speaker or Council Whip. It is noted that such facilities are available to part-time ward councillors at the ward office;
- (l) that Council consider the provision of security under the circumstances set out in item 14 (g) in the Notice, subject to a threat and risk assessment as and when required and after the elements referred to, that has to be taken into account, is available for Council consideration; and
- (m) that the written concurrence from the Minister of Local Government in the Western Cape be obtained for the payment of the above salaries, allowances and reimbursement benefits retrospectively as from 1 July 2025, before it be implemented.

5.	REPORTS BY THE MUNICIPAL MANAGER [G METTLER]
5.1	APPROVAL OF DRAFT ELECTRICITY TARIFFS FOR THE 2026/27 FINANCIAL YEAR FOR PUBLIC PARTICIPATION AND ULTIMATE SUBMISSION TO THE NATIONAL ENERGY REGULATOR OF SOUTH AFRICA (NERSA)

Collaborator No:

IDP KPA Ref No: Green & Sustainable Valley

Meeting Date: 05 March 2026

1. SUBJECT: APPROVAL OF DRAFT ELECTRICITY TARIFFS FOR THE 2026/27 FINANCIAL YEAR FOR PUBLIC PARTICIPATION AND ULTIMATE SUBMISSION TO THE NATIONAL ENERGY REGULATOR OF SOUTH AFRICA (NERSA)

2. PURPOSE

For Council to note the draft proposed Electricity Tariffs for the 2026-27 financial year and to approve such tariffs for public participation. The tariffs will then be used to apply to NERSA for approval and to comply with NERSA's requirements for Municipalities to submit tariffs that are public participated and Council approved by 31 March 2026.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

The Municipality normally public participates its proposed electricity tariffs for the coming financial year together with the budget process. However, the National Energy Regulator of South Africa (NERSA) has requested all Municipalities to submit their public participated draft tariffs to NERSA by 31 March 2026 for review.

Despite several requests to NERSA, the 2026/27 Eskom Average Tariff increase has not been released by them.

In March 2023, Council adopted the Electricity Distribution Ringfencing and Cost of Supply Study (CoS), which is valid for five years, and submitted such to NERSA on 25 June 2024.

In preparation for the 2026/27 financial year's electricity tariff application to NERSA, various workshops were held between the municipal appointed tariff modelling consultant, Financial Services and the Electrical Services Departments, and the revised set of proposed tariffs were interrogated in terms of the actual costs of providing the service, the proposals of the Cost of Supply Study which have been escalated per year, the affordability of the consumers, and the differing conditions of supply areas, etc.

Based on these factors, the simple average tariff increase of **10.67%** is proposed in this submission for public participation, even though there are various different proposed percentage increases in the different tariff categories, as per Annexure A. Kindly note that this does not mean an increase across all categories of the above percentage, but rather the averaged increase for all the different categories of tariffs, which each have their own proposed increase as per the table in Annexure A.

URGENT COUNCIL MEETING: 2026-03-05**RESOLVED** (majority vote)

- (a) that Council approve in principle the draft electricity consumption tariffs (**ANNEXURE A**), for public participation, and ultimate application to NERSA for the 2026-27 financial year;
- (b) that Council notes the average tariff increase of **10.71%** for public participation, even though there are various different percentage increases in the different tariff categories;
- (c) that the draft 2026-27 tariffs be published on municipal platforms (website and social media) for public consultation for 21 days;
- (d) that once the tariffs have been published as per NERSA's requirement, the tariff application be submitted to NERSA for approval; and
- (e) that the public participation input and the proposed amendments if any, be submitted to Council as part of the normal budget process for deliberation.

8.	STATUTORY MATTERS
----	-------------------

8.1	ANNUAL REPORT OVERSIGHT REPORT 2024/25
-----	--

Collaborator No:

IDP KPA Ref No: Good Governance and Compliance

Date: Council- 31 March 2026

1. SUBJECT: ANNUAL REPORT OVERSIGHT REPORT 2024/25**2. PURPOSE**

To submit to the Council, the Annual Report Oversight Report 2024/25 for **Adoption**.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The draft Annual Report 2024/25 was referred by the Council on 28 January 2026 to the Municipal Public Accounts Committee (MPAC), which fulfilled the oversight function on behalf of the Council. The appointment and mandate of the MPAC were informed as per Circular 32 of 2006, of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA).

Committee members, including the two co-opted members, have scrutinised the draft Annual Report 2024/25 and requested, where required, responses from the relevant Directorates. The Annual Report 2024/25 was objectively reviewed by the MPAC members to determine whether it was a true and accurate reflection of the municipality's performance for the year under review.

The public was invited to attend a public hearing and submit any representations on the draft Annual Report 2024/25. All the councillors were invited to attend the public hearing, which was held on 17 February 2026, to comment on the draft Annual Report 2024/25.

5. RECOMMENDATIONS

In accordance with Section 129(1) of the MFMA, it is **RECOMMENDED** to the Council:-

- (a) that the Council, having fully considered the Annual Report Oversight Report 2024/25 of the Stellenbosch Municipality, **ADOPTS** the Annual Report Oversight Report 2024/25;
- (b) that the Council, having fully considered the Annual Report 2024/25, attached as Annexure B to the Annual Report Oversight Report 2024/25, **APPROVES** the Annual Report 2024/25 without any reservations;
- (c) that the Annual Report Oversight Report 2024/25 be made public in accordance with Section 129(3) of the MFMA, and;
- (d) that the Annual Report Oversight Report 2024/25 be submitted in accordance with Sections 129(2) and 132(2) of the MFMA to the Auditor General of South Africa (AGSA), the Provincial Treasury: Western Cape, the Department of Local Government: Western Cape, and the Provincial Legislature: Western Cape.

6. DISCUSSION**6.1 Background**

The format of the Annual Report 2024/25 is guided nationally by the MFMA Circular 63 of 2012, which seeks to establish uniform reporting by all municipalities. It is envisaged that, with this template that national and provincial governments can better benchmark municipalities when there is a single reporting framework.

The draft Annual Report 2024/25 was completed and submitted to the Council on 28 January 2026 to be released for public comment. Subsequently, the draft Annual Report 2024/25 was released for public comment on 05 February 2026. Comments on the draft Annual Report 2024/25 closed on 27 February 2026. No written or electronic feedback from the community was received on or before 27 February 2026.

The Council should take note of the final version of the Socio-Economic Profile 2025, as incorporated in the Municipal Economic Review Outcome (MERO), which was only tabled in the Western Cape Provincial Parliament on 05 March 2026 and distributed to the municipalities on 06 March 2026. As a result of the late approval and distribution of the MERO, the socio-economic data could not be incorporated in the main body of the Annual Report 2024/25. The Council should therefore take note that the data in the Annual Report 2024/25 is based on the Local Government Socio-Economic Profile 2024.

All directorates were presented with the opportunity to review their information and provide feedback at the MPAC.

The MPAC's Annual Report Oversight Report 2024/25 is attached to the item as **ANNEXURE A**.

Commentaries from the MPAC and responses from the Directorates are incorporated as **ANNEXURE A** of the MPAC's Annual Report Oversight Report 2024/25.

Supplementary information per Directorate is incorporated as **ANNEXURE B** of the MPAC's Annual Report Oversight Report 2024/25.

The Final Annual Report 2024/25 is attached to the MPAC's Annual Report Oversight Report 2024/25 as **ANNEXURE C**.

6.2 Financial Implications

There are no financial implications beyond those that have been provided for in the 2024/25 MTREF Budget.

6.3 Legal Implications

In terms of Section 129(1) of the MFMA:

"The council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council has -

- (a) *approved the annual report with or without reservations;*
- (b) *rejected the annual report; or*

- (c) *referred the annual report back for revision of those components that can be revised."*

6.4 **Staff Implications**

This report has no additional staff implications for the municipality.

6.5 **Risk Implication**

None

6.6 **Previous / Relevant Council Resolutions:**

Item 8.1 of the 37th Meeting of the Council of Stellenbosch Municipality (28 January 2026).

1. INTRODUCTION

The annual report is one of the key instruments for transparent and accountable local governance and accountability. It is a post-financial year document that provides an overview of the financial and non-financial performance concerning the previous financial year, which in this instance relates to the 2024/25 financial year. The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) stipulates that the annual report must be tabled and passed by the municipal council.

1.1 PURPOSE

The purpose of this report is to present to the Council, for adoption, the Annual Report 2024/25 as well as the Annual Report Oversight Report 2024/25, as required in terms of Section 129 of the MFMA.

2. ANNUAL REPORT 2024/25

2.1 LEGAL FRAMEWORK

Herewith is an extract from the key legislative requirements as per the MFMA relating to the annual report:-

121. Preparation and adoption of annual reports.

- (1) Every municipality and every municipal entity must for each financial year prepare an annual report in accordance with this Chapter. The council of a municipality must within nine months after the end of a financial year deal with the annual report of the municipality and of any municipal entity under the municipality's sole or shared control in accordance with section 129.
- (2) The purpose of an annual report is—
 - (a) to provide a record of the activities of the municipality or municipal entity during the financial year to which the report relates;
 - (b) to provide a report on performance against the budget of the municipality or municipal entity for that financial year; and
 - (c) to promote accountability to the local community for the decisions made throughout the year by the municipality or municipal entity.

127. Submission and tabling of annual reports

- (2) The mayor of a municipality must, within seven months after the end of a financial year, table in the municipal council the annual report of the municipality and of any municipal entity under the municipality's sole or shared control.

129. Oversight reports on annual reports.

- (1) The council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council—
 - (a) has approved the annual report with or without reservations;
 - (b) has rejected the annual report; or
 - (c) has referred the annual report back for revision of those components that can be revised.

2.2 COMPONENTS OF THE ANNUAL REPORT

The format of the Annual Report 2024/25 is based on the annual report template issued by the National Treasury in terms of MFMA Circular 63 of 2012, which differs significantly from the Annual Report Guidelines (MFMA Circular 11) issued by the National Treasury in 2005.

The MFMA Circular 63 of 2012 has six (6) chapters and tries to cover everything that needs to be reported based on the MFMA and the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA).

3. ANNUAL REPORT 2024/25 CONSULTATION AND ADOPTION PROCESS

3.1 MUNICIPAL PUBLIC ACCOUNTS COMMITTEE (MPAC)

A Municipal Public Accounts Committee (MPAC) was set up under Section 79 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998). This was done through a Council resolution. The Terms of Reference task the MPAC with the responsibility to perform an oversight role over the process of preparing the annual report of the Council and to produce an oversight report based on its review of the annual report.

As required by the MFMA, the Municipal Manager attended the Council Meeting on 28 January 2026, where the draft Annual Report 2024/25 was tabled to be released for public comment as well as the MPAC Meetings, to answer questions posed by the MPAC Members and to respond to written and oral representations from the community. All the councillors were also invited to attend the public hearing and to deliberate on the draft Annual Report 2024/25.

Members and one Councillor of the community attended the public hearing.

The attendance of the MPAC members to review the draft Annual Report 2024/25 is recorded as follows:

TABLE 1: MPAC MEETINGS

3.2 ADOPTION AND PUBLIC CONSULTATION PROCESS

The draft Annual Report 2024/25 was tabled in the Council on 28 January 2026 as required by Section 127 (2) of the MFMA that:

"The Mayor of a municipality must, within seven months after the end of a financial year, table in the municipal council the annual report of the municipality."

In terms of Section 121(3) of the MFMA, the Annual Report of a municipality or municipal entity must include the following core components. These core components are formally annexed to the draft Annual Report:

- a) The Annual Financial Statements as submitted to the AGSA (Section 121(3)(a));
- b) the AGSA's audit report in terms of section 126(3) on those financial statements (Section 121(3)(b));
- c) the annual performance report of the municipality prepared by the municipality in terms of Section 46 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) (Section 121(3)(c));
- d) the AGSA's audit report in terms of section 45(b) of the MSA (Section 121(3)(d)); and
- e) particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraphs (b) and (d) in the MFMA (Section 121(3)(g)).

The draft Annual Report 2024/25 was made public on the municipal website within five (5) days and within seven (7) days in the local newspaper after it was approved by the Council on 28 January 2026. In addition, the draft Annual Report 2024/25 was also made available at all municipal libraries and other identified offices where the public could access the report.

Members of the community and other stakeholders were invited to submit written comments / inputs on the draft Annual Report 2024/25. The councillors, the community, and other stakeholders were also invited to attend the public hearing, which was held on **17 February 2026**, to present the MPAC with any oral or written input on the draft Annual Report 2024/25.

The draft Annual Report 2024/25 was furthermore submitted in terms of Section 127(5)(b) to the Auditor General of South Africa (AGSA), Provincial Treasury (Western Cape), and the Department of Local Government (Western Cape). The AGSA was invited to both the Council meeting and the public hearing, where the draft Annual Report 2024/25 was discussed. Afterwards, the directorates provide feedback on issues / remarks raised by the MPAC.

The closing date for public comments was **27 February 2026**. No written submissions from the public were received.

3.3 HIGHLIGHTS IDENTIFIED IN THE DRAFT ANNUAL REPORT 2024/25

The MPAC noted and congratulated Stellenbosch Municipality on the announcement by the AGSA that the municipality received a **clean audit outcome for the 2024/25 financial year**. Stellenbosch Municipality is once again able to report credible and reliable financial and performance results. The municipality maintained a healthy financial position and properly accounted for all expenditures and income, as evidenced by the clean audit outcome.

Further highlights and words of gratitude were noted as outlined below:

1. Great leadership was shown from the Executive Mayor, Municipal Manager, and the administrative team despite the various challenges posed throughout the financial year;

2. Given the many accomplishments made during the financial year under review, the MPAC praised the Municipal Manager for her exceptional leadership and strategic direction in ensuring that Stellenbosch Municipality is recognised as the best-functioning municipality in the Western Cape;
3. The MPAC Chairperson was also commended for the oversight role and his dedication throughout the entire oversight process;
4. The MPAC Chairperson thanked the two co-opted members for their dedication and participation during the annual report oversight process for the 2024/25 financial year; and
5. The Municipal Manager conveyed her gratitude to the MPAC, the political leadership, and the administration for their commitment to the municipality's success. The Municipal Manager emphasised that the municipality's accomplishments are the result of a collaborative effort, and that each and every effort made by all stakeholders is recognised and valued.

3.4 MPAC SITE VISITS

The draft Annual Report 2024/25 highlighted several projects that were either completed or in various stages of completion. The MPAC identified several projects and conducted site visits on 17 February and 02 March 2026. All the proposed projects and initiatives from MPAC are taken note of and will not be reflected in this report, except for informational purposes for the reader.

Furthermore, it should be noted that the status of the projects depicted in the table below is based on the information reported in the draft Annual Report 2024/25. Progress has been made after the 2024/25 financial year and will be recorded in the Annual Report 2025/26:

TABLE 2: MPAC SITE VISIT PROGRESS REPORT

Nr	Project name	Area verification of the project by MPAC	Status as per Annual Report	Status of the project	Remarks by MPAC
1	Upgrade of the Wemmershoek Wastewater Treatment Works (WWTW) – Phase 2	Wemmershoek	Phase 2 - Completed	Completed	The officials on site explain to the MPAC what they have done and will provide a report on the project.
2	Languedoc Bridge	Languedoc	Completed	Completed	The municipality showed the MPAC the completion of the bridge. MPAC was impressed with the work presented.
3	Calcutta Memorial Park	R301 in the Koelenhof area, Ward 19 of Stellenbosch Municipality.	Phase 1 completed	Phase 1 completed. Phase 2 is in progress.	The MPAC took note of the work done and is pleased that the memorial park will be able to accommodate everyone.
4	Follow up on the Agricultural Property Small Farmers Allocation: Mr H Arendse	Jamestown	Not recorded in the Annual Report 2024/25	Follow-up visit	The MPAC members were impressed by the advanced progress Mr Arendse made in terms of utilising the unused land and transforming it into a successful business.
5	Mountain Breeze Campsite	Paradyskloof	Not recorded in the Annual Report 2024/25	N/A	The MPAC members had concerns regarding the 14 occupants still staying on the premises and why the municipality incurred costs on maintenance if the campsite is closed to the public to generate income.
6	Solid Waste Management: Material Recovery Facility Landfill Gas Extraction	Stellenbosch Landfill Site	Completed	Completed	The municipality took the MPAC on a tour of how the waste picker system operates and how the gas extraction / flaring works, as well as the MRF operations. MAPC was impressed with the process and wishes the municipality well with its future

Nr	Project name	Area verification of the project by MPAC	Status as per Annual Report	Status of the project	Remarks by MPAC
					planning and implementation processes.
7	Extension of WWTW: Stellenbosch	Stellenbosch WWTW Plant	Completed	Completed	The process of the outlet and recycling was explained in detail to the MPAC. MAPC was impressed with the process and wishes the municipality well with its future planning and implementation processes.

4. GENERAL REMARKS FROM THE MPAC

The MPAC raised concerns about the high number of vacancies, particularly in critical positions and in key service delivery directorates.

The MPAC also expressed their concerns about maintaining the Mountain Breeze campsite while it is being disposed of by the Council.

5. CONCLUSION

As an MPAC, we believe that the Annual Report 2024/25 is a true and accurate reflection of the Stellenbosch Municipality's financial and non-financial performance for the 2024/25 financial year. MPAC indicated that the draft Annual Report 2024/25 was thoroughly unpacked. The final version of the Socio-Economic Profile 2025 was incorporated in the Municipal Economic Review Outcome (MERO), which was only tabled in the Western Cape Provincial Parliament by Minister Deidré Baartman on 05 March 2026 and distributed to the municipalities on 06 March 2026. As a result of the late approval and distribution of the document, the socio-economic data could not be incorporated into the main body of the Annual Report 2024/25. MPAC should take note that the data in the Annual Report 2024/25 is based on the Local Government Socio-Economic Profile 2024.

The oversight process for the Annual Report 2024/25 is herewith concluded, and as Chairperson of the MPAC, I would like to thank the MPAC Committee Members, the Executive Mayor, the Mayoral Committee, the Municipal Manager, the CFO and Directors, and Senior Managers, as well as all the officials, for their contribution to the development and finalisation of the Annual Report 2024/25. Their diligence and constructive commitment during this oversight period are noted and appreciated.

6. RECOMMENDED RESOLUTION TO BE ADOPTED BY THE COUNCIL

In accordance with Section 129(1) of the MFMA, it is **RECOMMENDED** to the Council:-

1. That the Council, having fully considered the Annual Report Oversight Report 2024/25 of the Stellenbosch Municipality, **ADOPTS** the Annual Report Oversight Report 2024/25;
2. That the Council, having fully considered the Annual Report 2024/25, attached hereto as Annexure B, **APPROVES** the Annual Report 2024/25 without any reservations;
3. That the Annual Report Oversight Report 2024/25 be made public in accordance with Section 129(3) of the MFMA, and;
4. That the Annual Report Oversight Report 2024/25 be submitted in accordance with Sections 129(2) and 132(2) of the MFMA to the AGSA, the Provincial Treasury: Western Cape, the Department of Local Government: Western Cape, and the Provincial Legislature: Western Cape.

 18/3/2026
Cllr Wilfred Pietersen
Chairperson: MPAC

ANNEXURE A:

MPAC COMMENTS AND FEEDBACK FROM DIRECTORATES

The feedback below, per directorate, was based on the Draft Annual Report 2024/25. The recent updates will be incorporated in the final Annual Report 2024/25.

1. ANNEXURE A 1: MPAC COMMENTS AND FEEDBACK FROM DIRECTORATES

1.1 Directorate: Office of the Municipal Manager

Mr Lunga Mvadedwa, the Chief Audit Executive (CAE), made a presentation as an orientation guide to the newly elected MPAC members.

The municipality takes note of the remarks made by MPAC on the demographic overview and the socio-economic context. The latest data will be circulated after receiving it from the Provincial Treasury *(no updates, as discussed, on outdated information will be incorporated in the Annual Report 2024/25)*.

It was raised throughout the Annual Report that departments report on highlights which are their job to do. The high turnover rate, which was listed under the Director: Corporate Services, was also a major concern in terms of the low staff morale and high number of vacancies in almost all departments.

Cllr E Groenewald made a plea to the municipality that posts that are long-standing and vacant should be filled (this is relevant to the Municipal Management Team)

All abbreviations in the Annual Report should be listed in the table of abbreviations for ease of reading.

The relevant department should explain to MPAC who monitors the implementation of the SDBIP.

The relevant department should explain to MPAC, which must assess the performance of the municipality.

The relevant department is to explain to MPAC the relationship / alignment between the IDP (where deliverables / outcomes are listed) and the SDBIP (where KPIs are developed).

It was highlighted by Cllr E Groenewald that the Directorate: Community and Protection Services reported a 100% performance rate in the SDBIP, but, as listed in the draft Annual Report, a lot of challenges were raised by the department.

All style, formatting, and grammatical concerns raised by the MPAC will be updated in the final Annual Report 2024/25.

TABLE 3: FEEDBACK: DIRECTORATE: OFFICE OF THE MM

Office of the Municipal Manager					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
78	Table 59: Risk Register	Cllr E Groenewald	Who identifies the risk in the municipality	The risk register was approved in October 2025.	Office of the MM Risk Management
78			Why are there no mitigating measures for the risks identified	The risk register was approved in October 2025.	Office of the MM Risk Management
79	Table 59: Risk register Risk 4: Economic Downturn due to civil unrest, crime and the impact of loadshedding		Confirm the correctness of the responsible directorates listed in the Risk Register	The risk register was approved in October 2025.	Office of the MM Risk Management
80	Table 59: Risk register Risk 3: High Vacancy rate		Explain the high-risk exposure	<p>The ratings and the risk exposure are reflected as presented after an assessment was done. In a follow-up assessment, the high-risk exposure can change to a lower level, for example, as action plans are implemented and take effect and as the risks are mitigated.</p> <p>The funded posts are in the process of being filled. Many posts have already been filled.</p> <p>Extensive recruitment drives were rolled out over the past year and even now.</p> <p>The unfunded posts are a different issue because it's around available budgets in terms of that, and obviously, as money becomes available, it is used to fund the positions, based on a prioritisation system where the MM meet with the directors and prioritise the importance and urgency of those posts.</p>	Office of the MM Risk Management
80	Table 59: Risk register Risk 4: Lack of ICT		Why does the municipality not collaborate with Stellenbosch University?	<p>There was a Memorandum of Understanding (MOU) between the municipality and Stellenbosch University regarding the CCTV system.</p> <p>This is because the standards set by the municipality require that the disaster</p>	Risk Management ICT

Office of the Municipal Manager					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				centre cannot be located too close to the institution; however, the municipality does have an off-site disaster recovery centre.	

The general remarks made, and all additional questions, can be routed and addressed at the MPAC meeting on 23 February 2026.

1.2 Directorate: Corporate Services

The MPAC raised concerns throughout the document pertaining to the vacant positions in critical departments. The municipality should budget and fill the posts or explain the delay in processes. It is requested to explain why these vacancies cannot be filled if there are talented and competent candidates to fill these positions. The high turnover rate is also a concern.

HRM only updated Table 174: Community Services) and Table 167: Law Enforcement Services.

The style, formatting and grammatical areas identified will be updated in the final Annual Report 2024/25.

			<p>Treasury) were awarded in the amount of R150 000;</p> <p>✦ An amount of R4 697 155 was spent on seminars, conferences, and workshops (training) for the whole organisation;</p> <p>✦ The total amount that was spent on all training and development activities for the whole municipality was R5 952 444, which is 0.88% of the payroll budget spent;</p> <p>✦ 101 vacancies filled during the 2024/25 financial year;</p> <p>✦ R50 million awarded for the filling of vacancies;</p> <p>✦ R50 million allocated for the filling of vacancies; and</p> <p>✦ 143 vacancies were advertised during May 2025.</p>	<u>143</u>	
40	1.2.16: Organisational Development Overview	Ms E Fredericks	<p>Indicate what plans are in place in terms of the challenges listed:</p> <p><u>Challenges:</u></p> <p>The challenges for the Department: Human Resources Management in 2024/25 are the following:</p> <p>Shortage of conducive training venues that can accommodate 10 or more learners</p>	Possible venues identified. Will speak to departments to finalise usage.	Human Resource Management
44-45	Table 16, Council from 01 July – 30 June 2025:	Ms E Fredericks	Include the dates when councillors resigned and were replaced.	The administration takes note and will update the Annual Report 2024/25 accordingly.	Committee Services

CORPORATE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
					Council Support to assist with the correctness
47	2.1.4.3: Portfolio Committee: Rural Management – Table 22	Ms E Fredericks	What was the reason for only meeting once throughout the financial year?	The Section: Committee Services schedules meetings as and when it receives items for a committee to sit on. In a case where the user department doesn't submit items for meetings, then no meeting takes place.	Committee Services
48	2.1.4.5: Portfolio Committee: Financial Management	Cllr E Groenewald and Cllr O Jooste	What were the reasons that no meetings were held throughout the financial year? It is worrisome that no meetings were held, as it is an important portfolio that should report on all financial matters of the municipality.	The Section: Committee Services schedules meetings as and when it receives items for a committee to sit on. In a case where the user department doesn't submit items for meetings, then no meeting takes place.	Committee Services
50	2.1.5.1: MPAC	MPAC	Confirm the correctness of the committee and the meeting dates held.	17 October 2024 12 June 2025	Committee Services
	2.1.5.2: LLF	Ms E Fredericks	Confirm whether the position of Cllr I de Taillierfer has been filled.	The position is still vacant on the LLF.	Committee Services
56	Fifth paragraph from the top: "The minutes of meetings are compiled by the ward administrator..."	Cllr E Groenewald	Explain what happens to the ward committee minutes, especially those concerns raised in the minutes.	The ward committee meeting minutes are kept on record at the office of the Executive Support Officer to be made available upon request by the Speaker. The issues raised by Ward Committee members noted in the minutes are followed up on by the Ward Administrator, who channels them to the relevant departments.	Council Support
71	General note on the ward committees' chapter	Cllr O Jooste	Explain the definition of a public meeting. Clarify why no public meetings were held in Ward 21.	Three (3) public meetings were indicated in the table. The administration will update the table and will reflect it in the final Annual Report.	Councillor Support
	Ward 22, Table 54	Ms E Fredericks	Explain why there are no monthly reports submitted for Ward 22.	Monthly reports are compiled and handed in by ward administrators. Cllr E Groenewald never made use of the Ward Administrator; hence, no reports were submitted. At that time, a ward administrator was available; however, due to a language barrier, the ward	Councillor Support

CORPORATE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				councillor took her own minutes and did not submit the monthly reports. The request will be followed up with the ward councillor on whether the reports were submitted to another department.	
73-74	Table 56: Summary of public meetings held as at 30 June	Cllr E Groenewald MPAC	Explain why the Ward 22 summary is missing in this table. The Cllr requests a public apology from the relevant department that omitted the information in the Annual Report 2024/25.	No information was recorded for Wards 4, 8, 9, 16, 17, 18 and 22, as no public meetings were held in these wards in the reporting period. Please refer to the updated table, including the data requested highlighted in green.	Councillor Support
			Explain why the summary information is missing for wards 4, 8, 9, 16, 17, 18 and 22.	The Annual Report 2024/25 will be updated with the information received from the Department: Council Support.	Councillor Support
93	Table 74: B-EEE Compliance Performance Information – Management Control	Cllr S Schäfer	The department should clarify and confirm the correctness of the breakdown of the directors, one female director and three male directors, totalling four. List the directors to give more clarity.	The list refers to Directors Chandaka, Barnes and Boshoff, and the one female director refers to Ms de Beer, former Director: Corporate Services, who was still part of the organisation at the time. The MM and CFO are placed in a special bracket and do not form part of the breakdown.	Human Resource Management
93-94	Table 76: Bylaws and Policies	Cllr S Schäfer, supported by MPAC	Clarify why there are no dates of public participation for the bylaws and policies. The department should update the table with the correct dates and indicate if there was public participation.	All budget-related policies and other relevant policies applicable to compliance dates underwent public participation. The CFO confirmed that all budget-related policies underwent public participation. The administration will update the table and will reflect it in the final Annual Report 2024/25.	Record Management and Auxiliary Services
154	3.3 Property Management: 4 th bullet from the bottom: 📌 The appointment of a quantity surveyor who will also act as a principal agent for the NPK Building and Stellenbosch Townhall	Cllr S Schäfer Cllr E Groenewald	Provide more context (status quo) of the refurbishments of the NPK Building and Stellenbosch Town Hall complex. Cllr S Schäfer enquired for four years about the paving around the Town Hall Complex.	Only internal renovations, fire, plumbing, electrical, HVAC and lift works were done under Tender B/SM 40/22. Waterproofing and minor remedial work were done under Tender 25/26. Windows / doors and painting will be done under Tender B/SM 70/26.	Property Management and Municipal Building Maintenance

CORPORATE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
	Complex refurbishments was successfully awarded and appointed under Tender B/SM 74/25. The construction contractor will be appointed in the 2025/26 financial year.		It seems more costs were incurred at the NPK Building; explain what the original contractor did and what the cost was		
	3.3 Property Management: Last bullet from the bottom: Drafting of 'as built' building plans for the Municipal Townhall Complex (FQ 130/24) was successfully completed.		Confirm and provide proof that the professional architect was monitoring and overseeing heritage building works / alterations, and upgrades.	See Annexures 1, 2 and 3 (confirmation from Heritage Western Cape on approval of close-out reports for Bergzicht and Voorgelegen) and the appointment letter from Stellenbosch Municipality. The Close-out Report for the Rhenish Complex is still outstanding and must be submitted.	Property Management and Municipal Building Maintenance
155	The Planning Phase: 8 th bullet: Appointment of a quantity surveyor that will also act as a principal agent for the renovation of the Franschhoek Admin Offices and Townhall	Cllr S Schäfer	Explain the reasons for the delay in this activity.	Lack of capacity: the department is severely understaffed.	Property Management and Municipal Building Maintenance
156	*Under tenders /quotations were awarded: 6 th Bullet 11 th Bullet	Cllr O Jooste	Please specify the location of the structural upgrade for the Jamestown Economic Hub.	This was only a naming confusion; it is the Jamestown Library and Ward Office. Tenders B/SM 36.24 and B/SM 26/25. Work was completed.	Property Management and Municipal Building Maintenance
			Provide the status of the upgrade of the Millennium Hall in Pniël.	The contractor is busy with the work, and it will be completed by the end of February / early March 2026. Due to delays, penalties are applied to the contractor.	Property Management and Municipal Building Maintenance
230	3.11.2 Human Resource Services	Cllr E Groenewald Cllr S Schäfer	General remark: The high number of vacancies in most departments and the high turnover rate are of most concern.	The department takes note of the remark. Training was provided to officials.	Human Resource Management

CORPORATE SERVICES															
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department										
			<p>The objectives indicated under this section are beautifully captured, but the HR Department is failing at these listed objectives.</p> <p>The department should provide what was done in terms of the objectives.</p>												
232	3.11.3 ICT Highlights	Cllr E Groenewald	Indicate how the municipality is working together with Stellenbosch University.	This matter was answered by the Municipal Manager during the respective slot.	ICT										
234	3.11.4 Legal Services	Cllr E Groenewald	<p>A repetitive note throughout the Annual Report:</p> <p>This is one of the most critical departments that is being neglected.</p> <p>Why does the municipality not appoint more attorneys?</p> <p>Is it not better to do in-house legal work than appoint consultants?</p>	<p>There is no other post on the organogram except for the Chief Legal Advisor, with one senior admin officer to assist the CLA, who is legally qualified, but no separate post for an attorney.</p> <p>Currently, there is no funding available to fund the department posts, and no attorneys have been appointed.</p> <p>The Municipal Manager stated that the municipality has a tender in place where a panel of attorneys assist the municipality.</p> <p>Special rates apply to utilise the attorneys for all legal matters.</p> <p>The organisational structure was done and approved in 2017, but the municipality will consider the input.</p>	HRM Legal Services										
243-245	Tables 187-191	MPAC	Confirm the totals, as it is not consistent with the total of 1 168 officials as stated in the narrative under 4.1: Introduction to the municipal workforce	<p>The actuals as at 30 June 2024/25 are as follows:</p> <table><tr><td>A</td><td>444</td></tr><tr><td>C</td><td>649</td></tr><tr><td>I</td><td>5</td></tr><tr><td>W</td><td>70</td></tr><tr><td></td><td><u>1 168</u></td></tr></table>	A	444	C	649	I	5	W	70		<u>1 168</u>	Human Resource Management

					and Financial Management Services
253	Table 2026: Councillor and staff benefits	Cllr E Groenewald	Explain the high increase in the medical aid contributions.	<p>This is outside the scope of the Human Resources and / or Finance Departments. The medical aid schemes determine increases.</p> <p>The CFO indicated that there is an increase in the medical aid fund, which impacts the general increases effective from January annually.</p> <p>The amount only refers to councillors, excluding municipal staff.</p>	Human Resource Management and Financial Management Services

The general remarks made, and all additional questions, can be routed and addressed at the MPAC meeting on 23 February 2026.

1.3 Directorate: Infrastructure Services

It is requested to provide profiles of the departments in Infrastructure Services.

All style, formatting and grammatical areas identified will be updated in the final Annual Report 2024/25.

TABLE 5: FEEDBACK: DIRECTORATE INFRASTRUCTURE SERVICES

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
100	Under 3.2.3: Water Provision, fourth paragraph, second sentence	Cllr S Schäfer	Explain or clarify why the statement of flooding events of 2023 is reported in the Annual Report for 2024/25. It is proposed to report on events within the 2024/25 financial year and remove the sentence.	Emergency temporary repairs were affected at the time of the flood events in 2023 to restore immediate services, with the intention of effecting the permanent repairs thereafter. Some of these permanent repairs required redesign and were undertaken in the 2024/25 financial year, as per the Disaster Grant funding received, which straddled both financial years as well.	Water and Wastewater Services
100	Under 3.2.3: Water Provision, 6th paragraphs, by the last bullet point	Cllr E Groenewald	There are no forced licence applications in place, which pose a major risk to the municipality's ability to manage compliance and regulatory requirements effectively. The structure of the sentence has no meaning.	The Stellenbosch borehole licences are in place, and as per the licence agreement, they need to be reviewed mid-term. This review was completed in 2025 and submitted to the Department of Water and Sanitation for their review and comment.	Water and Wastewater Services
101	Fourth paragraph from the top, second sentence	Cllr E Groenewald	At what cost does the municipality use external laboratories or contractors? Why is all equipment outsourced?	R2 786 740.00 for the year. This covers water compliance, raw water risk, wastewater effluent and river quality. Operational testing is conducted internally. Independent compliance monitoring is undertaken by an external lab, as per legislation. Operational equipment is not outsourced, but equipment for occasional tests (e.g., a full SANS241 once a year) is significantly cheaper and more practical to outsource the test, which must be done in any event for independent monitoring.	Water and Wastewater Services

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			<p>Explain what constitutes commercial losses.</p> <p>The department should explain how it differs from the unbilled metered / unmetered.</p>	<p>There are two main types of losses; physical losses are what's lost, either through a leakage, a reservoir overflow or a flash. Whereas commercial losses are unaccounted for if there may be water theft.</p> <p>That would be a commercial loss. There would be unbilled water, for example, water used by fire trucks. It is taken off the network, but there's never any revenue for that.</p>	Water and Wastewater Services
			Please provide a breakdown of the diagram in relation to billing.	The non-revenue water total is the sum of the water losses (physical losses 23.8% + commercial losses 4.2% = 28%) plus the unbilled unmetered (0.2%) and unbilled metered (3.0%) = a total of 31.2%.	Water and Wastewater Services
	Figure: Water balance sheet	Cllr S Schäfer	<p>Define physical losses and explain what measures are in place to address the losses.</p>	<p>Physical losses (also referred to as real losses) in a municipal water system are defined as the actual loss of treated water from the distribution network before it reaches consumers. These losses occur due to leaks in households, pipe bursts, faulty joints, deteriorated infrastructure, reservoir overflows, and pressure-related failures within the system.</p> <p>To address physical losses, the following measures are in place and / or under development:</p> <p>Pipeline Rehabilitation and Replacement Replacement of ageing, corroded, or high-failure pipelines identified through condition assessments and break history analysis. Upgrading older infrastructure with durable, corrosion-resistant materials such as high-density polyethylene (HDPE) or PVC pipes.</p> <p>Leak Detection and Repair Response: Deployment of repair teams to respond to reported leaks and bursts to minimise water loss.</p> <p>Pressure Management (Early Implementation Stage): Installation of pressure-reducing valves (PRVs) to control excessive system pressure. Optimisation of pressure zones to reduce stress on pipelines and fittings. Full implementation is subject to budget allocation and capital funding approval.</p> <p>Smart Water Management Systems (Planning Stage) Proposed implementation of SCADA (Supervisory Control and Data Acquisition) systems to monitor flow rates, pressures, and reservoir levels in real time.</p>	Water and Wastewater Services

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				Deployment of real-time monitoring sensors and flow meters to detect abnormal usage patterns and potential leaks. Implementation is dependent on securing funding and phased capital investment.	
101	Water balance sheet	Cllr E Groenewald	What is the cost of buying water from the City of Cape Town?	For 2024/25, the total bulk purchases were R6 437 014.	Water and Wastewater Services
			Provide statistics / data and the cost of the pipe leakages overall.	This would require further analysis. However, the expenditure of the pipe replacement programme in the 2024/25 financial year was R28.6 million, and for the water meter replacement and leak repair programme, it was R7.5 million.	Water and Wastewater Services
102	Second paragraph from the top: "The current year has seen higher-than-average rainfall, and most bulk dams are full as at 30 June 2023.	Cllr S Schäfer	Confirm the correctness of the statement. Proposed to remove the sentence if it is not applicable to the year under review.	Correct, that is an error. It was applicable to the 2023/24 financial year. Suggest removing the sentence. The administration will update the table and will reflect it in the final Annual Report.	Water and Wastewater Services
103	Table 83: Total use of water	Cllr S Schäfer	Explain the trend from 2020/21 until 2024/25 of the % of physical water losses. What is the reason, and what measures are put in place?	The percentage of physical water losses increased from 2020/21 to 2024/25 due t/o ageing and deteriorating infrastructure, frequent pipe bursts, deferred maintenance arising from budget constraints, and limited implementation of advanced monitoring systems. The situation has been further exacerbated by critical technical vacancies within the Operations Section, which have affected proactive maintenance, timely repairs, and effective water loss control. Measures currently in place include the replacement of high-risk pipelines with durable materials such as HDPE and PVC, as well as reactive repair interventions. Additional measures, including pressure management, SCADA implementation, establishment of District Metered Areas (DMAs), and the filling of critical technical posts, are underway at present.	Water and Wastewater Services
			Follow-up: Is it safe to assume that extra emphasis will be placed on cutting down on physical losses at this stage or for the next few years?	It has been the focus for the last few years. Part of that is in the detail there is regarding an ageing network. What was done was based on the pipe replacement statistics that the municipality has over the years, as well as the report that was commissioned on it. It ultimately shows a scientific ranking of where the sort of pressure nodes are for the ageing infrastructure that's prioritised. Those 12 work	Water and Wastewater Services

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				<p>packages are the ones that the municipality has been focusing on for the last year, and luckily, in the first six months of this year, the department has prioritised those work packages and actually extended the 12-month budget for 2025/26 already in the six months of the pipe repair programme.</p> <p>Furthermore, more focus was on the household leak repair programme as well as the rollout of the water management devices. It is important, especially for indigent customers who receive the 6 kilolitres free and who also want to maybe increase the threshold. But as a management device, the department receives a list from the finance department on who it should be rolled out to, and then there's an engagement programme with the residents. The municipality fixes the leaks even within the vicinity and deals with all the meters.</p> <p>The municipality also uses the Let's Fix It platform, where areas are being attended to as quickly as possible.</p>	
			Does the department rely on the Let's Fix it app to determine when to deal with complaints such as pipe bursts, leakages, or would a dropping pressure somewhere in the system be picked up somewhere, and somebody would be able to conclude that there is a problem somewhere?	<p>The department is dependent on the complaints via the Let's Fix It line to identify whether there's a pipe burst, a water leak or a meter-leaking issue. The municipality has its own internal records where it records all the pipe bursts per street and the date. Additionally, the municipality also uses a pipe prioritisation study that lists about 150 critical pipelines within the network. Data includes the pipe burst records as well as inward operational inputs, including the available funding from the municipality, whereby a sound decision is made on which pipeline needs to be replaced.</p> <p>When a pump station goes down or a reservoir level drops, these events provide the department with an immediate indication, prompting an alert to the team or supervisors on the phone to conduct physical checkups.</p>	Water and Wastewater Services
	Table 84: Water Service Delivery Levels	Cllr O Jooste	Confirm and clarify why the totals are the same for 2023/24 and 2024/25. Confirm if the table is updated.	The administration will update the table and will reflect it in the final Annual Report 2024/25.	Water and Wastewater Services
		Cllr E Groenewald	Explain where the 120 comes from (ito: other water supply more than 200m from dwelling).	The administration will update the table and will reflect it in the final Annual Report 2024/25.	Water and Wastewater Services Informal Settlements

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
105	Table 85: Access to water	Cllr E Groenewald	How is the free rate calculated for communal taps?	Currently, the communal taps are installed at the informal settlements, and water is measured through a bulk meter, but the occupiers are not charged for water consumption because they are all indigent.	Water and Wastewater Services Financial Services
			What is the availability of smart water meters?	Smart meters or water management devices are available, procured and being rolled out to different neighbourhoods at the instruction of the Financial Services Department.	Water and Wastewater Services
			What are Impala meters, and how many make use of them?	No mention of Impala meters on the page. The councillor could mean Ikapa Water Meters. Financial will have the number of users of the water management devices (WMDs).	Water and Wastewater Services
106	Table 87: Sanitation service delivery levels	Cllr S Schäfer	Explain why the total number of no-toilet provisions is so high in 2024/25.	The informal settlements ultimately require formal upgrades, town planning rights, and then the rollout of formal sanitation.	Water and Wastewater Services
		General remark	Confirm the correctness and completeness of the entire table and provide an updated version to MPAC.	The administration will update the table and will reflect it in the final Annual Report 2024/25.	Water and Wastewater Services
108	Second paragraph from the top: "The municipality will also commence the establishment of a control room in the 2025/26 financial year.:"	Cllr E Groenewald	Provide a clear context and background of the paragraph.	The SCADA project requires the establishment of a dedicated control room, from which personnel will monitor the network on a 24/7 basis. The implementation of the control room will, however, no longer commence in the 2025/26 financial year, as the Alternative Energy Generation Committee has recommended that the recruitment and selection process be finalised before proceeding with the physical establishment of the control room. Human Resources has provided the Total Cost of Employment (TCOE) for the proposed control room personnel. These positions will be incorporated into the proposed organogram for consideration by the Restructuring Committee.	Electrical Services
108	Third paragraph from the bottom: "Section 33 of the MFMA will commence"	Cllr E Groenewald	The department should take note that the reader of the Annual Report 2024/25 does not consist of the legislation. If the legislation is referred to, it should be cited in the	The IPP project entails a 20-year contract between the IPP and the municipality and therefore triggers the requirements of Section 33 of the Municipal Finance Management Act 56 of 2003 (MFMA). This section of the Act governs contracts that impose financial obligations beyond three financial years and is intended to ensure transparency, public participation and intergovernmental oversight.	Electrical Services

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			document. Provide context and elaborate on the narrative.	<p>In compliance with these requirements, the draft Power Purchase Agreement (PPA), together with an information statement outlining the municipality's financial and contractual obligations, must be made public at least 60 days before the meeting of the municipal council at which the contract is to be approved. This process enables community input and ensures that the financial implications of the project are clearly understood before a final decision is taken.</p> <p>In addition, the municipality is required to request and consider comments from the National Treasury, the national department responsible for local government, and the responsible national department. Their inputs form part of the governance and oversight framework designed to safeguard long-term municipal financial sustainability.</p> <p>The PPA has not been finalised yet, so this section ..."which is estimated to be completed by 30 September 2025" can be removed.</p>	
110	Table 94: LV Electricity network upgrades	Cllr E Groenewald	The department should note that all the streets listed are in Krigeville. Provide clear context and clarify where in Krigeville (R669 180.09) this upgrade is.	<p>The overhead-to-underground cables project was carried out in School Street, Ackermann Street, Jean Street, and Cruse Street.</p> <p>The Annual Report will be updated accordingly.</p>	Electrical Services
112	Table 97: Number of employees in the Department: Electrical Services	Cllr E Groenewald	The Department: Electrical Services must provide feedback on the reasons for the high number of vacant positions.	<p>The Department: Electrical Services has a total of 132 posts in the microstructure, of which 44 are vacant. 15 of these are funded and vacant, and 29 are unfunded and vacant. The reason for the high vacancy rate is that not all of these posts on the structure are funded, and a request for them to be funded / filled has been initiated on various occasions.</p> <p>The department is challenged to attract suitably qualified and experienced employees due to the better remuneration packages that are being offered by neighbouring municipalities, resulting in recruitment and selection processes being prolonged. Once employees are thoroughly trained and exposed to all facets of the municipal electricity environment, these employees often find attractive options at neighbouring municipalities. The department is, however, continuing to undertake the recruitment and selection processes.</p>	Electrical Services

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
	32.2.6.1: Waste Management – a) Development of additional waste disposal cells project – Landfill gas extraction and flaring	Cllr O Jooste	What is the amount that the municipality is saving for the transport to Vissershok Landfill?	±R2 million per month in savings. The municipality's operational expense at its landfill has increased by roughly R1 million per month.	Waste Management
		Cllr R Cupido	Provide a financial breakdown of the project. What could be the cost and income generated?	R18.1 million R110 000 monthly for operations and maintenance. No income will be generated. Possible revenue could be generated through the carbon markets, and this will be explored.	Waste Management
		Cllr S Schäfer	<u>Follow-up: Landfill gas extraction and flaring</u> What is the status quo of this project? Confirm if the municipality is still going to use the gas for generating energy, and if it is, is it still to be considered or investigated, or is it just going to be flared?	The Director: Infrastructure Services indicated that at the stage when the alternative energy programme started, this was one of the prongs to obtain at least seven megawatts, which was anticipated for. At the time, based on initial designs, it was hoped that at least one megawatt would be generated from the flaring. It was positioned as two separate projects. The first was just the flaring and putting in the infrastructure, and the second was actual combustion or energy recovery from it. A feasibility study was conducted and found that the one-megawatt portion, the combustion portion, to translate it into actual usable energy, wouldn't be feasible for the tonnages, hence the municipality proceeded with the first part.	Waste Management
113	Headings: Compliance Monitoring Committee	Cllr E Groenewald	Provide context and define what is referred to as compliance.	The landfill site has a waste management licence, and the municipality is required to comply with all the conditions within the licence. The municipality conducts internal and external audits, and the residents play an oversight role through the monitoring committee.	Waste Management
			Is this an active committee?	Yes, the committee is active, meets quarterly and is chaired by a resident.	Waste Management
114	Heading: Area Cleaning	Ms E Fredericks	Who is the contractor responsible for cleaning the Stellenbosch CBD?	Impolo Trading is the appointed contractor.	Waste Management
		Cllr R Cupido	The municipality makes use of EPWP workers, but why is there a decline in the appointment of EPWP workers as listed in Table 98?	Fewer EPWP workers have been approved on the EPWP business plan. The approval is based on the business plan.	Waste Management

INFRASTRUCTURE SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			Clarify whether the approval is per the criteria or budget constraints.		
		Cllr S Schäfer Ms E Fredericks Cllr E Groenewald	What is the process for illegal dumping? What is the cleaning programme per area, and who monitors the programme? Provide the list of all hotspot areas.	Illegal dumping is cleaned as per the schedule and based on complaints. The schedule is monitored by the manager and her team. The schedule and map with hotspots will be provided to the MPAC as an additional annexure.	Waste Management
115	Heading: No Dumping Signs	Cllr S Schäfer	What is the legal requirement to put up signage boards? If it is not legally required, please provide clarity on the cost and why the signage is put up in the areas.	Signboards are required to discourage illegal dumping and to alert possible transgressors that it is illegal to dump, and they could receive a fine. Cost: R619.85 per signboard.	Waste Management
	Table 98	MPAC	Provide a total at all tables listed.	Not all tables require totals, but will include them, where possible.	Waste Management
116	Heading: Refuse Collection – The last sentence of the paragraph	Cllr E Groenewald	Confirm the correctness of the statement. Explain what the molok system is, as this was proposed to be put up in Ward 22. Provide more context on the installation of moloks, the areas installed and the cost of the project / programme.	No mention of a Molok system is made in the Annual Report.	Waste Management

169	Upgrading of early childhood development centres on municipal land	Cllr N Gugushe	Is it the municipality's responsibility for upgrades on government projects? Provide a list of ECDs and their location.	The municipality is responsible for the maintenance of property owned by the municipality. Both facilities are under a lease agreement with NGOs, operated as ECDs in the Kayamandi area and belong to the municipality. The GPS locations are as follows: ↓ Kuyasa Horizong Empowerment: Luyolo Road, Kayamandi - 33.9170014, 18.840975; and ↓ StellCare (Sizamile): Ndazwumbi Road, Kayamandi - 33.915706, 18.8482262 .	Community Development
174	Second paragraph from the top, last sentence: "The construction tender for Phase 2 is expected to be advertised within the current financial year."	Cllr S Schäfer	Elaborate on the statement, and in which financial year is it expected to be advertised? Provide the status of the project.	Phase two – Vloittenburg New Reservoir and Pipeline (pump station and water mains) involve the installation of 5 km of bulk water mains connecting phase one at the Longlands area (Vloittenburg) to the new pump station being built at Onderpapegaaiberg. This construction tender is expected to be advertised in June 2026, and the project will be completed around December 2027.	PMU
177	Heading: Upgrades to the Plein Street Stellenbosch Public Library	Cllr E Groenewald	Explain what is causing the delay in the completion of this project?	The roll-over Provincial Treasury grant funding for the library project has only been approved during November 2025 and approved by the Stellenbosch Council meeting during the adjustment budget submission in January 2026. The Directorate: Community Services funded the capital budget in the interim to keep the project active while waiting for the grant funding. The initial timeframe for the manufacturing and delivery of the lift was underestimated, and after all documentation was sorted, the delivery date was confirmed to be at the end of February 2026. A couple of variations to the refurbishment of the existing joinery and painting work to the library to stay within the budget were finalised after the adjustment budget was approved.	PMU Community services
187	Table 127: Building Plans and Land Use Applications	Cllr E Groenewald	What are the backlogs of various types of applications, and what	Backlogs have occurred due to vacancies and the limited number of staff available in various departments to comment on the building plans. The Infrastructure: "Development Services" Department has filled its critical vacancies of plan examiners, which has seen an increase in	PMU

			<p>has been done to eradicate them?</p> <p>The answer should focus on backlog figures of land use and building plan applications as at 30 June 2025 and not on corrective measures for backlogs.</p>	<p>throughput of building plan approvals. The municipality is concentrating on capacitating all the remaining commenting directorates via the filling of critical technical vacancies. Building plan applications are discussed at interdepartmental meetings scheduled between the Infrastructure and Planning Directorates, which take place monthly.</p> <p>The Municipal Manager further elaborated that the process of building plans information can be read together with the Annual Performance Report 2024/25, which is an annexure to the Annual Report 2024/25. If the applications are not finalised within the specified timeframe, they will be finalised the following month, or soon thereafter, depending on the nature of the application.</p>	

The general remarks made and all additional questions, can be routed and addressed at the MPAC meeting on 23 February 2026.

1.4 Directorate: Planning and Economic Development

MPAC requests Housing Development and Informal Settlement to provide clearer maps / images / figures for ease of reading.

It is requested to provide a profile of the Housing Development Department.

All style, formatting and grammatical areas identified will be updated in the final Annual Report 2024/25.

TABLE 6: FEEDBACK: DIRECTORATE PLANNING AND ECONOMIC DEVELOPMENT

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
16	Table 2: Municipal Ward Demarcation	Ms E Fredericks	Please provide a map of the boundaries for Ward 18-19. Additionally, can you clarify whether Dalewood Farms is included in the Stellenbosch Municipal demarcation and if "Poultry" is the correct spelling? Additionally, can you clarify whether Dalewood Farms is included in the Stellenbosch Municipal demarcation and if "Poultry" is the correct spelling?	As per the attached Ward 18 boundary map, Dalewood Farms and Poultry fall outside of the Stellenbosch Municipality boundary. The maps are attached as requested and show all the farm portions.	GIS
122	Paragraph under image 8: "Consultants were appointed to design internal services as well as top structures for the La Rochelle and Klapmuts housing projects."	Ms E Fredericks	Confirm the status quo of the project: name the timeframe for when it will be completed.	<p>Phase 1 of the project has been completed, whereby the consultant has finalised the draft detailed engineering designs as well as the draft architectural drawings. These efforts all culminated in a tender document, which was presented to the BSC, which approved the specifications for the installation of infrastructure services and top structures.</p> <p>Phase 1 of the project has been completed. Meetings were held with the community about relocating the current inhabitants to the site during this financial year.</p> <p>There was a request from the Department of Development, Environmental Affairs and Development Planning that the municipality should just revisit the original record of decision (ROD), which is an approval that is issued by the Department of Environmental Affairs</p>	Housing Development

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				and Development Planning, and it confirms that the development deals with all the environmental issues that should arise or have been identified on the site.	
122	General Remark by Cllr E Groenewald	Cllr E Groenewald	Confirm what is hindering the progress in this particular department. Explain what is happening to the grants received and whether consequence management is being implemented.	<p>The delivery of housing opportunities is a multi-disciplinary function that affects various departments in the municipality. These approvals to implement a housing project are time-bound and linked to the overall capacity of various departments.</p> <p>It should also be noted that the internal departments, national and provincial departments, also comment on these projects, and no decision can be taken until all departments have submitted their comments.</p> <p>If a department submitted negative comments, the Section: Housing Development then needs to interrogate the comments and engage with the said department.</p> <p>This tedious process should be seen in context with human capacity constraints. The Department: Integrated Human Settlements has submitted a new organogram that would assist in streamlining various housing-related matters and timeframes.</p>	Housing Development
123	Table 105: Human Settlement Development Grant	Cllr S Schäfer	Explain why there are zero sites, but units are planned for. Confirm the figures / totals in the table (is it per million or thousand?).	<p>The 170 sites were already completed; therefore, no service sites in Table 105 are reflected.</p> <p>The operational funding is in Table 105, specifically for top structures on the Provincial Business Plan.</p> <p>The PMU resubmitted a tender to build the top structures, which fall under the operational budget.</p> <p>It should be noted that the first tender could not be awarded due to the non-responsiveness of the bidders.</p> <p>The figures in Table 105 should reflect million, but the heading should not indicate R'000 and should be removed.</p> <p>Table 105: Human Settlement Development Grant (HSDG)</p>	Housing Development

PLANNING AND ECONOMIC DEVELOPMENT								
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response				Responsible Department
				Total	60	0	23 200 000	
				The administration will update the table and will reflect it in the final Annual Report 2024/25.				
125	Heading b) Erf 7001, Cloetesville	Cllr W Pietersen	Could you please provide an update on the progress made to date on this project? MPAC notes that there are no updates for the past financial years in the annual reports.	Development rights were only obtained during the 2024/25 financial year under review. The tender has been advertised, and no bids were received. The Section: Housing Development, together with PMU, is currently revisiting the specifications to re-advertise during the 4 th quarter of the current financial year.				Housing Development
127	d) Adam Tas Corridor Precinct 10 (Northern Extension), Stellenbosch	Cllr N Gugushe	This statement has been there for many years, hence nothing is happening with the project. Explain the status of the Northern Extension Project.	This is a catalytic project that will accommodate ±3 500 – 5 000 housing opportunities. The magnitude of this project impacts significantly on various sectors, especially regarding bulk services and the impact on the R304. This project required detailed planning and investigations that had to be finalised before the land-use application could be submitted to land-use management. After submission, various iterations had to be made due to the comments received internally and externally from all departments affected by such a development. The only outstanding comment from the Provincial Department of Infrastructure (branch Roads and Infrastructure Services) is now required to be submitted for decision-making by the MPT. It is expected that a positive response from the said provincial department will be concluded in early March 2026.				Housing Development
132	h) La Motte: Farms 1339, 1158 and 1158/1, Paarl	Cllr S Schäfer	What is the status of the adjoining farm, farm 1653 , as there was a council decision that farm 1653, which is council-owned, should be investigated for housing?	The initial feasibility study that was undertaken by the professional team, CK Rumboll and Partners, indicated the impact of the wetland on the proposed study area. A wetland study was completed by Snaddon, which indicated that half of the study area is classified as a				Informal Settlements

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			The department should indicate what is happening with that process with municipally owned farms.	wetland. Given the Snaddon report and other constraints of the study area, the consultants indicated that an economically viable development will be difficult to implement. Therefore, the Robertsonvlei Road development was proposed as a more viable housing development.	
133	Table 107: Highlights within Housing Development	Cllr E Groenewald	<p>General Remark:</p> <p>All activities listed in the table cannot be seen as highlights, as they are the duties / job of the department.</p>	<p>The comment from the member of MPAC is noted.</p> <p>The highlights that can be derived from the department's inputs are as follows:</p> <ol style="list-style-type: none"> 1) The housing pipeline was unanimously adopted by the Council. 2) That the oldest informal settlement in Klappmuts received funding from PDol to be upgraded; 3) That NDoPW&I provided, after 20 years, a Special Power of Attorney for Erf 64, Kylemore, to be developed for housing opportunities; 4) That the first GAP-housing in Cloetesville received development rights; and 5) That the first social housing project (affordable rental) was advertised for public comments to finalise the land use application. <p>The administration will update the table and will reflect it in the final Annual Report 2024/25.</p>	Housing Development
133	Table 108: Challenges within Housing Development	Cllr E Groenewald	Provide a detailed breakdown of spending to date for each project, including its current status and the reasons for any delays.	Attached as ANNEXURE 1 is the detailed breakdown of expenditure to date and reasons for delay (if any) for the period under review.	Housing Development
134	3.2.8.2 Provision of Basic Services	Cllr S Schäfer	How much was spent on waterborne toilets? Provide figures and list the areas as stated in "various other areas."	The total amount of R2.26 million was allocated for projects in Watergang, Zone O, Strongyard, and Enkanini.	Informal Settlement
135	3.2.8.5: Strongyard, Kayamandi	Cllr E Groenewald	Clarify why this area should be fenced. Should people stay or live like in a jail and be isolated?	Strongyard was not fenced. The park that was established was fenced for the end users (the local children) to have some safety when using the apparatus and to lock the park at night as a safety measure.	Informal Settlement

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
135	3.2.8.6: Special Projects George Blake Avenue	Cllr N Gugushe	Provide a clear background and status report on the special projects listed in the Annual Report 2024/25.	The George Blake project is a spin-off from the programme that Stellenbosch Municipality and Jönköping Municipality undertook. This component of the project looked at the upgrading of George Blake Street. The project also falls within the ATC upgrading.	Informal Settlement
136	Table 109: Total number of structures impacted by incidents in all areas. All verifications completed within 48 hours	Cllr E Groenewald	Update the table with all affected areas (all affected areas to be included).	The administration will update the table and will reflect it in the final Annual Report 2024/28.	Informal Settlement
136	Heading: Disasters and Emergencies	Cllr E Groenewald	It is requested that the department provide a report on all areas affected, such as Die Boord, Suidwaal, Adam Tas River, Brandwagt Mountain, Mediclinic, etc.	<p>During the June and September floods of 2023, the following areas / infrastructure sustained the most damages:</p> <ul style="list-style-type: none"> Eerste River: Landbousaal (near Pastorie Lane): Erosion of the riverbank and adjacent building foundation. Eerste River: Suidwal Road (opposite Paul Roos): Washaway of riverbank; Eerste River: Piet Retief Street Pedestrian Bridge: Erosion of bridge foundations; Eerste River: Die Boord: Rokewood Avenue, Eersteriver: Erosion of the riverbank; Eerste River: Die Boord: Electrical cables damaged under the bridge; Eerste River is extensively impacted by erosion of river banks, and isolated instances of erosion to river banks have also occurred on the Brandwacht, Veldwagters, Plankenbrug and Krom Rivers. <p>All the abovementioned damages have to date been repaired.</p>	Roads, Transport and Stormwater Fire Services and Disaster Management
136-137	Figure 3: Disaster Incidents within Informal Settlements Figure 18: Disaster Incidents within Backyard structures	Cllr S Schäfer	The department should provide updated YTD stats / graphs to the MPAC.	The municipality prepares quarterly updated figures for the Section 80 Committee. These figures reflect the YTD stats within a particular financial year.	Informal Settlement
137	3.2.8.7 Evictions	Mr S Kuni	Evictees were communicating with the municipality, but the directors / departments failed to respond to the affected evictees.	There is a standardised process of meaningful engagement that creates a platform where respondents and possible evictees	Informal Settlement

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			Are there emergency housing lands for the evictees, and were the 32 court orders issued addressed?	All evictees under the period of review have been accommodated in either a backyard or a municipal TRA.	Informal Settlement
137	3.2.8.8 Development Proposals / Strategy	Cllr E Groenewald	<p>Housing Pipeline remarks: Does it include student accommodation? How are the university's plans aligned with the municipal development plans? Where does the student accommodation and alignment reflect in the document?</p> <p>Is the student accommodation handled as a special category for obtaining consent or approval?</p>	<ul style="list-style-type: none"> The municipality is not responsible for student accommodation, nor is it a municipal competency – it is in the ambit of the university. There is no special zone for student accommodation. It is included in high-density accommodation zones. Student accommodation does not form part of the Municipal Housing Pipeline, as it is premised on the Housing Code of 2009, Priority Human Settlements and Housing Development Area and provincial guidelines. The provision of student accommodation is not vested in the Department: Integrated Human Settlements. The Housing Pipeline does not include student housing or student accommodation and only deals with housing developments of the municipality. Student housing falls under the domain of Stellenbosch University (SU) and private developers. SU has not formally submitted a plan to the municipality detailing its planned future development of the campus. However, the Municipal Spatial Development Framework applies to SU. When the SU finalises its plan, the municipality can assist the SU with assessing the alignment of its plan with the MSDP and proposing amendments if and when required. 	Housing Development
138	Table 112: Informal Settlement Challenges	MPAC	Provide more details on the potential re-blocking projects.	Re-blocking does not necessarily provide more space. It is a tool to create better access and increase safety for the residents. Where re-blocking creates the required space, ablution facilities can be installed in accordance with the ABS programme, on the condition that these spaces are in close proximity to the existing water and sanitation networks.	Informal Settlement
149	3.2.9.6 Administration of Public Rental Stock	Cllr E Groenewald	Was there any public participation before the adoption of the Administration of Public Rental Stock Policy?	The municipality is still gathering internal inputs on the policy before it is tabled at the MAYCO; thereafter, it will be advertised for public participation.	Housing Administration

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
150		General Remark	What are the plans to curb anti-social behaviour?	The department is rolling out the Housing Consumer Education Workshop with the tenants. There is also a strong working relationship with Law Enforcement and SAPS in terms of conducting raids where criminal activities are reported, especially drug-related crimes.	Housing Administration
		Cllr N Gugushe	List the areas in Kayamandi where the rental units and TRAs are.	<p>The rental units are in:</p> <ul style="list-style-type: none"> 11th and 12th Close (Flats); and 10th and 13th Street (Semi-detached Houses). <p>TRAs:</p> <ul style="list-style-type: none"> Watergang, which is known as TRA 1 Zone O, which is known as TRA 2 	Housing Administration
		Cllr S Schäfer	Confirm the totals of the rental units and TRAs.	607 rental units and 1 517 TRAs	Housing Administration
153	Table 149: Projects concluded at municipal rental stock (Refers to the 10 burnt houses in Cloetesville)	Cllr E Groenewald	What are insured for and at what cost and risks?	<p>Insurance of all municipal properties is managed by the Finance Department.</p> <p>The risks are the houses that were built before 1994 and 2010 and were never transferred, and the original beneficiaries have passed away without a will, which means the estates cannot be finalised. These houses remain in the books of the municipality and become the responsibility of the municipality when a disaster happens.</p>	Housing Administration
			Provide the insurance policy to MPAC.	The copy of the policy was distributed to the MPAC.	Housing Administration
		Cllr W Pietersen	<p>A concern was raised about the burnt houses in Cloetesville, which have not been repaired yet. Indicate if there is insurance on these houses.</p> <p>Explain the delay in the repairs at Kloofstraat and the two houses in Langstraat.</p>	The tender for the repairs of the 2 flats in Kloof Street has closed and will serve at the BEC on 05 March 2026 for the appointment of a contractor to refurbish the flats. The houses in Long Street need to be demolished, and a structural engineering company had to first be appointed to conduct a conditional assessment and provide a method statement in terms of safely demolishing the houses, as they are semi-detached, with one damaged and the other not affected. Housing Development is now busy with finalising specifications to appoint a contractor to demolish and rebuild the Long Street houses.	Housing Administration

PLANNING AND ECONOMIC DEVELOPMENT					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
		Cllr S Schäfer	Explain why a consultant appoints a contractor.	Due to the damage to the houses, a conditional assessment by a qualified structural engineer must be conducted to provide the municipality with a report on whether the affected houses need to be demolished or can be repaired and also provide a detailed Bill of Quantities. The consultant is also needed during construction to monitor the rebuilding and sign off on the quality work once the rebuilding has been completed.	Housing Administration
153	Table 118: TRA Statistics	Cllr N Gugushe	Provide an updated TRA statistic list per area, e.g., Kayamandi TRA 1 and 2.	TRA 1 = 313 TRA 2 = 391 Jamestown = 201 La Rochelle = 32 Mooiwater = 221 Klapmuts Mandela City = 250 Longlands = 72 Cloeteville – 10 Devon Valley - 18	Housing Administration
189	Table 129: Highlights of the Department: Development Planning	Cllr S Schäfer	What happened to the precinct plan for the Rhenish complex?	The Rhenish Complex Precinct plan was formally adopted by Council on 29 November 2023. The Council decision mandated the MM to investigate and submit a proposal for an appropriate institutional mechanism for an overarching management structure for the rollout and implementation of the plan. In addition, the MSDP review report approved by the Council in 2024 included a recommendation for the drafting of an implementation plan by the Corporate Services Directorate, which referred to the possible leasing of the property to an implementation and management agent.	Spatial Planning Corporate Services
190	Table 130: Challenges within the Department: Developed Planning		Has the spatial planner position been filled?	The vacant position of the spatial planner was filled in October 2025.	Spatial Planning
190	3.6.2.1 Agricultural Support and Rural Development		Identify the local farmers who are leasing municipal agricultural land.	18 farmers renting a combined land area of +- 132 ha 2024/25 financial year – 502 AS (Bee Keeping)	Economic Development and Tourism

PLANNING AND ECONOMIC DEVELOPMENT

196	3.7.1 Libraries	Cllr E Groenewald	Why was no mention made of the innovative thinking of PPPs?	<p>Herewith my response to item 177 for the implementation of the library project.</p> <p>Explain what is causing the delay in the completion of this project.</p> <p>The roll-over provincial treasury grant funding for the library project has only been approved during November 2025 and approved by the Stellenbosch Council meeting at the adjustment budget submission during January 2026. The Directorate of Community Services funded the capital budget in the interim to keep the project active while waiting for the grant funding. Also, the initial timeframe for the manufacturing and delivery of the lift was underestimated, and after all documentation was sorted out, the delivery date was confirmed to be at the end of February 2026. A couple of variations to the refurbishment of the existing joinery and painting work to the library to stay within the budget were finalised after the adjustment budget was approved.</p>	Libraries
196-207	3.7.1 Libraries	Cllr S Schäfer	The department should summarise the context.	<p>Public libraries are experiencing sustained financial pressure that now threatens core services. Despite the growth of digital platforms, physical libraries remain essential as community-based, human-centred spaces that serve as social, cultural, and informational anchors. Across branches, outdated and damaged materials were removed to maintain relevant collections, while limited new acquisitions were added, often with support from the Western Cape Provincial Government. Kayamandi, Klapmuts, Pniël, Cloetesville, and Groendal libraries all undertook collection management processes. Beyond lending books, the libraries function as vital community hubs. They provide literacy programmes, after-school support, storytelling sessions, reading competitions, study support, computer training, CV workshops, and senior citizen programmes. They host awareness events linked to national commemorative days. Libraries also run holiday programmes, safety awareness initiatives, child protection campaigns, soup kitchens, and partnerships with schools, crèches, authors, and health organisations. Groendal and Pniël libraries demonstrated measurable community impact through literacy improvements, increased attendance, strengthened community cohesion, and enhanced health awareness. Online marketing initiatives, particularly in Cloetesville, improved visibility and engagement with library collections.</p>	

COMMUNITY AND PROTECTION SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				Reference to pg. 196 to 207 and tables remains the same.	
208-209	3.7.2: Cemeteries	Cllr S Schäfer	Request to rephrase the whole paragraph.	<p><u>CEMETERIES AND PARKS</u></p> <p>Stellenbosch Municipality is responsible for the maintenance and management of six cemeteries in Stellenbosch. The cemeteries in Pniël and Groendal have reached capacity, while Franschhoek South and Franschhoek North remain fully operational. Additional burial space has been created at Onder Papegaai Cemetery, and a new cemetery is currently being developed in Kylemore.</p> <p>The Jamestown Cemetery sustained damage due to high underground water levels during this year's storms, making it practically impossible to excavate new graves in the affected area. At the same time, the municipality was unable to reopen existing graves because of the elevated groundwater levels. The municipality is currently investigating measures to reduce water accumulation after periods of heavy rainfall.</p> <p>Consultants have been appointed for a three-year project to assist the municipality with the planning and construction of a new cemetery to address the critical need for additional burial space. The project is at an advanced stage, with the required environmental, water, and land use approvals in progress. All necessary licences have been obtained for the commencement of the new Stellenbosch Memorial Park, located alongside the R304 at the site known as Calcutta.</p> <p>The objective of the Cemeteries and Parks Section is to provide adequate burial space and to ensure dignified burials.</p>	Cemeteries and Parks
209	3.7.2.1 Income – Cemeteries Table 144: Cemeteries Income	Cllr O Jooste	What is the difference in prices of the cemeteries? Why are there burials with no income?	<p>All Stellenbosch cemeteries' tariffs are similar.</p> <p>In the previous financial years, if an undertaker chose to reopen an existing grave and dig the grave themselves with no services requested from the municipality, then there was no cost.</p>	Cemeteries and Parks
2010	Table 145: Highlights within the Department: Parks and Cemeteries	Cllr o Jooste	Clarify why Jamestown Cemetery is a highlight. Confirm the correctness of the statement under description.	The Jamestown cemetery suffered big damages during the floods; however, the cemetery drainage was upgraded and offered more burial space in areas that could not be utilised for graves previously.	Parks and Cemeteries
210	3.7.2.2 Challenges within the department	Cllr E Groenewald	Why is there a lack of education surrounding the cremation services process?	<p>The Stellenbosch municipality does not have a crematorium.</p> <p>However, the Cemeteries section did offer a full year, where quarterly education sessions on alternate burial methods were discussed with various churches. Cremation was one of the topics.</p>	Parks and Cemeteries

213	3.7.3 Child Care: Aged care, social programme – community development Table 148: Service Statistics – Childcare, age care, social programmes	Cllr E Groenewald	Is the department noticing a difference in the people on the street and homelessness?	<p>The response is general, as it is not clear whether the question relates to a difference resulting from a specific action / event.</p> <p>The number of people on the street during the day has not diminished. It is expected that the number will grow linked to the following factors:</p> <ol style="list-style-type: none"> 1. National poor economic growth and job losses. 2. Stellenbosch, with its students and tourists, is seen as a place where it is easy to make money on the streets. 3. There is no formalised day programme aimed at addressing the needs of persons on the streets available. The guise of homelessness is thus used by criminal elements to operate their activities on the streets. 	Community Development
214	3.7.3 Child Care: Aged care, social programme – community development Table 148: Service Statistics – Childcare, age care, social programmes	Cllr E Groenewald	Please clarify the winter readiness of the street store. Clarify the preparations and strategies in place for the municipality's winter readiness at the street store.	<p>The winter readiness programme is implemented annually in collaboration with:</p> <ol style="list-style-type: none"> 1. Street Store – Doxa Deo; 2. Serve Stellenbosch (churches); 3. Civil Society; 4. Stellenbosch University; 5. Stellenbosch Homelessness Forum; 6. Department of Social Development; 7. Right to Care (health); 8. Shoprite (food provision); 9. Stellenbosch Night Shelter; and 10. U Turn. <p>It is an outreach programme which provides the following services:</p> <ol style="list-style-type: none"> 1. Referral Pathways out of homelessness – Night shelter services, U Turn Services, DSD and Health; 2. Street Store: Dignified access to clothing for winter; 3. Stellenbosch Mun: Blankets, beanies and socks; 4. A meal for the day; and 5. Spiritual guidance. 	Community Development

COMMUNITY AND PROTECTION SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				The programme is aimed at homeless persons but has also been accessed by vulnerable and poor communities not on the street.	
216	3.8.1: Pollution control, biodiversity, beautification, open spaces and parks	Cllr S Schäfer Cllr E Groenwald	Propose that if there is nothing to report under the heading, then the narrative must change or report relevant information in the Annual Report 2024/25. Nothing is mentioned about biodiversity, beautification of the Stellenbosch Municipal area, open spaces. Possible examples: The green nature areas, trees being infected, or what measures the municipality has in place.	<p>POLLUTION CONTROL, LANDSCAPE AND BIODIVERSITY</p> <p>Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned. Previously, it was recorded that Stellenbosch Municipality developed the Stellenbosch Environmental Management Framework in 2018, administered by the Department: Community Services. This document, guiding environmental planning and management throughout the Stellenbosch Municipal area, is currently under revision and being updated.</p> <p>In addition, over the past 10 years, Stellenbosch Municipality has compiled dedicated Environmental Management Plans (EMPs) for all its declared nature reserves as well as nature areas or old forestry areas. In this regard, the Council adopted the Ida's Valley Dam / Botmaskop EMP in 2023 and the Mont Rochelle Nature Reserve EMP in 2022. Papegaaiberg Nature Reserve and Paradyskloof Nature Area have approved EMPs, both currently under review. Through the Department: Community Services, Stellenbosch Municipality manages approximately 3 000 ha of vacant land. The municipality intends to manage and maintain all these areas through dedicated management plans, such as those mentioned above.</p> <p>Stellenbosch Municipality has also completed an Invasive Alien Plant Management Plan, as required in terms of the National Environmental Management: Biodiversity Act, 2004 (10 of 2004), and an Integrated Fire Management Plan to assist in the management of large vacant nature areas under the management of the Council. Most notably, Stellenbosch Municipality drafted its first dedicated nature areas bylaw (the Stellenbosch Municipality Nature Areas Bylaw), which was promulgated in July 2025.</p> <p>Air Quality Management Plan Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) was approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018. The latest revision of the document will be undertaken in 2026. Vision, Mission, and Goals Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.</p>	Environmental Management

COMMUNITY AND PROTECTION SERVICES

				<p>The mission statement for achieving the stated vision is:</p> <p>Air quality in the Stellenbosch Municipality is cooperatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.</p> <p>The goals to achieve the mission of the AQMP are listed below, and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted.</p> <p>The three goals for the Stellenbosch Municipality AQMP are:</p> <ul style="list-style-type: none"> ✦ Goal 1: Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'effective air quality management; ✦ Goal 2: Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDM AQMP goal of 'Effective air quality management through an 'emission reduction strategy; and ✦ Goal 3: Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management; and

				<p>Stellenbosch Municipality works closely with the Department of Environmental Affairs and Development Planning regarding local government compliance and adherence to legislation. Implementation of operational plans in relation to management plans is executed within the area of responsibility.</p> <p>The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park, and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:</p> <ul style="list-style-type: none"> ✚ Mont Rochelle Nature Reserve: approved by the Council in 2022; ✚ Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review; ✚ Jan Marais Nature Reserve: Final draft EMP prepared; ✚ Paradyskloof Nature Area: approved by the Council in 2019 and reviewed in 2024; and ✚ Ida's Valley / Bamako Nature Area: Approved by the Council in 2023. <p>In 2024, Stellenbosch Municipality also drafted a nature reserve and nature area bylaw. This by-law was made public before a final draft was presented to the Council and promulgated in July 2025.</p> <p>Urban Forestry</p> <p>Maintenance of urban forestry within the Central Business District (CBD) shall be undertaken in accordance with the Tree Management Policy and all associated Standard Operating Procedures. These instruments regulate the planting, protection, felling, maintenance, and long-term management of trees situated on municipal property and ensure that all arboricultural activities are conducted in a consistent, professional, and sustainable manner. The Tree Management Policy is currently undergoing its 5-year review.</p> <p>The municipality adopts a sustainable development approach to urban forestry, with the objective of enhancing the ecological quality, resilience, and visual character of the CBD. This approach supports the greening of areas within the Stellenbosch Municipality through the promotion of sustainable urban forestry practices and serves as a guiding framework for investors and developers committed to environmentally responsible and eco-sensitive development.</p> <p>Objectives and Benefits of Maintaining Urban Forests.</p>

				<p>events. The Franschhoek area received several planted pots to add to the beautification on that side of the Stellenbosch Municipal area. The team beautified various entrances at Ida's Valley entrance, Tennantville, the Kayamandi wall entrance, and the R44. Adam Tas, etc. Over 50 trees were planted in various wards across the Stellenbosch Municipal area by the Parks section. The Adam Tas entrance was upgraded with artificial grass, especially in areas where there are high foot traffic and pedestrians.</p> <p>The parks section installed play equipment across the Stellenbosch Municipal area. Longlands in Ward 20 received a new fenced park with outdoor gym items, play equipment, new bins, signage, artificial grass, and pathways. The park also features trees, tarred walkways, and plant boxes.</p> <p>Kastaaing Park in Pniël was fenced, with a new three-in-one play item as well as a bin. Existing play equipment was painted in most parks. La Gratitude Park in Ida's Valley was fenced. Curry Street Park in Ward 16 received new play equipment. A tree planting project was expedited by the parks section during Arbour Month in Ward 11, as many older trees that were damaged by the previous storm had been damaged and fallen over. A beautification project was expedited in Ward 16 to combat an illegal dumping area. Ward 22 received a set of outdoor gym items. Fencing projects were planned for wards 1 and 2. Tree planting during Arbour Month took place in the Franschhoek area.</p>	
217	Table 152: Air Quality Complaints 2023/24 – 2024/25	Cllr S Schäfer	Noise does not form part of air quality. The row should be removed.	The administration takes note and will update the Annual Report 2024/25 accordingly.	Environmental Management
219	Table 155: Law Enforcement Highlights	Cllr E Groenewald	Insert footnotes with the definition of this type of notice. This will enable the reader to have a better understanding of what is reported on.	<p>Definitions of the 56 and 341 notices will be added as footnotes in the final Annual Report 2024/25.</p> <p>A Section 56 notice is a traffic fine issued directly by a traffic officer or law enforcement when you are stopped for a moving violation. It includes a court date but allows you to pay before then to avoid appearing in court.</p> <p>A Section 341 notice is a fine issued by traffic or law enforcement officers for non-moving violations (such as illegal parking). It is usually affixed to the driver's side window of the vehicle.</p>	Traffic and Law Enforcement
220	3.9.2 Traffic Services	Cllr S Schäfer	The highlights contradict what the municipality is conveying.	The statistics presented are accurate, and each functional area reports results in line with its specific performance indicators. The highlights are intended to provide a summary view, while the detailed indicators reflect the outcomes of each function. There is, therefore, no	Traffic and Law Enforcement

COMMUNITY AND PROTECTION SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				contradiction, but rather a distinction between summarised highlights and the more granular indicator-based results.	
220	3.9.2 Traffic Services	Cllr E Groenewald	What is the reason for the staff shortages in the traffic department?	The staff shortages in the traffic department are primarily due to vacant positions that are unfunded. Without the necessary budget allocation, these positions cannot be filled, resulting in reduced staffing capacity and operational constraints within the department.	Traffic and Law Enforcement
221	Table 156: Service Data for Traffic Services	Cllr E Groenewald	Why is there a significant downward trend in the learner driver licence tests?	The downward trend in learner driver licence tests is due to the rollout of Computerised Learner's Licence Testing (CLLT) machines by the RTMC. With 16 machines deployed, the maximum number of applicants per session has been reduced from 20 to 16, resulting in lower overall testing capacity.	Traffic and Law Enforcement
221			Is there a management system in place, and what is the cost of the cameras?	The municipality has appointed an external service provider, through the tender process, to deliver speed enforcement camera services. In terms of the current tender contract agreement, the service provider supplies and operates a total of 12 I-cam Laser cameras and 7 fixed-site cameras. Any increase in the number of cameras will require an amendment to the specifications when the contract is next issued for tender. The cost per fixed camera is R400 000, and the cost for the mobile camera is R300 000, which all form part of the tender.	Traffic and Law Enforcement
223	Table 158: Service data for the fire and disaster management	Cllr S Schäfer	Please clarify this table for the average number of appliances off the road during the year.	This refers to vehicle breakdowns. Vehicles are repaired through the RT tender process.	Fire and Disaster Management Services
224	Table 159: Capital Expenditures as at	Cllr S Schäfer	Indicate what the reason was for the delay in the purchasing of specialised vehicles: Fire	All capital projects are on track. The new Landcruiser will be here on Monday. It is currently at Toyota Stellenbosch.	Fire and Disaster Management Services
227	3.10.1: Holiday Resorts and Campsites	MPAC	Mountain Breeze: Indicate where the money comes from for the repairs and maintenance of the campsite. Confirm why incur expenditure if the campsite is disposed of or not being utilised by the public.	The Department: Community Services does not manage Mountain Breeze Resort; it resides with Corporate Services, under which Property Management resides. The comment was addressed.	Garth Abrahams and Property Management
227	Table 169: Service	Cllr S Schäfer	Define what a stadium is, and does	Stellenbosch Municipality owns and maintains 15 sport facilities.	Sport, Halls and Recreation

COMMUNITY AND PROTECTION SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
	statistics sports Grounds and Swimming pools		<p>the municipality have any of these – indicate where?</p> <p>Confirm the correctness of the total services listed</p>	<p>Ten (10) of these sport facilities have seated stadiums with infrastructure that includes clubhouses and floodlights.</p> <p>These 10 stadiums formed part of the 2010 World Cup legacy projects.</p> <p>The remaining 5 sport facilities do not have seated stadiums.</p>	

The general remarks made, and all additional questions, can be routed and addressed at the MPAC meeting on 23 February 2026.

1.6 Director: Financial Services

The updated Annual Report 2024/25 should be recalculated and provide reasons for the variances throughout the Annual Report.

Explain the structure of tables under financial performance in Chapter 5.

The AFS and Audit report might be further discussed on 23 February for more clarity.

TABLE 8: FEEDBACK: DIRECTORATE: FINANCIAL SERVICES

FINANCIAL SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
38	Table 9: Municipal Viability Highlights	Cllr E Groenewald	Explain why investments were left out in the highlights.	Investments were not included in the Annual Report 2024/25 template.	CFO Financial Management Services
39	Table 12: Operating Ratios	Cllr E Groenewald	Provide clarity on what the latest norm is for repairs and maintenance.	The norm for R&M in accordance with the MFMA Circular is 8%.	CFO Financial Management Services
	Table 13: Total Capital Expenditure		What category do the consultants / service providers fall under, and what were the actuals and variances?	Consultants and / or service providers fall under Contracted services. Actual expenditure: contracted services: R284 539 132 Amended budget: R325 195 478 Variance: ((R325 195 478 - R284 539 132) / R325 195 478) * 100 = 12.50% Total % spent: R284 539 132 / R325 195 478 = 87.5%	CFO Financial Management Services
			Explain the decrease in the budget allocated and the actual?	A detailed performance assessment was conducted with the Mid-Year Adjustment Budget 2024/25, and projects were shifted to the outer years based on cash flow projections, as well as tenders that are not yet in place. The actual expenditure was (R473 052 520 / R524 512 559) = 90.19%.	CFO Financial Management Services
87	Table 68: Ten Highest Bids Awarded by Bid Adjudication Committee	Cllr E Groenewald	Clarify why there were two successful bidders on BSM 25/25.	The tender was initially awarded to POTTS DEVCO. An appeal was lodged and subsequently upheld, and the award was made to PANCARE PROPERTY SERVICES. This was an oversight in the report and should only	SCM

FINANCIAL SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
				have included the one award to PANCARE PROPERTY SERVICES.	
87	Table 69: Awards made by the Accounting Officer	Cllr E Groenewald	Clarify Bid Number BSM 111/24. Give context and the amount.	<p>The proposal of Middelorp Properties (Pty) Ltd for R22 028 250.00 (including 15% VAT) for the redevelopment and lease of the Transvalia properties was accepted. It was proposed for a long-term lease of not more than 30 (thirty) years as indicated in the tender document.</p> <p>The bidder submitted a bid with a bid amount of R22 028 250.00 (VAT included), which amount represents the estimated capital outlay.</p> <p>Total project cost (capital and operational) R33 795 797.50 (VAT incl.) The proposed monthly lease will be negotiated and approved by Council before commencing, on the conditions of the bid, and the details of the lease will be finalised and submitted before Section 33 is initiated for the formation of a maximum 30-year contract.</p>	SCM
88	Table 70: Appeals resolved	Cllr E Groenewald	The department is to provide more context to the description of the tender number and insert a column to state the cost and outcome, whether the appeals process was resolved or not.	<p>All appeals were resolved, and the column was added.</p> <p>The table will be updated and will be reflected in the final Annual Report 2024/25.</p>	SCM
89	Table 72: Deviation from Normal Procurement Process	Cllr S Schäfer	Why are there consecutive 0s for the Certificate of Emergencies?	The table will be updated in the final Annual Report 2024/25.	SCM

FINANCIAL SERVICES					
Page no.	Table / Paragraph Graph	The member who poses question / comment	Comment(s)	Response	Responsible Department
			It is proposed to provide MPAC with an updated table.	Emergencies already form part of the deviation report; hence, the 0s were taken out of the draft Annual Report 2024/25.	
90	2.3.4.7: Long-Term Contracts and Public-Private Partnerships Table 73: Long Term Contract (20 largest contracts entered into during 2024/25)	Cllr E Groenewald	Share the sentiment on PPPs and how beneficial they can be for the municipality. Confirm the table and provide MPAC with an updated table.	The list of long-term contracts (20 largest) stays the same, since it is as at 30 June 2025. The municipality currently has no PPPs in place.	SCM
92	2.3.4.9: SCM Performance Management	Cllr E Groenewald	The narrative is vaguely stated. Elaborate by providing background and more context for the paragraph.	We have internal SOPs that give effect to the SCMP Policy. Regular in-house audits are also conducted to ensure that SCM remains compliant with policies and regulations. The performance of service providers is also monitored monthly.	SCM
271	Table 236: Reliances on Grants	Cllr E Groenewald	The type of grants should be listed.	The Grants are listed in Table 235.	CFO Financial Management Services
271	5.3 Asset Management	Cllr E Groenewaldt	Where do the DSs come from, and what impact do they have on the community?	The question must be clarified.	CFO Financial Management Services
277	Table 243 Capital Expenditure by Asset Programme (Appendix M1)	Cllr Schäfer	Explain why there is an actual expenditure but no budget or adjustment budget provision.	The table will be updated and will be reflected in the final Annual Report 2024/25.	CFO Financial Management Services
			Explain the high actual expenditure for social housing.	The expenditure is mainly made up of the purchase of materials, the construction of Wendy houses and upgrading flats. This line item also included the roll-out of the social housing programme.	CFO Financial Management Services
277	Table 244: Capital Expenditure: Upgrade / Renewal Programme (Appendix M2)	Cllr E Groenewald	Explain the low spending vs the original and adjustment budget for water purification.	<u>The Director: Infrastructure indicated the following via an email response:</u> The expenditure on the water budget line item was due to the lack of resources and engineering technicians. The Franschhoek bulk water pipeline project was delayed due to the delay in the appointment of a contractor, and	CFO Financial Management Services

Dear Sir/ Madam

BID: B/SM: 31/23 APPOINTMENT OF A PROFESSIONAL ARCHITECT TO MONITOR AND OVERSEE HERITAGE BUILDING WORKS/ALTERATIONS/UPGRADES AND TO SUBMIT A CLOSE OUT REPORT FOR THE VARIOUS HERITAGE BUILDINGS.

Stellenbosch Municipality has accepted your offer dated 12 December 2022 as Professional Architect to monitor and oversee Heritage building works/alteration/upgrades and to submit a close out report for the various heritage buildings, up to a maximum of the number of estimated hours and further up to a maximum amount of R272 329.20 (15% VAT inclusive), for all 3 buildings, subjected only to the terms and conditions embodied in the Tender specifications and the general conditions of contract.

Please note:

Approval from the Heritage Western Cape (HWC) has been granted for the Voorgelegen Building. The application for Rhenish Complex and Bergzicht Training centre is currently in process, if not approved by the HWC, the Municipality will not proceed with the Rhenish Complex and Bergzicht Training

Please note other Service Provider 's may object or appeal the appointment which might affect the tender.

If there is any uncertainty regarding the scope of work, it should be addressed as soon as possible. Please liaise with Ms. Theresa Benjamin at the following number 021 808 8513

Yours faithfully

pp Financial Services

HERITAGE REPORT

CASE NUMBER : HWC22120801SJ1213

Issued in terms of Section 34 of the National Resources Act, 1999 (Act 25 of 1999)
and Regulation 3 (3) (a) of PN 298 (29 August 2003)

The present close-out report is submitted subsequent to the renovation work reaching practical completion in the Bergzicht Training Centre on Bird Street, Erf 235. Stellenbosch.

Adolfo Linares - Professional Architect, registered Heritage Practitioner, was appointed by Stellenbosch Municipality to oversee and monitor the building works/additions and alterations, subsequent to the approval granted by Heritage Western Cape case number HWC22120801SJ1213.

PROPOSED ADDITIONS & ALTERATIONS SUBMITTED IN TERMS OF SECTION 34 OF THE NATIONAL HERITAGE RESOURCES ACT (ACT 25 OF 1999)

This matter was discussed at the Heritage Officers Meeting held on 20 February 2023.

DECISION

The Committee resolved to approve the application as the proposal does not negatively impact on heritage resources.

PERMIT

CASE NUMBER: HWC22120801SJ1213

Issued in terms of Section 34 of the National Heritage Resources Act, 1999 (Act 25 of 1999) and Regulation 3(3)(a) of PN 298 (29 August 2003)

This permit is valid for three years from the date of issue

Proposed Action: Additions & Alterations
 Site: Erf 235, Bergzicht Training Centre, 31 Du Toit Street, Stellenbosch
 Graded: Grading in progress

Permit issued in accordance with the Structural Investigation Report for the Bergzicht Heritage Buildings, numbered 2432/03, prepared by VIP Consulting Engineers, dated August 2020.

Conditions applicable to this Permit:

1. Work to be done strictly in accordance with the HWC stamped report.
2. Work to be monitored by a suitably qualified architect with heritage experience
3. A close-out report to be submitted within 30 days of practical completion.

NOTE:

- This decision is subject to an appeal period of 14 working days. Kindly note that the appeal period is calculated from the date indicated on the HWC date stamp, which is the date the appeal is sent, and not the date of signature
- Appeals to HWC are to be submitted to HWC.Appeals@westerncape.gov.za
- The applicant is required to inform any party who has expressed a bona fide interest in any heritage-related aspect of this record of decision. The appeal period shall be taken from the date above. It should be noted that for an appeal to be deemed valid it must refer to the decision, it must be submitted by the due date and it must set out the grounds of the appeal. Appeals must be addressed to the official named above and it is the responsibility of the appellant to confirm that the appeal has been received within the appeal period.
- **Work may NOT be initiated during this 14 day appeal period.**
- If any archaeological material or evidence of burials is discovered during earth-moving activities all works must be stopped and Heritage Western Cape must be notified immediately.
- This approval does not exonerate the applicant from obtaining any necessary approval from any other applicable statutory authority.
- **An HWC STAMPED REPORT must be present on the site at all times and must be produced on demand by any heritage Inspector, building control official, or any person duly authorized to do so.**
- **A copy of this permit must be displayed in a prominent place on the site until the permitted work is completed.**

Should you have any further queries, please contact the official above and quote the case number.

PURPOSE OF THE REPORT

Adolfo Linares, Professional Architect member of the Association of the Professional Heritage Practitioners, was appointed by Stellenbosch Municipality to monitor and oversee heritage building works/additions and alterations, subsequent to the approval granted by Heritage Western Cape for Bergzicht Training Centre, case HWC22120801SJ1213. This close-out report is required by Heritage Western Cape as a condition applicable in the permit to conduct the works.

PHILOSOPHICAL APPROACH TO THE BUILDING WORK

My philosophical approach regarding the proposed renovation could be summed up as 'keeping alive the spirit of the place, the significance of the buildings and of the environs are best protected by retaining as much of the ancient materials, returning the envelope to its best appearance. The key points identified in the methodology for the alterations and upgrades are to protect the historic fabric, minimize the impact of the renovation works, maintaining its significance and architectural character.

How do buildings survive?

Historic buildings are associated with a specific economic, geographical and social environments, modern-day market economy could render historic buildings obsolete and undergo a process of degradation.

Buildings survive if they are used, modern-day activities demand new modes of using spaces including statutory and building regulations.

Bergzicht Training Centre is an example of adaptive reuse, which is the process of repurposing the existing structure for a new function; this sustainable approach preserves cultural heritage and architectural character.

Bergzicht Centre illustrates the concept, Stellenbosch Municipality by renting out the complex obtains rent fees therefore, resources for the upkeep and maintenance.

This report presents the case depicting various actions taken to restore the complex, keeping the spirit of the historic precinct.

HISTORICAL OVERVIEW OF BERGZICHT

Bergzicht was originally part of the Kromme River farm which was founded in 1682 which was given to Jan Janz van Eeden of Oldenburg. It is believed that the Heerenhuys was built as early as 1780. Part of the farm was sold to Jacobus Groenewald in 1794.

Groenewald's widow later married Nicolaas Sertyn, who bought more land to expand Bergzicht. The symmetrical outlines of the three buildings, a square with two rectangular buildings on either side, were built in 1817 and remain more or less the same today.

After the above, the farm belonged to various owners who made additions to the Heerenhuys:

1822 Willem Daniel Hofman Jnr

183 Pieter Hendrik Faure

1847 Jacobus Francois du Toit

1859 Jacob Johan Paul du Toit

1869 Jacobus Christoffel Overbeek

Since 1922 the property has belonged to the Stellenbosch Municipality which has rented the premises to various tenants. On 17 August 1954 the site was declared a taxi rank. In 1965 the Municipality considered Bergzicht demolition but decided to restore the premises and surrounding area.

On the evening of 8 July 1992, the Heerenhuys almost completely burned down.

After the rebuilding process, the lease of the premises was put out to tender and was awarded to Bergzicht Training for the use of the buildings as a training centre for unemployed and uneducated residents of Stellenbosch and surrounding area.

HERITAGE SURVEY 2012

The heritage survey for the central core of Stellenbosch was steered by Stellenbosch Heritage Foundation. It represents the first phase of a planned heritage survey within the legal framework of the National Heritage Resources Act.

DESCRIPTION

H-shaped thatched house with ornate holbol central gable with double casements (a reconstruction) and holbol end gables. Flush casements with solid shutters, stable door with small-pane fanlight. House is flanked by thatched outbuildings

SIGNIFICANCE

Historical, Aesthetical.

RESTORATION AND MAINTENANCE SUMMARY

Stellenbosch Municipality appointed QSource Quantity Surveyors as the lead consultant for the project BSM 40/20, in sequence in March 2020 VIP Consulting Engineers (Pty) Ltd was appointed by QSource to perform visual structural inspections on the Bergzicht Training Centre.

In August 2020 VIP issued the Structural Investigation Report number 2632/03 it was endorsed by B Haasbroek, Inspection Engineer and as Project Leader Mr. J Jansen van Rensburg.ⁱ

The report comprises the study of the three buildings on site, namely Admin, Heerenhuys and Pinotage, it points out external and internal damages and/ or problems.

Following my site assessment, VIP's proposed repair work, in many instances, was changed or omitted as proved to be unnecessary, the work implemented is detailed below.

ADMIN BUILDING

- VIP'S report indicated the total replacement of the thatch roofs. Although, no decay and adequate thatch thickness was found; Highveld Cape Thatchers were appointed for the maintenance work, fixing flashings, ridges and for the application of fire retardant. It was recommended a yearly inspection of the roof; a three years guarantee was issued.ⁱⁱ

Figure 1

Figure 2

Figure 3

Figures 1 and 2 show the process of maintenance of the existing thatch roof, no significant decrease in volume was found. Figure 3 shows Admin building after the reinstatement and maintenance work was done.

- First Floor Usage

The Bergzicht Training Centre have made use of the traditional Cape - Dutch brandsolder converting it to a first-floor accommodation for office use, this adaptation of the brandsolder was probably done in 1994 following the renovation work after the devastating fire which destroyed the Bergzicht homestead on the evening 8 July 1992. The loft was constructed from wooden beams and planks with a cement screed topping. The issue, identified in 2020 by VIP, is due to the differential movement of wood and the concrete screed which showed large cracks.

Figure 4

Figure 5

Figures 4 and 5 show large cracks in concrete due to differential movement rate of timber and concrete with the additional live load component of people using the space and the weight of movable objects.

Figure 6

Figure 6 expose the existing screed laid on vermiculite and damp proof membrane on timber planks

Figure 7

Figure 7 Damaged sections of the existing screed were removed, and the electrical conduits were re-arranged.

Figure 8

Figure 8 laying of the board insulation is completed, Isoboard was selected as the insulation and for its fire-resistant properties.

Figure 9

Figure 10

Figures 9 and 10 show the laid new screed

- Loft usage and fire escapes routes.

A second issue I identified with the loft usage, is the inadequate provision of fire escape routes, the existing stairs did not comply with SANS 10400 M, the intervention in the Admin building was limited to repairing some elements of the external timber stair. A fire plan and specifications was done by Fire Engineer JW Lotz, from JL Consulting Engineers.ⁱⁱⁱ

- Plaster cracks and painting

Figure 11,12 and 13 depicts the general situation found in Bergzicht, fungus-stained walls paint and woodwork and steel gates requiring attention as well.

Figure 11

Figure 12

Figure 13

The Admin building did not show major plaster cracks although the walls were stained as seen in figure 14, the external woodwork required re-decorating. See figures 15 and 16

Figure 14

Figure 15

Figure 16

Limewash and wall repairs specification included brushing down the surfaces and applying fungal treatment. Repairing the cracks consisted of raking plaster cracks applying lime putty with a fiberglass mesh, two coats of lime wash completed the walls renovation.^{iv}

External woodwork

Consisted in surface preparation, sanding down to break the surface gloss, application of one coat of primer, finishing with two coats of gloss enamel, colour 'heritage green' to match existing.

Steelwork

The surface preparation included sandpapering to remove paint, chipping away rust scales, following rust treatment, priming with a metal etch primer and finishing with a minimum of two coats of gloss enamel.

Figure 17

Figure 18

Admin building renovation completed: figures 18 and 19

Linares Architects - Heritage Consultants
Email: linares@iafrica.com
Cell 071 673 6241

PINOTAGE BUILDING

- VIP's report indicated the total replacement of the thatch roofs.

After my inspection the total replacement of the thatch roof was deemed unnecessary, Highveld Cape Thatchers the appointed sub-contractor confirmed this observation, no decay and adequate thatch thickness was observed. The thatch sub-contractor did the maintenance work including fixing flashings, ridges and application of fire retardant. It was recommended a yearly inspection of the roof; three years guarantee was issued.

- First Floor Usage

Bergzicht' s Training Centre adapted the traditional Cape - Dutch brandsolder into a first-floor accommodation for classrooms and office use. The existing loft construction is made of wooden beams, planks and a cement screed topping; in the Pinotage building two issues were identified, the first one is due to the differential movement of wood and the concrete screed showing large cracks.

Figure 19

The case of the Pinotage building was worsened by the inadequate spacing of the timber beams and the live load component of over thirty persons using the loft plus the weight of movable objects.

Figure 20

The figure above shows the loft structure with inadequate spacing of the timber beams.

Figure 21

Figure 22

Figure 20 indicates the remedial work for the loft inadequate support, the process of adding extra support at the adequate structural spacing. The concrete screed was re-done in sections.

- Loft usage and fire escapes routes.

The external staircases that lead to the existing lofts were seriously damaged and out of service and it was required to be replaced and to comply with the provisions of SANS 10400 M, Building Regulations.

Figure 23

Figure 24

Figure 25

Figure 26

Figures 23, 24, 25 and 26 show the existing condition of the staircases in the Pinotage and Heerenhuys buildings before replacing them with new ones as shown in figures 27,28,29, 30,31,32 and 33.

Figure 27

Figure 28

Figure 29

Figure 30

Figure 31

Figure 32

Figure 33

Replacing the stairs included the reinforcement of the top landing, changing the existing floorboards and underpinning the landing with timber brackets fixed to the walls with chemical anchors. The timber dimensions utilized were matching the existing; for safety reasons extra reinforcement was introduced to the balustrading, the dimensioning of treads and risers were increased to comply with the present SANS regulation; for prevention against falling, as it is required for any flight of steps which contains more than three risers were added steel rods, this additional component was chosen for being less prominent, therefore maintaining the traditional design expression as much as possible.

- **Plaster cracks and painting**

The Pinotage building exterior had been previously repaired but, there are no records available of the procedure time and originator; regrettably the method made use of a welded mesh with a wire diameter of 4mm and thick cement plaster, this is an unsuitable rendering because it impedes the wall breathability which is a quality of historic buildings. Older traditional construction is made of solid walls that rely on the absorption and evaporation of moisture through the permeable building fabric made of soft bricks with lime rendering.

The exterior of the Pinotage building presented areas with a delaminated rendering, see photos 34,36,36.

Figure 34 the inappropriate method found: wire mesh and cement plaster

Figure 35 plaster delamination due to the previous use of unsuitable plaster.

Figure 36 plaster delamination

The condition observed is due to the inappropriate repair work described elsewhere; the corroded steel mesh furthered the delamination of the cement rendering; its removal was not an option since it would cause more damage to the existing fabric.

The remedial work on the wall's exterior was limited to few damaged areas; it consisted of scrapping the plaster, fixing fiberglass mesh and applying lime plaster.

The Pinotage building showed a large wall crack on the South façade, it was caused by a sewer stack, figure 38, the remedial work consisted in applying lime putty to close up, fitting a fibre glass mesh before finishing with a lime rendering.

The internal walls inside the Pinotage building are modern structures built as offices, toilets and classrooms all these have been constructed with a concrete foundation and contemporary bricks, the wall cracks were repaired by the previous tenant using contemporary matching materials. Figure 39.

Figure 37 External wall crack and scraped cement plaster

Figure 38 large crack on the South facade

Figure 39 internal plaster crack

HEERENHUYS BUILDING

- The total replacement of the thatch roof was unnecessary, since no significant decay was found, and the existing thickness was adequate. Highveld Cape Thatchers was appointed for maintenance work, consisting of the removal of the top layer, fixing flashings, ridges and for the application of fire retardant. It was recommended a yearly inspection of the roof; three years guarantee was issued by Highveld Thatchers.

- First Floor Usage Loft usage and Fire escapes route.

Heerenhuys building also adapted the traditional Cape - Dutch brandsolder into a first-floor accommodation for classrooms and office use, the loft's screed showed a small number of cracks, the cause is described elsewhere, the screed topping was repaired, no extensive replacement of the screed was done.

The external staircase was unusable and inadequate as a provision for fire escape routes, the existing stairs did not comply with SANS 10400 M, the intervention comprised the total replacement of the stair.

Figure 40

Steel rods were added to the balustrade for safety; it was chosen as an element less noticeable thus maintaining the traditional design. To make the stairs SANS10400 Part M compliant, additional steps and an intermediate landing were added.

- **Waterproofing**

Heerenhuys building had waterproofing issues with the two 1994 built flat roofs in Northern and Southern facades; both roofs are located in between the sloped thatched roofs which contribute to the amount of rainfall on top of these roofs. The repair work entailed the removal of the damaged membrane, re-screeding to fall, application of a new torch-on waterproofing membrane and finish with laying 38mm crushed stone, the solution included the re-alignment of the rainwater down pipes.

Figure 41

- **Walls plaster cracks**

After the fire of 1992, the reconstruction of the building included new walls that made use of contemporary bricks and cement plaster. The remedial work on the wall's exterior was limited to only few hairline cracks; the plaster scrapped, rendered with lime plaster where applicable and finished with lime wash paint.

- External woodwork

The maintenance process entailed three steps: surface preparation, sanding down to break the surface gloss, application of one coat of primer, and finishing with two coats of gloss enamel, colour 'heritage green' to match existing. Repair work was limited to shutters and windows.

All the pergola's timber was replaced, figure 43 and figure 44

Figure 43

Figure 44

- **Steelwork**

Maintenance of steelwork was limited to access gates to yard and garden, the method entailed surface preparation which included sandpapering to remove paint, chipping away rust scales by hand or using grinders, it followed rust treatment and priming with a metal etch primer finishing afterwards with a minimum of two coats of glass enamel.

Figure 45, garden gate after maintenance work

- **Building Exterior - Subsidence of the stoep and historic werf wall**

The stoep was built during the reconstruction, after the fire in 1992, it was built larger than the traditional Cape Dutch stoep, and finished with contemporary brick paving laid on a unreinforced concrete slab; the material unearthed under the slab comprised reworked boulders in a sand medium, all this material was not compacted and it was a contributing factor to the fracture of the slab and the wall's collapse.

Figure 46 – stoep wall collapse

Figure 47

Figure and 46, 47 & 48 - cracks of the stoep unreinforced slab showing on the brick paving surface

Figure 49 after the repair work

The distance across the stoep was shortened in an attempt to adjust the size of it to be consistent to historical Cape Dutch houses but the limitation was circumventing the brick pillars stability. I proposed replacing the existing brick paving finish with Klompie bricks, but not a favorable response was achieved due to budget limitations.

Figure 50 – Pergola's timber replacement.

Figure 51 Minimal design balustrade added to the steps.

- Garden wall

Figure 52

Figure 53

Figure 54

The external garden wall is an integral part of the historical precinct, the survey from De Smit 1961 shows the wall joining the actual Pinotage and Admin buildings, photos 52, 53 and 54 show the state of disrepair found before the restoration project, the wall was built with the traditional method of boulders, stones of different sizes and mud and it was found that the original rendering had been replaced with an inappropriate cement plaster. Contributing to the partial collapse was water ingress from the garden therefore debilitating the structure.

The rehabilitation consisted of the removal of the cement plaster, brushing out loose material. The consolidation was achieved by adding various stone sizes with lime putty and was finished incorporating a fibre glass mesh and lime plaster, before painting with lime wash.

Figure 54

Figure 55

Figures 54 and 55 depict the restored garden wall.

ⁱ VIP's Structural Investigation Report number 2632/03, Stellenbosch Municipality Department: Property Management and Municipal Building Maintenance-Directorate: Corporate Services.

ⁱⁱ Email 10/21/2023 by JC Steenkamp : "There is almost no decrease in volume or thickness from what we found on site. The volume and thickness after the maintenance work will not defect our Guarantee on the roofs. Fire-retardant treatment was applied."

CLOSE OUT REPORT FOR ADDITIONS & ALTERATIONS SUBMITTED IN TERMS OF SECTION 34 OF THE NATIONAL HERITAGE RESOURCES ACT (ACT 25 OF 1999): ERF 235, BERGZICHT TRAINING CENTRE, 31 DU TOIT STREET, STELLENBOSCH

The matter above has reference.

The matter was tabled at the Heritage Officers' Meeting held on 27 October 2025.

ENDORSEMENT

The Committee resolved to endorse the close-out report titled "*Heritage Report*", dated October 2025, and prepared by Linares Architects as having met the conditions of the HWC issued permit, dated 21 February 2023.

Should you have any further queries, please contact the official above and quote the case number provided.

HERITAGE REPORT

MINOR WORKS PERMIT CASE NUMBER : HWC 22061308TZ0801E

Issued in terms of Section 27 of the National Resources Act, 1999 (Act 25 of 1999)
and Regulation 3 (3) (a) of PN 298 (29 August 2003)

The present close-out report is submitted subsequent to the renovation work reaching practical completion in the Voorgelegen building, 116 Dorp Street, Erf 235. Stellenbosch.

Heritage Western Cape, issued the Minor Works Permit, case number HWC 22061308TZ0801E, the present close-out report is a condition applicable to the Permit granted.

December 2025

MINOR WORKS PERMIT
CASE NUMBER: 22061308TZ0801E
Issued in terms of Section 27 of the National Heritage Resources Act, 1999 (Act 25 of 1999) and Regulation 3(3)(a) of PN 298 (29 August 2003)

This permit is valid for three years from the date of issue

This permit is issued for:

Proposed Action: Additions and Alterations
Site: Erf 235, 116 Dorp Street, Stellenbosch
Graded: Provincial Heritage Site

Permit issued in accordance with Structural report prepared by Katherine Robinson:

No: 1-8
Dated: 2 August 2022

Conditions applicable to this Permit:

- **Work to be monitored by a suitably qualified architect/practitioner with suitable heritage experience.**
- **A close-out report to be submitted to HWC after 30 days of practical completion.**

NOTE:

- This decision is subject to an **appeal period of 14 working days**
- **Appeals to HWC are to be submitted to HWC.Appeals@westerncape.gov.za**
- The applicant is required to inform any party who has expressed a bona fide interest in any heritage-related aspect of this record of decision. The appeal period shall be taken from the date above. It should be noted that for an appeal to be deemed valid it must refer to the decision, it must be submitted by the due date and it must set out the grounds of the appeal. Appeals must be addressed to the official named above and it is the responsibility of the appellant to confirm that the appeal has been received within the appeal period.
- **Work may not be initiated during the 14 working day appeal period.**
- If any archaeological material or evidence of burials is discovered during earth-moving activities all works must be stopped and Heritage Western Cape must be notified immediately.
- This approval does not exonerate the applicant from obtaining any necessary approval from any other applicable statutory authority.
- **An HWC STAMPED PLAN must be present on the site at all times and must be produced on demand by any heritage inspector, building control official, or any person duly authorized to do so.**
- **A copy of this permit must be prominently displayed on site at until the permitted work has been completed**

Should you have any further queries, please contact the official above and quote the case number.

PURPOSE OF THE REPORT

I Adolfo Linares, Professional Architect and Heritage Practitioner, member of the Association of the Professional Heritage Practitioners, was appointed by the Stellenbosch Municipality to monitor and oversee all building work for the additions and alterations in compliance with the requirement by Heritage Western Cape for the Minor Works Permit.

PHILOSOPHICAL APPROACH TO THE BUILDING WORK

The philosophical approach regarding the proposed renovation could be summed up as 'keeping alive the spirit of the place'. The significance of the buildings and of the environs are best protected by retaining as much of the ancient materials and returning the envelope to its best appearance. The key points identified in the methodology for the alterations and upgrades are to protect the historic fabric, minimize the impact of the renovation works, maintaining its significance and architectural character.

How do buildings survive?

Historic buildings are associated with a specific period, economy, geographical and social environments; therefore, modern-day market economy could render historic buildings obsolete and undergo a process of degradation.

Buildings survive if they are used, although modern-day activities require different approaches for using spaces as well as contemporary statutory and building regulations.

Adaptive reuse entails repurposing the existing structure for a new function; it is a sustainable approach that ultimately protects cultural heritage. The Voorgelegen building was originally a residence, today it functions as offices, art gallery and museum. Voorgelegen building exemplifies the adaptive reuse model.

Stellenbosch Municipality, by renting out the complex, obtains rent fees therefore, the required resources for the upkeep and maintenance.

This report presents the case depicting various actions taken to restore the building, keeping the spirit of the historic precinct.

HISTORICAL OVERVIEW OF VOORGELEGEN

Numbers 108-112 of this property formed part of the farm De Nieuwe Molen, granted in 1750 to Landdrost en Heemraden. It was subdivided in 1796 and the erven of No's 112 and 116 were bought by Johannes Victor the following year. His widow sold No 112 to her son Jacobus Daniel in 1825, while another son, Wynand acquired No 116 in 1836. It was bought by Gysbert Reits in 1851, who replaced the ground floor windows in the original openings. The house was occupied for many years by his son-in-law Dr Cornelius Smuts, who was probably responsible for the second floor. Currently the Stellenbosch Municipality directs the maintenance and upkeep of the Voorgelegen building and is let to various organisations.

HERITAGE SURVEY 2021

The heritage survey for the central core of Stellenbosch was steered by Stellenbosch Heritage Foundation. It represents the first phase of a planned heritage survey within the legal framework of the National Heritage Resources Act.

Survey Overview

ADDRESS

116-118 Dorp Street Erf 658

DATE BUILT

C1798

SUGGESTED GRADING

II

DESCRIPTION

Double storey H-shaped parapeted house with moulded cornice and rusticated quoins; central projecting portion with single window above 4x4 door with fine sunrise fanlight flanked by narrow 6x6 sashes; two bays to each side with 9x9 sashes to both floors. Full-size windows have fine hood mouldings with decorative brackets, with similar moulding as string course across central projecting bay.

STYLE

Georgian

TYPE OF BUILDING

Residential

CURRENT USE

Museum and Offices

ORIGINAL USE

Dwelling

ALTERATION

Double storey post 1881

SIGNIFICANCE

Historical, Aesthetical.

RESTORATION AND MAINTENANCE SUMMARY

Stellenbosch Municipality appointed QSource Quantity Surveyors as the lead consultant for the project BSM 40/20, in sequence in March 2020 VIP Consulting Engineers (Pty) Ltd was appointed by QSource to perform visual structural inspections on the Voorgelegen building.

I made use of VIP's report as a guide, the identification of the necessary work was followed by my own on-site assessment, therefore, VIP's proposed repair work was revised, and additional work was implemented as it is documented in the present report.

TIMBER FLOOR REPAIRS

PROBLEMS OBSERVED

Rooms facing the North of the building exposed damaged timber floors, an investigation was conducted removing some of the wooden planks, which were made of SA Pine, indicating earlier repairs, none of the original fabric was found on these floors; furthermore, as evidence of earlier repairs, it was found that the gaps between the joists have been filled with rubble, shutting the floors ventilation, figures 1 and 2.

Figure 1

Two additional issues compounding the problem were noted: an earlier attempt to control external dampness using cement plaster and PVA paint, both techniques block the breathability of the wall. The second issue was a tap located on the external wall face and a brick paving apron with a fall towards the wall.

Figure 2

Figure 1. Shows a section of the damaged timber floor and joists due to water ingress. Figure 2 Shows an earlier fixing attempt, no records found at the Stellenbosch Municipality, this included filling the joists gaps with building rubble.

Figure 3

Figure 3 indicates the placing of new timber joists after the removal of the rubble.

Figure 4

Figure 4 illustrates the method for placing new joists: fixing on purpose-made concrete blocks with steel pins, open spaces are left to keep under floor ventilation.

Figure 5 – timber tinting in process

Figure 6. Colour match achieved with the historic fabric

Figure 7. Adaptive reuse of Voorgelegen rooms after the timber floor restoration.

Figures 1 to 7 depicted the process of repairing and restoring the damaged timber floor of North facing rooms, the source of the problem is depicted in figure 8. This external tap was relocated, and the external wall was partially repaired using adequate materials, figure 9.

Figure 8 External tap has been relocated, since it was part of the problem,

Figure 9

The external North facing wall was stripped off the unsuitable cement plaster and replastered with a lime mix and finished with lime wash. This procedure allows the historic sunbaked brick to recoup its breathability, the external rainwater channel was regouted, and the apron rebuilt with a suitable fall.

LINTOL REPLACEMENT AND PLASTER

While replacing the roof sheeting a portion of the existing cement plaster, which is an unsuitable rendering, fell off the wall from above the door lintel. Figures 10, 11 and 12.

Figure 10

Figure 11

Figure 12

A prior redecoration attempt used wire mesh to hold the unsuitable rendering, the plaster delamination was triggered by the corroded metal wire mesh.

Figure 12 shows the rotten timber lintel as a consequence of water ingress and the inability of the wall to dry up or to 'breathe', older traditional construction is made of solid walls that rely on the absorption and evaporation of moisture through the permeable building fabric made of soft bricks with lime rendering.

Figure 13

The first stage for fixing the wall was a controlled dusting off the historic fabric built with the soft sunbaked bricks and stabilizing the wall with lime wash and putty lime to close bigger wall gaps.

Figure 14.

Figure 14 depicts the process of applying the final lime coat on the first scratch coat, the timber lintel was replaced, and a galvanized metal angle was included as a reinforcement

Figure 15

The outcome included a plaster drip enabling thus to get rid of the rainwater.

MINOR WALL CRACKS

Wall repairs fixing procedure included, first a soft brushing down of the brick surfaces, application of lime putty with a fiberglass mesh, followed by two coats of lime plaster, the first coat is thicker, is called 'scratch coat' and is completed with a 3 to 5mm finish coat, lastly a lime wash paint finished the wall renovation.

Figure 16 Wall repair in process

ROOF REPAIRS

Existing condition of the roof sheeting show rusting, and head and side flashings in many sections were detached from the walls,

Figure 17, Shows rusted roof sheeting and flashing detachment.

Figure 18.

Figure above, 17 and 18. Gives an overall view of the initial roof sheeting situation

Figure 19 Existing timber structure proved to be in good condition, few battens needed replacement.

Figure 20. Under roof sheeting membrane installation

Figure 21. New corrugated roof sheeting

Vip's report recommended the installation of IBR metal roof sheeting, the proposed profile is used primarily for industrial applications. i.e. warehouses and factories, therefore, I selected a corrugated profile matching the existing. It must be noted that

modern metal roof sheeting is a lightweight material, thus, thinner than the original corrugated profile. Consequently, to prevent roof leakage, on each side overlap it was fitted adhesive sealing rubber strips and pop rivets, see photo 22. In addition, I recommended overcoating the roof sheeting with a rubber-like elastomeric product, the latter was omitted due to budget restrictions. The installation as described above has proven to be watertight.

Figure 22. Installation of adhesive sealing strips

Figure 23. Metal flashings installation

GARDEN WALL

The garden wall is integral part of the historical precinct. Figures 24, 25 and 26 exposes the wall poor condition observed before restoration. It is a traditional construction, the foundation built with boulders and stones of different sizes with overlapping joints, gaps filled with rubble and mud; above the foundation the parapet wall was made with soft sunbaked bricks. Previous repairs were observed with contemporary bricks and the original rendering replaced with inappropriate cement plaster, elsewhere I pointed out that using cement plaster impedes the 'breathability' of the wall; a contributing factor to the state of deterioration was water ingress from garden watering which undermined the structure.

The rehabilitation consisted of the removal of the cement plaster, brushing out all loose material. The consolidation of the stone foundation was achieved by adding various stone sizes with lime putty and integrating fibre glass mesh, finishing with the application of lime plaster and finally coated with lime wash. Some of the bigger wall holes, as seen in figure 24, required brick replacement.

Figure 24

Figure 25

Figure 26

Figure 27 After the removal of the cement plaster

Figure 28. Repaired wall

Figure 29. Repaired wall

WOODWORK REPAIRS

The maintenance process entailed three steps: surface preparation, sanding down to break the surface gloss, application of one coat of primer, and finishing with two coats of gloss enamel, colours white and 'heritage green' to match existing. Repair work was limited to doors and windows.

Figure 30. The state of disrepair found comprised peeling of paint, broken beads,

Figure 31.

Figure 32

Figure 33

Figures 31,32 and 33 show doors and window after repair and maintenance work

PARKING PAVING

Figures 34 and 35 show the condition of the parking area that led to the brick paving being entirely replaced with new pavers on a well compacted sub-base, figure 36.

Figure 34

Figure 35

Figure 36 spreading the new sub-base

Figure 37

Figure 38

Figures 37 and 38 show the parking area after the brick paving replacement.

TENDER NO. BSM 30/24

**UPGRADING OF THE WEMMERSHOEK WASTEWATER
TREATMENT WORKS: PHASE 2**

REPORT

FEBRUARY 2026

Background

- The WWTW performance scored 83.0% compliance in 2022 with the Green Drop Criteria. The Effluent and Sludge compliance was some of the major concerns since the plant discharges into the sensitive Berg River. Stellenbosch Municipality investigated various options to improve the effluent quality discharge into the river and increase the hydraulic capacity of the plant.
- The project started in June 2024 with a planned completion date of May 2026. WEC Consultants were appointed as the consulting engineers to oversee the design and construction supervision. EXEO Civils were appointed for construction. After project completion, the design capacity of the plant will be 7 Ml/day dry weather flow.

OVERVIEW OF THE WORKS

The project entails UPGRADING OF THE WEMMERSHOEK WASTEWATER TREATMENT WORKS: PHASE 2.

The total works comprises of the following:

- Relocation of existing blower from Pniel WWTW – Isolation and dismantling of one existing blower installation at Pniel WWTW, loading and transportation to Wemmershoek WWTW, full mechanical/electrical installation, commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Extension of existing Blower Building – All building works to be completed.
- New Stone and Grit Channel System – Concrete work completed, the full mechanical and electrical supply and installation (including Manual Front Rake Coarse Screen, Sluice Gates, Screw Conveyor, Grit Classifier, Grit Channel Drainage Pumps and any other auxiliary equipment), wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- New Mechanical Perforated Band Screens and Washer Compactors (Inlet Works) – Full mechanical and electrical supply and installation (including any other auxiliary equipment), wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Vertical Shaft Mixer (if required) – The full mechanical and electrical supply and installation of vertical shaft mixer for the existing Raw Sewage Feed Tank and any other auxiliary equipment.
- New Raw sewer pump station – All concrete works completed and full mechanical and electrical supply and installation (including any other auxiliary equipment), wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Ferric Chloride Dosing System – Full mechanical and electrical supply and installation (including any other auxiliary equipment), wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Demolishing of existing Reactor, SST and Chlorine Contact Channel – Including all site clearance, earthworks etc. completed.
- New SBR System – Concrete work completed, re-assembly and re-construction of 2 x Prentec SBR tanks, Full mechanical and electrical supply and installation (including Aeration system, FBDA, Weirs, Scum Baffles and Launder, Sludge Wasting, walkways, supports and any other auxiliary equipment), wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Existing SBR System – The decommissioning, emptying of the tanks, site investigation of the mechanical and electrical equipment, refurbishment of mechanical and electrical equipment, integrating and re-programming the existing SBR system to operate in accordance of the new control philosophy. A wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed. **The decommissioning of the existing SBR System can only be done once the proposed SBR has been completed and successfully operating.**
- All interconnecting pipework
- Paving and handrails - Installation of all paving and handrails related to Portion 3 Works to be completed and installed.
- Emergency Overflow Pond - Lining and concrete work completed, including all pipework installation, wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative. A 28-day trial and operation period successfully completed.
- Various small structures - concrete work completed and grating and handrails installed.
- Roadworks, Walkways and Stormwater completed.

- Generator Building – All building works, full mechanical/electrical installation and 28-day trial and operation period completed, wet and dry commissioning completed by the Contractor and witnessed and approved by the Employer's Agent's Representative.

9. ADMINISTRATION OF POLICY	14

1. PREAMBLE

Whereas it is required of the Municipal Manager to take all reasonable steps to ensure that the Council has and implements crucial policies for effective financial and risk management.

And whereas the safeguarding of assets and the protection of Council against liabilities is very important and forms part of a proper assets management system as prescribed by Section 63 and needs annual revision in terms of Section 24(2)(c)(v) of the Municipal Finance Management Act 56 of 2003.

Therefore the Municipal Council of the Stellenbosch Municipality adopts the following Policy for Insurance Management.

2. DEFINITIONS AND ABBREVIATIONS

CFO	Chief Financial Officer
MFMA	Municipal Finance Management Act (No 56 of 2003)
MM	Municipal Manager (i.e. Accounting Officer)
MSA	Municipal Systems Act (No. 32 of 2000)
SIR	Self-Insurance Reserve
PPE	Property, Plant and Equipment
Insurance	Insurance is a contract (policy) in which the municipality receives financial protection or reimbursement against losses from an insurance company. Risk is transferred when the risk is shared amongst different parties, so one party does not carry the full loss should an event occur. Insurance involves a transfer of risk.
Self-Insurance Reserve	Entities have self-insurance reserves to set aside amounts to offset potential losses or claims that are not insured externally.
Excess	Means the first amount payable in the event of each and every claim.

Personal effects	Means staff personal property including wallets, cash, handbags, sunglasses, clothes, shoes, reading glasses and mobile phones.
Burglary	Means the criminal offense of breaking and entering a building or other premises illegally for the purpose of committing a crime.
Forcible and violent	Means an act that would cause physical damage. There must be both forcible (as simple as turning a key or pushing open a door) AND violent actions (entry by the use of any force accompanied by a violent physical act).
Public liability claims	Means third party claims for bodily injury and property damage arising out of the municipality's operations.

3. OBJECTIVE OF THE INSURANCE POLICY

The objective of this policy is to ensure that Stellenbosch Municipality's assets, councillors and employees are insured adequately and economically at all times. Detailed procedures, to ensure that management and employees within the municipality understand their respective responsibilities and duties, are provided in the standard operating procedures.

This document indicates the policy of Stellenbosch Municipality for insuring municipal assets, and for insuring the municipality, its employees and Councillors against public liability claims and other losses.

In general, the object of this policy is to ensure sound and sustainable financial management within Stellenbosch Municipality.

Insurance brokers active in the municipal environment over years prepared a standard for local authority insurance that takes all circumstances related to a municipality into account. There are however aspects in addition to this standard that the Council can decide on policy in order to reduce premium without an increase in risk or where the Council is prepared to accept risk because of a very slim probability that an event might occur.

Responsible financial management of any municipality requires that assets are properly managed. Municipalities have large numbers of assets, including PPE. As trustees of public funds, the Council must ensure that municipal assets are adequately insured at all times. The insurance should in addition protect the municipality, Councillors and employees against public liability claims and other losses.

4. POLICY FRAMEWORK

4.1 LEGISLATIVE REQUIREMENTS

Section 63 of the MFMA, Asset and liability management, states that:

“(1) The accounting officer of a municipality is responsible for the management of—

- a) the assets of the municipality, including the safeguarding and the maintenance of those assets; and*
- b) the liabilities of the municipality.*

2) The accounting officer must for the purposes of subsection (1) take all reasonable steps to ensure—

- a) that the municipality has and maintains a management, accounting and information system that accounts for the assets and liabilities of the municipality;*
- b) that the municipality's assets and liabilities are valued in accordance with standards of generally recognised accounting practice; and*
- c) that the municipality has and maintains a system of internal control of assets and liabilities, including an asset and liabilities register, as may be prescribed.”*

4.2 RELATIONSHIP WITH OTHER POLICIES

This policy, once effective, needs to be read in conjunction with other relevant adopted policies of the municipality, including the following, but not limited to—

- a) Delegation of Powers (Delegations register);
- b) SCM Policy;
- c) Asset Management Policy;
- d) Vehicle Policy;
- e) Budget Implementation and Funds and Reserves; and
- f) Risk Management Policy;

5. RESPONSIBILITIES

5.1 THE CFO OR HIS/HER DELEGATED OFFICIAL(S)

- a) shall (at least every three years, before the lapsing of the tender that was previously awarded) call for tenders for the insurance of municipal assets, Councillors, employees and third parties;
- b) shall, in accordance with such schedules and subject to this policy, effect such insurance through the service of an Insurance Company/Insurance Broker appointed by the municipality through the competitive prescribed SCM process;
- c) shall ensure that the insurance period will be from 1 July to 30 June of the following year and shall be renewable, dependent on previous performance (and in line with the tender processes followed).
- d) shall pay the monthly/annual premiums in advance;
- e) shall pay premiums over to the Insurers during the year, should circumstances change during the year when amendments, additions or deletions are made to the insurance portfolio;
- f) shall immediately notify the Council's insurer of any claim by or against the Council or against its insurers.
- g) shall assess all public liability claims under the excess amount as indicated in the Insurer's schedules. Public Liability claims should only be settled when the municipality could reasonably be seen to have acted negligently which resulted in the loss to the third party and when there is reasonable prospect of the municipality being found legally responsible for third party damages;
- h) shall ensure that sufficient funding is available to cover insurance-related expenditures;
- i) shall report to Council of the status of existing claims against the municipality and its Insurers;

- j) shall ensure that all claims and applications are dealt with diligently within a reasonable time;
- k) shall finalise all claims and applications submitted to the Section and ensuring that all the required technical, financial and legal aspects to each claim and application are dealt with when these are being finalised; and
- l) Shall update the Asset Register in accordance with the outcome of each insurance claim.
- m) Shall recommend the payment of excess amounts, the settlement of claims below excess, settlement of claims not covered by the Insurers, and all other insurance related expenditure.

5.2 THE DIRECTORS AND SENIOR MANAGERS AND MANAGERS OF DEPARTMENTS:

- a) shall before 31 May of each year verify or update the schedule of insurable risks and insurable assets under their control (and any other information deemed necessary)
- b) shall notify the CFO (or delegated official) without delay of any new insurable risk or of any alteration in an existing insurable risk which has arisen in connection with his/her department;
- c) shall ensure that the CFO (or delegated official) is notified of any occurrence or event giving rise or likely to give rise to a claim by or against the Council or against its Insurers. Failure to report incidences of loss might lead to the affected employee being held liable for the losses to Council;
- d) shall ensure that all documents / information (for example any required forms, reports, quotations, photos) for the completion of the claim is forwarded to the CFO (or delegated official) for submission to Council's insurance brokers;
- e) shall within 2 weeks (10 working days) of submitting a claim to the CFO (or delegated official), submit a departmental report to the CFO (or delegated official) in order to finalise the claim;
- f) shall report each claim against Council for investigation and the outcome reported to the CFO (or delegated official) and where necessary disciplinary steps and/or recovery be perused against any employee who is found, in terms of the investigation, to have acted negligently; and

- g) should advise all staff of their obligations to ensure the security of private property brought to the workplace to minimise the risk of loss and inconvenience to staff.

5.3 THE EMPLOYEES OF STELLENBOSCH MUNICIPALITY;

- a) should avoid storing private property at the workplace for extended periods of time, especially over weekends and during vacation periods;
- b) should insure personal property against loss or damage, particularly if it is of significant value in their personal capacity;
- c) shall report all losses, damages or any potential claims to the Insurance Section, their Departmental Manager and the Health & Safety Practitioner.
- d) shall take all reasonable steps to ensure that municipal assets are kept safe and assist the Municipal Manager to implement processes to safeguard assets and prevent losses to Council of all assets under their control.

6. RISK MANAGEMENT

The Municipal Manager must ensure that an evaluation of all potential events that might adversely affect the finances of a municipality is performed. The potential loss of income and extra expenses that a municipality might incur must be the consideration factor when the risk identification exercise is performed.

Even though risk is managed and preventative measures taken to minimise risk, it is acknowledged that not all risks can be eliminated and therefore Council accepts the fact that insurance remains the ultimate solution to risk management. It must however be viewed as the last resort.

The table below provides a list of risks (but not limited to) that has to be transferred to another party in the form of insurance. Risks not listed have been retained either due to the cost of control or due to the inability to obtain insurance cover. The latter is listed as special conditions to cover.

Insured Section	Description of Insured Section
Combined Cover (Including homeowners)	Damage or loss to all built structures, including outbuildings thereof, the owner's loose and fixed fittings therein and thereon, boundary and other walls, gates, poles, fences, public access points, purification plants, reservoirs and sewerage plants.
Business All Risk	Damage to the whole or part of the property described in the Specification, the property of the Insured or for which they are responsible, while anywhere in the world by any accident or misfortune not otherwise excluded.
Burglary/Theft	Damage to contents, the property of the insured or for which they are responsible, of any building at the insured premises, as a result of theft accompanied by forcible and violent entry into or exit from such building or any portion thereof or any attempt threat or as a result of theft (or any attempt threat) following violence or threat of violence against persons lawfully on the premises.
Money	Loss or damage to money (as defined). This includes money not contained in a locked safe or strong room in the custody of any authorized employee while away from the premises or at the premises outside normal working hours and also any other time from the premises.
Fidelity Guarantee	Loss of money and/or other property stolen by an employee, direct financial loss sustained as a result of fraud or dishonesty of an employee, which results in dishonest personal financial gain for the employee concerned. The term "dishonest personal financial gain" shall not include gain by an employee in the form of salary, salary increases, fees, commissions, bonuses, promotions or other remuneration.
Glass	Damage to internal and external glass (including mirrors), signwriting and treatment thereon at the insured premises, the property of the Insured or for which they are responsible.

Insured Section	Description of Insured Section
Goods in Transit	Damage to the whole or part of the property owned by the Municipality or for which they are responsible, in the course of transit by air, rail or road or other means incidental thereto and caused by any accident or misfortune not otherwise excluded.
Public Liability	<p>Damages which the insured shall be legally liable to pay consequent upon accidental death of or bodily injury to or illness of any person, or accidental loss of or physical damage to tangible property.</p> <p>Cover for claims against the Stellenbosch Municipality from a 3rd party for damage to the 3rd party's property and/or to the 3rd party himself caused by any structure related or in control of Stellenbosch Municipality, for example, if bodily injury or any damage to a 3rd party's property, caused by accidental, violent, external and visible means to a 3rd party.</p>
Employers Liability	Damages for which the municipality shall become liable to pay consequent upon death of, or bodily injury to, or illness of any person employed under a contract of service or apprenticeship with the municipality, or any councillor or any person on the business of the council whether on a voluntary basis or otherwise, which occurred in the course of and in connection with such person's employment by the municipality within the territorial limits and which results in a claim or claims first being made against the municipality in writing.
Group Personal Accident	Bodily injury caused by accidental, violent, external and visible means to any principal, partner, director, councillor or employee of the municipality or any person on the business of the council whether on a voluntary basis or otherwise, as specified. The Insurers will pay to the Insured, on behalf of the Insured person or his estate, the compensation stated in the schedule in the event of accidental bodily injury to any such person directly and

Insured Section	Description of Insured Section
	independently of all other causes resulting within 24 calendar months in death or disability as specified.
Motor Fleet & 3 rd Party motor liability	Loss of or damage to any vehicles as indicated to the insurers and its accessories and spare parts whilst thereon. In addition, if such vehicle is disabled by reason of any loss or damage insured hereby, the insurers will pay the reasonable cost of protection and removal to the nearest repairers and the municipality may give instructions for repairs to be executed without the previous consent of the insurers to the extent of but not exceeding a specified amount, provided that a detailed estimate is first obtained and immediately forwarded to the insurers.
Electronic Equipment	Physical loss or damage to the property insured described in the schedule from any cause not herein after excluded whilst (i) at work or at least anywhere within the municipality's premises as specified; (ii) in transit, including loading and unloading or whilst temporarily stored at any premises en-route; (iii) temporarily removed from the premises to any other location.
Directors and Officers Liability	Legal Liability if any director or municipal official is prosecuted in his/her private capacity due to council activities or council decision making.
Councillors Special Risk Insurance	As per the Government Gazette No 40519 dated 21 December 2016. Insurance cover provided to a councillor by the municipality, which covers the loss of or damage to a councillors personal fixed or moveable property and assets, excluding property used by such councillor for business purposes, as well as life and disability cover, for any loss or damage caused by riot, civil unrest, strike or public disorder.

7. INSURANCE KEY MANAGEMENT PRINCIPLES

7.1 Municipal Assets

- a) Material movable and immovable assets (in value and substance) shall be insured at least against destruction, fire and theft, and all municipal buildings shall be insured at least against fire and allied perils.
- b) All insured assets shall be handled in terms of the municipality's Insurance Policy as agreed with the Insurance Brokers.
- c) Separate cover for riot, strike and public disorder damage shall be taken out at the discretion of the Municipal Manager in consultation with the CFO and the relevant Director.
- d) Any other insurance cover shall be at the discretion of the Municipal Manager.
- e) The decision whether to insure an asset or not shall be at the discretion of the Municipal Manager in consultation with the CFO and the relevant Director.
- f) All contracts between council and a 3rd party should be monitored to ensure loss or damage to municipal property are minimised and insured. This may include but is not limited to; eg. Rental agreements, projects under construction and any other contract relating to municipal assets.
- g) Any agreements entered into as per 7.1(f) above, that may influence council's insurance policy and assets covered in this policy, must be communicated with the AFS, Assets & Returns department in order to arrange cover if required.

7.2 Staff property

- a) Applications by staff members for reimbursement of the loss of or damage to staff property at work shall not be considered by the municipality. Liability will not be accepted by the municipality for loss or damage to an employee's personal effects which are used or stored on premises owned or used by the municipality.

- b) It is expected that employees, in their own interests, will ensure that any valuable items of jewelry (including wrist watches) worn on duty, and/or personal equipment are adequately insured against loss or theft on their personal insurance policies.
- c) The carrying of unreasonably large amounts of cash, credit cards or other easily stolen and rapidly convertible items should be avoided during working hours as far as is practicable.
- d) No compensation will be paid by the municipality for loss or damage to any employee's personal assets (e.g. Private cellular phone, Private Vehicle, Private Laptop, Handbags, Cash, etc.)

7.3 Public Liability

- a) Third parties are to be covered for death, bodily injury or illness and/or loss of or damage to property up to a maximum limit to be determined by the CFO in consultation with the Municipal Manager.
- b) All public liability claims under the excess amount shall be considered by Management and a recommendation made to the Chief Financial Officer on whether payment should be made or not. Only the Chief Financial Officer may approve payments in this regard.
- c) Public Liability claims under the excess amount should only be settled when the municipality could reasonably be seen to have acted negligently which resulted in the loss to the third party and when there is reasonable prospect of the municipality being found legally responsible for third party property damage or bodily injury. Settling claims where this is not the case would set bad legal precedence which the municipality would not be able to sustain financially into the future.

7.4 Limits

Excess limits are incorporated in the 3-year contract with the insurance broker appointed, therefore the excess limits will be in accordance to this contract.

7.5 Payment of excesses (or losses below excess payable) by employees

Where in the opinion of the relevant Director and the Municipal Manager an employee's negligence led to the damage to, or loss of, an asset, the excess payable may be claimed from the employee concerned in terms of the outcome of the Disciplinary Procedures.

7.6 Insurance claims rejected by the Insurer (above excess)

Where in the opinion of the relevant Director and the Municipal Manager an employee's negligence led to the damage to, or loss of, an asset, the total loss to the municipality may be claimed from the employee concerned in his/her personal capacity in terms of the outcome of the Disciplinary Procedures.

7.7 Failure to report an incident

Failure to report an incident to the insurance section within the timeframes indicated on the Policy, may result in disciplinary action taken against the employee responsible for the asset. The outcome of the disciplinary process will determine whether the employee will be personally held liable for the losses incurred.

8. APPOINTMENT OF INSURANCE BROKERS

The appointment of an insurance broker must be performed in terms of the municipality's Supply Chain Management Policy. Call for bids to appoint an insurance broker will be done every three years. Section 33 of the MFMA will be applicable if the duration exceeds 3 years.

9. ADMINISTRATION OF POLICY

This policy will be administrated by the Chief Financial Officer that will be the Policy holder.

Tender Nr	Description	Service Providers	Date of finalisation of the appeal
B/SM 53/24	Term Tender: Pipe Replacement using conventional and trenchless methods	Nepent	2024-07-01

Introduction

The Stellenbosch Municipal Annual Report 2024/25 addresses the performance of the Stellenbosch Municipality in the Western Cape, South Africa, with regard to its core legislative obligations. Local government must create a participatory framework that defines and enhances the relationship between elected leaders and their communities. This requires that the municipal council provide regular and predictable reporting on programme performance and the general state of affairs in the municipality.

The report reflects on the performance of the Stellenbosch Municipality for the period of 01 July 2024 to 30 June 2025. The layout of the annual report is prepared in terms of Section 121(1) of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA).

The Annual Report consists of six chapters with the following broad overview:

-  **Chapter 1:** An overview of the municipality's overarching strategy, accountability processes, social and demographic profile, and key highlights and challenges regarding finance, institutional transformation, and key basic service delivery.
-  **Chapter 2:** Details regarding the municipality's governmental operations address the fundamental aspects of good governance.
-  **Chapter 3:** Overview of the municipality's performance, focusing on service delivery and predetermined objectives.
-  **Chapter 4:** Provides insight into the municipality's human resources and organisational management areas, focusing on organisational structure and legislation.
-  **Chapter 5:** An overview of the municipality's financial performance, reflecting on the municipality's financial position, assets, cash flow, and intergovernmental grants received by the municipality.
-  **Chapter 6:** An overview of the key audit findings by the Auditor-General of South Africa.

Vision, Mission, and Values

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

1.1 COMPONENT A: EXECUTIVE MAYOR'S FOREWORD

Cllr Jeremy Fasser
Executive Mayor

It is with pride and gratitude that I present the Annual Report for the 2024/25 financial year. This document reflects not only the progress we have made but also the resilience and determination of our community as we continue building Stellenbosch as a true Valley of Opportunity for All.

Over the past year, we have sharpened our focus on strengthening the local economy, ensuring reliable service delivery and creating an environment where businesses can grow and residents can flourish. Investment attraction, economic growth and job creation remain central to our vision, and we have worked consistently to unlock opportunities that benefit every household and visitor in our valley.

At the core of our approach lies a belief that Stellenbosch must be a place where people can thrive - where innovation and hard work are supported, and where we continue to build firm foundations for shared prosperity and long-term sustainability.

Policy and Strategic Focus

Our planning has remained firmly guided by the Provincial Growth and Development Strategy and our Integrated Development Plan (IDP). During this financial year, we placed particular emphasis on practical outcomes in economic development, infrastructure investment and environmental sustainability. These priorities are not abstract ambitions but measurable actions that ensure we are shaping an inclusive, competitive and future-ready municipality.

By aligning our strategies with provincial and national objectives, we have been able to secure meaningful results that support community wellbeing and foster a stronger local economy.

Service Delivery Progress

Reliable basic services are the backbone of our work, and we have continued to prioritise investment in core infrastructure. A significant share of the capital budget has once again been directed towards essential services - upgrading water and sanitation systems, maintaining road networks, improving waste management and recycling, and ensuring a stable electricity supply.

These improvements go beyond addressing current needs. They also strengthen our capacity to withstand future challenges and guarantee that residents benefit from quality services every day.

Engaging with the Community

We know that the success of our municipality depends on an active partnership with residents. Over the year, we expanded opportunities for public participation through IDP engagements, community meetings, written submissions, digital platforms and direct communication channels. These interactions ensure transparency, accountability and responsiveness to the needs of all communities across Stellenbosch.

This inclusive approach has not only enriched decision-making but has also deepened the trust between the municipality and those we serve.

Conclusion

The 2024/25 financial year has been marked by both challenges and important achievements. I am particularly proud that our municipality has once again received a clean audit, reinforcing our commitment to sound financial management and good governance. This achievement is a reflection of disciplined leadership, dedicated staff and an engaged community working together.

Looking ahead, I remain confident that Stellenbosch is on a path of continued growth and opportunity. By focusing on the basics, planning for the future and working side by side with our residents, we are building a municipality that is resilient, inclusive and prosperous.

I extend my heartfelt thanks to our councillors, municipal officials, partners and, above all, our residents whose support and participation make these successes possible. Together, we will keep shaping a Stellenbosch where every individual can look forward to a brighter future.

CLLR JEREMY FASSER
EXECUTIVE MAYOR

1.2 COMPONENT B: EXECUTIVE SUMMARY

1.2.1 MUNICIPAL MANAGER'S FOREWORD

Geraldine Mettler
Municipal Manager

As we reflect on the 2024/25 financial year, I am pleased to report that Stellenbosch Municipality has continued to demonstrate excellence in governance, service delivery and financial management. This year has once again tested our resilience, but through discipline, teamwork and innovation, we have strengthened our ability to serve our residents and deliver on our mandate.

External challenges such as loadshedding, inflationary pressures and climate-related risks have had a direct impact on households, businesses and municipalities across South Africa. Despite these pressures, Stellenbosch has remained focused on protecting essential services and ensuring that the fundamentals of good governance and sound administration are never compromised.

This Annual Report provides a comprehensive account of our performance over the past 12 months. It shows how we managed to sustain critical services such as water, electricity, sanitation, waste management and emergency response, while continuing to invest in infrastructure upgrades and future growth. Although some projects experienced delays due to supply chain constraints and cost escalations, we prioritised stability and continuity so that residents did not face disruptions to basic services.

One of the highlights of the year is that Stellenbosch Municipality once again achieved a clean audit outcome from the Auditor-General of South Africa. This achievement affirms our commitment to financial accountability, strong internal controls and ethical governance. It is a reflection of the dedication of our Council, management team and officials who work tirelessly to ensure that public resources are managed with integrity.

We have also continued to make significant investments in infrastructure to meet the demands of a growing population and expanding economy. Upgrades to water and electricity networks, road infrastructure and sanitation facilities remain at the centre of our work. These projects not only enhance the quality of life for residents but also position Stellenbosch as a municipality that is both sustainable and attractive to investors.

Public participation has remained a cornerstone of our governance approach. Through IDP engagements, community meetings, digital platforms and formal submissions, residents have contributed valuable insights that shape municipal planning and service delivery. This engagement builds transparency, strengthens trust and ensures that our decisions reflect the priorities of the people we serve.

Our progress in 2024/25 would not have been possible without collaboration. The leadership of the Executive Mayor, Mayoral Committee and Council has been instrumental in setting clear direction and priorities. I also extend my appreciation to the Audit and Performance Audit Committee (APAC) for their oversight role, which continues to add immense value. Above all, I wish to acknowledge the commitment of our officials and employees. Their passion, professionalism and hard work form the backbone of every success reflected in this report.

Looking forward, we remain committed to building a Stellenbosch that is innovative, resilient and inclusive. By focusing on financial prudence, infrastructure development, sustainability and community partnerships, we are creating an environment where both people and businesses can thrive.

It is my privilege to serve as the Municipal Manager of Stellenbosch Municipality. I am confident that the momentum we have built during this financial year will continue to drive us towards realising our shared vision of a Valley of Opportunity and Innovation for all.

MS GERALDINE METTLER
MUNICIPAL MANAGER

1.2.2 STRATEGIC FOCUS AREAS

The strategic focus areas within a municipality are the building blocks of the Council's strategy. The focus areas, as depicted in the diagram below, illustrate the expansion of the vision statement and create structure around how the municipality will achieve its strategic goals.

Table 1: Strategic focus areas

SFA 1: Valley of Possibility	Predetermined Objectives <ol style="list-style-type: none"> 1.1 Create an environment conducive to business development and job creation. 1.2 To facilitate and coordinate support for emerging entrepreneurs by utilising internal SCM processes and linking SMMEs with opportunities in the market. 1.3 To provide, upgrade, and maintain an effective engineering infrastructure to support effective service delivery. 1.4 To ensure the provision of non-motorised transport routes as a functional mode of transport.
Predetermined Objectives <ol style="list-style-type: none"> 2.1 Managing human use of the biosphere and its resources. 2.2 Enhancing the integrity of the environment is imperative for long-term sustainability. 2.3 Incorporating biodiversity into the environment is an imperative for long-term sustainability. 2.4 Ensuring spatial sustainability. 2.5 Facilitate the efficient use of all forms of capital available to Stellenbosch. 2.6 Building human capacity and ability. 2.7 Efficient information management. 	SFA 2: Green and Sustainable Valley
SFA 3: Safe Valley	Predetermined Objectives <ol style="list-style-type: none"> 3.1 To implement an integrated safety strategy that incorporates multi-stakeholder engagement and social crime prevention. 3.2 To develop and implement institutional crime prevention strategies, with a focus on improved law enforcement and neighbourhood watches.
Predetermined Objectives <ol style="list-style-type: none"> 4.1 To develop and maintain sustainable human settlements that will meet the diverse range of housing needs. 4.2 To develop and implement a social infrastructure master plan for the upgrading and maintenance of social facilities in all wards. 4.3 To involve and build the capacity of stakeholders in the planning and management (governance) of the areas where they live. (Promote participatory planning and integrated implementation). 4.4 To provide access to basic services for households in the Stellenbosch Municipal area. 	SFA 4: Dignified Living
SFA 5: Good Governance and Compliance	Predetermined Objectives <ol style="list-style-type: none"> 5.1 To develop, align, and implement effective management information systems. 5.2 An effective asset management system to optimise the use of municipal assets. 5.3 To manage integrated development planning and the efficient measurement of predetermined objectives as per the regulatory framework. 5.4 To involve the community in the planning and management of programmes and projects impacting their ward(s). 5.5 To review municipal governance processes as per the Risk-Based Audit Plan 5.6 A skilled and capable workforce that supports the growth objectives of the municipal area 5.7 A responsive, accountable, effective, and efficient local government system 5.8 To implement an effective revenue management system. 5.9 To provide accurate and relevant financial information for decision-making. 5.10 To develop and implement a responsive, accountable, effective, and efficient customer care structure and system.

1.2.3 ALIGNMENT WITH INSTITUTIONAL ARRANGEMENTS AND PROCESSES

Capacity building is the process of strengthening a system or organisation to increase its effectiveness, impact and ability to achieve its goals and sustainability over time. Institutional arrangements are policies, systems, processes and structures used by organisations to legislate, plan and manage their activities efficiently and to effectively coordinate with others in fulfilling their mandates.

Institutional arrangements for capacity building are there for necessary policies, systems and structures used to plan and manage the process of capacity building for an organisation in a holistic manner.

It is vital to track progress and adapt approaches to meet the emerging needs to ensure adequacy of action and effectiveness in fulfilling objectives. A systematic, holistic and sustainable system is also important, where individual efforts from different players contribute to and implement activities in a coordinated manner.

Conventional strategic planning processes, while essential for guiding development and management decisions, can often be time-consuming. The preparation of a comprehensive strategic framework and implementation programme can be finalised over time by setting out targets per activity. However, it is crucial for the municipality to focus on addressing immediate needs in today's decision-making environment. For municipalities, responding to current challenges is increasingly urgent, as every month is significant in the efforts to adapt and thrive. Recognising the pressing nature of these challenges, the municipality believes it is vital to develop a swift and integrated approach. By doing so, the municipality can preserve the unique qualities of communities and enhance its preparedness for future obstacles. It is important to acknowledge that the phrase "under preparation" frequently serves as a rationale for inaction or less-than-optimal decision-making. Furthermore, the municipality must ensure that it capitalises on the invaluable insights gained from local experiences, as these perspectives can greatly contribute to its strategic initiatives.

To facilitate this constructive dialogue, the municipality has established regular, informal yet structured engagements between the Mayoral Committee (MayCo) and the Director's Forum. These discussions will provide a platform to collaboratively explore strategic issues and develop effective responses. The municipal planning methodologies aim to bridge the gap between local knowledge, technical requirements for strategy preparation, and the immediate need for actionable frameworks. By fostering robust, structured information-sharing and planning workshops, the municipality can effectively guide municipal development and management. The outcome of this process will be an initial strategy that not only assists in navigating current decision-making but also establishes a solid foundation for future initiatives. This strategy will serve as a broad framework, which can be elaborated upon through additional technical work in future.

1.2.4 THE TOOLS OF GOVERNANCE

Planning techniques are used to bridge the gap between local experiential knowledge, the technical needs of strategy development, and the demand for strategic frameworks to be ready to cope with rapid decision-making to reduce the risk of unforeseen issues.

Through extensive, organised information-sharing and planning workshops, this procedure aims to establish a starting position to guide the development and administration of the Stellenbosch Municipal Area. The strategy becomes the overarching strategic framework, which is then built on with technical work. The Integrated Development Plan (IDP) is a crucial management tool that aligns scarce resources to clearly define policy objectives and priorities within the broader framework of developmental local government. It ensures greater coordination and integration across all spheres of government and promotes active citizen engagement. The figure below will outline the key aspects of good governance in the municipal system.

Figure 1: Tools of Governance

To ensure that the Council's strategic processes are aligned to, the municipal accountability cycle, as depicted below, needs to be implemented.

Figure 2: Accountability Process flow

1.2.5 STATE OF THE GREATER STELLENBOSCH

Stellenbosch Municipality is located at the edge of the City of Cape Town, but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolitan municipality. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West / Strand) and just a few kilometres from the breathtaking Boland mountain ranges. The municipal area covers approximately 900 km².

In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-added chain and for employment.

The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural communities such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klappmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vloottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles, such as Cape Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including Stellenbosch University and several prestigious schools, as well as Boland College. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound – the area is also home to the oldest wine route in South Africa.

A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area is enriched with arts and culture landmarks, featuring facilities like the Adam Small Theatre, Oude Libertas Amphitheatre (famed for its summer performances of music, theatre, and dance), Spier Amphitheatre, Theatre on Dorp Street, and Aan de Braak Theatre.

The following municipalities share their borders with the Stellenbosch Municipality:

- ⚡ City of Cape Town (South);
- ⚡ Drakenstein Municipality (North);
- ⚡ Breede Valley Municipality (North-East); and
- ⚡ Theewaterskloof Municipality (South-West).

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 1: Locality map of municipal boundaries

1.2.6 WARD DEMARCATION

The table below presents the areas per ward.

Table 2: Municipal Ward Demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal, Domaine des Anges, La Petite Provence and La Ferme Chantelle
3	Lanquedoc, Meerlust, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm, Maasdorp
4	Kylemore, Johannesburg, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan (Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms, Kelsey Farm
7	Mostersdrift, Karindal, Rozendal, Uniepark, Simanswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially;) Koloniesland, Victoria Street, Bosman Street, Noordwal East, Riebeck Street
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan, and the Western border is Bird Street
10	Tenantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Rd, Acedemia, Bosman Street, Smuts Rd, Joubert Street, De Beer Rd, De Villiers Rd from Ryneveld Street to Cluver Rd on the left-hand side
11	Boundaries of the ward are: Krige Rd, Herte Street, Skone Uitsig Rd onto Alexander Street onto Du Toit Street toward Merriman Avenue, towards Adam Tas Rd onto George Blake Street, Mark Street, Distillery Rd, Santhagen Rd, Swawel Avenue, Kanarie Rd, Tarentaal Rd, Bokmakierie Rd, Fisant Rd, Devon Valley Rd, Kiewiet Rd, Dagbreek Rd, Pelikaan Street, Patrys Rd, Hammerkop Rd, Loerie Rd, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	10th and 13th Street, Snake Valley, Enkanini, Watergang,
13	Kayamandi: Zone A Masithandane Street, Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses, Red Roofs, Zwelitsha, Costaland

The map below depicts the Cape Winelands District in relation to other districts and provincial boundaries.

Map 2: Location of Cape Winelands District in relation to Provincial Boundaries

The map below depicts the local municipalities of the Cape Winelands District:

Map 3: Location map of Stellenbosch Municipality in relation to Cape Winelands District Boundaries

The Cape Winelands District Municipality is located close to the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg local municipalities.

1.2.7 SOCIO-ECONOMIC CONTEXT

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2024. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The GDPR performance, risk, and vulnerability factors can be found in detail in the Municipal Economic Review Outlook (MERO) 2025 for the Stellenbosch municipal area.

1.2.8 DEMOGRAPHICAL OVERVIEW OF THE GREATER STELLENBOSCH AT A GLANCE

Table 3: Socio-economic summary

Population, 2025			Households, 2025		
	Population			Households	
	209 831			57 520	
Education, 2024			Poverty, 2023		
	Matric Pass Rate	80.2%		Gini-Coefficient	0.60
	Learner Retention Rate	81.5%		Poverty Head Count Ratio (UBPL)	71.4%
	Learner-Teacher Ratio	26.7			
Health, 2023/24					
	Primary Health Care Facilities	Immunisation Rate	Maternal and Neonatal Mortality Ratio	Teenage Pregnancies – Delivery rate to women U/19	
	8 (excl. mobile / satellite)	58.1%	0.0	0.6%

MYPE 2024/25

1.2.8.1 Population Growth and Household

Stellenbosch's population is forecast to increase from **209 831** in 2024 to **231 712** by 2029, reflecting an annual growth rate of **1.7 per cent**. This significant increase underscores Stellenbosch's appeal, particularly its educational institutions and vibrant community atmosphere. Stellenbosch is experiencing a notable demographic influx. This growth necessitates strategic planning for infrastructure and local services to support the needs of a larger population.

In terms of households, Stellenbosch is projected to grow from **57 520** in 2024, with an annual growth rate of approximately **2.4 per cent**. This increase indicates a rising demand for housing that aligns with the growing population. Addressing this growth in households will be essential for maintaining service quality and community engagement. The graph below depicts the estimated population growth from 2024 to 2026:

Graph 1: Estimated Population Growth

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.2 Population Density

Population density in Stellenbosch serves as a critical indicator of urban development and resource allocation. As of 2024, Stellenbosch's density is anticipated to increase to approximately 251 people per square kilometer, reflecting its growing population. In comparison, the Cape Winelands District's overall density is lower, with figures around 117 people per square kilometer. This significant difference necessitates effective planning to address housing, infrastructure, and service demands. As urbanisation in Stellenbosch continues, it may spur economic activities but also pose challenges related to congestion and environmental sustainability. These density figures highlight the importance of targeted development strategies to manage the implications of increasing urban concentration, ensuring that Stellenbosch remains a viable and attractive place for residents and businesses alike.

Stellenbosch:	251 people/km ²
Drakenstein:	203 people/km ²
Breedee Valley:	53 people/km ²
Langeberg:	28 people/km ²
Witzenberg:	15 people/km ²

1.2.8.3 Racial Split

The racial composition in the Stellenbosch municipal area presents a diverse demographic landscape. Much of the population comprises Black African individuals, accounting for 32.8 per cent of the total, followed closely by the Coloured community, constituting 53.4 per cent. White residents make up 13.4 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.4 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The figure below indicates the racial split within the Stellenbosch Municipality:

Graph 2: Racial Split for the Stellenbosch Municipal area

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.4 Gender Ratio

Stellenbosch's gender ratio shows a balanced demographic pattern, with 49.2% males and 50.8% females. This implies that for every 100 men, there are roughly 101 women in the total population. This trend is expected to remain stable over the next few years with minimal variations anticipated through 2029. The fluctuations could be influenced by migration and employment trends, which. Understanding demographic dynamics is crucial for economic analysis and strategic planning.

The figure below depicts the gender ratio within the Stellenbosch municipal area.

Figure 3: Ratio of % females and males

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.5 Age Cohorts

Stellenbosch's age cohort distribution indicates a diversified demographic landscape. The population aged 0 - 14 is expected to increase slightly, from 43 515 in 2024 to 46 279 in 2029, indicating a need for expanded educational resources and childcare services. The working-age population (15–64) is predicted to stabilise, indicating a strong labour force. However, the large increase in the senior population (65 and older) demands targeted programmes for healthcare and social support. This demographic shift suggests potential socioeconomic issues, such as higher healthcare expenses and a greater need for age-appropriate services, necessitating proactive planning to provide an inclusive environment for all age groups.

1.2.8.6 Education

The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Quality education equips individuals with essential skills, knowledge, and critical thinking abilities, empowering them to participate meaningfully in the local economy. As the educational attainment level rises within a municipality, there is a corresponding increase in employment opportunities and higher earning potential for residents. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty.

Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch experienced a notable surge from 28 033 enrolments in 2020 to 29 092 in 2022, with a minor increase to 29 826 learners in 2023. It is evident that the educational growth depicts a positive socio-economic trend within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities. Stellenbosch is a hub for both education and agriculture, luring families to the area.

Compared to other municipalities in the Cape Winelands, Stellenbosch's enrollment is impressive, particularly given its relatively limited geographic area.

The graphs below depict learner enrollments, learner-teacher ratios, and learner retention from 2020 to 2023.

Graph 3: Learner Enrolment 2020 – 2023

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

It is crucial to determine healthy learner-teacher ratios to ensure the schools' capacity to accommodate the students. Lower learner-teacher ratios are associated with enhanced teacher-student interaction, fostering better-quality education. Stellenbosch's learner-teacher ratio is 26.32, somewhat lower than the Cape Winelands regional average of 27.13. The 2022 Schools Realities Publications emphasise that government-paid teachers face high learner-teacher ratios, indicating larger class sizes. Despite a minor decrease from 26.8 students per teacher in 2020 to 26.6 in 2022 to 26.32 in 2023, the ratio remains below the recommended range of 35:1 to 40:1.

This suggests relatively uncrowded classrooms, aligning with established standards and ensuring a conducive learning environment, ultimately impacting the socio-economic landscape positively.

Graph 4: Learner-Teacher Ratio 2020 - 2023

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior. This can reflect essential socio-economic factors and personal circumstances that have a significant impact on education. The inverse of the learner-retention rate is commonly referred to as the drop-out rate.

Stellenbosch's learner retention rate in 2023 is 81.5 per cent, higher than the regional average of 77.2 per cent for the Cape Winelands. The relatively high retention rate in Stellenbosch suggests that most learners can complete their education through to matric, which is a positive reflection on the support systems available within the Stellenbosch municipal area.

Learner retention rates are influenced by a wide array of factors, including low socio-economic background, learners' attitudes towards education, overcrowded classrooms, critical thinking skills, study skills, and other personal circumstances that can make it difficult for the learner to focus on education. Addressing these factors is necessary for encouraging a more conducive learning environment, ensuring higher retention rates, and ultimately enhancing the region's overall socio-economic landscape.

Graph 5: Learner retention 2020 - 2023

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area was recorded at 42 in 2023. 29 of the schools are equipped with libraries.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 64.5 per cent in 2023, whereby 71.4 per cent are equipped with libraries.

Schools with libraries / media centres

The Stellenbosch municipal area consists of 42 schools in 2023, of which 29 were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information, which is in turn directly linked to improved education outcomes. The schools that remain without libraries face challenges in providing students with the same level of academic support, which could affect overall educational outcomes.

Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. Stellenbosch has a matric pass rate of 80.2 per cent in 2023, which is higher than the regional average of 74.5 per cent for Cape Winelands. This high pass rate indicates that a significant proportion of learners in Stellenbosch are completing their schooling and performing well in the matric exams.

The graph below depicts the Matric pass rates from 2020 to 2023.

Graph 6: Education outcomes (matric pass rate) 2020 - 2023

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.7 Health

Healthcare Facilities

According to the LGSEP 2024, the Stellenbosch municipal area has 8 fixed primary healthcare facilities, comprising 7 fixed clinics and 1 community day centre. There are 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites, 9 ART treatment sites, and 12 TB clinics. The table depicts the total number of healthcare facilities.

Figure 4: Health Facilities

Source: Draft Western Cape, Social-Economic Profile 2024 (Stellenbosch Municipality)

Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. The number below only refers to provincial ambulances and excludes all private service providers. The number of ambulances remained unchanged between 2021/22 and 2023/24.

Figure 5: Emergency Medical Services

Source: Draft Western Cape, Social-Economic Profile 2024 (Stellenbosch Municipality)

HIV / AIDS and Tuberculosis

In Stellenbosch, the total number of registered patients receiving ART has increased steadily from 7 062 in 2022/23 to 7 321 in 2023/24. Similarly, the number of registered patients receiving TB treatment also significantly increased from 1 062 in 2022/23 to 1 230 in 2023/24.

Table 4: HIV/AIDS Management

Area	Registered patients receiving ART			Number of new ART patients		
	2021/22	2022/23	2023/24	2021/22	2022/23	2023/24
Stellenbosch	6 915	7 062	7 321	481	429	298

Source: Western Cape, Social-Economic Profile 2023

Graph 7: Number of TB patients registered on treatment

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Child Health

The immunisation coverage rate for children under the age of one in the municipal area worsened from 73.3 per cent to 58.1 per cent between 2021/22 and 2023/24. However, there was a notable improvement in malnourished children, with a decrease in malnutrition from 2.6 to 1.6 per cent between 2017/18 to 2023/24.

Graph 8: Child Health

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Maternal Health

The maternal mortality ratio in Stellenbosch has steadily declined from 62.5 in 2018/19 to 0.0 in 2023/24, which is a considerable improvement. The rapid drop in recent years may need more verification to understand its underlying causes. The termination of pregnancy rate (0.7 per cent) remained unchanged throughout this period. In Cape Winelands, the termination of pregnancy rate has remained consistent, at 0.8 from 2022/23 to 2023/24, whereas in Stellenbosch it has risen from 0.5 in 2018/19 to 0.6 in 2023/24. Lower termination rates in Stellenbosch may be due to different socio-cultural contexts, access to reproductive health care, or family planning education programmes compared to the rest of Cape Winelands, which could explain the observed variations.

Graph 9: Maternal Health

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.8 Safety and Security

All the data below are sourced from the Draft Local Government Socio-Economic Profile for 2024 for the Stellenbosch Municipal area.

Murder

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the number of murders de-escalated from 45 per 100 000 in 2021/22 to 38 in 2023/24.

Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency, and human trafficking.

Stellenbosch's sexual offences figures have fluctuated significantly, with a dramatic decrease from 123 per 100 000 in 2021/22 to 68 in 2022/23, followed by an increase to 121 in 2023/24. The sharp decline in 2022/23 may indicate improvements in victim reporting or a temporary reduction in incidents.

Common Assault

Stellenbosch has had significant variations in common assault rates, dropping from 518 in 2021/22 to 366 in 2022/23 before climbing again to 533 in 2023/24. This shows that frequent assault is a dynamic issue, probably influenced by social tensions, alcohol consumption, or other variables. In comparison, Cape Winelands has shown greater consistency, with a modest reduction from 660 in 2022/23 to 629 in 2023/24. The rise in assault rates in Stellenbosch shows an ongoing issue, which is most likely influenced by urbanisation, societal pressures, or a lack of conflict resolution methods in public settings. To address this issue, both municipalities must prioritise violence prevention, dispute resolution, and community engagement.

Commercial Crime

Stellenbosch has had a significant increase in commercial crime, from 348 in 2022/23 to 587 in 2023/24, indicating a growing worry about financial crimes in the corporate sector. This increase could indicate more sophisticated criminal behaviour targeting firms, or a shift toward financial crimes due to economic pressures. In comparison, Cape Winelands has seen a more gradual increase, rising from 236 in 2021/22 to 265 in 2023/24. Stellenbosch's high jump suggests that the municipality may be suffering commercial sector vulnerabilities, which could be worsened by urbanisation and increased company activity. Both communities must reinforce rules, boost corporate security, and increase law enforcement's ability to combat fraud, theft, and other financial crimes.

Drug-Related Offences

Drug-related crimes refer to the situation where the perpetrator is found to have been under the influence of or selling illegal drugs.

Stellenbosch has had a large increase in drug-related crimes, rising from 482 per 100,000 in 2022/23 to 700 in 2023/24. This significant growth indicates a serious drug problem in the region, most likely caused by rising demand or distribution networks that target local people. The growth contrasts with the more gradual increase recorded in Cape Winelands, which increased from 624 to 729 during the same time period. The dramatic increase in Stellenbosch implies that the municipality is at a higher risk of drug usage and trafficking, highlighting the need for stronger enforcement measures, better addiction treatment programmes, and community-focused preventative initiatives.

Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area declined from 131 in 2021/22 to 83 in 2022/23, before rising to 120 in 2023/24. In contrast, Cape Winelands has shown a more consistent decline, from 90 in 2021/22 to 75 in 2023/24.

Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

Stellenbosch's burglary rates have fluctuated dramatically, from 468 in 2021/22 to 287 in 2022/23, before rising again to 476 in 2023/24. Cape Winelands, by comparison, has seen a more gradual decrease from 440 in 2021/22 to 418 in 2023/24.

1.2.8.9 Poverty

GDP Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth.

According to the draft LGSEP 2024, Stellenbosch's GDP per capita consistently exceeds that of the Cape Winelands region, indicating its economic growth. In 2017, it was R108 449, higher than the region's R87 763. By 2023, it reached R135 707, attributed to its strong sectors like education, agriculture, and tourism.

The town's proximity to Cape Town, university status, and growing business hub contribute to its economic growth.

The graph below indicates the GDP per Capita

Graph 10: GDP Per Capita

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen as a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030.

The graph below indicates the Income Inequality.

Graph 11: Income Inequality

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL. In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL, a slight improvement from 2016 and 2019. Stellenbosch and Drakenstein had the highest poverty rates in the Cape Winelands District, with Stellenbosch's 71.4 per cent above the district's 69.4 per cent in 2023. Addressing these socio-economic challenges is essential for ensuring sustainable growth and development within the municipality.

The graph below indicates the Poverty Lines.

Graph 12: Poverty Line

Source: Western Cape, Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

1.2.8.10 Agricultural Economic Overview

Economic and Employment Overview

Agriculture contributes 6% to GDP, and agri-processing another 6% in the Stellenbosch municipal area.

The graph below indicates the Stellenbosch Sectoral Share of GVA – 2023.

Graph 13: Stellenbosch Sectoral Share of Gross Value Added – 2023

Source: Western Cape Government Department of Agriculture: Quantec, 2024

The agricultural value chain employs 16% of the 77 322-labour force in Stellenbosch, as illustrated in the graphs below.

Graph 14: Stellenbosch Sectoral Employment of formal jobs - 2023

Source: Western Cape Government Department of Agriculture: Quantec, 2024

1.2.9 BASIC SERVICE DELIVERY

1.2.9.1 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.

This section considers how this has been achieved by reflecting on the latest available information from Quantec Research for 2022. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2022 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

1.2.9.2 Housing and Household Services

During 2024, in the Stellenbosch municipal area, which comprises 42 186 households, 86.3 per cent had access to formal housing, lower than the Cape Winelands District average of 88.0 per cent. The area also recorded a significantly higher proportion of informal dwellings, totalling 13.5 per cent, in contrast to the district's 11.7 per cent.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (98.5 per cent), flush or chemical toilet access (96.2 per cent), electricity access (including generators) for lighting (96.9 per cent), for lighting at 96.9 per cent and the removal of refuse at least weekly by the local authority at 87.6 per cent of households. These access levels were above the district figures for electricity and refuse removal services.

Figure 6: Service delivery access levels (HH)

Source: Western Cape: Socio-Economic Profile 2024

1.2.9.3 Free Basic Services

The following table indicates the percentage of average registered indigent formal households that have access to free basic municipal services. The total number of indigent households excludes all informal households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R7 000 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Graph 15: Access to Free Basic Services

Source: Western Cape Local Government Draft Social-Economic Profile 2024 (Stellenbosch Municipality)

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2020. The strained economic conditions are anticipated to increase demand for these services, leading to a rise in the number of indigent households. However, this trend is area-specific and contingent on the qualifying criteria applied. These findings underscore the persistent challenges and socio-economic factors influencing housing and essential service access within the Stellenbosch municipal area, emphasising the need for targeted interventions to uphold citizens' constitutional rights and enhance overall living standards.

The table below indicates the number of households receiving free basic services.

Table 5: Access to Free Basic Services

Year	Number of Households							
	Free Basic Water		Free Basic Sanitation		Free Basic Electricity		Free Basic Refuse Removal	
	Access	%	Access	%	Access	%	Access	%
2018/19	6 813	13.01	6 813	13.01	4 833	9.23	6 813	13.01
2019/20	6 666	100%	6 666	100%	4 932	100%	6 666	100%
2020/21	7 283	100%	7 283	100%	5 189	100%	7 283	100%
2021/22	4 681	100%	4 681	100%	4 982	84.25%	4 681	100%

Source: Municipal Indigent Register

1.2.9.4 Key Basic Services Delivery Highlights

It should be noted that the detailed highlights and challenges will be discussed in Chapter 3 under each respective service.

The following key basic service areas were achieved by the municipality:

Table 6: Key Basic Service Delivery Highlights

Basic Services	Project / Programme / Initiative	Description
Water and Wastewater Services	The New Jamestown reservoir was completed and put into operation.	5 Megaliter reservoir completed to supply Jamestown and relieve demand from the Paradyskloof reticulation network.
	Started with the construction of a new 10ML Stellenbosch Reservoir	Enable the Adam Tas Corridor development area, specifically improving services to Kayamandi.
	Started with Wemmershoek Wastewater Treatment Works upgrade.	Increase capacity to 7ML/day. Improve effluent quality to the Berg River. Eliminate noise pollution. Reduction in odour.
Electrical Services	STD TID Reset	Successful completion of the TID process, with no issues on the due date.
	AEG Initiatives	Complete remote monitoring of 66kV switchgear at Jan Marais Substation
		Complete full SCADA implementation at Franschoek Substation
		AEG – EPC of a hybrid inverter and installation of BESS at the Stellenbosch fire station
		AEG – EPC of a hybrid inverter with BESS at Stellenbosch municipality community buildings
Solid Waste	Network upgrade projects	66 kV Circuit Breakers and Control Panels Replacement
	Gas extraction	Commissioning of the landfill gas extraction infrastructure
	Stellenbosch landfill	Commissioned the Stellenbosch landfill after closing in 2019
	Recycling	1 774 tons of waste were recycled in the financial year
	Builder's rubble	18 702 tons of crushed builder's rubble were reused in the construction industry
	Green waste	7 400 tons of green waste were shredded and sent for composting
	Appointments of additional staff	1 x Assistant Superintendent 1 x Refuse compactor Operator/Supervisor (Collections)
	Procurement of additional fleet	1 x crew cab bakkies 1 x 7-seater van 1 x Refuse Compactor
	Skip bins	Additional skips were procured
	Mini Waste drop-offs	3 Mini Waste Drop-off sites were constructed in Kayamandi
	Awareness campaigns	Various community awareness campaigns and "Swop Shops" were held to create awareness on illegal dumping and waste minimisation
Roads, Transport and Stormwater	Roads and Bridges	Denniesig's Streets Undergo Major Transformation to Pedestrian-Friendly Zone
		Construction of Phase 1 of the R44/Road Intersection
		Lanquedoc Access Road and Bridge
		Completion of two culvert bridges over the La Cotte River on Akademie and Dirkie Uys Streets, Franschoek

1.2.9.5 Key Services Challenges

Despite the highlights, challenges were experienced by the municipality, as outlined below; however, actions were put in place to address these challenges:

Table 7: Key Basic Service Challenges

Service Area	Challenge	Actions to address
Water and Wastewater	Staff Shortages	Improve recruitment and selection processes.
Electricity	Staff Shortages	Human Resources is currently busy with recruitment and selection processes for critical posts.
	Illegal and Unsafe Connections.	The department is facilitating an operation with law enforcement to have these removed. Community engagements are held on the dangers of illegal and unsafe connections and continue through IDP sessions as well
	Theft and Vandalism	Community engagements on the safeguarding of the network continue. The municipality has also implemented security measures at various critical plants.
Waste Management	Increase in illegal dumping	7-day continuous cleaning of the illegal dumping.
	Staff Constraints	Effective and efficient recruitment and selection process.

1.2.10 FINANCIAL VIABILITY HIGHLIGHTS

Table 8: Municipal Viability Highlights

Highlight	Description
Long-Term Financial Plan	The municipality has developed a long-term financial planning tool that can be updated regularly for strategic planning.
Current Ratio	The municipality maintained a very good current ratio of 2.2:1. This compares well with the norm of 1.5 to 2:1.
Collection Rate	The municipality maintained a good collection rate for service debtors of 97%, which is above the norm of 95%. This indicates that the municipality's creditor control and debt collection processes are in place, and the revenue is managed effectively.
Finance Charges	Finance charges represent 2.92% of the total operational expenditure. This compares favourably with the norm of 6% to 8%.
Liability Management	Capital costs (interest paid and redemption) represent 5.08% of total operating expenditure. This compares favourably with the norm of 6% to 8%. This indicates that the municipality can take on additional financing from borrowing to invest in infrastructure projects.
mSCOA Specimen Financial Statements	The municipality implemented the National Treasury mSCOA specimen annual financial statements preparation template, where the financial statements are compiled utilising the data strings extracted from the financial system.
Debt Management	The municipality's total debt represents 20.71% of the total operational expenditure. This compares favourably with the norm of 45% and is an indication that the municipality can take on additional financing from borrowings.

1.2.11 FINANCIAL VIABILITY CHALLENGES

Table 9: Financial Viability Challenges

Challenge	Description
Financial Viability	The traceability of all debtors poses a challenge to the debt collection process. Low economic growth, an increase in unemployment, and above-inflation increases in the cost of water and electricity impact the affordability of municipal accounts.
Revenue Leakage	An integrated revenue enhancement approach was followed to combat revenue leakages.

1.2.12 FINANCIAL OVERVIEW

Table 10: Financial Viability and Management Financial Overview (000')

Details	Original budget	Adjustment Budget	Actual
	R'000		
Income			
Grants (Operating and Capital)	344 761	379 648	365 052
Taxes, Levies and Tariffs	1 959 197	2 004 197	1 995 835
Other	327 318	337 318	393 038
Sub-Total	2 631 276	2 721 163	2 753 925
Less Expenditure	2 511 734	2 522 843	2 498 384
Net surplus / (deficit)	119 542	198 320	254 541

1.2.13 OPERATING RATIOS

Table 11: Operating Ratios

Detail	Expected norm	Actual	Variance
Employee Cost	35%-40%	25.79%	(9.21%-14.21%)
Repairs and Maintenance	8%	2.88%	5.12%
Finance Charges	15%	2.92%	12.08%

Employee cost is below the national norm of between 35% to 40%, representing a positive outcome. Repairs and maintenance are below the norm, which indicates that expenditure on repairs and maintenance would have to be increased in future budgets to properly maintain the Council's assets. Finance charges are 12.08% lower than the norm of 15%. This can be attributed mainly to the municipality's ability to fund its capital programmes to some extent from its resources (CRR) and not from external finance.

1.2.14 TOTAL CAPITAL EXPENDITURE

Table 12: Total Capital Expenditure (000')

Detail	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
	R'000							
Original Budget	418 057	528 041	558 276	375 751	406 054	409 273	504 800	599 345
Adjustment Budget	499 855	563 550	577 905	453 880	403 508	378 709	491 726	524 513
Actual	433 682	493 303	405 931	392 941	347 610	321 506	427 158	473 053

1.2.15 MUNICIPAL STANDARD CHART OF ACCOUNTS

MFMA Circular No. 80: Municipal Financial Systems and Processes requirements in support of the Municipal Standard Chart of Accounts (mSCOA) issued in terms of the Local Government: Municipal Finance Management, 2003 (Act No. 56 of 2003) (MFMA). In the MFMA SCOA Circular 1, it was indicated that mSCOA is a business reform rather than a mere financial reform and requires a multi-dimensional relationship.

The mSCOA was implemented in Stellenbosch Municipality on 01 July 2017. The municipality is in continuous engagement with the service provider, National Treasury, and other municipalities through various working groups as well as online platforms to improve mSCOA compliance and functionality.

1.2.16 ORGANISATIONAL DEVELOPMENT OVERVIEW

Stellenbosch Municipality views the Human Resources Management component as the governance of the organisation's employees. More commonly, human resources per se refers to the people or human capital appointed or employed by the organisation whose skills are used to reduce risk and maximise return on investment.

The highlights for the Department: Human Resources Management in 2024/25 are the following:

- ✚ **353** employees were trained (22 different training programmes);
- ✚ **5** employees successfully completed the Basic Traffic Officers training;
- ✚ **9** employees are attending the Municipal Minimum Competency training;
- ✚ **10** new students were placed in various directorates to gain practical work experience and obtain their qualifications;
- ✚ **39** internal bursaries were awarded in the amount of **R556 851**;
- ✚ **6** external bursaries (Provincial Treasury) were awarded in the amount of **R150 000**;
- ✚ An amount of **R4 697 155** was spent on seminars, conferences, and workshops (Training) for the whole organisation;
- ✚ The total amount that was spent on all training and development activities for the whole municipality was **R5 952 444**, which is **0.88%** of the payroll budget spent;
- ✚ 101 vacancies filled during the 2024/25 financial year;
- ✚ R50 million awarded for the filling of vacancies;
- ✚ R50 million allocated for the filling of vacancies; and
- ✚ 143 vacancies were advertised during May 2025.

The challenges for the Department: Human Resources Management in 2024/25 are the following:

- ✚ Shortage of conducive training venues that can accommodate 10 or more learners.

1.2.17 MFMA COMPETENCIES

In terms of Section 83(1) of the MFMA, the accounting officer, senior managers, chief financial officer, non-financial managers, and other financial officials of a municipality must meet the prescribed financial management competency levels that are key to the successful implementation of the MFMA. The National Treasury prescribed such financial management competencies in Government Notice 493, dated 15 June 2007.

To help the above officials get the required financial skills, the National Treasury created an outcome-based NQF Level 6 qualification in municipal finance management with the help of many stakeholders and key players in local government.

In terms of Government Notice 493 of 15 June 2007, "(1) No municipality or municipal entity may, with effect as of 1 January 2013 (exempted until 30 September 2015 as per Government Notice 179 of 14 March 2014), employ a person as a financial official if that person does not meet the competency levels prescribed for the relevant position in terms of these Regulations."

The table below provides details of the financial competency development progress as required by the regulation (Government Notice 493 of 15 June 2007):

Table 13: Financial Competency Development: Progress Report

Description	A Total number of officials employed by municipality (Regulation 14(4)(a) and (c))	B Total number of officials employed by municipal entities (Regulation 14(4)(a) and (c))	Consolidated: Total of A and B	Consolidated: Competency assessments completed (Regulation 14(4)(b) and (d))	Consolidated: Total number of officials whose performance agreements comply with Regulation 16 (Regulation 14(4)(f))	Consolidated: Total number of officials that meet prescribed competency levels (Regulation 14(4)(e))
Financial Officials						
Accounting Officer	1	0	1	1	1	1
Chief Financial Officer	1	0	1	1	1	1
Senior Managers	4	0	4	4	4	4
Any other financial officials	2	0	2	2	2	2
Supply Chain Management Officials						
Heads of supply chain management units	1	0	1	1	1	1
Supply chain management senior managers	1	0	1	1	1	1

1.2.18 AUDITOR GENERAL OF SOUTH AFRICA'S REPORT

The Auditor-General of South Africa (AGSA) has a constitutional mandate and, as the Supreme Audit Institution (SAI) of South Africa, exists to strengthen the country's democracy by enabling oversight, accountability, and governance in the public sector through auditing, thereby building public confidence. In short, the AGSA checks the spending of public money by looking at whether it has been used for the purposes intended. This process is concluded by annually checking all government spending.

CHAPTER 2: GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Good governance is an approach to government that is committed to creating a system founded on strengthening democracy, promoting transparency, building public administrative capacity, responding to public needs, and respecting human rights. It is measured by eight factors: **participation, rule of law, transparency, responsiveness, consensus-oriented accountability, effectiveness and efficiency, equitability, and inclusivity**. Within the context of good governance, corruption is minimised, the views of minorities are considered, and the voices of the most vulnerable in society are heard in decision-making. It is also responsive to the present and future needs of society.

NATIONAL KEY PERFORMANCE INDICATORS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and Performance Management Regulations 796 of 2001 and Section 43 of the MSA. This key performance indicator is linked to the National Key Performance Area: Good Governance and Public Participation.

Table 14: National KPI - Good Governance and Public Participation

KPA and Indicators	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan.	87.5%	70.25%	86.57%	84.29%	84.79%	85.88%	89.29%

2.1 COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE

2.1.1 POLITICAL GOVERNANCE STRUCTURE

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows from the previous Council and the newly elected Council:

2.1.2 COUNCIL – 01 JULY 2024 TO 30 JUNE 2025

Below is a table that categorises the councillors within their specific political parties and wards.

Table 15: Council from 01 July 2024 – 30 June 2025

No.	Name of Councillor	Capacity	Political Party	Ward Councillor and Proportional (PR)
N/A	G van Deventer (Cllr Adv) <i>Resigned as PR Councillor and Executive Mayor by the end of November 2024.</i>	N/A	DA	PR

N/A	I De Taillefer (Cllr), resigned as PR Councillor on 15/04/2025	Part-Time	VF Plus	PR
N/A	JC Macfarlane (Cllr) has declared a PR Councillor - Replacing PR Cllr I De Taillefer on 12/05/2025 after her resignation as PR Councillor	Part-Time	VF Plus	PR

The table below indicates the Council meetings attendance for the 2024/25 financial year.

Table 16: Council meetings held for the 2024/25 financial year

Meeting dates	Number of items (resolutions) submitted	Percentage of Attendance of Council Meetings	Percentage Apologies for non-Attendance
2024-07-30	26	79.5%	2.2%
2024-08-14	3	86.3%	2.2%
2024-08-23	10	86.3%	1.3%
2024-09-12	1	88.6%	0.9%
2024-10-30	51	91.1%	0.9%
2024-11-27	26	95.5%	1.4%
2024-11-29	2	38/45	6.7%
2025-01-29	9	91.1%	9%
2025-02-26	19	88.6%	11.3%
2025-03-04	1	88.6%	12.7%
2025-03-31	22	86.3%	11.3%
2025-04-30	11	86%	11.6%
2025-05-30	18	77.7%	22.2%
2025-06-23	3	88.8%	8.9%
2025-06-25	16	80%	20%

2.1.3 EXECUTIVE MAYORAL COMMITTEE

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the Executive Mayor to oversee the day-to-day affairs of the municipality. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the executive mayor, in addition, delegated powers are assigned by the Council.

Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

The Executive Mayoral Committee positions were occupied as follows:

Table 17: Executive Mayoral Committee

Executive Mayoral Committee 01 July 2023 – 30 June 2024		
No.	Name of Councillor	Portfolio
1.	Alderwoman Cllr G van Deventer (Resigned 29 November 2024)	Vacant
2.	Cllr J Fasser (Effective from 29 November 2024)	Executive Mayor
3.	Cllr M Slabbert	Deputy Executive Mayor, including Planning, Local Economic Development and Tourism
4.	Cllr R Pheiffer	MayCo member: Infrastructure Services
5.	Cllr N Olayi	Acting MayCo member: Community Services
6.	Cllr J Williams	MayCo member: Protection Services
7.	Cllr L Nkamisa	MayCo member: Corporate Services
8.	Cllr JC Anthony	MayCo member: Finance
9.	Cllr N Olayi	MayCo member: Parks and Open Spaces
10.	Cllr R du Toit	MayCo member: Human Settlements

The table below indicates the dates of the Executive Mayoral Committee meetings and the number of reports submitted to the Council for the 2024/25 financial year.

Table 18: Executive Mayoral Committee Meetings held for the 2024/25 financial year

Meeting dates	Number of items submitted
24 July 2024	21
14 August 2024	7
26 September 2024	7
16 October 2024	15
21 November 2024	25
22 January 2025	14
19 February 2025	15
24 March 2025	18
17 April 2025	28
22 May 2025	16

2.1.4 PORTFOLIO COMMITTEES

In terms of Section 80 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), if a council has an executive committee, it may, in terms of Section 79, appoint committees of councillors to assist the executive committee or executive mayor. Section 80 stipulates that committees are permanent committees that specialise in a specific functional area of the municipality and, in some instances, may make decisions on specific functional issues. They advise the executive committee on policy matters and make recommendations to the council.

2.1.4.1 Portfolio Committee: Planning, LED, and Tourism

2.1.6 STRATEGIC GOVERNANCE STRUCTURE

The Municipal Manager is the Accounting Officer of the municipality and the head of the administration, and primarily serves as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 7: Municipal Management Team

Figure 8: Macro Structure

2.2 COMPONENT B: PUBLIC ACCOUNTABILITY

MSA Section 15(b) requires a municipality to establish and organise its administration to facilitate a culture of accountability amongst its staff. Section 16(i) states that a municipality must develop a system of municipal governance that complements formal representative governance with a system of participatory governance. Section 18(i)(d) requires a municipality to supply its community with information concerning municipal governance, management, and development.

2.2.1 INTERGOVERNMENTAL RELATIONS

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective intergovernmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of all spheres of government in the setting of priorities, resource allocation, and development planning. The municipality engages in numerous partnerships to facilitate service delivery.

Table 31: IGR Structures

Name of Partner	Purpose
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote an implementation platform to share knowledge of disaster risk reduction initiatives, community safety programmes, and campaigns to promote safe, resilient, sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation, and education.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues, as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the university's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television is in the interest of the security of the town and the campus, with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay-at-the-night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, waste and electricity generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.

Name of Partner	Purpose
Infrastructure Innovation Committee (IIC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and the university.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
LTAB (Land Transport Advisory Board)	A partnership was formed among political leaders to discuss land transport-related matters affecting transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all non-motorised transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the university and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officers' Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learner's license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues, as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternative electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing social housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the university, whereby students provide: <ul style="list-style-type: none"> 👉 relief aid (clothing, food); 👉 placement of students to assist during incidents / disasters; and 👉 awareness programmes.

Name of Partner	Purpose
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads, and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

2.2.2 WARD COMMITTEES

Stellenbosch Municipality has a Ward Committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of the Republic of South Africa, 1996, that a ward committee is independent of the Council and not politically aligned. The figure below depicts the main duties of the ward committees.

Participation remains a key pillar of good governance and constitutes an integral component in the policymaking process, development planning, and budgeting. Section 152 of the Constitution places the participation of communities at the centre of service delivery and other matters of local government. Correspondingly, the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) and the MSA provide the legislative framework for the establishment of ward committees by municipalities.

Section 42 of the MSA stipulates that a municipality, through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of said Act, must involve the local community in the development, implementation, and review of the municipality's performance management system and allow the community to participate in the setting of appropriate key performance indicators and performance targets for the municipality.

A general understanding has emerged that a ward committee is an area-based committee whose boundaries coincide with ward boundaries.

Ward committees ought to be elected by the constituents of the ward. The maximum number of members for a ward committee is ten, and women ought to be adequately represented. The ward councillor is a member and functions as the chairman of the ward committee. While lacking formal authority, ward committees guide the ward councillor, who subsequently presents detailed

recommendations to the council. The establishment and yearly revision of the IDP for the region are tasks that these committees perform with vital importance.

Ward committees are a legislative requirement and are established in terms of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998); the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA); and the 2005 DPLG Guidelines. This policy was adopted by the Council during the inauguration meeting of 2021.

The main objective of a ward committee is to enhance participatory democracy in local government.

A ward committee:

- ✚ is an advisory body;
- ✚ is a representative structure of the ward;
- ✚ is an independent committee of the community in a ward;
- ✚ is impartial and performs its functions without fear, favour, or prejudice;
- ✚ is not politically orientated;
- ✚ as a representative structure of the community, is accountable to the community; and
- ✚ is an integrative umbrella body responsible for the coordination of ward developmental initiatives and the promotion of accountability and social cohesion.

The minutes of meetings are compiled by the ward administrator, and the primary quality check of meeting minutes is the responsibility of the ward councillor. S/he must sign off that the meeting minutes are correct. The minutes of the meeting are submitted monthly and form part of the monthly report of the ward administrator to the Office of the Speaker through the Executive Support Officer.

The ward committee supports the ward councillor, who receives reports on development, participates in development planning processes, and facilitates wider community participation. The municipality constantly strives to ensure that all ward committees function optimally in terms of the provision of community information, convening meetings, ward planning, service delivery, IDP input, and performance feedback to communities.

Stellenbosch Municipality successfully established 23 functional ward committees, and all wards have access to a ward administrator. During the review period of this annual report, the following changes of ward councillors must be reported:

- ✚ Cllr JS Fasser was elected ward 17 ward councillor on 28 August 2024, following the resignation of Peter Johnson on 6 June 2024;
- ✚ Cllr T Kumm was elected ward 8 ward councillor on 23 October 2024, following the resignation of Carli van Wyk on 20 August 2024; and
- ✚ Cllr I de Taillefer was elected ward 9 ward councillor on 14 May 2025, following the resignation of Zelda Dalling on 19 February 2025.

The ward committee policy was reviewed during the 2024/25 draft budget cycle and circulated to all ward committees for consideration and input. This is to ensure the ward committee policy is in line with the 2021 amendments to the Local Government: Municipal Structures Act, 2021 (Act No. 3 of 2021). The policy was adopted by the Council at the May 2025 Council meeting when the Council approved the budget.

The amendments to the ward committee policy include the election procedures of ward committees, which are clearly stipulated in the ward committee policy, as well as updates on the role of the Speaker in relation to the functioning of ward committees. In addition, the policy was reviewed in terms of an increase in the stipend amount for the ward committee members to R750 per meeting for

the 2025/26 financial year, which would include the sector meetings held, and to the maximum stipend amount of R2 250 per ward committee member per quarter. The quarterly payment process is also included in the ward committee policy, as ward committee members are paid every quarter. One of the other challenges from ward committees is the lack of understanding of the entire payment process, and the department is often confronted by ward committee members demanding immediate payment. All ward committee payments were verified and submitted for payment within 14 days of receiving the details for payment from the ward administrators for all 4 quarters of the financial year under review.

The filling of vacancies remains a problem for ward committees. Vacancies occur for a variety of reasons, and ward councillors sometimes find it difficult to fill the vacancies on ward committees. The ward committee policy allows for the option of co-opting ward committee members. Vacancies must be filled within 60 days of the vacancy being declared, and all vacancies on ward committees for the review period were filled. The co-opting of ward committee members is addressed in the ward committee table below.

All 23 ward committees submitted ward committee operational plans for the 2024/25 financial year. A ward committee operational plan is a ward-based plan outlining how the ward committee will function, identify community needs, represent residents, monitor municipal projects and facilitate participation in the IDP (Integrated Development Plan) and budget processes within the municipality. The plan also includes meeting schedules. The plans were all approved by the Municipal Manager and Speaker. After approval, the ward committee's operational plans were submitted to the Provincial Department of Local Government: Public Participation.

All ward projects identified by ward committees and listed in the ward committee operational plan for the respective ward were completed for 2024/25. These are projects funded by the R120 000 operational ward allocation for 2024/25.

A report on the functioning of ward committees within the municipality is compiled quarterly and reported to Council by the Speaker and submitted to the Provincial Department of Local Government: Public Participation. The report contains information on whether all scheduled ward committees took place during the quarter under review, if any public meetings / community report back meetings were held and how ward councillors communicate with respective sectors / blocks within the ward. This quarterly report also indicates if any vacancies exist on ward committees. All quarterly reports for the year under review were reported to Council and submitted to the Provincial Department of Local Government: Public Participation.

The tables below specify the ward committees from 1 July 2024 until 30 June 2025:

Ward 1: Mooiwater, Franschhoek Town and Surrounding Farms

Public meetings must offer a platform / opportunity for increased community involvement, transparency and accountability. It should also facilitate the sharing of ideas, promote diverse discussions on topics, and foster trust between officials and residents. These are forums where the community can add their voice to concerns. It also offers the opportunity for identifying risks. The traditional role of the public meeting is to serve as a platform to provide feedback to ward residents

on various issues identified, as well as inform them of decisions made by the Council / developments that may affect the ward.

Not all issues raised at public meetings are within the mandate of the municipality, and therefore, these matters are reported to the relevant department / sector outside the municipality. Public meetings also offer the opportunity to be very specific (issue-based).

One of the major disadvantages of public meetings is political grandstanding and people using the platform for their own issue-driven agendas, as well as low public attendance at some meetings. Public meetings in their current format are also not very user-friendly for wards with very large geographical areas.

Many of the problems / concerns raised at public meetings can be captured on the various reporting platforms of the municipality by the ward administrator of the ward. The public is also encouraged to use these various platforms to log complaints and track progress accordingly.

2.3 COMPONENT C: CORPORATE GOVERNANCE

Corporate governance is a set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, or controlled. Corporate governance also includes the relationships among the many stakeholders involved and the goals for which the institution is governed.

2.3.1 RISK MANAGEMENT

Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) states that the accounting officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient, and transparent systems of financial and risk management and internal control, as well as the effective, efficient, and economical use of the resources of the municipality.

This responsibility was delegated to the Chief Risk Officer. During the year under review, the following was done:

- ✦ Continuous awareness-raising throughout the municipality.
- ✦ The Chief Audit Executive has a seat on the Ethics, Risk and Fraud Management Committee, where all risk and fraud management-related activities are reported.
- ✦ The Ethics, Risk and Fraud Management Committee reports to the APAC;
- ✦ The risk registers have also been completed at an operational level.
- ✦ The previous year's strategic registers were revisited, and an acceptable risk appetite was determined.
- ✦ The revised risk register was adopted by the Council; and
- ✦ The risks were also identified that could prevent the achievement of the predetermined objectives and were noted in the SDBIP.

Although the Chief Risk Officer is responsible for coordinating and facilitating risk management at all levels within the municipality, the municipal manager and management are the drivers of risk management and the mitigation of risk exposure in the municipality.

As the new financial year started, conversations and assessments turned to the impact of geopolitical instability in Europe and the Middle East. Conversations were started with regard to the impact of artificial intelligence (AI) and cybersecurity, and to mitigate it. Climate change and the impact thereof on service delivery were scored higher regarding the impact and likelihood rating, keeping in mind the effect of higher rainfall in the past two winters. Although the availability and cost of electricity remain higher, measures have been put in place to mitigate the risk. The impact of these will be monitored throughout to continue interventions as necessary.

All the risks, as identified as part of the bi-annual risk assessments with the Directorates, are captured on the Barn Owl system, an electronic risk management system, to ensure more accuracy and detail with ratings, reporting, and assessments to assist in providing information and reports to management. This is to assist and better inform managers when using risk management in the decision-making process.

The top **5 strategic** risks identified include:

Figure 9: The top 5 strategic risks identified include

R	1	Availability and cost of electricity
I	2	Increased risk of land invasion
S	3	Increase in climate change and Infrastructure disasters
K	4	Economic downturn due to civil unrest, crime and the impact of loadshedding
S	5	Minimising the potential risks, negative effects and consequences of artificial intelligence (AI) on society

2.3.1.1 Likelihood rating scale

Table 56: Risk likelihood rating scale

Impact and Likelihood Rating		
Likelihood Grading		
10	Certain	91% - 100% chance of occurring
9	Almost Certain	81% - 90% chance of occurring
8	Expected	71% - 80% chance of occurring
7	Probable	61% - 70% chance of occurring
6	Possible	51% - 60% chance of occurring
5	Potential	41% - 50% chance of occurring
4	Occasional	31% - 40% chance of occurring
3	Remote	21% - 30% chance of occurring
2	Improbable	11% - 20% chance of occurring
1	Rare	0% - 10% chance of occurring
Impact Grading		
10	Catastrophic	A critical event resulting in the long-term cessation of the majority or all core organisational activities. Inability to achieve the municipality's strategy and objectives. Requires external support.
9	Critical	A critical event resulting in the long-term cessation of several core organisational activities. Drastically reduced ability to achieve the municipality's strategy and inability to achieve most of the objectives. Requires intervention from the Council.
8	Major	A major event resulting in the long-term cessation of a core organisational activity. Severely reduced ability to achieve the municipality's strategy and inability to achieve certain objectives. The material at the organisational level. Requires intervention from the municipal manager and the Audit and Performance Audit Committee (APAC) involvement.
7	Significant	Significant long-term disruption of services. Significantly reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Director.
6	Moderate	Short / medium-term disruption of services.

Impact and Likelihood Rating		
Likelihood Grading		
		Reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Head of the Department.
5	Marginal	Disruption of normal operations / services. Limited effect on the achievement of the municipality's strategy and objectives. Requires intervention from the line manager.
4	Immaterial	Irritation in rendering or receiving services. No material impact on the achievement of the municipality's strategy and objectives. Can be dealt with by senior staff.
3	Minor	The impact will be coped with in the short term through normal operational processes performed by staff.
2	Insignificant	The impact of adverse events is minimal.
1	Negligible	The impact of the adverse event has little (if any) impact on services.

The rating determines the risk exposure. Through this, management gets to understand the extent to which potential events might impact their objectives on a scale from 1 as a minimum and 100 as a maximum.

2.3.1.2 Inherent risk exposure

Table 57: Inherent risk exposure grid

Inherent Risk Exposure: The inherent risk exposure is determined by comparing the inherent risk rating against the risk appetite		
Inherent Risk Exposure		
Inherent Risk	Magnitude	Definition
0 – 25	Low Risk	The level of inherent risk is within the risk appetite – a low level of control intervention is required, if any.
26 – 50	Moderate Risk	Unacceptable level of risk – A moderate level of control intervention is required to achieve an acceptable level of residual risk.
51 – 75	High Risk	Unacceptable level of risk – A high level of control intervention is required to achieve an acceptable level of residual risk.
76 – 100	Extreme Risk	The extreme level of risk – immediate level of control. Intervention is required to achieve an acceptable level of residual risk.

2.3.2 STRATEGIC RISKS IDENTIFIED

Table 58: Risk register

Strategic Risks							
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Inherent Risk Exposure/Risk Appetite (1-100)	Directorate
1	Availability and cost of electricity	Continuous and persistent loadshedding; sustainability of the national power supplier	Green and Sustainable Valley, Dignified Living	9	9	81	Directorate: Infrastructure Services
2	Increased risk of land invasion	Legal precedents set under a disaster management declaration limiting municipal scope to evict. Illegal invasions and land grabs.	Green and Sustainable Valley, Dignified Living	9	10	90	Directorate: Community and Protection Services

Strategic Risks							
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Inherent Risk Exposure/Risk Appetite (1-100)	Directorate
		Compromising housing development and housing opportunities					
3	Climate Change and Infrastructure Disasters	Changing weather patterns, unpredictable rainfall, flash floods, droughts, natural disasters, and fires (seasonal and other).	Green and Sustainable Valley; Safe Valley	10	8	80	Office of the Municipal Manager Director Infrastructure Services
4	Economic downturn due to civil unrest, crime and the impact of loadshedding.	Increase in criminal activities, civil unrest, and reputational risk due to a perceived increase in the said activities.	Good Governance and Compliance	9	8	72	Directorate: Corporate Services Office of the Municipal Manager
5	Minimising the potential risks, negative effects and consequences of Artificial Intelligence on society.	Consumer Privacy (privacy violations and data security concerns. *Biased programming. *Unclear legal regulation. *Existential Risks. *Intellectual property infringement. *Exponential algorithmic biases. *Job losses/potential to replace human workers. Malicious use. *Dependency.	Good Governance and Compliance	8	8	64	Directorate Corporate Services

Operational Risks							
1	Timeous Capital Spending	A steady increase in budget allocation, a growing population and demand for services, and demand management.	Good Governance and Compliance	10	8	80	Directorate: Financial Services
2	Insufficient burial space in the greater Stellenbosch	"Planning and funding; land availability. Insufficient funding.	Dignified Living	8	8	64	Directorate: Community and Protection Services
3	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery needs to be provided by all departments.	Good Governance and Compliance	8	4	32	Director Corporate Services
4	Lack of integrated Information and Communication Technology	Disparate systems	Good Governance and Compliance	6	4	24	Directorate: Corporate Services
5	Loss of credibility and reputation due to perceived fraud and corruption.	Abuse of legislation; reputational risk and credibility; media statements and the role of social media in reports, etc.	Good Governance and Compliance	6	4	24	Office of the Municipal Manager

Management and the Council have taken ownership of combating fraud and corruption throughout the municipality.

The Anti-Fraud and Corruption Prevention Plan intend to strengthen fraud and corruption prevention at all levels within the municipality and reinvest in managing fraud and corruption at all levels.

The fraud hotline, or tip-offline, is also fully functional and managed by an independent service provider. A toll-free number and e-mail service are available to members of the public to report any suspected fraudulent or corrupt activities.

2.3.3 FUNCTIONS OF THE AUDIT AND PERFORMANCE AUDIT COMMITTEE (APAC)

The Municipal Audit and Performance Audit Committee's objectives and functions are based on Section 166(2)(a-e) of the MFMA, further supplemented by the Local Government: Municipal Planning and Performance Management Regulation, as well as the approved Audit and Performance Audit Committee Charter approved on 30 July 2024 by the Council.

The objectives of the APAC of the Stellenbosch Municipality are to:

- Assist the Council in discharging its duties relating to the safeguarding of the Council's assets;
- Develop and oversee the operation of an adequate internal process and control system;

- Oversee the preparation of accurate financial reporting and statements in compliance with all applicable legal requirements, corporate governance, and accounting standards;
- Provide support to the Council on the risk profile and risk management of the Council; and
- Ensure that there is an internal audit function in place and that the roles of the internal and external audit functions are coordinated.

The APAC is responsible for the oversight of internal controls, financial reporting, and compliance with regulatory matters and mainly makes recommendations to management.

The responsibilities of the APAC are further to review the:

- Effectiveness of the Council's system of internal control and risk management;
- Financial reporting and financial statements;
- Internal audit function;
- AGSA's report;
- Council's compliance with legislation and regulation;
- Compliance with the Council's Code of Conduct and Ethics; and
- Performance Management System to make recommendations in this regard to the Council.

2.3.3.1 Membership and Attendance

The APAC is composed of four (4) independent members not in the employ of the municipality. The Committee met four times during the 2024/25 financial year.

The list of committee members, their qualifications and a record of their attendance at meetings is as follows:

Table 59: Members of the Audit and Performance Audit Committee, Qualifications and Record of Attendance of Meetings

Name of representative	Qualifications	Capacity	Date Appointed	Number of Meetings Attended
Mr LC Nene	<ul style="list-style-type: none"> • Masters of International Business • B Com Accounting • Post Graduate Diploma in Management (Corp Gov) • Certification in Control Self-Assessment IIA SA • General Internal Auditor – GIA (SA) IIA SA • Certification in Risk Management Assurance IIA SA 	Chairperson	01 June 2022	4
Dr L Mortimer	<ul style="list-style-type: none"> • National Diploma in Public Health • Diploma in Local Government Administration • Diploma in Personnel Management • Post Graduate Diploma in Business Management • MBA • Doctorate in Administration 	Member	01 May 2024	4
Ms R Gani	<ul style="list-style-type: none"> • Bachelor of Commerce (BComm Accounting Science) • Bachelor of Commerce (Hon Accounting Science) • CA (SA) 	Member	27 September 2023	4
Ms R Strydom	<ul style="list-style-type: none"> • Bachelor of Commerce (BCom Management Accounting) • Bachelor of Commerce (Hon Financial Accounting) 	Member	27 September 2023	1*

Name of representative	Qualifications	Capacity	Date Appointed	Number of Meetings Attended
Mr M Burton	<ul style="list-style-type: none"> Financing and Valuing Commercial Property (60 hours – 93% Average for completed assignments) CA (SA) Honours Bachelor of Accounting Science Bachelor of Accounting Science 	Member	01 March 2025	2

*Ms R Strydom resigned on 28 November 2024; thus, she only attended one meeting.

** Mr M Burton was appointed on 01 March 2025; thus, he attended two meetings.

2.3.3.2 The Audit and Performance Audit Committee's Responsibilities

The APAC advises the Council, political office-bearers, the Accounting Officer, and management of the municipality on matters concerning duties as described in the APAC Charter.

The APAC is also accountable for identifying major risks to which the Council is exposed and determining the extent to which those risks have been mitigated.

The APAC is satisfied that it has discharged its oversight responsibilities in respect of:

Internal Controls

- ✚ Safeguarding assets, operating adequate systems, controlling and reporting processes, and preparing accurate reports and financial statements in compliance with the applicable legal requirements and accounting standards.
- ✚ Overseeing the activities and ensuring coordination between the activities of internal and external audits.
- ✚ Providing a forum for identifying and reviewing enterprise-wide risks relating to financial, performance and regulatory exposures, and monitoring controls designed to minimise these risks.
- ✚ Reviewing the Stellenbosch Municipality's quarterly financial and performance information, Annual Report (AR), including the Annual Performance Information Report (APR) and Annual Financial Statements (AFS), and any other public reports or announcements containing financial and non-financial information.
- ✚ Reviewing the year-end financial statements and performance reports.
- ✚ Reviewing the Committee's work and Charter annually and making recommendations to the Council to ensure the Committee's effectiveness.

Risk Management

- ✚ Management is responsible for the establishment and maintenance of an effective system of governance, risk management, and prevention and detection of fraud and internal controls.
- ✚ Risk assessment updates were performed during the 2024/25 financial year, and all relevant risks were populated into an updated Risk Register for the municipality. Updates to the Stellenbosch Municipality's risk profile were captured during 2024/25 in consultation with the Ethics, Risk and Fraud Management Committee.
- ✚ The Internal Audit Function (IAF) was guided by the consolidated risk profile, critical audit areas and management's inputs in the formulation of its three-year rolling strategic and annual internal audit plans.

- ✦ The municipality has an Ethics, Risk and Fraud Committee, which is chaired by the municipal manager, as the Chief Risk Officer (CRO), who reports risk management activities directly to the APAC. The Committee was fully functional throughout the financial year. The Committee, constituted by all the Directors, considered the quarterly risk management reports before tabling them in the APAC meetings. The municipality has a CRO to coordinate the risk management function. The APAC members also attended some of the Ethics, Risk and Fraud Committee meetings for observation.
- ✦ Quarterly risk registers are updated and reviewed at each ethics, risk and fraud committee and updated with emerging risks. It ensures that all the major risks, including the emerging risks facing the municipality, are effectively managed.

Internal Auditing Function (IAF)

Stellenbosch Municipality's IAF is performed by in-house staff in line with Section 165 of the MFMA. The main focus areas were compliance with applicable laws, regulations, policies, and procedures, which resulted in both assurances and advisory work. During the year under review, the IAF was able to effectively execute 100% of the revised risk-based Internal Audit Plan approved by APAC.

In addition, process flowcharts for all identified audit areas have been documented, highlighting the key controls and / or control gaps for process owners / line managers to consider and implement. Follow-up reviews were conducted relating to previously reported matters during the previous financial year.

The Risk-Based Audit Plan 2024/25, approved by APAC, was implemented with the available resources. The table below provides details on audits completed.

Table 60: Annual Risk-Based Audit Plan

Audit Activity	Status
DoRA Compliance	Combined Assurance – AGSA
Statutory audits	
Pre-determined Objectives	
2023/24: Quarter 4	Final Report
2024/25: Quarter 1	Final Report
2024/25: Quarter 2	Final Report
2024/25: Quarter 3	Final Report
Risk-based audits	
Office of the Municipal Manager: Pre-review of Municipal Manager and Directors' performance evaluations (2023/24: annual assessments)	Finalised: Results submitted to Municipal Manager
Financial Services: Year-end Inventory review – stores (direct assistance for the AGSA)	Finalised
Corporate Services: Information and Communication Technology	Combined Assurance - AGSA
Corporate Services: Staff Regulations	Final Report
Community and Protection Services: Traffic Services and Administration	Final Report
Other scheduled audits	
Internal Quality Assurance Improvement Plan	Report submitted: June 2025
AG audit action plan (2023/24)	Q1: April 2025 Q2: June 2025 Q3: August 2025
AG: Asset Verification (direct assistance for the AGSA)	Finalised
AG: Employee Verification (direct assistance for the AGSA)	Finalised
Governance Review (Global Internal Audit Standards alignment and implementation plan)	Finalised – IA strategy outstanding

Audit Activity	Status
Risk Management	Final Report
Follow-up audits: Disaster and Climate Change Readiness Assessment Planning and Economic Development: Housing Administration	Final report: June 2025
Ad hoc requests	
Ad hoc review(s) / Management requests / Consulting Activities	No requests

The Committee reviewed all the IAF reports and is satisfied:

- ✚ With the activities of the IAF, including its annual work programme and the reports and responses of management to specific recommendations;
- ✚ IAF has conducted its work in accordance with the Global Internal Audit Standards set by the Institute of Internal Auditors (IIA);
- ✚ The Committee conducted the annual performance assessment on the effectiveness of the IAF and is generally satisfied with the performance and effectiveness of the IAF;
- ✚ The Committee is concerned about the internal control weaknesses as identified by the IAF and expects management to address all those weaknesses identified; and
- ✚ The Committee considered and noted that the municipality operated without the permanent CAE for a period of six (6) months. However, acknowledges and appreciates management for subsequently filling the position.

The Committee is, therefore, of the opinion that the IAF is independent and provides objective assurance and advisory activities that are designed to add value and improve the municipality's operations.

Adequacy, Reliability, and Accuracy of the Financial and Performance Information

The Committee believes, based on the information and explanations provided by management, as well as the results of audits performed by IAF, that the financial and performance information provided by management to users of such information is adequate, reliable and accurate. However, there is room for improvement based on the number of internal control deficiencies noted in the Internal Audit reports.

Quarterly audits of predetermined objectives were performed and reported to the APAC.

External Audit

The Office of the Auditor General South Africa (AGSA) met four times with the Committee during the financial year. The Committee confirms that they are satisfied that there are no unresolved issues of concern.

The Effectiveness of Internal Controls

The Committee considered all the reports issued by internal and external auditors. The status of management's actions to address prior control weaknesses was:

Table 61: Status on the effectiveness of Internal Controls

Assurance Provider	Total Findings	Addressed Findings	Partially Addressed Findings	Not Resolved
Internal Audit Function	21	11	-	10
AGSA	8	7	1	-
Total #	29	18	1	10
Total %	100%	62%	3	35%

The table below indicates the recommendations for the year under review:

Table 62: APAC recommendations for the 2024/25 financial year

Date of Committee	Committee recommendations	Recommendations adopted (enter Yes) If not adopted (provide explanation)
26-Aug-24	The Committee resolved that the Fraud Register Status Report - Open Cases be noted.	Yes
28-Nov-24	The Committee resolved that the Draft Anti-Fraud and Corruption Prevention Plan be supported for submission to Council.	Yes
	The Committee resolved that the Draft Whistle Blowing Policy 2024/25 be supported for submission to Council.	Yes
	The Committee resolved to note the Fraud Register Status Report.	Yes
03-Apr-25	The Committee noted the Fraud and Risk Project Plan: 1 October 2024 – 31 March 2025	Yes
	The Committee noted the Fraud Register Status Report – Open Cases.	Yes
26-Jun-25	The Committee noted the Fraud and Risk Project Plan: 1 April – 30 June 2025.	Yes
	The Committee noted the SOP: Reporting and dealing with fraud allegations.	Yes
	The Committee noted the Fraud Register Status Report – Open Cases.	Yes

Evaluation of the IAF

The Committee has evaluated / assessed the performance and effectiveness of the Internal Audit Function for the 2024/25 financial year and is generally happy with the performance and effectiveness of Internal Audit and progress towards finalisation of the Internal Audit Plan.

Evaluation of the APAC

The Executive Mayor, MM, and the Acting CAE conducted an assessment of APAC performance and effectiveness for the 2024/25 financial year, and they are generally happy with its performance. The report on the assessment of the Committee was tabled to the Council on 30 July 2025.

2.3.4 SUPPLY CHAIN MANAGEMENT

The Supply Chain Management (SCM) Policy applicable to the 2024/25 financial year was revised and adopted by the Council on 30 May 2025 (as Appendix 17 of the budget-related policies in the Council item) in terms of sections 17(1)–(3) of the MFMA/.

The changes referred to above will ensure that the Department: SCM has the required legislative mandate to further streamline procedures and processes to promote more efficient and effective service delivery to all internal and external stakeholders.

2.3.4.1 Competitive Bids Over R300 000

The following table details the number of Bid Committee meetings held for the 2024/25 financial year:

Table 63: Bid Committee Meetings

Bid Specification Committee	Bid Evaluation Committee	Bid Adjudication Committee
50	272	48

The attendance figures of members of the Bid Specification Committee are as follows:

Table 64: Attendance of Members of the Bid Specification Committee

Member	% Attendance
Supply Chain Management Representative	100%
A relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Evaluation Committee are as follows:

Table 65: Attendance of Members of the Bid Evaluation Committee

Member	% Attendance
Supply Chain Management Representative	100%
A relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Adjudication Committee are as follows:

Table 66: Attendance of Members of the Bid Adjudication Committee

Member	% Attendance
Chief Financial Officer (Chairperson)	100%
Director: Planning and Economic Development	96%
Director: Infrastructure Services	98%
Director: Community and Protection Services	94%
Director: Corporate Services	92%

The percentages indicated above include the attendance of those officials acting in the position of a bid committee member and / or chairperson.

2.3.4.2 Awards Made by the Bid Adjudication Committee

The ten highest bids awarded by the bid adjudication committee are as follows:

Table 67: Ten Highest Bids Awarded by Bid Adjudication Committee

Bid Number	Title of bid	Directorate and Section	Successful Bidder	Value of bid awarded
BSM 107/24	APPOINTMENT OF AN EVENT ORGANISER TO ORGANISE THE STELLENBOSCH FESTIVAL OF LIGHTS OVER A PERIOD OF THREE FINANCIAL YEARS FROM 2024 -2027	PLANNING SERVICES	TAD PRODUCTIONS CC T/A THE CALIBER GROUP SA	R7 330 410.19
BSM 69/25	UPGRADING OF STREETLIGHT INFRASTRUCTURE AND ASSOCIATED EQUIPMENT ALONG THE ARTERIAL R304.	INFRASTRUCTURE SERVICES	JT MARITZ ELECTRICAL CC	R6 518 596.65
BSM 33/25	UPGRADE OF EXISTING FLOODLIGHTS AT PNIËL AND IDA'S VALLEY SPORT FACILITIES	COMMUNITY SERVICES	KADDON PROJECTS CC	R4 700 000.55
BSM 90/25	SUPPLY AND INSTALL	PLANNING SERVICES	RE-SOLVE	R4 595 614.25

Bid Number	Title of bid	Directorate and Section	Successful Bidder	Value of bid awarded
	AGRICULTURAL IRRIGATION NETWORK SYSTEM (MAINLINE and SUB-MAINLINE) ON FARM 502 BH, STELLENBOSCH (WC024) MUNICIPALITY		CONSULTING (PTY) LTD	
BSM 67/25	UPGRADE OF PLEIN STREET LIBRARY STELLENBOSCH	INFRASTRUCTURE SERVICES	REKHA CON (PTY) LTD	R4 412 163.44

B/SM 19/25	Construction of School Street and NMT Facilities in Jamestown	Umzali Civils	2025-06-03	Yes

2.3.4.5 Formal Quotations

The number of formal quotations approved by the Snr. Manager: SCM for the year under review follows:

Table 70: Formal Quotations

Description	Financial Years					
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Number of Awarded Formal Quotations	145	122	8	91	108	109
Total Formal Quotations advertised	159	139	131	124	146	149
Percentage awarded	91.19%	88%	67.94%	73.39%	74%	73%

2.3.4.6 Deviation from the Normal Procurement Processes

Paragraph 4.36 of the Council's SCM Policy allows the Accounting Officer to dispense with the official procurement process. The following table indicates the number of certificates of emergencies and deviations approved in terms of Section 4.36 of the SCM Policy.

Table 71: Deviation from Normal Procurement Process

Description	Financial Years					
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
<u>Certificate of Emergencies:</u> Approved by the Directors t.o. Section 4.36.4 of the SCM Policy	0	0	0	0	0	0
<u>Deviations:</u> Approved by the Accounting Officer i.t.o. Section 4.36.1 of the SCM Policy	32	19	12	17	19	16
TOTAL	32	19	12	17	19	16

The reason for the zero reporting is that the certificate of emergencies is already part of the deviation report.

Deviations from the normal procurement processes have been monitored closely to mitigate the risk associated with them.

2.3.4.7 Long-Term Contracts and Public-Private Partnerships

The table below indicates the long-term contracts and Public-Private Partnerships for the year under review.

Table 72: Long Term Contract (20 Largest Contracts Entered into during 2024/25)

N/A					

2.3.4.8 Disposal Management

The system of disposal management envisages the following:

- ✚ immovable property is sold only at market-related prices, except when the public interest or the plight of the poor demands otherwise;
- ✚ movable assets are sold either by way of written price quotations, a competitive bidding process, an auction, or at market-related prices, whichever is most advantageous;
- ✚ firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
- ✚ immovable property is let at market-related rates, except when the public plight of the poor demands otherwise;
- ✚ all fees, charges, rates, tariffs, scales of fees, or other charges relating to the letting of immovable property are annually reviewed;
- ✚ where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
- ✚ in the case of the free disposal of computer equipment, the Provincial Department of Education is first approached to indicate within 30 days whether any of the local schools are

interested in the equipment.

The municipality complies with Section 14 of the MFMA, which deals with the disposal of capital assets, as well as with the Asset Transfer Regulations.

2.3.4.9 Supply Chain Management Performance Management

The SCM Policy requires that an internal monitoring system be established and implemented to determine, based on retrospective analysis, whether the SCM processes were followed and whether the objectives of the SCM policy were achieved.

Monitoring internal processes is an ongoing process. Procedure manuals for various SCM processes have been developed, approved, and are being implemented.

2.3.4.10 Service Providers' Strategic Performance

Section 76(b) of the MSA states that KPIs should inform the indicators set for every municipal entity and service provider with whom the municipality has entered into a service delivery agreement. According to the AGSA:

- a) Service provider means a person or institution or any combination of persons and institutions that provides a municipal service.
- b) 'External service provider' means an external mechanism referred to in Section 76(b) that provides a municipal service for a municipality; and
- c) A service delivery agreement means an agreement between a municipality and an institution or person mentioned in Section 76(b) in terms of which a municipal service is provided by that institution or person, either for its account or on behalf of the municipality.

Section 121(b) of the MFMA and Section 46 of the MSA further state that a municipality should include the following aspects related to service providers in its annual report:

- ✚ The performance of each service provider;
- ✚ A comparison of the performance with targets set for and performance in the previous financial year; and
- ✚ Measures are taken to improve performance.

2.3.4.11 B-BBEE Compliance Performance Information

Section 121(3)(k) of the MFMA indicates that the annual report of a municipality should include any other information as may be prescribed. The Broad-Based Black Economic Empowerment (B-BBEE) Act (Act No. 53 of 2003, as amended by Act 46 of 2013), read in conjunction with the B-BEE Regulations of 2016, states in Section 13G(1) that all spheres of government, public entities, and organs of state must report on their compliance with broad-based black economic empowerment in their annual financial statements and annual reports. Under the explanatory notice (Notice 1 of 2018) issued by the B-BBEE Commission, the following table provides details on the municipality's compliance concerning broad-based black economic empowerment, which only focuses on the organisational aspect of the compliance reform: It should be noted that a consultant is currently in the process of doing an in-depth rating of BBEE compliance in terms of supply chain and socio-economic activities.

a) Management Control

Table 73: B-BBEE Compliance Performance Information - Management Control

Category	% for each category	Race Classification			Gender		Disability
		A	C	W	F	M	
Directors	M= 75% F= 25%	0	4	0	1	3	0

		C	2	M	0		

2.3.5 BYLAWS AND POLICIES

Section 11 of the MSA gives municipal councils the executive and legislative authority to pass and implement bylaws and policies.

All financial-related policies and applicable bylaws underwent public participation and have been published on the municipal website, placed at municipal offices and libraries for further input.

Bylaws and policies approved in the 2024/25 financial year are listed below.

Table 75: Bylaws and Policies approved

By-laws and Policies Introduced during 2024/25			
Newly Developed	Revised	Public Participation Conducted Before Adoption of By-Laws (Yes/No)	By-Laws Gazetted* (Yes/No)

Consequence Management Policy	No	Yes	Yes

2.3.6 MUNICIPAL WEBSITE

The municipal website is an integral part of a municipality's communication infrastructure and strategy. It serves as a tool for community participation, improves stakeholder involvement, and facilitates stakeholder monitoring and evaluation of municipal performance.

As per Section 75 of the MFMA, the municipal website is essential for transparency, allowing stakeholders to access critical documents and monitor municipal activities. It also aligns with the constitutional mandate outlined in Section 152(1)(e) of the Constitution of the Republic of South Africa, which promotes community involvement in municipal governance. The MSA reinforces this by advocating for community participation.

Figure 10: Snippet of the municipal website

Below is a website checklist to indicate compliance with Section 75 of the MFMA.

Table 76: Municipal Website Checklist

Documents Published on the Stellenbosch Municipality's Website	Yes / No	Publishing Date
Current annual and adjustments budgets and all budget-related documents	Yes	Within the legislated period
All current budget-related policies	Yes	Within the legislated period
Current annual and adjustment budgets and all budget-related documents	Yes	Within the legislated period
All current budget-related policies	Yes	Within the legislated period
The Annual Report 2024/25	-	Pending
All current performance agreements required in terms of section 57(1)(b) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) for 2024/25	Yes	Within the legislated period
All service delivery agreements for 2024/25	Yes	Within the legislated period
All long-term borrowing contracts for 2024/25	Yes	Within the legislated period
All supply chain management contracts above a prescribed value for 2024/25	Yes	Within the legislated period
An information statement containing a list of assets over a prescribed value that have been disposed of in terms of section 14(2) or (4) during 2024/25	Yes	Within the legislated period

2.3.7 Communication

In line with Stellenbosch Municipality's Communication Policy adopted in July 2020, the municipality remains committed to transparency, accountability, and fostering participatory democracy. During the 2023/24 financial year, the municipality's communication platforms played a significant role in ensuring timely information dissemination through multiple channels, including the website, social media, and traditional media outlets. Proactive media engagements, official statements, and news releases further enhanced the municipality's corporate identity and public presence.

The municipal website remains a hub for public engagement, offering regular updates on official notices, tenders, news, and meeting agendas. Enhancements to improve user experience and satisfaction are planned for the near future. Additionally, the municipality's social media platforms—Facebook, X (Twitter), Instagram, and LinkedIn—continue to be key tools for reaching a broad audience and providing real-time updates while driving traffic to the website. During the financial year, the municipality also launched its first WhatsApp Channel, which has been growing steadily since its inception.

2.3.7.1 Embracing the Digital Age

Stellenbosch Municipality recognises the importance of engaging with residents and stakeholders through digital platforms. The website, social media channels, WhatsApp, and handheld devices enable the dissemination of information in a timely and accessible manner, ensuring broader community reach. As the municipality continues to expand its digital presence, it is leveraging technology to enhance communication and better serve the evolving needs of the community.

The municipality's growing presence on Instagram and LinkedIn, alongside other platforms, reflects the municipality's ongoing commitment to digital engagement. Additionally, monthly newsletters, providing updates and insights into municipal activities, help keep the community well-informed.

2.3.7.2 Building a Strong Stellenbosch Brand and Corporate Identity

Beyond communication, Stellenbosch Municipality is dedicated to establishing a strong, recognisable brand and corporate identity that resonates with the community and stakeholders. This

focus on branding reinforces the municipality's commitment to creating a positive and impactful presence.

2.3.7.3 Leading in Social Media Presence

The municipality is proud to announce that it now boasts the largest following page of any municipality in the Western Cape, apart from the metro. This achievement reflects the municipality's commitment to effectively engaging with its community and keeping them informed through the most widely used social media platform.

Figure 11: Social Media Volume

2.3.7.4 Communication Checklist

- Regular updates on the municipal website;
- Active engagement across social media platforms (Facebook, X (Twitter), Instagram, LinkedIn);
- Placement of advertisements in community and regional newspapers;
- Newsletters from the Executive Mayor, as well as pamphlets, posters, noticeboards, and regular IDP / ward meetings;
- An interdepartmental communication forum to enhance internal communication;
- An intranet for use by all internal staff; and
- Internal newsletters and memorandums.

This multifaceted approach ensures that Stellenbosch Municipality remains transparent, responsive, and actively engages with both the community and stakeholders.

Below is a communication checklist for compliance with the communication requirements.

Table 77: Communication Activities

Communication activities	Yes / No
Communication Unit	Yes
Communication Strategy	Yes
Communication Policy	Yes
Customer satisfaction surveys	No
Functional complaint management systems	Yes
Newsletters are distributed at least quarterly	Yes

CHAPTER 3: SERVICE DELIVERY PERFORMANCE

3.1 OVERVIEW OF PERFORMANCE WITHIN THE ORGANISATION

This section provides an overview of the key service achievements of the municipality that were completed during the 2024/25 financial year, specifically regarding the deliverables achieved in relation to the key performance objectives and indicators outlined in the IDP.

To improve performance planning, implementation, measurement, and reporting, the municipality implemented the following actions:

- ✦ Departmental operational plans were developed for monitoring and reporting operational programmes. An electronic performance management system is operational within the municipality. The same system forms the basis for performance evaluations of the directors and the municipal manager.
- ✦ During the development of the TL SDBIP as well as the Departmental SDBIP, the municipality endeavoured to adhere to the "SMART" principle in the setting of indicators and objectives. The emphasis was placed on ensuring that targets were specific and time-bound, thus making them measurable.

3.2 COMPONENT A: BASIC SERVICES

This component includes the municipal functions, basic service delivery highlights and challenges, details of services provided for water, wastewater (sanitation), electricity, waste management, housing services, and a summary of free basic services.

3.2.1 MUNICIPAL FUNCTIONS

The municipal functional areas are indicated below.

Table 78: Municipal Functional Areas i.t.o. the Constitution

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Air pollution	Yes
Building regulations	Yes
Childcare facilities	Yes
Electricity and gas reticulation	Yes
Firefighting services	Yes
Local tourism	Yes
Municipal airports	No
Municipal planning	Yes
Municipal health services	No
Municipal public transport	Yes
Municipal public works only in respect of the needs of municipalities in the discharge of their responsibilities to administer functions specifically assigned to them under this Constitution or any other law	No
Pontoons, ferries, jetties, piers, and harbours, excluding the regulation of international and national shipping and matters related thereto	No
Stormwater management systems in built-up areas	Yes
Trading regulations	Yes

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Water and sanitation services are limited to potable water supply systems and domestic wastewater and sewage disposal systems	Yes
Beaches and amusement facilities	Yes
Billboards and the display of advertisements in public places	Yes
Cemeteries, funeral parlours, and crematoria	Yes
Cleansing	Yes
Control of public nuisances	Yes
Control of undertakings that sell liquor to the public	Yes
Facilities for the accommodation, care, and burial of animals	Yes
Fencing and fences	Yes
Licensing of dogs	No
Licensing and control of undertakings that sell food to the public	No
Local amenities	Yes
Local sport facilities	Yes
Markets	Yes
Municipal abattoirs	No
Municipal parks and recreation	Yes
Municipal roads	Yes
Pounds	Yes
Public places	Yes
Refuse removal, refuse dumps and solid waste disposal	Yes
Street trading	Yes
Street lighting	Yes
Traffic and parking	Yes

3.2.2 NATIONAL KEY PERFORMANCE INDICATORS – BASIC SERVICE DELIVERY

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations of 2001 and section 43 of the MSA. These key performance indicators are linked to the following two National Key Performance Areas: Basic Service Delivery and Local Economic Development.

Table 79: Basic Service Delivery

KPA and Indicators	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Basic Service National Indicators								
The percentage of households earning less than R7 000 per month with access to free basic services (In the case of Stellenbosch Municipality- several registered indigent households are being reported)	100%	100%	100%	100%	100%	100%	100%	100%
Service for water, sanitation and refuse removal (Average)	6 453	6 813	6 666	7 283	4 681	4 744	5 584	6 732

Source: The data emanates from the Indigent Register of the Stellenbosch Municipality

3.2.3 WATER PROVISION

Water is the most fundamental and indispensable of all available natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Poverty reduction / alleviation and improved water management are closely linked. Schedule 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Basic water is defined as 25 litres of potable water per person per day supplied within a 200-metre radius of a household. Stellenbosch Municipality had no water restrictions in place during the year under review.

The municipality responded well to the rollout of additional critical water and wastewater infrastructure, as well as the expansion of supply for future storage and growth, and the upgrade and maintenance of existing systems.

The municipality also successfully agreed with the Department of Water and Sanitation to participate in the Bergriver Voëlvei Augmentation Scheme, which would essentially secure the municipality additional water once the scheme is completed. This will be fundamental for improved water security for the future of Stellenbosch in an increasingly water-scarce and climate-sensitive environment, sensitive to climate change and “El Nina-like” possible shocks to the system.

The municipality supplies water to consumers in their area of jurisdiction through the following six water supply systems:

- ⚙ Stellenbosch: Eerste River treated at Ida's Valley WTP (own source);
- ⚙ Stellenbosch: DWS allocation from the Western Cape Water Supply Scheme (WCMSS) via the tunnel treated at Paradyskloof WTP (Theewaterskloof Dam);
- ⚙ Franschhoek Village: Du Toits River treated at Franschhoek WTP (own source);
- ⚙ Dwarsrivier and the rest of Franschhoek: potable water purchased from the City of Cape Town (Wemmershoek Line);
- ⚙ Raithby, Klapmuts, Koelenhof, etc.: Potable water purchased from the City of Cape Town (Blackheath WTP, Faure WTP, and Wemmershoek Line); and
- ⚙ Boreholes BH1: None of the Boreholes were used in the 2024/25 financial year to augment the water supply. The municipality is currently in the process of reviewing the water use licenses for groundwater use.

Water is also supplied to an extensive industrial area as well.

The municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek, which is a micro water treatment plant. The potable water supply from these works amounted to 24.12 Ml/d, and a further 10.88 Ml/d was obtained from the City of Cape Town during the 2024/25 financial year, ensuring a supply of 35.00 Ml/d to the municipality's area of responsibility.

Areas supplied by the Wemmershoek Dam and Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Priël, Boschendal, Johannesburg, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath Water Treatment Works include Polkadraai, Spier, and Vlottenburg.

Areas supplied by Faure Water Treatment Works (from Steenbras Dam – City of Cape Town) are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although the City of Cape Town manages these treatment plants, the Stellenbosch Municipality must monitor and consider their effects on water quality and quantity.

Stellenbosch Municipality supplies potable water to the entire municipal area through an infrastructure network and infrastructure consisting of six water treatment works, 55 reservoirs / holding tanks / sumps and a water tower, 33 water pump stations, 43 pressure-reducing valve installations, and 729 kilometres of pipeline. A telemetry system is used to operate and control the system.

The total bulk water input into the water network for the 2024/25 financial year was 12 775 ML, with an annual average daily demand of 34 999 kl/day. 68.92% of the water supplied is purified from the municipality's water sources at the Ida's Valley, Franschhoek and Paradyskloof Water Treatment Plants. The balance is supplied by the City of Cape Town (31.08%). Potable water supplied by the City of Cape Town is analysed monthly.

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment for all three plants is outsourced to external contractors.

Based on the municipality's International Water Association (IWA) Water Balance sheet for the 2024/25 financial year under review, the municipality recorded 68.8% for "revenue" water, which is an increase of 0.8% from the previous financial year, and 31.2% for "non-revenue" water. Refer to the municipality's International Water Association (IWA) Water Balance Sheet extract below.

System input volume (SIV): kL *					12,774,943	100%
01 Jul. 2024 to 30 Jun. 2025						
(Total water consumption in reticulation system)						
Potable water system	Authorised consumption 72.0%	Revenue water 68.8%	Billed metered	8,789,256	68.8%	
			Billed unmetered		0.0%	
	Water losses 28.0%	Non-revenue water 31.2%	Un-billed metered	383,248	3.0%	
			Un-billed unmetered	25,549	0.2%	
			Commercial losses	536,533	4.2%	
			Physical losses	3,040,356	23.8%	
	Revenue water (Sales) kl				8,789,256	68.8%
Non-revenue water (NRW) ; kl				3,985,686	31.2%	
Real network losses ; kl				3,040,356	23.8%	

The real physical network losses are at 23.8%.

The table above is the International Water Association's table to compute the water balance and is also accepted in the Department of Water and Sanitation's reporting structure. This table forms the basis of the information needed and what is currently used to calculate water losses. The above data is combined with monitoring systems installed on all bulk water supply points to determine and ensure accurate data on the water provided. The consumption data for all water users is drawn from the financial system with a regular data download to determine the total water sold. The figure above is used as far as possible to reflect the water balance and water losses in the water systems. The water readings of all areas are also sent to the Department of Water and Sanitation quarterly to monitor and control water usage and allocations of water.

The municipality has developed a comprehensive Water Conservation and Water Demand Management (WC&WDM) strategy, which includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC&WDM, and it will ensure ongoing planning, management, monitoring, and creating an enabling environment. The WC&WDM initiatives include a Waterpipe Replacement Programme, an indigent domestic leak repair and meter replacement programme, a Stellenbosch water meter audit, and Stellenbosch in-house water services operations and maintenance.

Stellenbosch Municipality is currently not implementing water restrictions. This, however, should not be considered an indication that the probability of a future drought is low, **and the public should always be aware of the need to conserve water.**

The following table reflects the status of the dam levels supplying the WCWSS with water and the status of Stellenbosch's dam levels.

Table 80: Western Cape Dams

Major dams	2020	2021	2022	2023	2023/24	2024/25
	(%)	(%)	(%)	(%)	(%)	
Berg River	81.2	100.8	87.9	100.9	87.5	99.6
Steenbras Lower	49.9	89.9	78.6	99.8	71.5	97.6
Steenbras Upper	99.6	84.6	85.8	100.5	91.5	100.9
Theewaterskloof	55.8	101.9	76.1	100.4	63.6	86.2
Voëlvele	54.5	88.1	63.2	95.9	59.9	99.7
Wemmershoek	43.3	97.7	65.5	100.2	100.05	89.9
Total Stored (Ml)	540 023	879 173	679 794	895 018	614 677	824 582
% Storage	59.7	97.4	75.2	99.6	79.0	91.8

The table below depicts the Stellenbosch dams and overall water usage trends in the region (from the City of Cape Town Dam Levels Report, 21 August 2023):

Stellenbosch's own Dams

Table 81: Stellenbosch dams

Ida's Valley 1	760 215
Ida's Valley 2	1 499 381

3.2.3.1 Service Statistics – Water Services

The table below outlines water usage totals per category:

Table 82: Total Use of Water

Year	Total Use of Water (Mℓ)				
	Total Water into the System (Mℓ)	Total Water Sold (Mℓ)	Non-Revenue Water	% Non-Revenue Water	% Physical Water Loss
2020/21	10 003	7 701	1 815	18.1%	9.9%
2021/22	10 080	8 174	1 906	18.9%	9.7%
2022/23	10 827	7 858	2 968	27.4%	15%
2023/24	12 566	8 631	3 934	31.3%	17.2%
2024/25	12 775	8 789	3 986	31.2%	23.8%

WCWSS Comparative Storage Graph

Overall Water Usage Trend (2010 - Present)

WCWSS means Western Cape Water Supply System

MLD means million litres per day

More information on Water Saving and Restrictions is available on the City of Cape Town's 'ThinkWater' website

Accumulated Monthly Rainfall at Wemmershoek

Note: Wemmershoek station used due to long record and mountainous location

3.2.3.2 Water Service Delivery Levels

It is essential for Stellenbosch Municipality to prioritise and ensure that sufficient and suitable investments are made to facilitate the progressive realisation of the rights of all individuals within its jurisdiction to access at least a basic level of water and sanitation services. The provision of basic water services remains the foremost and immediate priority; however, water services authorities are anticipated to offer intermediate and advanced levels of services, such as on-site water, when feasible and financially sustainable.

All water services offered by Stellenbosch Municipality to consumers within its jurisdiction are governed by the municipality's Tariff Policy and Tariff Bylaws, with provisions for low-income households included in the municipality's Indigent Policy. A significant challenge for the municipality arises from residents in the lowest income groups residing in informal areas, as they require suitable housing solutions. Stellenbosch Municipality is committed to ensuring that every household in the towns has an indoor water connection and is linked to a waterborne sanitation system. All formal households within the urban regions of Stellenbosch Municipality's Management Area are equipped with water connections and waterborne sanitation facilities inside the residences, reflecting a higher level of service.

In the informal areas, communal standpipes and ablution facilities are established as a temporary emergency service. The municipality recognises that communal standpipes are likely the most vulnerable aspect of the water supply network and is committed to ongoing repairs and monitoring of the system's operation and maintenance.

The table below outlines the various levels of water service delivery for each household:

Table 83: Water Service Delivery Levels

Description	2021/22	2022/23	2023/24	2024/25
Household				
<u>Water: (above minimum level)</u>				
Piped water inside	38 120	49 420	51 110	53 630 (As per IWA)
Piped water inside the yard (but not in a dwelling)	3 596	1 443 (479 standpipes on farms + 964-yard connections)	1 443 (479 standpipes + 964-yard connections farms)	1 443 (479 standpipes + 964-yard connections farms)
Using a public tap (within 200m of the dwelling)	10 504	11 117 (11 242-125) informal areas with communal services,	11 382 (11 452-70) informal areas with communal services	10 729 (11 452-723) informal areas with communal services
Other water supply (within 200m)	N/A	N/A	N/A	N/A
Minimum Service Level and Above Sub-Total	52 220	61 980	63 935	65 802
Minimum Service Level and Above Percentage	98%	99.5%	99.6%	98.75%
<u>Water: (below the minimum level)</u>				
Using a public tap (more than 200m from the dwelling)	N/A	125 (informal with no communal services)	70 (Informal with no communal services)	723

Description	2021/22	2022/23	2023/24	2024/25
Other water supply (more than 200m from dwelling)	N/A	120	120	18
No water supply	N/A	92	92	92
Below the Minimum Service Level Sub-Total	1 263	337	282	833
Below the Minimum Service Level Percentage	2%	0.5%	0.4%	1.25%
Total Number of Households (formal and informal)	53 483	62 317	64 217	66 635

The table below indicates the proportion of households that have access to water as at 30 June 2025.

Table 84: Access to Water

Access to water			
Year	The proportion of households with access to water points*	The proportion of households with access to piped water	The number of proportion of households receiving 6 kL free
2022/23	20.16% (11 117- communal taps) + 479 (standpipe farms) + 964 (yard connection farms) = 12 560	79.30% (49 420 – formal house connections and backyard dwellers)	5 744
2023/24	19.97% (11 382 communal taps informal + 479 standpipes farms + 964-yard connections farms = 12 825)	79.59% (51 110 – formal house connections and backyard dwellers)	5 584
2024/25	18.26% (11 382 communal taps informal + 479 standpipes farms + 964-yard connections farms = 12 825)	79.74% (53 630 – formal house connections and backyard dwellers)	6 732

The table below indicates the capital expenditure for the Section: **Water Services as at 30 June 2025**.

Table 85: Capital expenditure as at 30 June 2025: Section: Water Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Bulk Water Supply Pipe and Reservoir: Stellenbosch	36 541	32 307	11.59%
Dwarsriver Bulk Supply Augmentation and Network Upgrades	9 558	8 746	8%
Waterpipe Replacement	10 916	8 589	21%
Bulk Water Supply Pipeline and Reservoir - Jamestown	6 731	6 611	2%
Upgrade and Replace Water Meters	6 536	6 551	0%

Only the five largest capital projects are listed.

The Section: Water Services has spent **84%** of its capital budget for the financial year.

3.2.4 WASTEWATER (SANITATION) PROVISION

The main focus for the 2024/25 financial year was to implement the demands of the Stellenbosch Municipality's masterplan, fulfilling the development needs for the Stellenbosch Municipality's vision. Part of the demand was to start the phase 2 upgrade of the **Wemmershoek Wastewater Treatment Works**.

The table below specifies the different sanitation service delivery levels per household:

Table 86: Sanitation service delivery levels

Description	2021/22	2022/23	2023/24	2024/25
<u>Sanitation / sewerage: (above the minimum level)</u>				
Household				
Flush toilet (connected to sewerage)	38 749	40 709	42 214	47 651
Flush toilet (with septic tank)	8 669	8 931	9 086	9 086
Chemical toilet	388	(279 farms + 322 informal households)	845 (279 farms + 566 informal households)	279
Pit toilet (ventilated)	165	165 (Farms)	165 (Farms)	165
Other toilet provisions (above the minimum service level)	11 144	10 876 (informal communal toilets)	10 661 (informal communal toilets)	10 661
Minimum Service Level and Above Sub-Total	59 115	61 282	62 971	67 842
Minimum Service Level and Above Percentage	98%	98.34%	98.06%	97.77%
<u>Sanitation / sewerage: (below the minimum level)</u>				
Other toilet provisions (below the minimum service level)	210	358 (148 pit toilets) + 210 (other farms)	358 (148 pit toilets) + 210 (other farms)	148 (pit toilets) + 278 (buckets)
No toilet provisions	471	399 (44 informal areas + 355 no toilets)	610 (225 informal areas + 355 no toilets farms)	1189
Below the Minimum Service Level Sub-Total	1 107	1 035	1 246	1547
Below the Minimum Service Level Percentage	2%	1.66%	1.94%	2.23%
Total Number of Households (formal and informal)	61 351	60 222	64 217	69389

The table below indicates the capital expenditure for the Section: **Sanitation Services as at 30 June 2025.**

Table 87: Capital expenditure as at 30 June 2025: Section: Sanitation Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Upgrade of WWTW Wemmershoek	39 133	36 222	7.44%
Vlottenburg Outfall Sewer: Construction of Digteby Sewerpipe	12 404	11 300	8.90%
Sewerpipe Replacement	6 746	5 898	12.57%
Franschhoek Sewer Network Upgrade (Langrug / Mooiwater)	2 800	2 770	1.07%
Upgrade of WWTW: Klapmuts	3 021	240	92.07%
Only the five largest capital projects are listed.			

The Section: Sanitation Services has spent **87%** of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Water and Wastewater Services as at 30 June 2025

**Table 88: Number of employees in the Department: Water and Wastewater Services**

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	9	5	4	44.4
9 – 13	38	28	10	26.3
4 – 8	63	52	11	17.5
3 – 0	97	92	5	5.1
Total	208	178	30	14.4

3.2.5 ELECTRICITY

The Electrical Services department continues to respond well to challenges facing the electricity industry. The extension of capital projects, as guided by the electricity meters policy, is aimed at strengthening the electricity network to ensure a viable provision of electricity services.

a) Alternative Energy

Following the amendment of the Electricity Regulation Act, 2006 (Act No. 4 of 2006) in October 2020, the municipality initiated and embarked on alternative energy generation initiatives to facilitate the purchasing of electricity from independent power producers as well as ensure business continuity in the event of extended loadshedding.

The municipality's application for self-load shedding was not approved by Eskom. Engagements with Eskom to understand the detailed reasons for the application to be rejected are underway.

The municipality continues with the implementation of the Supervisory Control and Data Acquisition (SCADA) project to enable electricity network remote monitoring.

SCADA Phase 2, which was completed on 30 June 2025, entailed the following:

- Complete full SCADA implementation at Franschoek substation;
- Complete remote monitoring of 66kV switchgear at Jan Marais substation;
- Complete plant to master station verification/testing of the 66 and 11kV switchgear at Golf, Jan Marais, Markotter and Suidwal, Cloeterville and Franschoek substations;
- Implementation of 66 and 11kV remote switching functionality at Golf, Jan Marais, Markotter and Suidwal, Cloeterville and Franschoek substations; and
- Implementation of remote monitoring at Watergang substation.

The implementation of 66kV remote monitoring as well as 66kV remote switching functionality at the Main and University substations, which was originally part of the Phase 2 scope, will be incorporated under Phase 3. This could not be implemented in Phase 2 due to 66kV switchgear upgrades, which were underway. Phase 2 implementation was valued at approximately R6 million.

SCADA Phase 3, commencing in the financial year 2025/26, is a three-year contract ending June 2028. The scope for the financial year 2025/26 entails the following:

- Implementation of 66kV remote monitoring and switching functionality at the Main and University substation; and

- ✦ Implementation of remote monitoring and switching functionality at the following secondary substations: La Terra, Techno Park, Huguenot and Tennat.

The municipality will also commence the establishment of a control room in the 2025/26 financial year. This will entail finalising the location of the control room and procurement of the required hardware (desktops, monitors and radios) and furniture.

Following the **investigation of solar photovoltaic and battery storage to ensure business continuity at critical municipal buildings and water and wastewater treatment plants**, the following priority projects were initiated:

- ✦ Engineering, Procurement and Construction of a Hybrid Inverter and Battery Energy Storage System (BESS) at the Stellenbosch Fire Station – this project was started and completed in the financial year 2024/25;
- ✦ Installation of PV and battery backup at the NPK building – this project will commence in the financial year 2025/26 and will be completed in 2026/2027; and
- ✦ Main building precinct – Phase 1: Electrical, Mechanical and Fire Compliance project - This project will commence in the financial year 2025/26 and is estimated to be completed by the end of the financial year 2026/27.

Municipal buildings were identified to be equipped with hybrid inverters to provide backup electricity. This initiative was implemented through a turnkey approach: engineering, procurement, and construction (EPC) and operations and maintenance of hybrid inverters with battery storage systems at fourteen Stellenbosch Municipality community buildings. Of the 14 identified buildings, the following 12 were completed in the financial year 2024/25: Community Development - 21 Simonsberg Road; Cloetesville Library - Long Street; Disaster Management - Banghoek Road; Environmental Management Main Offices – 123 Merriman Avenue; Franschhoek Library – 9 Reservoir Street; Groendal Library – Stiebeuel Street; Ida's Valley Library – 33 Sonnebloem Street; Jamestown Cemetery - School Rd, Kayamandi Library - Hani Rd, Nursery - Beltana Offices, Pniël Library - Main Rd, and Sports Offices - 7 Simonsberg Road.

The 2 remaining buildings, Jamestown Library – Pajaro Street and Law Enforcement and Events Offices- Hoffman Street, could not be completed due to ongoing construction projects which are currently underway at these sites. These buildings will be completed in the financial year 2025/26.

The Request for Proposals (RFP) for independent power producers (IPPs) was advertised on 2 February 2024 and closed on 28 March 2024. The IPP project entails a 20-year contract between the IPP and the municipality and therefore triggers the requirements of Section 33 of the Municipal Finance Management Act 56 of 2003 (MFMA). This section of the Act governs contracts that impose financial obligations beyond three financial years and is intended to ensure transparency, public participation and intergovernmental oversight.

In compliance with these requirements, the draft Power Purchase Agreement (PPA), together with an information statement outlining the municipality's financial and contractual obligations, must be made public at least 60 days before the meeting of the municipal council at which the contract is to be approved. This process enables community input and ensures that the financial implications of the project are clearly understood before a final decision is taken.

In addition, the municipality is required to request and consider comments from the National Treasury and COGTA. Their inputs form part of the governance and oversight framework designed to safeguard long-term municipal financial sustainability.

The municipality's participation in the Western Cape Government Municipal Energy Resilience projects: One of the projects under this initiative is the 50MW Stellenbosch Municipality Independent Power Producer Procurement Programme Solar PV and BESS. The RFP was advertised on 29 March 2025 and is closing on 30 September 2025.

In line with the Department of Mineral Resources and Energy (DMRE) regulations and SANS 1544:2014 requirements **for Energy Performance Certificates (EPCs)**, the municipality identified all municipal buildings with a total floor area greater than 1 000 m² for certification. The assessment and certification process was completed, and EPCs were installed at all identified buildings during the 2024/25 financial year.

b) Electrification of Informal Settlements

In the 2024/25 financial year, the following electrification projects were implemented.

Table 89: Electrification of Informal Settlements

Electrification of Informal Settlements				
2024/25	Phase 1	Stellenbosch Longlands Low-Cost Housing	54	R1 065 000
2024/25	Phase 1	Franschhoek Mooiwater Informal Housing	158	R3 081 000
2024/25	Infills	Langrug Informal Settlement	100	R243 924.64

c) Pniël take-over

The table below indicates the progress and value of the Pniël takeover project to date.

Table 90: Electricity network upgrades

Financial Year	Project Description	Actual amounts spent on Pniël upgrade
2020/21	General upgrade of Pniël / Johannesburg 11kV and 400V networks. The work included the replacement of minisubs. Constructing the first 11 kV ring in Johannesburg.	R3 231 988
2021/22	General upgrade of Pniël / Johannesburg 11kV and 400V networks. Work included the building of a new 1 km, 11 kV overhead line, the replacement of the mini-substation, and the installation of metering units.	R3 500 000
2022/23	General upgrade of Pniël / Johannesburg 11kV and 400V networks. Work included the refurbishment of an 11 kV switching substation, the procurement of switchgear, and installation.	R3 491 923.98
2023/24	General upgrade of Pniël / Johannesburg 11kV and 400V networks. Work included the installation of a new cable from Meerlust and RFG offices to the RMU at the newly refurbished 11kV switching station. This included the supply of material and labour associated with each work. Therefore, all feeders have been rerouted to the new switching substation.	R 3 539 780
2024/25	General upgrade of Pniël / Johannesburg 11kV and 400V networks. Work included the installation of a new cable from Meerlust and RFG offices to the RMU at the newly refurbished 11kV switching station. The contract included the supply of materials and labour associated with each work. Therefore, all feeders have been rerouted to the new switching substation.	R3 873 579.45

Each financial year, the municipality prioritises projects identified from the network assessment report by starting / addressing the critical infrastructure first.

As part of the network upgrades, an 11kV switching substation has been refurbished and commissioned as of the end of June 2024 and is fully operational. Therefore, feeder cables to Pniël / Johannesburg, Solms Delta, and RFF offices have been rerouted to the newly refurbished 11kV substation.

d) Network upgrade projects

The municipality implemented several small capital projects aimed at strengthening the network to support the alternative energy generation programme and to enhance overall stability. Upgrades were undertaken across the high-, medium-, and low-voltage networks at the following substations.

Table 91: HV Electricity network upgrades

Financial Year	Project Description	Actual amounts spent on HV network upgrade
2024/25	The project involves replacing oil circuit breakers at the Main Substation located in Golf Bay, University Bay, and Markotter Bay, along with control panels in Transformer 1, 2, and 3 bays. Replacement of oil circuit breakers at University Substation on Transformer 2 bay, as well as control panels on Transformer 1, 2 and 3 bays.	R10 462 105.76
2024/25	66kV Oil Cable replacement feasibility study.	R696 729.22

Table 92: MV Electricity network upgrades

Financial Year	Project Description	Actual amounts spent on HV network upgrade
Mini-Substation and cable replacements in the following Substations		
2024/25	Bloekom Mini-Substation replacement	R2 161 590.58
2024/25	De Canha Mini-Substation replacement	R788 62.24
2024/25	MS Last Mini-Substation replacement	R2 166 243.54
2024/25	MS Curry Mini-Substation replacement	R434 351.43
2024/25	MS Nyasa Mini-Substation replacement	R51 647.33
2024/25	Protea Mini-Substation replacement	R2 175 769.52
2024/25	SS Rhode Transformers replacement	R912 335.33

2024/25	Le Seur Street Cable Replacement	R69 623
2024/25	Makoter Street Cable Replacement	R41 593.56

3.2.5.1 The Electricity Service Delivery Statistics

Stellenbosch Municipality has four intake points, as indicated in the table below.

Table 94: Stellenbosch Municipality notified demand per intake point

Major Towns	Notified Maximum Demand (NMD in MVA)	Maximum Demand Growth (NMG in MVA)	Maximum Demand Peak (MD in MVA)
Stellenbosch	60 MVA	5.39 MVA	60.37 MVA
Franschhoek	12 MVA	-0.073 MVA	11.529 MVA
Cloetesville	16 MVA	-2.93 MVA	12.24 MVA
Pniël	9 MVA	-0.83 MVA	6.13 MVA

3.2.5.2 Electricity Losses

The electricity losses as of 30 June 2025 were 5.613%.

The table below specifies the different electricity service delivery levels per household.

Table 95: Access to basic electricity

Description	2020/21	2021/22	2022/23	2023/24	2024/25
Household					
<u>Energy: (above the minimum level)</u>					
Electricity (at least the minimum service level) (No. of conventional meters)	4 429	4 326	4 701	4 111	4793
Electricity: prepaid (minimum service level) (No. of prepaid meters)	29 279	31 076	31 717	33 265	34 075
Above Service Level Sub-Total	33 708	35 402	36 418	37 376	38 868
Above Service Level Percentage	86.86	87.78	87.09	89	87.67
<u>Energy: (below the minimum level)</u>					
Electricity (< minimum service level)	0	0	0	0	0
Electricity: prepaid (< min. service level)	0	0	0	0	0
Other energy sources	N/A	N/A	N/A	N/A	N/A
Below the Minimum Service Level Sub-Total	0	0	0	0	0
Below the Minimum Service Level Percentage	0	0	0	0	0
Total Number of Households	33 708	35 402	36 418	37 376	38 868

The table below indicates the capital expenditure for the Department: **Electricity Services at 30 June 2025.**

Table 96: Capital expenditure as at 30 June 2025: Department: Electricity Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Alternative Energy	14 373	14 373	0%
Kayamandi new substation 11kV switching station	12 800	12 746	0.42%
General Systems Improvements - Stellenbosch	6 697	6 672	0.37%
Bien Don 66/11kV substation new	6 240	6 240	0%
Energy Efficiency and Demand Side Management	5 000	2 234	55.33%
Only the five largest capital projects are listed.			

The Department: Electricity Services has spent **96%** of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Electricity Services as at 30 June 2025.

Table 97: Total number of employees in the Department: Electricity Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	3	2	1	33.3
9 – 13	36	26	10	27.7
4 – 8	55	48	7	12.7
3 – 0	8	6	2	25
Total	103	83	20	19.4

3.2.6 WASTE MANAGEMENT, REFUSE COLLECTIONS, WASTE DISPOSAL AND RECYCLING

3.2.6.1 Waste Management

The Department: Waste Management's key responsibility is to keep the municipal area waste-free by removing illegal dumping and providing a refuse collection and waste disposal service for all residents. The department also encourages waste minimisation through waste treatment, recovery, and recycling solutions.

Stellenbosch Municipality's Waste Management Department achieved second place in the Municipal Recognition Programme for Waste Management hosted by the Western Cape Government's Department of Environmental Affairs and Development Planning.

a) Development of additional waste disposal cells project

The Stellenbosch Landfill reached capacity in August 2019. All Stellenbosch waste was transferred to the private Vissershok Landfill. This represents a huge additional expense for the municipality.

In the 2024/25 financial year, the municipality commissioned Cell 4A at the landfill in November 2024, and the haulage of waste to Vissershok ceased. The last remaining cells (Cell 4B and 4C) will be completed and commissioned once Eskom has removed the infrastructure that traverses the property.

Projects continued in the 2024/25 financial year but were initiated in the previous financial year(s):

Landfill gas extraction and flaring

During the financial year, the landfill gas extraction and flaring infrastructure was completed. The infrastructure was commissioned on 01 June 2025, a volume of 220 723 Nm³ of biogas was flared, of which 37.2% was methane gas.

Figure 12: Landfill gas extraction and flaring

Compliance

For waste disposal facilities (landfills and transfer stations) that are required to operate in compliance with the relevant legislation, all landfills must be licensed. Internal audits form part of these legal requirements and are conducted quarterly by internal staff. Audits were conducted at the Stellenbosch Landfill Site, Klappmuts Transfer Station, and the Materials Recovery Facility in Stellenbosch.

The Department of Environmental Affairs and Development Planning conducted a compliance audit at the Stellenbosch Landfill on 19 February 2025. The Department found that the site was compliant and scored 92.42%.

External Audits

To be able to assess whether waste management practices are in accordance with all license conditions, landfill owners must regularly (at least once per annum) obtain the services of an external independent auditor to do an independent landfill compliance audit.

During the financial year, the external auditor found the site was compliant and scored 95.21%.

Monitoring Committee

All landfills are established and operated in terms of a Waste Management Licence (WML) issued by either the National or Provincial Department of Environmental Affairs and Planning. In terms of the waste management license, landfills are required to establish a monitoring committee. The objective of the Monitoring Committee is to provide a forum to enable the community to effectively participate in and monitor the operation, rehabilitation, closure, and ongoing monitoring of a landfill.

The Stellenbosch landfill has an active monitoring committee. Monitoring Committee meetings are attended by Department of Environmental Affairs and Department Planning officials, as well as officials of various municipal departments as and when required. The independent external auditor also attends the meeting as and when required to report on the findings of the annual external audit and the review audit. Meetings were held on 1 October 2024, 25 February 2025 and 27 May 2025 during the financial year.

Waste Managers Officers Forum

The Waste Management Officer (WMO) for the Stellenbosch Municipality is the Senior Manager: Waste Management. Quarterly meetings of the Provincial Waste Managers Officers Forum take place at various venues across the province. The Waste Management Officer attends the meeting and reports on activities within the municipality; this also provides a forum to receive information from provincial officials and further networking with Waste Management Officers from other municipalities within the province.

These forums are also held on a district level, where municipal representatives from the Cape Winelands discuss waste-related matters within the district.

Area Cleaning

Area cleaning within the municipal area is provided using a contractor that is responsible for cleaning the Stellenbosch CBD, and the use of EPWP personnel. Area cleaning is an essential service. This section employed temporary employees from local communities that were sourced from the municipal unemployment database to perform cleaning services in the streets, open spaces, and around waste removal skips.

Area cleaning service is provided using blue bags and black bags. Where the municipality faces severe illegal dumping, it provides its plant machinery (digger loaders and tipper trucks) to clean and clear such areas.

The area cleaning section has seen an increase in the illegal dumping of builders' rubble and green waste within the hotspot areas.

The services rendered by the Section: Area Cleansing include, but are not limited to, street cleaning and emptying of litter bins.

3.2.6.2 Area Cleansing Functions

The images below illustrate how operational the municipality is with area cleaning in certain areas.

Image 1: Street sweeping and litter picking

Illegal Dumping Clearing

Image 2: Before and After of Illegal Dumping Clearing

No Dumping Signs

Image 3: Signage boards notifying the public not to dump in certain areas

EPWP employment opportunities were created in the 2023/24 and 2024/25 financial years.

The table below indicates the EPWP employment opportunities created in the 2023/24 and 2024/25 financial years.

Table 98: EPWP employment opportunities

Reporting month	2023/24	2024/25
July	372	219
August	394	258
September	394	304
October	418	328
November	426	330
December	431	304
January	208	303
February	250	228
March	283	233
April	282	196
May	366	287
June	406	298
Total	4 230	3 288

Refuse Collection

Refuse collection is completed according to a weekly schedule for formal households, commercial properties, and industries. The municipality supplies 240 wheelie bins to 28 465 collection points, but that excludes informal settlements where communal skips are provided and collected. This is a service that is provided 7 days a week.

Wheelie 240-litre bins

The following information is drawn from the available data regarding wheelie bins issued for the 2023/24 and 2024/25 financial years:

Table 99: Refuse bins issued

Bins	2023/24	2024/25
Broken bins	321	368
New bins	582	237
Total	903	605

3.2.6.3 Waste Disposal and Waste Minimisation

Recycling: Material Recovery Facility and the Landfill

The Stellenbosch Municipality Integrated Waste Management Facility (IWWMF), located next to the landfill, commenced operations on 01 April 2021. The municipality's Material Recovery Facility (MRF) manages and processes an average of 123 tons of recyclable waste monthly.

Image 4: Recycling: MRF and the Landfill

Operations are underway inside the Material Recovery Facility (MRF)

The municipality also allows 40 waste pickers at the landfill to reclaim recyclable waste from the landfill. The waste pickers reclaimed 296 tons of waste from the landfill during the financial year. In total, 1 774 tons of waste were recycled in the financial year.

Disposal Facilities

Stellenbosch Landfill Site

The Stellenbosch Landfill consists of four cells (Cell 1 – 4). Cells 1, 2, and 3 have reached their maximum capacity and are no longer accepting waste and are in the process of being capped. Cell 4A was commissioned in November 2024; however, before the commissioning of the cell, 13 775 tons of waste were transferred to Vissershok Landfill Site during the financial year.

Image 5: Cell 4A at the landfill site

During the 2024/25 financial year, the landfill received 893 users, and 39 498 tons of waste were disposed of at Cell 4A, which was covered and compacted daily to ensure the site remains efficient and compliant with regulatory standards.

Green / Organic Waste

The municipality is currently implementing a waste diversion programme to reduce organic waste going to landfills. This programme involves shredding green waste and composting garden waste. Residents and businesses can drop off their garden waste at the landfill, while Franschhoek residents have the option to use the Franschhoek drop-off facility. The collected waste is then transported to the Stellenbosch Landfill Site for chipping and shredding.

The municipality managed to divert approximately 37% of organic / green waste from the landfill site during the financial year.

Table 100: Organic / green waste from the landfill site

Organic waste diversion	Tons
Waste generated	53 253.94
Estimated organic waste tonnages (13.5%)	7 189.282
Estimated Green Waste Tonnages (24%)	12 780.95
Total organic waste (37.5%)	19 970.23
Diverted Organic Waste	7 400.72
Total Diversion of organics %	37.05877

Image 6: Garden waste area where chipping takes place

Builder's rubble

The builder's rubble is crushed, stockpiled, and transported off-site once it is sold and collected by contractors. Crushing of materials is included in the contract awarded to the current contractor responsible for operating and overseeing the landfill site. Brick reclamation is closely monitored by the site supervisor, who regulates the process, maintains records, and ensures that all individuals entering the landfill wear protective gear and are registered in the site's database.

The following volumes were received, crushed, and sent for beneficiation:

- ✚ Incoming: 43 282 tons; and
- ✚ Outgoing (crushed): 18 702 tons.

Klapmuts Transfer Station (KTS)

The KTS, a general waste transfer station, was established in 2000. It serves as a hub for all general waste collected in the Stellenbosch Municipal Area. The facility includes an open-sided, roofed structure where waste is deposited, transferred, and stored before disposal.

Franschhoek Drop-Off Facility

The Franschhoek Drop-off Facility is dedicated to offering a free service to the residents of Franschhoek and its neighbouring areas for the disposal of garden waste and bulky items. A contractor has been assigned to transport garden waste to the Stellenbosch Landfill and bulky items to Vissershok Private Landfill.

Education and Awareness

Numerous education and awareness campaigns were held during the financial year. Below are a few examples of the campaigns held:

- ✚ On 05 June 2025, training was conducted by Aquila Environmental Pty (Ltd), a service provider, on office recycling with the municipal staff. All the municipal cleaners were invited to attend the training. A short training session was about the new recycling system at Stellenbosch municipality's offices.
- ✚ On the 18th of June 2025, a door-to-door environmental awareness campaign was conducted in Ward 13, Kayamandi. The initiative was carried out by the Waste Management team, Area Cleaning (EPWP participants), and the Aquila Environmental team.
- ✚ On 27 June 2025, waste pickers' training was conducted by Petco, and the competency certificates were issued by the MMC infrastructure, Cllr Pheiffer. Over 70 overalls, reflectors, gloves and safety boots were distributed to waste pickers.

The table below indicates the service levels of refuse removal as of 30 June 2025.

Table 101: Service levels of refuse removal

Description	2020/21	2021/22	2022/23	2023/24	2024/25
Household					
Refuse Removal: (Minimum level)					
Removed at least once a week	37 926	49 300	50 792	50 792	50 792
Minimum Service Level and Above Sub-Total	37 926	49 300	50 792	50 792	50 792
Minimum Service Level and Above Percentage	100%	100%	100%	100%	100%
Removed less frequently than once a week	1 064	N/A	N/A	N/A	N/A

4 – 8	20	20	0	0
3 – 0	42	39	3	7.1
Total	74	71	3	4.0

3.2.7 HOUSING DEVELOPMENT

The municipality has an important responsibility to plan for integrated human settlements by ensuring that all its citizens reside in developable, formalised, safe, and sustainable human settlements. This is accomplished by providing dignified living through national and provincial funding within closer proximity to employment opportunities, thereby improving the quality of life for all citizens.

The Section: Housing Development secured a grant in cooperation with the Section: Project Management Unit (PMU) and municipal funding for human settlements, totalling R47 342 761. The Section: Housing Development managed an adjusted capital expenditure budget of R17 376 606 for the 2024/25 financial year, which includes grant funding by the Provincial Department of Infrastructure (PDol) as well as municipal funds for future housing projects. The financial year under review saw the Section: Housing Development spend 92% of its allocated budget on projects.

The overarching objective of the funds received was to provide basic services in the informal settlements, especially in Enkanini and Kayamandi (see images below), as well as to relocate families that reside in the Langrug dam. This could only be successfully achieved through extensive collaboration with all the various departments within the municipality. More than 200 families had to be relocated on Erf 3229, Mooiwater, Franschhoek.

Image 7: Construction of ablution facilities in Enkanini, Kayamandi

**Image 8: Completion of ablution facilities**

Furthermore, the grant funding was utilised to do forward planning to obtain development rights for Erf 7001, Cloetesville. Consultants were appointed to design internal services as well as top structures for the La Rochelle and Klapmuts housing projects. The Housing Development Agency (HDA) concluded all studies and could submit the Land Use Application for Erf 64, Kylemore, for public comment.

The list of projects, targets, and budgets for the Stellenbosch Municipality for the 2024/25 financial year is presented in the tables below, as extracted from the said letter.

3.2.7.1 Housing Development Capital Budget

Table 104: Section: Housing Development capital budget

Sites	2024/25 Adjustment Budget	
	Funding Source	Budget
Erf 64, Kylemore	HSDG	778 988
Erf 7001 Cloetesville (380) FLISP	CRR	292 396
Farms 81/2 and 82/9, Stellenbosch	CRR	270 942
ISSP Kayamandi	ISUPG	2 000 000
Housing Projects (Social housing planning)	CRR	10 518 992
Klapmuts La Rochelle	ISUPG	2 000 000
Housing projects	CRR	296 331
Jamestown: Housing	HSDG	900 857
Jamestown: Housing	CRR	318 100
Total		17 376 606

3.2.7.2 Human Settlement Development Grant (HSDG)

Stellenbosch received an overall allocation on the Provincial Business Plan for human settlements, which includes planned projects, upgrading of informal settlements, and implementation of projects (services and top structures) that are depicted in the tables below:

**Table 105: Human Settlement Development Grant (HSDG)**

Stellenbosch Municipality	2024/25 Planned		
	Sites	Units	Funding
ISSP Kayamandi Zone O (managed by PMU)	0	50	3 150 000
Kylemore (IRDP)			1 946 000
Total	0	50	5 096 000

3.2.7.3 Informal Settlements Upgrade Partnership Grant (ISUPG)

Table 106: Informal Settlements Upgrade Partnership (ISUPG)

Stellenbosch Municipality	2024/25 Adjusted Budget		
	Sites	Units	Funding

ISSP Kayamandi Enkanini (IBS)	0	0	2 000 000
Kayamandi Hostels (managed by Housing Administration)			2 650 000
Total	60	0	23 200 000

3.2.7.4 Housing Multi-Year Projects

The South African Constitution of 1996 enshrines the right of everyone to have access to adequate housing and makes it incumbent upon the state to take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. This is accomplished by providing dignified living through national and provincial funding within closer proximity to employment opportunities, thereby improving the quality of life of all citizens.

The Section: Housing Development, whose main function is to apply for funding to initiate and obtain development rights for future housing developments, is reflected in the Housing Pipeline, which, amongst other things, focuses on the following multi-year projects:

- a) **Erven 412, 217, and 284 Groendal, Franschhoek** Erven 412, 217, and 284 Groendal are located along Santa Rose Street in Groendal, a suburb of Franschhoek, next to the R45. The site falls within an area characterised by medium- to high-density residential, non-residential, and light industrial uses.

Figure 13: Erven 412, 217 and 284 Groendal, Franschhoek

Various studies have been undertaken over the years regarding the development of Erf 412. Most of the studies included extensive public participation processes. The outcome of these studies was that the property should be developed for high-density residential units, but also include business (light industrial) opportunities. Erf 412 was rezoned to a subdivisational area in 2016, allowing for general residential, local authority and general business. The initial plans for Erf 284 were to develop an old-age home or retirement village; due to financial constraints, this never materialised.

The Section: Housing Development undertook a process to formulate a Call for Proposals in line with the approved Council agenda item.

The Section: Housing Development engaged with the Ward Councillors and Ward Committees and workshopped the different development options. Further consultations took place with professional input from different stakeholders on the architectural and aesthetical design parameters and guidelines for Franschhoek.

The preferred concept, as approved by the Council, will be used in the tender Request for Proposals in the Supply Chain Management procurement process. In other words, the Council's preference will be used by all the bidders as the guiding / benchmark concept site development layout for the

submission of their costing.

Subsequent to awarding the tender, the item will serve before the Council for a final decision on the disposal of the erf. After the Council's final decision, the processes for obtaining development rights must be completed, which will involve further public participation/further specialist studies around the technical difficulties on Erven 412, 217 and 284, Groendal, Franschhoek.

Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch)

In terms of the implementation of social housing programmes, the Stellenbosch Municipality has identified Portions 2 and 9 of Farm No. 81, Stellenbosch. This site is located between the Cloetesville and Kayamandi settlements.

The R304 to the west and the railway line to the east serve as its boundaries. The Plankenburg River traverses the site along its eastern boundary. The southern boundary of the property includes portions of the Kayamandi Tourism Centre as well as a bridge over the railway line. The Mount Simon residential development frames the northern boundary.

A feasibility study has been done to determine the development potential of the site. Council approved the feasibility report for social housing (rental stock) for further planning studies. A suitable, qualified, and experienced professional service provider conducted these studies. These projects included a geotechnical investigation, flood line studies and a traffic impact assessment on the site.

The geotechnical investigation indicates that the property is considered to have suitability ranging from favourable to poor for residential development. The factors that reduce the suitability of the land for development are the degree of uncontrolled fill, the existing topography and soil corrosivity.

The tender was awarded to the successful service provider in March 2024. The draft Land Availability Agreement (LAA) served before the Council on 14 November 2024 to enter into a LAA with the developer. A service provider has been appointed to obtain development rights for Portions 2 and 9 of the Farm No. 81, Stellenbosch. The Land Use application has been advertised for public comment, which closed on 12 May 2025.

Figure 14: Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch)

b) Erf 7001, Cloetesville

A service provider conducted a study to explore potential development sites in Cloetesville. The recommendations presented to the Council led to the identification of Erf 7001 as a potential site for GAP / FLISP housing. A call for proposals for the mixed-use development of Erf 7001, Cloetesville, was advertised on two occasions.

The goal of this development is the delivery of medium- to upper-GAP housing, which is not aimed at BNG-housing units (free houses). There is an urgent need for the property to be developed to create an integrated urban development (Cloetesville), providing housing.

Stellenbosch Municipality is essentially making the land available (via the ATR processes) to a developer to develop housing opportunities in the GAP market.

A team of professionals has been appointed to undertake a broad conceptual urban design framework for Erf 7001 and to obtain town planning and development rights. A public participation process was completed to obtain public comment. The Municipal Planning Tribunal (MPT) approved the land use application, and consequently, land development rights were obtained on 29 November 2024. An appeal period followed, after which the Appeal Authority approved the project.

A funding application to PDol is in progress. The user section will advertise during the 2025/26 financial year a call for proposals from private developers to partner with Stellenbosch Municipality in the development of GAP housing on Erf 7001, Cloetesville.

Figure 15: Erf 700, Site Development Plan

c) Farm 527, Jamestown (Phases 2 and 3)

The subject property is located on the southern edge of the suburb of Jamestown, east of the R44 between Stellenbosch and Somerset West. It is flanked by an existing cemetery on its western boundary and a sports field located centrally on its northern edge.

The site falls within an area characterised by medium- to high-density residential as well as non-residential uses that serve the local community of Jamestown.

A professional team was appointed to undertake a broad conceptual urban design framework for a portion of Portion 7 of Farm 527 and the remainder of Farm 527, Stellenbosch, and to obtain town planning and development rights.

After the public participation process was concluded, the Land Use Application was submitted to the MPT for decision-making. Phases 2 and 3 on Portion 7 of Farm 527 (single residential erven and service sites) were approved, which will yield 274 housing opportunities. An appeal was lodged against the application. The final notice of appeal was issued on 8 August 2024, wherein the appeal was dismissed, and the application was approved.

Figure 16: Farm 527, Jamestown (Phases 2 and 3)

The section will advertise a tender to appoint an implementing agent for the development of BNG and GAP housing for Phases 2 and 3 on the remainder of Portion 7 of Farm 527, Jamestown, during the first quarter of the 2025/26 financial year.

d) Adam Tas Corridor Precinct 10 (Northern Extension), Stellenbosch

The project is situated north of Kayamandi, adjacent to Cloeteville and the Welgevonden Estate. The sites are located on the western side of the R304 (the main arterial from the north) to Stellenbosch.

The specific site has been earmarked to provide a mixed-use development that could yield $\pm 3\,500 - 4\,000$ residential opportunities to address the housing need experienced in Stellenbosch.

It should be noted that a portion of the development has been identified as a possible relocation area for the redevelopment of the Kayamandi Town Centre and other related projects.

A tender was advertised, and a service provider was appointed to undertake a Broad Conceptual Urban Design framework for the Adam Tas Corridor Precinct 10 (Northern Extension) and to obtain town planning and development rights. The project's timeframe to obtain development rights is the 2025/26 financial year.

Figure 17: Location of the proposed development of the Northern Extension

The formal land use application was submitted to the Section: Land Use Management on 1 December 2023. A public participation process was conducted for public comment, and the closing date for comments was 25 February 2024. The application was circulated to the internal department for comment.

The conceptual design layout was amended by the service provider due to the planning and construction of the reservoir. The development plan and proposed subdivisional area layout for the proposed Northern Extension Development were submitted to the Section: Land Use Planning on 11 December 2024. Negotiations with private developers are in process to register a servitude access over the property to the reservoir site. It is anticipated that the Land Use application will serve during the second quarter of the 2025/26 financial year at MPT for decision.

e) Erf 64, Kylemore

The identified property is 15.5 ha, of which the municipality requires ±8 ha for residential purposes. A special Power of Attorney was provided in November 2021 by the National Department of Public Works and Infrastructure (NDoPW&I) to the Housing Development Agency (HDA).

It should be noted that pre-feasibility studies were conducted more than 10 years ago and need to be reviewed and amended where necessary.

The Housing Development Agency (HDA) has been appointed to assist with the transfer of land from the NDoPW&I to the Stellenbosch Municipality. Furthermore, the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General, and the relevant funding applications to the PDol were attended to.

The HDA appointed a service provider for detailed planning and design of the preferred development option.

A beneficiary committee was elected from a public meeting that was held on 13 March 2024. A formal meeting was held on 6 May 2024 with the newly elected beneficiary committee to discuss the signing of the social compact and the street naming process.

Figure 18: Erf 64, Kylemore

A memo with proposed street names and numbers was submitted to the Section: Land Use Management for approval.

The HDA submitted the land use application during the financial year under review, and it will be advertised for public comments / inputs during the first quarter of the 2025/26 financial year.

f) Cloetesville infill housing project

The Cloetesville Infill Housing Project was implemented to serve as a means to develop vacant and underdeveloped portions of land within Cloetesville to address the housing needs. A service provider was appointed to conduct a feasibility study on eight sites (8 erven), of which only two sites have been approved by the Council during the review of the 2025-2028 Housing Pipeline on 30 May 2025.

The objective was to identify the development potential of each site and to provide a conceptual site development layout for the identified sites. The following sites, as per the images below, were approved for further investigation:

- 1) **Erf 8915** is situated adjacent to and stretches behind Pieter Langeveldt Primary School. Moreover, it is situated behind one row of houses. A concern raised for this site is that the expense of servicing the land could potentially jeopardise the feasibility of providing facilities for the disadvantaged. Another concern is the number of trees on the site, especially behind the school, and their environmental and heritage impact. Currently, the site is being used as an illegal dump.

The Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. Although it is expected that this site will be very costly to develop (due to the poor soil condition and subsequent required bulk earthworks), it is recommended that the Stellenbosch Municipality develop the site for housing opportunities, depending on the subsidy quantum.

Figure 19: Cloetesville infill housing project

The project has been approved in the business plan of the Provincial Department of Infrastructure for the current financial year. Only after PDol approves the funding will a procurement process be followed to appoint a professional team to obtain development rights.

- 2) **Portion of Erf 6847** is relatively flat; however, the soil conditions and the permanent or perched water table, which is found less than 1.0m below the ground surface, are expected to impact the cost of construction since alternative construction methods are used to mitigate the risks. The site allows for possible infill opportunities, and therefore, funding will be applied for at the PDol to undertake further investigation.

Figure 20: Portion of Erf 6847

h) La Motte: Farms 1339, 1158 and 1158/1, Paarl

La Motte is a former Bosbou Hamlet situated approximately 3.5 km north-west of Franschhoek town, on the Robertsvalei Road, close to where it intersects the R45. Originally built to house forestry workers, the village is made up of the original dwellings and a range of community facilities. During the construction phase of the Berg River Water Scheme, new houses were built adjacent to the existing settlement to temporarily house the construction workers; these houses have been transferred to identified beneficiaries.

Portions of Farm 1653, Remainder Farm 1339, Remainder Farm 1158 and Portion 1 Farm 1158 Paarl have been identified for mixed-use housing development for the expansion of La Motte.

Feasibility studies and various development options have been completed for consideration. From the findings, the identified properties have sufficient capacity for the provision of an integrated housing development. Discussions with the owner of the land, the National Department of Transport and Public Works and Infrastructure, have occurred to initiate the transfer of land to the Stellenbosch Municipality for housing developments.

The La Motte properties are owned by the National Department of Public Works and Infrastructure.

Figure 21: La Motte properties owned by the National Department of Public Works and Infrastructure

During June 2024, the municipality extended the Implementation Protocol Agreement (IPA) with the Housing Development Agency (HDA) to assist and facilitate the process of ensuring the transfer of the above-mentioned properties for housing development.

Highlights within the department

- ✚ The housing pipeline was unanimously adopted by the Council.
- ✚ That the oldest informal settlement in Klapmuts received funding from PDol to be upgraded;
- ✚ That NDoPW&I provided, after 20 years, a Special Power of Attorney for Erf 64, Kylemore, to be developed for housing opportunities;
- ✚ That the first GAP-housing in Cloetesville received development rights; and
- ✚ That the first Social Housing project (affordable rental) was advertised for public comments to finalise the Land Use Application.

Challenges within the department

Table 107: Challenges within Housing Development

Challenges	Description	Corrective Measures
Capacity constraints to timeously execute and project manage projects in various stages of the project cycle.	Staff shortage	A Programme Manager was appointed in June 2025, which increased the capacity of the unit.
Coordination between various departments to fast-track infrastructure and planning approvals.	Interdepartmental coordination	Monthly meetings have been instituted to streamline workflow.
Provision of funding on a national and provincial level.	Budget constraints	Applications for emergency housing have been centralised and dealt with by the National Department of Human Settlements. These applications should be managed by the Provincial Department of Infrastructure, as funding approvals are laborious.
Community expectations compared to housing delivery.	Housing needs for low- to medium-income households	Acceleration of housing projects by streamlining the approval processes through SOPs.

3.2.8 INFORMAL SETTLEMENTS

The Section: Informal Settlements plays a pivotal role within Stellenbosch Municipality (WC024), managing twenty-nine informal settlements. Recent surveys and independent service providers highlighted a substantial challenge, with approximately 22 000 informal structures recorded in the "Section: Informal Settlements Matrix, 2025." This significant number underscores the ongoing struggle residents face, particularly concerning limited access to essential basic services.

In response, the Section: Informal Settlements is dedicated to addressing the critical demand for basic services in these areas. This involves robust collaboration with other municipal departments and sections to successfully implement upgrading projects and ensure the provision of vital services to residents. Furthermore, the section is actively involved in monitoring and reporting on the growth dynamics of informal settlements within Stellenbosch Municipality, striving to ensure the consistent delivery of adequate basic services.

The 2024/25 financial year saw significant progress across several crucial initiatives as follows:

3.2.8.1 Upgrading of Informal Settlements Project: Langrug and Erf 3229, Mooiwater, Franschhoek

A major focus during the financial year (FY) was the relocation of families from the Langrug dam area. This critical process commenced in the final quarter of the 2024/25 financial year, with an estimated total of 220 households planned for relocation to Erf 3229, Mooiwater. This project is a testament to the municipality's commitment to providing improved living conditions.

As part of ongoing maintenance and efforts to restore dignified living conditions, the Section: Informal Settlements successfully replaced approximately 20 dilapidated wendy houses during the 2024/25 financial year.

3.2.8.2 Provision of Basic Services

The Section: Informal Settlements is responsible for identifying and facilitating the provision of basic services in informal settlements. Collaborating with other departments, the municipality achieved the following:

Water and Sanitation: Twenty (20) waterborne toilets and 20 new taps were installed in Enkanini, Kayamandi. Additionally, taps and waterborne toilets were installed and replaced in various other areas throughout the municipality.

3.2.8.3 Survey of Backyard Dwellers in Franschhoek

A successful bidder has been appointed to undertake a comprehensive survey of backyard dwellings in the Franschhoek area.

3.2.8.4 Standard Operating Procedures (SOP)

In accordance with the Manager: Informal Settlements KPI linked to the SDBIP, Section: Informal Settlements has developed a verification response to backyarders for effective and efficient service delivery.

3.2.8.5 Strongyard, Kayamandi

All negotiated agreements with the community for the 2024/25 financial year under the Strongyard project were successfully concluded. Key deliverables provided by the municipality include:

- ✚ Fencing of the designated area;
- ✚ Provision of eight (8) new ablution facilities; and
- ✚ Supply of three (3) Wendy houses.

It was mutually agreed with the community that the development of the play park will be completed through collaborative efforts in the 2025/26 financial year.

3.2.8.6 Special Projects:

George Blake Avenue

In accordance with the MSDF, the Section: Informal Settlement has been actively liaising with other departments to address service delivery along the Adam Tas Corridor, particularly concerning George Blake Avenue. Updates on the upgrades include:

- ✚ Installation of benches for leisure and recreational purposes;
- ✚ Upgraded voltage of street lighting and improved angling for better visibility;
- ✚ Delivery of additional bins;
- ✚ Installation of sign/name boards;
- ✚ Adjustments for universal access at pedestrian crossings;
- ✚ Refreshing the road lines with new paint;
- ✚ Implementation of river rehabilitation and maintenance efforts; and
- ✚ Increased law enforcement visibility and safety through bicycle patrols.

The Section: Informal Settlement is also currently in communication with the Section Local Economic Development to implement upgrades for a market space focused on providing the community with opportunities for monetisation.

Normstorm Exhibition

In collaboration with the Office of the Municipal Manager, the Section: Informal Settlements successfully hosted a Normstorm Exhibition event on 6 June 2025, at the PJ Olivier Art Centre. Normstorm is a powerful campaign challenging harmful norms, particularly those fuelling bullying, gender-based violence, inequality, and silence. This initiative, born in Sweden and supported by the Swedish International Centre for Local Democracy (ICLD), has found a new purpose in Stellenbosch Municipality.

Contributors to this vital partnership include Stellenbosch Municipality, the Western Cape Government, Jönköping Municipality, and ICLD. The municipality's leadership approached the Western Cape Education Department (WCED) to form an innovative, multi-stakeholder partnership to ensure Normstorm effectively reaches learners. With the support of educators, artists, and young people, Stellenbosch transformed Normstorm from a campaign into a movement rooted in empathy, equality, and education. The exhibition showcased the powerful responses of learners through

photographs, each a declaration against bullying, racism, and abuse, and a celebration of friendship, hope, and unity.

Disasters and Emergencies

The Section: Informal Settlements provides crucial support to the Section: Disaster Management during emergencies. This involves verifying data collected from disaster victims, often in the aftermath of fire incidents in informal settlements and backyard dwellings, as well as flooding and intense winds. Reports are generated within 24 hours to facilitate an effective and efficient response.

The National Department of Human Settlements (NHoDS) also played an integral part in providing emergency relief assistance (building material) to destitute households in the Stellenbosch Municipality area. A notable instance was the Zone O, Kayamandi fire incident, which left 241 households destitute and received aid from NHoDS.

Table 108: Total number of structures impacted by incidents in all areas. All verifications completed within 48 hours

Incidents reported	Incidents: Fire, flood and wind	Number of people affected	Number of structures affected	Number of verified incidents
Formal settlements (Backyard structures)	Fire	22	8	5
	Flood	0	0	0
	Wind	0	0	0
Informal settlements	Fire	148	61	9
	Flood	0	0	0
	Wind	0	0	0
Total number of fires, floods, wind and structures impacted by incidents in all areas		170	69	14

3.2.8.7 Evictions

The municipality conducts weekly meaningful engagements with families facing eviction through court proceedings. This process includes meetings with the applicant, respondent(s), the Chief Legal Advisor of the municipality, the Manager: Informal Settlements, and the Administrative Officer of Emergency Housing. The primary goal is to find amicable solutions while upholding the municipality's constitutional obligations.

The table below indicates the number of eviction matters from 01 July 2024 to 30 June 2025.

Table 109: Number of eviction matters

Site visits conducted	Number of meaningful engagements held	Departmental reports served and filed at the Court	Court orders issued	Settlement agreements	Evictions completed	Refused / Rejected alternative accommodation
74	67	45	32	7	20	0

3.2.8.8 Development Proposals / Strategy

The Section: Informal Settlements has outlined a comprehensive development strategy for each informal settlement within the municipal area. These strategies are categorised into Clusters 1 to 5 of the "Section: Informal Settlements Matrix, 2024" and are built upon three core pillars:

- ✦ A synopsis of existing basic services, including a thorough analysis of service provision shortfalls;
- ✦ Demographic information of household heads and a desktop risk analysis of each settlement; and
- ✦ Development proposals are meticulously aligned with three key strategic documents: the Integrated Development Plan (IDP), the Spatial Development Framework (SDF), and the Stellenbosch Municipality Housing Pipeline.

These proposals are also carefully aligned with both the municipality's budget cycle and the provincial budget cycle.

Below are the highlights and challenges:

Table 110: Informal Settlements Highlights

Highlight	Description
Gender Based Awareness	Upgrading of the road infrastructure and furniture. Increase community engagement, safety and improved lighting. The aim was to increase gender-based awareness.
Normstorm Project	Collaboration between Stellenbosch municipality, a Swedish Municipality (Jönköping) and the Western Cape Department of Education.
Strongyard Project	Urban redesign of the area for improved recreational use. The latter included a play park (for young and old) and additional ablution facilities.
Langrug Dam / Erf 3229 Project	Relocating the dam inhabitants to a safer location and providing more than 95% of the relocatees with grid electricity for the first time.

Table 111: Informal Settlements Challenges

Challenge	Actions to address
Staff capacity	Vacant positions were advertised during the last quarter of the 2024/25 financial year. It is expected that these positions will be filled during the 2 nd quarter of 2025/26.
Lack of decanting sites for upgrading projects	The revision of existing policies, along with the housing projects that will be initiated during the 2025/26 financial year and subsequent years, is underway.
Slow progress with housing projects	Informal settlement densification and integration with the housing pipeline.
Rapid urbanisation	There will be increased and improved monitoring of informal settlements, along with the implementation of densification methods.
No space to provide basic services	Potential re-blocking projects.

3.2.9 HOUSING ADMINISTRATION

3.2.9.1 Transfer of housing stock

During the period under review, the municipality continued with the process of dealing with the historic backlog and transfer of properties to beneficiaries of state-subsidised houses. A process action plan was devised in terms of which administrative procedures would be streamlined. A panel of attorneys was appointed to assist with the transfer of the identified properties.

A total of 219 title deeds were transferred for the 2024/25 financial year. The transfers were completed in the following areas:

Table 112: Transfer of housing stock

Area	Total
Cloetesville	20
Kayamandi	173
Klapmuts	7
Franschhoek	1
Mooiwater	1
Pniël	1
Kylemore	9
Longlands	7
Total	219

Table 113: Total properties registered at the deeds office (during 2024/25)

Total properties registered at the deeds office (during 2024/25)	
Historical project title deeds registered	212
New project title deeds registered*	7
Total Erven	219

* Funding for the title deeds was provided through the Title Deed Restoration Programme. It is only given for houses with approved subsidies.

The Section: Housing Administration is conducting continuous Housing Consumer Education (HCE) programmes with affected beneficiaries and addressing issues around title deeds. The municipality also appointed temporary field workers to assist with beneficiary administration, which includes tracing beneficiaries and conducting occupation surveys to ensure that title deeds are registered correctly.

Stellenbosch Municipality has entered into a partnership with an NGO named Khaya Lam, which assists municipalities across the country to transfer houses still in municipal ownership but originally intended for transfer to the beneficiaries. They have assisted the municipality with 2 543 transfers to date. The NGO provides funding for the temporary appointment of staff to enhance capacity, and provides funding to the municipality per the title deed registered. The donation is used to appoint field workers to assist with the beneficiary's administration of the transfer processes.

3.2.9.2 Historic township establishment rectifications

The partnership with the NGO (Khaya Lam) has been extended, with the NGO providing support to finance the registration of the General Plans and the associated transfers concerning the township establishment rectifications implemented on the historic Kayamandi projects (Project 4B, Project 5A, and Project 8). This follows the acquisition of land use rights for these projects, which were developed between 1998 and 2008, as per the Municipal Planning Tribunal (MPT) approval granted in February 2023.

The table below presents these projects, which collectively comprise 280 transferable properties. The process of signing Deeds of Sale for these properties began in April 2023, culminating in a total of 167 Deeds of Sale finalised with the beneficiaries of the transferable properties by 30 June 2025. By June 2025, 163 Deeds of Sale were registered concurrently with the registration of the general plans in the

Deeds Office. The outstanding deeds of sale are prepared for submission. The remaining 116 transferable properties have yet to have their deed of sale finalised by the beneficiaries.

Table 114: Old Kayamandi Projects built between 1998 and 2008, which underwent rectifications (2024/25)

Project	Original Mother Erf	New Mother Erf	General Plan No	Land Use Right obtained	Total Transferable Properties	Total Deeds of Sale signed	Total Title Deeds registered
Project 4B Red Bricks (56 Erven)	Erf 1070, Kayamandi (GP3343/1993)	Erf 5107, Kayamandi	GP2720/23	To consolidate and subdivide into 56 erven and register the General Plan at the Office of the Surveyor General	51	24	23
Project 5A Snake Valley (184 Erven)	Erf 707 and Erf 5107, Kayamandi (GP7988/1991) and Erf 1070, Erf 5107, Kayamandi (GP3343/1993)	Erf 1980, Kayamandi – (SG 48/2024)	GP50/2024	Closure of public open space, consolidate and subdivide Erf 1980 into 130 erven (124 erven and 6 PPS) and registration of the General Plan at the Office of the Surveyor General	124	78	76
Erf 707 and Erf 5107, Kayamandi (GP7988/1991) and Erf 1070 and Erf 5107, Kayamandi (GP3343/1993)		Erf 1981, Kayamandi – (SG 49/2024)	GP50/2024	Closure of public open space, consolidate and subdivide Erf 1981 to 54 erven (51 erven and 3 PPS) and registration of the General Plan at the Office of the Surveyor General	51	29	29
Project 8 - Mpelazwe (55 Erven)	Remainder of Erf 288, Kayamandi (GP149/1987)	Erf 5106, Kayamandi (SG39/2024)	GP40/2024	Formal rezoning and subdivision completed, closure of public roads and registration of the General Plan at the Office of the Surveyor General	54	36	35
Total					280	167	163

In addition to the above township establishment rectifications, the Section: Housing Administration had identified three additional housing projects, of which the subdivision approvals have lapsed in terms of Section 27(7) of LUPA, as no properties were transferred within the prescribed legal period of 5 years from approval. The projects all date to the early 2000s.

These projects are:

- ✚ Unregistered Erf 2046, Klappmuts – a portion of the remainder of Erf 812, Klappmuts (better known as Project 52, Klappmuts);

- ✚ Unregistered Erf 15095, Stellenbosch – Remainder of Erf 6846, Stellenbosch (better known as The Steps, Cloetesville); and
- ✚ Unregistered Erf 14599, Stellenbosch, comprising a portion of Erf 8937, Stellenbosch; Remainder Erf 6852, Stellenbosch; a portion of Erf 6851, Stellenbosch; and Erf 6667, Stellenbosch (better known as Orlean Lounge, Cloetesville).

The aforesaid NGO had extended further assistance through the appointment of a land use planner and professional team, funded by Khaya Lam, to reapply for the subdivision of these three properties. This is necessary to enable the municipality to finalise the formal registration of these properties with the Surveyor-General and the Deeds Office so that the title deeds can be transferred to the intended beneficiaries.

Land Use Applications (LUAs) were drafted and submitted to the Section: Land Use Management during April 2024. The Municipal Planning Tribunal approved the applications for unregistered Erf 15095 and unregistered Erf 14599, Stellenbosch (known as The Steps / Orlean Lounge, Cloetesville) on 29 November 2025, with the decision letter being issued on 2 December 2024 and the final notification dated 20 January 2025. The application for Erf 2046, Klappmuts, obtained exemption from advertising and was circulated to the Directorate: Infrastructure Services for comment(s). This application is currently being prepared for submission to the Municipal Planning Tribunal for a final decision. These three projects have a combined total of 211 transferable erven.

The NGO (Khaya Lam) is also extending their assistance to cover the costs of the registration of these general plans. The signing of Deeds of Sale in respect of The Steps / Orlean Lounge, Cloetesville transferable properties commenced in 2024, and a total of 74 Deeds of Sale had been concluded with the beneficiaries of the transferable properties by 30 June 2025. These transfers are ready for lodgement and will register simultaneously with the registration of the general plans in the Deeds Office.

Table 115: Three projects for which new Land Use Applications have been lodged (2024/25)

Project	Original Mother Erf	New Mother Erf	General Plan No	Land Use Application submitted	Total transferable properties	Total Deeds of Sale signed
Project 52 "red roofs" Klappmuts (52 erven)	Erf 812, Klappmuts (GP3685/1999) Farm 744 of Portion 3	Unregistered Erf 2046, Klappmuts	To be established	April 2024	49	10
The Steps Cloetesville (74 erven)	Unregistered Erf 5095, Stellenbosch (GP4720/2006) Remainder Erf 6846, Stellenbosch	Unregistered Erf 15095, Stellenbosch	To be established	April 2024	72	30
Orlean Lounge (91 Erven)	Unregistered Erf 14599, Stellenbosch (GP4717/2006) comprising a Portion of Erf 8937, Stellenbosch Remainder of Erf 6852, Stellenbosch, a portion of Erf 6851 SB and Erf 6667 SB	Unregistered Erf 14599 SB	To be established	April 2024	90	44
Total					211	84

In addition to the aforementioned historic township establishment matters, it came to the attention that anomalies occurred in certain of the developments within the Kayamandi township area, where more than one dwelling was constructed on properties that were not subsequently subdivided, resulting in the inability to effect transfer to their beneficiaries. In collaboration with the Section: Housing Development, a Formal Quotation (FQ) process was followed to appoint a suitably qualified service provider to perform an investigative study in respect of the identified properties and to propose development applications to rectify the matters.

Properties identified in this regard are:

- **Erf 292, situated between Swentu and Sokuqala Streets, Kayamandi**, a portion of the re-layout of Erven 2, 23 and 25, Kayamandi, depicted on LG plan no. 72/1989 comprises four houses. This property is still reflected as a portion of the original Remainder Erf 288 KM (which was Farm 1259 Stellenbosch).

Figure 22: Erf 292

- **Erven 1072, 1073, 1076 and 1077 (situated at 11 and 13 Mjandana Street and 32 and 30 13th Close), Kayamandi**, are all portions of Erf 1070, Kayamandi, as depicted on General Plan 3443/1993 (Erf 1070 KM as per Diagram no. 11135/92). These four properties each have two houses constructed on them, resulting in four properties comprising eight houses.

Figure 23: Erven 1072, 1076, and 1077

The scope of works entailed an investigation into the stipulated properties located on two project sites, based on their geographic location and General Plans, in terms of the stipulated objective, being:

Table 116: Scope of works of Site A and B

Site A	Erf 292, Kayamandi, a portion of the re-layout of Erven 2, 23 and 25, Kayamandi
General Plan	LG plan no. 72/1989
Location	The property is situated between Swentu and Sokuqala Streets in Kayamandi.
Objective	Investigate subdividing the property into four portions with possible departures.
Site B	Erven 1072, 1073, 1076 and 1077, Kayamandi, which are all portions of Erf 1070, Kayamandi
General Plan	General Plan 3443/1993
Location	11 and 13 Mjandana Street and 32 and 30 13 th Close, Kayamandi
Objective	Investigate subdividing each property into two portions with possible departures.

Plan4SA (Pty) Ltd were appointed and delivered their investigative report on 31 March 2025.

3.2.9.3 Title Deed handovers

A total of 127 title deeds were handed over in the 2024/25 financial year.

On 21 November 2024, the Executive Mayoral Committee members handed over 35 title deeds to the beneficiaries of Snake Valley Maisonettes at a formal event held at the Amazink facility in Kayamandi.

On 25 March 2025, the Executive Mayor, Cllr Jeremy Fasser, handed over 25 historic title deeds to their rightful beneficiaries residing in Cloetesville at a formal handover event held at the Eike Hall, Cloetesville.

The transfer of these title deeds is a testament to the municipality's commitment to improving the lives of its residents and fostering a community where everyone has the opportunity to own their home and participate fully in the economy.

Figure 24: Title deed handover in Kayamandi (Snake Valley Maisonettes) on 21 November 2024

Figure 25: Title deeds handed over in Cloetesville on 25 March 2025

Executive Mayoral Title Deed Handover: Cloetesville 25 March 2025

Executive Mayor Jeremy Fasser handed over historic title deeds to recipients in Cloetesville.

3.2.9.4 Housing Demand Database (housing waiting list) Administration

The Section: Housing Administration continues with the “data-cleaning” process of applications that appear on the housing waiting list, where vital information is outstanding. An area-based approach was used where staff members went out to the various areas and invited applicants to a workshop during which the applicants’ information was updated. The entire Stellenbosch municipal area was covered during this programme.

The agreement with the Provincial Department of Infrastructure (PDol) to assist with the data clean-up of the Stellenbosch municipal waiting list continues. The waiting list is updated and verified regularly by the PDol to ensure that the number of people deemed to be on a “waiting status” is a true reflection of those persons who still require housing assistance within the greater Stellenbosch area.

The Western Cape Housing Demand Database has undergone an upgrade, allowing online applications, as well as the additional function of adding documentary proof. Stellenbosch Municipality has aligned itself with this software in the capturing of all housing demand data applications. The Housing Demand Database System is being updated regularly to ensure that the Council has credible data for planning future housing projects to be implemented.

The Section: Housing Administration also continues with its outreach programme to update the Housing Demand Database, reaching various areas within the Stellenbosch Municipal area. The outreach programme aims to bring services closer to the people, mainly the elderly, disabled, and unemployed community members who have limited resources to reach municipal offices. The programme reaches the communities in their respective areas to assist them with applying or updating their application on the Housing Demand Database.

Table 117: A total of 974 people were assisted during 2024/25 through the outreach programme

Housing Demand Database		
Areas	Dates	Nr of People Assisted
Jamesstown	25 January 2025	441
Wemmershoek, Franschhoek	15 February 2025	85
Lanquedoc	15 and 22 March 2025	448
Total		974

3.2.9.5 Housing Consumer Education (HCE)

The Housing Consumer Education programme was held for beneficiaries of houses that were built between 1994 and 2014. These are houses that form part of the Title Deeds Restoration Programme. These beneficiaries are advised about the security of tenure, issues of inheritance, and the drafting of a will.

A total of four (4) HCE workshops were held during the 2024/25 financial year, inclusive of those held before formal title deed handovers, outreaches for the signing of deeds of sale, and anti-social behaviour for tenants. This total excludes those HCE sessions held with individual recipients of title deeds and the day-to-day walk-ins.

Table 118: Consumer Education Events undertaken: 2024/25

Consumer Education Events Undertaken: 2024/25			
Date	Area	Type of Consumer Education	Total Attended
16 October 2024	Nooitgedacht	Housing consumer education was conducted with the Nooitgedacht beneficiaries in preparation for their title deed handover.	16 (Housing Consumer Education)
30 October 2024	Kayamandi (Amazink)	Housing consumer education was conducted with the Kayamandi (Snake Valley Maisonettes) beneficiaries in preparation for their title deed handover.	59 (Housing Consumer Education)
16 November 2024	Kayamandi (Corridor)	Housing consumer education was conducted with Kayamandi beneficiaries in preparation for their Title deed handover.	16 (Housing Consumer Education)
13 February 2025	Eikehall, Cloetesville	Consumer education was conducted with Cloetesville beneficiaries in preparation for their title deed handover.	41 (Housing Consumer Education)

3.2.9.6 Administration of Public Rental Stock

The Council adopted the Policy for the Administration of Public Rental Stock, developed through collaboration between various stakeholder departments within the municipality. The purpose of this policy is to ensure effective management of municipal assets and to improve the quality of life for residents.

The Staff Rental Housing Opportunity Policy (2024) has since been approved by Council and is already being implemented. In addition, the draft Housing Administration and Allocation Policy, which will include the allocation and management of public rental stock, is currently under review and will be submitted to Council for deliberation and adoption after the necessary public participation processes.

To strengthen community involvement and address challenges in rental areas, a caretaker programme was implemented across public rental stock. This initiative encourages communities to

reclaim ownership of their neighbourhoods while improving communication between the municipality and tenants. A total of eleven (11) caretakers have been appointed to date.

Complaints regarding anti-social behaviour or breaches of lease agreements are referred to the Section: Legal Services for appropriate action. In certain cases, the municipality has already obtained eviction orders, while in others, legal proceedings are currently underway to secure eviction orders for tenants involved in persistent anti-social behaviour.

Furthermore, the municipality conducted a comprehensive audit of all rental properties, encompassing both staff and public units, with an emphasis on occupancy status. Where discrepancies were identified, interviews were conducted with the affected households, and lease agreements were executed with the next of kin of the deceased tenants. The findings were verified against records from the Directorate: Financial Services to confirm their veracity. This process further allowed the municipality to assess whether unlawful occupants met the criteria for legalisation in accordance with the Housing Administration and Allocation Policy.

Evictions within municipal rental properties are undertaken only as a final measure, following the exhaustion of interventions such as warning notices, tenant consultations, and educational sessions. The procedure is both time-consuming and expensive, yet essential to guarantee adherence to established standards and policies. Cases submitted to the Section: Legal Services generally concern tenants who consistently violate rental agreements or participate in significant anti-social behaviour.

Between July 2024 and June 2025, a total of 8 public rental and 26 staff rental eviction cases were processed, with certain cases already finalised. These figures underscore the persistent challenges and resource considerations involved in enforcing tenancy compliance while ensuring the safety and orderliness of municipal rental communities.

3.2.9.7 Maintenance of Rental Stock

The Section: Housing Administration has integrated the Council's complaints system, enabling effective monitoring of all complaints related to municipal rental stock. The section is responsible for the maintenance of 750 rental units, 1 070 Temporary Residential Areas (TRAs), and 26 plywood hostels in Kayamandi (originally built in 1976 for migrant labourers).

The ongoing attendance to routine, urgent, and emergency maintenance requests, covering both minor and major repairs. Notably, over 150 new geysers, baths, tiles, and other improvements have been installed to enhance the condition of the municipality's rental units.

In addition to day-to-day maintenance, the section has also successfully implemented several major projects. These include:

- ✦ The construction of fencing at municipal flats in Rhode Street, Cloeteville, as well as the installation and replacement of vibracrete in Ida's Valley, to the value of R2.8 million;
- ✦ The eradication of asbestos roofs at the Kayamandi Hostels (Phase 1) is valued at R2.6 million. This project involved the safe removal and disposal of the asbestos material; and
- ✦ An additional R600 000 investment for the installation of new Kliplock roof sheets at Monterey and Melody flats. This was necessary, as the units were severely leaking during rainfall, and the old roofs had to be removed and replaced to ensure safe and durable housing conditions.

The municipality acknowledges that years of neglect have created significant challenges. However, the municipality remains committed to making continuous improvements and strives daily to provide

safer, healthier, and more dignified living conditions for tenants.

Table 149: Projects concluded at municipal rental stocks.

Area	Description of Project	Photos
2ND Avenue, Kayamandi Hostels	<ul style="list-style-type: none"> The Phase 1 of the project to eradicate asbestos roofs, , Completed 6 hostels the 2024/25 financial year. Phase 2 of the project will be completed during the next financial year with an additional eleven (11) hostels. 	
Rhode Street Cloetesville Flats	Construction of new fencing and gates to improve security along the boundaries and parking areas at Monterey, Melody, Monte Christo, and Mount View in Cloetesville. This project was conducted to protect tenants against crime.	
Units 13 and 14 Monterey Flat, Rhode Street	The project involved the safe removal and disposal of the asbestos roof, followed by the installation of a new roof. The units were severely leaking when it rained.	

Area	Description of Project	Photos
10 burnt houses in Cloetesville	A consultant was appointed to undertake conditional assessments and provide a Bill of Quantity (BOQ) to appoint a contractor to work on the damaged houses. The process is at an advanced stage.	

Cleaning the rental stock

The rental stock is maintained with the support of Expanded Public Works Programme (EPWP) workers, who assist with cleaning services. In addition, grass-cutting teams are deployed monthly across public rental areas to revitalise and beautify the surroundings. Key focus areas include Lapland in Jan Cilliers Street (Lavanda, Aurora, and Phyllaria flats), Lang Street blocks F–J, Kloof Street blocks A–D, municipal flats in Rhode Street (Melody, Monetary, Mount View, and Monte Christo), as well as the maisonettes located in Eike, Primrose, Pine, and Jakaranda Streets.

Figure 29: Cleaning services rendered at Rental Stock

3.2.9.8 TRA Management

The municipality is required to manage all issues concerning informal settlement areas with efficiency and professionalism, as stipulated by various pieces of legislation. The municipality manages and oversees 1 433 Temporary Residential Area (TRA) units within the Stellenbosch municipal area, aiming to ensure that every informal settler has access to basic services and accommodation.

The Section: Informal Settlements within the municipality enables evictions, conducts household surveys, manages levies, and provides service-related assistance by directing complaints to the relevant user departments. Additionally, it offers assistance to households until their transition to a formal housing project is complete.

The table below illustrates the distribution of households across the TRAs:

Table 119: TRA Statistics

Area	Number of households
Mandela City, Klapmuts	243
La Rochelle, Klapmuts	35
Devon Valley	30
Longlands, Vloottenburg	81
Mountainview, Jamestown	196
Watergang TRA 1, Kayamandi	262
Watergang TRA 2, Kayamandi	325
Meerlust Bosbou, Franschhoek	33
Curry Street TRAs, Cloetesville	5
Kloof Street TRAs, Cloetesville	4
Erf 3229 Mooiwater, Franschhoek	219
TOTAL	1 433

3.2.9.9 Job Creation

A job creation programme was initiated via the Expanded Public Works Programme (EPWP), and as a result, 41 job opportunities were created, listed below:

- ⚙️ Twenty (20) EPWP workers were appointed to assist with the cleaning of municipal rental stocks, and these efforts resulted in a decrease in complaints received from tenants as properties were in a neater state;
- ⚙️ Four (4) temporary field workers were also appointed to assist with the surveys of rental stock, temporary residential areas, and emergency housing. This was to ensure that the correct tenants occupied the flats and to identify issues like subletting or illegal activities;
- ⚙️ Eight (8) Title Deeds Restoration Programmes were also initiated to assist with the transfer of state-subsidised houses and to eradicate the historic backlog in terms of the transfer of these houses;
- ⚙️ Two (2) administrative assistants were appointed to deal with complaints and document management;
- ⚙️ Six (6) artisan assistants were appointed to assist the artisan carpenter and artisan plumber in the execution of their respective duties; and
- ⚙️ One (1) driver was appointed to deal with courier and transport services.

3.3 PROPERTY MANAGEMENT

This department is responsible for the contract management (leasing) and maintenance of all council-owned administrative buildings and the construction / project management of all upgrading and / or new facilities.

Some of the highlights of the past financial year include the following:

- ✚ Various fencing projects were successfully implemented and completed on Tender B/SM 13/22 Supply and Erection of Fencing on an 'As and When Required' Basis: Term Tender for Period Ending 30 June 2025. The tender limit was reached; therefore, the tender was terminated. The tender ended on 30 June 2025, and a new tender, B/SM 06/24, was advertised and awarded, and new projects have commenced on this tender;
- ✚ Various installations of new air conditioners and repair and maintenance of air conditioners were done under Tender B/SM 20/22; the tender lapsed on 30 June 2025. New Tender B/SM 94/25 was advertised, and service providers will be appointed;
- ✚ The quantity surveyor tender for the renovation and structural maintenance of the Jamestown Ward Office and Library was successfully awarded, and a service provider was appointed (B/SM 22/24 – Professional Services). The construction tender was awarded under Tender B/SM 26/25 and was successfully completed;
- ✚ A professional architect to draft building plans on Erf RE 194 Hoffman Street, Stellenbosch, was successfully awarded, and a service provider was appointed (B/SM 36/24 – Professional Services). The contractor was appointed under tender B/SM 25/25, and the work is ongoing;
- ✚ The appointment of an architectural professional / principal agent for Millennium Hall on Farm 14/1674 Pniël-Stellenbosch was successfully awarded, and a service provider was appointed (BSM-40-24 – Professional Services). Work is ongoing; the contractor was appointed under tender B/SM 24/25, and the work is ongoing;
- ✚ Appointment of a structural engineer for the Makupula Hall renovations (professional services) was awarded and appointed under Tender B/SM 50/23.SE.9; the contractor for the work will be appointed in the 2025/26 financial year;
- ✚ The appointment of a structural engineer for an assessment on the waterproofing and rainwater runoff at the NPK Building, Stellenbosch, was successfully awarded and appointed under Tender B/SM 50/23.SE.5, the contractor for the construction work was awarded and appointed under Tender B/SM 27/24; the work was successfully completed;
- ✚ The tender for Phase 1 Structural, Electrical, Fire, Compliance, and Roof Replacement for the upgrade of the Beltana Depot to appoint a Construction Contractor was successfully awarded and appointed under tender B/SM 113/24. Work will be completed in the first half of the 2025/26 financial year;
- ✚ FQ Replacement of flooring at the municipal manager's office and La Motte Fire Station was successfully awarded and completed under FQ 14/25;
- ✚ The appointment of a quantity surveyor who will also act as a principal agent for the NPK Building and Stellenbosch Townhall Complex refurbishments was successfully awarded and appointed under Tender B/SM 74/25. The construction contractor will be appointed in the 2025/26 financial year;
- ✚ Tender B/SM 115/24 Rental of Indoor Plants for the Period Ending 30 June 2027 was successfully awarded, and a service provider was appointed;
- ✚ Eerste River Flood Rehabilitation Structures Agricultural Hall (Tender B/SM 27/24) was successfully completed;
- ✚ Professional architect monitoring and overseeing heritage building works / alterations / upgrades (B/SM 31/23) was completed; and

- ✚ Drafting of 'as built' building plans for the Municipal Townhall Complex (FQ 130/24) was successfully completed.

The planning phase of the following projects started or was finalised:

- ✚ Appointment of the lift service providers under Tender B/SM 50/25;
- ✚ Appointment of the Air Conditioning Service Provider under Tender 94/25;
- ✚ Appointment of a structural engineer for the Makupula Hall renovations (professional services);
- ✚ Waterproofing Remedial Construction Work to the NPK Building (Construction Work);
- ✚ Renovation and Structural Maintenance of Jamestown Ward Office and Library (Construction Work);
- ✚ Phase 2: Appointment of a construction contractor for the Beltana Upgrade;
- ✚ Appointment of a construction contractor for the external renovation of the NPK Building and windows and doors at the Municipal Town Hall Complex;
- ✚ Appointment of a quantity surveyor that will also act as a principal agent for the renovation of the Franschhoek Admin Offices and Townhall;
- ✚ Appointment of the service provider for the hygienic services;
- ✚ Appointment of a service provider for the supply and delivery of plumbing equipment;
- ✚ Appointment of a service provider for pest control service;
- ✚ Lift service for the lift at the Klappmuts Multi-Purpose Centre (B/SM 76/23) was completed; and
- ✚ Lift Service for the Plein Street Lift (B/SM 28/22) was completed.

The following projects are in ongoing phases:

- ✚ Hygienic Services for the Municipal Buildings (B/SM 13/24);
- ✚ Office furniture acquisitions (B/SM 91/23);
- ✚ Plumbing materials and equipment acquisitions (B/SM 51/23);
- ✚ Installations of new air conditioners, repairs and maintenance (B/SM 20/22);
- ✚ Pest Control Services (B/SM 44/22);
- ✚ Indoor plants (115/24); and
- ✚ The Fencing Tender (B/SM 06/25).

Various projects / acquisitions were processed under the following term tenders:

- ✚ Furniture, tools, and equipment;
- ✚ Plumbing materials and equipment;
- ✚ Air conditioners;
- ✚ Indoor plants (monthly service);
- ✚ Municipal Lift (monthly service);
- ✚ Hygienic Services (monthly service); and
- ✚ Fencing.

The following term tenders / quotations were awarded:

- ✚ The supply, delivery, and fitting of office furniture for Stellenbosch Municipality ending 30 June 2026 was successfully awarded, and service providers were appointed (B/SM 95/23);
- ✚ The service provider for the installation of handrails at Lapland Flats Ramps was successfully appointed (FQ 122/24);
- ✚ Hygienic Services Provider for Municipal Buildings was successfully appointed (B/SM 13/24);
- ✚ Fencing tender B/SM 06/24;

- ✚ The quantity surveyor for the renovation and structural maintenance of the Jamestown Ward Office and Library was successfully awarded, and a service provider was appointed (B/SM 22/24 – Professional Services);
- ✚ Construction Tender was awarded under Tender B/SM 26/25 for the renovation of the James Town Library and Ward Office;
- ✚ Supply, delivery, and offloading of plumbing materials, plumbing tools, and irrigation items. Service providers were appointed (BSM 51/23);
- ✚ A registered air conditioner service provider for call-out and diagnostic services was successfully appointed;
- ✚ Tender B/SM 06/24 Supply and Erection of Fencing on an 'As and When Required' Basis: Term Tender for Period Ending 30 June 2028;
- ✚ Tender B/SM 26/25 Renovation and structural maintenance of the Jamestown Ward Office and Library;
- ✚ Tender BSM 24.25 Maintenance and upgrades of the Millennium Hall on Farm 141674, Pniël.
- ✚ Tender B/SM 50/23 50/23.SE.9; Appointment of a Structural Engineer for the Makupula Hall Renovations (Professional Services);
- ✚ Tender B/SM 113/24 for Phase 1 Structural, Electrical, Fire, Compliance, and Roof Replacement for the Upgrade of the Beltana Depot;
- ✚ FQ Replacement of flooring at the municipal manager's office and La Motte Fire Station was successfully awarded and completed under FQ 14/25;
- ✚ Tender B/SM 70/25 Appointment of a Quantity Surveyor that will also act as a Principal Agent for the NPK Building and Stellenbosch Townhall Complex Refurbishments;
- ✚ Tender B/SM 115/24 Rental of Indoor Plants for the Period Ending 30 June 2027;
- ✚ Tender-BSM 114/24 Appointment of an architectural professional with heritage experience for the renovation of the municipal court;
- ✚ Tender B/SM 70/25 Renovations and alterations to the Municipal Court Building, Erf 528, 35 Mark Street, Stellenbosch; and
- ✚ Various small contractors were appointed under Tender B/SM 85/24.

The table below indicates the capital expenditure for the Section: **Property Management and Building Maintenance** as at **30 June 2025**.

Table 120: Capital Expenditure as at 30 June 2025: Section: Property Management and Building Maintenance

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Structural Maintenance / Upgrade: Beltana	16 155	15 884	1.68%
Structural Upgrade: Jamestown Economic Hub	3 246	3 195	1.57%
Structural Improvement: General	8 524	2 925	65.69%
Structural Upgrade: Heritage Building	2 254	2 087	7.41%
Upgrade Millennium Hall Pniël	2 031	1 335	34.29%
Only the five largest capital projects are listed.			

The Section: Property Management and Building Maintenance has spent **80%** of its capital budget for the financial year.

The table below indicates the total number of employees in the Section: Property Management and Building Maintenance.

Table 121: Total number of employees in the Section: Property Management and Building Maintenance

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	0	0	0	0
14 – 17	1	0	1	0
9 – 13	9	3	6	66.6
4 – 8	11	8	3	27.2
3 – 0	0	0	0	0
Total	21	11	10	47.6

3.4 COMPONENT B: ROADS, TRANSPORT, AND STORMWATER

3.4.1 ROADS

To enhance mobility within the municipality, various measures are implemented to alleviate congestion and increase accessibility for residents, marginalised groups, tourists, students, and the economic and industrial sectors. This component functions as a strategic mechanism for expedited economic growth; roads also facilitate safety measures, including access to fire, emergency and disaster services; mobility for public transport and goods; and a secure environment for individuals utilising non-motorised transport or walking. The Stellenbosch Municipal area is experiencing developmental transitions, and designated initiatives will facilitate residential living and transportation. Consequently, the municipality's transport plans include the development of a sustainable road network, which entails constructing new roads to link existing ones and enhancing intersections, among other initiatives.

The municipality effectively addressed the flood-affected areas and the damage to transport infrastructure during the floods in June and September 2023. The damage incurred includes eroding riverbanks, exposed and jeopardised building foundations, damaged and washed-away bridges, undermined roadways and river protection structures, and compromised stormwater systems. The damage assessed in the flood-affected areas exceeds R100 million. Nevertheless, the municipality promptly acted to stabilise and repair immediate needs, with subsequent plans for long-term restoration and improvement of the stormwater systems.

3.4.2 STRATEGIC TRANSPORT PLANNING

3.4.2.1 Comprehensive Integrated Transport Plan (CITP)

The CITP presents the municipality's long-term transport vision and objectives, as well as the annual action plans and projects that would enable the municipality to realise its transport vision. The CITP will be synchronised with the annual updating of the IDP.

A current review (2023-2028) of the CITP represents the 5-yearly overhaul of the plan and requires, inter alia, that:

- ✦ Every aspect of the previous CITP must be re-examined to see if it is still up-to-date;
- ✦ The previous CITP is revised and updated where necessary, and relevant new aspects are added;
- ✦ An update of the Transport Register should be prepared;
- ✦ It reflects revisions of the municipality's SDF, Roads Master Plan, and NMT Master Plan;
- ✦ It provides a revised Public Transport Plan dealing with the restructuring of the public transport network of services; and
- ✦ It provides an update on progress made with previously proposed action plans and projects and proposes additional plans and projects.

The 2023-2028 review of the CIP has been finalised and approved by the Council in 2023.

3.4.3 TRANSPORT STUDIES

Recently concluded the following transport studies:

A Freight Strategy Study has also been concluded. This study assesses routes typically utilised by freight vehicles in, around, and through the Stellenbosch Municipal Area to develop a strategic freight network.

The municipality has concluded studies regarding the development of a business model for an **Inclusive Public Transport Service** that would serve people with disabilities in Stellenbosch.

3.4.4 TRANSPORT STUDIES CURRENTLY UNDERWAY

Concept planning studies have been undertaken for proposed **Park-and-Ride Facilities** located on the outskirts of the urban area; the following studies are earmarked for the near future:

- ✦ Feasibility, undertake further design processes; determine institutional and other required arrangements;
- ✦ Determine the most appropriate operational model that would be associated with the park and ride facilities; and
- ✦ Determine the possible long-term phased implementation programme.

ATC Transport Studies are currently underway to ascertain the required levels of accessibility within the corridor, as well as the mobility requirements surrounding main roads. The ATC Transport Studies align with the approved ATC MSDF and guidelines by, among other things, promoting public transport and non-motorised transport (NMT) within the corridor; the compilation of a Public Transport Plan that sets out the incremental measures required to improve public transport services within the municipal area is currently underway. In line with the municipality's Transport Strategy and council resolution previously taken.

The municipality's approved CIP had highlighted the need for a **Public Transport Plan**. The objective of the Public Transport Plan is the integration of the public transport network and the integration of services and models of transport.

The compilation of the **Transport Plan** is currently underway. It includes studies, assessments and investigations on policy, strategy, the public transport network and public transport services. The plan will be used as a basis for rationalising and restructuring the public transport system, designing contracts for contracted services and the awarding of operating licences. Ultimately, the plan will propose measures for the improvement of public transport services in Stellenbosch.

3.4.5 ROADS, TRANSPORT AND PLANNING

The municipality approved its Non-Motorised Transport (NMT) Master Plan and Policy in 2022. The NMT Master Plan and Policy is a review, consolidation, and update of the NMT policy and NMT network and cycle plans, which were compiled in 2015.

The NMT Master Plan and Policy strive to promote and encourage alternative modes of transport, such as walking and cycling. They also aim to analyse the capacity of the current network, identify

current and future NMT needs, and recommend improvements that will ensure an effective NMT network.

The NMT Master Plan and Policy further strive to position NMT as a consistent long-term municipal priority. The strategic objective of the NMT Master Plan is the implementation of a coherent, logical, and integrated NMT network for Stellenbosch.

The municipality has approved its Sidewalk Accessibility Policy (2023), which aims to improve sidewalk management and strive towards a safe environment for all users. The policy puts procedures in place that would improve safety and make sidewalks more accessible and user-friendly for pedestrians.

The main road networks through Stellenbosch currently operate at capacity and at times beyond capacity, resulting in traffic congestion. Analysis of the road networks and assessments of the public transport operations and facilities are periodically carried out to identify shortcomings and opportunities for improvements. The municipality has approved its Road Master Plan (RMP) in 2022, which analyses the capacity of the current network and current and future needs and recommends infrastructure improvements that will aid in establishing an effective road network.

The municipality has compiled its Road Transport Safety Master Plan (RTSMP). The Road Transport Safety Master Plan is a review, consolidation, and update of the Transport Safety Master Plan (TSMP), which was compiled in 2015. The TSMP includes an audit of traffic safety interventions and identifies priority projects with low- to medium-cost engineering measures such as traffic calming, speed monitoring, roundabouts, etc., for implementation.

Extensive investigations, assessments, and analyses are undertaken when compiling master plans. The outputs of master planning are used to inform strategic plans, such as the CIP. Outputs from master plans also aid other municipal decision-making processes.

3.4.6 ROAD CONSTRUCTION AND INTERSECTION UPGRADES

To reduce the effects of congestion, improve traffic flow, and increase traffic safety at intersections within Stellenbosch, various intersections were upgraded by the municipality through the Intersection Improvement Programme that commenced about 10 years ago.

The following improvements have been completed in the 2024/25 financial year:

- ✦ Construction of R44 / Voliere Intersection; and
- ✦ Construction of Phase 1 of the R44 / Webersvallei Road Intersection.

The following intersection and road upgrades are currently in various stages of planning and design:

- ✦ Lower Dorp Street and its intersection with Strand Road (R44) and Adam Tas (R310);
- ✦ Adam Tas and R44 / Alexander;
- ✦ Adam Tas and R44 / Merriman;
- ✦ Phase 2: R44 / Helshoogte;
- ✦ Dualling Bird Street between R44 and Kayamandi;
- ✦ R45 / Le Roux Street Intersection;
- ✦ Extension of Wilderbosch Road to Trumali;
- ✦ Techno-Park and Adam Tas Link Road;
- ✦ Minor Road Improvement, Klapmuts; and
- ✦ Road development at the Jamestown Schools precinct.

3.4.7 Road Reseal

During the 2024/25 financial year, the municipality resealed portions of the following:

Table 122: Road Rehabilitation

	Name	Length (m)	Width (m)	Area (m2)
Franschhoek	Akademie	50	6.5	325
	Dirkie Uys	50	6	300
	Fabriek	234	7	1 638
	Anna Marie	139.84	5	699.2
		473.84		2 962.2
Stellenbosch	Terentaal	80	6.7	536
	Jan Fiskaal	150	6.7	1005
	Fisant	350	6.7	2345
	Dagbreek	350	6.7	2345
	Hospital	120	6.7	804
	Roux	123	6.7	824.10
	Omega	380	6.7	2 546
	Reyger	170	6.7	1 139
	Uitsig	105	6.7	703.5
	Thiery	140	6.7	938
	Meerlust	165	6.7	1 105.5
	Blumberg Drive	57	6.4	364.80
		2 190		14 656
Total L(m) =		2 663.84m		17 618.20

3.4.8 Non-Motorised Transport (NMT)

In line with the municipality's NMT Master Plan, NMT infrastructure was rolled out and implemented to ensure the continuous expansion of the NMT network.

During the 2024/25 financial year, sidewalks were constructed along portions of the following roads:

Stellenbosch CBD and Surrounding:

↑	Merriman Avenue	250m
↑	Andringa Street	120m
↑	Banghoek Road	200m
↑	Bird Street	100m
↑	Dennesig Street	900m
↑	Paul Kruger Road	100m
↑	Hofman Road	300m

Total of NMT Upgrades: 1 970m

3.4.9 Parking

The municipality embarked upon several interventions to improve the provision of parking in Stellenbosch CBD and Franschhoek. These interventions comprise the following:

- ⚙️ Reviewing and improving the parking management model and the leasing of parking areas for improved management of these facilities;
- ⚙️ It was completed in December 2024. A new parking facility has been constructed in the Franschhoek central area. The new parking facility offers free parking for approximately 80 vehicles;
- ⚙️ To support businesses and improve parking availability in the central area, the municipality has implemented paid parking along the Main Road of Franschhoek; and
- ⚙️ Feasibility studies and associated works for the establishment of a possible public-private partnership (PPP) project to implement and manage a bulk parking facility in Stellenbosch.

3.4.10 TRAFFIC SIGNALS

Stellenbosch Municipality, in collaboration with Stellenbosch University, continues with research and development to establish a real-time traffic signal control system for Stellenbosch. A pilot project was also launched with one of the local technology companies, namely QUEBIT (in collaboration with SYNTELL), to implement and monitor the impact of synchronising the R44 southbound from Trumali Road to Annandale Rd. This research will assist in addressing everyday congestion through the application of Smart Transportation Technology, namely Traffic-Adaptive-Signal-Control (TASC). TASC refers to the real-time control of signalised intersections and enables the real-time adjustment of traffic signal timing to increase vehicle flows through the intersection, thereby reducing congestion.

During the 2024/25 financial year, traffic signal systems were upgraded, and devices were installed that would improve vehicle detection and protect the municipality's traffic signal infrastructure via the installation of SMARTLOCK underground chambers at the following intersections:

- ⚙️ R310 Adam Tas Road and Vredenburg Road (Install SMARTLOCK Chambers);
- ⚙️ R310 Adam Tas Road and Devon Valley Road (install SMARTLOCK Chambers);
- ⚙️ R310 Adam Tas Road and Oude Libertas Road (installed SMARTLOCK Chambers);
- ⚙️ R310 Helshoogte and Cluver Street (install Ai Tricams);
- ⚙️ R44 and R304 (install Ai Traficams);
- ⚙️ R44 Strand Road and R310 Adam Tas Road (install Ai Traficams); and
- ⚙️ R44 and Technopark Road (install Ai Traficams).

During the 2024/25 financial year, the following traffic signal upgrades (traffic signal controllers were upgraded from Movac 4 to the latest MX technology, including signal head replacement and Traficams installations) were done at the following listed sites that were transferred from the Western Cape Government, Department of Infrastructure, to Stellenbosch Municipality:

- ⚙️ R44 and R101 (Klapmuts);
- ⚙️ R304 and Bottelary Road;
- ⚙️ R310 and Annandale; and
- ⚙️ R310 and Vlottenburg.

3.4.11 PEDESTRIAN CROSSING

During the 2024/25 financial year, pedestrian crossings were implemented.

	Tarentaal Road	1x raised pedestrian crossing
	Mjanda Street (Ikhaya Primary)	1x raised pedestrian crossing
	George Blake Road	1x convert speedhump to raised pedestrian crossing
	Lang Street	1x raised pedestrian crossing

3.4.12 TRAFFIC CALMING IMPLEMENTATION

During the 2024/25 financial year, traffic calming interventions were implemented along the following roads:

Franschhoek

	Dirkie Uys Street	1x speedhump
---	-------------------	--------------

Groendal

	Lavender Street	1x speedhump
	Beau Coup De'leau Street	1x speedhump

Kylemore

	Williams Street	1x speedhump
---	-----------------	--------------

Kayamandi

	Snake Valley	1x speedhump
	Zone O	2x speedhump

Onder Papegaaiberg

	Fisant Street	1x speedhump
---	---------------	--------------

Klapmuts

	Cloete Street	1x speedhump
	Cornelius Street	1x speedhump
	Coronation Street	3x speedhump

3.4.13 BRIDGES

A new bridge is being constructed on the Lanquedoc Access Road over the Dwars River to better serve the needs of the Lanquedoc community; included as part of the project is the upgrading of the bridge and access road and the implementation of improved NMT facilities.

Two culvert bridges over the La Cotte River on Akademie and Dirkie Uys Streets, Franschhoek, that incurred damage during the September 2023 flood, have been reconstructed. Planning, designs and environmental processes are underway for the construction of three pedestrian bridges over the Stiebeuel River in Mooiwater, Langrug, and Groendal that incurred damage during the September 2023 flood.

3.4.14 ROADS STATISTICS

The following graphs provide an overview of the total kilometres of road infrastructure and non-motorised transport from 2018/19 until 2024/25.

Graph 16: Asphalt Road Infrastructure

Graph 17: Non-Motorised Transport

Dennesig's Streets Undergo Major Transformation to Pedestrian-Friendly Zone

The streets of Dennesig are being reshaped by the municipality to prioritise pedestrians and cyclists over cars, transforming the area into a safer and more welcoming space for students and residents alike. The municipality has approved several transport projects for Dennesig, financed by development contributions, aimed at shifting the neighbourhood toward a more walkable, environmentally friendly model.

Image 9: Dennesig's Street Upgrade

These developments encompass the introduction of "woonerfs," a Dutch-inspired street design that prioritises communal spaces for all users. Rather than implementing dedicated lanes for motor vehicles, the woonerf model incorporates continuous paved surfaces, street furniture, and greenery that inherently prioritise pedestrian circulation and discourage high-speed driving. This design fosters a sense of community and advocates for non-motorised transportation as the principal mode of mobility.

Image 10: Transformation of Dennesig Street to a woonerf

The improvements extend beyond Dennesig's immediate area, enhancing connectivity throughout the town. New pedestrian sidewalks and cycle lanes are being constructed along Banhoek Road, Andringa Street, and Merriman Avenue, with a new raised pedestrian crossing planned for Bird Street. These projects will create a seamless link between Dennesig and Stellenbosch Central, enabling residents and students to walk or bike with ease and safety.

Image 11: External improvements to Bird Street and the implementation of pedestrian crossings

Construction for these transformative projects began in August 2024, and the municipality has scheduled their completion for the end of 2025, signalling a new era for Dennesig and a model for sustainable urban living.

The table below indicates the capital expenditure for the Section: **Roads, Transport, and Stormwater Services** as at 30 June 2025.

Table 123: Capital Expenditure as at 30 June 2025: Roads, Transport and Stormwater Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Lanquedoc Access Road and Bridge	33 974	34 755	-2.30%
Bridge Assessment and Design	12 286	11 990	2.41%
River Rehabilitation Implementation	6 142	5 593	8.93%
Adhoc Reconstruction of Roads (WC024)	4 665	4 656	0.18%
Public Transport Facilities (Taxi Ranks) Adhoc Upgrades	5 388	4 313	19.95%
Only the five largest capital projects are listed.			

The Section: Roads and Stormwater has spent 98% of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Roads, Stormwater, Transport, and Traffic Engineering as at 30 June 2025.

**Table 124: Total number of employees in the Department: Roads, Stormwater, Transport and Traffic Engineering**

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	3	2	1	33.3
9 – 13	21	19	2	9.5
4 – 8	41	32	9	21.9
3 – 0	40	37	3	7.5
Total	106	91	15	14.1

3.5 DEVELOPMENT SERVICES AND PROJECT MANAGEMENT DEVELOPMENT SERVICES, ASSET MANAGEMENT AND SYSTEMS AND PROJECT MANAGEMENT UNIT (PMU)

The Department: Asset Management and Wayleaves, Development Services and Project Management Unit (PMU) are responsible for technical information management, asset management, wayleave management, development services, and project / programme management in the Directorate: Infrastructure Services. The department continued to provide operational services in terms of wayleave applications, building plan assessments, land use applications, and project management.

The PMU Section spent R23 million of its capital budget in the 2024/25 financial year on various ongoing projects aimed at providing basic services to informal settlement areas and serviced sites to qualifying beneficiaries. This equated to an overall PMU department expenditure of 98.5%.

During the 2024/25 financial year, the Section: Development Services facilitated the approval of land use applications and building plans, which led to a development contribution revenue of R28 million excl. VAT (cash payments). This revenue can be used on bulk infrastructure engineering projects to create capacity to accommodate further development and broaden the municipal income base in terms of property rates and taxes.

In the same financial year, the Wayleave Management Section generated a total revenue of R851 934 through the facilitation and management of over 316 standard wayleave applications and 104 emergency wayleave applications, respectively. The sub-section continues to monitor safety and ensure the protection of municipal infrastructure services.

3.5.1 PROJECT MANAGEMENT UNIT (PMU)

Within the municipality, the Project Management Unit (PMU) dedicates itself to managing capital infrastructure projects. The unit is responsible for providing support to municipal departments to manage capital projects throughout the various stages of the project's life cycle, namely, initiation, planning, execution, monitoring, and closure. These projects included the construction of new services and houses, the provision of basic services to informal settlements, bulk infrastructure projects, and municipal facility projects.

In addition to the management of the above-mentioned function, the PMU is also responsible for functions that include:

- ✦ Development, maintenance, and improvement of project management systems, procedures, and processes for the life cycle of implementing infrastructure projects;
- ✦ Rendering specialised lifecycle project management services for all types of infrastructure projects;
- ✦ Management of cross-functional projects in conjunction with relevant departments;
- ✦ Engagement with departments in the medium- to long-term planning and budgeting of capital projects;
- ✦ Assisting with the compilation of the long-term budget for the Directorate;
- ✦ Management and reporting on infrastructure implementation projects; and
- ✦ Management of grant funding programmes (CAPEX / RSEP / ISUP / HSDG and IUDG).

During the 2024/25 financial year, the Project Management Unit managed capital projects with a combined budget of R116 100 000 excl. VAT. The department spent a total of R107 946 150 000, excluding VAT. Therefore, the PMU registered a total average expenditure of 93% across its total project **allocation within the 2024/25 financial year. This included a total IUDG expenditure of R62 301 000, including VAT**, which was 100% of the IUDG allocation. This excludes all the operational expenditure that the PMU managed and implemented during the 2024/25 financial year.

The PMU project managed the following projects for internal and external directorates during the 2024/25 financial year:

- ✦ Franschhoek Mooiwater 236;
- ✦ Housing Projects (Social housing planning);
- ✦ Kayamandi: Zone O (711), Housing Development;
- ✦ Bulk Water Supply Pipe and Reservoir: Stellenbosch;
- ✦ New Reservoir and Pipeline: Vlottenburg;
- ✦ Vlottenburg Outfall Sewer: Construction of Digteby Sewerpipe;
- ✦ Upgrading: Early Childhood Development Centres on Municipal Land;
- ✦ Upgrade Stellenbosch Library;
- ✦ Calcutta Memorial Park;
- ✦ Beautification of Parks and Cemeteries;
- ✦ Fire Station – Jamestown;
- ✦ Ida's Valley Housing Project, Erf 9445 Oak Tree Village (Gap Housing Project);
- ✦ Special Pedestrian Routes; and
- ✦ The Consultant Roster BSM 50/23 and Container Tender BSM 60/25.

The project management unit provided numerous departments with project management assistance and engineering advice throughout the year, as it aims to assist all departments that request additional services or advice.

Herewith is a brief overview of the highlights of major multi-year projects that were managed by PMU during the 2024/25 financial year:

3.5.1.1 Erf 3229: Mooiwater – Dam Rehab and TRA Franschhoek

The project aimed to create a temporary relocation site for families impacted by the planned dam rehabilitation at Langrug Informal Settlement. The selected location, Erf 3229, a previous illegal dumping site, was rehabilitated through an identified capital project completed by the PMU department. According to municipal studies, the development of a decanting site was deemed feasible. The project involved servicing approximately 219 sites with essential utilities, including water,

sanitation, electrification, and TRAs. The project has been completed, relocating 219 families from dire conditions within the Langrug Dam to the new enhanced service sites with top structures at ERF 3229. The total contract value of the project, including the TOP structures, was R30.5 million excluding VAT. The families from the dam were successfully relocated in July 2025.

Image 12: Erf 3229: Mooiwater - Dam Rehabilitation and TRA Franschhoek

3.5.1.2 Kayamandi: Zone O

This project is designed to provide 711 service sites in Zone 0, Kayamandi. The project is divided into three phases of construction. The first phase of service sites, known as phase 3, was completed in October 2024. This included 178 service sites for future top structures. The work carried out included bulk earthworks for the preparation of the top structures; construction of urban roads and stormwater management; water and wastewater reticulation services; electrical services; ducts; and related ancillary services. The next phase of the project is for the construction of the top structures (house units), with procurement of the contractor scheduled to commence in September 2025, for 170 structures.

Figure 30: Kayamandi Zone O - Completed Services

3.5.1.3 Upgrades to municipal ECD facilities

The municipal manager has identified the upgrading of municipal facilities used by private Early Childhood Development (ECD) centres as a priority project, with funding allocated accordingly.

The project is financed through the Capital Replacement Reserve (CRR) and the Integrated Urban Development Grant (IUDG). Due to funding constraints, the initial estimate of R22 million for the improvement of five facilities led to a reduction in the scope of work.

This adjustment was made to focus on addressing high-priority risks identified during the condition assessment stage. The project is currently in the procurement stage for the appointment of a contractor.

Image 13: Upgrading of Municipal ECD Facilities

3.5.1.4 Calcutta Memorial Park

The project is in the implementation stage of phase 1. Upon completion of the 4 phases, the project will yield 40 000 gravesites. The cost to implement the entire project is estimated at R196 million, excluding VAT.

The contractor for phase 1 is Umzali Civils. They were appointed in January 2025 to implement the first phase of the project, with the project construction value of R59 649 667.15.

The consultant is currently busy with the draft tender document for the second phase, which will include buildings, fencing, landscaping and ICT infrastructure.

The images below illustrate the Calcutta Memorial Park – Construction phase and the access road.

Image 14: Construction phase and access road of the Calcutta Memorial Park

3.5.1.5 Vlotenburg Outfall Sewer: Construction of Bulk Sewer and Associated Infrastructure

The municipality's objective with this project is to expand bulk sewer services to augment the capacity of the existing municipal infrastructure and accommodate both current and future development within Vlotenburg and surrounding areas.

Master planning studies undertaken by the municipality identified the need for new and expanded bulk sewer infrastructure to support the growing Digtebij / Vlotenburg community. This project entails the construction of a 1.2 km, 315 mm diameter bulk sewer main, together with associated ancillary works. The scope comprised civil works, including the installation of new bulk sewer pipelines, micro-tunnelling, and integration of the new infrastructure into the existing Vlotenburg (sewer) Pump Station system. The works were scheduled for completion within an eight (8)-month construction programme during the 2024/25 financial year. The contractor was appointed in August 2024, and construction was completed in June 2025 with a total cost of R14 million, including design and construction supervision. The two images below provide a locality and alignment overview of the project, along with selected photographs captured during the construction phase.

Image 15: Vlottenburg Outfall Sewer

Image 16: Vlottenburg Outfall Sewer construction phase

3.5.1.6 Vlottenburg New Reservoir and Pipeline

Phase one of this project is now 100% complete. This phase involved the demolition of the existing 200-kilolitre Skoonheid circular reservoir and the construction of a new 3-megalitre (ML) reinforced concrete rectangular reservoir, complete with concrete chambers, pipework, and specialised fittings. Additionally, a new 200-kilolitre reinforced concrete sump with a pump station and pump rooms was constructed, along with two new water mains. The project also included the removal of an existing asbestos cement pipeline along Polkadraai Road, the construction of a new 10-megalitre reinforced concrete reservoir, and the installation of renewable energy sources, electrical, and control cabling. Further works included the installation of stormwater management systems, as well as the construction of new access roads, parking areas, and high-security perimeter fences around the reservoirs.

Phase two of the project is currently in the design stage. This phase will involve connecting a new water main to the Phase 1 infrastructure and extending the network to a new pump station that will be built at Onder Papegaaiberg, adjacent to the existing reservoir. The construction tender for Phase 2 is expected to be advertised within the 2025/26 financial year.

Image 17: Vloffenburg New Reservoir and Pipeline

3.5.1.7 Construction of the Stellenbosch 10ml Reservoir, Bulk Water Supply, and Associated Works

The project was initiated as a result of a master planning study in response to the significant growth experienced in the northern suburbs of Stellenbosch. To support this expansion, the municipality is investing in the upgrading of its bulk water supply network.

The scope of works includes the construction of a new 154 l/s pump station, a 10 Ml reservoir, and a bulk water supply pipeline. This infrastructure will enable the transfer of water from the existing Papegaaiberg Reservoir to the new Stellenbosch Reservoir, which will be situated above the Kayamandi area, thereby strengthening water service delivery to the rapidly growing northern region of Stellenbosch. The overall project investment is R170 million from initiation to completion. The first figure below illustrates the project location and provides an overview of the alignment, extending from the Onder Papegaaiberg area through to the northern side of Kayamandi.

The project is currently seven (7) months into the scheduled twenty (20) month construction programme and is anticipated to reach completion by September 2026. Although the total estimated project duration of construction is eighteen (18) months, it is classified as a multi-year project, with construction commencing in the 2024/25 financial year. The second image below in this section provides photographs of the construction works' progress thus far.

[illegible]

The Stellenbosch Municipality owns and operates the Stellenbosch Landfill, which currently comprises three cells that have reached capacity (i.e., cells 1, 2 and 3). The Waste Management Department is working to deliver a new landfill cell (cell 4), including all related civil works and containment systems for the Stellenbosch Municipality. The project was divided into two phases, each due to the existing Eskom transmission line crossing the site.

Phase 1 comprises all the work required for the completion and handover of cells 4A and 4C, along with access roads, services, site security, the main office building, the weighbridge office, and the ablutions container. Phase 1 was completed during July 2024 and handed over to the Waste Management Department.

Image 20: Stellenbosch Landfill - Construction of New Assets

Phase 2:

Phase 2 comprises the extension of Cell 4B, which is currently under the existing Eskom transmission lines. The procurement of a consultant to complete the remaining part of Cell 4 was accomplished during January 2025. The design stage, as well as the tender document for construction, was completed. Construction for this next phase is planned to commence during the 2025/26 financial year.

Image 21: Stellenbosch Landfill - Phase 2

Installation of Landfill Gas Extraction and Flaring Infrastructure at the Stellenbosch Landfill

The landfill gas extraction system was completed during May 2025 as part of the closure of the existing cells, as well as the operation of the new cell. The primary objective is to collect landfill gas and use it. For the initial phase, gas will be flared, and the second phase will be to use the gas to generate power, should this be viable.

The scope of this contract is for the civil works and the mechanical and electrical works for the installation of a landfill gas collection and flaring system, including landfill gas wells, a network of buried HDPE gas collection piping, the installation of condensate traps, and the installation of condensate pumping chambers and a flaring compound.

Image 22: Gas to energy project

Upgrades to the Plein Street Stellenbosch Public Library

The municipality embarked on the upgrade project of the Stellenbosch Public Library with a clear vision to transform the historic library into a modern, accessible, and dynamic hub that meets the evolving needs of the 21st-century community. Libraries are no longer merely collection spaces; they are vibrant learning centres, information hubs, and crucial spaces for resource sharing. This project is paramount to ensure the Stellenbosch Library remains a cornerstone of community engagement and lifelong learning for all residents within its extensive service area. Its modernisation is crucial for its continued relevance and accessibility. Various aspects of the upgrade have made significant progress, laying the groundwork for a truly transformative facility.

The initial phases have concentrated on obtaining compliance reports, which include structural assessments, universal access, partial electrical upgrades, and the finalisation of the design and ICT

requirements. However, the unique nature of this project, specifically its location within a heritage building, has presented complexities that have impacted the initial budget and timeline.

Image 23: Stellenbosch Public Library Upgrade

The Establishment of a Fire Station in Jamestown, Stellenbosch

The Stellenbosch Municipality's fire department is experiencing significant pressure to respond promptly within designated travel times to ensure timely attendance at emergencies, in accordance with SANS 10090:2003. The designated location for the proposed fire station was identified at the Jamestown Sports Field, which is zoned as Private Open Space with permitted use for outdoor sports. The subdivision area designated for use must be rezoned to the Utility Services Zone, which, by definition, permits authority use, including a fire station. The appointment of a consultant for all phases of the project was completed in November 2024. The planning phase for rezoning the athletics pitch at Jamestown has been finalised, and the land-use planning application has been submitted to Stellenbosch Municipality for approval. During the planning phase, the municipality finalised the design and floor plan of the proposed fire station.

**Image 24: Jamestown Fire Station**

Despite only having three (3) project managers in the department, the PMU department has received numerous requests to assist directorates in managing various CAPEX projects. The current structure makes provision for assistant project managers, and the request was submitted to fill these vacancies in the new financial year. It is evident from the new CAPEX budget that the positions must be filled to spend the CAPEX budget, especially the IUDG allocated to the municipality.

Despite all the highlights, some challenges were identified in the department.

Table 125: PMU Challenges

Service Area	Challenge	Actions to address
PMU	Dependence on other departments to meet the CAPEX budget allocated to PMU.	The planning of projects must be aligned to meet final project objectives— community and external stakeholder engagement.
PMU	Criteria for grant reporting to provincial and national departments.	Appointment of additional staff to assist with grant reporting.
PMU	Response time of internal departments to meet project outputs that cause delays on active projects.	Internal departments are to remain the project owners of CAPEX projects.

3.5.2 ASSET MANAGEMENT AND WAYLEAVES

The Asset Management and Wayleave Unit is a dual-function unit within the Infrastructure Directorate, and its functions are concerned with the financial and physical accountability of all infrastructure assets (Asset Management). The other function (Wayleave Management) seeks to ensure protection (from damage, loss, etc.) of all existing infrastructure assets / services through regular inspections and monitoring of all works conducted on and around the municipality's assets. Additionally, this function aids in the documentation of internal (municipal-owned) and external services or assets that are located within the road reserve of the municipal land.

This unit seeks to optimise municipal infrastructure management to support the current Strategic Focus Area 5: Good Governance and Compliance. As one of the largest economies nationally, the greater Stellenbosch area and municipality are significant providers of services. The difficult task that infrastructure asset management addresses is deciding what to do, when, where, and for whose benefit. Enhanced infrastructure capabilities also augment the achievement of the other four Strategic Focus Areas, i.e., 1: Valley of Possibility, 2: Green and Sustainable Valley, 3: Safe Valley, and 4: Dignified Living.

Municipalities are not only responsible for the provision of essential engineering services that include potable water supply, sanitation, electricity reticulation, the provision of roads and stormwater, and

solid waste collection and disposal, but also for housing and shared community assets like cemeteries, parks, sports grounds, libraries, etc. While municipalities also have obligations towards governance, community safety and health, and development services, the success or failure of a municipality is substantially measured by the availability and quality of infrastructure services. Therefore, a municipality operates as an asset-intensive business.

The unit strives to comply with the recently introduced Generally Recognised Accounting Practice (GRAP) standard for local governments, which focuses attention on asset management. Additionally, this unit ensures compliance with the issued National Treasury asset management practices and reporting requirements. These requirements include identifying, componentising, valuing, and tracking the health of the municipal-owned assets; establishing programmes; providing resources to maintain those assets; and reporting the status of existing and new assets for sustainable development.

During the 2024/25 financial year, condition assessments were done on the RTS (Roads, Transport and Stormwater) assets via a physical verification assessment of assets with an expected useful life of less than 5 years. The outcome of the report confirmed that the verified assets are generally in satisfactory condition. In the instance where assets were in poor condition, the municipality had already allocated funding to rehabilitate the infrastructure to increase their expected useful life and improve their conditions.

The department also obtained the information on 11 projects that were completed during the 2024/25 financial year for unbundling and inclusion in the Financial Asset Register. Unbundling allows municipalities to componentise assets, meaning each part of an infrastructure asset (e.g., pipes, valves, and pumps in a water system) is recorded separately. This ensures compliance with GRAP 17, which requires detailed asset identification, valuation, and depreciation tracking.

Below is the list of Infrastructure Services projects that were completed and unbundled during the 2024/25 financial year:

Table 126: List of Completed Unbundled Projects

List of Completed Unbundled Projects	
Department	Projects
Electrical Services	Electricity Network: Pniël
Electrical Services	Laterra Substation
Electrical Services	Replace Control Panels 66 kV and Circuit Breakers
Project Management Unit (PMU)	Franschhoek Mooiwater 236
Water and Wastewater Services: Water	Bulk Water Supply Pipeline and Reservoir - Jamestown
Water and Wastewater Services: Sanitation	Franschhoek Sewer Network Upgrade (Langrug / Mooiwater)
Water and Wastewater Services: Sanitation	Vlottenburg Outfall Sewer: Construction of Digteby Sewerpipe
Traffic Engineering	Traffic Calming Projects: Implementation
Traffic Engineering	Traffic Management Improvement Programme
Traffic Engineering	Traffic Signal Control: Installation and Upgrading of Traffic Signals and Associated Components
Traffic Engineering	Traffic Signal Management System

The collective value of the municipality's infrastructure assets, installed mainly in the public road reserve and on other municipal land, amounts to a considerable value. The Wayleave department

manages permissions for work within municipal land, especially in public road reserves, to protect infrastructure and ensure coordinated development.

This unit strives to continuously improve its functions and systems to provide better and more efficient support to the internal departments and the public. The Wayleave policy is reviewed on an annual basis to ensure compliance with all other relevant Council-approved policies. Through these continuous improvement goals, this unit has improved its overall efficiency in wayleave management to over 96% in the 2024/25 financial year.

The table below provides a summary of the functional statistics of the Wayleave applications.

Table 127: Wayleave Applications

Wayleaves (WL) Activity	2024/25 FY												FY Totals and Rates (%)	Averages per Month
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun		
Number of Standard WL Applications Received	35	34	20	17	39	0	20	39	25	26	38	23	316	26
Number of Emergency WL Applications Received	16	8	4	19	10	0	6	11	8	9	8	5	104	9
Number of Standard Wayleave Applications Finalised (Approved/ Refused/ Cancelled)	34	30	19	17	35	0	20	38	25	26	38	23	305	25
Number of Standard Wayleave Applications Cancelled and Refused	0	0	0	0	0	0	2	0	1	0	2	1	6	1

The table below summarises the challenges of the department:

Table 128: Asset Management and Wayleave Challenges

Service Area	Challenge	Actions to address
Asset Management	Dependence on other departments to submit unbundling information	Regular engagements with project owners to obtain information on time
Asset Management	Regulatory requirements of the National Government that must be adhered to	Appointment of critical staff

3.5.3 DEVELOPMENT SERVICES

The Section: Development Services is a section within the municipality that is responsible for managing the approval of engineering services and the implementation stages of all new developments in the municipality to ensure that the impact on municipal services and the environment is adequately and responsibly mitigated. Additionally, this section is required to facilitate development to promote economic growth, stimulate job creation, expand the municipal revenue stream (Development Contributions (DCs) and new property rates), and ensure development contributes to the achievement of the strategic goals of the municipality, by means of the following activities:

- ✦ The approval of new developments and the monitoring and control of engineering projects implemented by developers;
- ✦ Provides ongoing technical support and guidance to ensure responsible and successful development;
- ✦ Plan, organise, coordinate, and control the activities, procedures, and outcomes associated with the evaluation and approval of land use and building plan applications, as well as the calculation and coordination of bulk infrastructure development charges;
- ✦ Plan, organise, coordinate, and control the activities, procedures, and outcomes associated with the engineering side of the rate clearance applications;
- ✦ Manages the implementation of specific developments and development contribution-linked infrastructure projects to ensure capacity for new developments; and
- ✦ Develops and provides input into strategic documents, policies, and guidelines related to the engineering aspects of development.

During the 2024/25 financial year, the Section: Development facilitated the approval of land-use applications and building plans, which led to a DC revenue of R28 million excluding VAT (cash payments). This revenue can be used on bulk infrastructure engineering projects to create capacity to accommodate further development and broaden the municipal income base in terms of property rates and taxes.

Over and above the DCs generated in terms of cash payments, infrastructure upgrades in lieu of DCs to the value of R27.4 million, excluding VAT has been completed in 2024/25, and infrastructure upgrades in lieu of DCs to the value of R15.7 million, excluding VAT, have been completed in 2024/25.

The images below depict some of the projects for the 2024/25 financial year, some of which are still ongoing.

Image 25: Upgrading of R44 / Hendrickse Street (Cloetesville)

Image 26: Dennesig Transport and NMT Project (Stellenbosch CBD)

Image 27: R44 / Webersvallei Road Dedicated left turn lane (Jamestown)

Image 28: Kleinweide water upgrade (Die Weides, Stellenbosch)

To provide more perspective on the above, the monthly and annual applications are summarised in the table below:

Table 129: Building Plans and Land Use Applications

Activity	2024/25												Total
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Minor Building Plans: Received	93	129	92	99	86	85	27	187	116	102	85	117	1 217

Table 130: DC Challenges

Service Area	Challenge	Actions to address
Development	Dependence on other service departments to meet service delivery targets.	Vacancies and capacity constraints in other service departments have a negative effect on response times to development.
Development	Developers often face challenges in DC calculations, particularly when it comes to the use of DC on Provincial Roads.	Problematic areas in the DC Policy need to be addressed. Investigate the Provincial Roads DCs aspect in 2025-26. The consultant's tender expires in June 2026, and a new tender needs to be awarded.
Development	Shortfalls on DC projects funded by developers.	The mechanism of dealing with this scenario must be thoroughly investigated and formulated to ensure compliance with all relevant legislation. Appointed DC consultants to assist with this project in 2025/26. Engagement with other Municipalities on this topic will also provide valuable insight.
Development	DCs payable by schools, ECDs, churches, and other social institutions are problematic for the developers of these facilities, frequently stating that they render the school, etc., unfeasible. This has a domino effect if the school / social facility is not built because the underlying social issue cannot be addressed.	The latest DC Policy provides relief on DCs for schools, based on the Quintile rating of the school. Other social institutions must still apply to the Council for a DC reduction.
Development	Opportunity: Compare road upgrades vs. NMT upgrades in terms of impact and return on investment.	The outcomes of the Dennesig NMT upgrade project need to be scientifically measured once the project is completed to ascertain the value created by spending DCs on NMT upgrades vs. traditional road upgrades.

3.6 COMPONENT C: PLANNING AND ECONOMIC DEVELOPMENT

3.6.1 SPATIAL AND INFRASTRUCTURE PLANNING

Spatial planning is a high-level planning process that is inherently integrative and strategic; it considers a wide range of factors and concerns and addresses the unique spatial aspects of those concerns.

The actions of spatial planning aim to:

- ✦ Enable a vision and consistent direction for the future of the municipal area based on evidence, local distinctiveness, and community-derived objectives;
- ✦ Translate this vision and direction into a set of policies, priorities, programmes, and land allocations together with the public sector resources to deliver them;
- ✦ Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being; and
- ✦ Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation.

In essence, it entails more than land use management; it provides a key role in providing a long-term spatial framework for development and coordinating policies across sectors - referred to as the Municipal Spatial Development Framework (MSDF) in the municipal context. By so doing, effective spatial planning helps to avoid duplication of efforts by the government and can assist in the coordination of sectoral policies to ensure maximum positive impact from the investment of resources to achieve the spatial vision agreed to by all stakeholders.

3.6.1.1 Stellenbosch's Integrative Spatial – and Infrastructure Planning Approach

One of the contributing factors to the lack of spatial transformation is that strategic policy seldom leads the implementation agenda of municipalities. Ideally, the infrastructure and built environment programmes of municipalities should align with the spatial objectives of the MSDF, which is the 20-year plan for the management of the physical growth and development of the municipality. The MSDF, as the strategic and integrative spatial planning policy outlines the municipality's agenda to its service directorates, ensuring that their sector plans, programmes, and projects are grounded in a sound common spatial logic, whilst the Capital Expenditure Framework (CEF), the municipality's capital planning framework over the 10-year planning horizon, enables specific arrangements for prioritisation, mobilising, sequencing, and implementing public and private infrastructural and land development investment ensuring maximum positive impact from the investment of scarce resources as agreed to by all stakeholders are achieved, while ensuring financial sustainability.

The need for all municipalities to have SDFs and CEFs as core components of their IDPs has been a legislative requirement for the past 24 years, since the implementation of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA). Over the past 24 years, the understanding of the importance of MSDFs has improved. In this period three further pieces of legislation have been introduced, namely the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2014) (SPLUMA), the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), and the Stellenbosch Municipality Land Use Planning By-law (2023), which have further clarified the role and importance of MSDFs. Specifically, these pieces of legislations have provided further needed detail

on the content of the MSDFs and the administrative processes to be followed for review, amendment, and adoption of MSDFs.

Given that the MSA makes it clear that an MSDF (including CEF) is a core component of an IDP, it follows that the process requirements prescribed by the MSA in respect of an IDP must apply to an MSDF. In the case of the Stellenbosch Municipality, the Council approved the commencement of the proposed review and amendment process of the MSDF (2019) and the CEF (2021) to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. In doing so, an integrative strategic, spatial, and financial planning approach was followed to avoid the duplication of efforts and to ensure maximum positive impact from the investment of resources, with specific consideration to the adoption of the catalytic projects as approved in the Adam Tas Corridor Local Area Spatial Development Framework, 2022 (ATC LASDF). This resulted in a reviewed and amended MSDF and CEF, which was supported and adopted at a Council Meeting on 27 June 2023.

The final adopted IDP/MSDF/CEF were incorporated and adopted within the 2022-2027 IDP on 30 October 2023 (further referred to as the Amended IDP/MSDF/CEF), with confirmation from the Western Cape Provincial MEC for Local Government, Environmental Affairs and Development Planning on compliance with the relevant legislative requirements received on 28 November 2023.

3.6.1.2 Legislative requirements and process for the second annual review of the Amended IDP/MSDF/CEF (2023) as part of the IDP process plan 2024/25

Section 34(a)(i) and (ii) of the MSA speaks directly to the need to “review” an MSDF annually in terms of the performance of the municipality with respect to the guidance provided in its MSDF, as well as at any time deemed necessary in response to changing circumstances¹. The annual review allows for proactive monitoring of the implementation of the MSDF, while highlighting the need for actions that need to be taken to support the MSDF implementation on a sustainable basis. It is also important to note that an annual review of the MSDF does not necessarily lead to or require an amendment of the MSDF.

To support municipalities with unpacking the legislative requirements and administrative processes, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) and the national Department of Cooperative Governance issued a practice note and revised IDP guidelines in 2020. For the annual review of the Amended IDP/MSDF/CEF (2023), the internal review was part of the IDP process plan 2024/25 and was undertaken based on the mentioned practice note and guidelines. Accordingly, and concerning this internal review of the MSDF, the following factors have been considered regarding the performance of a municipality concerning its MSDF, namely:

- ⚙️ Are the goals and objectives of the MSDF being reached by the municipality?
- ⚙️ Is the direction provided by the MSDF being brought into the compilation or amendments of relevant sector plans, e.g. Comprehensive Integrated Transport Plan (CITP), Water Services

¹ Changing circumstances generally refers to circumstances that are out of the control of the municipality that have a substantive impact on the MSDF policies and proposals and could include e.g. changes in legislation, policy, norms or standards; disasters; trigger points being reached in terms of certain parameters; significant proposal for development in the municipal area that will result in significantly changed human settlement needs, socio-economic needs or altered natural environments; change in population growth; change in political leadership; new information etc.

Development Plan, Integrated Waste Management Plan, Air Quality Management Plan, Engineering Services master plans, Human Settlements plan, etc?

- Is the municipal budget spent in line with the priority development areas identified in the MSDF?
- What substantive development permissions has the municipality given in the past financial year?
 - Are these development permissions aligned with the objectives, principles, and policies set out in the MSDF?
 - What site-specific deviations did the Municipal Planning Tribunal (MPT) permit? What is the impact of these on the Municipal IDP/MSDF/Budget?
- Are implementation actions identified by the MSDF (including the CEF) being brought forward into the IDP, and SDBIPs and where relevant, budgeted for?
- Are implementation actions identified by the MSDF (including the CEF) included in the Strategic Plans and / or Annual Performance Plans and Budgets of relevant provincial and national government departments and state-owned entities?
- Do prior amendments suggest the municipality needs to commence with a compilation of a new MSDF?

The municipality has, over the last few years, made deliberate efforts to improve municipal policy coherence and the vertical alignment in its intra-municipal planning sphere, through a collaborative approach using the Capital Planning Forum (CPF) and the MSDF / CEF mechanisms. This approach enables the municipality's long-term strategic development vision to direct infrastructure implementation in the functional areas and priority development areas of the municipality, whilst remaining conscious of the municipality's financial position and infrastructure planning needs.

The second annual review for the 2024/25 IDP cycle focussed on the performance monitoring of the implementation programme of the Amended MSDF/CEF (2023) (refer to Chapters 6 and 7 of the document), specifically around the spatial imperatives (also referred to as principles) and associated development themes. The successful implementation of the spatial imperatives and guidelines is dependent on related spatial and non-spatial supportive policies, which have specific implications on intra-municipal sector planning. This implies policy alignment across municipal functional areas and services. The review aimed to demonstrate how each of the intra-municipal directorates assists with the implementation of the related development themes of the MSDF programme. In addition, the purpose of the review is to start highlighting and building up a list of what should inform the review of the Amended IDP in years 4 and 5 and what should be addressed in the next generation IDP to be adopted for the next 5-year term of office. Hence, the review needs to compile a list of issues to be dealt with when compiling the 5-year MSDF for the period 2028-2032.

Based on the performance monitoring of the implementation programme of the MSDF and associated development themes, the table below indicates the highlights achieved within the department as at 30 June 2025.

Table 131: Highlights of the Department: Development Planning

Highlight	Description
Inclusionary Zoning (Housing) Policy	The municipality co-authored Stellenbosch's Inclusionary Zoning Policy: Lessons and insights on policy development case study.
Internal Review and update of the spatial planning policies of the MSDF	Based on the review of the MSDF and various intra-municipal and inter-municipal sector planning flags highlighted in 2024/25. The update of the specialist study and plans has been initiated, and a draft has been produced for further refinement and intra-municipal collaboration.

Highlight	Description
Catalytic Initiative: Klappmuts and intergovernmental planning matters	The municipality is part of an Intergovernmental Steering Committee (ISC) for the development of the Greater Cape Town Regional Study initiated by the National Department of Land Reform and Rural Development, and WC: DEA&DP. The regional infrastructure systems study commenced in 2024/25 and will conclude at the end of 2026, and will focus on coordinating spatial planning and infrastructure around the N1 corridor based on spatial scenarios developed to accommodate growth, specifically focusing on the N1 and the regional node of Klappmuts.
Catalytic Initiative: Stellenbosch Bridge, Klappmuts	The "Innovation Precinct" or "Smart City District" (now referred to as Stellenbosch Bridge), directly west of and adjacent to Klappmuts South, was approved in 2024, with groundwork already underway for the establishment of the Industrial Park located next to the N1.
Local spatial development frameworks: Koelenhof	Ideally, each of the settlements in the municipality should have an LSDF, applying the principles of the MSDF in more detail. The emerging node of Koelenhof has been identified as a top priority for the development of an LSDF and overlay zone, which was commissioned in 2024 and led by the Koelenhof landowners and the municipality. The studies will inform the reclassification of the node to a priority development node and the appropriate infrastructure arrangements needed for its development within the next 10 years
2 nd Review of the MSDF and CEF.	Review the Municipal Spatial Development Framework and CEF. Council adopted the review report on 30 October 2024.
Adam Tas Overlay Zone	Awarded with the WCG Service Excellence Awards 2024 in the category "Ease of Doing Business"
Adam Tas Overlay Zone	Approved as part of the Stellenbosch Municipality Zoning Scheme By-law 2024.
Inclusionary Zoning (Housing) Policy	The MSDF proposed that an Inclusionary Zoning (Housing) policy be drafted through which the delivery of more affordable housing within new developments and / or targeted areas can be achieved.
Review and amendments to the CEF	The department embarked on a process to ensure a better alignment of the strategic and higher-order plans of the municipality with the approved MSDF, which required the review and amendment of the MSDF (including the Capital Expenditure Framework (CEF)). The Council approved the final amended MSDF and CEF on 27 June 2023.
Review and amendments to the MSDF	The department embarked on a process to ensure a better alignment of the strategic and higher-order plans of the municipality with the approved MSDF, which required the review and amendment of the MSDF (including the Capital Expenditure Framework, CEF). The Council approved the final amended MSDF and CEF on 27 June 2023.
Adam Tas Governance Structure	To assist with the implementation of the ATC LSDF, SM, and the ATC's collective landowners signed a Memorandum of Understanding (MoU) in 2022. The Council approved the MoU in August 2022 and appointed the Economic Development Partnership (EDP) to draft the terms of reference for the project manager to appoint a person in the municipality temporarily to facilitate the development of the ATC. The EDP was also tasked to facilitate and assist the municipality in appointing the Steering Committee for the ATC, consisting of senior municipal officials and an equal number of representatives of the landowners' collective. The development of the institutional arrangements for the governance structures is still in progress.
Local Spatial Development Framework for the Adam Tas Corridor	The local spatial development and development guidelines for the Adam Tas Corridor (ATC LSDF), which is a catalytic project listed in the MSDF, have been finalised and adopted by the Council in 2022.
A precinct plan for the Rhenish complex	An urban design study and precinct plan for the Rhenish Complex in Stellenbosch, setting out the potential measures to preserve, develop, and activate the Rhenish Complex, was adopted by Council on 29 November 2023.
Feasibility studies for land / building acquisition	Four studies for properties that could potentially be obtained by the Council, three of which are in the Adam Tas Corridor, were completed and submitted to management for consideration.
Intergovernmental relations	DEA&DP took the initiative to arrange for quarterly intergovernmental relations meetings for municipalities falling within the Greater Cape Metropole. The meetings are mandated to discuss common issues and cross-boundary matters. All the department's senior staff attend the meetings.

The table below indicates the challenges experienced within the department as at 30 June 2025.

Table 132: Challenges within the Department: Development Planning

Challenge	Actions to address
Capacity	<p>The total staff component of the Section: Spatial Planning amounts to three (3) officials, consisting of a manager, a senior planner, and an administrative officer. A spatial planner position is currently vacant and in the process of being filled.</p> <p>With the increase in projects undertaken in-house, as well as the need to develop LSDFs for each smaller town, as well as for the "Bosdorp," and to facilitate and lead the implementation of the MSDf. Catalytic projects and the LSDFs are currently placing the department under severe pressure.</p> <p>The Department: Development Planning notes that the organogram approved in 2017 does not meet the requirements to successfully fulfil the functions and mandate required by the Section and must be urgently reviewed and amended.</p>

3.6.2 ECONOMIC DEVELOPMENT AND TOURISM (LED)

Stellenbosch, one of South Africa's oldest and most renowned towns, is distinguished by its heritage architecture, world-class vineyards, and cultural diversity. Home to Stellenbosch University and South Africa's 13th largest economy, the town combines historical character with a dynamic entrepreneurial ecosystem, advanced research facilities, and the headquarters of major national and international companies. Its compact urban footprint and preserved natural landscapes further enhance its quality of life and visitor appeal.

The municipality's record of 6th consecutive clean audits reflects strong governance and financial stability, underpinned by continued investment in infrastructure and service delivery. This creates a reliable foundation for inclusive economic development and sustainable tourism growth.

Within this context, the municipality aims to position tourism as a driver of long-term value. Key priorities include:

- ✚ Coordinating and overseeing funded tourism entities to ensure accountability and impact;
- ✚ Partnering with the private sector and leveraging independent initiatives to strengthen tourism efforts;
- ✚ Developing sustainable events, brands, and off-peak tourism offerings to balance seasonal demand;
- ✚ Expanding opportunities for business tourism and enabling local businesses to participate in the value chain;
- ✚ Creating training, mentorship, and employment pathways to empower residents; and
- ✚ Measuring return on investment to ensure effective use of resources.

By integrating governance excellence with innovation and inclusivity, Stellenbosch is uniquely positioned to grow as a sustainable tourism destination while advancing economic empowerment and social well-being.

3.6.2.1 Agricultural Support and Rural Development

Stellenbosch Municipality has once again handed over three portions of land, reinforcing its commitment to sustainable agricultural practices, economic growth, and job creation in the region.

By leasing municipal agricultural land to local farmers, the Stellenbosch Municipality continues to create long-term opportunities and foster inclusivity within the community. This phased approach

demonstrates a forward-looking strategy empowering emerging farmers while ensuring that previously underutilised land is transformed into productive assets.

The Executive Mayor highlighted the municipality's strategic goal of fostering a business-friendly environment that drives job creation. The transparent selection process considered farming experience, business plans, and financial readiness, ensuring that deserving candidates benefit. Beyond land access, the municipality will also provide essential infrastructure such as electricity and water, and relevant government departments.

The municipality's Policy on the Management of Agricultural Land provides a clear and transparent framework that enables small-scale farmers with the required knowledge, skills, and passion to lease municipal land and grow their enterprises into viable commercial ventures. In doing so, these farmers not only strengthen food security but also play a vital role in job creation within the local agricultural sector.

This initiative builds on the Stellenbosch Municipal Council's 2016 Policy on the Management of Municipal Agricultural Land, which seeks to unlock the potential of unused land while empowering emerging and historically disadvantaged farmers. As a caring and responsible government, Stellenbosch Municipality remains committed to pioneering practices that strengthen the agricultural economy and create sustainable opportunities for its residents.

The table below provides the activities done within the Section: LED and Tourism.

Table 133: Section: LED and Tourism Activities

Achievement / Highlight	Description	Financial years				
		2020/21	2021/22	2022/23	2023/24	2024/25

3.6.2.3 Job Seekers Database Outreach Programme

During the 2024/25 financial year, the Economic Development and Tourism Section conducted 41 Job Seeker Outreach Programmes, with the objective of expanding the municipal database through the registration of additional community members.

3.6.3 HERITAGE AND RESOURCE MANAGEMENT

The Section: Heritage Resources Management is mandated to enable, facilitate, and manage cultural heritage development within the Stellenbosch municipal area through the formulation and implementation of long-term cultural heritage plans, strategies, policies, and guidelines that are appropriately integrated with the applicable sectoral plans of the municipality and aligned with the requirements of the National Heritage Resources Act, 1999 (Act No. 25 of 1999).

Part of this work was updating the Stellenbosch Municipality Heritage Inventory, which was done in partnership with the Stellenbosch Heritage Foundation. The municipality intends to expand on this partnership to ensure that the heritage inventory is continually updated.

The municipality has also undertaken a process to review and amend the Stellenbosch Municipality Outdoor Advertising and Signage Bylaw, and this bylaw is currently being advertised for public participation with the intention that it will be adopted and promulgated during the 2024/25 financial year.

3.6.4 GEOGRAPHIC INFORMATION SYSTEMS (GIS)

The GIS Section is responsible for managing, coordinating, and controlling the professional and technical processes associated with Geographic Information Systems (GIS) in respect of the municipality, Management of Information Systems (MIS) through research and evaluation of best practices and cost-effective approaches, and providing guidance and advice on the functionalities to internal departments to ensure that broader goals and service delivery objectives are accomplished and quality and professional standards are maintained per agreed timeframes, budgets, and appropriate legislation.

The Section has assisted the Directorate: Planning and Economic Development with the development of electronic and online submissions of building plans and land use applications. Through this process, the Section has developed the Building Plan Application Management System ("BPAMS") and the Town Planning Application Management System ("TPAMS"). These systems will allow residents and potential developers to submit their development applications online and monitor the progress of their respective applications.

Currently, BPAMS is fully operational and will be launched with TPAMS during the 2025/26 financial year.

The table below indicates the capital expenditure for the Department: **Planning and Development Services** as at 30 June 2025.

Table 136: Capital Expenditure as at 30 June 2025: Department: Planning and Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Furniture, Tools and Equipment: Building Control	91	91	0.04%
Furniture, Tools and Equipment: Spatial Planning	47	46	3.26%

The Departments: Planning and Development have spent **99%** of their capital budget for the financial year.

The table below indicates the capital expenditure for the Section: **Economic Development Tourism** as at 30 June 2025.

Table 137: Capital Expenditure as at 30 June 2025: Section: Economic Development and Tourism

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Installation of agricultural irrigation infrastructure on Farm 502BH (Emerging Farmers)	2 189	2 189	0%
Furniture, Tools and Equipment: LED	116	113	2.12%
Establishment of the Kayamandi Informal Trading Area	1 598	935	41.49%

The Section: Economic Development and Tourism has spent **83%** of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Development Planning as at 30 June 2025.

Table 138: Total number of employees in the Department: Development Planning (Entire department)

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)

3 – 0	9	6	3	33.3
Total	60	53	7	11.6

3.7 COMPONENT D: COMMUNITY AND SOCIAL SERVICES

3.7.1 LIBRARIES

Public libraries are facing unprecedented challenges, marked by consecutive years of financial austerity. This document outlines the trajectory of these cuts and explores the extensive range of services and functions that public libraries offer, arguing for their indispensable value to communities.

Public libraries are experiencing sustained financial pressure that now threatens core services. Despite the growth of digital platforms, physical libraries remain essential as community-based, human-centred spaces that serve as social, cultural, and informational anchors.

Across branches, outdated and damaged materials were removed to maintain relevant collections, while limited new acquisitions were added, often with support from the Western Cape Provincial Government. Kayamandi, Klipmuts, Pniël, Cloetesville, and Groendal libraries all undertook collection management processes. Beyond lending books, the libraries function as vital community hubs. They provide literacy programmes, after-school support, storytelling sessions, reading competitions, study support, computer training, CV workshops, and senior citizen programmes. They host awareness events linked to national commemorative days. Libraries also run holiday programmes, safety awareness initiatives, child protection campaigns, soup kitchens, and partnerships with schools, crèches, authors, and health organisations.

Groendal and Pniël libraries demonstrated measurable community impact through literacy improvements, increased attendance, strengthened community cohesion, and enhanced health awareness. Online marketing initiatives, particularly in Cloetesville, improved visibility and engagement with library collections.

Table 139: Library services

Type of service	Annual statistics 2024/25
Book circulation	53 356
Exhibitions held for adults	36
Exhibitions held for children	60
Internet access points	28
Internet sessions granted to the library users	10 357
Children's programmes	184
Number of children attending programmes	6 749
Visits by school groups	71
Book group meetings for adults - old age home	1 556
Patron's visits to the library	119 158
Library hall usage	147
Total number of project and pamphlet files developed	94
Total number of books reviewed	137
In-house usage	4 520
Primary and secondary book education sessions	111

The table below illustrates the growth in print collections.

Vocational academic career achievements and awards

Table 143: Vocational academic career achievements and awards

Designation	Qualification
Klapmuts	Bachelor of Information Science Honours
Library Aid	Bachelor's degree in Information Science

The table below indicates the capital expenditure for the Section: **Library Services** as at **30 June 2025**.

Table 144: Capital Expenditure as at 30 June 2025: Section: Library Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Vehicle Fleet: Library Services	548	547	0%
Ida's Valley: Furniture, Tools and Equipment	350	329	5.96%
Library Books	215	199	7.22%
Upgrade Stellenbosch Library	4 603	173	96.23%
Furniture, Tools and Equipment: Pniël Library	167	167	0%

The Section: Libraries has spent **25%** of its capital budget for the financial year.

3.7.2 CEMETERIES

The objective of the **Cemeteries** and Parks Section is to provide adequate burial space and to ensure dignified burials.

Stellenbosch Municipality is responsible for the maintenance and management of six cemeteries in Stellenbosch (WCO24). The cemeteries in Pniël and Groendal have reached capacity, while Franschoek South and Groendal North remain fully operational. Additional burial space has been created at Onder Papegaai Cemetery, and a new cemetery is currently being developed in Kylemore.

The Jamestown Cemetery sustained damage due to high underground water levels during this year's storms, making it practically impossible to excavate new graves in the affected area. At the same time, the Municipality was unable to reopen existing graves because of the elevated groundwater levels. The Municipality is currently investigating measures to reduce water accumulation after periods of heavy rainfall.

Consultants have been appointed for a three-year project to assist the Municipality with the planning and construction of a new cemetery to address the critical need for additional burial space. The project is at an advanced stage, with the required environmental, water, and land use approvals in progress. All necessary licences have been obtained for the commencement of the new Stellenbosch Memorial Park, located alongside the R304 at the site known as Calcutta.

The table below indicates the availability of burial space within the WC024 as at 30 June 2025:

Table 145: Cemetery space availability

Cemetery	Airspace	Status		
		Open	Full	Closed
Jamestown	Open	✓		
Onder Papegaaiberg	Open	✓		
Pniël	Reopening		✓	
Groendal	Reopening		✓	
Franschhoek South	Open	✓		
Kylemore	Not open yet			✓
Calcutta	Not open yet			✓

3.7.2.1 Income – Cemeteries

The table below indicates the income generated from the financial years of 2022/23 – 2024/25.

Table 146: Cemeteries Income

Gravesite locations	2022/23		2023/24		2024/25	
	Number of Burials	Income	Number of Burials	Income	Number of Burials	Income
Onder Papegaaiberg	65	R612 431.84	452	R1 292 061.44	287	R584 965.81
Jamestown	554	R1 355 202.05	1	R2 139.90	154	R894 393.48
Pniël	22	R12 993.95	10	R4 972.94	6	R990.29
Wemmershoek	5	R7 728.48	0	R0	2	R0
Groendal	71	R44 597.62	9	R0	24	R0
Franschhoek South	41	R78 505.95	65	R77 171.31	103	R120 103.35

3.7.2.2 Beautification, Open Spaces and Parks

The ornamental horticulture team responsible for beautification in Stellenbosch central and town entrances upgraded the Voorgelegen gardens, which cater to an array of events such as weddings, baby showers, bridal showers, parties, etc. Die Braak, main roads, and town entrance pots and beds were replanted as the teams prepared for various tourist visits and the annual municipal festivals and events such as the Harvest Parade and Garden Town, amongst other events. The Franschhoek area received several planted pots to add to the beautification on that side of WC024. The team beautified various entrances at the Ida's Valley entrance, Tennantville, Kayamandi wall entrance, and R44. Adam Tas, etc. Over 50 trees were planted in various wards across WC024 by the parks section. The Adam Tas entrance was upgraded with artificial grass, especially in areas where there is high foot traffic and pedestrians.

Play equipment was installed across the Stellenbosch Municipal area. Longlands in Ward 20 received a new fenced park with outdoor gym items, play equipment, new bins, signage, artificial grass, and pathways. trees, tarred walkways and plant boxes.

Kastaaing Park in Pniël was fenced, with a new three-in-one play item as well as a bin. Existing play equipment was painted in most parks. La Gratitude Park in Idas Valley was fenced. Curry Street Park in Ward 16 received new play equipment. A tree planting project was expedited by the parks section during Arbour Month in Ward 11, as many older trees that were damaged by the previous storm had

fallen over. A beautification project was expedited in Ward 16 to combat an illegal dumping area. Ward 22 received a set of outdoor gym items. Fencing projects were planned for Wards 1 and 2. Tree planting during Arbour Month took place in the Franschhoek area.

3.7.2.3 Operational activities within the department

Table 147: Operational activities within the Department: Parks and Cemeteries

Operational Activities	Description
Capital expenditure in cemeteries	100%
Phase one of the New Memorial Park	Phase one completed
Phase two of the New Memorial Park	Phase two has commenced and is in progress.
Maintenance of all Cemeteries	Maintenance on a high standard.
Beautification and maintenance in Jamestown cemetery	Planting of flowerbeds and landscaping is ongoing
Jamestown cemetery	The cemetery is open for burials.
Reuse of existing graves	To save space in cemeteries.

3.7.2.4 Challenges within the department

Table 148: Challenges within the Department: Parks and Cemeteries

Challenges	Description	Corrective Measures
Staff shortages	Staff shortages in critical vacancies.	Vacancies in the cemeteries section need to be advertised. This is especially true for the foreperson, supervisors, a digger loader operator, and staff positions for the new cemetery outlined in the proposed organogram.
Vandalism	Groendal and Jamestown Vandalism of fencing shared with the Onder Papegaaiberg Nature Reserve when a motorist is driving through.	Improved security measures as well as integrated municipal and ratepayer / public involvement.
Niche Areas	Due to flooding in Jamestown Cemetery.	Regular cleaning of the stormwater channel. Probable involvement of families of the deceased in erecting a memorial wall of niche areas.
Buildings	Onder Papegaaiberg and Jamestown roofs are leaking.	Requires repairs.
Kylemore Cemetery	Underground rocks pose a huge challenge to continuing with the digging of graves at the cemetery.	Assistance is required from the PMU with the EIA, and a decision needs to be made, as the Calcutta Cemetery is being built at a significant cost to the Stellenbosch Municipality.
	Fencing and security cameras are needed – a high-risk area.	CCTV cameras to be installed if a tender is available. Cemeteries have cameras stored at law enforcement offices.
Illegal dumping	In areas where there is no fencing.	Improved security measures, as well as integrated municipal and ratepayer / public involvement.
No cameras or surveillance	Huge safety risk.	CCTV cameras should be installed if a tender is available.
Challenges between internal departments	Not assistance with building maintenance and technical repairs.	Communication should be improved by providing clear explanations of tender information and specifications.
Pine Trees	Tree felling and pruning.	Regular maintenance.
Onder Papegaaiberg Roads	Gravel roads require resealing and rehabilitation of surfaces.	Resealing of roads to take place. The thoroughfare from Enkanini is challenging. Control measures to be discussed among departments.

The table below indicates the capital expenditure for the Section: **Cemetery and Parks** as at 30 June 2025.

Table 149: Capital Expenditure as at 30 June 2025: Cemetery and Parks

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Calcatta Memorial Park	20 000	19 999	0%
Vehicle Fleet: Cemeteries	288	288	0%

The Section: Cemeteries has spent **100%** of its capital budget for the financial year.

3.7.3 CHILD CARE; AGED CARE; SOCIAL PROGRAMMES–COMMUNITY DEVELOPMENT

The Department: Community Development continues to render services to the most vulnerable within communities. The statistics and description of services below depict the services rendered during the financial year.

Table 150: Service Statistics – Childcare, Aged Care, Social Programmes

Focus area	Description	Ward	Activity
Children	↓ Capacity building of ECD practitioners; ↓ Initiatives in awareness programmes (ECD children); ↓ ECD Registration Compliance; ↓ Strengthening and establishing ECD forums; ↓ Transversal committees / ad hoc committees; and Awareness Programmes.	2-4, 12-15, 18	↓ 48 ECD practitioners participated in health and safety training.
		All	↓ 534 ECD practitioners were assisted with information and access to officials relating to the registration of ECD facilities.
		2-4, 12-15, 18	↓ First aid training was provided to 48 ECD practitioners.
		ALL	↓ The registration status of 124 ECD facilities was plotted on the GIS system.
		12-15	↓ 180 young boys participated in a gender sensitisation programme.
		1-4	↓ 24 ECD practitioners received training from Working on Fire.
		6, 12-16	↓ 50 children participated in the WC Children's Commissioner's dialogue.
		4	↓ Awareness of child trafficking and GBV was completed with 704 children.
		23	↓ 14 children received life skills and GBV training.
		3-4	↓ Holiday programmes reached 246 children.
		4, 18	↓ The Back-to-School programme reached 1 674 children.
		6, 12-16, 18	↓ 32 foster parents and children participated in the parenting training session with DSD.
		All	↓ 732 children participated in the Child Protection Week activities.
People with Disabilities	Awareness and Wellness programmes	All	↓ 180 people with disabilities participated in the disability sports day.

Focus area	Description	Ward	Activity
	Universal Access	All	✚ The municipality updated the published link to the local Disability Organisations Information Portal on the municipal website.
		All	✚ 389 people and various organisations participated in the Walk with Disability Awareness programme on World Disability Day.
		All	✚ 475 people attended general prevention and awareness sessions.
		All	✚ 40 volunteers were recognised and honoured during International Volunteer Day.
		All	✚ 10 stakeholders attended the Disability Empowerment Mainstreaming Workshop.
Older Persons	Special events, awareness programmes and capacity building	1-6, 10-18, 20	✚ 371 elderly people participated in the Golden Games programme.
		3-6, 10, 13, 14, 16-18, 20, 21	✚ 280 elderly persons participated in a cultural day.
		3, 18	✚ 96 elderly people were made aware of health matters that can affect them.
		12	✚ 61 elderly people received capacity-building training to form a club.
		1-3, 12, 18	✚ 578 elderly people were introduced to issues affecting them and the availability of services through an awareness programme.
		12-15	✚ 73 elderly people learnt more about electronic scams.
		1-3	✚ 7 elderly people representing elderly clubs were assisted with grant-in-aid applications.
		1-3	✚ 54 elderly people participated in the Elderly Abuse Awareness Day.
Gender	Special events and awareness programmes	3, 11, 19, 22	✚ Women's Day with 160 women.
		4, 11-16, 18	✚ 674 persons were reached with general awareness programmes.
		6	✚ 80 women learnt about the Thuthuzela Centre through an outreach programme.
		2, 4-6, 12-16	✚ 40 women participated in gender equality training.
		All	✚ 80 women were shown appreciation during the GBV Activist Appreciation Day.
		All	✚ Stellenbosch Municipality launched the 100 Days End GBVF Challenge for the first time and reached 344 persons through leadership training, refresher workshops, task team workshops and awareness.
		6, 12, 16, 18	✚ Fatherhood Programme with 147 men.
		1-2, 12-15	✚ 29 widows participated in an empowerment programme.
		12	✚ 1 266 youth participated in the Community Resilience Programme to discover who they can turn to in their community regarding gender-related matters.

Focus area	Description	Ward	Activity
		12-15	198 girls were reached through the Help a Girl campaign.
		12, 13	178 persons were reached through the 16 Days of Activism launch.
		All	Officials attended Roses on the River, the World AIDS Day commemoration of @heart.
		12-15	28 unemployed youth were trained in the SSCF programme.
Youth	Youth empowerment programmes Youth Capacity Building Transversal committees / Ad hoc programmes	3-6, 16-18, 20, 21	98 youth were reached through a career expo.
		12_15	Youth participated in the Career Expo.
		1, 2, 5-6, 16-17	45 interested youth participated in the sign language training programme.
		All	16 youth made it through the different stages from recruitment and selection to elections of the first Junior Town Council of Stellenbosch Municipality.
		All	Accredited skills training was completed in the following fields: General Residential Repairer (14); Life Saving (2); and Food Handler (13).
		3, 18	59 youth participated in the Community Capacity Enhancement Programme of DSD.
		1-3, 12-15	149 youth participated in the job-readiness programme in partnership with DSD.
		1-2	24 youth received leadership training.
		1, 2, 12-15	210 youth participated in several awareness programmes.
		18	40 youth were trained in financial literacy.
		1, 13, 16, 19	30 youth participated in the Chrysalis and IEC awareness programme.
Grant in Aid (GiA)	Donations to community organisations serving, among others, youth, gender, ECDs, old age homes, health organisations, and sports clubs	All	<ul style="list-style-type: none"> 1 financial management workshop with 88 organisations. 3 compulsory clarification workshops with 162 organisations. 96 GiA applications were assessed. 52 organisations attended the MOA signing workshop. See the table below regarding the approved donations. GiA Policy and SOP reviewed. The GiA Food Garden Programme trained 720 persons in backyard gardening, 24 ECD gardens were established, and 12 community gardens were created. GiA Homeless Support paid for the provision of 10 651 lunches at Bergzicht Taxi Rank. 16 104 meals and 8 052 beds were provided with the GiA donation to the Stellenbosch Night Shelter.
People on the street	Development, awareness raising through	All	436 homeless persons were reached with general prevention and awareness information.

Focus area	Description	Ward	Activity
	collaboration and services rendered	All	<ul style="list-style-type: none"> 600 persons were reached through the Winter Readiness Street Store.
		7-10	<ul style="list-style-type: none"> An outreach in collaboration with the Visfabriek reached a further 300 persons during the winter.
		All	<ul style="list-style-type: none"> Give Responsibly marketing via Facebook and during the festive season safety campaign. 1 795 first-year students were reached with the Give Responsibly Campaign during orientation week. 18 shops participate in the programmes through the sale of coupons. One mini-site on Give Responsibly was updated on the Visit Stellenbosch website to make the information on Give Responsibly available to tourists through a QR code. Give Responsibly Coupons sold: 6 127 Give Responsibly Coupons redeemed: 5 051
		All	<ul style="list-style-type: none"> 611 work opportunities were provided to people on the street through the Animal Welfare Walk a Dog project and the Stellenbosch Night Shelter Cleaning project.
Social Relief of Distress	Provision of food parcels, blankets, mattresses, vanity packs and warm food according to the need due to disaster incidents	All	<ul style="list-style-type: none"> 346 individuals were assisted.
Stellenbosch Local Drug Action Committee	Networking, development of a service directory, and collective programme implementation	1, 2, 3, 4, 5, 16, 17, 20, 21	<ul style="list-style-type: none"> The executive committee continued to meet monthly with quarterly, bigger engagements. 60 people participated in the International Day Against Drug Abuse and Illicit Trafficking. General awareness programmes were implemented, reaching 512 people. 30 stakeholders attended the I Can Choose training tool.
Mobile Thusong Centre	Inter-governmental Cooperation, taking services to the communities	12-17	<ul style="list-style-type: none"> The event served 850 people over the two days.
Department of Labour Outreach	Service delivery	12-15, 18	<ul style="list-style-type: none"> The municipality mobilised communities and assisted with the outreach by the department, reaching 206 people.
Disaster Awareness	Creating stronger communities	20	<ul style="list-style-type: none"> 50 community members of Coyden Farm participated in the awareness programme.
NPO Capacity Building	Governance and Financial Management Training, NPO compliance	1, 2, 4, 21	<ul style="list-style-type: none"> 43 representatives of local organisations participated in the workshops provided.
Collaboration with Civil Society	Attending, supporting and leading network meetings	All	<ul style="list-style-type: none"> 38 meetings of different sectors were engaged in: Stellenbosch Disability Network, Stellenbosch Homelessness Forum, Stellenbosch Elderly Forum, ECD Forums, Stellenbosch Civil Advocacy Network, and Social Cohesion Cluster of the Stellenbosch Safety Forum.

The table below indicates the number of Grant in Aid applications recommended and approved for the year under review:

Table 151: Number of Grant in Aid applications recommended and approved

Subcategory	Applications Recommended and approved	Recommended Amount R
2024/25		
General Soc Dev	4	1 60 000
Partial Care	11	440 000
Disability	3	120 000
Youth	2	80 000
Substance Abuse	1	40 000
Food Security	1	2 979 890
People who are homeless	2	2 568 331.18
Skills Development	2	80 000
Physical and Psychological Health	1	40 000
Sport Clubs	1	40 000
Art and Culture	2	80 000
Total	30	6 628 222.18

The table below indicates the capital expenditure for the Section: Community Development as at 30 June 2025

Table 152: Capital Expenditure as at 30 June 2025: Section: Community Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Furniture, Tools and Equipment: Comm Development	46	45	2.45%
Social Relief Distress Vehicle	572	572	0%
Upgrading: Early Childhood Development Centres on Municipal Land	5 675	84	99%

The Section: Community Development has spent 11.15% of its capital budget for the financial year.

The table below indicates the total number of employees in the Section: Community Development as at 30 June 2025.

Table 153: Total number of employees in the Section: Community Development

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	0	0	0	0
14 – 17	1	1	0	0
9 – 13	4	4	0	0
4 – 8	6	5	1	16.6
3 – 0	0	0	0	0
Total	11	10	1	9.1

3.8 COMPONENT E: ENVIRONMENTAL PROTECTION

3.8.1 POLLUTION CONTROL, LANDSCAPE AND BIO-DIVERSITY

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned. Previously, it was recorded that Stellenbosch Municipality developed the Stellenbosch Environmental Management Framework in 2018, administered by the Department: Community Services. This document, guiding environmental planning and management throughout the WC024 area, is currently under revision and being updated.

In addition, over the past 10 years, Stellenbosch Municipality has compiled dedicated Environmental Management Plans (EMPs) for all its declared nature reserves as well as nature areas or old forestry areas. In this regard, the Council has adopted the Ida's Valley Dam / Botmaskop EMP in 2023, the Paradyskloof Nature Area EMP in 2024, the Mont Rochelle Nature Reserve EMP in 2022 and the Papegaaiberg Nature Reserve EMP in 2026. Through the Department: Community Services, Stellenbosch Municipality manages approximately 3 000 ha of vacant land. The municipality aims to have all these managed and maintained through dedicated management plans such as those mentioned above.

Stellenbosch Municipality has also completed an Invasive Alien Plant Management Plan, as required in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), and an Integrated Fire Management Plan to assist in the management of large vacant nature areas under the management of the Council. Most notably, Stellenbosch Municipality drafted its first dedicated nature areas bylaw (the Stellenbosch Municipality Nature Areas Bylaw), which was promulgated in July 2025.

Air Quality Management Plan

Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) was approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018. The latest revision of the document will be undertaken in 2026.

Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is cooperatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.

The goals to achieve the mission of the AQMP are listed below, and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The four goals for the Stellenbosch Municipality AQMP are:

- ✦ **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory four goals and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'effective air quality management';
- ✦ **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDM AQMP goal of 'Effective air quality management through an 'Emission reduction strategy';
- ✦ **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management; and
- ✦ **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact

The timeframes defined for the Implementation of the AQMP are the following:

Figure 31: AQMP timeframes

An air quality control by-law as well as a noise control policy have been developed and adopted by the Council. The latter is implemented by a dedicated Air Quality / Noise Control Officer appointed within the Department: Community Services. Air quality and noise complaints are captured in a central database and dealt with within required timeframes. The following statistics

included both air quality-related matters and noise complaints. All noise complaints are investigated in terms of the Western Cape Noise Control Regulations PN200/2013.

Table 154: Air Quality Complaints for 2023/24 and 2024/25

Complaints	2023/2024				2024/25			
	1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter	1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter
Fumes	20	11	17	12	19	9	15	10
Smoke	2	1	5	4	5	2	4	5
Dust	6	5	2	3	6	6	3	3
Burning of waste / tyres	1	2	3	2	3	3	4	3
Farmland burning	0	1	2	2	2	2	2	2
Crop spraying	1	1	1	3	1	2	3	5
Offensive odors	3	3	4	2	4	2	5	3
Unlicensed facilities	0	2	0	2	0	0	0	0
Other	1	1	2	1	0	1	1	2
Total	34	27	36	31	40	27	37	33

The following immediate items were also included in the AQMP:

Table 155: Activities in the AQMP

	Objective	Activity	Responsibility
1.	Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
2.	The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
3.	A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law	Air Quality Officer, Council
4.	Emissions from waste burning are reduced.	Enforcement of the by-law	Air Quality Officer
5.	An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
6.	Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g., EIA, SDF, SEMF).	Air Quality Officer
7.	Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
8.	Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

Environmental Management Plan

As mentioned earlier Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document has been

reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

Environmental Implementation

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park, and Papegaaiberg Nature Reserve. Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- ⚠ Mont Rochelle Nature Reserve: approved by the Council in 2022;
- ⚠ Papegaaiberg Nature Reserve: approved by Council, reviewed during 2025
- ⚠ Jan Marais Nature Reserve: Final draft EMP in process
- ⚠ Paradyskloof Nature Area: approved by the Council in 2019 and reviewed in 2024; and
- ⚠ Ida's Valley / Botmakop Nature Area: Approved by the Council in 2023.

In 2024, Stellenbosch Municipality also drafted a Nature Reserve and Nature Area By-Law. This by-law was made public before a final draft was presented to the Council and promulgated during July 2025.

Urban Forestry

Maintenance of the Urban forest within the Central Business District (CBD) shall be undertaken in accordance with the Council-approved Tree Management Policy and all associated Standard Operating Procedures. These instruments regulate the planting, protection, felling, maintenance, and long-term management of trees situated on municipal property and ensure that all arboricultural activities are conducted in a consistent, professional, and sustainable manner. The Tree Management Policy is currently undergoing its 5-year review.

The Municipality adopts a sustainable development approach to urban forestry, with the objective of enhancing the ecological quality, resilience, and visual character of the CBD. This approach supports the greening of areas within the Stellenbosch Municipality through the promotion of sustainable urban forestry practices and serves as a guiding framework for investors and developers committed to environmentally responsible and eco-sensitive development.

Objectives and Benefits of maintaining Urban Forest(s).

- ⚠ Enhance urban liveability through tree planting, shade provision, and streetscape improvements.
- ⚠ Conserve biodiversity by prioritising indigenous tree species that support local ecosystems.
- ⚠ Mitigate and adapt to climate change through increased canopy cover, carbon sequestration, and reduced urban heat.
- ⚠ Protect heritage and significant trees for their cultural, historical, and ecological value.
- ⚠ Integrate tree planning into urban development and spatial planning processes.
- ⚠ Establish clear roles and responsibilities for municipal departments, private landowners, and other stakeholders. Provide guidelines for planting, maintenance, and removal of trees on municipal and private land.
- ⚠ Promote education, community involvement, and stewardship of urban trees.

- Trees infested by the Polyphagous Shot Hole Borer (PSHB) are monitored, and dead trees will be felled.

Table 156: Environmental Management Challenges

Challenge	Actions to address
Severe Weather Conditions	The adverse weather conditions caused destructive damage in the Urban Forest, nature reserves and areas that affected infrastructure and flora. These conditions have resulted in negative effects on both the natural and built environment. Repair work to the affected environments is gradually underway.

3.9 COMPONENT E: SECURITY AND SAFETY

3.9.1 LAW ENFORCEMENT

The primary role of Law Enforcement is the enforcement of municipal bylaws and the protection of municipal assets, infrastructure, and staff. Core functions include monitoring and preventing illegal land invasions, managing CCTV surveillance and the operational control room, and overseeing security service provider monitoring.

The department further renders operational support to other departments, including escort duties, which have increased significantly due to high-risk areas, damage to infrastructure, and gang-related activities. Law Enforcement also plays an active role in addressing issues of homelessness through enforcement and support initiatives.

Operational Activities:

- Operational Coordination: Weekly planning sessions with SAPS and other safety partners have strengthened inter-agency collaboration and response times;
- 24/7 Control Room: The operational control room remains active around the clock, enhancing service delivery and coordination with other role-players;
- Increased Enforcement Activity: Law Enforcement issued a total of 4,123 fines (Sections 56 and 341) in 2024/25, nearly doubling the previous year's total, reflecting intensified enforcement efforts;
- Liquor Compliance: A total of 122 liquor inspections were conducted, up from 95 in the previous year, contributing to safer public spaces;
- Scrap Metal and Bucket Shop Inspections: These rose to 91 inspections, targeting illegal trading and theft-related activities; and
- Public Engagement: 81 awareness sessions were held, focusing on community education.

Challenges:

- Staffing Constraints: The department continues to face insufficient personnel to implement a 24/7 service;
- Infrastructure Limitations: Lack of office space and the absence of a CCTV/LPR service provider have hindered surveillance and monitoring capabilities;
- Social Pressures: The rise in homelessness has led to increased bylaw violations and strain on enforcement resources; and
- Land Invasions: Ongoing efforts to prevent illegal land occupation remain resource-intensive and complex.

Law Enforcement attended to the following from 2022/23, 2023/24 and 2024/25:

Table 157: Law Enforcement highlights

Type of activity	2022/23	2023/24	2024/25
Fines issued Section 56's and 341's	5 196	2 078	4 123
Liquor Compliance Inspections	51	95	122
Scrap Metal / Bucket Shop Inspections	67	83	91
Law Enforcement Awareness sessions	33	64	81

3.9.2 TRAFFIC SERVICES

Traffic Services is performing its functions as guided by the National Road Safety Strategy, with its main objective being to achieve traffic safety on municipal roads, including the functions as defined in the municipality's IDP.

The National Road Safety Strategy provides all-year-round road safety initiatives. The municipality has increased its enforcement strategy in collaboration with stakeholders and affected parties. Operations like automatic number-plate recognition are conducted to improve compliance with and payment of traffic fines.

Ongoing objectives are to improve road user behaviour; reduce the incidence of traffic offences; speeding; drunk driving and driving under the influence of narcotics; dangerous overtaking; remove unfit road users from traffic; roadworthiness of vehicles; public transport compliance concerning vehicles and drivers; provide sufficient and coordinated regulation of traffic on strategic roads; provide pedestrian education and compliance; eradicate corruption; ensure administrative compliance; and improved enforcement systems. This includes additional hours and Saturday operations at the Admin Section and a new approach to law enforcement strategies.

Highlights:

Traffic Service strategies have managed to yield favourable results.

Traffic Services demonstrated a strong performance across various operational areas. A total of **2 622 driver's license tests and 2 564 learner's license tests were conducted**, showing a significant increase in testing capacity compared to the previous year. Enforcement efforts intensified, with **59 866 Section 56 notices and 43 552 Section 341 notices issued**, reflecting a continued commitment to road safety and compliance.

Public engagement also saw a boost, with 107 traffic awareness sessions held—an increase that underscores the department's dedication to education and preventative measures. Speed enforcement was notably robust, with **416 592 camera speeding fines issued**, marking a substantial rise from the previous year. The use of technology in enforcement remained strong, with **108 ANPR** (Automatic Number Plate Recognition) interventions carried out.

Operational activities included 285 public transport operations and 214 drunk driving operations, both contributing to safer roads and more regulated transport systems. These figures collectively highlight a year of enhanced enforcement, increased public engagement, and improved service delivery by Traffic Services.

Challenges:

-  Inadequate Human Resources: Limited Staff;
-  To render a 24/7 traffic service;

- ✦ The capacity of the Driver's Licence Testing Centre limits the number of tests that can be performed in a day; and
- ✦ Vehicle Testing Station infrastructure challenges and staff shortages.

Stellenbosch is continuing to be a preferred business and employment hub. The resources required to provide a quality service to the residents and business sector are inadequate and pose a significant challenge for the future. This limitation has a negative impact on service delivery.

Service Statistics – Traffic Services

Table 158: Service Data for Traffic Services

Details	2021/22	2022/23	2023/24	2024/25
Drivers License Tests	2 211	2 095	1 189	2 622
Learner Driver License Tests	3 118	4 471	3 363	2 564

Number of Section 341 Notices Issued	28 062	29 867	35 823	43 552
Traffic Awareness Sessions	86	54	82	107
Number of camera speeding fines issued	357 144	372 420	353 279	416 592
Number of ANPR interventions	97	100	118	108
Number of public transport operations	258	261	320	285
Number of drunken driving operations	275	223	208	214

3.9.3 FIRE AND DISASTER MANAGEMENT

The Republic of South Africa's 1996 Constitution imposes legal obligations on the government to protect the health and safety of its citizens. Section 41(1)(b) determines that all spheres of government are required to "secure the well-being of the people of the Republic," while Section 152(1)(d) requires that local government "ensure a safe and healthy environment."

The fire service strives to be proactive in preventing fires and other risks rather than simply reacting to fires through –

- a. Acting in support of the wider developmental agenda as outlined in the NDP;
- b. Establishing sound institutional and administrative capabilities that support its roles and purpose;
- c. Demonstrating good governance and administration;
- d. Adopting community-based approaches;
- e. Putting people and their concerns first; and
- f. Professionalisation of the function.

Highlights:

- ✦ New rapid response vehicle to access fires in informal settlements; and
- ✦ Commenced planning for the building of a fire station in Jamestown.

Image 29: New rapid response vehicle

Shifting from disaster management to disaster risk reduction

Disaster risk reduction is a new approach to how disasters and disaster risk are managed. It may be regarded as 'the systematic development and application of policies, strategies and practices to minimise vulnerabilities and disaster risks throughout a society, to avoid (prevention) or to limit (mitigation and preparedness) adverse impact of hazards, within the broad context of sustainable development' (ISDR, 2002:25).

Disaster risk reduction strategies include vulnerability and risk assessment, institutional capacities and operational abilities. The vulnerability of critical facilities, social and economic infrastructure, early warning systems and the application of many types of scientific, technical and other skilled abilities that are essential features of disaster risk reduction must be assessed. Disaster risk reduction is multidisciplinary in nature and does not assume that only one function of government has responsibility.

**Table 159: Disaster Risk Reduction**

Disaster management (traditional)	Disaster risk reduction
Primary focus on hazards	Major focus on vulnerability
Single, event-based scenarios	Dynamic, multiple-risk issues
Basic responsibility to respond to an event	Fundamental need to assess and update
Often fixed, location-specific conditions	Often fixed, location-specific conditions
Responsibility in a single authority or agency	Extended, shared or regional locales
Established hierarchical relationships.	Multiple interests, actors and responsibilities.
Command-and-control directed operations	Situation-specific functions and free association
Urgent, immediate to short time frames in outlook, planning, attention and return	Shifting, fluid and tangential relationships and Comparative, moderate to long time frames in outlook, planning and return values

Challenges:

- ✚ Expanding and densifying of informal settlements
- ✚ The manifestation of climate change – seen in excessive rains and flooding, as well as in more frequent and ferocious veld fires.

3.10 COMPONENT F: SPORT AND RECREATION

3.10.1 HOLIDAY RESORTS AND CAMPSITES

The Stellenbosch Municipality is responsible for the management and maintenance of one picnic site, the Jonkershoek Picnic Site. This site is situated in the Jonkershoek Valley on the banks of the Eerste River. The picnic site attracts up to 15 840 visitors per annum due to its natural beauty and tranquillity, set at the foothills of the Jonkershoek mountains, and provides outdoor leisure for visitors, catering for braais and picnics along the river course.

Table 170: Service Statistics – Holiday Resorts and Campsites

Type of service	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25

The Stellenbosch Municipality is responsible for the management and maintenance of fifteen (15) sports grounds in its municipal area. The picturesque beauty of the Stellenbosch Mountains surrounds these grounds. Ten (10) are in urban areas, and seven are in rural areas.

It is the municipality's goal to create active, healthy communities and to provide a sporting hub for all its residents and visitors by offering a wide range of well-maintained and well-managed sporting facilities.

Stellenbosch Municipality manages and maintains one swimming pool in the greater Stellenbosch area. The swimming pool is situated in Cloetesville and can accommodate two hundred and seventy-five (275) people at any time per day. The existing facility can host swimming galas and aims to further sports development and recreation.

3.10.1.1 Service Statistics Sport - Grounds And Swimming Pools

Table 171: Service Statistics Sports Grounds and Swimming Pool

Type of service	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25

3.10.1.2 Community Halls and Facilities

Stellenbosch Municipality is the proud owner of two top-class town halls and nine community facilities that cater to residents and both national and international visitors.

The facilities are available throughout the year (365 days per annum) and can be booked for events such as meetings, weddings, training sessions, conferences, and community and social events.

**Table 172: Total functions: Community Halls and Facilities**

Type of service	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Total functions at municipal halls

Total	460	119	433	645	585	650

Highlights within the department

Table 173: Highlights within the Department: Sports, Halls and Recreation

Highlight	Description
Groendal Community Hall upgrades.	The Groendal Community Hall was devastated by the September 2023 floods internally and externally. The parking has been restored with the assistance of PMU, and a completely new fence has been installed.
Installation of new air-conditioning units in various halls.	New air-conditioning units were installed in the Groendal Community Hall. Furthermore, obsolete air-conditioning units have been replaced with new units at the Wemmershoek, Pniël and Kylemore Community Halls. New air-conditioning units were also installed in the Klapmuts MPC kitchen and the Stellenbosch Town Hall kitchen.
Events held during the past financial year.	Various events of all kinds at the various venues were successfully held without any major incidents. This is done in conjunction with Law Enforcement, Fire and Rescue, Traffic Services, Disaster Management, Noise Control, Waste Management, Cape Winelands Health Services, Engineering Services and SAPS.
Fencing of sport facilities.	Wemmershoek - Lanquedoc and Klapmuts Sport Facility received perimeter fencing, which enables strict access control to these facilities and minimises theft and vandalism.
Netball courts resurfacing.	Kylemore Sport Facility's netball courts were received, allowing netball games to continue.
Upgrading of Cloetesville Community Swimming Pool.	New fencing was installed around the main pool. New paving and artificial grass were installed at the facility.

Challenges within the department

Table 174: Challenges within the Department: Sports, Halls and Recreation

Challenges	Description	Corrective Measures
Theft and vandalism at sport facilities	Unauthorised and illegal entry resulting in theft and vandalism of the sport facility's infrastructure.	Effective boundary fences were erected to allow for strict access control.
Poor lighting on sport fields	The sport facilities' floodlights are outdated and cannot be replaced because the bulbs are discontinued.	Funding was availed in the financial year 2025/26 to appoint a consultant and service provider to upgrade all floodlights to the latest sustainable technology.

The table below indicates the capital expenditure for the Section: **Sport, Recreation and Halls** as at 30 June 2025.

3.11.2 HUMAN RESOURCES SERVICES

The vision of the Department: Human Resources Management is undoubtedly to build partnerships with management at all levels of the organisation, to create a culture or working environment where employees are valued and appreciated, and to ensure a diverse, qualified, healthy, and highly motivated workforce focused on achieving critical outcomes through the development and administration of cost-effective and results-oriented human resources.

Accordingly, the mission of the Department: Human Resources Management is to provide services that promote a work environment that is characterised by fair treatment of staff, open communications, personal accountability, trust, and mutual respect. The municipality will seek and provide solutions to workplace issues that support and optimise the operating principles of the organisation.

The Department: Human Resources Management objectives for Stellenbosch Municipality include, but are not limited to:

- Helping the organisation achieve its goals;
- Ensuring effective utilisation and maximum development of human resources;
- Ensuring respect for human beings;
- Identifying and satisfying the needs of individuals;
- Ensuring reconciliation of individual goals with those of the organisation;
- Achieving and maintaining high morale among employees;
- Providing the organisation with well-trained and well-motivated employees;
- Increasing employees' job satisfaction and self-actualisation;
- Developing and maintaining the quality of work-life;

- ✦ Being ethically and socially responsive to the needs of the community;
- ✦ Developing the overall personality of each employee in its multidimensional aspect;
- ✦ Enhancing employees' capabilities to perform the present job; and
- ✦ Ensuring service excellence for the Stellenbosch municipal area.

The figure below illustrates the services rendered by the Human Resource Management Department.

Figure 32: HRM elements

Each director, manager, departmental head, superintendent, assistant superintendent, and foreman is responsible for setting objectives, delegating responsibilities and tasks, motivating staff, disciplining staff, developing skills and career paths, measuring performance, and generally guiding their staff. In these endeavours, management and line management are assisted by the Department: Human Resources Management, which provides policies, guidelines, support, systems, and specialised inputs.

The table below indicates the total number of employees in the Department: Human Resource Management as at 30 June 2025:

Table 178: Total number of employees in the Department: Human Resources Management

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)

4 – 8	5	3	2	40
3 – 0	0	0	0	0
Total	20	18	2	10

3.11.3 INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) SERVICES

The Department of ICT committed its time in the 2024/25 financial year to reviewing ICT contracts and the purchase and replacement of computer software and hardware to further enable the various municipal business units.

Operational Activities

- ✦ High-site wireless hardware links were procured and delivered during this time, with the plan to upgrade the municipal network to the outer-lying areas under the WC024 area. A rate tender for WAN infrastructure was approved to assist in shortening the municipality's turnaround time in commissioning new sites and improving current location services.
- ✦ Enhanced security levels against malware attacks and the like by implementing and successfully commissioning the supply and installation of next-generation firewalls with unified threat management and licensing.
- ✦ Successfully extended the fibre rollout connectivity to an additional 4 office buildings to ensure solid / stable connectivity and increased capacity for needed communications to service ICT, CCTV, and electricity-specialised services.
- ✦ Successfully extended the services of the municipality's e-mail protection and injection system, Mimecast, by introducing DMARC (Domain-based Message Authentication, Reporting, and Conformance), which is a standard that prevents spammers from using the municipality's domain to send email without its permission—also known as spoofing.
- ✦ Introduced and successfully rolled out security awareness training using Mimecast for all computer-enabled staff by way of guided security video clips to help harden the municipality's security posture against malware attacks.
- ✦ The Global Information System ESRI GIS, in its 2nd year, developed a customer care module and revived the **Tree Application Management System** (TRAMS). ESRI GIS continued with the upgrade of the BPAMS and TPAMS and began the development of incorporating the SAMRAS electronic signature to improve turnaround times in approval across all stages with the submission of plans.
- ✦ ICT continued streamlining and securing the Microsoft Office 365 and Windows 10 migration to improve collaboration within and between directorates by introducing added functionality within Teams and OneDrive.
- ✦ Went out to the market to procure storage, which consisted of two hosts and one Tintri VMstore storage. This has been successfully installed and is currently online and will be the replacement for multiple hosts and Tintri VMstore storage that will reach End of Service Life (EOSL) in the 2025/26 financial year.
- ✦ ICT, in conjunction with the Collaborator service provider, successfully upgraded Collaborator to the latest version.
- ✦ Assisted the Electrical Engineering Department and service provider with the SCADA project, which included the installation and implementation of 2 SCADA servers at the ITC DC server room on the ground floor.
- ✦ Successfully relocated the DR site from Teraco Rondebosch to Teraco Brackenfell with the new service provider.

3.11.3.1 Service Statistics – Information and Communication Technology (ICT)

Table 179: Service Statistics – ICT

Details	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
	%

3.11.4 LEGAL SERVICES

The Section: Legal Services, in conjunction with user departments, ensures and manages the implementation, monitoring, evaluation, and reporting of key service delivery objectives concerning Legal Services.

The main objectives are the following:

- ✚ Advise and manage litigations instituted by the municipality and against it;
- ✚ Provide legal advice, opinions, and input on policies, contracts, agreements, memorandums, legislation, bylaws, and regulations;
- ✚ Advising the Municipal Council, Mayco, and Portfolio Committees on items submitted to meetings;
- ✚ Ensuring bylaws are promulgated after consultation with user departments and approved by the Council; and
- ✚ Attend to new legislation and proclamations for comment as and when required.

Challenges:

- ✚ To deal with urgent requests for legal input to the Sections 79 and 80 committees;
- ✚ Lack of skilled administrative support for the Chief Legal Advisor; and
- ✚ Availability of a well-maintained legal library and reference resources.

- ✚ The table below indicates the total number of employees in the Section: Legal Services as at 30 June 2025.

Table 182: Total number of employees in the Section: Legal Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number

3 – 0	0	0	0	0
Total	2	1	1	50

3.11.5 MUNICIPAL COURT – ADDITIONAL COURT - STELLENBOSCH

The Municipal Court is responsible for the following prosecutions:

- ✚ Traffic bylaws;
- ✚ Provincial traffic bylaws;
- ✚ SAPS bylaws;
- ✚ Law enforcement bylaws;
- ✚ Fire bylaws;
- ✚ Building and Land Use Regulations, and all other bylaw contraventions;
- ✚ Electrical Bylaws; and
- ✚ Noise pollution.

Mission Statement of the Municipal Court

The Municipal Court aims to: -

- ✚ promote justice and service delivery;
- ✚ enhance revenue to invest in the community;
- ✚ "Let Justice be seen to be done"; and
- ✚ minimise crime and have a safer Stellenbosch.

The Municipal Court was established to:

- ✚ Support and secure good governance;
- ✚ Ease the burden on regular courts;
- ✚ Increase the speed of services;
- ✚ Allow for more successful prosecutions by applying specialist knowledge;
- ✚ Improve communications between the bylaw prosecutors and enforcers;
- ✚ Support bylaw enforcement;
- ✚ Ensure a user-friendly court; and
- ✚ Keeps members of the public who committed a minor crime (such as a traffic offence) away from hardened criminals.

The municipality is also looking into having an ad hoc court in Franschoek / Klapmuts in the near future. This could be another boost for the Municipal Court's service to the community. Prosecuting some of the cases in the Paarl Magistrate's Court is also currently being considered.

The introduction of the Municipal Court has been an essential, strategic implementation that will benefit the whole community of Stellenbosch.

3.12 COMPONENT H: ORGANISATIONAL PERFORMANCE SCORECARD

3.12.1 PERFORMANCE MANAGEMENT

Performance management is defined as a management mechanism through which a municipality can plan, manage, monitor, and review the performance of the municipality and its employees to measure the progress made in achieving the objectives set out in the Integrated Development Plans (IDPs) and further measure the efficiency, effectiveness, and impact of its service delivery.

Section 152 of the Constitution of the Republic of South Africa, 1996, deals with the objectives of local government and paves the way for performance management. The idea of an accountable government is important to meet the needs of Stellenbosch. The democratic values and principles in terms of Section 195(1) of the Constitution are also linked with the concept of performance management.

Figure 33: Performance Management Principles

It is a statutory requirement, according to the MSA, to establish a performance management system and an IDP that must be aligned with the municipal budget. The monitoring of the organisational performance of the budget must be done against the IDP every quarter via the Service Delivery and Budget Implementation Plan (SDBIP). The report is made public after the council has been informed of the quarterly progress against set targets.

In addition, Regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations of 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting, and improvement will be conducted, organised, and managed, including determining the roles of the different role players." Performance management is not only relevant to the organisation but also to the individuals

employed in the organisation, as well as the external service providers and municipal entities. This framework, inter alia, reflects the linkage between the IDP, the Budget, and the SDBIP.

3.12.1.1 Legislative Requirements

In terms of Section 46(1)(a) of the MSA, a municipality must prepare a performance report for each financial year that reflects the municipality's and any service provider's performance during the financial year. The report must furthermore indicate the development and service delivery priorities, the performance targets set by the municipality for the following financial year, and measures that were or are to be taken to improve performance.

3.12.1.2 Organisational Performance

A strategic performance assessment indicates how well the municipality is meeting its objectives and which policies and processes are working. All government institutions must report on strategic performance to ensure that service delivery is efficient, effective, and economical. Municipalities must develop strategic plans and allocate resources for their implementation. The implementation must be monitored on an ongoing basis, and the results must be reported to various role players during the financial year to enable them to implement corrective measures when and where required.

This report highlights the strategic performance in terms of the municipality's Top-layer Service Delivery and Budget Implementation Plan (SDBIP), high-level performance in terms of the strategic objectives of the municipality, and performance on the National Key Performance Indicators prescribed in terms of Section 43 of the MSA.

3.12.1.3 Governance Framework for the IDP, Budget, and Performance Management

The IDP is the principal planning instrument that guides and informs the municipal budget. The MSA requires each municipality in South Africa to prepare a strategic plan to guide all development and management within the municipal area. The IDP sets out the development priorities of Stellenbosch Municipality over the next five years. The IDP must guide and determine municipal planning and project implementation. The 2024/25 budget was based on the IDP and other spheres of government and service providers.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. In keeping with the more evolved and strategic approach to this IDP, the implementation plan focuses on only the key strategic programmes, projects, and initiatives that will support the achievement of the priorities during the five-year term of office. Its focus is on development in a broader sense, and it is a structured plan that informs budget priorities, decision-making, and the allocation of resources.

The focus of the IDP is varied and includes the provision of basic municipal services, measures for building and transforming municipal capacity, measures to assist in expanded livelihood opportunities for citizens, enterprise development, building dignified and safe living environments, and, crucially, exploring new ways of working and living together. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The three-year budget sets out the revenue-raising and expenditure plan of the municipality for approval by the Council under the MFMA. The allocation of funds needs to be aligned with the priorities in the IDP.

The IDP must be reflected in the performance agreements of the relevant staff and, through the budget, in the service delivery and budget implementation plan (SDBIP). The key performance management instrument of the municipality is the SDBIP. Linked to the IDP, the SDBIP forms the basis of the performance contracts of directors and quarterly, mid-year, and annual performance reviews of senior management, directorates, and the municipality.

3.12.1.4 Service Delivery and Budget Implementation Plan

The purpose of performance reporting is to report specifically on the implementation and achievement of IDP outcomes. This section should provide an overview of the achievements of a municipality in terms of the strategic intent and deliverables achieved as stated in the IDP. The Top-layer (strategic) SDBIP is the municipality's strategic plan and shows the strategic alignment between the different documents (IDP, budget, and performance agreements).

The organisational performance is evaluated using a Municipal Scorecard (TL SDBIP) at an organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where, and when the strategies, objectives, and normal business processes of the municipality are implemented.

MFMA Circular No. 13 is a clarification of the Municipal Budget and Reporting Regulations, Schedule A 1, GenN 393 in GG32141 of 2009, and prescribes that the:

- ✦ IDP and Budget must be aligned;
- ✦ The Budget must address the strategic priorities;
- ✦ SDBIP should indicate what the municipality is going to do during the next 12 months; and
- ✦ SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

3.12.1.5 The Municipal Scorecard (Top-Layer SDBIP)

The municipal scorecard (Top-layer SDBIP) consolidates service delivery targets set by the Council as advised by senior management and provides an overall picture of the performance of the municipality, reflecting performance in its strategic priorities for the 2024/25 financial year. The scorecard is a performance evaluation tool and is used during informal and formal performance reviews.

The organisational performance is evaluated using a municipal scorecard (Top-layer SDBIP). Performance objectives, as reflected in the municipal scorecard, are required to be practical, measurable, and based on the key performance indicators.

It also allocates responsibility to directorates for delivering services in line with the IDP and the budget.

A one-year detailed plan is presented with the following components:

- ✚ Monthly projections of revenue to be collected from each source;
- ✚ Monthly projections of expenditure (operating and capital) and revenue for each vote;
- ✚ Quarterly projections of service delivery targets and performance indicators for each vote;
- ✚ Ward information for expenditure and service delivery; and
- ✚ A detailed capital works plan broken down by ward over three years.

Top-layer KPIs were prepared based on the following:

- ✚ Key performance indicators (KPIs) for the programmes / activities identified to address the strategic objectives as documented in the IDP in cooperation with the community, which identify developmental priorities;
- ✚ KPIs identified during the IDP and KPIs that need to be reported to key municipal stakeholders; and
- ✚ KPIs to address the required national minimum reporting requirements.

3.12.1.6 Amendment of the Top-Layer SDBIP

The revised TL SDBIP 2024/25 was submitted to the Council for approval on 29 January 2025.

The municipality utilises a web-based, real-time, performance-based system on which KPI owners update actual performance monthly. KPI owners report on the results of the KPI by documenting the following information on the performance system:

- ✚ The actual result in terms of the target set;
- ✚ A performance comment; and
- ✚ Actions to improve performance include the submission of corrective measures to meet the set target for the reporting interval in question if the target is not achieved.

It is the responsibility of every KPI owner to maintain a portfolio of evidence to support actual performance results that are updated and provided to the internal auditor and AGSA upon request during the quarterly and annual audit testing.

3.12.1.7 Monitoring of the Service Delivery and Budget Implementation Plan (SDBIP)

Other municipal personnel

The municipality has implemented individual performance management for employees at the three highest levels of management.

Municipal Manager and Managers Directly Accountable to the Municipal Manager

The MSA prescribes that the municipality must enter into performance-based agreements with the municipal manager and managers directly reporting to the municipal manager, i.e., MSA Section 56 managers. Performance agreements must be reviewed annually and published in the public interest. This process and the format are further regulated by Regulation 805 (August 2006), MSA.

The revised (latest) performance plans for the municipal manager and MSA Section 56 appointments for the 2024/25 financial year were concluded. They include performance agreements for the:

- ✚ Municipal Manager;

- Chief Financial Officer;
- Director: Corporate Services;
- Director: Planning and Local Economic Development;
- Director: Community and Protection Services; and
- Director: Infrastructure Services.

Table 186: Performance Management Governance

	Performance Management Policy	All MSA s57/56 performance contracts signed	Audit Committee	Municipal Public Accounts Committee (MPAC)	Quarterly Performance Reporting to the Council	Annual Performance Reporting to the Council
In place?	√	√	√	√	√	√

In the paragraphs below, the performance achieved is illustrated against the Top-layer SDBIP according to the IDP strategic objectives. The following table explains the method by which the overall assessment of actual performance against targets set for the key performance indicators (KPIs) of the SDBIP is measured:

Table 187: Performance Assessment Criteria

Colour	Category	Explanation
	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
	KPI Not Met	Actual vs. target less than 75%
	KPI Almost Met	Actual vs. target between 75% and 100%
	KPI Met	Actual vs. target 100% achieved
	KPI Well Met	Actual vs. target, more than 100% and less than 150% achieved
	KPI Extremely Well Met	Actual vs. target of more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidates service delivery targets set by the Council / Senior Management and provides an overall picture of performance for the municipality, reflecting performance on its strategic priorities.

3.12.1.8 Overall Performance per Municipal Strategic Focus Area

The following graph and table illustrate the municipality's overall performance per Municipal Strategic Focus Area (SFA).

Graph 18: Overall Performance per SFA's

Table 188: Overall performance per SFA- 01 July 2024 – 30 June 2025

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance

Total:	47	5	8	3	12	19
	100%	10.64%	17.02%	6.38%	25.53%	40.43%

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE

4.1 INTRODUCTION TO THE MUNICIPAL WORKFORCE

Stellenbosch Municipality, as of 30 June 2025, employed **1 168** officials (excluding councillors and non-permanent positions) who individually and collectively contributed to the achievement of the municipality's objectives. The primary objective of Human Resource Management is to render an innovative HR service that addresses both skills development and administrative functions.

4.1.1 EMPLOYMENT EQUITY

The Employment Equity Act, 1998 (Act No. 55 of 1998), Chapter 3, Section 15(1), states that affirmative action measures are measures designed to ensure that suitably qualified people from designated groups have equal employment opportunities and are equitably represented in all occupational categories and levels in the workforce of a designated employer. The national performance indicator also refers to the "number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan." The following table provides clarity on the employment equity status.

Table 189: EE Targets / Actual by Racial Classification

Financial Year	African			Coloured			Indian			White

Grand total	287	454	4	51	221	287	1	37	1 342

4.1.4 VACANCY RATE

A total of **190** posts were vacant and funded at the end of the 2024/25 financial year, resulting in a vacancy rate of **14%**.

The table below indicates the vacancies within the municipality:

Table 193: Vacancy rate per post and functional level

Per Post Level		
Post Level	Filled	Vacant
Top Management (MM and MSA section 57 Managers)	5	1
Senior Management	14	0
Middle management	82	9
Skilled technical and academically qualified workers, junior management, supervisors, foremen and superintendents	371	91
Semi-skilled	430	37
Unskilled and defined decision-making	266	52
Total	1168	190
Per Functional Level		
Functional area	Filled	Vacant
Office of the Mayor	45	0
Office of the Municipal Manager	15	1
Financial Services	130	10
Planning and Economic Development	95	12
Corporate	69	11
Community and Protection Services	409	79
Infrastructure Services	450	77
Total	1213	190

4.1.5 TURNOVER RATE

A high turnover rate may be costly to a municipality and might negatively affect productivity, service delivery, and institutional memory / organisational knowledge. Below is a table that shows the turnover rate in the municipality.

The table below indicates the turnover rate over the last four financial years.

Table 194: Turnover Rate

Financial year	Total number of appointments at the end of each Financial Year	New appointments	Number of terminations during the year	Turnover Rate
2018/19	1 121	55	39	3.47%
2019/20	1 158	60	51	4.40%
2020/21	1 142	48	61	5.34%
2021/22	1 140	82	82	7.19%
2022/23	1 137	96 (incl promotion)	71	6.2%
2023/24	1 148	72 (New) 39 (Promotions)	70	6.1%
2024/25	1 168	101 (New: 77 (Promotions: 24)	66	5.7%

4.1.6 OCCUPATIONAL INJURIES

Overseeing the municipal workforce involves analysing and coordinating employee behaviour.

An occupational injury refers to a personal injury, illness, or fatality that arises from an incident occurring in the workplace. Compensation claims for occupational injuries are determined based on the severity of the injury or disease and may incur significant costs for a municipality. An occupational injury will impact the loss of man-hours and, consequently, financial and productivity outcomes.

Table 195: Injuries per Directorate

Directorates	2020/21	2021/22	2022/23	2023/24	2024/25
Office of the Municipal Manager	0	0	0	1	4
Financial Services	4	0	0	6	5
Planning and Economic Development Services	10	12	10	2	6
Corporate Services	9	5	7	5	2
Community and Protection Services	21	35	64	59	60
Infrastructure Services	77	57	69	56	60
Total	121	109	150	129	137

Injuries in operational services are normally higher due to the nature of work and the constant handling of equipment and machinery.

4.1.7 SICK LEAVE

The number of sick days taken by employees has an impact on costs and service delivery. The monitoring of sick leave identifies certain patterns or trends. Once patterns of concern are identified, corrective actions are taken.

The total number of employees who have taken sick leave during the **2024/25** financial year shows an increase of **1 187.93** working days when compared to the **2023/24** financial year.

The table below indicates the total number of sick leave days taken within the different directorates.

**Table 196: Table 185: Sick Leave as at 30 June 2025**

Directorate	2022/23	2022/23 (%)	2023/24	2023/24 (%)	2024/25	2024/25 (%)
Office of the Municipal Manager	83	19.45	106	28.39	107.73	26.93
Financial Services	667	21.75	660.62	19.98	800	28.86
Planning and Economic Development	449	21.59	391.22	16.30	404	15.95

Community and Protection Services	1 915.93	19.21	1 792.28	17.10	2218	20.34
Infrastructure Services	2 181.51	19.20	2 093.68	16.99	2 562.5	21.31
Total	5 777.23	21.16	5 435.30	20.06	6 623.23	22.75

4.1.8 SUSPENSIONS AND CASES OF FINANCIAL MISCONDUCT

Table 197: Suspensions and Cases of Financial Misconduct

Number and Period of Suspensions				
Position	Nature of Alleged Misconduct	Date of Suspension	Details of Disciplinary Action taken or Status of Case and Reasons why not Finalised	Date Finalised
Superintendent Sport Ground Maintenance	Gross Dishonesty / Gross Negligence	23 August 2024	The disciplinary process involved external stakeholders who were not readily available to provide more detailed information. After receiving this information, there was an extensive investigative process which involved complex reports, such as jerrycan reports, petrol card reports, vehicle tracking reports, etc., that had to be perused, including applicable policies and legislation, as well as interviews with internal staff members to establish whether or not to pursue disciplinary action against the employee. The disciplinary notification of the hearing was issued, and the hearing is scheduled for 08 September 2025.	Pending
Foreman Sportground Maintenance	Gross Dishonesty / Gross Negligence	23 August 2024	The disciplinary process involved external stakeholders who were not readily available to provide more detailed information. After receiving this information, there was an extensive investigative process, which involved complex reports such as jerrycan reports, petrol card reports, vehicle tracking reports, etc., that had to be perused, including applicable policies and legislation, as well as interviews with internal staff members to establish whether or not to pursue disciplinary action against the employee. The disciplinary notification of the hearing was issued, and the hearing is scheduled for 11 September 2025.	Pending

4.1.9 DISCIPLINARY ACTION TAKEN ON CASES OF FINANCIAL MISCONDUCT

No employees were charged with any financial misconduct-related matters during the 2024/25 financial year.

Table 198: Disciplinary action taken on cases of financial misconduct

Disciplinary Action Taken on Cases of Financial Misconduct			
Position	Nature of Alleged Misconduct and the Rand value of any loss to the municipality	Disciplinary action taken	Date Finalised
N/A	N/A	N/A	N/A

4.1.10 PERFORMANCE REWARDS BY GENDER

The municipality does not have a Rewards and Recognition policy for the year under review.

Table 199: Performance Rewards by gender

Performance Rewards by Gender					
Designations	Beneficiary profile				
	Gender	Total number of employees in the group	Number of beneficiaries	Expenditure on rewards, Year 1	Proportion of beneficiaries within the group
				R' 000	%
Lower-skilled (Levels 1-2)	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
Skilled (Levels 3-5)	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
Highly skilled production (levels 6-8)	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
Highly skilled supervision (levels 9-12)	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
Senior management (Levels 13-15)	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
MM and S57	Female	N/A	N/A	N/A	N/A
	Male	N/A	N/A	N/A	N/A
Total					
Has the statutory municipal calculator been used as part of the evaluation process?					Yes/No
Note: MSA 2000 S51(d) requires that ... 'performance plans, on which rewards are based, should be aligned with the IDP'... (IDP objectives and targets are set out in Chapter 3) and that Service Delivery and Budget Implementation Plans (developed under MFMA S69 and Circular 13) should be consistent with the higher level IDP targets and must be incorporated appropriately in personal performance agreements as the basis of performance rewards. Those with disabilities are shown in brackets (x) in the 'Number of beneficiaries' column as well as in the numbers at the right-hand side of the column (as illustrated above).					T 4.4.1

4.1.11 HUMAN RESOURCES POLICIES AND PLANS

Policies and plans guide fair and consistent staff treatment and a consistent approach to the management of staff.

The table below shows the status of the Human Resources policies and plans:

Table 200: Approved Policies for the year under review

Name of policy	Date approved / revised
Recruitment and Selection	25 June 2025
Revised Leave Policy	12 May 2025 (submitted to LLF for review)
Performance Management Policy	12 May 2025 (submitted to LLF for review)

The Department: Human Resources Management submits policies to the Local Labour Forum regularly for review purposes.

4.1.12 CAPACITY BUILDING OF THE MUNICIPAL WORKFORCE

The Skills Development Act, 1998 (Act No. 97 of 1998) and the MSA require that employers supply employees with the necessary training to develop their human resource capacity. Section 55(1)(f) states that, as head of administration, the Municipal Manager is responsible for the management, utilisation, and training of staff.

4.1.13 SKILLS MATRIX

The table below indicates the number of employees who received training in the year under review.

Table 201: Number of employees who received training

Management level	Gender	Number of employees identified for training at the start of the year	Number of employees who received training
MM and S57	Female	0	0
	Male	0	0
Legislators, senior officials, and managers	Female	6	3

*% and *R value of municipal salaries (original budget) allocated for workplace skills plan.									0.71%*	*R4 875 360.
The above total includes training, bursaries and work-integrated learning as per the workplace skills plan									T4.5.3	

4.1.15 NUMBER OF EMPLOYEES WHOSE SALARIES WERE INCREASED DUE TO THEIR POSITIONS BEING UPGRADED

Due to an impasse between SALGA and municipalities regarding the payment for the Deloitte TASK licence, no posts were evaluated during the 2024/25 financial year.

Table 203: Number Of Employees Whose Salaries Were Increased Due To Their Positions Being Upgraded

Number Of Employees Whose Salaries Were Increased Due To Their Positions Being Upgraded		
Beneficiaries	Gender	Total
Lower-skilled (Levels 1-2)	Female	N/A
	Male	N/A
Skilled (Levels 3-5)	Female	N/A
	Male	N/A
Highly skilled production (Levels 6-8)	Female	N/A

	Male	N/A
Total		0
Those with disabilities are shown in brackets '(x)' in the 'Number of beneficiaries' column as well as in the numbers at the right-hand side of the column (as illustrated above).		

T 4.6.2

4.1.16 EMPLOYEES APPOINTED TO POSTS NOT APPROVED

All employees appointed during the 2024/25 financial year were appointed in posts as approved by the Council on the 2017 and 2019 structure and on reviewed structures approved during the 2024/25 financial year.

Table 204: Employees appointed to posts not approved

Employees appointed to posts not approved				
Department	Level	Date of appointment	No. appointed	Reason for appointment when no established post exists
N/A	N/A	N/A	N/A	N/A

4.1.17 EMPLOYEE SALARIES EXCEEDED THE GRADE DETERMINED BY JOB EVALUATION

Due to an impasse between SALGA and municipalities regarding the payment for the Deloitte TASK licence, no posts were evaluated during the 2024/25 financial year.

Table 205: Employee salaries exceeded the grade determined by the job evaluation

Employees Whose Salary Levels Exceed the Grade Determined by Job Evaluation				
Occupation	Number of employees	Job evaluation level	Remuneration level	Reason for deviation
N/A	N/A	N/A	N/A	N/A

The table below indicates that a total of **R5 340 833** was spent on the workplace skills plan. This represents **1.05%** when compared to the total salary budget of the municipality in the 2024/25 financial year.

Table 206: Budget allocated and spent for skills development

Year	Total personnel budget	Total Allocated	Total Spend	% Spent
	R	R	R	
2020/21	R532 497 021	R532 497 021	R3 300 217	0.62%
2021/22	R598 305 199	R5 838 508	R3 267 622	0.55%
2022/23	R588 075 877	R4 500 000	R4 805 444	0.82%
2023/24	R622 332 797	R4 590 000	R5 186 870	1.13%
2024/25	R672 319 694	R5 100 000	R5 340 833	1.05%

4.1.18 MANAGING THE MUNICIPAL WORKFORCE EXPENDITURE

4.1.18.1 Personnel Expenditure

The percentage of personnel expenditure is essential in the budgeting process as it reflects current and future efficiency. The table below indicates the percentage of the municipal budget that was spent on salaries and allowances for the past five financial years, and the municipality is well below the national norm of between **35 to 40%**.

Table 207: Personnel Expenditure as % of Total Operating Expenditure

Financial year	Total expenditure, salary and allowances	Total operating expenditure	Percentage
	R		%
2020/21	544 391	1 809 977	30%
2021/22	550 719	1 925 898	29%
2022/23	542 779	1 947 880	28%
2023/24	632 279	2 241 474	28%
2024/25	667 075	2 499 384	27%

Below is a summary of the councillor and staff benefits for the year under review.

Net cash from (used) financing	82	200 000	118 846	69 648	65.18%	41.40%
Cash / cash equivalents at the year-end	150 679	529 941	678 132	30 709	-27.9%	95.47
Cash backing / surplus reconciliation						
Cash and investments available	606 395	664 486	625 637	549 503	-4%	19%
Application of cash and investments	393 482	(123 804)	(353 160)	(518 795)	-319%	-47%
Balance - surplus (shortfall)	212 914	200 319	341 857	119 970	40%	65%
Asset management						
Asset register summary (WDV)	5 884 571	6 238 418	6 192 990	6 181 567	0.91%	0.18%
Depreciation	206 151	249 408	219 703	205 978	17.41%	6.25%
Renewal of Existing Assets	3 250	40 520	47 325	43 226	-6.68%	8.66%
Repairs and Maintenance	92 311	120 048	122 684	74 491	37.95%	39.28%
Free Services						
Cost of free basic services provided	3 466	8 705	5 705	4 451	48.87%	21.98%
The revenue cost of free services provided	64 549	124 007	124 007	75 582	39.05%	39.05%
Households below the minimum service level						
Water:	-	-	-	-	-	-
Sanitation / sewerage:	1	-	-	-	-	-
Energy:	-	-	-	-	-	-
Refuse:	12	-	-	-	-	-
Although Households receiving refuse removal below the minimum service level may seem high, it is important to note that households below the minimum service level still receive communal refuse collection.						
Variances are calculated by dividing the difference between the actual and original / adjustments budget by the budget. This table is aligned.						

The table below shows a summary of performance against budgets.

Table 210: Performance against Budgets

Financial Year	Revenue				Operating expenditure			
	Budget	Actual	Diff.	%	Budget	Actual	Diff.	%
	R'000				R'000			
2016/17	1 490 495	1 534 354	43 859	2.94%	1 450 845	1 316 387	134 458	9.27%

Component F: subtotal	176 781	324 196	339 960	338 324	-4.36%	0.48%
Holiday Resorts and Campsites	12	932	889	620	33.51%	30.29%
Sports grounds, parks, and swimming pools	1 819	85 541	87 982	80 432	5.97%	8.58%
Community Halls, Facilities, and Thusong Centres	819	6 302	6 809	7 140	-13.29%	-4.86%
Component G: subtotal	2 650	92 775	95 680	88 192	4.94%	7.83%
Office of the MM	5	16 901	17 679	18 026	-6.66%	-1.96%
Financial Services	648 642	129 737	140 243	147 359	-13.58%	-5.07%
Administration	95 795	98 299	99 452	105 220	-7.04%	-5.80%
Property and contract management	7 136	36 439	37 232	29 976	17.74%	19.49%
HR	1 939	73 284	65 729	46 699	36.28%	28.95%
IT	-	50 360	50 560	41 567	17.46%	17.79%
Internal Audit	-	4 068	4 082	3 957	2.73%	3.05%
Legal Services	23	7 344	16 344	14 140	-92.55%	13.48%
Component H: subtotal	753 541	416 432	431 321	406 945	2.28%	5.99%
Total Expenditure	2 416 944	2 435 206	2 478 131	2 466 915	-1.30%	0.45%

In this table, operational income is offset against operational expenditure, leaving a net operational expenditure total for each service. Variances are calculated by dividing the difference between the actual and original / adjustments budget by the budget.

5.1.5 FINANCIAL PERFORMANCE PER MUNICIPAL FUNCTION

The tables below indicate the financial performance per municipal function for the 2024/25 financial year.

5.1.5.1 Water Services

Table 214: Financial Performance: Water Services

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(219 898)	(215 225)	(215 225)	(240 966)	-12%
Expenditure:					
Employees	41 525	39 932	39 932	35 637	11%
Repairs and Maintenance	5 639	7 323	4 361	4 189	5%
Other	137 061	120 197	142 156	138 238	3%
Total Operational Expenditure	184 225	167 452	186 449	178 064	4%
Net Operational (Service)	(35 673)	(47 773)	(28 776)	62 902	119%
Variances are calculated by dividing the difference between the actual and the adjusted budget by the actual.					

5.1.5.2 Sanitation Services

Table 215: Financial Performance: Sanitation Services

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'00/0				%
Total Operational Revenue	(169 300)	(157 737)	(169 037)	(170 621)	-1%
Expenditure:					
Employees	39 825	51 286	51 286	40 841	20%
Repairs and Maintenance	36 550	18 570	17 434	14 551	17%
Other	86 535	131 163	96 657	120 968	-25%
Total Operational Expenditure	162 910	201 020	165 378	176 359	-7%
Net Operational (Service)	(6 390)	43 283	(3 659)	5 738	257%
Variances are calculated by dividing the difference between the actual and the adjusted budget by the actual.					

5.1.5.3 Electricity Services

Table 216: Financial Performance: Electricity Services

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(957 392)	(1 122 237)	(1 176 737)	(1 135 576)	3%
Expenditure:					
Employees	35 288	31 549	31 549	35 887	-14%
Repairs and Maintenance	10 623	10 076	7 127	6 921	3%
Other	912 433	787 775	815 850	849 239	-4%
Total Operational Expenditure	958 343	829 400	854 527	892 047	-4%
Net Operational (Service)	951	(292 837)	(322 210)	(243 529)	24%

Variances are calculated by dividing the difference between the actual and the adjusted budget by the actual.

5.1.5.4 Waste Management Services (Refuse Collections, Waste Disposal, and Recycling)

Table 217: Financial Performance: Waste Management Services (Refuse Collections, Waste Disposal, and Recycling)

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(142 012)	(143 514)	(138 514)	(130 758)	6%
Expenditure:					
Employees	49 759	31 277	31 277	53 724	-72%
Repairs and Maintenance	5 902	6 224	8 001	5 881	27%
Other	67 897	108 604	104 031	92 910	11%
Total Operational Expenditure	123 558	146 105	143 310	152 515	-6%
Net Operational (Service)	(18 453)	2 591	4 796	21 757	-354%

Variances are calculated by dividing the difference between the actual and the adjusted budget by the actual.

5.1.5.5 Integrated Human Development

Table 218: Financial Performance: Integrated Human Settlement

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(19 033)	(26 534)	(32 875)	(30 663)	7%
Expenditure:					
Employees	18 624	22 626	22 475	19 551	13%
Repairs and Maintenance	1 137	5 034	8 534	7 745	9%
Other	(2 404)	11 357	19 781	16 906	15%
Total Operational Expenditure	17 358	39 018	50 791	44 202	13%
Net Operational (Service)	(1 675)	12 483	17 915	13 538	24%

Variances are calculated by dividing the difference between the actual and original adjustment by the actual.

5.1.5.6 Roads and Stormwater

Table 219: Financial Performance: Roads and Stormwater

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(22 466)	(15 172)	(29 320)	(26 633)	9%
Expenditure:					
Employees	34 909	41 575	41 575	34 972	16%
Repairs and Maintenance	17 420	19 803	19 754	19 520	1%
Other	(29 799)	70 196	57 943	53 474	8%
Total Operational Expenditure	22 530	131 575	119 272	107 966	9%
Net Operational (Service)	64	116 403	89 953	81 333	10%

Variances are calculated by dividing the difference between the actual and the adjusted budget by the actual.

5.1.5.7 Town and Spatial Planning

Table 220: Financial Performance: Town and Spatial Planning

Description	2023/24	2024/25			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	-	-	-	-	0%
Expenditure:					
Employees	11 431	10 377	10 377	12 421	-20%

5.2.2 LEVEL OF RELIANCE ON GRANTS AND SUBSIDIES

Table 238: Reliance on Grants

Financial year	Total grants and subsidies received	Total Operating Revenue	Percentage
	R'000		%
2016/17	227 752	1 534 354	14.84
2017/18	211 190	1 609 728	13.12
2018/19	233 433	1 541 685	15.14
2019/20	285 026	1 742 596	16.36
2020/21	264 637	1 805 680	14.66
2021/22	289 061	2 028 289	14.25
2022/23	311 629	2 201 123	14.16
2023/24	342 323	2 464 726	13.89
2024/25	349 955	2 753 925	12.71

Developers' contributions have been excluded from the grant item to express only allocations and not policy-related revenue, which NT allocates to capital revenue. It would distort the reliance on the grant calculation if excluded from the above ratio.

5.3 ASSET MANAGEMENT

Asset management is practised within the organisation based on a comprehensive Asset Management Policy. The Asset Management Policy provides direction for the management, accounting, and control of property, plant, and equipment (assets) owned or controlled by the municipality to ensure the following:

- Implementation of the approved Asset Management Policy as required in terms of section 63 of MFMA;
- Verify assets in the possession of the Council annually, during the financial year;
- Keep a complete and balanced record of all assets in the possession of the Council;
- Report in writing all asset losses, where applicable, to the Council; and
- Those assets are valued and accounted for under a statement of GRAP.

Table 239: Treatment of the Three Largest Assets Acquired in the Financial Year 2024/25

Treatment of the Three Largest Assets Acquired in the Financial Year 2024/25		
Asset 1		
Name	Upgrade of WWTW Wemmershoek	
Description	Phase 2: Capacity increase and refurbishment of existing SBRs	
Asset Type	Wastewater treatment works	
Key Staff Involved	Paul Joubert	
Staff Responsibilities	Design and Project Manager	
Asset Value	2023/24	2024/25
		R 37 947 631.60
Capital Implications	Construction Value = R67 620 030.20	
Future Purpose of Asset	Treatment of Wastewater of Franschhoek and Wemmershoek Area	
Describe Key Issues	Capacity and Quality before upgrade	
Policies in Place to Manage Assets	NEMA, the National Water Act, 1998 (Act No. 36 of 1998), etc.	
Asset 2		
Name	Lanquedoc Access Road and Bridge	
Description	New access road and bridge	
Asset Type	Road Structures	
Key Staff Involved	Roads and Stormwater Manager and Principal Technician: Roads	
Staff Responsibilities	oversee implementation	
Asset Value	2023/24	2024/25
		R 27 293 639.20
Capital Implications		
Future Purpose of Asset	Access road to residential area	
Describe Key Issues		
Policies in Place to Manage Assets	Streets Bylaw	
Asset 3		
Name	Franschhoek Mooiwater 236	
Description	Installation of civil infrastructure to provide access to basic services for the families in Mooiwater, Franschhoek	
Asset Type	Infrastructure Services	
Key Staff Involved	Informal Settlement Department, Housing Administration Department and Project Management Unit (PMU)	
Staff Responsibilities	Informal Settlement Department – identified the relocation site, namely Erf 3229; responsible for the enumeration of informal structures and verification of potential beneficiaries in line with the Council-approved policies; assisted with the allocation and completion of beneficiary administrative documentation; responsible for the relocation process Housing Administration – Facilitated the process and was responsible for consumer education, assisted with the relocation process Project Management Unit – implement the project as per the scope of work received and ensure that the project is completed within the specified timeframe.	
Asset Value	2023/24	2024/25

Treatment of the Three Largest Assets Acquired in the Financial Year 2024/25		
	-	R18 987 085.67
Capital Implications	Infrastructure services were handed over to the respective departments within the infrastructure directorate for inclusion in future maintenance plans.	
Future Purpose of Asset	Provides basic services to 219 households.	
Describe Key Issues	N/A	
Policies in Place to Manage Assets	Standard infrastructure services operating procedures; bylaws and operational policies; water, sewer, stormwater, roads, electrical, and solid waste.

CHAPTER 6: AUDITOR GENERAL OF SOUTH AFRICA AUDIT FINDINGS

6.1 COMPONENT A: AUDITOR-GENERAL of South Africa OPINION 2023/24

6.1.1 INTRODUCTION

This chapter provides details on the audit outcomes for the past two financial years, with the corrective steps implemented.

6.1.2 AUDITOR GENERAL OF SOUTH AFRICA REPORT 2023/24

Table 255: Auditor General of South Africa Report 2023/24

2023/24	
Audit Report Status:	
2023/24	
Issue raised	Corrective step implemented
Emphasis of matter:	
Restatement of corresponding figures	
As disclosed in note 62 to the financial statements, the corresponding figures for 30 June 2023 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2024	None Required
Material Impairments	
As disclosed in note 4 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions of R268,7 million (2022-23: R208 million).	None Required
As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions of R217,9 million (2022-23: R225,8 million).	None Required
Material losses	
None	
Material Non-Compliance	
None	
Annual financial statements	
I have audited the financial statements of the Stellenbosch Municipality set out on pages 7 to 135, which comprise the statement of financial position as at 30 June 2024, statement of financial performance, statement of changes in net assets, cash flow statement and comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.	None Required
In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2024 and its financial performance and cash flows for the year that ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 5 of 2023 (Dora).	None Required

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Officer's Statement

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements were prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) as well as relevant interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I, as the Accounting Officer (accounting authority) acknowledges that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable me to meet these responsibilities, I have set standards for internal control aimed at reducing the risk of error or deficit in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

Although, I am primarily responsible for the financial affairs of the municipality, this is supported by the municipality's external auditors.

I would like to bring the following material matters to your attention:

I certify that the salaries, allowances and benefits of councillors as disclosed in note 34 to these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditors, being the Auditor-General of South Africa (AGSA), are responsible for independently reviewing and reporting on the municipality's audited annual financial statements.

The audited annual financial statements set out in terms of Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003), which have been prepared on the going concern basis, I have signed on behalf of the municipality on 31 August 2025:

Geraldine Mettler
Accounting officer

Stellenbosch Municipality

Commentary

*Budget adjustments done in terms of section 28 and section 31 of the MFMA. All budget adjustments relate to virements, virements are done in terms of the council approved policy

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

The annual financial statements have been prepared in accordance with the Finance Management Act (MFMA) and effective Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003)

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1. Summary of significant accounting policies

1.1 Going concern assumption

The unaudited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

1.3 Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments. Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

1.4 Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.5 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

Materiality utilised for the statement of budget comparison (GRAP 24) comprises of the following components:

Statement of financial Performance

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.5 Materiality (continued)

Revenue: 1% of Total Revenue

Expenditure: 2% of Total expenditure

Statement of financial position

Assets: 1% of total assets

Liabilities: 2% of total liabilities

Net assets: 5% of accumulated surplus

Cash flow statement

The receipt items follow a revenue base as per the statement of financial performance and the payments follow an expenditure base as per the statement of financial performance.

1.6 Significant judgements and estimates

In the application of the municipality's accounting policies, which are described below, management is required to make judgement, estimates and assumption that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. The estimates and associated assumptions are based on historical experiences and other factors that are considered too reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

These estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Revenue recognition

Accounting Policy 1.18 on Revenue from Exchange Transactions and Accounting Policy 1.19 on Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Impairment of financial assets

Accounting Policy 1.13 Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of property, plant and equipment and intangible assets

As described in Accounting Policy 1.10 and 1.11 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, considering the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

Employee benefit obligations

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual financial statements.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.6 Significant judgements and estimates (continued)

The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Impairment of non-financial assets

The recoverable amounts of cashgenerating units have been determined based on the higher of value in use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The recoverable amounts of individual assets have been determined based on the higher of valueinuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

Value in use of cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by several factors including economic factors such as inflation and interest.

Value in use of non-cash generating assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Provisions

Provisions are raised and management determines an estimate based on the information available. Additional disclosures of these estimates of provisions are included in note 22 - Provisions.

A qualified environmental engineer calculates the provision. The provision represents the best estimate or net present value of the expected future cash flows to rehabilitate the landfill site at yearend. The professional engineer determines the cost of rehabilitation and the remaining useful life of each site. Interest rates linked to prime were used to calculate the effect of the time value of money.

Allowance for slow moving, damaged and obsolete stock

An allowance for inventory to write inventory down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the surplus/deficit.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.6 Significant judgements and estimates (continued)

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Impairment of statutory receivables

If there is an indication that a statutory receivable, may be impaired, the municipality measures the impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, are reduced, either directly or using an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Pre-paid electricity

Pre-paid electricity is only recognised as income once the electricity is consumed. The pre-paid electricity balance (included under payables) represents the best estimate of electricity sold at year-end, which is still unused.

1.7 Biological assets that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural produce when and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of a biological assets that form part of an agricultural activity, is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable, is used to determine fair value.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

Agricultural produce harvested from an entity's biological assets shall be measured at its fair value less costs to sell at the point of harvest. Such measurement is the cost at that date when applying GRAP 12 or another applicable Standard of GRAP.

Item	Useful life
Trees in plantation forest	Indefinite

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.8 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or for
- Administrative purposes, or
- Sale in ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Subsequent measurement – cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property-Land	Indefinite
Property-buildings	30-99 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 10).

When classification is difficult, the criteria used to distinguish investment property from owner -occupied property and from property held for sale in the ordinary course of operations, are as follows:

All properties held to earn market-related rentals or for capital appreciation or both and that are not used for administrative purposes, and that will not be sold within the next 12 months are classified as Investment Properties

A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

(a) commencement of owner-occupation, for a transfer from investment property to owner-occupied property;

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.8 Investment property (continued)

(b) commencement of development with a view to sale, for a transfer from investment property to inventories;

(c) end of owner-occupation, for a transfer from owner-occupied property to investment property; or

(d) commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

1.9 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period. The municipality elected the cost model for Property, plant and equipment.

The cost of an item of property, plant and equipment is recognised as an asset if:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and
- the cost or fair value of the item can be measured reliably.

Initial recognition and measurement

Property, plant and equipment are initially recognised at cost on its acquisition date. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised. Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

After initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.9 Property, plant and equipment (continued)**Impairment**

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.9 Property, plant and equipment (continued)

Depreciation

Property, plant and equipment are depreciated on the straightline basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	indefinite
Machinery and equipment	Straight-line	1-66
Furniture and office equipment	Straight-line	2-24
Transport assets	Straight-line	4-21
Computer equipment	Straight-line	5-23
Community assets	Straight-line	4-50
Other property, plant and equipment	Straight-line	6-99
Capital restoration asset	Straight-line	5-30
Electrical infrastructure	Straight-line	10-100
Water supply infrastructure	Straight-line	10-100
Solid waste infrastructure	Straight-line	10-50
Roads infrastructure	Straight-line	10-100
Information and communication infrastructure	Straight-line	3-15
Waste water network	Straight-line	10-100
Stormwater infrastructure	Straight-line	10-50

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 11).

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.10 Intangible assets

Initial recognition and measurement

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations. A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably. Intangible assets are initially measured at cost.

Subsequent measurement

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.10 Intangible assets (continued)

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Internally generated: Capital development	Straight-line	5 - 7 years
Computer software	Straight-line	3 - 30 years
Service operating and land rights	Straight-line	5 - 30 years

Derecognition

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset shall be included in surplus or deficit when the asset is derecognised.

1.11 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Initial recognition and measurement

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 13 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Reference to impairment paragraphs can be made to note , 1.16 and 1.17.

Compensation from third parties for heritage assets that have been impaired, lost or given up, shall be included in surplus or deficit when the compensation becomes receivable.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.11 Heritage assets (continued)

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

1.12 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity. Financial instruments are classified into three categories namely, financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost. The municipality determines the classification of its financial instruments at initial recognition.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

1.12.1 Classification of financial instruments

Financial assets

A financial asset is any asset that is a cash or contractual right to receive cash. In accordance with GRAP 104 the Financial Assets of the municipality are classified as follows into the three categories allowed by this standard:

Financial asset at amortised cost being a non-derivative financial asset with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets.

A financial asset is:

- cash.
- a residual interest of another municipality; or
- a contractual right to:
 - receive cash or another financial asset from another municipality; or
 - exchange financial assets or financial liabilities with another municipality under conditions that are potentially favorable to the municipality.

Financial assets measured at fair value being financial assets that meet either of the following conditions:

- Derivatives;
- Combined instruments that are designated at fair value;
- Instruments held for trading;
- Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; or
- Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Financial assets measured at cost being investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.12 Financial instruments (continued)

The municipality has the following types of financial assets as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial asset	Classification in terms of GRAP 104
Long-term receivables	Financial assets at amortised cost
Consumer debtors	Financial assets at amortised cost
Other debtors	Financial assets at amortised cost
Short-term investment deposit - Call	Financial assets at amortised cost
Bank balances and cash	Financial assets at amortised cost

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the Cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets at amortised cost.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another municipality; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavorable to the municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by a municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.12 Financial instruments (continued)

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives.
- combined instruments that are designated at fair value.
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near- term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking
- non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
- financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity.

The following main categories of financial liabilities and the classification determining how they are measured exist:

- Financial liabilities measured at amortised cost; or
- Financial liabilities measured at fair value.

The municipality has the following types of financial liabilities as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial liability

Long-term liabilities
Current portion of long-term liabilities
Other creditors

Classification in terms of GRAP 104

Financial liability at amortised cost
Financial liability at amortised cost
Financial liability at amortised cost

1.12.2 Initial and subsequent measurement

Initial recognition and measurement

A financial instrument is recognised, when the municipality becomes a party to the contractual provisions of the instrument, and are initially measured at fair value. In the case of a financial instruments not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial instruments are added or deducted from the fair value, as appropriate on initial recognition.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.12 Financial instruments (continued)

Subsequent measurement – Financial assets

Financial assets consist of cash and cash equivalents, deposits, receivables and investments.

Receivables are subsequently measured at amortised cost using the effective interest rate method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate.

A provision for impairment of receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. Changes in the carrying amount of the provision is recognised in the Statement of financial performance. When a receivable is considered uncollectible, it is written off against the provision. Any gains or losses arising from the change in fair value of investments measured at fair value are recognised in the Statement of financial performance.

Trade and other receivables (excluding Value Added Taxation, prepayments and operating lease receivables), loans to municipal entities and loans that have fixed and determinable payments that are not quoted in an active market are classified as financial assets at amortised cost.

Financial assets measured at fair value are initially measured at fair value plus directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in equity until the investment is derecognised, at which time the cumulative gain or loss recorded in equity is recognised in the Statement of financial performance, or determined to be impaired, at which time the cumulative loss recorded in equity is recognised in the Statement of financial performance.

Subsequent measurement – Financial liabilities

Financial liabilities consist of payables, interest bearing loans and bank overdrafts. These liabilities are subsequently measured at amortised cost, using the effective interest rate method. Finance costs are expensed in the Statement of financial performance in the period in which they are incurred except where stated otherwise (see accounting policy on borrowing costs).

Bank borrowings, consisting of interest-bearing short-term bank loans, repayable on demand and overdrafts are recorded at the proceeds received. Finance costs are accounted for using the accrual basis and are added to the carrying amount of the bank borrowing to the extent that they are not settled in the period that they arise.

Prepayments are carried at cost less any accumulated impairment losses.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.12 Financial instruments (continued)

1.12.3 Derecognition

Financial assets

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial assets, the municipality continues to recognise the financial assets and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The municipality derecognises financial liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as having extinguished the original financial liability, and a new financial liability recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a nonexchange transaction, are accounted for in accordance with GRAP 23.

1.12.4 Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instruments is not active, the municipality establishes fair value using a valuation technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs.

1.13 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately

Entity as lessee - operating leases

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight- line basis.

Any contingent rent is expensed in the period in which they are incurred.

Entity as lessor - operating leases

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.13 Leases (continued)

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

1.14 Inventory

Initial measurement:

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Inventories shall be recognised as an asset if, and only if:

- (a) it is probable that future economic benefits or service potential associated with the item will flow to the entity;
- (b) and the cost of the inventories can be measured reliably.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs. The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.15 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located;
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets

1.16 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity

Cash generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non cash generating assets.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.16 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.16 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.16 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

In assessing whether there is any indication that an asset may be impaired, the municipality will consider, as a minimum, the following indications:

External sources:

- (a) During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- (b) Significant changes with an adverse effect on the entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which an asset is dedicated.
- (c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially

Internal sources:

- (d) Evidence is available of obsolescence or physical damage of an asset.
- (e) Significant changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
- (f) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.17 Impairment of non-cash-generating assets

Non cash generating assets are assets other than cash generating assets

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) Cessation, or near cessation, of the demand or need for services provided by the asset.
- (b) Significant long-term changes with an adverse effect on the entity have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the entity operates.

Internal sources of information

- (c) Evidence is available of obsolescence or physical damage of an asset.
- (d) Significant long-term changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date and reassessing the useful life of an asset as finite rather than indefinite.
- (e) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (f) Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.17 Impairment of non-cash-generating assets (continued)

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.18 Employee benefits

Employee benefits are all forms of consideration given by a municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or

the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

a municipality's decision to terminate an employee's employment before the normal retirement date; or

an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.18 Employee benefits (continued)

A constructive obligation is an obligation that derives from a municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

wages, salaries and social security contributions;

short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;

bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and

non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and

as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service.

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year-end is based on the bonus accrued at year-end for each employee.

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

Leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.18 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. In this aspect defined contribution plans can be considered as the pension fund.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.18 Employee benefits (continued)

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the audited annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability)

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, a entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, a entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.18 Employee benefits (continued)

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - Those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other long term employee benefit

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term service awards is payable after 10 years of continuous service and after every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to employees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions are recognised in the Statement of financial performance in the period that it occurs. Interest cost on employee benefit obligation is recognised as part of employee related cost.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

the present value of the defined benefit obligation at the reporting date;

minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost; and
- the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.18 Employee benefits (continued)

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.19 Provisions

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.19 Provisions (continued)

Environmental rehabilitation provisions

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;
- if the adjustments result in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/ or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

Provision for constructive obligation

A constructive obligation to restructure arises only when the municipality:

- Has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- Has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality.

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

1.20 Contingent assets and contingent liabilities

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.20 Contingent assets and contingent liabilities (continued)

A contingent liability is a:

- possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.
- present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the municipality.

1.21 Revenue

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction

Recognition and measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.21 Revenue (continued)

1.21.1 Revenue from exchange transactions

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognized in total as an accrual as all billing in July pertains to services rendered prior 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

The municipality accounts for availability charges as an exchange transaction.

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits or service potential associated with the transaction will flow to the entity
- (c) the stage of completion of the transaction at the reporting date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

interest is levied on outstanding debtors using the effective interest rate method.

Rentals on facilities and equipment are recognised on the straight-line basis over the term of the lease agreement

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably.
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- the stage of completion of the transaction at the reporting date can be measured reliably; and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.21 Revenue (continued)

The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

The amount of revenue can be measured reliably.

It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.

The costs incurred or to be incurred in respect of the transaction can be measure reliably.

Interest earned and rentals received

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Traffic charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue recognition of unclaimed deposits

Unclaimed deposits older than three (3) years are recognised as revenue.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.21 Revenue (continued)

1.21.2 Revenue from non-exchange transactions

Rates and taxes

Other than services in-kind not recognised in terms of paragraph .99, an inflow of resources from a non-exchange transaction that meets the definition of an asset shall be recognised as an asset when, and only when:

- (a) it is probable that the future economic benefits or service potential associated with the asset will flow to the entity; and
- (b) the fair value of the asset can be measured reliably.

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources.

Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Rebates and discounts are offset against the revenue. As per iGRAP 1, there is no intention to collect this revenue

Fines

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the municipality is entitled to collect.

Subsequent to initial recognition and measurement, the municipality assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

Donations and contributions

Donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Transfers and subsidies

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Unconditional grants

Equitable share allocations are recognised in revenue at the start of the financial year.

Conditional grants

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.21 Revenue (continued)

Conditional grants recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of financial performance.

Interest earned on unspent grants and receipts

Interest earned on unspent grants and receipts is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of financial performance in accordance with GRAP 9.

Services received in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets or expenditure and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

1.22 Statutory receivables

1.22.1 Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

In estimating the future cash flows, an entity considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, an entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

1.22.2 Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.22 Statutory receivables (continued)

1.22.3 Measurement

The municipality initially measures statutory receivables at their transaction amount.

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the accounting policy on Revenue from exchange transactions or the accounting policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled to levy additional charges in terms of legislation, supporting regulations, by-laws or similar means on overdue or unpaid amounts, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (taxes and transfers).

1.22.4 Impairment

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent.

it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation.

a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).

adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable, or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

1.22.5 Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.22 Statutory receivables (continued)

- the municipality transfers control of the statutory receivable and substantially all the risks and rewards of ownership of the asset to another entity; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.23 Principal-agent arrangements

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.23 Principal-agent arrangements (continued)

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.24 Borrowing costs

Borrowing costs are interest and other expenses incurred by an municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the Statement of financial performance in the period in which they are incurred.

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised to the cost of the asset. All other borrowing costs are recognised as an expense in the period in which it is incurred. The capitalisation rate used to determine the amount of borrowing costs eligible for capitalisation is disclosed in the notes below.

1.25 Comparative of actual information to budgeted information

The annual budget figures have been prepared in accordance with the Municipal Budget and Reporting Regulations, 2009. A comparative of actual to budgeted amounts are reported in a separate additional financial statement, called the Statement of comparison of budget and actual amounts. Explanatory comment is provided in the notes to the statement giving motivations for over- or under spending on line items where it is found to be material. The budgeted figures are those approved by the Council at the beginning and during the year following a period of consultation with the public as part of the Integrated Development Plan. The budget is prepared and approved on an accrual basis by nature classification. The approved budget covers the period from 01 July 2024 to 30 June 2025.

In general, a difference of 10% or more is considered material, although the surrounding circumstances are taken into account if it could influence the decisions or assessments of the users of the annual financial statements in determining whether a difference between the budgeted and actual amount is material.

1.26 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.27 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the Statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of financial performance.

1.28 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.28 Irregular expenditure (continued)

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.29 Related parties and related party transactions

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

An entity is related to the Municipality if any of the following conditions apply:

- the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others).
- one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member).
- both entities are joint ventures of the same third party.
- one entity is a joint venture of a third entity, and the other entity is an associate of the third entity.
- the entity is a post-employment benefit plan for the benefit of employees of either the Municipality or an entity related to the Municipality. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity.
- the entity is controlled or jointly controlled by a person identified in (a).
- a person identified in (a) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

A person is considered to be a close member of the family of another person if they:

- are married or live together in a relationship similar to a marriage or are separated by no more than two degrees of natural or legal consanguinity or affinity.

Management (formerly known as "Key Management") includes all persons having the authority and responsibility for planning, directing and controlling the activities of the Municipality, including:

- all members of the governing body of the Municipality;
- a member of the governing body of an economic entity who has the authority and responsibility for planning, directing and controlling the activities of the Municipality;
- any key advisors of a member, or sub-committees, of the governing body who has the authority and responsibility for planning, directing and controlling the activities of the Municipality; and
- the senior management team of the Municipality, including the chief executive officer or permanent head of the Municipality, unless already included in (a).

Management personnel include:

- All directors or members of the governing body of the Municipality, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee. Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting Municipality being the Municipal Manager, Chief Financial Officer, and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Key management as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.29 Related parties and related party transactions (continued)

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.30 Change in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Details of changes in accounting policies, changes in estimates and correction of errors are disclosed in the notes to the annual financial statements where applicable.

1.31 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.32 Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.33 Budget information

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2022/07/01 to 2023/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Material variances are determined in accordance with the municipalities materiality framework. These material differences will be explained in the financial statements under note for budget differences referenced to the statement of budget comparison.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.34 Events after reporting date

Events after the reporting date that are classified as adjusting events have been accounted for in the annual financial statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the annual financial statements.

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.35 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality and all values are rounded to the nearest hundred.

1.36 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of subcontractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

1.37 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Segmental information was based and identified on the MFMA S71 monthly budget statement/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports is organised around the type of service delivered, in a standardised format, namely the C2 schedule.

The municipality manages its assets and liability as a whole and is not reviewed on a segregated basis for each town. Segment reporting per geographical area is not deemed relevant.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.37 Segment information (continued)

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.38 Offsetting

Financial assets and liabilities are offset and the net amount reported on the Statement of financial position only when there is a legally enforceable right to set off the recognised amount, and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.39 Current year comparatives

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are also reclassified and restated, unless such comparative reclassification and / or restatement is not required by a Standard of GRAP. The nature and reason for such reclassifications and restatements are also disclosed.

Where material accounting errors, which relate to prior periods, have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

The presentation and classification of items in the current year is consistent with prior periods.

1.40 Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried at amortised cost. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are carried at amortised cost.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts.

1.41 Housing arrangements

The Accounting Standards Board issued the guideline on Accounting for Arrangements Undertaken in terms of the National Housing Programme.

Where the municipality acts as a project manager in a housing arrangement, it is regarded as an agent in terms of the principles of GRAP 109 - Accounting by Principals and Agents.

Where the municipality is regarded as an agent, costs related to the construction of top structures and the related recovery thereof (revenue) is not be recognised in the Statement of financial performance of the municipality.

Where the municipality is identified as a project developer, the construction of the houses is performed by the municipality or by the appointment of a sub-contractor to undertake the construction on the municipality's behalf. The municipality applies the GRAP 11, Construction Contracts to account for these construction activities.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Accounting Policies

1.41 Housing arrangements (continued)

Where the municipality is regarded as the project developer and if the outcome of the construction contract can be estimated reliably, then contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed with reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable. Contract revenue will be in the form of a grant from the Department of Human settlements and presented and disclosed under transfers and subsidies in the Statement of financial performance.

Contract costs are recognised as an expense in the period in which they are incurred. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Contract revenue shall comprise: (a) the initial amount of revenue agreed in the contract; and (b) variations in contract work, claims and incentive payments to the extent that: (i) it is probable that they will result in revenue; and (ii) they are capable of being reliably measured.

Contract costs shall comprise: (a) costs that relate directly to the specific contract; (b) costs that are attributable to contract activity in general and can be allocated to the contract on a systematic and rational basis; and (c) such other costs as are specifically chargeable to the customer under the terms of the contract.

An expected deficit on a construction contract to which paragraph .49 applies shall be recognised as an expense immediately in accordance with paragraph .49.

1.42 Grants-in-aid

The municipality transfers money to individuals, organizations and other sectors of government from time to time. When making these transfers, the municipality does not:

- Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the annual financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.43 Consumer deposits

The municipality recognises consumer deposits as a current liability when the municipality becomes a party to the contract i.e. when the deposit is made. The consumer deposit is recognised as a liability as the municipality has an obligation to pay the money back to the consumer once the consumer account is closed. As the timing of when a consumer will close their account is unknown, the consumer deposits are classified as a current liability.

1.44 Unspent conditional grants

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent where the obligations have not been met, a liability is recognised.

--	-----------	-----------

2. New standards and interpretations

2.1 Standards, amendments to standards and interpretations issued, but not yet effective

The municipality has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2025 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 2023: Improvements to the Standards of GRAP 2023	01 April 2099	Unlikely there will be a material impact
• GRAP 1 (amended): Presentation of Financial Statements (Going Concern)	01 April 2099	Unlikely there will be a material impact
• GRAP 103 (amended): Heritage Assets	01 April 2099	Unlikely there will be a material impact
• iGRAP 22: Foreign Currency Transactions and Advance Consideration	01 April 2025	Unlikely there will be a material impact
• GRAP 104 (as revised): Financial Instruments	01 April 2025	Unlikely there will be a material impact

The National Minister of Finance announced in Regulation Gazette no 11129 (dated 4 June 2020) the effective dates as indicated next to each standard above. In the event that the minister has not set an effective date, the year 2099 is utilised.

The Accounting Standards Board Directive 5 sets out the principles for the application of the GRAP 3 guidelines in the determination of the GRAP Reporting Framework hierarchy, as set out in the standard of GRAP 3 on Accounting Policies, Changes in Accounting Estimates and Errors.

Where a standard of GRAP is approved as effective, it replaces the equivalent Standard that was effective (prior to the adoption of the new/ replacement Standard) at the date that such new Standard is either adopted or becomes effective. Where a standard of GRAP has been issued, but is not yet in effect, an entity may select to apply the principles established in that standard in developing an appropriate accounting policy dealing with a particular section or event before applying the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.

The amount disclosed in this note is net of impairment. Refer to note 5.1 & 5.2 for the amount before the provision (gross) and the actual value of the provision.

5.1 Consumer receivables

The average credit period for consumer receivables is 30 days. No interest is charged on trade receivables for the first 30 days from the date of the invoice. Thereafter interest is charged at the prime rate per annum on the outstanding balance. The municipality strictly enforces its approved credit control policy to ensure the recovery of consumer receivables.

The management of the municipality is of the opinion that the carrying value of consumer receivables approximate their fair values.

The fair value of consumer receivables was determined after considering the standard terms and conditions of agreements entered into between the municipality and consumer receivables as well as the current payment ratio's of the municipality's consumer receivables.

The Council regards receivables from exchange transactions to be due for outstanding amounts more than 30 days to be past due.

The water and electricity accrual is in respect of consumption between the last meter reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers. The estimate of the consumption are being recorded as revenue without being invoiced.

Statutory receivables general information

Transaction(s) arising from statute

Property rates related transactions arise in terms of the Municipal Property Rates Act, 6 of 2004, Municipal Finance Management Act, 56 of 2003, as well as the Property Rates Policy of the municipality approved by Council as part of the Budget Process.

Traffic fines arise from the National Road Traffic Act 93 of 1996, National Road Traffic Regulations 2000, National Land Transport Act 5 of 2009 and Criminal Procedure Act 51 of 1971. Prosecutor performs prosecutorial functions in terms of a general delegation awarded by the National Prosecuting Authority and is subject to the control of the Control Prosecutor at the Magistrate's Court in Stellenbosch.

VAT transactions arise from the Value Added Tax Act 89 of 1991. VAT is an indirect tax on the consumption of goods and services in the economy. VAT is levied on all goods and services subject to certain exemptions, exceptions, deductions and adjustments provided for in the Value Added Tax Act 89 of 1991.

Determination of transaction amount

Property rates transaction amounts are determined in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

VAT transactions amounts are determined in line with the Value Added Tax Act 89 of 1991. VAT increased from 14% to 15% from 1 April 2018.

6. Receivables from non-exchange transactions (continued)

Interest or other charges levied/charged

Interest or other charges levied on Property rates balances are in line with the Annual Tariff List of the municipality approved by council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003. "Interest" means a charge levied, on all arear accounts calculated at an interest rate which is one percent higher than the prime interest rate.

Traffic fines: Additional charges includes contempt of court fees / warrant of arrest fee determined in terms of the Criminal Procedure Act.

The rates and interest charges are determined by the Value Added Tax Act 89 of 1991.

Basis used to assess and test whether a statutory receivable is impaired

The basis used to assess Property Rates receivables is to look at the extent to which debtors on an individual basis defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

The basis used to assess Traffic fine receivables is to look at the extent to which debtors per group of fines (Municipal fines, Provincial fines) defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

No impairment on VAT Receivable, balance expected to be fully recoverable

Discount rate applied to the estimated future cash flows

Interest is calculated using the nominal interest rate as stipulated in the municipal by-laws (Prime plus 1%). This rate is also considered an appropriate discount rate.

Main events and circumstances that led to the recognition or reversal of impairment losses on statutory receivables

Significant impairment losses recognised or reversed

Traffic Fines: Impairment Recognised: Annually the outstanding receivables are assessed in terms of the value of fines issued in comparison to the receipts generated from such fines. The remaining balance is considered recoverable based on this payment percentage.

7. Inventory

Consumables	11 305 470	2 241 648

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
12. Biological assets (continued)		
2025 - Nature and quantities of each biological asset		
Opening Balance		Total
Decrease due to harvest		
Fair value movement		
Botmanskop Plantation	127 980	76 789
Paradyskloof Plantation	2 797 074	2 723 131
	2 925 054	2 799 920
2024 - Nature and quantities of each biological asset		
Opening Balance		Total
Decrease due to harvest		
Fair value movement		
Botmanskop plantation	293 463	127 980
Paradyskloof Plantation	4 849 313	2 797 074
	5 142 776	2 925 054

The determination of fair value was as follows:

Principle:

Price determination was done on the basis of current sale value of the tender for the current year i.e. R602.10/m³ excluding 15% VAT. This value was given to all trees as the estimated yield takes into consideration the age of the trees. The harvestable age starts from 20 years old where the minimum estimated yield would be 100m³/ha.

It must also be noted that this yield is based on optimum growing conditions and the existing microclimates, and thus the yield might vary per compartment. Refer to the Forestry Handbook p204 which can be obtained at the municipal offices.

Description of the Biological Assets

Botmanskop plantation (Block E)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Paradyskloof plantation (Block G)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Strategy to mitigate risks

The strategy to mitigate risks attached to this category of assets is to prevent the spread of runaway veld fires by maintaining fire breaks.

Pledged as security

There were no items of biological assets pledged as security in the current financial year.

Non-Financial Information

Quantities of each biological asset (In hectares)

20.1 Post employment health care benefits

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. The plan is treated as a defined benefit plan under GRAP 25. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2025 by C Weiss of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the Post-employment Health Care Benefit Plan are made up as follows:

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

In-service non-members (eligible employees w/o medical aid)	429	427
Continuation members (retirees and surviving dependants)	175	174
Total members	1 343	1 324

Characteristics and risks of defined benefit plans [GRAP 25.143(a)]

The Municipality administers a defined benefit pension plan that provides retirement, disability, and death benefits to eligible employees. The plan is funded by both the entity and the employees through mandatory contributions based on a percentage of the employees' salaries.

Eligible employees appointed before 1 July 2003 will receive a post-employment subsidy of 70% of the contribution payable should they be a member of a medical scheme at retirement, and provided that they have not been promoted since then and do not receive a promotion in future. Promotions result in new employment contracts, and new contracts contain a 60% post-employment subsidy benefit. Hence, all other eligible employees will receive a 60% post-employment subsidy, should they be a member of a medical scheme at retirement.

The eligible employees' post-employment subsidy rates were provided, and it was assumed that all employees appointed before 1 July 2003 and who have not been promoted since then, will not receive a promotion in future.

Continuation members and their eligible dependants receive either a 60% or 70% subsidy, as described above. However, there are three members with special arrangements, whereby they are in receipt of a 50% subsidy.

Risks associated with the defined benefit plan [GRAP 25.143(a)]

Longevity Risk: There is a risk that eligible individuals live longer than expected, potentially increasing the liability of the plan as their benefits are payable for longer than expected.

Inflation Risk: There is a risk that future CPI inflation and medical aid contribution inflation are higher than assumed and present in an uncontrolled manner.

Volatility of open ended Defined Benefit Obligation:

The risk that the DBO may be volatile which is exacerbated by its long-term nature.

Regulatory Risk

The risk that changes in post-employment medical aid benefit may increase the defined benefit obligation for Stellenbosch Municipality.

Plan amendments, curtailments, and settlements [GRAP 25.147(c)]

During the reporting period, there were no amendments, curtailments, or settlements that had a significant effect on the plan's obligations Stellenbosch municipality.

The liability in respect of past service has been estimated as follows:

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
20. Employee benefits (continued)		
In-service members (eligible employees on medical aid)	85 532 000	67 805 000
In-service non-members (eligible employees w/o medical aid)	9 278 000	7 341 000
Continuation members (retirees and surviving dependants)	121 350 001	116 649 001
Total liability	216 160 001	191 795 001

Maturity Profile

The defined benefit obligation of the municipality's health care plan has a weighted average duration of approximately 14 years. This duration reflects the estimated time period over which the accrued benefits are expected to be settled.

Maturity profile of the defined benefit obligation [GRAP 25.154(c)]

The following table provides a maturity analysis of the present value of the defined benefit obligations, showing the undiscounted cash flows to be paid in respect of benefits to be provided under the plan:

Future year intervals	Projected Benefit Payments
Within 1 year	12 039 000
Between 1 - 2 years	13 347 000
Between 2 - 3 years	14 540 000
Between 3 - 4 years	15 837 000
Between 4 - 5 years	17 246 000
6 to 10 years	109 538 000
11 to 15 years	163 174 000
16 to 20 years	227 906 000
21 to 25 years	302 529 000
26 to 30 years	377 222 000
31 to 40 years	918 425 000
41 to 50 years	905 716 000
51 to 60 years	647 629 000
61 to 70 years	304 184 000
71 to 80 years	76 394 000
	4 105 726 000

The benefits payments are scheduled based on the expected retirement ages of current employees and the provisions of the plan that determine the timing of benefits payments. The distribution of these payments is subject to changes in demographic factors such as retirements, mortality rates, and changes in employment within the Municipality.

The estimated current service cost for the upcoming year has been determined to be R 5 603 000, while the interest cost for the same period is projected to be R 22 676 000. For comparison, in 2023/2024, the current service cost and interest cost were R 5 165 000 and R 21 118 000, respectively.

Non-current	204 754 001	180 536 001
Current	11 406 000	11 259 000
Total liability	216 160 001	191 795 001

The municipality contributes to the following medical aids:

- Bonitas
- Key Health
- LA Health
- Samwumed
- Sizwe-Hosmed

The principal assumptions used for the purposes of the actuarial valuations were as follow:

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

20. Employee benefits (continued)

Rates of interest

Discount rate	11%	12.2%
CPI inflation rate	5%	6.2%
Medical aid contribution inflation rate	6.8%	7.7%

General:

It is assumed that the municipality's health care arrangements and subsidy policy would remain as outlined in the accounting policy, and that the level of benefits receivable and the contributions payable would remain unchanged, with the exception of allowing for inflationary adjustments. Implicit in this approach is the assumption that current levels of cross-subsidy from in-service members to continuation members within the medical scheme are sustainable, and will continue.

Basis for determining the discount rate [GRAP 25.147(d)]

The discount rate used to calculate the defined benefit obligation was determined based on the yield curve of current market rates of appropriate term that are denominated in the currency in which the benefits will be paid and that have maturities approximating the terms of the plan's obligations. The corresponding index-linked yield at this term is 5.18%. These rates do not reflect any adjustment for taxation. These rates were deduced from the interest rate data obtained from the Johannesburg Stock Exchange after the market close on 30 June 2025.

Actuarial assumptions of defined benefit obligation [GRAP 25.151]

The following are the significant actuarial assumptions used to calculate the present value of the defined benefit obligations for the Municipality's pension plan as of 30 June 2025. The assumptions are expressed in absolute terms to provide clarity on their impact:

Mortality rate

Assumption: SA 85 - 90

This mortality table is used to estimate the life expectancy of plan participants, based on current trends and historical data within the sector.

Discount rate:

Assumption: 11%

The discount rate is based on the yield curve of current market rates available and expected to be available during the estimated period of the obligations.

Medical aid contribution inflation rate

Assumption: 6.8%

This assumption is required to reflect estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs

CPI Inflation rate:

Assumption: 5%

Inflation is considered in the projection of salary increases and the adjustment of retirement benefits.

Proportion of Eligible In-Service Non-Members Joining a Scheme by Retirement

It has been assumed that 15% of eligible in-service non-members will be on a medical scheme by retirement (should they not exit employment before then) and continue with the subsidy at and after retirement.

Family Profile

It has been assumed that female spouses will be five years younger than their male counterparts. Furthermore, we've assumed that 60% of eligible employees on a health care arrangement at retirement will have a subsidised spouse dependant. For current retiree members, actual subsidised spouse dependants were used and the potential for remarriage was ignored.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

20. Employee benefits (continued)

Continuation of Membership:

It has been assumed that 75% of in-service members will remain on the Municipality's health care arrangement should they stay until retirement.

Normal retirement age

The average retirement age for all active employees was assumed to be 62 years.

Membership continuation	-10%	4 920 000	21 477 000	26 397 000	-7%

Methods and assumptions used in sensitivity analysis [GRAP 25.152(b)]

The sensitivity analyses were prepared using the projected unit credit method, which is consistent with the method used to value the DBO in the financial statements. The analyses assume a parallel shift in the respective actuarial assumptions while holding all other assumptions constant. It is important to recognize that the use of this method does not imply that the impact of changes in actuarial assumptions is linear or follows any predictable pattern.

Expected contributions for the next reporting period [GRAP 25.154(b)]

For the financial year ended 30 June 2025, Stellenbosch Municipality expects to contribute approximately R 5 603 000 (2024: R 5 165 000) to the defined benefit plan. This estimated contribution takes into account current salary levels, the number of participating employees, and actuarial assumptions regarding demographic and financial factors. These contributions are designed to secure sufficient assets to meet the plan's future benefits obligations as they become due.

20.2 Long-service awards benefits

Provision for long-service awards	20.2.1	31 047 021	30 108 021

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

20. Employee benefits (continued)

Long-service awards

The municipality operates a funded defined benefit plan for all its employees. Under the plan, a Long Service Award is payable after 10 years of continuous service and every 5 years thereafter to employees. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2025 by Arch consulting. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end 1168 (2024: 1142) employees were eligible for Long Services Awards.

The principal assumptions used for the purposes of the actuarial valuations were as follows:

Discount rate	10%	11.2%
CPI Inflation rate	4%	5.4%
General earnings inflation rate	5%	6.4%

Characteristics and risks of defined benefit plans

The Municipality offers employees LSA for every five years of service completed, from ten years of service to 45 years of service, inclusive. In the month that each "completed service" milestone is reached, the employee is granted an LSA. Working days are valued at 1/249th of annual earnings per day.

Risks associated with the defined benefit plan

Termination of service risk: There is a risk that fewer eligible employees terminate their service at the Municipality i.e. more long service awards vest than expected

Inflation Risk: There is a risk that future CPI inflation and earnings inflation are higher than assumed and present in an uncontrolled manner.

Regulatory Risk

There is a risk that changes to legislation with respect to long service awards may increase the defined benefit obligation for Stellenbosch Municipality.

Enforcement of eligibility criteria and rules

The risk that eligibility criteria and rules are not strictly or consistently enforced, to the detriment of the Municipality.

GRAP 25 defines the determination of the Discount Rate Assumption to be used as follows:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Volatility of open ended Defined Benefit Obligation:

The risk that the long service award DBO may be volatile which is exacerbated by its long-term nature.

Amounts recognised in the statement of financial position

The amounts recognised in the statement of financial position are as follow:

Present value of unfunded obligations	31 047 021	30 108 021

Movements in the present value of the defined benefit obligation

Opening Balance		30 108 021	27 958 021
Increases		5 056 967	5 150 000
Reductions (Payments, remeasurement etc.)		(4 117 967)	(3 000 000)
Closing balance		31 047 021	30 108 021

The following table provides a maturity analysis of the present value of the defined benefit obligations, showing the undiscounted cash flows to be paid in respect of benefits to be provided under the plan: (up to 40 years, R millions)

Future year intervals	Projected Benefit Payments
Within 1 year	4 419 000
Between 1 - 2 years	4 492 000
Between 2 - 3 years	3 588 000
Between 3 - 4 years	4 363 000
Between 4 - 5 years	4 965 000
6 to 10 years	27 717 000
11 to 15 years	30 087 000
16 to 20 years	25 266 000
21 to 30 years	34 443 000
31 to 40 years	3 436 000
	142 776 000

The benefits payments are scheduled based on the expected long service terms of current employees and the provisions of the plan that determine the timing of benefits payments. The distribution of these payments is subject to changes in demographic factors such as normal salary cost inflation and withdrawal rates.

The estimated current service cost for the upcoming year has been determined to be R 2 357 000, while the interest cost for the same period is projected to be R2 889 000. For comparison, in 2023/2024, the current service cost and interest cost were R 2 304 000 and R 3 158 000, respectively.

Sensitivity Analysis

Methods and assumptions used in sensitivity analysis

The sensitivity analyses were prepared using the projected unit credit method, which is consistent with the method used to value the DBO in the financial statements. Landfill site provision

The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 19/2/5/1/B4/45/WL0182/22 issued in terms of the Environmental Conservation Act, 1989 (Act 73 of 1989)

In terms of the licensing of the landfill refuse sites, the municipality will incur licensing and rehabilitation costs of R154 425 163 (2024: R106 740 477) to restore the site at the end of its useful life.

The unwinding of the provision for landfill site for the current year was R12 542 006 (2024: R10 734 972) was included in the finance cost in the statement of financial performance.

Cells 1 and 2 have reached full capacity and must be rehabilitated. The expected future cash outflows for cells 1 and 2 should commence in the 2025/2026 financial year. Cell 3 has come into use at the end of 30 June 2013 financial year and is the current landfill site in use. The expected future cash outflows is between July 2044 and July 2048 for cell 3. Cell 4 has come into use in November 2024 and cash outflows are expected in July 2044 and July 2048.

The provision has been determined based on an independent valuation performed by a firm of consulting engineers as at 30 June 2025

Key cost parameters:

- Inflation rate 7.65% (2024: 5.4%)
- Discount rate 11% (2024: 11.75%)

Refer to note 44 for contribution to the provision.

Financial Note: Assessment Rates

Assessment Rates are levied on the value of land and improvements, which valuation is performed every four years. Interim valuations are processed on an annual basis to consider any changes in individual property values, due to amendments. The current Valuation Roll came into effect on 01 July 2021. With reference to Section 78 of the Local Government: Municipal Property Rates Act, No. 6, 2004, two reviews have been finalised and two supplementary valuations have been performed during the financial year and implemented accordingly.

The following assessment rates were charged for the period ending June 2025:

Residential Property	R 0.005387
Business and Commercial Property	R 0.011313
Agricultural Property	R 0.001347
Public Service Purposes	R 0.011313
Public Service Infrastructure	R 0.001347
Public Benefit Organization	R 0.001347
Vacant Residential	R 0.010775
Vacant other	R 0.021550

Property Rates are levied monthly on property owners' accounts and are payable the 7th of each month. Property owners may request to pay their Rates annually, which amount will be levied in July and must be paid by the 7th of October annually. Interest on outstanding accounts for Property Rates is levied as per Council's Credit Control and Debt Collection Policy.

Relief Measures

The relief measures on property rates are generally described in paragraph 8 of the approved Property Rates Policy of the Municipality. This includes the specific under mentioned relief measures:

Rebate and Gross Monthly Household Income for Qualifying Senior Citizens and Disabled Persons:

Gross Monthly Household Income %

Up to R8 000 - 100%

From R8 001 to R 11 000 - 75%

From R11 001 to R13 000 - 50%

From R13 001 to R17 000 - 25%

The following principle agent arrangements were in place in relation to the expenditure as contained in note 41 and note 46 to the annual financial statements:

EasyPay (Agent) is a payment platform used to collect municipal service payments from third parties. These payments are accepted by EasyPay on behalf of the Municipality (Principal), from third parties. A service charge is levied by EasyPay for collection of the payments. This fee is recognised as commissions paid.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

		2025 R	2024 R
46. Operational cost (continued)			
<p>Ontec (Agent) sells and collects money from the sale of prepaid electricity on behalf of the Municipality. Ontec pays over the monies collected to the Municipality, minus the collection fee levied, determined at a rate specific in the Service Level Agreement. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the collection fee paid to Ontec (which includes costs incurred on debit or credit card electricity sales and cash handling fees incurred), is recognized as an expense. This same service was also performed by Syntell during the current financial year, however the contract came to an end to which Ontec then took over the respective duties.</p> <p>TMT (Agent) manages the collection of traffic fines (both legacy fines issue before 1 July 2017 and fines issued after this date), on behalf of the Municipality. TMT pays over the monies collected to the Municipality. The municipality recognises 100% of the money's collected as revenue from non - exchange transactions and the fee incurred to TMT is recognized as an expense.</p> <p>These arrangements are subject to standard terms and conditions upon termination.</p> <p>None of the municipalities assets are under the custodianship of the agents.</p>

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

50. Financial instruments

50.1 Fair value of financial instruments

The management of the municipality is of the opinion that the carrying value of Financial Assets and Financial Liabilities recorded at amortised cost in the annual financial statements approximate their fair values, except for the listed Government stock. In accordance with GRAP 104 the Fair Values of Financial Assets and Financial Liabilities, together with the carrying amounts shown in the Statement of financial position, are as follow:

	2025		2024	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets				
Amortised cost				
Trade and other receivables from exchange transactions	241 149 571	241 149 571	251 987 495	251 987 495
Trade and other receivables from exchange transactions (Non-current)	8 321 218	8 321 218	6 508 597	6 508 597
Cash and cash equivalents	30 708 541	30 708 541	150 678 874	150 678 874
Short term investments	518 794 766	518 794 766	455 716 603	455 716 603
Trade receivables from non-exchange transactions	7 736 359	7 736 359	5 298 358	5 298 358
Other receivables from exchnage transactions	89 625 573	89 625 573	61 383 609	61 383 609
	896 336 028	896 336 028	931 573 536	931 573 536
Financial liabilities				
Amortised cost				
Trade and other payables:				
Consumer deposits	25 397 225	25 397 225	24 190 439	24 190 439
Trade and other payables from exchange transactions	327 237 482	327 237 482	319 405 527	319 405 527
Borrowings	514 701 663	514 701 663	584 349 242	584 349 242
	867 336 370	867 336 370	927 945 208	927 945 208
Total financial instruments	28 999 658	28 999 658	3 628 328	3 628 328

The Fair Values of Financial Assets and Financial Liabilities are determined as follow:

The Fair Value of Long term liabilities is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

The fair value of Other Financial Assets and Financial Liabilities were determined after considering the standard terms and conditions of agreements entered into between the municipality and other parties as well as the current payment ratio's of the municipality's debtors.

50.2 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Council. The municipality manages liquidity risk by effectively managing its working capital, capital expenditure, external borrowings and cash flows. Standby credit facilities are available with the municipality's main banker to cater for any unexpected temporary shortfall in operating funds.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

50. Financial instruments (continued)

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amount disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Risk from biological assets

The municipality is exposed to financial risks arising from changes in wood prices. The municipality does not anticipate that wood prices will decline significantly in the foreseeable future. The municipality has not entered into derivative contracts to manage the risk of a decline in wood prices. The municipality reviews its outlook for wood prices regularly in considering the need for active financial risk management.

Interest rate risk management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well established financial institutions of high credit standing. No investment with a tenure exceeding twelve months shall be made without consultation with the councillor responsible for financial matters.

In the case of receivables whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term receivables and other debtors are individually evaluated annually at the reporting date for impairment or discounting. A report on the various categories of receivables are drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

50. Financial instruments (continued)

The municipality is not exposed to interest rate risk as the municipality borrows funds at fixed interest rates.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The municipality had no variable rate long-term financial instruments at year-end requiring an Interest Rate Sensitivity Analysis.

50.3 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality.

Potential concentrations of credit risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash balances.

The municipality manages credit risk in its borrowing and investing activities by only dealing with well-established financial institutions of high credit standing, and by spreading its exposure over a range of such institutions in accordance with its approved investment policies. Credit risk relating to consumer debtors is managed in accordance with the municipality's credit control and debt collection policy. The municipality's credit exposure is spread over a large number and wide variety of consumers and is not concentrated in any particular sector or geographical area. Adequate provision has been made for anticipated bad and doubtful debts. Additional information relating to the analysis of consumer debtors is given in the accounting policies and Note 6 to the annual financial statements.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

The carrying amount of financial assets recorded in the annual financial statements, which is net of impairment losses, represents the municipality's maximum exposure to credit risk without taking account of the value of any collateral obtained.

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses other publicly available financial information and its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its investment operations (financial assets that are neither past due nor impaired) by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction / exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed annually by the Chief Financial Officer and authorised by the Council.

Receivables from exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment. Receivables from non-exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from non - exchange transactions are presented net of the allowance for impairment.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of receivables. Receivables are provided for based on estimated irrecoverable amounts, determined by reference to a non payment rate.

Stellenbosch Municipality

50. Financial instruments (continued)

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

Payment to accounts of consumer debtors who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

There is no collateral held for security in respect of consumer debtors.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:

Cash and cash equivalents	30 708 541	150 678 874
Short term investments	518 794 766	455 716 603
Trade and other receivables from exchange transactions	241 149 571	251 987 495
Other receivables from exchange	89 625 573	61 383 609
Receivables from non-exchange transactions	8 544 534	5 298 358
Trade and other receivables from exchange transactions (Non-current)	8 321 218	6 508 597
Maximum credit and interest risk exposure	897 144 203	931 573 536

50.4 Other price risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

50.5 Foreign currency risk management

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

	2025 R	2024 R
--	-----------	-----------

55. Additional disclosure in terms of Municipal Finance Management Act (continued)

Distribution losses

In terms of section 125(2)(d)(i) of the Municipal Finance Management Act (Act 56 of 2003), the municipality experienced the following distribution losses for the year under review.

Electrical distribution losses (KW)

System input	384 906 552	357 647 395
Sales	(363 301 265)	(337 518 453)
	21 605 287	20 128 942

Electricity losses are calculated as 5.63% (2024: 5.63%). Electricity losses are within the industry norm.

Water distribution losses (KL)

System input	12 774 943	12 563 518
Sales	(8 789 256)	(8 631 963)
	3 985 687	3 931 555

Water losses are calculated as 31.20% (2024: 31.30%). Water losses are above the industry norm. The high losses are mostly attributed to an ever-aging water network of asbestos cement pipes. The heavy rain events and wetter than normal winter periods of recent years have permanently caused the old pipework to become more fragile it otherwise would've been. These increases in pipe bursts during the wet periods haven't reverted back to the pre-wet period levels. This could be expected of old asbestos pipe networks if there is movement of the ground around or near these pipes.

--	-----------	-----------

56. Retirement benefit information

The municipality makes provision for post-retirement benefits to eligible Councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

These schemes are subject to a tri-annual, bi-annual or annual actuarial valuation as set out hereunder.

SALA Pension fund

The SALA Pension Fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at September 2023 stated that the net assets of the fund amounted to R12 076 570 425 (July 2021: R12 238 000 000), with funding levels of 100% (July 2021: 85.5%). The actuary recommended that employers continue to contribute at the current rate of 19.18% of pensionable salary.

The actuaries are satisfied with the investment strategy of the fund. The nature of the assets is, in their opinion, suitable for the nature of the liabilities of the Fund as defined in the rules of the fund. The matching of assets with the liabilities of the Fund is adequate; and the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

LA retirement Fund (Previously Cape Joint Pension Fund)

The LA RETIREMENT FUND operates both as a defined benefit and defined contribution scheme.

Defined benefit scheme

The contribution rate of the defined benefit scheme is 27%; 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2024 disclosed an actuarial valuation amounting to R1 302 163 000 (30 June 2023: R1 338 791 000), with a surplus of R202 952 000 (2023: R226 285 000), with a funding level of 118.5% (30 June 2023: 120.3%).

Defined contribution scheme

The actuarial valuation report at 30 June 2024 indicated that the defined contribution scheme of the fund is in a sound financial position, with net assets amounting to R2 213 314 000 (30 June 2023: R2 163 627 000), net investment reserve of Rnil (30 June 2023: Rnil) and with a funding level of 100% (2023: 100%).

Cape Joint Retirement Fund (CRF)

The most recent statutory valuation performed as at 30 June 2024 revealed that the assets of the fund amounted to R47 307 646 000 (30 June 2023: R42 710 035 000), with funding levels of 117.3% (2023: 120.1%). The contribution rate paid by the members (7.50%/9%) and the municipalities (19.50%/18%) is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

Municipal Councillors Pension Fund

The Municipal Councillors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2018 stated that the net assets of the fund amounted to R1 798 030 000 (30 June 2017: R1 480 549 000), with funding levels of 103.26% (30 June 2017: 101.31%). The contribution rate paid by the members (13.75 %) and council (15 %) is sufficient to fund the benefits accruing from the fund in the future. The Actuary certified that the Fund was in a sound financial condition as at 30 June 2018, in that the assets of the fund were sufficient to cover the accrued service liabilities including the recommended Contingency Reserves in full.

--	-----------	-----------

56. Retirement benefit information (continued)

The Municipal Workers Retirement Fund (Previously South African Municipal Workers Union National Provident Fund)

The Municipal Workers Retirement Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the Rules. The employers contribute at a total rate of not less than 18%. From 1 July 2017, members and employers that fall under other bargaining councils or forums are not bound by the above minimum contribution rates. The statutory valuation performed as at 30 June 2021 stated that the assets of the fund amounted to R10 866 257 000 (30 June 2017: R7 720 948 000), with funding levels of 100.0% (30 June 2017: 102.0%). The Fund's assets exceeded the member liabilities as at 30 June 2021, by a margin of R 130.4 million or 1.2%. In the valuation report the actuaries have chosen to allocate R 100.3 million to the Risk Reserve, to allow for projected excess salary-multiple death and disability claims in the year following the valuation date (in excess of the contributions allocated toward these risk benefits over this period), while also leaving a reasonable margin against future claims variability. Accordingly there is a small positive balance in the Investment Reserve. The value of the assets is more than sufficient to cover the accrued liabilities (Members' Shares), and the required level of risk reserve in respect of the self-insured risk benefits, and the Fund is therefore financially sound.

National Fund for Municipal Workers

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively. Category C-Members, appointed after 1 July 2012, who are not part of the Schedule shall make monthly contributions to the Fund equal to 7.5% of their pensionable salary.

The most recent statutory valuation performed as at 30 June 2024 stated that the net assets of the fund amounted to R31 228 359 (30 June 2023: R27 542 846), with funding levels of 101% (30 June 2024: 101%). The actuary certified that the assets of the fund are sufficient to cover 100.40% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

The Local Authority must contribute in respect of category A and category C members such an amount as agreed between the Local Authority and the fund, subject to a minimum contribution rate of 2% and 5% of their remuneration respectively. Category B members are members who belong to both category A and C and the Local Authority must, on behalf of such members, not contribute less than 7% of their remuneration. The contribution rates stipulated above include the amount payable towards the insured risk benefits policy.

		2025 R	2024 R
57. Going concern			
We draw attention to the fact that at 30 June 2025, the municipality had an accumulated surplus of R 5 941 439 748.			
The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.			
58. Deviations from SCM regulations - SCM Regulation 36			
In terms of section 36 of the municipality SCM regulations, any deviations from SCM policy needs to be approved by the accounting officer and noted by Council. The awards listed below have been approved by the accounting officer and noted by Council.			
All deviations considered by the accounting officer are processed in terms of the SCM regulations and the municipality's SCM policy. This process entails being assessed by the SCM Bid Adjudication Committee in terms of the stipulated criteria for emergency procurements and circumstances where it is impractical or not possible to follow the official procedure.			
Deviation from, and ratification of minor breaches of, the procurement processes			
In terms of section 36(2) of the Supply Chain Management Policy approved by Council it is stipulated that bids where the formal procurement processes could not be followed, must be noted in the annual financial statements.			
SCM paragraph reference			
36 (1)(a) i	Dispense with the official procurement processes in an emergency	1 681 858	24 771 246
36 (1)(a) ii	Dispense with official procurement processes if such goods or services are produced or available from a single source or sole provider.	603 352	15 680 919
36 (1)(a) v	Dispense with official procurement processes in any other exceptional case where it is impractical or impossible to follow the official procurement processes.	5 350 276	18 275 924
Total deviations		7 635 486	58 728 089

The deviations and value disclosed is representative of the award value. In the event of a rates based award, an estimate is utilised based on certain projected provisions. In the event that an award value is not present, nor an estimate due to certain conditions, the actual expenditure incurred will be disclosed.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
59. Contingent liabilities		
Contingency arising out of litigation	23 690 372	18 469 072
Litigation is the process of taking a civil law suit (legal dispute) to Court. A civil case refers to a legal dispute between two or more parties seeking resolution through the civil court system. Civil litigation refers to the legal process of resolving disputes between parties seeking monetary damages, specific performance, or other remedies instead of criminal sanctions. These cases arise from a wide range of issues, including contract disputes, personal injury claims, property disputes, employment grievances, and more.		
Contingency arising out of arbitration	1 000 000	1 000 000
Arbitration is a procedure in which a dispute is submitted, by agreement of the parties, to one or more arbitrators who make a binding decision on the dispute. In choosing arbitration, the parties opt for a private dispute resolution procedure instead of going to court.		
Contingency arising out of adjudication	1 413 689	-
Adjudication is the legal process of formally settling a dispute, typically by an arbiter, who makes a decision based on presented evidence and legal arguments. It's a formal and decisive way to resolve conflicts.		
Municipal landfill site	-	-
The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 19/2/5/1/B4/45/WL0182/22 issued in terms of the Environmental Conservation Act, 1989 (Act 73 of 1989). The obligation is immediately enforceable upon closure of the landfill site. As part of these licensing obligations, the municipality is responsible for post-closure obligations namely, ground water monitoring, decommissioning, monitoring committee and gas monitoring. The duration of the time for the cost to be incurred is contingent on the decision making of the regional director as stipulated in the licence conditions. At 30 June 2024, a decision has not been made by the regional director on the post-closure obligations for the municipality as per the licence agreements, as a result thereof, a reliable estimate of the costs to be incurred cannot be reliably estimated due to the uncertainty of the key events contained within the licencing conditions.		
VAT on library grants	3 226 905	2 487 695
The municipality will pay back the VAT on library grants and has subsequently realised this as a liability in the records of the municipality. The municipality will enter into negotiations with SARS on the penalties and interest on these VAT amounts. The amount of interest and penalties has been calculated over the last 5 years and is disclosed according as a contingent liability. The amount and timing of this payment of the penalties and interest is contingent on the outcome of the negotiations with SARS.

60. Segment information

General information

Identification of segments

The municipality is organised and reports to management on the basis of three major functional areas: primary, secondary and tertiary educational services. The segments were organised around the type of service delivered and the target market. Management uses these same segments for determining strategic objectives. Segments were aggregated for reporting purposes.

Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

Reportable segments are identified based on activities performed of the municipality that generates economic benefits or service potential including internal services that contribute to achieving the municipality's objectives without necessarily generating net cash inflows.

Management has only identified segment information for which data is reported on and reviewed during the decision making process of the municipality. Aspects relating to GRAP 18 paragraph 21 (a) - (j) which does not form part of the review process of the management reports will not form part of the segment information.

Segmental reporting was based and identified on the MFMA S71 monthly budget statements/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports are organised around the type of service delivered, in a standardised format namely the C2 schedule. This is considered appropriate for external reporting purposes to achieve the objectives of GRAP 18.

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Community and public safety	Primary services providing community safety, crime prevention and law enforcement.
Governance and administration	Primary services in relation to financial management, financial and governance decision making.
Economic and environmental services	Urban and developmental planning in accordance with the relevant laws and regulations. Environmental planning and protection for long term sustainability.
Trading services	Primary basic service provision including water, electricity, sanitation and refuse.

Measurement of segment surplus or deficit, assets and liabilities

Basis of accounting for transactions between reportable segments

The accounting policies of the segments are the same as those described in the summary of significant accounting policies.

Information about geographical areas

All the municipality's operations are located in the Republic of South Africa in the Cape Winelands area. Information to report on different geographical areas is not available would be expensive and impractical to develop

--	-----------	-----------

61. GRAP 3 Adjustments (continued)

61.3 Correction of errors

The following material prior period errors adjustments occurred with respective reasonings:

Revenue from non - exchange transactions - Transfers and subsidies

An inspection was performed on the entire population of non-exchange revenue. Consequently it was found that Land was transferred in the municipality's name that was not previously recognised. The municipality had also identified that the VAT portion of the library grant had not been recognised as goods and services. Consequently, the municipality corrected the revenue from non-exchange to revenue from exchange transactions. The municipality also received land that was transferred to the municipality in the prior year. The breakdown of the items are depicted below:-

Nature of error

Revenue from non-exchange transactions previously reported	342 231 985
Library fees revenue correction to sale of goods and rendering of services	(9 507 275)
Library fees VAT portion correction to Output VAT accrual	(1 463 395)
Land recognition related to prior years from provincial government	42 300 000
	373 561 315

Property plant and equipment

An in depth review was done on the entire fixed asset register to identify corrections that are required. The municipality was also informed of land that was transferred in the municipality's name in the prior year. This land has also affected the land inventory line item on the statement of financial position with a contra total of R17 504 023 (Including Investment Property transfer). The required corrections are depicted below:

Nature of error

Property, plant and equipment previously reported	5 853 784 635
Retention payment recognised in relation to prior years	1 315 601
Decreased in depreciation due to a change in useful live of assets	(1 860 147)
Recognition of land to property, plant and equipment	42 300 000
Transfer of land to land inventory according to council resolution	(10 969 023)
	5 884 571 066

Accumulated surplus

The accumulated surplus was restated due to multiple reasons. In the prior year the municipality performed various corrections due to items that presented itself out of the review of the components. These are all depicted below:

Nature of error

Accumulated surplus previously reported	5 727 759 087
Supplier VAT correction	3 629 757
Correction of unallocated deposits older than 3 years.	4 621 665
VAT correction of library grant, now recognised as goods and services for prior years	(22 872 073)
VAT accrual on library grant for prior years now recognised.	(5 319 808)
Prior year accruals, previously recognised but not cleared.	1 270 264
Prior year property plant and equipment correction for changes in asset categories	40 198 672
Other changes	482 463
	5 749 770 027

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2025

Notes to the Annual Financial Statements

	2025 R	2024 R
--	-----------	-----------

61. GRAP 3 Adjustments (continued)

Trade and other payables from exchange transactions

Various corrections were performed on trade and other payables line items. These changes come as a result of investigation of control accounts as well as changes in the interpretation of the VAT accounting standards. The consequent corrections are depicted below:

Nature of error

Trade and other payables previously reported	320 683 581
Correction of prior year retention of supplier not previously recognised	1 512 941
Correction of incorrect leave payout control account utilised	(3 949)
Payables and accruals prior year correction for accounts not previously cleared	(2 509 116)
Correction of unallocated deposits which were older than 3 years and not previously cleared	(3 481 453)
Output VAT accrual not previously recognised as other payables	66 556 152
Output VAT provision for doubtful debt not previously recognised as other payables	(26 486 647)
	356 271 509

Other receivables from exchange transactions

This error relates to a change in interpretation of accounting standards in the current year. VAT was previously recognised on a net basis on the statement of financial position including all accruals. Subsequently this net line item for VAT has now been segregated. The contra account also affected with these correcting journals is the VAT control account.

Nature of error

Other receivables from exchange previously reported	54 389 107
VAT input accrual recognised to other receivables	37 788 796
	92 177 903

62. Additional disclosure in terms of the Broad-Based Black Economic Empowerment Act

Information on compliance with the Broad-Based Black Economic Empowerment Act (B-BBEE) is included in the Annual Report under the section titled Employment Equity.

63. Change in estimate

Property, plant and equipment

The useful lives of all asset classes were adjusted during the 2024/2025 financial year to more accurately reflect the period of economic benefits or service potential derived from these assets. Refer to note 11. The effect of changing the remaining useful life of assets for the municipality during 2024/2025 has decreased the depreciation charge for the current year by R 13 821 745 (2023/2024: R402 000). It is impracticable to estimate the effect of these changes on future periods.

Provisions: Landfill site rehabilitation

The reference interest rate of the inflation rate to calculate the landfill site provision was changed from the Western Cape CPI rate to an inflation rate specific to construction cost and adjusted for risks. This is due to this rate being more relevant this year due to changes in circumstances. This rate also best represents current considerations for the specific construction industry. The financial effect of the change in the current period is R31 210 954.83. It is impractical to estimate the effect on future periods as the financial markets are unpredictable in the future years and this plays the most important role in determining these interest rates.

1. PURPOSE

The Annual Performance Report 2024/25 is hereby submitted to the Stellenbosch Municipal Council in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), Sections 46(1) and (2). The report covers the municipality's performance information from 01 July 2024 to 30 June 2025 and focuses on the implementation of the Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2024/25, concerning the objectives as encapsulated in the municipality's Integrated Development Plan (IDP) for the year under review.

The format of the report will reflect the Stellenbosch Municipality's Key Performance Indicators (KPIs) per Strategic Focus Area (SFA).

This report will also endeavour to report to the Council on the municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management; and (5) Good Governance and Public Participation.

2. LEGISLATIVE REQUIREMENTS

This Annual Performance Report has been compiled in compliance with the requirements of Section 46(1) of the MSA, which stipulates that:

- (1) A municipality must prepare for each financial year a performance report reflecting—
 - (a) the performance of the municipality and each external service provider during that financial year;
 - (b) a comparison of the performance referred to in paragraph (a) with targets set for performance in the previous financial year; and
 - (c) measures taken to improve performance.

In addition, regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations, 2001, states that "a municipality's performance management system entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting, and improvement will be conducted, organised, and managed, including determining the roles of the different role players." Performance management is not only relevant to the organisation but also applicable to the individuals employed within the organisation, as well as to external service providers.

3. MUNICIPAL OVERVIEW

Stellenbosch is the second-oldest town in South Africa, dating back to 1679 when the island in the Eerste River was named Stellenbosch by the then-Governor of the Cape, Simon van der Stel. The first farming activities in the area started that year. Today, the area is primarily known for its extraordinary wines, fruit, world-renowned cultural landscapes, and exceptional scenic beauty. The towns of Stellenbosch and Franschhoek are renowned for their diverse architectural styles, including Dutch, Georgian, and Victorian, which reflect their rich heritage and traditions, as well as the divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch, Boland College, sports and culinary institutions, and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. The area's numerous wine farms and cellars are very popular, and the area is the home of the very first wine route in South Africa.

The town boasts various sports facilities. Coetzenburg, with its athletics and rugby stadiums, has hosted star performances over many generations, while the Danie Craven Stadium is the home of Maties Rugby, the largest rugby club in the world. The municipal area has several theatres, which include the university's HB Thom Theatre, Spier Amphitheatre, Dorpsstraat Theatre, Aan de Braak Theatre, and Oude Libertas Amphitheatre, all well-known for their summer seasons of music, theatre, and dance.

Limited municipal resources require an increase in multi-sectoral partnerships to address the broad spectrum of needs in the community. The municipality cannot address the challenges of Stellenbosch on its own, not only because of limited resources but also because it does not control all the variables impacting the growth and development of the town. Welfare and community organisations play a leading role in helping to meet the needs of previously neglected communities. The business sector also plays a key role in shaping the economic development of the municipal area.

4. PERFORMANCE MANAGEMENT OVERVIEW

To improve planning, implementation, measurement, and reporting, the municipality implemented the following actions:

- Departmental operational plans were developed for monitoring and reporting operational programmes;
- An electronic performance management system is operational within the municipality. The same system forms the basis of the performance evaluations of the Directors and the Municipal Manager; and
- The municipality endeavoured during the development of the TL SDBIP, as well as with the development of the Departmental SDBIP, that the "SMART" principle be adhered to in the setting of indicators and targets. Emphasis was placed on ensuring that indicators and targets were specific and time-bound, thus making them measurable.

4.1 Top Layer Service Delivery and Budget Implementation Plan

The organisational performance is evaluated using a Municipal Scorecard (the TL SDBIP) at the organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at the directorate and departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where, and when the municipality's strategies, objectives, and normal business processes are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and the Budget.

The MFMA Circular No. 13 prescribes that:

- The IDP and budget must be aligned;
- The budget must address the strategic priorities;
- The SDBIP should indicate what the municipality is going to do during the next 12 months; and
- The SDBIP should form the basis for measuring performance against goals set during the budget / IDP processes.

The TL SDBIP 2024/25 was prepared as described in the paragraphs below and approved by the Executive Mayor on 25 June 2024.

The approved TL SDBIP 2024/25 was revised in January 2025. These revisions were made in line with the adjustment budget, internal audit findings, and (if any) recommendations made by the Auditor General of South Africa (AGSA).

The overall assessment of actual performance against targets set for the Key Performance Indicators, as documented in the SDBIP, is illustrated in terms of the following assessment methodology:

Table 3: Performance Assessment Criteria

Colour	Category	Explanation
N/A	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
R	KPI Not Met	Actual vs. target less than 75%
O	KPI Almost Met	Actual vs. target between 75% and 100%
G	KPI Met	Actual vs. target 100% achieved
G2	KPI Well Met	Actual vs. target more than 100% and less than 150% achieved
B	KPI Extremely Well Met	Actual vs. target of more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidates service delivery targets set by Council / Senior Management and provides an overall picture of performance for the municipality as a whole, reflecting performance on its strategic priorities. The TL SDBIP is a detailed one-year plan, and the necessary components should include:

- Monthly projections of revenue to be collected for each source;
- Expected revenue to be collected, not billed;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Non-financial, measurable performance objectives in the form of targets and indicators; and
- A detailed capital project plan broken down by ward over three years.

4.2 Departmental Service Delivery and Budget Implementation Plan

The Departmental Service Delivery and Budget Implementation Plan (the detailed SDBIP) captures each Directorate's performance. Unlike the TL SDBIP, which reflects the strategic performance of the municipality, the Departmental SDBIP 2024/25 provides a comprehensive picture of the performance per directorate, department, and section. It was compiled by the directors and senior managers for their respective departments and sections and consists of objectives, indicators, and targets derived from the approved TL SDBIP 2024/25.

5. PLANNED TARGETS VS ACTUAL RESULTS FOR THE 2024/25 FINANCIAL YEAR

This section of the Annual Performance Report 2024/25 will report on the municipality's actual performance against the planned targets as derived from the municipality's IDP. Because the municipality has developed five (5) Strategic Focus Areas (SFAs), the performance reporting will follow these themes.

5.1 Municipal Performance per National Key Performance Indicator

5.1.1 Municipal Transformation and Institutional Development

Table 4: NKPA- Municipal Transformation and Institutional Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2023/24	MUNICIPAL ACHIEVEMENT 2024/25
The number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan	4	6
The percentage of a municipality's budget actually spent on implementing its workplace skills plan	0.97% (R6 263 077 / R645 932 311 = 0.97%)	0.82% (R5 340 533.45 / R652 041 454.98) x 100 = 0.82%

5.1.2 Basic Service Delivery

Table 5: NKPA- Basic Service Delivery

INDICATOR	MUNICIPAL ACHIEVEMENT 2023/24*	MUNICIPAL ACHIEVEMENT 2024/25*
The percentage of households earning less than R7 000 per month with access to free basic services (In the case of Stellenbosch Municipality- the percentage of registered Indigent households is being reported)	100%	100%
The percentage of households with access to basic level of water	100%	100%
The percentage of households with access to basic level of sanitation	100%	100%
The percentage of households with access to basic level of electricity	100%	100%
The percentage of households with access to basic level of solid waste removal	100%	100%

* The percentage of households with access to a basic level of water, sanitation, electricity, and solid waste services is based on formal households only. The information on informal households and backyard dwellings was not taken into account.

5.1.3 Local Economic Development

Table 6: NKPA- Local Economic Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2023/24	MUNICIPAL ACHIEVEMENT 2024/25
The number of jobs created through the municipality's local economic development initiatives including capital projects	1 695	1 341

5.1.4 Municipal Financial Viability and Management

Table 7: NKPA- Municipal Financial Viability and Management

INDICATOR	MUNICIPAL ACHIEVEMENT 2023/24	MUNICIPAL ACHIEVEMENT 2024/25
Debt coverage ((Total operating revenue - operating grants received) / Debt service payments due within the year)	32.26%	36.22%
Service debtors to revenue (Total outstanding service debtors / Annual revenue received for services)	30.55%	24.59%
Cost coverage ((Available cash + investments) / Monthly fixed operating expenditure)	3.66	3.02

5.1.5 Good Governance and Public Participation

Table 8: NKPA- Good Governance and Public Participation

INDICATOR	MUNICIPAL ACHIEVEMENT 2023/24	MUNICIPAL ACHIEVEMENT 2024/25
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan	85.88%	89.29%

5.2 Overall Performance per Municipal Strategic Focus Area

The following graph and table illustrate the Municipality's overall performance per Municipal Strategic Focus Area (SFA).

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance
KPI Not Yet Measured	-	-	-	-	-	-
KPI Not Met	6 (12.77%)	-	1 (12.50%)	-	1 (8.33%)	4 (21.05%)
KPI Almost Met	3 (6.38%)	-	1 (12.50%)	-	1 (8.33%)	1 (5.26%)
KPI Met	21 (44.68%)	2 (40%)	4 (50%)	3 (100%)	4 (33.33%)	8 (42.11%)
KPI Well Met	8 (17.02%)	2 (40%)	1 (12.50%)	-	4 (33.33%)	1 (5.26%)
KPI Extremely Well Met	9 (19.15%)	1 (20%)	1 (12.50%)	-	2 (16.67%)	5 (26.32%)
Total:	47	5	8	3	12	19
	100%	10.64%	17.02%	6.38%	25.53%	40.43%

The Stellenbosch Municipality set itself a higher target for the 2024/25 financial year of 95%. The municipality's water quality does surpass the national standards. The Water Quality leg is 80% vacant, and only the Assistant Superintendent: Water Quality is currently filled. Filling the remaining posts will result in an improvement in test results. Some test failures occur due to sampling methods, disinfection improvements, and additional personnel required.</p>	The municipality will prioritise filling of the remaining Water Quality Controller post. The recruitment processes have started. The Department: Human Resources is busy with the longlisting compilation, and the vacancy is aimed to be filled by 31 December 2025.

Furthermore, the municipality is engaged in the permanent replacement of flood-damaged pipelines (previous repairs were temporary) and repairing and maintaining ageing pipes.	The municipality now has a pipe replacement consultant tender, as well as a construction tender in place, and it is dealing with critical pipe repairs or replacements. Efforts will continue with the installation of water management devices and the removal of illegal connections in households.

MUNICIPAL MANAGER

Date: 2/12/25

ANNEXURE C: AUDIT AND PERFORMANCE AUDIT COMMITTEE ANNUAL REPORT 2024/25

STELLENBOSCH

STELLENBOSCH • PNIEL • FRANSCHHOEK

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

1. Report of the Audit and Performance Audit Committee (APAC)

This report of the APAC of Stellenbosch Municipality (SBM) is in respect of the 2024/2025 financial year. The APAC has complied with its responsibilities in terms of Section 166 of the MFMA and applicable National Treasury Regulations. The Committee has also regulated its affairs and discharged its responsibilities concordant to the approved Charter. The Committee's operation is guided by the MFMA, the King IV report on Corporate Governance and Global Internal Audit Standards.

2. Membership and Attendance

- 2.1. The APAC composed of four (4) independent members not in the employ of the Municipality appointed by Council. The Committee met four times during 2024/25 financial year.
- 2.2. The list of Committee members, their qualifications, and a record of their attendance of meetings is as follows:

Member Details	Qualifications	Capacity	Date Appointed	Number of Meetings Attended
Mr. LC Nene	<ul style="list-style-type: none"> Master of International Business B Com Accounting Post Graduate Diploma in Management (Corp Gov) Certification in Control Self-Assessment, Institute of Internal Auditors South Africa (IIASA) General Internal Auditor – GIA (SA) IIA SA Certification in Risk Management Assurance, IIA SA Fellow of the Institute of Institute of Internal Auditors South Africa, FIIA (SA) 	Chairperson	01 June 2022	4
Dr. L Mortimer	<ul style="list-style-type: none"> National Diploma in Public Health Diploma in Local Government Administration Diploma in Personnel Management Post Graduate Diploma in Business Management MBA Doctorate in Administration 	Member	01 May 2024	4

Member Details	Qualifications	Capacity	Date Appointed	Number of Meetings Attended
	(BComm Accounting Science)			
	<ul style="list-style-type: none"> • Bachelor of Commerce (Hon Accounting Science) • Chartered Accountant South Africa, CA (SA) • Certified Director, Institute of Directors South Africa (IoDSA) 			
Ms. R Strydom	<ul style="list-style-type: none"> • Bachelor of Commerce (BCom Management Accounting) • Bachelor of Commerce (Hon Financial Accounting) 	Member	27 September 2023	1*
Mr. M Burton	<ul style="list-style-type: none"> • Bachelor of Accounting Science • Honours Bachelor of Accounting Science • Financing and Valuing Commercial Property (60 hours – 93% Average for completed assignments) • CA (SA) 	Member	01 March 2025	2**

* Ms. R Strydom resigned on 28 November 2024 thus she only attended one meeting.

** Mr. M. Burton was appointed on 01 March 2025 thus he attended two meetings.

- 2.3. The Municipal Manager (MM), Chief Financial Officer (CFO), Directors, Chief Audit Executive (CAE), Chief Risk Officer (CRO), Municipal Public Accounts Committee (MPAC) Chairperson, and Auditor General South Africa (AGSA) are permanent invitees to the Committee meetings.

3. Execution of Functions

The APAC has executed its duties and responsibilities during the financial year in accordance with its terms of reference as they relate to the Council's accounting, external and internal auditing processes, internal control, governance, predetermined objectives and performance monitoring, compliance with laws and regulations, risk management, combined assurance and information technology governance and financial reporting practices.

During the year under review, the Committee, amongst other matters,

3.1. In respect of the Auditor General South Africa (AGSA) [External Auditors and the External Audit]

- 3.1.1. Approved the AGSA terms of engagement and strategy, the audit plan and budgeted audit fees payable.
- 3.1.2. The Committee advised all the role players in Combined Assurance to work together to ensure that the audit fees are reduced going.
- 3.1.3. Considered the audit outcome of the Municipality extensively and communicated the APAC's satisfaction and congratulated the MM and Management on the Clean Audit Outcome for the sixth consecutive time.
- 3.1.4. Based on the audit outcome, recommendations were made by the APAC on the other

important matters as well as control deficiencies identified in the Auditor-Generals' management report.

- 3.1.5. Management has been requested by the APAC to improve business processes impacting the Annual Financial Statements (AFS) compilation and reconciliations of transactions, to avoid repeat findings relating to misstatements on the AFS.
- 3.1.6. Management is urged to strengthen controls to adequately monitor non-compliance with laws and regulations on a timely basis.
- 3.1.7. The supervision and review process needs to be interrogated to prevent, detect and correct misstatements on a timely basis and the controls designed to monitor compliance with regulations that are not always able to prevent or report the instances of non-compliance in a timely manner to allow for corrective action.
- 3.1.8. The quality of submitted financial statements can still be improved; thus, management is encouraged to timely develop action plans with detailed root causes to allow for improvement in the next reporting cycle.
- 3.1.9. Recommended that management should continue with preparation of the Interim Financial Statements to ensure we mitigate material misstatements on AFS.

3.2. In respect of the Annual Financial Statements (AFS)

- 3.2.1. Confirmed the going concern as the basis of preparation of the AFS.
- 3.2.2. Examined, reviewed and interrogated the AFS, performance report as well as financial information disclosed to the public prior to submission and approval by Council.
- 3.2.3. Reviewed reports on the adequacy of the portfolio and specific impairments and impairment of other assets.
- 3.2.4. Ensured that the AFS fairly represented the financial position of the Stellenbosch Municipality as at the end of the financial year in accordance with South African Standards of Generally Recognised Accounting Practice (GRAP) and in the manner required by the MFMA and DORA.
- 3.2.5. Considered the appropriateness of accounting treatments, significant unusual transactions and management accounting judgements.
- 3.2.6. Considered the appropriateness of the accounting policies adopted by Management and changes thereto.
- 3.2.7. Reviewed any significant legal and tax matters that could have a material impact on the financial statements.
- 3.2.8. Noted that there were no material reports or complaints received concerning accounting practices, internal financial controls, content of AFS, internal controls and related matters.

3.3. In respect of Internal Control and Internal Audit

- 3.3.1. Reviewed and approved the internal audit mandate, annual and three-year rolling audit plans and evaluated the independence, effectiveness and performance of the Internal Audit Function (IAF) and compliance with its mandate.
- 3.3.2. Considered reports of the IAF on Council's system of internal control, including internal financial controls and maintenance of effective internal control systems.
- 3.3.3. Reviewed significant issues raised by the IAF and the adequacy of corrective action in response to such findings.
- 3.3.4. Reviewed significant differences of opinion between the IAF and Management and noted that there was no material issues of difference raised, and all matters were addressed and resolved.

- 3.3.5 Assessed the adequacy of the performance of the IAF and found it to be effective in providing assurance.
- 3.3.6 Reviewed and monitored the quality assurance and improvement plan submitted by IAF as required by the Global Internal Audit Standards.
- 3.3.7 Assessed the adequacy and sufficiency of available internal audit resources and found these to be limited, as more resources would be required to evaluate the control weaknesses and high-risk areas identified in both the corporate strategic risk, external audit and the audit universe. The IAF operated without the permanent CAE for the six (6) months period during the financial year. However, this did not have material impact on the operations of IAF, as the Internal Audit Plan was successfully completed except for one project that was deferred to the following financial year.
- 3.3.8 Through the Chairperson, the Committee met separately over the course of the year with the CAE and the MM.
- 3.3.9 Based on the above, the Committee's opinion at the date of this report is that there were some breakdowns in internal control, including internal financial controls, for the year under review in the following areas (it is noted that management are in the process of addressing these concerns):
 - 3.3.9.1. Pre-determined objectives.
 - 3.3.9.2. Pre-review of Municipal Manager and Directors performance evaluations (2023/ 2024: annual assessments).
 - 3.3.9.3. Traffic Services and Administration.
 - 3.3.9.4. Municipal Staff Regulations.
 - 3.3.9.5. Follow-up on implementation of the AGSA audit action plan.
 - 3.3.9.6. Risk Management.
 - 3.3.9.7. Follow-up on Internal Audit Reports:
 - a) Disaster and Climate Change Readiness Assessment.
 - b) Housing Administration.

3.4. In respect of Legal and Compliance with Laws and Regulations

- 3.4.1. Reviewed with management matters that could have a material impact on Council.
- 3.4.2. Monitored compliance with the MFMA and other key legislation applicable to the Municipality, requirements of National and Provincial Treasury, Council's policies, and all other applicable legislation and codes of good governance.
- 3.4.3. Reviewed reports from the IAF and AGSA detailing the extent of compliance.

3.5. In respect of Risk Management, Combined Assurance and Information Technology

- 3.5.1. During the period under review, Management presented Strategic and Operational Risk profiles for the Municipality to the Committee which:
 - a) Considered and reviewed reports from Management on risk management, including fraud risks and information technology risks as they pertain to financial reporting and the going concern assessment.
 - b) In respect of the coordination of assurance activities, the Committee reviewed the plans and work outcomes of the external and internal auditors and concluded that these were adequate to address all significant financial, operational and compliance risks facing the Municipality.

- c) Noted the progress made in terms of Combined Assurance and the co-ordination between assurance providers to mitigate the top ten (10) strategic risks facing the Municipality as well as the emerging risks.
- d) Considered the Quarterly Information and Communication Technology (ICT) reports.

3.6. In respect of Pre-Determined Objectives (PDO's)

3.6.1. The Committee considered the:

- a) The quality of submitted performance information in the Management report is indicated as satisfactory. There was no material findings reported on performance information by the IAF and AGSA, respectively.
- b) IAF has also provided the APAC with reports on performance on a quarterly basis and no critical findings have been raised.

3.7. In respect of the Finance Function

- 3.7.1. The Committee considered the existing expertise, resources and experience of the organisation-wide finance functional capacity and has noted that the improvement year on year on the quality of the AFS submitted to the Committee and the AGSA.
- 3.7.2. The CFO should continue to ensure appropriate measures are in place for the accurate and timely submission of information to the Office of the AGSA.

3.8. Independence of the External Auditors

The Committee is satisfied that the AGSA were independent of the Council. This conclusion was arrived at, inter alia, after considering the following factors:

- a) The presentations made by the AGSA to the APAC.
- b) The Auditors' independence was not impaired by any consultancy, advisory or other work undertaken by the auditors.

3.9. General

- 3.9.1. The APAC has monitored quarterly the Municipality's implementation plan for audit issues raised in the prior year and are satisfied that the matters have been adequately addressed and resolved except for one finding addressed in 2025/26 financial year. Of all the matters raised in the 2024/2025 audit outcome, there were no repeat findings.
- 3.9.2. The APAC concurs and accepts the conclusions of the AGSA on the AFS and Annual Performance Report (APR) and is of the opinion that the Audited AFS and APR be accepted and read together with the report of the AGSA.

Stellenbosch Municipality has increasingly been stable in the areas of second and third levels of assurance and governance over a three-year period. There has also been stability in the leadership over the past five financial years. The areas for concern, and where attention is required are highlighted above. The APAC has made recommendations in these areas which management have committed to.

4. Conclusion

On behalf of the APAC, I am extremely indebted to the members of the Committee for their dedication and high levels of professionalism and diligence in their duties, as well as their

flexibility in accommodating last-minute calls to duty. To the members that served their term and to one member that resigned, I am grateful for the time and dedication you have offered to the strengthening of Stellenbosch Municipality Governance. We are fortunate to have the diversity of skills and expertise available to the Municipality. It would be amiss not to convey on behalf of the Committee our appreciation to the Executive Mayor, the entire Council and its Committees for the leadership, support and oversight they have provided during the year.

Finally, the APAC would like to express its appreciation to Management of the Municipality led by the MM, the IAF, Risk Management and the AGSA for the support and co-operation extended during the financial year and for providing the relevant information to enable the APAC to compile this report. This past year was again challenging; however, Stellenbosch Municipality should be proud of its elected and appointed leaders for taking control and driving an agenda of sustainability and service delivery and improving its audit results in the process, during a time of great fluidity.

On behalf of the APAC.

A handwritten signature in black ink, appearing to read 'Linda C. Nene', written over a horizontal line.

Mr. Linda C. Nene FIIA (SA), CPrac (SA), CCSA, CRMA

Chairperson of the APAC

December 2025

ANNEXURE D: REPORT OF THE AUDITOR GENERAL OF SOUTH AFRICA 2024/25

Report of the auditor-general to the Western Cape Provincial Parliament and the council on the Stellenbosch Municipality

Report on the audit of the financial statements

Opinion

1. I have audited the financial statements of Stellenbosch Municipality set out on pages 7 to 144, which comprise the statement of financial position as at 30 June 2025, statement of financial performance, statement of changes in net assets, the cash flow statement and comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.
2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2025 and its financial performance and cash flows for the year then ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 24 of 2024 (Dora).

Basis for opinion

3. I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the responsibilities of the auditor-general for the audit of the financial statements section of my report.
4. I am independent of the municipality in accordance with the International Ethics Standards Board for Accountants' International Code of ethics for Professional Accountants (including International Independence Standards) (IESBA code) as well as other ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA code.
5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Emphasis of matters

6. I draw attention to the matters below. My opinion is not modified in respect of these matters.

Restatement of corresponding figures

7. As disclosed in note 61 to the financial statements, the corresponding figures for 30 June 2024 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2025.

Material impairments

8. As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions for consumer receivables of R263,2 million (2023-24: R268,7 million) and other receivables from exchange transactions for property rental debtors of R32,4 million (2023-24: R32,4 million).
9. As disclosed in note 6 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions of R246,7 million (2023-24: R217,9 million).

Other matter

10. I draw attention to the matter below. My opinion is not modified in respect of this matter.

Unaudited disclosure notes

11. In terms of section 125(2)(e) of the MFMA, the particulars of non-compliance with the MFMA should be disclosed in the financial statements. This disclosure requirement did not form part of the audit of the financial statements and, accordingly, I do not express an opinion on it.

Responsibilities of the accounting officer for the financial statements

12. The accounting officer is responsible for the preparation and fair presentation of the financial statements in accordance with the standards of GRAP and the requirements of the MFMA and the Dora and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.
13. In preparing the financial statements the accounting officer is responsible for assessing the municipality's ability to continue as a going concern; disclosing, as applicable, matters relating to going concern; and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the municipality or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the auditor-general for the audit of the financial statements

14. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error; and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
15. A further description of my responsibilities for the audit of the financial statements is included in the annexure to this auditor's report. This description, which is located at page 6, forms part of my auditor's report.

Report on the audit of the annual performance report

16. In accordance with the Public Audit Act 25 of 2004 (PAA) and the general notice issued in terms thereof, I must audit and report on the usefulness and reliability of the reported performance against predetermined objectives for the selected strategic focus area presented in the annual performance report. The accounting officer is responsible for the preparation of the annual performance report.
17. I selected the following strategic focus area presented in the annual performance report for the year ended 30 June 2025 for auditing. I selected a strategic focus area that measures the municipality's performance on its primary mandated functions and that is of significant national, community or public interest.

Strategic focus area	Page numbers	Purpose
SFA4 - dignified living	16 to 19	To provide basic services to all citizens in the greater Stellenbosch area to ensure that everyone has access to a dignified life and sustainable human settlements and to develop and implement social infrastructure.

18. I evaluated the reported performance information for the selected strategic focus area against the criteria developed from the performance management and reporting framework, as defined in the general notice. When an annual performance report is prepared using these criteria, it provides useful and reliable information and insights to users on the municipality's planning and delivery on its mandate and objectives.
19. I performed procedures to test whether:
- the indicators used for planning and reporting on performance can be linked directly to the municipality's mandate and the achievement of its planned objectives
 - all the indicators relevant for measuring the municipality's performance against its primary mandated and prioritised functions and planned objectives are included
 - the indicators are well defined to ensure that they are easy to understand and can be applied consistently, as well as verifiable so that I can confirm the methods and processes to be used for measuring achievements
 - the targets can be linked directly to the achievement of the indicators and are specific, time bound and measurable to ensure that it is easy to understand what should be delivered and by when, the required level of performance as well as how performance will be evaluated
 - the indicators and targets reported on in the annual performance report are the same as those committed to in the approved initial or revised planning documents
 - the reported performance information is presented in the annual performance report in the prescribed manner and is comparable and understandable
 - there is adequate supporting evidence for the achievements reported and for the measures taken to improve performance.
20. I performed the procedures for the purpose of reporting material findings only; and not to express an assurance opinion or conclusion.
21. I did not identify any material findings on the reported performance information for the selected strategic focus area.

Other matter

22. I draw attention to the matter below.

Achievement of planned targets

23. The annual performance report includes information on reported achievements against planned targets and provides measures taken to improve performance.
24. The table that follows provides information on the achievement of planned targets and lists the key service delivery indicators that were not achieved as reported in the annual performance report. The measures taken to improve performance are included in the annual performance report on pages 16 to 19.

Strategic focus area 4: Dignified living

Targets achieved: 83%		
Budget spent: 100%		
Key service delivery indicator not achieved	Planned target	Reported achievement
Limit unaccounted water to less than 25%	<25%	31,20%
Water quality measured quarterly in terms of the SANS 241 physical and micro parameters	95%	93,57%

Report on compliance with legislation

25. In accordance with the PAA and the general notice issued in terms thereof, I must audit and report on compliance with applicable legislation relating to financial matters, financial management and other related matters. The accounting officer is responsible for the municipality's compliance with legislation.
26. I performed procedures to test compliance with selected requirements in key legislation in accordance with the findings engagement methodology of the Auditor-General of South Africa (AGSA). This engagement is not an assurance engagement. Accordingly, I do not express an assurance opinion or conclusion.
27. Through an established AGSA process, I selected requirements in key legislation for compliance testing that are relevant to the financial and performance management of the municipality, clear to allow consistent measurement and evaluation, while also sufficiently detailed and readily available to report in an understandable manner. The selected legislative requirements are included in the annexure to this auditor's report.
28. I did not identify any material non-compliance with the selected legislative requirements.

Other information in the annual report

29. The accounting officer is responsible for the other information included in the annual report. The other information does not include the financial statements, the auditor's report and the selected strategic focus area presented in the annual performance report that have been specifically reported on in this auditor's report.
30. My opinion on the financial statements and my reports on the audit of the annual performance report and compliance with legislation do not cover the other information included in the annual report and I do not express an audit opinion or any form of assurance conclusion on it.
31. My responsibility is to read this other information and, in doing so, consider whether it is materially inconsistent with the financial statements and the selected strategic focus area presented in the annual performance report or my knowledge obtained in the audit, or otherwise appears to be materially misstated.
32. If, based on the work I have performed, I conclude that there is a material misstatement in this other information, I am required to report on that fact.
33. I have nothing to report in this regard.

Internal control deficiencies

34. I considered internal control relevant to my audit of the financial statements, annual performance report and compliance with applicable legislation; however, my objective was not to express any form of assurance on it.
35. I did not identify any significant deficiencies in internal control.

Auditor – General

Cape Town

28 November 2025

AUDITOR - GENERAL
SOUTH AFRICA

Auditing to build public confidence

Annexure to the auditor's report

The annexure includes the following:

- The auditor-general's responsibility for the audit
- The selected legislative requirements for compliance testing

Auditor-general's responsibility for the audit

Professional judgement and professional scepticism

As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements and the procedures performed on reported performance information for selected strategic focus area and on the municipality's compliance with selected requirements in key legislation.

Financial statements

In addition to my responsibility for the audit of the financial statements as described in this auditor's report, I also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the municipality's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- conclude on the appropriateness of the use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the ability of the municipality to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify my opinion on the financial statements. My conclusions are based on the information available to me at the date of this auditor's report. However, future events or conditions may cause the municipality to cease operating as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and determine whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Communication with those charged with governance

I communicate with the accounting officer regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the accounting officer with a statement that I have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on my independence and, where applicable, actions taken to eliminate threats or safeguards applied.

Compliance with legislation – selected legislative requirements

The selected legislative requirements are as follows:

Legislation	Sections or regulations
Municipal Finance Management Act 56 of 2003	Sections 1, 11(1), 13(2), 14(1), 14(2)(a), 14(2)(b), 15, 24(2)(c)(iv), 28(1), 29(1), 29(2)(b), 32(2), 32(2)(a), 32(2)(a)(i), 32(2)(a)(ii) Sections 32(2)(b), 32(6)(a), 32(7), 33(1)(c)(ii), 53(1)(c)(iii), 53(1)(c)(iii)(bb), 54(1)(c), 62(1)(d), 63(2)(a), 63(2)(c), 64(2)(b), 64(2)(c), 64(2)(e), 64(2)(f), 64(2)(g), 65(2)(a), 65(2)(b), 65(2)(e), 72(1)(a)(iii), 112(1)(j), 116(2)(b), 116(2)(c)(iii), 117, 122(1), 122(2), 126(1)(a), 126(1)(b), 127(2), 127(5)(a)(i), 127(5)(a)(ii), 129(1), 129(3), 133(1)(a), 133(1)(c)(i), 133(1)(c)(ii), 165(1), 165(2)(a), 165(2)(b)(iii), 165(2)(b)(iv), 165(2)(b)(v), 165(2)(b)(vii), 166(2)(b), 166(2)(a)(iv), 166(5), 170, 171(4)(a), 171(4)(b)

8.2	TABLING OF THE DRAFT 4th REVIEW OF THE 5th GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027
-----	--

Collaborator No:

IDP KPA Ref No: Good Governance and Compliance

Meeting Date: 25 March 2026 and 31 March 2026

1. SUBJECT: TABLING OF THE DRAFT 4th REVIEW OF THE 5th GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027

2. PURPOSE

To table to the Council for consideration and approval the draft 4th review of the 5th Generation IDP 2022–2027, attached as **ANNEXURE A**, to be released for public input / comments.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality embarked on a public participation process in September 2025 to commence with the 4th review of the 5th Generation IDP 2022 – 2025. A consolidated report of community needs and input solicited from the public participation process was submitted to the Council on 26 November 2025 for consideration. This consolidated report served as baseline information in the IDP review process, in consultation with the internal departments.

The IDP review process was undertaken in accordance with Section 34(a)(i)(ii) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), which requires each municipal council to annually review its Integrated Development Plan aligned with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand. Hence, considering the changing circumstances within the municipal environment, including the community's needs and priorities.

The draft 4th review of the 5th Generation IDP 2022 – 2027 informs the municipality's budget and specifies the municipality's intended plans to realise the vision, mission, strategic objectives, and needs of the community.

The municipal IDP must be reviewed annually to:

- assess the implementation progress made towards achieving the goals, objectives and implementation of development projects outlined in the IDP;
- for the municipality to identify any gaps or areas for improvement, allowing for revisions to be made to enhance service delivery and ensure effective and sustainable development; and
- communities are provided with an opportunity to review their community needs and to recommend changes to the ward priorities outlined in the municipality's IDP.

The public participation process for input / comments on the draft 4th review of the 5th Generation IDP 2022 – 2025 will commence from 07 – 28 April 2026. This process provides the community and stakeholders with the opportunity to submit input / comments on the draft 4th review of the 5th Generation IDP 2022 – 2025 for a period of

not less than 21 days in terms of Chapter 4, Section 15(3) of the Local Government: Municipal Planning and Performance Management Regulations, 2001.

The public participation process does make provision for IDP and Budget open days from 08 – 15 April 2026, and one stakeholder engagement on 21 April 2026. The open days are clustered on an area-based approach, with transport made available to the community to the specified venues on the IDP and Budget open days schedule.

The open day schedule will be published in the local print media, on the municipal website and on the municipality's social media platforms. The municipality will make pamphlets and laudhailing services available to the ward councillors as per the requests already submitted.

The public participation platforms listed below will be made available to enable the community and stakeholders to submit their input and comments on the draft 4th review of the 5th Generation IDP 2022 – 2027:

- ✚ A link to an electronic submission form will be active from 07 – 28 April 2026 on the municipal website: www.stellenbosch.gov.za.
- ✚ The link to the electronic form will be broadcast via the municipal WhatsApp Channel, IDP WhatsApp line, and published on Facebook and X;
- ✚ 'IDP Submission Form' boxes and hard copy forms will be placed at ward offices and libraries; and
- ✚ Electronic written submissions may also be made via: email: idp@stellenbosch.gov.za; and WhatsApp: 067 427 1556.

5. RECOMMENDATIONS

- (a) that the draft 4th review of the 5th Generation IDP 2022 – 2027 of Stellenbosch Municipality be approved in terms of Section 34 (a)(i)(ii) of the MSA for the purpose of obtaining public input and comments, attached as **ANNEXURE A**;
- (b) that an advertisement be placed on the official website of the municipality and the local newspaper notifying the public that the draft 4th review of the 5th Generation IDP 2022 – 2027 is open for public input and comments for a period of not less than 21 days in terms of Chapter 4, Section 15(3) of the Local Government: Municipal Planning and Performance Management Regulations, 2001;
- (c) that the draft 4th review of the 5th Generation IDP 2022 – 2027 be submitted to the MEC for Local Government, Environmental Affairs and Development Planning, Western Cape: Department of Local Government, Western Cape: Provincial Treasury, the Cape Winelands District Municipality, and the Office of the Provincial Speaker for their comments.

6. DISCUSSION

6.1 Background

In terms of the provisions of the MSA, each council must review its Integrated Development Plan in accordance with an assessment of its performance measurements in terms of Section 41 of the MSA and to the extent the changing circumstances so demand.

The key dates and activities for the IDP review process are incorporated into the integrated SDF / IDP / Budget Time Schedule, which was adopted by the Council on 25 August 2025, to guide the planning, drafting and review of the 4th review of the 5th Generation IDP 2022 – 2027.

The key activities stipulated in the table below were followed in accordance with the adopted SDF / IDP / Budget Time Schedule:

Date	Action(s)
August 2025	<ul style="list-style-type: none"> The SDF/IDP/Budget Time Schedule / Process Plan for 2026/27 were approved by the Council on 25 August 2025 and duly submitted to the relevant role-players as per the MSA.
September 2025 – October 2025	<ul style="list-style-type: none"> IDP public participation for the drafting of the 4th review of the 5th Generation IDP 2022 – 2027 commenced on 08 September 2025. The IDP public participation period was open for the public and stakeholders to submit community needs to be considered by the departments during the project planning phase of the IDP cycle, as well as for the reprioritisation of ward priorities by the ward councillors and ward committees. The physical area-based IDP public participation open days were held from 08 - 15 September 2025. An IDP stakeholder engagement was held on 18 September 2025, attended by various stakeholders and role-players. On the municipal website, an electronic submission form was created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, X, and WhatsApp. Hard copies of the “IDP Submission Form” were also made available at all libraries and ward offices.
November 2025 – December 2025	<ul style="list-style-type: none"> The consolidated community input and comments of September 2025 were tabled to Council on 26 November 2025 for consideration in preparation for the draft IDP and draft Budget. The community input and comments captured during the IDP public participation process in September 2025 were sent to the ward councillors on 21 October 2025, before the ward prioritisation sessions to discuss with their ward committees in preparation for the reprioritisation of the 2022 – 2027 ward priorities. On 13 – 14 November 2025, all-ward councillor sessions were held for the reprioritisation of the 2022 – 2027 ward priorities for the draft 4th review of the 5th Generation IDP 2022 – 2027. Refinement of the revised ward priorities into specific, measurable, achievable, relevant and time-bound ward priorities. Internal IDP review sessions with the different departments were facilitated by the Department: IDP, PMS and Public Participation from 01 to 03 December 2025, considering the revised ward priorities as discussed with the ward councillors in November 2025, all the community input, existing projects / programmes, and sector plans. These discussions with departments entailed the details of possible key deliverables to determine what resources are needed in terms of budget, timing, identification of different role players and responsible project owners.
January 2026 – February 2026	<ul style="list-style-type: none"> The key activity during this period involved review sessions with the different directorates to review the 2022 – 2027 IDP deliverables and implementation progress. The review sessions were held from 19 – 30 January 2026.

6.2 Financial Implications

There are no financial implications beyond that which was approved in the 2025/26 MTREF Budget.

6.3 Legal Implications

The recommendations in this report comply with all applicable legislation.

Section 25(1):

The municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive, and strategic plan for the development of the municipality which—

- (a) links, integrates and co-ordinates plans and takes into account proposals for the development of the municipality;
- (b) aligns the resources and capacity of the municipality with the implementation of the plan;
- (c) forms the policy framework and general basis on which annual budgets must be based;
- (d) complies with the provisions of this Chapter; and
- (e) is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

Section 26:

An integrated development plan must reflect—

- (a) the municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- (b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- (c) the council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
- (d) the council's development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- (e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;
- (f) the council's operational strategies;
- (g) applicable disaster management plans;
- (h) a financial plan, which must include a budget projection for at least the next three years; and
- (i) the key performance indicators and performance targets determined in terms of section 41.

Section 34:**“Annual review and amendment of the integrated development plan**

A municipal council-

- (a) must review its integrated development plan-
 - (i) annually in accordance with an assessment of its performance measurements in terms of Section 41; and

(ii) to the extent that changing circumstances so demand; and

(a) may amend its integrated development plan in accordance with a prescribed process.”

Section 35(1):

An integrated development plan adopted by the council of a municipality—

- (a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
- (b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality’s integrated development plan and national or provincial legislation, in which case such legislation prevails; and
- (c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

Section 36:

A municipality must give effect to its integrated development plan and conduct its affairs in a manner that is consistent with its integrated development plan.

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

This report has no direct risk implications for the municipality.

1.5 The IDP and Ward Plans.....	7
1.6 The IDP Planning Process (five-year cycle)	7
1.7 Review of the Integrated Development Plan.....	8
1.8 Roles and Responsibilities	8
1.9 Municipal Council	9
1.10 Executive Mayor and Mayoral Committee (MayCo).....	10
1.11 The Administration	12
1.12 First-Year Process Followed.....	13
1.13 Second-Year Process Followed	13
1.14 First Amendment Process Followed.....	14
1.15 Third-Year Process Followed	15
1.16 Fourth-Year Process Followed	15
1.17 Fifth – Year Process Followed	16
1.18 Corporate Governance	17
1.19 Risk Management	17
1.20 Anti-Corruption and Anti-Fraud	19
1.21 Audit and Performance Audit Committee (APAC)	19
1.22 Ward Committees	20
1.23 Stakeholders.....	20
Chapter 2: State of the Greater Stellenbosch Area	24
2.1 Introduction.....	24
2.2 Ward Demarcation	25
2.3 Stellenbosch Municipality at a Glance	29
2.4 Socio – Economic Context.....	30
2.4.1 Population Growth	30
2.4.2 Racial Split	31
2.4.3 Gender Ratio.....	31

2.4.4	Age Cohorts	32
2.5	Education	33
2.5.1	Learner enrolment, the learner-teacher ratio and learner retention rate	33
2.5.2	Number of schools and no-fee schools.....	35
2.5.3	Education outcomes (matric pass rate)	35
2.6	Health.....	36
2.6.1	Health Facilities	36
2.6.2	Emergency Medical Services	36
2.6.3	Tuberculosis and HIV/ AIDS	36
2.6.4	Child Health.....	37
2.7	Poverty.....	38
2.7.1	GDPR Per Capita	38
2.7.2	Income Inequality	39
2.7.3	Poverty Line	39
2.8	Basic Service Delivery	40
2.8.1	Housing and Household Services	40
2.8.2	Free Basic Services.....	41
2.9	Safety and Security	42
2.10	Economy and Labour Market Performance	42
2.10.1	Sectoral Overview	42
2.10.2	Formal and Informal Employment.....	44
2.10.3	Job Gains and Losses	45

Chapter 3: Strategic Policy Context46

3.1	Municipal Vision and Strategy	46
3.2	Strategic Focus Areas (SFAs)	47
3.2.1	Strategic Focus Area 1: Valley of Possibility	47
3.2.2	Strategic Focus Area 2: Green and Sustainable Valley.....	47
3.2.3	Strategic Focus Area 3: Safe Valley.....	48
3.2.4	Strategic Focus Area 4: Dignified Living	48
3.2.5	Strategic Focus Area 5: Good Governance and Compliance.....	48
3.3	Strategic Objectives and Predetermined Objectives	50
3.4	Core Principles in Executing Strategy	51
3.4.1	Alignment with institutional structures and processes.....	51
3.4.2	The tools of governance	52
3.5	Global Policy Direction	52
3.5.1	Sustainable Development Goals (SDGs)	53
3.6	National Policy Direction	53
3.6.1	National Development Plan (NDP) – 2030	53
3.6.2	Medium-Term Development Plan (MTDP) 2024 – 2029	55
3.6.3	National District Development Model and One Plan	56
3.6.4	Integrated Urban Development Framework (IUDF)	57
3.7	Provincial Policy Direction	58
3.7.1	The Western Cape Government Provincial Strategic Plan 2025 - 2030	58

3.8	The Cape Winelands District Municipality (CWDM) Strategic Focus	58
3.9	Local Policy Direction	59
3.9.1	Stellenbosch Municipality	59
3.10	Municipal Manager: Five-Year Plan	61
3.11	Climate Change Adaptation	69

Chapter 4: Spatial Development Framework77

4.1	The Purpose of the Spatial Development Framework	77
4.2	The relationship between the IDP and SDF	77
4.3	The Legislative Framework of Municipal SDFs	78
4.4	Stellenbosch Municipality's work on its SDF, Annual Reviews as part of the IDP review process.....	80
4.5	The Spatial Proposals of the SDF	85
4.5.1	Spatial development 20 - year vision statement.....	85
4.5.2	The Strategic Focus and Spatial Alignment between the IDP and SDF	86
4.5.3	The Spatial Principles / Imperatives of the SDF	86
4.6	SDF and CEF Implementation Frameworks	89
4.6.1	Settlement hierarchy, priority development areas and themes.....	90
4.6.2	Policy Framework.....	92
4.7	Catalytic Initiatives	98
4.7.1	Development of Klappmuts.....	100
4.7.2	Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor	103
4.8	Institutional Arrangements.....	104
4.8.1	Inter-municipal planning	104
4.8.2	Private Sector Joint Planning	104
4.8.3	Further Planning Work.....	105
4.8.4	Other Local Planning Initiatives	105
4.8.5	Checklists in Support of Decision-Making.....	106
4.8.6	Partnerships	106

Chapter 5: Performance Summary of the 5th Generation IDP 2022 - 2027108

5.1	Introduction.....	108
5.2	IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027	108
5.3	IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027	109
5.4	IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027	113
5.5	IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027	118

Chapter 6: One Plan: Service Delivery, budget, programmes, and projects123

6.1	Introduction.....	123
6.2	Relationship between the One Plan and Integrated Development Plan (IDP)	123
6.3	National and Provincial Government Priorities	124
6.3.1	State of the Nation Address (SONA) 2026.....	124
6.3.2	State of the Province Address (SOPA) 2026	126
6.4	Investments	127

6.4.1	Public Sector Investment.....	127
6.5	Environmental Risk and Vulnerability for the Cape Winelands District (CWD)	128
6.6	Intergovernmental Budgetary Allocation	130
6.7	Cape Winelands District (CWD) JDMA Implementation Plan.....	134
6.7.1	The Municipal Energy Resilience Project and Small-Scale Embedded Generations	135
6.7.2	Cape Winelands District Joint District Approach	136
6.8	Agricultural Interventions	138
6.9	Stellenbosch Municipality Operational Support Plan	139
6.10	Gender Mainstreaming	139
6.10.1	Gender Interventions.....	140
6.10.2	Gender Disaggregated Matrix.....	142

Chapter 7: Sector Plans and Implementation145

7.1	Introduction.....	145
7.2	The relationship between the Sector Plans and Strategies.....	146
7.3	Sector Plans and Implementation Strategies.....	148
7.3.1	Air Quality Management Plan.....	148
7.3.2	Environmental Management Plan.....	149
7.3.3	Integrated Human Settlement	153
7.3.4	Comprehensive Integrated Transport Plan.....	168
7.3.5	Integrated Waste Management Plan (IWMP)	174
7.3.6	Electrical Master Plan	182
7.3.7	Water Services Development Plan	182
7.3.8	Water Demand Management (WDM)	190
7.3.9	Long-Term Water Conservation and Water Demand Management Strategy	194
7.3.10	Safety and Security Strategy	198
7.3.11	Disaster Management Plan	203
7.3.12	Local Economic Development Strategy	210
7.3.13	Community Development Strategy.....	216
7.3.14	Human Resource Strategy	220
7.3.15	ICT Strategy	221

Chapter 8: Council Term Projects 2022 – 2027225

8.1	Smart City	225
8.1.1	Guiding Principles to Create Inclusive Smart Cities.....	225
8.1.2	A smart city as a holistic ecosystem	225
8.1.3	The Nature and Purpose of a Proposed Smart City Initiative	226
8.2	Political Leadership: Five-Year Plans.....	227
8.2.1	Executive Mayor	227
8.3	Mayoral Portfolios	254
8.3.1	Portfolio: Human Settlements	255
8.3.2	Portfolio: Rural Management	264
8.3.3	Portfolio: Sport, Youth and Culture.....	267
8.3.4	Portfolio: Planning, LED, and Tourism	268

8.3.5	Portfolio: Financial Services.....	280
8.3.6	Portfolio: Community Development and Protection Services	283
8.3.7	Portfolio: Corporate Services	289
8.3.8	Portfolio: Infrastructure Services.....	291
8.3.9	Portfolio: Parks, Open Spaces and Environment	297

Chapter 9: Public Interest and Expression of Needs300

9.1	Community Participation	300
9.2	Public Participation in the drafting of the 3 rd review of the 5 th Generation IDP 2022 – 2027	301
9.3	Public Participation Statistics: September 2025	303
9.4	Summary of Needs and Priorities	304
9.5	Ward Priorities.....	312
9.5.1	Ward Priorities: Ward 1	312
9.5.2	Ward Priorities: Ward 2.....	332
9.5.3	Ward Priorities: Ward 3.....	337
9.5.4	Ward Priorities: Ward 4.....	344
9.5.5	Ward Priorities: Ward 5.....	358
9.5.6	Ward Priorities: Ward 6.....	376
9.5.7	Ward Priorities: Ward 7	390
9.5.8	Ward Priorities: Ward 8.....	410
9.5.9	Ward Priorities: Ward 9.....	414
9.5.10	Ward Priorities: Ward 10.....	419
9.5.11	Ward Priorities: Ward 11.....	424
9.5.12	Ward Priorities: Ward 12.....	434
9.5.13	Ward Priorities: Ward 13.....	442
9.5.14	Ward Priorities: Ward 14.....	446
9.5.15	Ward Priorities: Ward 15.....	448
9.5.16	Ward Priorities: Ward 16.....	452
9.5.17	Ward Priorities: Ward 17.....	459
9.5.18	Ward Priorities: Ward 18.....	463
9.5.19	Ward Priorities: Ward 19.....	469
9.5.20	Ward Priorities: Ward 20.....	476
9.5.21	Ward Priorities: Ward 21	484
9.5.22	Ward Priorities: Ward 22.....	488
9.5.23	Ward Priorities: Ward 23.....	494

Chapter 10: Financial Plan498

10.1	Introduction.....	498
10.2	Capital and Operating Budget Estimates.....	498
10.2.1	Budget Assumptions	498
10.2.2	Operating Budget Estimates.....	498
10.3	Financial Management Arrangements	500
10.4	Financial Strategies and Programmes	501
10.5	Medium – Term Capital Expenditure per Strategic Focus Area	502
10.6	Medium – Term Operational Expenditure	503

10.7	Medium–Term Operational Revenue per Strategic Focus Area	503
10.8	Capital Budget 2026/27 – 2028/29 per Directorate	504
10.8.1	Capital Budget 2026/27 – 2028/29: Office of the Municipal Manager	504
10.8.2	Capital Budget 2026/27 – 2028/29- Directorate: Planning and Economic Development	504
10.8.3	Capital Budget 2026/27 – 2028/29- Directorate: Community and Protection Services	505
10.8.4	Capital Budget 2026/27 – 2028/29- Directorate: Corporate Services	508
10.8.5	Capital Budget 2026/27 – 2028/29- Directorate: Infrastructure Services.....	509
10.8.6	Capital Budget 2026/27 – 2028/29- Directorate: Financial Services.....	516
10.9	National and Provincial Investment	517

Chapter 11: Organisational Scorecard (5 – years)519

11.1	Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP)	519
11.2	SFA 1 – Valley of Possibility	520
11.3	SFA 2 – Green and Sustainable Valley	523
11.4	SFA 3 – Safe Valley	527
11.5	SFA 4 – Dignified Living.....	528
11.6	SFA 5 – Good Governance and Compliance	532

Chapter 12: Implementation, Monitoring and Review (1-year)538

12.1	SFA 1 – Valley of Possibility	539
12.2	SFA 2 – Green and Sustainable Valley	540
12.3	SFA 3 – Safe Valley	541
12.4	SFA 4 – Dignified Living.....	542
12.5	SFA 5 – Good Governance and Compliance	545

Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan –

- ✦ is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- ✦ is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- ✦ guides and informs all planning and development, and all decisions concerning planning, management, and development;
- ✦ forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets, and performance management system; and
- ✦ seeks to promote integration by balancing the economic, ecological, and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission, and Values

FOREWORD BY THE EXECUTIVE MAYOR

Cllr Jeremy Fasser
Executive Mayor

It is a privilege to present the Draft 4th Review of the 5th Generation Integrated Development Plan (IDP) for the 2022–2027 term. Stellenbosch Municipality remains a place of remarkable potential - defined not only by its natural beauty and economic strength, but by the active, diverse and engaged communities who call it home. This review reflects our shared commitment to shaping a municipality that is inclusive, responsive and resilient in the face of a changing environment.

The IDP continues to serve as our principal strategic framework, guiding decision-making, prioritisation and the allocation of resources. Through this annual review process, we take stock of our progress, respond to emerging challenges and refine our focus to ensure that our plans remain relevant and impactful. Central to this process is

meaningful community participation. The voices of residents, businesses, civil society organisations, traditional leaders and other stakeholders play a critical role in strengthening our planning and ensuring that our development agenda is grounded in lived realities.

Over the past year, Stellenbosch Municipality has continued to demonstrate stability and purpose despite ongoing economic pressures, infrastructure demands and broader socio-economic challenges. We remain steadfast in our commitment to sound governance, financial sustainability and service excellence. Transparency, accountability and ethical leadership underpin our efforts as we work to deliver value to our communities and safeguard the long-term well-being of the municipality.

Key focus areas such as housing delivery, infrastructure investment, economic development, climate resilience and energy security remain central to this IDP review. Through strategic partnerships and innovative approaches—including energy co-generation initiatives, targeted infrastructure upgrades and support for local enterprise—we are working to create an enabling environment where opportunity can grow, and prosperity can be shared more broadly.

This IDP review is more than a statutory requirement; it is a collective endeavour that reflects our ambitions as a municipality and our responsibility to future generations. I would like to extend my sincere appreciation to the Deputy Mayor, the Mayoral Committee, all Councillors, the Municipal Manager, municipal officials and our many internal and external partners for their contributions and commitment throughout this process.

I encourage every resident and stakeholder to engage with this draft IDP review and to participate actively in shaping the path ahead. Whether you are a long-established resident, a small business owner, a farmer, a student or an emerging entrepreneur, your insights matter. Together, through constructive engagement and shared purpose, we can continue to build a Stellenbosch that works for all.

CLLR JEREMY FASSER
EXECUTIVE MAYOR

OVERVIEW BY THE MUNICIPAL MANAGER

Geraldine Mettler
Municipal Manager

Over the past year, Stellenbosch Municipality has continued to demonstrate resilience, sound governance and strategic leadership, creating a stable and enabling environment in which communities, businesses and investors can thrive. Strong and consistent leadership structures, prudent financial management and a healthy financial position have underpinned service delivery continuity, investor confidence and sustained economic activity across the municipal area. These foundations have contributed to increased investment inflows, business growth and employment opportunities, reinforcing Stellenbosch's position as a leading municipal economy in the Western Cape.

Building on these successes, the draft 4th review of the 5th Generation Integrated Development Plan (IDP) reflects the municipality's continued commitment to responsive,

participatory and outcomes-driven planning. In line with legislative requirements, this review assesses progress made to date, evaluates current priorities and incorporates new information, community inputs and stakeholder feedback to ensure alignment with evolving needs and circumstances.

The review process has been informed by extensive engagement with communities, sector departments, organised business, civil society and other key stakeholders. Inputs received through public participation processes, intergovernmental engagements and internal municipal assessments have been carefully considered and integrated where appropriate. These engagements enhance the credibility of the IDP and reaffirm its role as a shared development blueprint for the municipal area.

The IDP remains aligned with national and provincial policy frameworks, including the National Development Plan, the Medium-Term Strategic Framework and the Western Cape Government's strategic priorities. At a municipal level, the review ensures ongoing alignment between the IDP, the Municipal Spatial Development Framework, the Service Delivery and Budget Implementation Plan (SDBIP) and the Medium-Term Revenue and Expenditure Framework.

The draft 4th review maintains a strong focus on sustainable service delivery, inclusive economic growth, social development, environmental sustainability and institutional capability. It responds to emerging risks and opportunities such as energy constraints, climate change impacts, urbanisation pressures and fiscal realities, while reinforcing long-term strategic objectives and development outcomes.

This draft is presented for public consideration and comment, reaffirming Stellenbosch Municipality's commitment to transparent governance, accountability and collaborative planning. The final IDP will reflect the collective contributions of residents, stakeholders and partners, and will guide implementation for the remainder of the 2022–2027 term.

Through this review, Stellenbosch Municipality reaffirms its resolve to work in partnership with its communities and stakeholders to advance development that is sustainable, inclusive and future-focused.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:

Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to develop a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area, as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking, and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented, and monitored in a controlled environment. These issues may be overarching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which the community and stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments, as well as the district municipality.

At the heart of the IDP lies improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development, and, crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

- (a) An IDP is adopted by the council of a municipality;
- (b) is the principal strategic planning instrument that guides and informs all planning and development and all decisions with regard to planning, management, and development in the municipality;
- (c) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
- (d) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-

- (a) The municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;
- (b) An assessment of the existing level of development in the municipality, which must include an identification of communities that do not have access to basic municipal services;
- (c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
- (d) The council's development strategies, which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- (e) A spatial development framework that must include the provision of basic guidelines for a land-use management system for the municipality;
- (f) The council's operational strategies;
- (g) Applicable disaster management plans;
- (h) A financial plan, which must include a budget projection for at least the next three years; and
- (i) The key performance indicators and performance targets are determined in terms of Section 41.

The IDP is informed by a leadership agenda, as contained in national and provincial policy documents, as well as the needs of local residents and public, private, and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 4th review of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1-year).

1.3 Relationship between the IDP, Budget, Performance Management and Risk Management

The IDP process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs, and performance management fulfils the implementation, monitoring, and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.

The role of the budget is to attach funds to the objectives that are contained in the IDP, and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk management is one of management's core responsibilities according to Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate, and address risks continuously before such risks can negatively impact the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive, and strategic plan for the development of the municipality." It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be guided by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which the implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans include:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards to scrutinise.

Ward plans assist in ensuring that the IDP is more targeted and relevant to the needs of the communities and all groups, including the most vulnerable. These plans give ward committees a way to plan and carry out their roles and responsibilities in a systematic way. They are the basis for conversations between the municipality and ward committees about setting priorities and making budget requests. Ward committees will also use them to keep track of and evaluate progress throughout the year. The information is, however, on a detailed level and forms part of the IDP, but a detailed ward plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections has to prepare an IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP, which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP), and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects, and progress reports made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five-Year IDP Development and Review Cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

- a) must review its integrated development plan –
 - (i) annually following an assessment of its performance measurement in terms of section 41; and
 - (ii) to the extent that changing circumstances so demand;

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, informed of the varying needs of residents and up to date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September and October 2025, must now review its IDP.

This is the **fourth review** to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality's strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality's budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates, inter alia, that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the municipal manager must be defined.

Figure 3: Roles and Responsibilities

Executive Mayor and Municipal Council	Councillors and Ward Committee Members	Municipal Manager and Management Team
Executive Mayor must: <ul style="list-style-type: none"> Manage the drafting of the IDP; Assign responsibilities in this regard to the Municipal Manager; Submit the draft plan to the municipal council for adoption; and Coordinate the annual revision of the IDP and determine how the IDP is taken into account or revised for the purposes of the budget. The Municipal Council <ul style="list-style-type: none"> The Council is the ultimate decision-making authority. Decisions to approve or amend the municipality's IDP may not be delegated and have to be taken by the full Council. 	<ul style="list-style-type: none"> Assist with the public participation process. Assist the ward councillor (who is the chairperson) in identifying challenges and needs of residents. Provide a mechanism for discussion and negotiation between different stakeholders in the ward; Interact with other forums and organisations on matters affecting the ward; Draw up a ward plan that offers suggestions on how to improve service delivery in the particular ward; Disseminate information in the ward; and Monitor the implementation process concerning its areas 	<ul style="list-style-type: none"> Provide technical / sector expertise and information; Provide inputs related to the various planning steps; Summarise / digest / process inputs from the participation process; Discuss and comment on inputs from specialists; and Address inputs from and give feedback to the community.

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 1: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	28
African National Congress (ANC)	8
GOOD	3
Economic Freedom Fighters (EFF)	2
African Christian Democratic Party (ACDP)	1
People's Democratic Movement (PDM)	1
Patriotic Alliance (PA)	1
Vryheidsfront Plus (VF)	1
Total	45

Below is a table that categorises the councillors within their respective political parties and wards.

1.10 Executive Mayor and Mayoral Committee (MayCo)

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the Executive Mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition to delegated powers assigned by the Council. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 3: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Ald J Fasser	Executive Mayor
Cllr M Slabbert	Deputy Executive Mayor
Cllr R Pheiffer	MayCo member: Infrastructure Services
Cllr N Olayi	MayCo member: Sport, Youth and Culture
Cllr J Williams	MayCo member: Parks, Open Spaces and Environment
Cllr L Nkamisa	MayCo member: Corporate Services
Cllr JC Anthony	MayCo member: Financial Services
Cllr S Heneke	MayCo member: Community Development and Protection Services
Cllr R du Toit	MayCo member: Human Settlements
Cllr C Manuel	MayCo member: Rural Management
Cllr T Kumm	MayCo member: Planning, LED and Tourism

Figure 4: Executive Mayoral Committee

1.11 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily must serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 5: Municipal Management Team

1.12 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 4: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	<ul style="list-style-type: none"> Approval of the mSDF / IDP / Budget Process Plan / Time Schedule. Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	<ul style="list-style-type: none"> With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore an Amended mSDF / IDP / Budget Process Plan / Time Schedule was submitted to the Council on 23 November 2021 for consideration and approval. The IDP public participation period started on 29 November 2021 and ended on 12 January 2022. A link to access IDP pre-recorded videos was published on the municipal YouTube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 – February 2022	<ul style="list-style-type: none"> An Online Sector Engagement was held on 11 January 2022 to determine the sector needs and collectively devise plans to address the needs. MayCo and management had a strategic session from 13 – 14 January 2022 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). Departmental sessions were held with all departments to set their 5-year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	<ul style="list-style-type: none"> The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on 30 March 2022, for public comment for 21 days. A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on 30 March 2022 for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality were submitted to the Council on 30 March 2022 for consideration and approval to be released for public comments. The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on 04 – 28 April 2022. Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	<ul style="list-style-type: none"> Adoption of the final IDP and Budget, Tariffs and Budget-related policies. Submit the adopted IDP to the Cape Winelands District Municipality, Provincial Government and National Treasury. Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.13 Second-Year Process Followed

The table below reflects the preparation for the 1st review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

**Table 5: Preparation for the second year for the 1st review of the 5th Generation IDP 2022 – 2027**

Date	Action(s)
July / August 2022	<ul style="list-style-type: none"> Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	<ul style="list-style-type: none"> The IDP public participation period was open from 07 – 28 September 2022. The hybrid public participation meetings were held from 19 – 22 September 2022. The online stakeholder engagement was held on 27 September 2022. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. Hard copies of the “Have Your Say” submission form were also made available at all libraries and ward offices. An all-ward councillor session was held on 7 October 2022, for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 – February 2023	<ul style="list-style-type: none"> Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. An Indaba 2 Engagement was attended on 7 February 2023 to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. Management strategic session on 15 and 16 February 2023 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2023	<ul style="list-style-type: none"> MayCo and Council considered the draft 1st Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. The IDP and Budget public participation period has commenced on 03 April – 25 April 2023. A virtual stakeholder engagement was held on 20 April 2023 to provide feedback on major projects / programmes / initiatives. The closing date for the IDP and Budget submission was 25 April 2023. Consultation and refinement of SDF, IDP and Budget documents. Adoption of final IDP, Budget, Tariffs, and budget-related policies. Submission of the adopted IDP to the Provincial Government and other role-players.

1.14 First Amendment Process Followed

The table below stipulates the key activities in preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027:

Table 6: Preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2023 – September 2023	<ul style="list-style-type: none"> Submit the draft proposed amendments to the IDP to MayCo, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to recommend to the Council. Submit the proposed draft IDP amendments, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to the Council for approval to obtain public comment (21 days). The proposed draft IDP amendments were advertised for a period of 21 days to allow for public comment on the municipal website and local newspaper. The period for public comment on the proposed draft IDP amendments was 21 days. Submit the proposed draft IDP Amendments to the MEC, Provincial Treasury, National Treasury, and other affected organs of state within 10 working days after the Council approval. Submit the draft IDP Amendment to the District Municipality for input within 10 working days after the Council approval.
October 2023	<ul style="list-style-type: none"> Submit the final amended IDP to the Council for adoption together with the memorandum in terms of Regulation 3. The adopted IDP Amendment was published on the municipal website. An electronic and hard copy of the adopted IDP Amendment was submitted to the MEC for local government as well as Provincial Treasury, National Treasury, and District Municipality within 10 days of the adoption or amendment of the plan. A notice was published in the local newspaper to inform the public of the adoption of the amended IDP (within 14 days of the adoption of the plan) and to place hard copies in libraries and ward offices.

1.15 Third-Year Process Followed

The table below reflects the preparation for the 2nd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2024/25 financial year.

Table 7: Preparation of the third year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2023	<ul style="list-style-type: none"> Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	<ul style="list-style-type: none"> The IDP public participation period was open from 04 September to 04 October 2023. The area-based IDP public participation open days were held from 12 September – 02 October 2023. The IDP stakeholder engagement was held on 04 October 2023. An electronic submission form was created on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. Hard copies of the "Have Your Say" submission form were also made available at all libraries and ward offices. All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities, taking into account community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 – February 2024	<ul style="list-style-type: none"> Departmental sessions were held to review the IDP deliverables and targets for the 2nd Review of the 5th Generation IDP 2022 – 2027. MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	<ul style="list-style-type: none"> MayCo and Council to consider the draft 2nd Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. The IDP and Budget public participation period was conducted from 02 April – 23 April 2024. A Stakeholder Engagement was held on 16 April 2024. The Provincial SIME Engagement took place on 03 May 2024. Consultation and refinement of the IDP and Budget documents. Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in May 2024. Submission of the adopted IDP to the Provincial Government and other role-players.

1.16 Fourth-Year Process Followed

The table below reflects the preparation for the draft 3rd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2025/26 financial year.

Table 8: Preparation of the fourth year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2024	<ul style="list-style-type: none"> The Executive Mayor and Mayoral Committee recommend that the SDF/IDP/Budget Time Schedule / Process Plan (at least 10 months before the start of the budget year) be approved by the Council. The SDF / IDP / Budget Time Schedule were adopted by the Council on 23 August 2024.
September 2024 – December 2024	<ul style="list-style-type: none"> The IDP public participation period was open from 09 - 30 September 2024. The area-based IDP public participation open days were held from 10 – 16 September 2024. The IDP stakeholder engagement was held on 25 September 2024, attended by various stakeholders and role-players. On the municipal website, an electronic submission form has been created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, X, WhatsApp, and through the Stellenbosch Citizen App. Hard copies of the "Have Your Say" submission form were also made available at all libraries and ward offices. On 22 November and 02 December 2024, all-ward councillor sessions were held to reprioritise the ward priorities for 2022 - 2027, with the community input as baseline information.

Date	Action(s)
January 2025 - February 2025	<ul style="list-style-type: none"> Departmental sessions were held to review the IDP deliverables and targets for the 3rd review of the 5th Generation IDP 2022 – 2027. MayCo and Management had a strategic session on 17 January 2025 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March 2025 - May 2025	<ul style="list-style-type: none"> MayCo and Council approved the draft 3rd review of the 5th Generation IDP 2022 – 2027 on 31 March 2025 to obtain public input and comments. The IDP and Budget public participation period was open from 07 – 29 April 2025 for public input and comments. Area – based IDP and Budget public participation open days were held from 08 – 14 April 2025 which offered an opportunity for community members to engage in one-on-one discussions with departmental representatives and submit verbal input. An IDP and Budget stakeholder engagement was held on 23 April 2025, attended by councillors, senior management, stakeholders, and role-players in the Stellenbosch municipal area. Consultation and refinement of the IDP and Budget documents. Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in May 2025. Submit the adopted IDP to the Provincial Government and other role-players.

1.17 Fifth – Year Process Followed

The table below reflects the preparation for the draft 4th review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2026/27 financial year.

Table 9: Preparation of the fifth year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2025	<ul style="list-style-type: none"> The SDF/IDP/Budget Time Schedule / Process Plan for 2026/27 were approved by the Council on 25 August 2025, and duly submitted to the relevant role-players as per the MSA.
September 2025 - October 2025	<ul style="list-style-type: none"> IDP public participation for the drafting of the 4th review of the 5th Generation IDP 2022 – 2027 commenced on 08 September 2025. The IDP public participation period was open for the public and stakeholders to submit community needs to be considered by the departments during the project planning phase of the IDP cycle, as well as for the reprioritisation of ward priorities by the ward councillors and ward committees. The physical area-based IDP public participation open days were held from 08 - 15 September 2025. An IDP stakeholder engagement was held on 18 September 2025, attended by various stakeholders and role-players. On the municipal website, an electronic submission form was created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, X, and WhatsApp. Hard copies of the "IDP Submission Form" were also made available at all libraries and ward offices.
November 2025 - December 2025	<ul style="list-style-type: none"> The consolidated community input and comments of September 2025 were tabled to Council on 26 November 2025 for consideration in preparation for the draft IDP and draft Budget. The community input and comments captured during the IDP public participation process in September 2025 were sent to the ward councillors on 21 October 2025, before the ward prioritisation sessions to discuss with their ward committees in preparation for the reprioritisation of the 2022 – 2027 ward priorities. On 13 – 14 November 2025, all-ward councillor sessions were held for the reprioritisation of the 2022 – 2027 ward priorities for the draft 4th review of the 5th Generation IDP 2022 – 2027. Refinement of the revised ward priorities into specific, measurable, achievable, relevant and time-bound ward priorities. Internal IDP review sessions with the different departments were facilitated by the Department: IDP, PMS and Public Participation from 01 to 03 December 2025, considering the revised ward priorities as discussed with the ward councillors in November 2025, all the community input, existing projects / programmes, and sector plans. These discussions with departments entailed the details of possible key deliverables to determine what resources are needed in terms of budget, timing, identification of different role players and responsible project owners.

Date	Action(s)
January 2026 – February 2026	<p>↓ The key activity during this period involved review sessions with the different directorates to review the 2022 – 2027 IDP deliverables and implementation progress.</p> <p>↓ The review sessions were held from 19 – 30 January 2026.</p>

1.18 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.19 Risk Management

Section 62 of the MFMA states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient, and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery, taking into account changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of the Ukraine-Russia war on global commodities, particularly fuel.

The top **5 strategic** risks identified include:

- R** | **01** Climate change and infrastructure disasters
- I** | **02** Loss of life of activists, leaders and their immediate family members
- S** | **03** Increased risk of land invasions
- K** | **04** Economic downturn due to civil unrest and crime
- S** | **05** Cyber attacks

The municipal risks have been aligned with the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 10: Risk and IDP Alignment

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
1	Climate Change and Infrastructure Disasters	Changing weather patterns, unpredictable rainfall/flash floods, drought and natural disasters, fires, seasonal and other	Green and Sustainable Valley	10	10	All Directorates
2	Loss of life of activists, leaders and their immediate family members	Loss of life of activists, leaders and their immediate family members	Safe Valley Dignified Living	10	10	Directorate: Community and Protection Services
3	Increased risk of land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Safe Valley Dignified Living Good Governance and Compliance	9	10	All Directorates
4	Economic downturn due to civil unrest, crime, and continuous load-shedding	Increase in criminal activities, civil unrest, and reputational risk due to perceived increase in the said activities	Dignified Living Safe Valley	9	8	Directorate: Community and Protection Services
5	Cyber attacks	Cyber-attacks and cyber safety /security have become essential in municipalities. Investigate security gaps. Users opening unsafe/infected attachments	Good Governance and Compliance	8	8	Directorate: Infrastructure Services
Operational Risks						
1	Timeous Capital Spending	Steady increase in budget allocation, growing population and demand for services, demand management, unforeseen storms and weather events, suppliers and contractors going into financial distress	Good Governance and Compliance	10	8	Directorate: Financial Services
2	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	10	8	Directorate: Community and Protection Services
3	Lack of integrated Information and Communication Technology	Lack of integrated Information and Communication Technology	Dignified Living	7	7	Directorate: Corporate Services
4	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery needs to be provided by all departments	Good Governance and Compliance	8	4	Directorate: Corporate Services

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate

System errors, transactions, and events are not recognised as they occur and accordingly are not recorded in the financial period they occurred.	Good Governance and Compliance	6	4	Office of the Municipal Manager

1.20 Anti-Corruption and Anti-Fraud

1.21 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to the table below for members of the Audit Committee), appointed in terms of Section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

- (a) advise the municipal council, the political office-bearers, the accounting officer, and the management staff of the municipality on matters relating to: –

- internal financial control and internal audit;

- risk management;
- accounting policies;
- the adequacy, reliability, and accuracy of financial reporting information;
- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013), and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

Table 11: Members of the Audit Committee

Name of representative	Capacity
Linda C Nene (Mr)	Chairperson
Len Mortimer (Mr)	Member
Reyhana Gani (Ms)	Member
Mervyn Burton (Mr)	Member

1.22 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 6: Main duties of the Ward Committee

1.23 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective intergovernmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of all spheres of government in the setting of priorities, resource allocation, and development planning.

The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 12: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klappmuts area.

Name of Partner	Purpose of MOU / MOA
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement: <ul style="list-style-type: none"> platforms to share knowledge; disaster risk reduction initiatives; community safety programmes; and campaigns to promote safe, resilient, sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation, and education.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues, as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television is in the interest of the security of the town and the campus, with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay-at-the-night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and the University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss land transport-related matters that affect transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.

Name of Partner	Purpose of MOU / MOA
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learner's license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues, as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternative electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: <ul style="list-style-type: none"> 🚶 relief aid (clothing, food); 🚶 placement of students to assist during incidents/disasters; and 🚶 awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klappmuts area.
Western Cape Department of Public Works, Roads, and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The

Name of Partner	Purpose of MOU / MOA
	emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:

State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town, but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch, and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-added chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klappmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vloottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements. Franschhoek, known as the "French Corner", is celebrated for its exceptional culinary scene, offering a delectable fusion of French and South African flavours. It is a favourite among local and international tourists. Due to recent developments, Klappmuts is considered a regional growth node thanks to its regional connectivity.

Stellenbosch is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), and Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following 23 wards:

Table 13: Municipal ward demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	On the corner of Moffat Street to the end of Lelie Street, the Corner of Moffat Street to Rustenburg Road, Desch Street to Rustenburg Road, Moffat Street, Hahn Street, Weber Street, Tindell Street, Juffernbruch Street, Kahler Street, Luckhoff Street, Erasmussmith Street, Baker Street, Desch Street, Lelie Street, Protea Street to Erasmus Smith Street, Botmanskop Way, Dahlia Street, Speler Street, Rustenburg road of the corner of Helshoogte Road to Lelie Street; Glenelly Estate in Lelie Street; Helderfontein in Helshoogte Road; Nietvoorbij on R44; Blue Jay / Timberlea Trust Farm on R44; Kloofbosch on R44; Babin Farm on R44; Morgenhoff Wine Estate on R44; Remhoogte on R44; Groenhof on R44; Muratie Wine Estate on R44; Delheim Wine Estate on R44; Kanonkop on R44; Uitkyk on R44; Warrick on R44; Lievland on R44
7	Mostertsdraif, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially); Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan, and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanhand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Oliehout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street, onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A George Blake Street, Chris Hani Drive, 10 th and 13 th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone A Masithandane Street, Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang TRA 1, Smarties (Mgabadel Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4 th and 5 th Avenue, 10 th , 12 th and 14 th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2 nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloeterville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklaar Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Crescent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelele Estate)

Ward	Areas
19	De Novo, Kromme Rhee, Vaaldrac, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poulter / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Brak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

Below is a map of the Cape Winelands District concerning the provincial district boundaries:

Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:

Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klipmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlootenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschoek, and Klipmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlootenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 14: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2025				Actual households, 2025	
	Population 210 962			Households 58 912

2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government 2025 – 2026 Municipal Economic Review and Outlook (MERO). The report provides a snapshot of the safety and well-being of our communities, and economic growth. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The population growth and socioeconomic data are essential for effective municipal planning and the equitable distribution of public services. Population size, household growth, age structure and migration patterns all have a direct impact on the demand for infrastructure, housing, education, healthcare and social services. In rapidly expanding economic hubs such as the Stellenbosch municipal area, monitoring these trends enables policymakers to better anticipate future service demands, allocate resources efficiently, and design targeted interventions that enhance social well-being while also strengthening economic resilience.

The GDP performance, risk, and vulnerability factors can be read in detail within the Local Government MERO 2025 for the Stellenbosch municipal area.

2.4.1 Population Growth

In 2025, the Stellenbosch municipal area was home to **210 962** individuals, reflecting an annual population growth rate of **1.9 per cent** during 2025. This significant increase illustrates Stellenbosch's appeal, particularly due to migration with the educational institutions and vibrant community atmosphere. This growth necessitates strategic planning for infrastructure and local services to support the needs of a larger population.

The household growth reflects the demographic expansion within Stellenbosch. In terms of households, Stellenbosch exhibits an annual growth from 57 520 in 2024 to **58 912 in 2025**, with an annual growth rate of approximately **3.6 persons**. This increase highlights a growing demand for municipal services and housing that aligns with the growing population. Addressing this growth in households will require proactive planning and resource allocation for maintaining service quality and community engagement.

The figure below depicts the estimated population growth from 2025 - 2030:

Table 15: Estimated Population Growth, 2025 – 2030

Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit (PPU), 2025

2.4.2 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. The population comprises Black African individuals, accounting for 33.1 per cent of the total, followed closely by the Coloured community, constituting 53.5 per cent. White residents make up 13.1 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 1 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The figure below indicates the ratio split within the Stellenbosch Municipality:

Figure 7: Racial Split for the WCO24

Source: Western Cape Local Government MERO 2025

2.4.3 Gender Ratio

The 2025 population pyramid of the Stellenbosch municipal area indicates a noticeable gender imbalance within the 20 - 24 and 25 - 29 age cohorts, with 12 372 males compared to 12 422 females in the 20-24 age group. This pattern reflects the underlying demographic and socio – economic dynamics of the area. The gender imbalances could be a nexus of labour migration patterns, the substantial student population (which often influences age-specific demographic distribution) and potential out-migration of males seeking employment opportunities elsewhere. These factors contribute toward shaping the structure of the local labour force and demographic profile of the Stellenbosch municipal area.

This demographic imbalance may contribute to a growing dependency burden. The relatively large base of children (0 to 14 years) and the rapidly expanding elderly population (especially females aged 60 and above) will place increasing pressure on a potentially constrained work – age population to sustain public expenditure on social services, healthcare and pensions. In addition, it will in the future strain public resources and shift housing demands and settlement patterns. To sustain economic

growth and social stability, policy responses will need to focus on strategies that retain young male professionals or facilitate adaptation to a workforce with a higher female participation rate.

The table below depicts the gender ratio within the Stellenbosch municipal area.

Figure 8: Ratio of % females and males

Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit, 2025

2.4.4 Age Cohorts

The age distribution of the Stellenbosch population has significant socioeconomic implications, particularly for future housing and service delivery. With a substantial **39.9 per cent** of the population **aged 15 to 34**, the Municipality is under increasing demand to facilitate job creation and supply affordable housing for young working-age persons. This demographic projection, combined with a sizeable child population (19.2 per cent), indicates continued high demand for basic services and infrastructure, placing a strain on municipal resources. The relatively small population of elderly residents (6.9 per cent) suggests a lower immediate burden on care systems for the aged. In addition, the overall youth-heavy structure points to sustained, long-term demand for indigent support as these young adults form households in a challenging economic environment.

Figure 9: Population by Age Group, 2025

Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit, 2025

2.5 Education

The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Empowering the population will have a significant impact on the local economy's development and human resource capacity. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty. Learners in the Stellenbosch municipal area have access to education through the availability of 50 schools. Three-quarters of these education facilities (**74.0 per cent**) operate as no – fee schools.

The growing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in education capacity, as reflected in the learner – teacher ratio below. The ratio of the Stellenbosch municipal area has remained unchanged, rising marginally from **26.2 in 2024** to a projected **26.7 in 2025**.

The combination of increasing learner enrolment and relatively unchanged learner–teacher ratio in Stellenbosch implies that the education system is struggling to keep pace with the population growth. Consequently, expanding larger class sizes and strained public resources threaten educational quality. These risks exacerbate long-term inequality, undermining the very human capital development needed for sustainable economic inclusion.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner retention in Stellenbosch experienced a notable decline from **82.0 per cent in 2022** to a concerning **77.6 per cent in 2025**. It is evident that the educational decline depicts a deteriorating socio-economic challenge within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities. Stellenbosch is a hub for both education and agriculture, luring families to the area.

The graphs below depict the learner retention from 2022 – 2025.

Graph 1: Learner Enrolment 2022- 2025

Source: Western Cape Local Government MERO 2025

Learner enrolment in the Stellenbosch municipal area has steadily increased, rising from 28 594 in 2021 to a projected 30 380 in 2025. This trend reflects a pronounced in-migration dynamics to Stellenbosch, likely motivated by the area's superior economic opportunities and its reputation for high-quality educational institutions.

The increasing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in educational capacity, as reflected in the learner – teacher ratio. This ratio has remained largely static, increasing slightly from 26.2 in 2024 to a projected 26.7 in 2025. This highlights the persistent challenges in scaling educational resources to match population growth.

Graph 2: Learner Enrolment and Learner-Teacher Ratio 2021 – 2025

Source: Western Cape Local Government MERO 2025

2.5.2 Number of schools and no-fee schools

Figure 10: Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area was recorded at 50 in 2025.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 70 per cent in 2025, whereby 71.4 per cent are equipped with libraries.

Source: Western Cape Local Government MERO 2025

2.5.3 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. The matric pass rate of the Stellenbosch municipal area has shown a strong recovery, rising to 88.0 per cent in 2024 after a concerning three-year decline to a low of 80.2 per cent. This high pass rate indicates that a significant proportion of learners in Stellenbosch are completing their schooling and performing well in the matric exams.

The graph below depicts the Matric pass rates from 2021 to 2024.

Graph 3: Education outcomes (matric pass rate) 2021 – 2024

Source: Western Cape Local Government MERO 2025

2.6 Health

2.6.1 Health Facilities

According to the MERO 2025, the Stellenbosch municipal area has 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites, and 14 TB clinics.

The table depicts the total healthcare facilities.

Table 16: Health facilities

Source: Western Cape Local Government MERO 2025

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 11: Emergency Medical Services

2.6.3 Tuberculosis and HIV/ AIDS

The number of TB patients in the Cape Winelands District (CWD) plateaued at a persistently high rate, increasing from **7 990 in 2022/23** to **8 038 in 2023/24**. The stagnation remains at levels considerably higher than those recorded before 2022, suggesting that the population continue to face heightened vulnerability due to overcrowded living conditions, inadequate nutrition, and persistent barriers to accessing healthcare services.

In contrast to the CWD statistics, Stellenbosch has demonstrated a more effective public health response. The TB patient count of the Stellenbosch municipal area remained stable, as indicated in the table below, with a slight improvement compared to the low record statistics in 2021/22.

The divergence suggests that targeted localised interventions in Stellenbosch may be exerting a mitigating effect.

Table 17: Total Registered TB Patients, 2019/20 – 2023/24

Municipality	Number of TB patients registered on Treatment				
	2019/20	2020/21	2021/22	2022/23	2023/24
Cape Winelands	7 000	7 285	7 235	7 990	8 038
Stellenbosch	1 175	1 176	1 062	1 230	1 229

Source: Western Cape, MERO 2025

The District – wide number of patients receiving antiretroviral therapy (ART) has shown a trend of stabilisation coupled with continued, though gradually slowing, growth, reaching 38 361 in 2024/25. This reflects a sustained and effective public health effort to ensure ongoing access to treatment. However, the Stellenbosch municipal area witnessed a significant and unprecedented 12.4 per cent year-on-year decline from 2023/24 to 2024/25, with the patient total decreasing sharply from 7 327 to 6 422. This decrease might suggest a potential crisis in healthcare access or retention, potentially driven by socioeconomic pressures such as patient migration due to rising living costs and service delivery disruption.

Table 18: Number of registered patients on ART, 2019/20 – 2024-25

Municipality	Total registered patients receiving ART					
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Cape Winelands District	32 366	32 949	32 719	36 681	38 247	38 361
Stellenbosch	6 960	6 914	6 915	7 066	7 327	6 422

Source: Western Cape Local Government MERO 2025

2.6.4 Child Health

Following relatively stable rates ranging from approximately 71.6 per cent to 77.0 per cent between 2019/20 and 2021/22, both jurisdictions experienced a dramatic and sustained decline at the beginning of 2022/23. The immunisation rate decreased in Stellenbosch to 58.1 per cent in 2023/24, with a slight recovery to 58.4 per cent in 2024/25. This sharp decline signals pressure on the primary healthcare system and is potentially driven by post – pandemic resource limitations, growing vaccine hesitancy or logistical challenges in reaching vulnerable communities.

Graph 4: Child Health

Source: Western Cape Local Government MERO 2025

Based on the malnutrition data for the CWD and Stellenbosch Municipality from 2019/20 to 2024/25, both CWD and Stellenbosch show a significant overall improvement from their 2019/20 rates. For two consecutive reporting periods, the rate in Stellenbosch has remained constant at 1.3 per cent.

Graph 5: Malnutrition, 2019/20 – 2024/25

2.7 Poverty

2.7.1 GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the MERO 2025, Stellenbosch's GDP per capita consistently exceeds the Cape Winelands region and Provincial averages, indicating its economic growth. In 2020, per capita GDPR in Stellenbosch contracted sharply (declining to R77 609), then peaked in 2022 (R80 943). It has declined for two consecutive years to R78 992 in 2024. This indicates that Stellenbosch's high – value economy, underpinned by viticulture, tourism and academia, is confronting structural headwinds, including inflationary pressures or slower export growth, which are limiting gains in per capita economic wellbeing.

Graph 6: GDP Per Capita

Source: Western Cape Local Government MERO 2025

2.7.2 Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. The Gini coefficient of the Stellenbosch municipal area decreased from 0.605 in 2019 to 0.597 in 2024. However, the improvement was negligible, and the figure remains close to 0.600 – a ratio indicative of severe social strain. The Stellenbosch coefficient exceeds the average for the Western Cape and far surpasses that of the CWD.

Graph 7: Income Inequality

Source: Western Cape Local Government MERO 2025

2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2024, 50.3 per cent of Stellenbosch's population fell below the lower – bound poverty line (LBPL). Of this population, 33.5 per cent fell below the Food Poverty Line (FPL), indicating an inability to afford basic nutritional requirements, while 16.8 per cent were able to meet food needs but remained unable to cover essential non – food needs. Although an improvement has been shown from 2019 of 53.0 per cent, poverty levels remain substantially higher than those recorded in 2014 (41.0 per cent).

Graph 8: Poverty Headcount Rate, 2014 – 2024

Source: Western Cape Local Government MERO 2025

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.

This section reflects on the latest available information from the MERO 2025 and Quantec Research for 2025. The latest official statistics were collected by Statistics South Africa in the 2022 Census, but for the purpose of these statistics, Quantec's modelled estimates were utilised by the Western Cape Provincial Government to compile the MERO 2025, which offers more recent and regularly updated figures. The information on indigent households was obtained from the Western Cape Department of Local Government.

2.8.1 Housing and Household Services

In 2024, in the Stellenbosch municipal area, which comprises 57 520 households, 72.4 per cent had access to formal housing, lower than the Cape Winelands District average of 73.7 per cent. The remaining households were spread across other housing types: 10.0 per cent lived in informal dwellings (i.e. informal dwellings or shacks not located in a backyard), 0.8 per cent occupied traditional dwellings, and 0.2 per cent resided in other or unspecified housing types.

It should be noted that the proportion of households in Stellenbosch residing in informal dwellings was substantially higher than the district average (6.8 per cent). This category, which includes structures in densely populated informal settlements, reflects persistent housing shortages, ongoing urban in-migration pressure, and income inequality.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (98.5 per cent), flush or chemical toilet access (96.7 per cent), electricity access (including generators) for lighting (97.1 per cent), and the removal of refuse at least weekly by the local authority at 87.4 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 12: Service delivery access levels (HH)

Source: Western Cape Local Government MERO 2025

2.8.2 Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R7 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy, 2025.

Stellenbosch had a decline in the number of households that were registered for indigent support from 2021 to 2022. In 2021, 7 283 households were recorded, followed by a 32.0 per cent drop to 4 982 in 2022. The lowest recorded number of indigent households was in 2024/25 at 5 584, which is well below pre – pandemic (COVID -19) counts.

The table below indicates the number of households receiving free basic services.

Graph 9: Indigent Households, 2018 - 2024

Source: Western Cape Local Government MERO 2025

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2024. Target local initiatives have successfully lifted a major portion of households out of poverty, as evidenced by the divergence from 2022 to 2024. Such interventions include municipal indigent support programmes and expanded access to basic services.

2.9 Safety and Security

All the data below are sourced from the Local Government MERO 2025 for the Stellenbosch Municipal area.

The 2024 crime statistics indicate that the Stellenbosch municipal area is facing a deeply dualistic socio-economic crisis, in which the crime profile is both a cause and a consequence of deep – seated structural inequalities.

The statistics in the table below reflect that Stellenbosch's rate of crime per 100 000 population far surpasses CWD averages in almost every category of crime. Significant disparities are seen in the incidence of driving under the influence (DUI) and the prevalence of commercial crime. The 61.0 per cent rate of DUI recorded in Stellenbosch in 2024 signals a public safety risk and deeper substance abuse issues. The persistence of these trends in 2024 indicates that current approaches to curbing DUI are merely containing, not resolving, the underlying matters.

Table 19: Number of cases per crime category, crime per 100 000 people, 2022 – 2024

Crime Category	Actual Numbers			Trend	Crime per 100 000 Population	
	2022	2023	2024		Stellenbosch	Cape Winelands District
Murder	90	80	79	↔	38	43
Sexual Offences (also see SDS)	248	209	254	↑	123	103
Common assault	1 041	1 119	1 116	↔	539	634
Malicious damage to property	818	839	806	↓	389	416
Burglary at residential premises	941	877	996	↑	481	471
Commercial crime	876	1 064	1 229	↑	594	268
Drug-related crime	1 233	1 474	1 464	↓	707	735
Driving under the influence of alcohol or drugs	264	254	251	↔	121	75

2.10 Economy and Labour Market Performance

2.10.1 Sectoral Overview

In 2024, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at the regional level (GDPR) of R25.2 billion, equivalent to 24.0 per cent of the CWDM and 2.7 per cent of the Western Cape economy. Economic activity in 2024 was broadly stagnant, with GDPR growth of only 0.1 per cent and total employment declining by 1.3 per cent to 77 504 jobs. Labour market indicators weakened correspondingly: the unemployment rate rose to 13.8 per cent in 2024, while the labour-force participation rate fell to 66.2 per cent and the labour-absorption rate to 57.0 per cent.

Employment is predominantly focused in Stellenbosch town, which accounts for the majority of formal jobs dominated by higher education, financial and business services, retail activities associated with Stellenbosch University, commercial offices, and tourism. The Franschhoek town is a secondary employment node, with its main sectors in hospitality, accommodation, and restaurants, while Lanquedoc is defined by agri – processing and support activities for crop production. Elsenburg, by

contrast, drives public sector and agricultural research employment through Provincial and academic institutions. This geographic distribution shows a dual economy, one being an urban, service-driven core centred in Stellenbosch town, and a productive agricultural periphery extending through the valley settlements and wine estates.

The municipality's economy thrives on a dominant tertiary sector, led by finance, trade and personal services. The finance and business sector provided the only positive growth momentum in 2024, contributing 0.8 percentage points to the overall GDP.

Graph 10: Sectoral contribution to GDP 2024

Primary Sector	
Sector	2024
Agriculture	R1 584.5m
Mining	R35.2m
Total	R1 619.7m

Secondary Sector	
Sector	2024
Manufacturing	R4 496.0m
Electricity	R407.8m

Total	R5 773.7m

Tertiary Sector	
Sector	2024
Trade	R2 541.3m
Transport	R4 425.3m
Finance	R6 541.9m
General Government	R1 385.1m
Personal Services	R2 866.6m
Total	R17 760.2m

Source: Western Cape Local Government MERO 2025

2.10.2 Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 25.6 per cent classified as skilled workers and 42.4 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 23.1 per cent of the workforce in 2024. However, a notable challenge exists for low-skilled workers, constituting 32.0 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

Graph 11: Skills Level Contribution, 2024

Source: Western Cape Local Government MERO 2025

2.10.3 Job Gains and Losses

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for the affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

An analysis of the formal sector indicates that, although there was a net gain of 3 293 formal jobs, this was overshadowed by losses elsewhere. The most notable increases in informal employment occurred in management consultancy (1 693 jobs) and short-term accommodation (358 jobs). However, these gains were countered by significant job losses in sectors such as other telecommunications activities (617 jobs), private security activities (322 jobs), and notably the manufacture of wines (221 jobs), the latter reflecting the broader downturn experienced in the agriculture sector.

Chapter 3:

Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 13: Municipal Vision and Strategy

OUR MISSION: To deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

OUR VALUES: In all of our work and engagements, we subscribe to the following values:

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Integrity: As servants of the public, we undertake to perform the functions and operations of the Municipality in an honest and ethical manner.

Innovation: We will continuously review our systems, procedures and processes to make them more responsive to customer needs. In partnership with our stakeholders we will seek innovative solutions to complex problems. We will encourage and reward initiatives which show creativity and ingenuity.

Transformation: We, as custodians of hope, will work tirelessly at transforming our Municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Responsiveness: The municipality to be a responsive municipal entity with zero tolerance for corruption and illegal actions.

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **“An Integrated Valley of Opportunity and Innovation”**

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding of the need to give an account of our actions to individuals, groups, and organisations.

Transformation: We, as custodians of hope, will work tirelessly to transform our municipality, communities, and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social, and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures, and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services in all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunities for enterprise, creativity and business development in our cities, towns and villages is an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens and how these services can assist them in facilitating development and job creation. The second relates to the internal workings of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work, and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpin its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural

environment and its processes provide the setting in which and the basic resources with which human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economies. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, people's activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and the food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity, and transport infrastructure provision. Secondly, the municipal strategy has, over the last decade, taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has helped to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities, and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas, and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure Greater Stellenbosch area is thus not only a functional necessity but also underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women, and elderly, is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and to whose benefit it is, however, is a difficult task. The range of services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also

ensure synergy between the work of the political and administrative spheres of the municipality, their work, and that of other spheres of government, civil society, and the business sector. Municipalities should communicate well and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, both external and internal to the organisation, be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available, and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership, and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To meet the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensuring the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 14: Strategic Focus Areas and Predetermined Objectives

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups, and organisations (public, community-based and private).

For sustainable municipal management, political leadership, and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the “now” – the need to guide decisions today. For municipalities, the “now” has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is “under preparation” is used as an excuse for inaction or even poor decision-making. The arm's length approach also appears to neglect local experiential knowledge – what people know through working with service issues daily. With this in mind, we have provided for regular, informal, but structured engagements between the MayCo and the Director's Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining, and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges, and taxes for services as a means for raising government revenue and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that the government takes on issues, "positive" and "negative." This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur in a vacuum. Various key policy directives are being employed, ranging from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 4th review of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs), officially known as *Transforming Our World: The 2030 Agenda for Sustainable Development* is a set of seventeen aspirational "Global Goals" with 169 targets between them. The Agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic**, **social**, and **environmental**. The Goals are the following:

Figure 15: Sustainable Development Goals (SDGs)

Sustainable Development Goals (SDGs) 2030

- Goal 1: End poverty in all its forms everywhere.
- Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- Goal 3: Ensure healthy lives and promote well-being for all ages.
- Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- Goal 5: Achieve gender equality and empower all women and girls.
- Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- Goal 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- Goal 10: Reduce inequality within and among countries.
- Goal 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.
- Goal 12: Ensure sustainable consumption and production patterns.
- Goal 13: Take urgent action to combat climate change and its impacts.
- Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- Goal 15: Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
- Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

3.6 National Policy Direction

3.6.1 National Development Plan (NDP) – 2030

The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by the Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities, and employment on social and living conditions. It shows how leadership, active citizenry and effective government can help drive development in a socially cohesive environment.

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Figure 16: National Development Plan – An approach to change

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- ✚ Uniting all South Africans around a common programme to achieve prosperity and equity.
- ✚ Promoting active citizenry to strengthen development, democracy, and accountability;
- ✚ Bringing about faster economic growth, higher investment, and greater labour absorption;
- ✚ Focusing on key capabilities of people and the state;
- ✚ Building a capable and developmental state; and
- ✚ Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- ✚ Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- ✚ Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- ✚ Increase employment from 13 million in 2010 to 24 million in 2030.
- ✚ Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- ✚ Increase the share of national income in the bottom 40% from 6% to 10%.
- ✚ Establish a competitive base of infrastructure, human resources, and regulatory frameworks.
- ✚ Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender, and disability makeup.
- ✚ Broaden ownership of assets to historically disadvantaged groups.
- ✚ Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- ✚ Provide affordable access to quality health care while promoting health and well-being.
- ✚ Establish effective, safe, and affordable public transport.
- ✚ Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- ✚ Ensure that all South Africans have access to clean running water in their homes.
- ✚ Make high-speed broadband internet universally available at competitive prices.

- Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- Ensure household food and nutrition security.
- Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- Realise a developmental, capable, and ethical state that treats citizens with dignity.
- Ensure that all people live safely, with an independent and fair criminal justice system.
- Broaden social cohesion and unity while redressing the inequities of the past.
- Play a leading role in continental development, economic integration, and human rights.

3.6.2 Medium-Term Development Plan (MTDP) 2024 – 2029

The MTDP is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. The MTDP replaces the Medium-Term Strategic Framework (MTSF) and is designed to focus on fewer, high-impact interventions to drive measurable results. It sets targets for the implementation of the priorities and interventions for the next five years and states the outcomes and indicators to be monitored.

The MTDP was approved by Cabinet Lekgotla on 29 January 2025 and is structured around three core strategic priorities:

The MTDP 2024 – 2029 will guide the work of the Government of National Unity for the next five years in pursuit of three strategic national priorities: **driving inclusive growth and job creation, reducing poverty and tackling the high cost of living**, and **building a capable, ethical and developmental state** through the three pillars of the NDP.

Figure 17: Three NDP Pillars

The Government of National Unity has set five goals for the next five years, which are:

- Goal 1:** A dynamic, growing economy;
- Goal 2:** A more equal society, where no person lives in poverty;
- Goal 3:** A capable state delivering basic services to all citizens;
- Goal 4:** A safe and secure environment; and
- Goal 5:** A cohesive and united nation.

The table below encapsulates the MTDP goals, strategic priorities and outcomes identified to achieve the goals and objectives:

Table 20: MTDP 2024 – 2029: Goals, Strategic Priorities and Outcomes**MTDP Strategic Priority 1: Drive inclusive growth and job**

- ⬇ Increased employment and work opportunities;
- ⬇ Accelerated growth of strategic industrial and labour-intensive sectors;
- ⬇ Enabling environment for investment and improved competitiveness through structural reforms;
- ⬇ Increased infrastructure investment, access and efficiency;
- ⬇ Improved energy security and a just energy transition;
- ⬇ Increased trade and investment;
- ⬇ A dynamic science, technology and innovation ecosystem for growth;
- ⬇ Supportive and sustainable economic policy environment; and
- ⬇ Economic transformation and equitable inclusion of women, youth and persons with disabilities for a just society.

MTDP Strategic Priority 2: Reduce poverty and tackle the high cost of living

- ⬇ Reduced poverty and improved livelihoods;
- ⬇ Improved coverage of social protection;
- ⬇ Improved access to affordable and quality healthcare;
- ⬇ Improved education outcomes and skills;
- ⬇ Skills for the economy; and
- ⬇ Social cohesion and nation-building.

MTDP Strategic Priority 3: Build a capable, ethical and developmental state

- ⬇ Improved service delivery in the local government sphere;
- ⬇ Improved governance and performance of public entities;
- ⬇ An ethical, capable and professional public service;
- ⬇ Digital transformation across the state;
- ⬇ Mainstreaming of gender, empowerment of youth and persons with disabilities;
- ⬇ A reformed, integrated and modernised Criminal Justice System;
- ⬇ Effective border security;
- ⬇ Secured cyberspace;
- ⬇ Increased feelings of safety of women and children in communities;
- ⬇ Combat priority offences (economic, organised crime and corruption);
- ⬇ Advance South African foreign policy for a better world; and

3.6.3 National District Development Model and One Plan

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- ⬇ solve the silos at a horizontal and vertical level;
- ⬇ maximise impact and align plans and resources at our disposal through the development of "One District, One Plan, and One Budget";
- ⬇ narrow the distance between people and government by strengthening the coordination role and capacities at the district level;

- ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- build government capacity to support municipalities;
- strengthen monitoring and evaluation at district and local levels;
- implement a balanced approach towards development between urban and rural areas;
- ensure sustainable development while accelerating initiatives to promote poverty eradication, employment, and equality; and
- exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25–30-year long-term strategic framework (consisting of short-, medium-, and long-term actions) to guide investment and delivery in each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.

3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NPD) indicated that by 2030, South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced, and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive, resilient, and liveable urban settlements** while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 18: IUDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The IUDF strategic goals listed above create nine policy levers. These policy levers can only be used if they are added to tools for planning municipal development, like the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction

3.7.1 The Western Cape Government Provincial Strategic Plan 2025 - 2030

The Western Cape Provincial Government (WCG), Provincial Strategic Plan (PSP) 2024 - 2030, outlines the strategic goals and priorities for the period 2025- 2030.

The overarching strategic direction for the provincial government over the features below:

Strategic:

The PSP outlines high-level priorities and goals for the provincial government to enhance residents' quality of life. PSP 2025-2030 focuses on shared, resident-centred outcomes which inform departmental and portfolio plans.

Resident-centric:

The PSP focuses on achieving meaningful changes for residents, applying the life course approach and systems theory to define impact, and theories of change to track progress.

Transversal:

The PSP promotes integration and collaboration across provincial departments, and a whole-of-society approach, to address complex challenges through transversal responses.

The PSP 2025 – 2023 builds on proven approaches from previous cycles, incorporating lessons and established strategies that guide government action. The Western Cape's Key Priorities for 2025 – 2030 are:

WCG Key Priority 1: Growth for Jobs

- Driving growth opportunities through investment
- Stimulating market growth through exports and domestic markets
- Energy resilience and transition to net-zero carbon.
- Water security and resilience
- Technology and innovation

WCG Key Priority 2: Safety

- Integrated Violence Prevention
- Safe and Secure Communities and Infrastructure
- An effective and responsive law enforcement

WCG Key Priority 3: Educated, Healthy and Caring Society

- Human Capital Development;
- Infrastructure and Spatial Transformation; and
- Resilience and Sustainability

WCG Key Priority 4: Innovation, Culture and Governance

- Supporting economic growth for job creation
 - Greater confidence and trust in the WCG;
 - Reliable, high-quality essential public goods
- Service delivery enablers;
 - Innovation;
 - Integration and collaboration;
 - Culture and people-centric delivery;
 - Futures thinking and informed decision making; and
 - Ease of doing government

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for its district:

Table 21: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the strategic goals for the 3rd review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas (SFAs) are aligned with national, provincial, and district plans.

Table 22: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1 Valley of Possibility	Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all (8)	Drive inclusive growth and job creation (1)	Growth for Jobs (1)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2 Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3) Innovation, Culture and Governance (4)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District through economic, environmental, and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient, and sustainable (11)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 3 Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Safety (2)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SFA 4 Dignified Living	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4) Ensure healthy lives and promote well-being for all at all ages (3)	Reduce poverty and tackle the high cost of living (2)	Educated, Healthy and Caring Society (3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
	Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)	Drive inclusive growth and job creation (1)	Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 5 Good Governance and Compliance	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Growth for Jobs (1) Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
			Innovation, Culture and Governance (4)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

3.11 Climate Change Adaptation

Climate change refers to long-term changes in weather patterns, including shifts in temperature, rainfall, and the frequency and intensity of extreme weather events. While the Earth's climate has always exhibited natural variability, current climate change is directly or indirectly driven by human activities that increase greenhouse gas concentrations in the atmosphere, particularly through the burning of fossil fuels, land-use change, and industrial processes. This anthropogenic climate change is occurring at a rate and scale that exceeds historical natural variability, resulting in more frequent and severe climate-related hazards.

South Africa is particularly vulnerable to these changes due to its existing exposure to climate variability, socio-economic inequality, and reliance on climate-sensitive sectors such as water resources, agriculture, biodiversity, and infrastructure. Increasing temperatures, changing rainfall patterns, and more extreme events — such as floods, droughts, heatwaves, wildfires, and severe storms — pose significant risks to livelihoods, economic development, ecosystem services, and municipalities' ability to deliver basic services (Figure 19). As a result, climate change constitutes a critical development challenge of the 21st century for South Africa, requiring integrated responses at the local level. In this context, climate change adaptation refers to the process of adjusting natural, social, and built systems in response to actual or expected climate impacts, in order to reduce vulnerability, minimise harm, and enhance resilience. For Stellenbosch Municipality, this involves integrating climate risk considerations into municipal planning, infrastructure investment, service delivery, and decision-making to support sustainable and resilient development.

Figure 19: Climate as a driver of instability

Source: <https://www.envirosecurity.org/publications/climate-change-implications-for-defenceH>

Baseline Climate of WC024¹

Stellenbosch Municipality is characterised by a Mediterranean-type climate, with warm, dry summers and cool, wet winters. Based on historical climate data (1961–1990), average temperatures across the municipal area are approximately 15°C, with some spatial variation influenced by topography. Summers are generally warm to hot, with an average of ~18 very hot days per year (maximum temperatures exceeding 35°C), while short heatwave events also occur. While rainfall varies spatially across WC024, average annual rainfall is approximately 790 mm, of which most (~80%) falls during the winter months as cyclonic rain from cold fronts. Under baseline conditions, Stellenbosch has historically

¹CSIR. 2023. GreenBook Risk Profile Tool. CSIR: Pretoria. Online available at: <https://riskprofiles.greenbook.co.za/>

experienced normal to moderately dry conditions, with periodic droughts, a general exposure to wildfire risk across all settlements, and spatially variable flood risk, with central, western, and southern areas more prone to flooding than eastern areas.

Projected Climate Change for WC024 (2021–2050)²

Climate projections for WC024 for the period 2021–2050 under both moderate (RCP 4.5) and high (RCP 8.5) emissions scenarios, indicate a clear and consistent warming and drying trend across the municipal area (Figure 20). Average annual temperatures are projected to increase by approximately 2°C by mid-century, substantially shifting from historical baseline conditions to average temperatures of ~17°C. The number of very hot days (maximum temperatures exceeding 35°C) is projected to increase by approximately 12 to 14 additional days per year by 2050, resulting in an average of more than 30 very hot days annually. While most settlements are projected to experience a low increase in exposure to extreme heat, areas such as Groendal in Franschhoek and surrounding settlements may face a medium increase in heat exposure, increasing vulnerability to heat-related stress.

Figure 20: Key projected climate change trends for WCO24 mid – century (2021- 2025)

Annual rainfall across the municipality is projected to decline by approximately 90–100 mm per year (~12% decrease) under both climate scenarios. At the same time, annual evaporation is projected to increase by approximately 7.5%, resulting in an estimated 5% reduction in average annual runoff. This reduction directly affects the volume of water available for rivers, dams, and groundwater systems. Projections also indicate a decrease in the number of extreme rainfall days (greater than 20 mm in 24 hours), with spatial variation across the municipal area. The largest decreases in extreme rainfall events are projected in the eastern and southern areas, which correspond with areas experiencing the greatest declines in overall annual rainfall.

Fire risk is projected to increase across the municipality by mid-century. Under the high emissions scenario, WC024 could experience an average of approximately 16 fire danger days per year, with the northern and western parts of the municipal area most affected. When combined with changes in fire likelihood, overall fire risk is expected to increase, with most settlements —particularly around central Stellenbosch — experiencing a moderate increase in fire risk. Drought projections indicate increasing drought tendency across the municipal area, with most settlements expected to experience a moderate increase in drought risk by 2050, despite uncertainty in the precise magnitude of change. In line with projections of decreased extreme rainfall events, most settlements in WC024 are expected to experience a low increase in flood exposure, with some areas showing very low change in flood risk.

²CSIR. 2023. GreenBook Risk Profile Tool. CSIR: Pretoria. Online available at: <https://riskprofiles.greenbook.co.za/>

Collectively, these projections indicate that Stellenbosch Municipality will face a hotter and drier climate by mid-century, with increased heat stress, higher wildfire risk, greater water scarcity, and ongoing flood exposure in certain areas. These changes have significant implications for municipal infrastructure planning, particularly for water supply systems, stormwater management, roads, electricity networks, and fire management services. Climate change will place increasing pressure on service delivery and operational budgets, as assets are exposed to higher levels of stress and maintenance demands. From a planning and governance perspective, these projected changes highlight the need to integrate climate risk considerations into spatial planning, infrastructure investment decisions, disaster risk management, and long-term financial planning. Climate change also poses risks to local economic development, particularly in climate-sensitive sectors such as agriculture and tourism, while increasing vulnerability for communities exposed to heat, water insecurity, and environmental hazards. Strengthening climate change adaptation within municipal planning and decision-making is therefore essential to protect development gains, manage risk, and support resilient and inclusive growth within Stellenbosch Municipality. High priority is thus given to the formulation of a framework and plan concerning climate change adaptation and to provide support to citizens and key stakeholders in adapting to the current and future impacts of climate change (climate resilience) in the municipal area.

Legislative Framework of Climate Change

The Climate Change Act, 2024 (Act No. 22 of 2024) is a pivotal legislative measure aimed at addressing the urgent global challenge of climate change through comprehensive and impactful strategies. Its overarching goal is to support South Africa's transition to a low-carbon, climate-resilient economy and society while promoting sustainable development

The objectives of the Climate Change Act 22 of 2024 are described as:

- ✦ Promotes the formalisation of adaptation processes through policy interventions;
- ✦ Mandates clear adaptation road maps based on scenarios to assist with planning and resourcing;
- ✦ Promotes coordination through different tiers of government;
- ✦ Allows for sectoral-specific interventions that focus on interventions, particularly for vulnerable sectors;
- ✦ Encourages mainstreaming of climate adaptation through policy and planning tools;
- ✦ Aims to facilitate effective resourcing through the establishment of financial mechanisms to support the response;
- ✦ Encourages stakeholder engagement in planning to tap into local knowledge and create buy-in;
- ✦ Support South Africa's international obligations under the Paris Agreement, ensuring that national adaptation efforts contribute to global climate goals;
- ✦ It establishes mechanisms for tracking progress on adaptation actions; and
- ✦ To provide a feedback mechanism for future planning and decision-making.

Municipal Response to Climate Change

In response to the increasing risks posed by climate change and the requirements of the Climate Change Act, Stellenbosch Municipality has identified climate change as a strategic priority for the 2025/26–2026/27 period. The key focus areas guiding the municipality's climate response during this period are illustrated in Figure 21 and reflect an integrated approach to strengthening climate resilience across planning, infrastructure, governance, and community engagement.

Figure 21: Climate Change Adaptation Focus Areas and Goals

To support the implementation of these priorities and to give effect to the objectives set out in the Climate Change Act, Stellenbosch Municipality appointed a dedicated Climate Change Expert, effective 1 June 2025. This appointment represents a significant step forward in strengthening the municipality's institutional capacity to respond proactively to climate change. At present, only a limited number of local municipalities in South Africa have a dedicated position focused exclusively on climate change adaptation and resilience, placing Stellenbosch Municipality at the forefront of local climate governance.

The Climate Change Expert position is funded through the GIZ/SKEW Expert Fund for Municipal Partnerships Worldwide, as part of the municipal partnership between Stellenbosch Municipality and Karlsruhe Municipality (Germany). This international cooperation mechanism enables South African municipalities to access specialist technical expertise to address complex development challenges, including climate change. The Climate Change Expert position is funded for a fixed term until 31 December 2026 and is embedded within the Office of the Municipal Manager, reporting directly to the Municipal Manager. This strategic placement supports cross-directorate coordination and facilitates the transfer of skills and systems needed to institutionalise climate change functions within the municipality.

The role of the Climate Change Expert is structured around five interrelated working areas that together support the strengthening of climate change adaptation and resilience within Stellenbosch Municipality.

Strategy and Capacity Development

This working area focuses on strengthening the municipality's strategic and institutional response to climate change. Key activities include assessing existing climate change adaptation measures; developing a municipal Climate Change Adaptation Plan aligned with national and provincial climate change legislation and policy; strengthening coordination mechanisms among municipal departments and external stakeholders; and undertaking a capacity needs assessment to inform the design and implementation of targeted capacity-building programmes and workshops.

Climate-Resilient Services and Local Interventions

This working area supports the implementation of climate-resilient measures at a local level, with a particular focus on the Franschhoek area. Activities include facilitating flood-resilience advisory programmes for homeowners and property owners; supporting the implementation of flood-resilient interventions; and contributing to local climate adaptation and resilience initiatives. This includes the development and promotion of innovative approaches such as ecosystem-based adaptation, nature-based solutions, and green infrastructure to reduce vulnerability to climate-related risks.

Awareness Raising and Community Engagement

This working area focuses on increasing awareness and understanding of climate change adaptation among residents and stakeholders. Activities include the design and rollout of public awareness initiatives; the development and dissemination of information and communication materials related to climate change adaptation; the implementation of stakeholder engagement processes; and the establishment of partnerships with local institutions to support outreach and community-based resilience activities.

Resource Mobilisation and Fundraising

This working area supports the identification and mobilisation of financial resources for climate change adaptation. Activities include exploring funding opportunities for climate adaptation projects, identifying potential national and international funding sources, and supporting the development of concepts and proposals for climate-resilient programmes and interventions.

Partnerships and Knowledge Exchange

This working area focuses on strengthening partnerships and facilitating knowledge exchange to support climate adaptation efforts. Activities include organising regular technical exchanges with the partner municipality; planning and supporting study visits and learning exchanges; and contributing to the preparation of project proposals in collaboration with partners when applying for external funding.

Since 1 June 2025, Stellenbosch Municipality has made measurable progress in advancing its resilience to climate change. Key activities undertaken to date include the consolidation and analysis of local climate risk information, including CSIR Green Book data, to inform municipal planning, decision-making and risk management processes, as well as the initiation of the development of a municipal Climate Change Adaptation Framework and Plan. A significant focus during this period has been the implementation of climate change adaptation activities in the Franschhoek area, where flood risk has been identified as a priority concern. This has included the facilitation of structured stakeholder engagement processes with residents, businesses, and local organisations, combining workshop-based discussions with on-site river walks and field engagements. These processes have played a critical role in building shared understanding of flood risks, proposed interventions, and responsibilities, and have contributed to strong local buy-in for the flood resilience programme currently being undertaken in the area.

In parallel, the municipality has strengthened public awareness and communication around climate change through the rollout of targeted social media campaigns aimed at the broader Stellenbosch community. These campaigns focus on increasing awareness of climate risks, promoting climate-resilient behaviour, and improving understanding of municipal adaptation initiatives, thereby supporting broader community engagement beyond formal planning processes. Additional progress includes the delivery of internal capacity-building engagements within the municipality, support to the integration of climate change considerations into selected planning, reporting, and risk

management processes, and active participation in international learning and exchange activities through the Karlsruhe–Stellenbosch partnership supported by the GIZ/SKEW Expert Fund.

Through the establishment of dedicated climate change capacity, supported by international cooperation and aligned with national legislation, Stellenbosch Municipality is strengthening its ability to anticipate, manage, and respond to climate risks. This institutional response provides a strong foundation for enhancing climate resilience, safeguarding service delivery, protecting development gains, and supporting sustainable and inclusive growth within the municipal area.

The success of climate change adaptation in the Stellenbosch municipal area will be evaluated based on the key IDP deliverables outlined in the table below for the period 2022 – 2027.

Table 25: Summary Results: Municipal Manager Priority IDP Deliverables 2022 - 2027

CHAPTER 4:

Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP) and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over the short-term (5 years) as well as over the strategically longer term (10 – 20 years) to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda for its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts. It should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 22: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- Enable a long-term spatial vision for the future of regions and places to be best developed over

time that is based on evidence, local distinctiveness, and community-derived objectives;

- ✚ Translate this vision into a set of strategic municipal planning, policies, priorities, programmes, and land allocations, together with the public-sector resources (budget) to deliver them;
- ✚ Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being for a specific region or area, i.e., the Adam Tas Corridor, The Bridge (referred to as Klapmuts Innovation Precinct / Smart City); and
- ✚ Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development?"

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- ✚ Spatial Development Frameworks; and
- ✚ The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions that apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- ✚ Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- ✚ Be informed by a long-term spatial development vision;
- ✚ Represent the integration and trade-off of all relevant sector policies and plans;
- ✚ Guide planning and development decisions across all sectors of government;
- ✚ Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- ✚ Contribute to a coherent, planned approach to spatial development in the national, provincial, and municipal spheres;
- ✚ Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- ✚ Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums, and land holdings of state-owned enterprises and government agencies, and address their inclusion and integration into the spatial, economic, social, and environmental objectives of the relevant sphere;
- ✚ Address historical spatial imbalances in development;
- ✚ Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- ✚ Provide direction for strategic developments, and infrastructure investment;
- ✚ Promote efficient, sustainable, and planned investments by all sectors;
- ✚ Indicate priority areas for investment in land development;
- ✚ Promote a rational and predictable land development environment to create trust and stimulate investment;
- ✚ Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- ✚ Give effect to national legislation and policies on mineral resources and sustainable utilisation

and protection of agricultural resources; and

- ✦ Consider and, where necessary, incorporate the outcomes of substantial public engagement, including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media, and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption, and implementation of any SDF, policy, or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 27: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	<ul style="list-style-type: none"> ✦ Past spatial and other development imbalances must be redressed through improved access to and use of land. ✦ SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements and areas characterised by widespread poverty and deprivation. ✦ Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. ✦ Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. ✦ Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. ✦ In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	<ul style="list-style-type: none"> ✦ Promote land development that is within the fiscal, institutional, and administrative means of government. ✦ Give special consideration to the protection of prime and unique agricultural land. ✦ Uphold the consistency of land use measures under environmental management instruments. ✦ Promote and stimulate the effective and equitable functioning of land markets. ✦ Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. ✦ Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	<ul style="list-style-type: none"> ✦ Land development must optimise the use of existing resources and infrastructure. ✦ Decision-making procedures must be designed to minimise negative financial, social, economic, or environmental impacts. ✦ Development application procedures must be efficient and streamlined, and timeframes must be adhered to by all parties.
Spatial resilience	<ul style="list-style-type: none"> ✦ The flexibility of spatial plans, policies, and land use management systems is necessary to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	<ul style="list-style-type: none"> ✦ All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. ✦ All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. ✦ The requirements of any law relating to land development and land use must be met timeously. ✦ Transparent processes of public participation are incorporated into the preparation and amendment of spatial plans, policies, land use schemes, and development applications to allow all parties to provide input on matters affecting them. ✦ Policies, legislation, and procedures must be set up to inform and empower members of the public.

At the municipal sphere of government, aligned with the SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 9 June 2023) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content entitled "Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans." The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which are subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF, Annual Reviews as part of the IDP review process

Background on the 1st Annual Review, Amendment, and Adoption of the Stellenbosch IDP / MSDF / CEF, 2023, as part of the IDP Process Plans 2023/24 and 2024/25.

The need for all municipalities (metropolitan, local, and district) to have Spatial Development Frameworks (MSDFs) as core components of their Integrated Development Plans (IDPs) has been a legislative requirement for the past 24 years, since the implementation of the Municipal Systems Act, Act 32 of 2000 (MSA). Over the past 24 years, our understanding of the importance of MSDFs has improved. In this period, three further pieces of legislation have been introduced, namely the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), and the Stellenbosch Municipality Land Use Planning By-law (2023), which have further clarified the role and importance of MSDFs. Specifically, these legislations have provided further needed detail on the content of MSDFs and the administrative processes to be followed for review, amendment, and adoption of MSDFs.

Given that the MSA makes it clear that an MSDF (including the Capital Expenditure Framework (CEF) is a core component of an IDP, it follows that the process requirements prescribed by the MSA in respect of an IDP, must apply to an MSDF. In the Stellenbosch Municipality context, the Council approved the commencement of the **proposed review and amendment process** of the Municipal Spatial Development Framework, 2019 (MSDF), and Capital Expenditure Framework, 2021 (CEF) to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. In doing so, an integrative strategic, spatial and financial planning approach was followed to avoid the duplication of efforts and to ensure maximum positive impact from the investment of resources with specific consideration to the adoption of the catalytic projects as approved in the Adam Tas Corridor Local Area Spatial Development Framework, 2022 (ATC LASDF). This resulted in a reviewed and amended MSDF and CEF, which was supported and adopted at a Council Meeting held on 27 June 2023.

The final adopted IDP / MSDF / CEF were incorporated and adopted within the 2022-2027 IDP on 30 October 2023, with confirmation from the Western Cape Provincial MEC for Local Government, Environmental Affairs and Development Planning on compliance with the relevant legislative requirements received on 28 November 2023.

Legislative requirements and process for the Annual Review of the Amended IDP / MSDF / CEF (2023), as part of the IDP Process Plan

Section 34(a)(i) and (ii) of the MSA speaks directly to the need to “review” an MSDF annually in terms of the performance of the municipality concerning the guidance provided in its MSDF, as well as at any time deemed necessary in response to changing circumstances. The annual review allows for proactive monitoring of the implementation of the MSDF while highlighting the need for actions that need to be taken to support the MSDF implementation on a sustained basis. It is also important to note that an **annual review of the MSDF does not necessarily lead to or require an amendment of the MSDF.**

Section 34(b) of the MSA goes on to say that this review of the Amended IDP/MSDF/CEF may result in there needing to be an amendment to the MSDF. If an amendment is required, the process prescribed in Regulation 3 of the Local Government: Municipal Planning and Performance Management Regulation, 2001, must be followed. In addition, the requirements of section 20(3) in SPLUMA, and sections 10, 11, 12, or 13, and 14 of LUPA, and sections 3, 4, or 5 and 10 of Stellenbosch Municipality Land Use Planning By-law (2023) must also be satisfied. It is important to note that when an amendment process is required due to recommendations from the review, or a decision by the Council, this process should be planned for and included in the IDP process plan developed in terms

of sections 28 and 29 of the MSA. Furthermore, it should be noted that the timeframe normally associated with an amendment process for the IDP / SDF / CEF ranges between 24 to 36 months, and upon conclusion, it **does not give any development rights**, and the necessary land development applications should still be submitted with the Division: Development Management for assessment and decision.

To support municipalities with unpacking the legislative requirements and administrative processes, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) and the National Department of Cooperative Governance have issued a practice note and revised IDP guidelines. For the annual review of the Amended IDP/MSDF/CEF (2023), this internal review formed part of the 2024/2025 IDP process plan and was undertaken based on the mentioned practice note and guidelines. Accordingly, and concerning this internal desktop review of the MSDF, the following factors have been considered regarding the performance of a municipality concerning its MSDF, namely:

- ⚡ Are the goals and objectives of the MSDF being reached by the municipality?
- ⚡ Is the direction provided by the MSDF being brought into the compilation or amendments of relevant sector plans, e.g., the Integrated Transport Plan (ITP), Water Services Development Plan, Integrated Waste Management Plan, Air Quality Management Plan, Engineering Services master plans, the Human Settlements plan, etc.?
- ⚡ Is the municipal budget spent in line with the priority development areas identified in the MSDF?
- ⚡ What substantive development permissions (rezoning and subdivisions) has the municipality given in the past financial year?
- ⚡ Are these development permissions aligned with the objectives, principles, and policies set out in the MSDF?
- ⚡ What site-specific deviations did the Municipal Planning Tribunal (MPT) permit? What is the impact of these on the Municipal IDP/Budget/MSDF?
- ⚡ Are implementation actions identified by the MSDF (including the CEF) being brought forward into the IDP, and SDBIPs and where relevant, budgeted for?
- ⚡ Are implementation actions identified by the MSDF (including the Capital Investment Framework) included in the Strategic Plans and/or Annual Performance Plans and Budgets of relevant provincial and national government departments and state-owned entities?
- ⚡ Do prior amendments suggest the municipality needs to commence with a compilation of a new MSDF?

The purpose of an annual review report is to start highlighting and building up a list of what should inform the review of the amended IDP in years 4 and 5, and what should be addressed in the next generation IDP (and MSDF/CEF) to be adopted for the next 5-year term of office. Hence, the review will compile a list of issues to be dealt with when compiling the MSDF for the period 2028-2032.

Methodology and Performance Measurement Assessment for the Annual Reviews of the Amended IDP / MSDF / CEF (2023)

One of the contributing factors to the lack of spatial transformation is that strategic policy seldom leads the implementation agenda of municipalities. Ideally, the infrastructure and built environment programmes of municipalities should align with the spatial objectives of the MSDF, which is the 20-year plan for the management of the physical growth and development of the municipality. The MSDF, as the strategic and integrative spatial planning policy, outlines the municipality's spatial agenda to its service directorates, ensuring that their sector plans, programmes, and projects are grounded in a sound common spatial logic, while the CEF, the municipality's capital expenditure framework over the 10-year planning horizon, enables specific arrangements for prioritisation, mobilising, sequencing and implementing public and private infrastructural and land development investment ensuring maximum

positive impact from the investment of scarce resources as agreed to by all stakeholders, while ensuring financial sustainability.

The Stellenbosch Municipality has, over the last few years, made deliberate efforts to improve municipal policy coherence and the vertical alignment in its intra-municipal planning sphere through a collaborative approach using the Capital Planning Forum (CPF) and the MSDF/CEF mechanisms. This approach enables the municipality's long-term strategic development vision to direct infrastructure implementation in the functional areas and priority development areas of the municipality (i.e., Stellenbosch, Klipmuts, and Franschhoek), whilst remaining conscious of the municipality's financial position and infrastructure planning needs.

The second annual review for the 2025/2026 cycle of the MSDF dealt with the performance monitoring of the implementation programme of the MSDF around specific spatial imperatives and associated development themes, i.e. planning, environment, local economic development, housing, mobility, infrastructure, and community development. The successful implementation of the seven (7) spatial imperatives (also referred to as principles) and guidelines is dependent on related spatial and non-spatial supportive policies, which have specific implications on intra-municipal sector planning. This implies policy alignment across municipal functional areas and services.

Each of the spatial imperatives highlights the supportive intra-municipal directorates and their implications on sector planning across the MSDF implementation programme. For this second annual review process of the implementation programme of the MSDF, which is coordinated by the Directorate: Planning and Economic Development (D: P&ED), Council resolutions adopted by the municipality from 27 September 2023 to date (05/2024) were also analysed. The MSDF 2nd Annual Review Report also evaluated inputs received during the 2023/24 IDP public participation process. One of the inputs received from a consultant requested the inclusion of the Libertas Development Proposal within the urban edge. The report from the consultant further explains the site-specific reasons for the deviation from the Council's spatial policy and the reasons for considering a very specific type of development that the amended IDP/MSDF/CEF did not consider, and which hasn't been catered for within Stellenbosch town. The comments received by the consultant require an assessment of performance measurements (sections 34(a)(i) and 41 of the MSA), and the extent to which changing circumstances demand an amendment (section 34(a)(ii)) to the Municipal Council. It is important to note that **changing circumstances generally refers to circumstances that are out of the control of the municipality that have a substantive impact on the MSDF policies and proposals**, and could include e.g., changes in legislation, policy, norms or standards, disasters, trigger points being reached in terms of certain parameters, significant proposal for development in the municipal area that will result in significantly changed human settlement needs, socio-economic needs or altered natural environments, change in population growth, change in political leadership and new information etc.

In addition, the consultant has submitted the required land development applications, however, it is important to state that the motivation for the site-specific deviation forms part of the land development application, which is currently being processed by the Division: Development Management. Accordingly, the comments and recommendations expressed in the MSDF review report focus on the assessment of performance measurements as stipulated in sections 34(a)(i) and (ii) of the MSA, and they do **not** deal with the merits of the site-specific deviation application. The submissions from the consultants were assessed in terms of the performance measurements as detailed in the Implementation Programme (refer to Chapter 6) of the Amended MSDF/CEF, 2023.

The second annual review report of the Amended IDP/MSDF/CEF, 2023, was served before the Council on 30 October 2024. Council was requested to consider, support and adopt the report, and to adopt the recommendation to not commence with the amendment process in terms of Section 34(b) of the MSA to amend the MSDF/CEF (2023). Council resolved to **adopt the second annual review report** and to **not commence** with the administrative process to amend the MSDF/CEF (2023) in terms

of Section 34(b) of the MSA. It is also imperative to note that, subsequent to the outcomes of the review report, the site-specific deviation and other related land development applications for the Libertas Development Proposal have been **withdrawn** by the applicant.

The **third annual review report for the 2026/27** cycle of the Amended IDP/MSDF/CEF, 2023, will be informed by key spatial planning initiatives identified and scheduled in the MSDF implementation programme for the financial year 2025/26. These key spatial planning initiatives include the **development of Local Spatial Development Frameworks** (LSDFs) and the review and update of the Capital Expenditure Framework (CEF).

Ideally, each of the settlements in the municipal area should have a Local Spatial Development Framework (LSDF), with the priority determined by the position and role of the settlements in the SM settlement hierarchy. These localised spatial planning initiatives require public, and private landowners in key areas to plan and coordinate collectively (beyond individual property boundaries and interests) and to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on. Considering the MSDF settlement hierarchy, and based on intra-departmental and public consultations, including the number of land use applications being submitted, the current **top priority LSDFs** were identified as **Koelenhof** (new priority development node) and the **Dwarsrivier Valley** (including the small towns of Kylemore, Lanquedoc, Johannesdal, Groot Drakenstein - Meerlust, and surrounding rural areas). The prioritisation was presented and supported by Council in the second annual MSDF review report, and the subsequent supply chain processes were followed with service providers being appointed to undertake the development of these LSDFs over the next 5 – 10 months. The Koelenhof LSDF is a private-public-partnership initiative driven by the private landowners within the priority development node and envisaged to be completed within this financial year (2025/2026).

The third annual review report will also evaluate inputs received during the 2025/26 IDP public participation processes for the expansion of the urban edge to allow further developments. The comments received by the consultants require an assessment of performance measurements (sections 34(a)(i) and 41 of the MSA), and the extent to which changing circumstances demand an amendment (section 34(a)(ii)) to the Municipal Council. The comments received will be assessed based on the performance measurements as detailed in the Implementation Programme (refer to Chapter 6) of the Amended MSDF/CEF, 2023. The consolidated report on the MSDF/CEF public participation input and comments received will be presented to Council as per the IDP Process Plan 2026/27 after the public participation process has been concluded for the CEF.

The purpose of the third annual review report will be to further ensure and report on the implementation programme roll-out of the Amended IDP/MSDF/CEF, 2023 and continue with the list of what should inform the review of the amended IDP in years 4 and 5 and what should be addressed in the next generation IDP (and MSDF/CEF) to be adopted for the next 5-year term of office. Hence, the review will compile a list of issues to be dealt with when compiling the MSDF for the period 2028-2032.

The sections below provide an overview of the spatial challenges, opportunities, spatial proposals, strategic focus, spatial principles, implementation framework, policy frameworks, catalytic initiatives, etc. as reflected in the SDF over the longer term

The Spatial Challenges and Opportunities identified in the SDF

The Stellenbosch Municipality's SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development—primarily land use activities and associated structures, both new and existing—shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and

maintenance of the unique sense of place of the settlements and surrounding lands that constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without re-stating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 28: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	<ul style="list-style-type: none"> ⬆ The degradation of key ecological assets and the loss of productive agricultural land have been ongoing. ⬆ The condition of the river systems within the municipality has deteriorated. ⬆ Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This, in turn, will impact agricultural production, scenic landscapes, the liveability of urban areas, and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	<ul style="list-style-type: none"> ⬆ The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. ⬆ The ability of the economy to absorb growth, particularly concerning job creation, is concerning. ⬆ The informal sector will continue to provide livelihoods to a significant proportion of residents. ⬆ The growing youthful population, large student population, and seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. ⬆ Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant, and current development patterns are not addressing the issue. ⬆ Crime rates remain high, and the market response, i.e., private security provision for those who can afford it, is likely to exacerbate inequality. ⬆ Upgrading and providing basic services and housing will remain the focus of the municipality, including other government agencies, for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved placemaking. ⬆ The municipality's inability to provide basic services (e.g., refuse removal) leads to dumping, environmental degradation, and resulting health-related problems.
Built environment context	<ul style="list-style-type: none"> ⬆ Infrastructure backlogs—especially in poor areas—and essential municipal infrastructure require significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management, and solid waste disposal). ⬆ The need for housing and shelter—both for the lower-income groups and those with employment—has not been adequately met. The existing housing pipeline will not meet the needs of those requiring state assistance, and little is built that is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as the daily inward commuting of ordinary workers and students, is likely to continue. ⬆ Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen. ⬆ Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, among other inefficiencies. ⬆ The new high-density development mostly focuses on the student market and target groups using private vehicles. ⬆ Numerous heritage resources located within the settlements are assets of immense value. Many of these are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy. ⬆ The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement. ⬆ The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klapmuts presents very significant opportunities for the future development of Stellenbosch, Klapmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality

Theme	Spatial Challenges
	<p>should focus maximum effort on utilising the opportunity presented to address the needs of the town.</p> <p>✚ Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low-occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns.</p> <p>✚ This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary for most of the population. The regional focus on private vehicle growth has an adverse consequence for managing transport at the localised level, where trips are generated.</p> <p>✚ The provision of public transport, non-motorised modes, and travel demand management programmes is generally considered a local municipal function and not a core responsibility or competency of the provincial government. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions.</p> <p>✚ The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.</p>
Institutional context	<p>✚ The limited capital budget of the municipality, given the extent and depth of community needs.</p> <p>✚ Limited funds to address critical issues, especially those related to infrastructure augmentation and maintenance, place the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs.</p> <p>✚ Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area.</p> <p>✚ The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments.</p> <p>✚ The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects.</p> <p>✚ Sector planning remains fragmented, and most developments follow a business-as-usual pattern.</p>

4.5 The Spatial Proposals of the SDF

4.5.1 Spatial development 20 - year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people.

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.5.2 The Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

Table 29: IDP Strategic Focus Areas and the SDF

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature, and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development and overcome inequity and exclusion.	 Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement.  A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunities.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, in institutions, and in play.	Denser settlements with diverse activities to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities, and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, who experience limited access to opportunity because of restricted material resources.
SFA5: Good Governance and Compliance	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices, in a manner that assists its internalisation by all.

4.5.3 The Spatial Principles / Imperatives of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch Municipality's natural environment and farming areas

-  The spatial policies that relate to this principle focus on protective actions, also called urban management.
-  The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
-  Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy) and rural guidelines.
-  Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.

Respect, preserve, and grow our cultural heritage

-  The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., scenic landscapes, scenic routes, and special places of arrival, while also focusing on improving the landscape and public amenities associated with these cultural assets.
-  The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.

- ✦ As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development.

Direct growth to areas of lesser natural and cultural significance as well as movement opportunity

- ✦ The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy.
- ✦ In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include informal settlement upgrading, residential densification and infill development, mixed land use and improved economic opportunity, improved access and mobility, improved access to community facilities, and improved landscaping and public amenities.

The spatial policies are spatially targeted in priority development areas and include Baden Powell and the Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts

- ✦ The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected while ensuring that the capacity of existing infrastructure can accommodate change and growth.
- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above) to:
 - a) Minimise associated impacts on the environment, agricultural land, and natural resources.
 - b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the availability of existing public facilities and commercial opportunities.
 - c) Maximise the sustainability of new facilities and commercial opportunities.
 - d) Enable the provision of infrastructure most efficiently and cost-effectively.
 - e) Minimise the need for inter-settlement movement.
 - f) Maximise opportunity for and use of non-motorised and public transport.
 - g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
 - h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality that appropriately serves regional mobility needs and local-level accessibility improvements.
- ✦ The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.

Ensure balanced, sustainable communities

- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge) work towards and maintain, for each settlement, a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- ✦ Adopting a conservative view towards the extension of existing urban edges over the SDF period.

- ✦ Actively support infill development and adaptive reuse of existing structures.
- ✦ Support increased densities in new, infill, and redevelopment projects.
- ✦ Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.
- ✦ Support the general upgrading and transformation of existing informal settlements.
- ✦ Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- ✦ Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- ✦ Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- ✦ Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- ✦ Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, ensuring walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunities and address present risk

- ✦ The spatial policies focus on major development efforts concerning new mixed-use, industrial, and residential developments, and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 23: Consolidated Concept for the Municipal Area (Approved November 2019 and 27 June 2023)

4.6 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the SDF, a high-level implementation framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital investment and budgeting processes moving forward. The SDF and CEF Implementation Framework comprise the following sections:

- A proposed settlement hierarchy to inform and guide the investment rationale (linked to plans and settlement proposals);
- Priority development areas and themes;
- A policy framework (linked to strategies);
- Guidelines, studies, and information supporting the policies;
- Implications for sector planning and specific development themes, including:
 - Environmental and rural area management
 - Movement;
 - Housing; and
 - Local economic development;
- Land use management guidelines and regulations;
- Implications for inter-municipal planning;
- Catalytic initiatives;
- Further planning work;
- Institutional arrangements;
- Checklists in support of decision-making;
- A municipal leadership and advocacy agenda related to spatial development and management;
- Capital Expenditure Framework; and

Monitoring and review.

4.6.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development—at a broad level—is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in the figure below, with the detailed description provided in the table:

The spatial areas for priority development over the SDF planning period are:

- Stellenbosch Town;
- Klapmuts;
- Koelenhof (new priority development area); and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g., through clustering, framing them with infill development to improve edges and surveillance, prioritising landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 24: Functional and priority development areas (CEF, June 2023)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement, is a significant centre comprising extensive education, commercial, and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities outlined in the table below.

Table 30: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	<ul style="list-style-type: none"> Broadening of residential opportunities for lower-income groups, students, and the lower to middle housing market segments. Upgrade of informal settlements. Retention of university functions in the town. Enablement of the Adam Tas Corridor. Sensitive residential infill and compaction. Drive to establish "balanced" precincts. Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts	Focus on economic development (using a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities.	<ul style="list-style-type: none"> Support for the development of RE / Farm 736 as a lever to economic development, utilising a favourable location for manufacturing, logistics, and warehousing enterprises. Balanced housing provision in Klapmuts South is focused on those who can benefit from employment provision through unlocking Klapmuts North. Establishing the Klapmuts town centre. NMT improvements.
Franschhoek	Secondary service centre, significant tourist destination, and place of residence.	<ul style="list-style-type: none"> Upgrade of informal settlements. NMT improvements. Sensitive infill within the urban edge provides inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). Retention of historic character.
Secondary urban settlements		
La Motte	Contained rural settlement.	<ul style="list-style-type: none"> Diversification of existing activities to curtail the need for movement. Sensitive location of diversified uses closer to the R45. Limited further housing development.
Wemmershoek	Contained rural settlement.	<ul style="list-style-type: none"> Possible extension of residential opportunity linked to re-use of the sawmill site and local employment opportunity.
Groot Drakenstein	Contained rural settlement.	<ul style="list-style-type: none"> Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley	Contained historic rural settlements.	<ul style="list-style-type: none"> Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek	Contained, but a dispersed collection of institutional, recreational, and residential uses.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei	Contained rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof	Contained rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg	Contained rural settlement.	<ul style="list-style-type: none"> Gradual expansion of a unique development model based on sustainable living and education.
Lynedoch	Contained village and institutional clusters.	<ul style="list-style-type: none"> Containment and limited expansion of existing offerings.
Spier	Contained tourism and cultural centre.	<ul style="list-style-type: none"> Protection of unique historic settlement structure and form.
Raithby	Contained historic rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
New Priority Urban Settlements		

Settlement	Role	Development and Land Use Management Focus
Koelenhof	Emerging node (priority development area)	↓ Potential future consolidated, inclusive settlement linked to rail / bus.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden-Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements offering a range of opportunities. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for significant development over the SDF period. Koelenhof has shown significant growth and opportunities for development within the SDF over the medium term.

The focus on Stellenbosch town and Klapmuts does not exclude all development efforts in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth, as the preconditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klapmuts.

What should be emphasised in Franschhoek, and smaller settlements, is improving conditions for existing residents and natural growth within the context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.6.2 Policy Framework

The table below sets out specific spatial policies to support the SDF concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each "frames" the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policies and guidelines is often dependent on related, supportive, non-spatial policies. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines that begin to frame the work to be undertaken or continued in support of proposed policies.

Table 31: Specific work guidelines

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	<ul style="list-style-type: none"> As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the "urban" component of existing forestry settlements (for example, Jonkershoek and La Motte). Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate. 	<ul style="list-style-type: none"> Proactively maintain and upgrade municipal infrastructure services to limit / mitigate the risk to ecological services. Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. Support initiatives by the private sector to extend environmental stewardship. Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically located land for land reform purposes. Support initiatives to utilise municipal-owned agricultural land for small-scale agriculture, forge partnerships with non-governmental or public benefit organisations to assume management responsibilities for commonages and provide basic agricultural services to commonages. 	<ul style="list-style-type: none"> Prepare and implement management plans for municipal nature reserves and other ecological assets. Prepare and implement invasive species control plans for municipal properties. Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. Develop resource-efficient strategies for all municipal services and land and building development (e.g., compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of ecological integrity, secure natural resources, and protect agricultural land of high value. Delineate and manage urban edges and watercourse setbacks in a manner that diverts urban growth pressures away from important natural and agricultural assets. Apply biodiversity offsets in cases where development in areas of endangered and irreplaceable biodiversity cannot be avoided. Actively engage with adjoining municipalities and provincial governments to ensure that the integrity of SM's natural environment is maintained (specifically regarding land use management in adjoining municipal areas).

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
2.	Respect, preserve and grow the cultural heritage of SM.	<ul style="list-style-type: none"> • Preserve significant cultural and historic assets within the municipality and grow the opportunity for new or emerging forms of cultural expression through expanding the use of existing cultural assets or supporting new uses for areas or structures of historic value. • As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development. • Support alternative uses for historic structures and places that will enable their preservation (subject to adherence to the general SDF strategy and policies). 	<ul style="list-style-type: none"> • Support the transfer of municipal assets of cultural and historic value to organisations geared to manage these assets sustainably in the interest of the broader community. • Manage heritage places and structures in terms of the recommendations of municipal heritage studies. 	<ul style="list-style-type: none"> • Maintain and utilise municipal and intergovernmental evaluation and mapping initiatives to inform land-use decision-making supportive of cultural integrity and secure historic places and structures. • Actively engage—continuously—with adjoining municipalities and the provincial government to ensure that the integrity of SM's heritage is maintained (specifically regarding land use management in adjoining municipal areas).
3.	Direct significant growth or new development in SM to areas: <ul style="list-style-type: none"> • Not identified as having the most critical natural or cultural significance. • Where the most opportunity exists in existing infrastructure investment, whether reconfigured, augmented, or expanded. 	<ul style="list-style-type: none"> • Prioritise the targeted settlements on the Baden-Powell-Adam Tas-R304 corridor for growth / new development. • Over the SDF period, focus on Stellenbosch town and Klapmuts to accommodate significant new growth. 	<ul style="list-style-type: none"> • Align the policy and planning of all municipal services to support accommodating significant growth and new development as proposed in specific areas. • Progressively utilise the municipality's significant asset of land as a resource to direct major growth or new development to areas not identified as of the most critical natural or cultural significance. • Allocate municipal funds for land acquisition in areas identified as most suitable for growth or new development (specifically for development as lower-income housing). 	<ul style="list-style-type: none"> • Together with the WCG, undertake inter-service investigations to determine the exact location, size, nature, and form of new settlement areas to accommodate new growth. • Develop specific framework planning, land use management, infrastructure, financial, and urban design provisions, and directives to ensure the optimal development of identified settlement areas to accommodate new growth.
4.	Clarify and respect the different roles and potentials of settlements in SM and maintain the identity of each.	<ul style="list-style-type: none"> • Ensure that each settlement – large and small – remains a distinct entity, surrounded by natural open space and agricultural land. • Maintain a clear hierarchy of settlements that (in general terms) focuses on new growth and development in larger settlements to: <ul style="list-style-type: none"> – Minimise associated impacts on the environment, agricultural land, and natural resources. – Maximise livelihood opportunities by building on the 	<ul style="list-style-type: none"> • Align the policy and planning of all municipal services to support the proposed settlement hierarchy and development / management approach. • Reinforce the role of Stellenbosch town as a regional service and tourism centre focused on higher-order educational, health, government, and commercial uses, as well as unique historic assets. • Reinforce the role of Klapmuts as a potential regional logistics / warehousing / manufacturing hub – with associated residential opportunity—based on its location at the intersection of 	<ul style="list-style-type: none"> • Support the re-location of land extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town to Klapmuts. • Maintain the nature and form of small rural settlements while enabling small changes towards improving livelihood opportunities.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		<p>availability of existing public facilities and commercial opportunities.</p> <ul style="list-style-type: none"> – Maximise the sustainability of new facilities and commercial opportunities. – Enable the provision of infrastructure most efficiently and cost-effectively. – Minimise the need for inter-settlement movement. – Maximise the opportunity for and use of non-motorised and public transport. <ul style="list-style-type: none"> • Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily). • Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements. 	<p>the N1 and regional north / south movement routes.</p> <ul style="list-style-type: none"> • Maintain Franschhoek as a centre for tourism and culture with limited growth potential. 	
5.	<p>Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.</p>	<ul style="list-style-type: none"> • Actively promote compact, dense, mixed-use development that reduces car dependence and enables and promotes the use of public and NMT. 	<ul style="list-style-type: none"> • Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel and public transport solutions. • Establish measures to ensure that there is an inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and the development / management approach to be followed concerning different sections of the municipal movement network. • Work with the provincial and national governments to affirm the proposed categorisation of movement forms and associated infrastructure and management needs in Stellenbosch. • Proactively seek management of travel demand among key stakeholders in SM in such a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. • Proactively allocate resources to improve NMT in the municipal area. • Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klappmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor. 	<ul style="list-style-type: none"> • Assess future transport development / improvements concerning the impact on the complete settlement system. • Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	<ul style="list-style-type: none"> • Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. • Adopt a conservative view towards the extension of existing urban edges over the SDF period. • Actively support infill development and the adaptive reuse of existing structures. • Support increased densities in new, infill, and redevelopment projects. • Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing. 	<ul style="list-style-type: none"> • Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. • Shift more transport resources to the development and operation of effective public transport services and the comprehensive provision of NMT. 	<ul style="list-style-type: none"> • Review the delineation of restructuring zones to support the mSDF objectives. • Support development that emphasises public transport / NMT as opposed to private vehicular use. • Integrate spatial planning, transport planning (emphasis on public and NMT), and social facility planning. • Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. • Actively engage – continuously – with adjoining municipalities and provincial government to ensure that the integrity of SM's settlements as contained, and balanced communities is maintained (specifically about land use management in adjoining municipal areas).
		Support the general upgrading and transformation of existing informal settlements.	<ul style="list-style-type: none"> • Prioritise basic residential services for poor households, specifically in informal settlements and backyard dwellings, and a minimum level of basic services for marginalised rural settlements. • Resist existing informal settlements as the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practices are followed to maintain existing infrastructure investments and prevent greater replacement costs in the future. • Reinforce basic service delivery with good-quality urban management to support household and economic asset development. 	<ul style="list-style-type: none"> • Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner that secures tenure).
		Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.	<ul style="list-style-type: none"> • The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies. 	<ul style="list-style-type: none"> • Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
				housing in Stellenbosch town.
		Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.	<ul style="list-style-type: none"> Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. Focus on fewer but better social facilities. 	<ul style="list-style-type: none"> Cluster social facilities. Locate facilities in association with public space and public and NMT routes.
		Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g., river corridors).	<ul style="list-style-type: none"> Prioritise open / public space development in poor and denser neighbourhoods of the municipality. Reinforce open / public space with good quality urban management to ensure use and safety. 	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
		Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.		<ul style="list-style-type: none"> Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access, which detract from the viability of established commercial and work areas and lock out small entrepreneurs.
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the SDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentive package to support private and community sector partnerships in achieving the SDF principles and proposals.	<ul style="list-style-type: none"> Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communicate and guidelines. Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: <ul style="list-style-type: none"> Unlocking development in Klapmuts North. The Adam Tas Corridor (in Stellenbosch Town). 	<ul style="list-style-type: none"> Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. Align municipal infrastructure and social services planning to support development in catalytic areas. Use municipal and government-owned land assets to support development in catalytic areas. 	<ul style="list-style-type: none"> Ensure that catalytic areas are developed as inclusive, appropriately serviced communities, negotiable through NMT, and exhibit a positive relationship with surrounding nature and agricultural land. Prepare land use management measures to enable development in catalytic areas. Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.

4.7 Catalytic Initiatives

Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone (20 October 2024)

Large industrial spaces, including land that was formerly home to Cape Sawmills and Distell facilities, make up the most strategically located land in Stellenbosch town. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces, at scale, can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor, which includes the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the disused Cape Sawmills site to the west of Kayamandi and Cloetesville along the northern part of this corridor.

Figure 25: Adam Tas Corridor Local Areas SDF (October 2022)

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier / severance effect of the R44 and the railway line. Much of the area was historically used for light industrial and manufacturing purposes. It includes the disused Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, the Bergkelder complex, the Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis and high density and should favour non-motorised ("NMT") access to

the centre of Stellenbosch Town. It is estimated that the Adam Tas Corridor, through a preliminary development conceptual framework, will produce approximately 3 million square metres of bulk within a 293-hectare area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement), as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling, and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogeneous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift the new development focus to the west of town, with the Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- Investigating options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on NMT;
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, while also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character, and activity (as re-purpose offers the opportunity for a great variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment, in terms of the concept, offers the opportunity to:

- Re-imagine the future use of the land encompassed in the ATC;
- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift new development focus to the west of town, with Die Braak and Rhenish complexes forming the centre and seam between the new west and east of Stellenbosch town;
- Investigate options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on non-motorised transport; and
- Accommodate uses that meet urgent needs, specifically higher-density housing and university expansion, as well as assisting in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing businesses can gradually relocate to the north, closer to the N1 logistics corridor (as Distell has planned for their operations).

A Local Spatial Development Framework ("LSDF") for the Adam Tas Corridor, as well as comprehensive development guidelines, were formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3–20 years. This LSDF includes an implementation framework that will guide the following:

- Most appropriate land use strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling interventions.

Following the implementation framework, the overlay zone for the Adam Tas Corridor has been approved and gazetted (2024) and has been included as a local area overlay zone in the Stellenbosch Municipality Zoning Scheme Bylaw, 2024 (04 October 2024). The purpose of the overlay zone is to award the zoning rights envisaged by the Adam Tas Corridor LASDF to the individual land portions, together with the conditions applicable to each property, for the landowner to take up these rights. This initiative was awarded with the WCG Service Excellence Awards 2024 in the category "Ease of Doing Business" on the 19th of April 2024.

Institutional arrangements are critical, which include all spheres of government, private stakeholder involvement, and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts. The landowners collectively and the municipality entered into a Memorandum of Understanding (MOU) confirming the spatial vision and implementation of the ATC LASDF. The Council approved the MOU in August 2022.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LASDF and development guidelines, a project facilitation unit (PFU) needs to be established. The purpose of the PFU is to coordinate, plan, and assist with the implementation of development along the Adam Tas Corridor. The purpose of the PFU is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas Corridor. The establishment of the unit is currently being investigated and was earmarked to be set up by 30 June 2024, however, challenges arose, and the set-up of the PFU is still ongoing. The Western Cape Economic Development Partnership (EDP) was appointed by the Council to assist the municipality in setting up the PFU and Steering Committee.

Considering the capital infrastructure investment requirements for the ATC, the municipality and the landowners collectively agreed on the phasing of the ATC over the next 10 years. Over the short term (1-5 years), the first phase of the ATC was agreed to be precincts 2–6, including a portion of precinct 10, whilst the planning and infrastructure demand quantification for the rest of the precincts (including the remaining extent of precinct 10) are considered in the CEF's capital expenditure programme (2023) and the capital infrastructure investment portfolio. The amendment of the CEF as part of the MSDF, 2023, and the reviews enable the municipality to strategically plan based on an understanding of the catalytic projects that are necessary to meet the needs of the municipality, including ensuring the allocation of resources is financially sustainable, whilst also achieving the goals of the municipality.

4.7.1 Development of Klappmuts

The Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF) contains very specific policy directives related to Klappmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

- Using infrastructure assets (e.g., key movement routes) as "drivers" of economic development and job creation;

- ✚ Recognition that existing infrastructure in the area (i.e., N1, R101, R44, and the Paarl-Bellville railway line and station) dictates the location of certain transport, modal change, or break-of-bulk land uses;
- ✚ Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a “consolidated platform for the export of processed agri-food products (e.g., inland packaging and containerisation port)” and “an inter-municipal growth management priority”;
- ✚ The consolidation of and support for existing and emerging regional economic nodes as they offer the best prospects to generate jobs and stimulate innovation;
- ✚ The clustering of economic infrastructure and facilities along public transport routes;
- ✚ Maintaining valuable agricultural and natural assets; and
- ✚ Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM, as it is located on the N1 transport corridor, which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

The MSDF targets significant new mixed-use development, new residential development, and the associated access and mobility infrastructure provisions to reinforce the significant new regional economic role of Klapmuts as identified by the Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF). The GCMRSIF and the MSDF reinforce Klapmuts as a potential regional logistics/warehousing / manufacturing hub—with associated residential opportunities – based on its location at the intersection of the N1 and regional north/south movement routes. From a contextual perspective, it is also important to note that to unlock the development potential of the ATC, the municipality must actively support the relocation of land for extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town towards Klapmuts.

One of the catalytic initiatives identified and supported by the MSDF is the “Innovation Precinct” or “Smart City” in Klapmuts South. The proposed urban development concept by Osmond Lange Architects and Planners has been incorporated into the MSDF since 2019, and significant progress has been made in the MSDF review process.

Figure 26: Concept Development Framework

Figure 56. The proposed Klapmuts “Innovation Precinct” Concept (Osmond Lange Architects and Planners)

Based on the development framework, the following development management applications have

been considered by the Directorate: Planning and Economic Development over the review period as part of the planning and implementation of the smart city catalytic initiative – now known as “The Bridge”. The development rights approved by the municipality are reflected in the figure below:

Figure 27: Portion of Farm 742 and Portion of Farm 744

Phase 1 of the development has commenced, with the establishment of the Industrial Park, located next to the N1.

Through the land use planning process, it was highlighted that the urban edge does not fully align with the final approved development. The amendment of the urban edge is minor as it only encompasses the inclusion of Portion 19 (0.69 ha) as indicated on the approved consolidated plan. The phasing of the development provides for sufficient time to incorporate this as part of the future amendment MSDF process.

Several inter-municipal and inter-governmental issues require specific care in managing the development of Klapmuts over the short to medium term.

Various supporting functions across the intergovernmental spheres are required to reinforce the significant new regional economic role of Klapmuts. A critical issue related to Klapmuts is the split administration between Drakenstein Municipality (DM) and Stellenbosch Municipality (SM). One of the supporting actions considered and identified by the MSDF includes the application to the Municipal Demarcation Board (MDB) for the redetermination of the municipal boundaries in a manner where Klapmuts North (DM administration) and Klapmuts South (SM administration) fall within one municipal demarcation. In this regard, Klapmuts is functionally more related to SM; extensive investments have been made in infrastructure and social services for the community in Klapmuts by SM. Accordingly, when the municipal redetermination process commenced in 2023, the Council considered and made representations to the MDB for the inclusion of Klapmuts North into the Stellenbosch municipal area. One of the outcomes that the municipality tried to achieve with the municipal redetermination process was to ensure integrated and coordinated planning and infrastructure delivery by all relevant stakeholders.

Unfortunately, the process was unsuccessful and accordingly, other appropriate remedies to resolve the critical intergovernmental cross-boundary issues and conflicts need to be investigated. It is also critically important to note that the DM, through the amendment of the MSDF (Drakenstein MSDF 2024/25), has further extended its urban edge adjacent to Klapmuts with 1600 ha of greenfield development for the purpose of extensive new developments. Substantial infrastructure investments will be required as the area currently lacks bulk infrastructure services;

- ✚ The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road, and a possible NMT crossing over the N1, linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunities enabled north of the N1; and
- ✚ The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

In addition to the municipal cross-boundary development planning earmarked for Klapmuts, it is important to note that various intergovernmental joint planning is currently being undertaken through the Intergovernmental Steering Committee (ISC) of the GCMRSIF. Due to the increased urban development demand for the N1 from the City of Cape Town, Stellenbosch Municipality, and Drakenstein Municipality, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP)—custodian of the regional spatial implementation framework—has, in collaboration with the National Department of Agriculture, Land Reform and Rural Development (DALR&RD), initiated discussions on funding a regional spatial development framework in line with one of the key actions contained in the Greater Cape Town Region National Spatial Action Area (GCTR NSAA). The parties concerned have agreed that, due to the existence of the GCMRSIF, the funding allocated should further involve technical work around an infrastructure analysis, including localised inter-municipal scenario planning exercises for the N1 corridor. The completion of this study is extremely important as the urgent need to coordinate an agreed long-term strategic vision, including the coordination, prioritisation, and sequencing of investments, will unlock the development potential of Klapmuts and the Cape Functional Region. The study has commenced, with participation from the municipality and the due date for completion is planned in December 2026.

4.7.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor, to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock—possibly in the form of a “tram” system—has been suggested, offering the advantage of safe at-grade crossing of the rail line and other modes of transport, in turn, enabling “lighter” infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus of significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form, while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vloottenburg along the Baden-Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.8 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management, organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Directorate: Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- ✦ The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, annual reports, annual IDP reviews, future municipal IDPs, and so on;
- ✦ The annual review of the SDF is part of the IDP review process;
- ✦ The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- ✦ The extent to which the main argument and strategies of the SDF inform land use management decision-making;
- ✦ Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- ✦ The mutual responsiveness of the SDF and national, provincial, and regional plans, programmes, and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above the institutional arrangements in place, it appears that two aspects require specific focus in support of the SDF.

4.8.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the SDF, SM (and other adjoining municipalities) appear to be experiencing increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for “both sides” of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

4.8.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- ✚ The municipal human and financial resource base is simply too small to achieve the vision of the SDF or implement associated strategies and plans;
- ✚ Many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives;
- ✚ It is increasingly evident that individual landowners are finding it difficult to develop—to make the most of what they have—individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- ✚ Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- ✚ The municipality's focus is often – and understandably so – on the “immediate”, or shorter-term challenges. Much of what is needed to implement the SDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

4.8.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden-Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical preconditions for significant development include:

- ✚ The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- ✚ Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- ✚ Understanding to what extent settlements can provide local employment and, in this way, minimise the need for transport to other settlements.

4.8.4 Other Local Planning Initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the SDF in more detail. The position and function of settlements in the SM settlement hierarchy should determine the priority for LSDFs. The municipality aims to procure the services of a service provider to compile a series of local spatial development frameworks over the next three years for ten of the priority nodes (both urban and rural). The aim is to compile localised planning and development outcomes that need to address the following:

- ✚ Spatial and design frameworks, plans, and strategies;
- ✚ Social service delivery plans and interventions; and
- ✚ Innovative and interactive engagement and public participation processes.

These localised spatial planning initiatives require public and private landowners in key areas to plan

and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on. Based on consultations with the Division: Development Management and upon review of the land use application being submitted, the current top priority LSDF is identified for Koelenhof, followed by the Dwars River area.

In addition to the aforementioned, a number of precinct plans for specific areas as identified in the MSDF have been completed and are in the process of being finalised by initiatives driven by the municipality and private property owners. The Rhenish Complex and Surroundings Precinct Plan was initiated by the municipality and adopted by the Council on 29 November 2023. The precinct plan includes an urban design framework that aims to guide the future utilisation, preservation, and development of the study area with a specific view to unlocking the potential of the area, which plays an important role as a key site of cultural and heritage significance.

The Franschhoek Development Framework, contained in the MSDF, further identified an area in Groendal for “strategic sites, projects, and / or infill opportunities”, and the development of a precinct plan. A spatial and urban design framework for a specific area within the strategic site has been commissioned by the landowners of Klein La Provence. In the drafting of the proposed spatial and urban design framework, the municipality required that the precinct plan consider the relationship of the site to its broader context and setting while also being replicable across similar contexts. The precinct plan is currently being finalised and will be made public in due course.

4.8.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning—public and private—with the SDF, it is proposed that a “checklist” of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared “culture” could be established where key tenets of the SDF are considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist be followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues are addressed and discussed to enable decision-making in line with the SDF and broader provincial and national planning policies. If, in assessing a proposal or project, posing a question results in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the SDF review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key SDF strategies and policies, be packaged in an easy-to-use and accessible form to facilitate wide usage.

4.8.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the SDFs or implement associated strategies and plans. Also, many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily

own the land associated with projects critical to achieving SDF objectives.

Even if the municipal budget is increased tenfold, or its staff resources are significantly enhanced, it would still not have the control to do what is needed to drive critical projects. The municipality's focus is often—and understandably so—on the "immediate," or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed-upon objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop and make the most of what they have, individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources—and is overburdened with varied demands in different locations—to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses on the side of the municipality to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record of achieving urban development / management objectives (e.g., Historiese Huise). Their work can be expanded to assist in meeting new challenges, in partnership with the municipality.

A formal Memorandum of Agreement exists between Stellenbosch municipality and the Stellenbosch Heritage Foundation to host the Heritage Inventory on the GIS system and to give free public access to the system until such a time as the municipality can do so. The Heritage Inventory is also being updated through a phased approach by the Department: Development Planning.

To strengthen the ability of the Directorate: Planning and Economic Development to manage development taking place within the Franschhoek and Stellenbosch historical cores and along the scenic routes in the rural landscape, the Council appointed a Conservation Advisory Committee to evaluate, consider, and make recommendations to the Directorate with respect to new developments and alterations to the existing built environment. This committee consists of registered architects and experts in the field of cultural and historic environments.

The municipality owns several significant historical properties in Stellenbosch that require proper maintenance and appropriate uses that should support and enhance the tourism sector. To assist the municipality in managing these assets, the Council is in the process of outsourcing the responsibility to maintain, manage, and lease some of the buildings to Historiese Huise of South Africa. This partnership will ensure the proper maintenance of historical landmarks and appropriate use that will ensure public access, and support for the tourism sector will be obtained.

CHAPTER 5:

Performance Summary of the 5th Generation IDP 2022 – 2027

5.1 Introduction

The performance reporting on the IDP deliverables for the period 2022 – 2027 of the 5th Generation IDP 2022 – 2027 encompasses the cycle of 01 July 2022 to 30 June 2027.

The reporting focuses on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio, and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were reviewed in January 2026 in consultation with all internal departments to ensure effective planning and implementation for the 2026/27 and the outer financial years, as well as reflecting on the performance for the 2024/25 and 2025/26 financial years.

The overall assessment of actual performance against targets set for the IDP deliverables, as documented in the various sections of the IDP document, is illustrated below:

5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027

Twenty - two (22) IDP deliverables are linked to the Municipal Manager's Priorities across directorates and are measured for the period 2022 – 2027. In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, while 1 (14.29 per cent) was not achieved. In Year 2 (2023/24), 2 (50 per cent) of the four IDP deliverables were completed, and 2 (50 per cent) were not achieved.

In Year 3 (2024/25), a total of six (6) IDP deliverables were recorded, of which 4 (66.67 per cent) were achieved, and 2 (33.33 per cent) were not achieved.

In addition, for Year 4 (2025/26), five (5) IDP deliverables were planned for the 2025/26 financial year. To date, 3 (60 per cent) are in progress for implementation to be reported by 30 June 2026, and 2 (40 per cent) have not yet been measured.

The overall performance against the 22 IDP deliverables linked to the Municipal Manager's Priorities reflects a steady implementation progress over the five – year cycle, with the majority of targets achieved each financial year, subject to the implementation of IDP deliverables for Year 4 for the current reporting timeframe of 2025/26.

Graph 12: Number of Municipal Manager Priorities achieved for 2022 – 2027

5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027

Executive Mayoral Outcome 1: Clean, accountable, and responsive local government has a total of 28 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not met. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not achieved.

In Year 3 (2024/25), all 7 (100%) of the IDP deliverables have been met. In Year 4, seven (7) IDP deliverables have been set for the 2025/26 financial year, with 1 (14.29 per cent) achieved and 6 (85.71 per cent) to be reported on by 30 June 2026.

A consistently high level of implementation performance is reflected over the reporting period with 85.71 per cent of targets met in Year 1 and Year 2, and hundred percent achievement in Year 3.

Graph 13: Executive Mayoral Outcome 1: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area has a total of 40 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (70 per cent) of the ten (10) IDP deliverables were achieved, and 3 (30 per cent) were not met. In Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the ten (10) IDP deliverables

were achieved. A total of 10 IDP deliverables were set for Year 4 (2025/26) with 1 (10 per cent) achieved, 1 (10 per cent) in progress and 8 (80 per cent) not yet measured.

The implementation of the IDP deliverables for the Mayoral Outcome 2 indicates significant improvement after Year 1, reflecting positive progress and effective implementation during the period 2022 – 2027.

Graph 14: Executive Mayoral Outcome 2: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers, has a total of 23 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. The performance for Year 4 (2025/26) reflects that 2 (33.34 per cent) of the six (6) IDP deliverables were achieved, and 4 (66.67 per cent) have not yet been measured.

Graph 15: Executive Mayoral Outcome 3: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements, and mixed-use developments) has a total of 25 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. However, in Year 2 (2023/24), 4 (80 per cent) of the five (5) IDP deliverables were achieved, and 1 (20 per cent) has not been met.

In Year 4, nine (9) IDP deliverables were recorded, with 5 (55.56 per cent) being in the implementation phase and in progress, and 4 (44.44 per cent) not measured to be reported by 30 June 2026.

Graph 16: Executive Mayoral Outcome 4: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 5: The development of the Adam Tas Corridor and the town establishment of all ten dorpias across the municipality area has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved.

In Year 3 (2024/25), the one (1) IDP deliverable was not achieved. The one (1) IDP deliverable planned for Year 4 (2025/26) is in progress to be reported on by 30 June 2026.

Graph 17: Executive Mayoral Outcome 5: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth has a total of 5 IDP deliverables for the period 2022 – 2027.

Performance on the IDP deliverables for Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), indicates sustained achievement of 100 per cent for three consecutive financial years.

The IDP deliverable set for Year 4 (2025/26) is in progress and is to be reported on by 30 June 2026.

**Graph 18: Executive Mayoral Outcome 6: Implementation Progress 2022 – 2027**

Executive Mayoral Outcome 7: To create safer environments in our communities, there are a total of 37 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 8 (80 per cent) of the ten (10) IDP deliverables were achieved, and 2 (20 per cent) were not met. In Year 2 (2023/24), 7 (77.78 per cent) of the nine (9) IDP deliverables were achieved, and 2 (22.22 per cent) were not met.

In Year 3 (2024/25), 8 (88.89 per cent) of the nine (9) IDP deliverables were achieved, and 1 (11.11 per cent) was not met. In Year 4 (2025/26), nine (9) IDP deliverables were planned for implementation, with 2 (22.22 per cent) achieved, 2 (22.22 per cent) in progress, and 5 (55.56 per cent) to be reported on by 30 June 2026.

The overall performance on Mayoral Outcome 7 reflects a positive achievement of an average of 82 per cent. Although a minimum proportion of the IDP deliverables was not achieved in the first three financial years, the overall performance remained consistently high.

Graph 19: Executive Mayoral Outcome 7: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 8: The expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation, has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2024/25), 1 (50 per cent) IDP deliverable is in progress, and 1 (50 per cent) is to be reported on by 30 June 2026.

Graph 20: Executive Mayoral Outcome 8: Implementation Progress 2022 – 2027

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027

The nine (9) Mayoral Portfolios each have a 5-year plan with specific IDP deliverables and targets applicable for the period 2022 - 2027.

The **Mayoral Portfolio Human Settlements** has a total of 59 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 15 (100 per cent) of the deliverables were achieved. In Year 2 (2023/24), 13 (81.25 per cent) of the sixteen (16) IDP deliverables were met, and 3 (18.75 per cent) were not achieved.

In Year 3 (2024/25), 9 (75 per cent) of the 12 IDP deliverables were achieved, with 3 (25 per cent) remaining not achieved. In Year 4 (2025/26), 16 IDP deliverables are planned for the 2025/26 financial year, with 4 (25 per cent) in the implementation phase and 12 (75 per cent) not yet measured.

The overall performance against the IDP deliverables for the period 2022 – 2027, reflects a positive achievement over the period from Year 1 to Year 3, with a slight decline in Year 2. The IDP deliverables not yet measured in Year 4 will be reported on by 30 June 2026.

Graph 21: Mayoral Portfolio – Human Settlements 2022 – 2027

The Mayoral Portfolio Rural Management has a total of 8 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (100 per cent) of the IDP deliverables have not yet been measured and to be reported on by 30 June 2026.

Graph 22: Mayoral Portfolio – Rural and Environmental Management

The Mayoral Portfolio Sport, Youth, and Culture has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (100 per cent) of the IDP deliverables have not yet been measured.

**Graph 23: Mayoral Portfolio – Sport, Youth and Culture**

The Mayoral Portfolio Planning, LED and Tourism has a total of 87 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 21 (84 per cent) of the 25 IDP deliverables were achieved, and 4 (16 per cent) were not met. In Year 2 (2023/24), 18 (90 per cent) of the 20 IDP deliverables were achieved, and 2 (10 per cent) have not been met.

In Year 3 (2024/25), 1 (4.76 per cent) of the 21 IDP deliverables were not met, and 20 (95.24 per cent) have been achieved. The 21 IDP deliverables planned for Year 4 (2025/26), 4 (19.05 per cent) have been achieved, 3 (14.29 per cent) are in progress, and 14 (66.66 per cent) are not yet measured.

The overall performance indicates consistent improvement in the implementation and achievement of the IDP deliverables for the period 2022 – 2027.

Graph 24: Mayoral Portfolio – Planning, LED and Tourism

The Mayoral Portfolio Community Development and Protection Services has a total of 39 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 9 (81.82 per cent) of the 11 IDP deliverables were achieved, and 2 (18.18 per cent) were not met. In Year 2 (2023/24), 8 IDP deliverables were planned, of which 6 (75 per cent) were achieved, and 2 (25 per cent) were not met.

In Year 3 (2024/25), 10 (100 per cent) of the IDP deliverables were achieved. In Year 4 (2025/26), 10 IDP deliverables are planned for implementation, of which 3 (30 per cent) are in progress, and 7 (70 per cent) are to be reported on by 30 June 2026.

The overall performance indicates an improvement from Year 1 to Year 3, culminating in a 100 per cent achievement in Year 3.

Graph 25: Mayoral Portfolio – Community Development and Protection Services

The Mayoral Portfolio Financial Services has a total of 16 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the four (4) IDP deliverables were achieved.

In Year 3 (2024/25), 3 (75 per cent) of the 4 IDP deliverables were achieved, and 1 (25 per cent) has not been met. The 4 IDP deliverables planned for the 2025/26 financial year are in progress and are to be reported on by 30 June 2026.

Graph 26: Mayoral Portfolio – Financial Services

The Mayoral Portfolio Corporate Services has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. In Year 4, 100 per cent of the IDP deliverables have yet to be measured.

Graph 27: Mayoral Portfolio – Corporate Services

The Mayoral Portfolio Infrastructure Services has a total of 25 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 3 (60 per cent) of the five (5) IDP deliverables were achieved, and 2 (40 per cent) were not met. In Year 2 (2023/24), 7 (87.5 per cent) of the eight (8) IDP deliverables were achieved, and 1 (12.5 per cent) was not achieved.

In Year 3 (2024/25), 6 (14.29 per cent) of the 7 IDP objectives were achieved, while one (85.71) was not. The 5 IDP deliverables planned for Year 4 (2025/26) show that one (20 per cent) is in progress and 4 (80 per cent) will be reported on by June 30, 2026.

Graph 28: Mayoral Portfolio – Infrastructure Services

The Mayoral Portfolio Parks, Open Spaces and Environment has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 100 per cent of the four (4) IDP deliverables were achieved, and in Year 2 (2023/24) and Year 3 (2024/25), no IDP deliverables had to be accounted for. In Year 4 (2024/25), 1 (100 per cent) IDP deliverable is in progress.

**Graph 29: Parks, Open Spaces and Environment**

5.5 IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027

The seven (7) sector plans below each have a 5-year implementation plan with specific IDP deliverables and targets for the period 2022 - 2027.

The **Environmental Management Plan** has a total of 5 IDP deliverables for the period 2022 – 2027.

In the period 2022 – 2025, 100 per cent of the IDP deliverables were achieved.

Graph 30: Environmental Management Plan – Implementation Plan Progress 2022 – 2027

The section on **Integrated Human Settlements** that highlights priority housing projects and upgrading of informal settlements has a total of 19 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 5 (83.33 per cent) of the six (6) IDP deliverables were achieved, and 1 (16.67 per cent) was not achieved. In Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 5 (71.43 per cent) of the seven (7) IDP deliverables are in progress, and 2 (28.57 per cent) will be reported on by 30 June 2026.

**Graph 31: Integrated Human Settlements – Implementation Plan Progress 2022 – 2027**

The **Comprehensive Integrated Transport Plan** has a total of 17 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (40 per cent) of the 5 IDP deliverables have been achieved, 2 (40 per cent) in progress, and 1 (20 per cent) is to be reported on by 30 June 2026.

Graph 32: Comprehensive Integrated Transport Plan – Implementation Plan Progress 2022 - 2027

The **Integrated Waste Management Plan (IWMP)** has a total of 29 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (28.57 per cent) of the seven (7) IDP deliverables are in progress, and 5 (71.43 per cent) are not yet measured.

Graph 33: Integrated Waste Management Plan – Implementation Plan Progress 2022 – 2027

The **Water Services Development Plan (IWMP)** has a total of 3 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2, 100 per cent of the IDP deliverables were achieved. In Year 3 (2024/25), no IDP deliverables were planned for the IWMP. In Year 4 (2025/26), the 2 IDP deliverables planned are in progress to be completed by 30 June 2026.

Graph 34: Water Services Development Plan – Implementation Plan Progress 2022 – 2027

The **Disaster Management Plan (DMP)** has a total of 25 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. In Year 4 (2024/25), 1 (16.67 per cent) of the six (6) IDP deliverables were achieved, 3 (50 per cent) are in progress, and 2 (33.33 per cent) have not yet been measured.

Graph 35: Disaster Management Plan – Implementation Plan 2022 – 2027

The **Local Economic Development Strategy** has a total of 21 IDP deliverables for the period 2022 – 2027.

The IDP deliverables planned for the period 2022 – 2025 were 100 per cent achieved. In Year 4 (2025/26), 1 (14.29 per cent) of the seven (7) IDP deliverables is currently in progress, and 6 (85.71 per cent) will be reported on by 30 June 2026.

Graph 36: Local Economic Development – Implementation Plan 2022 – 2027

The **Community Development Strategy** has a total of 17 IDP deliverables for the period 2022 – 2027.

During the period 2022 - 2025, all IDP deliverables were completed, representing a 100 per cent achievement rate. In Year 4 (2025/26), 3 (75 per cent) of the 4 IDP deliverables are in progress, and 1 (25 per cent) has not yet been measured.

**Graph 37: Community Development – Implementation Plan 2022 – 2027**

CHAPTER 6:

One Plan: Service delivery, budget, programmes, and projects

6.1 Introduction

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

It is acknowledged that the DDM introduced a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic, and annual performance plans that each sphere, department, and state entity is responsible for or required to develop. The One Plan is rather informed by these plans, and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development, and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- is a geographical (district), team-based, and citizen-focused approach;
- has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery, and capacity building;
- has the desired outcome of improving the living conditions (lives) of citizens;
- has a horizontal interface (between provincial departments) and a vertical interface (national, provincial, and local government spheres);
- does not exclude local municipalities;
- is not a functions and power debate; and
- promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.

6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

The One Plan does not replace the Integrated Development Plans of municipalities as the "single, inclusive, and strategic plan for the development of the municipality," but is meant to strengthen and

enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 28: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2026

President Cyril Ramaphosa presented the State of the Nation Address (SoNA) on 12 February 2026. The address marks an important milestone, providing clarity on the country's political, social, and economic landscape.

The following are key highlights from the SoNA 2026:

Positive economic growth and investment:

- ✦ Government is committing more than R1 trillion in public investment to build and maintain infrastructure. This is the largest allocation of its kind in South Africa's history.

Critical minerals and industrial development:

- ✦ R300 million in funding for the Frontier Rare Earths Project in the Northern Cape. potential to become one of the world's highest and lowest cost new producers of minerals that are needed for smartphones, lithium batteries and other products.
- ✦ G20 countries support South Africa's proposal to expand local beneficiation of critical minerals and the export of finished products.

Creating employment:

- ✦ Introduction of regulatory changes that will make it much easier for businesses to participate in the Youth Employment Service programme and create jobs for young people. This will include the expansion of the public employment programmes, including the Community Workers Programme, Expanded Public Works Programme, and the Presidential Employment Stimulus.
- ✦ To promote inclusion, the government will increase employment equity targets of persons with disabilities in the Public Service to 7% by 2030, and mandate a 7% preferential procurement

target across all government and public entities.

Expanding affordable housing:

- ✦ Introducing a new model that shifts from building housing to giving subsidies for ownership and rental in areas that are suitable. Subsidies will support people to build, buy or rent their own housing.

Economic reform:

- ✦ Continues investment in roads, bridges, rail lines, ports, dams, wind and solar farms to promote long – term growth.

Trade, industrialisation and international partnerships:

- ✦ Supporting established industries by reviving the ferrochrome industry, closing loopholes in tariff structures and developing additional measures to protect and grow the manufacturing base.

Investing in small and medium businesses:

- ✦ Ensure that the final Business Licensing Bill makes it easier to start and run a small business in South Africa.

Addressing the foot-and-mouth disease crisis:

- ✦ The government has classified the foot-and-mouth disease as a National Disaster and will mobilise all necessary capabilities within the state to deal with the outbreak.

Intensifying the fight against crime:

- ✦ Prioritising the fight against organised crime and criminal syndicates using technology, consolidating intelligence at the national level, identifying priority syndicates and deploying handpicked, multi-disciplinary intervention teams focused on dismantling criminal networks.

Dealing with the water crisis:

- ✦ Building of new dams and upgrading existing infrastructure; committing to more than R156 billion in public funding for water and sanitation infrastructure over the next three years. The Water Services Amendment Bill will enable the government to hold water service providers accountable for their performance and withdraw their licences if they fail to deliver.

Deployment of the SANDF to crime hotspots:

- ✦ Support the police to deal with gang violence and illegal mining.

GBVF classified as a National Disaster:

- ✦ This classification will enable the government to better coordinate response and direct efforts towards the most impactful interventions.

Early childhood development:

- ✦ Expanding access to early childhood development (ECD) through the Bana Pele mass registration of ECD facilities and an increase in subsidies for ECD learners, as well as making Grade R compulsory.

Health:

- ✦ Substantial investment in health infrastructure, prioritising the construction and revitalisation of academic hospitals as part of preparations for the National Health Insurance.

Higher education and training opportunities:

- ✦ Expand opportunities for young people to enter institutions of higher learning, draft a proposal to build more universities and Technical and Vocational Education and Training Colleges with specialised areas of focus.

Centralised model for managing SOEs:

- ✦ To improve the governance and performance of state-owned enterprises, the government will implement clear standards for appointments.

Illegal immigration:

- ✦ Labour inspectors to crack down on violations of existing immigration, labour and other laws.

Leveraging digital transformation for growth:

- ✦ Harness digital transformation as a driver of growth, inclusion and effective service delivery.

National Dialogue:

- ✦ This process will continue across South Africa in 2026, providing citizens the opportunity to raise their concerns, aspirations and plans for the future.

International cooperation:

- ✦ Forge strong partnerships with like-minded countries to increase shared resilience to global disruptions, continue to champion multilateralism and strengthen humanitarian diplomacy.

6.3.2 State of the Province Address (SOPA) 2026

Premier Alan Winde presented the State of the Province Address (SOPA) on 25 February 2026.

The following are key highlights from the SOPA 2026:

- ✦ **G4J:** Growth and jobs are the cornerstone of the vision for the Western Cape. The Western Cape Government supports business growth by cutting red tape and providing tailored business support to reduce unemployment
- ✦ **Tourism:** Tourism is another powerful economic driver. Growth sectors highlighted included trade and hospitality, agriculture, construction and manufacturing, and support for small businesses.
- ✦ **Infrastructure:** Infrastructure development and, importantly, the maintenance thereof is the backbone of the Western Cape's economy and a foundation for sustainable growth. Invest in roads, ports, energy, water, and digital networks, and the Western Cape Government will unlock opportunities for businesses to grow, trade to flow, and jobs to be created.
- ✦ **Housing:** The Western Cape Government emphasises that housing is about restoring dignity and creating opportunity. Since 2009, over 213,000 housing opportunities have been created, benefiting around 850,000 people.
- ✦ **Roads:** Road infrastructure investment continues to drive job creation in the province. Last year, road projects created 4,645 work opportunities, and further investment will see over 2.27 m2 of road maintained this year, generating thousands more jobs.
- ✦ **Agriculture:** Concerns were raised about Foot-and-Mouth Disease, a threat to livestock and agricultural jobs, and indicated provincial strategies to manage outbreaks.

- ✦ **Climate change and Environmental Affairs:** Emphasise that the crisis of climate change is undeniable as it impacts and reaches far and wide, across our province and economy, touching lives and livelihoods.
- ✦ **Water:** The province is facing serious water security challenges. To conserve this precious resource, the Western Provincial Government have invested over R250 million, which has enabled local government investment into water infrastructure amounting to billions.
- ✦ **Energy:** Western Provincial Government is driving energy security for its residents. Through our provincial Energy Resilience Programme, 819 MW has been added to the provincial grid in the 2024/25 financial year, with another 1 000 MW anticipated in this year.
- ✦ **Safety:** Everything within our mandate to address crime, both in terms of prevention and reduction.
- ✦ **Local Policing and Provincial Law Enforcement:** Support is being provided with the K9 units fully operational in Mossel Bay, Overstrand and Swartland, with plans to expand into Stellenbosch in 2026.
- ✦ **Education:** Key to independence, economic inclusion and employment. Nine new schools have opened in the last year, with two more opening in a phased approach in due course. The Western Cape Education Department will invest R1.5 billion in new schools and classrooms this year, with 15 new schools under construction.
- ✦ **Gender Based Violence:** GBV has been declared a national disaster, with women and girls deeply impacted by this scourge. Western Provincial Government are actively working to address this and provide the necessary support through the implementation of the GBV Ambassador Programme.
- ✦ **Cultural Affairs and Sports:** The MOD Programme, our Mass participation, Opportunity and access, Development and Growth programme has been strengthened and expanded, so that more young people have access to safe, structured after-school spaces guided by caring adults and positive role models.
- ✦ **Health:** R2.4 billion is being invested in new and improved health facilities over three years.

6.4 Investments

This section reflects on investment priorities within the Stellenbosch area for 2024/25.

6.4.1 Public Sector Investment

The 2024/25 capital expenditure budget in the CWD's municipalities saw a notable growth to R127.1 billion compared to the R107.0 billion in the 2023/24. The increase in expenditure is directed towards higher expenditure in the trading and services sector, particularly in Drakenstein, which has the highest expenditure for trading services, equal to R590.8 million.

Furthermore, significant funds are directed towards wastewater management, driven by a major upgrade project at the Paarl Wastewater Treatment Works (WWTW). This project aims to improve wastewater treatment processes and protect the Berg River, a vital regional water source. Additionally, the initiative seeks to enable future green energy generation through biogas production at the facility. The National Treasury has provided a significant grant to support these wastewater and sanitation upgrades in the Paarl / Wellington area.

Following suit is Stellenbosch, which has a total capital expenditure of R599.4 million in 2024/25. Of this, the most substantial expenditure was directed towards trading services, with a budget of R351.8 million. Water management constitutes the largest portion of this trading services expenditure, with a spend of R156.9 million. This significant investment is driven by the increasing water demand within the municipality amidst diminishing natural water sources. Projections indicate that the District will be at high risk of drought by 2040. In response to these challenges, municipal authorities have been exploring alternative water sources, including urban wastewater recycling (UWWR), as part of an integrated urban water management (IUWM) approach.

While the overall total expenditure for municipalities in the CWD has increased due to several factors, key contributors include rising costs associated with infrastructure investments, particularly in response to the need for improved service delivery and maintenance. Additionally, the increase in the import costs of essential resources, such as crude petroleum, has significantly impacted municipal budgets. Municipalities are investing heavily in infrastructure to support economic growth and improve service delivery, encompassing projects related to transportation, water supply, and sanitation.

6.5 Environmental Risk and Vulnerability for the Cape Winelands District (CWD)

The CSIR developed a vulnerability index for all 25 municipalities in the Western Cape that assesses their vulnerability in four areas—socio-economic, economic, physical, and environmental. The analysis reveals that the municipal areas in the CWD are particularly vulnerable to physical and environmental risks. These are as follows:

- Drakenstein stands out with the lowest socio-economic vulnerability but faces significant environmental challenges;
- Stellenbosch has a high environmental vulnerability, which could be a critical area for intervention;
- Breede Valley and Witzenberg have higher physical vulnerabilities, indicating potential challenges in infrastructure and connectivity; and
- Langeberg, while moderate in socio-economic and economic vulnerabilities, has a relatively lower environmental vulnerability, suggesting the need to balance development and environmental preservation.

To better understand the province's environmental vulnerabilities, the Department of Environmental Affairs and Development Planning (DEADP) initiated a project aimed at tracking the environmental vulnerabilities and risks in the Western Cape, with a particular focus on water security and the impacts of climate change.

The project is aimed at developing an environmental risk map that highlights areas in the Western Cape where compound risks threaten people, their livelihoods, and / or infrastructure. The risk maps can then be leveraged to provide insights that can support decision-making, planning, and budgeting related to sustainable economic growth and enhance human well-being.

The thematic areas contributing to the final combined environmental risk and vulnerability maps include:

- Ecosystem Deterioration;
- Coastal Erosion and Flooding;
- Terrestrial Flooding;
- Water Security;
- Air Quality and Health;
- Solid Waste Management; and
- Wildfires.

The analysis by the provincial government indicates that the CWD is vulnerable to several environmental risks. Ecosystem deterioration is due to the sensitivity of the remaining natural areas and the complexity of managing these sensitivities along with diverse human activities such as waste management, air pollutants, and increased wildfires.

Water scarcity is a concern given that future drying adds to the water security risk in the Western part of the province, especially in areas like Cederberg, where the vulnerability is generally high. The CWD region may also face water security challenges due to climate change projections.

Lastly, the CWD faces increased wildfire hazards, particularly in the mountainous areas. The higher population density in these areas may lead to more fire ignition events, increasing the risk of wildfires.

Air quality and health are impacted by pollutants and increased wildfires. The CWD, particularly the mountainous areas, may face challenges related to air quality due to these factors.

The environmental vulnerabilities in the CWD can have far-reaching implications for both the people and the economy. These vulnerabilities can lead to health and safety risks, property damage, economic losses, and increased socio-economic disparities. Effective governance, disaster management, and targeted interventions are essential to mitigate these impacts and support the resilience of the CWD.

6.6 Intergovernmental Budgetary Allocation

The infrastructure projects and related capital projects listed below are in various stages of implementation, with certain projects being in the planning phases, others in implementation with construction in progress, and some in the close-up phase of the project.

Table 32: Provincial Infrastructure Projects and Programmes MTEF period 2026/27 – 2028/29

Investment	Value of infrastructure projects and programmes (Rand)				MTEF Totals

6.7 Cape Winelands District (CWD) JDMA Implementation Plan

A **CWDM JDMA profile** was developed in 2020 and updated in September 2023. The Cape Winelands District Profile—2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- ✚ Provide an information source that, at a glance, highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e., sets the context and provides the government with an intergovernmental understanding of key development trends and patterns within the District); and
- ✚ Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated, and integrated.

Given the above, the following strategic priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- ✚ Waste minimisation and management solutions
 - Regional Landfill
 - Waste Minimisation Strategies
 - Integrated Waste Management Plan
 - Waste Workshop
- ✚ Resource Resilience
 - Climate Change, Water Management and Wildfire Urban Interphase Risks
 - Municipal Energy Resilience Programme
- ✚ Infrastructure management and development
 - N1 Eastern by-pass
 - ESKOM Infrastructure delays (Witzenberg)
- ✚ Economic Recovery and Unemployment
 - Economic Recovery Plan - Implementation
- ✚ Urbanisation
 - Develop a guide to inform future developments
 - Monitor mega human settlement projects to inform the Guide
 - Address Land invasions
 - Provision of Basic Services for Prioritised Informal Settlements
- ✚ Community Safety
 - District Plan
 - Area-based Plan (Witzenberg)
 - SANTAM (fire and IT equipment, PPE, and smoke alarms)
- ✚ Municipal Business Sustainability
 - Financial Sustainability
 - Revenue Collection: ESKOM
 - Shared Services: Development of 4 Models

- External Stakeholder involvement
- Communication and IGR
- Data governance and profile update
 - The development of a dynamic profile to inform the JDMA Implementation Plan developmental priorities and projects.
- Digital Transformation Strategy.

6.7.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure, and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility-scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid-tied and feed in any excess electricity generated. Registering a feed-in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.7.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 29: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team (link to existing technical structures and / or projects)	Progress
Provincial Priority– Growth and Jobs					
Waste minimisation and management solutions (priority project)	Waste Minimisation Strategies	All municipalities	Review of Integrated Waste Management Plan	CWDM and DEADP	All local municipalities have approved waste minimisation plans. Continued further awareness to be created.
	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations		Eastern side: The contractor is on site. The anticipated completion date is May 2025. Western side: The planning / discussions is in progress.
Resource Resilience	Climate Change, Biodiversity and Water Management Framework Wildfire Urban Interface: Mitigation of Risks WCG Energy Programme	All municipalities	Municipal Energy Resilience Programme	DLG, DEDAT, Stellenbosch Municipality and Drakenstein Municipality	In progress: Conversation to be set up to consolidate the resource resilience aspect, including climate change, disaster management, water, and energy. Completed: Municipalities received funds to procure generators.
Economic Recovery, long-term unemployment and its consequences	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM and all local municipalities; with WESGRO and DEDAT	LED Maturity Assessment has been finalised. Ongoing collaboration with stakeholders is necessary.
Municipal Business Sustainability	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM and all local municipalities, DLG and IGNITE	Shared Services Models has been developed. Currently exploring further additions to the shared service project.
			Digital Transformation Strategy	CWDM and all local municipalities, DLG	This project is in progress.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Compilation of overall data governance strategy	DLG, CWDM and all local municipalities, DEADP, DotP, DSD	Municipal interface structures are being finalised. Data sharing MoUs are being drafted, with consultations underway. The CWDM Data Management Plan was developed. Gaps in the 2020 profile were identified. The project is in progress.

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH

Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team ((link to existing technical structures and / or projects)	Progress
Provincial Priority– Growth and Jobs					
Community Safety, Risk Reduction and improved Disaster Response	Compilation of a disaster plan	All municipalities	District Plan	CWDM	 To be reviewed, annually.
			Area-based Plan (Witzenberg)		
Urbanisation	Towards a regional human settlement strategy	All municipalities	Develop a guide to inform future development	DoI, CWDM and DEA&DP	 Recommended: Closing out the urbanisation guide with available data and focusing on a regional human settlement strategy.
			Monitor mega Human Settlement projects (TRANSHEx, Vlakkeland and Vredebes)		 This project is ongoing.  Challenges: Bulk electricity and long-term planning for phase 2 of Transhex.
Infrastructure management and development	N1 Eastern bypass	Breede valley	N1 Eastern bypass	DoI and CWDM	 This project is in the detailed design phase.
Agriculture	Brandvlei Storage Dam	Breede valley	Brandvlei Storage Dam: Licensing	DoA and DWS	 Project is in progress.
Communications and IGR	JDAM	All municipalities	Institutionalising the JDMA	CWDM and DLG	 Ongoing awareness campaigns.
Operational Support	Compilation of Operational Support Plans	All municipalities	Operational Support Plans	CWDM	 Support plans for Breede Valley and Langeberg are in progress.  Support plan for Stellenbosch, Witzenberg and Drakenstein has been completed  Specific projects have been elevated to the JDMA level.  Ongoing projects: Maintenance of infrastructure, high mass lighting and rooftop solar projects.

6.8 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 34: Agricultural Interventions for 2022 – 2027

Project Rating					
	Project completed.		Project in progress.		Not completed / No budget available / District Function / Provincial Function

Table 35: Agricultural Interventions / Projects

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	Desired Municipal Deliverable	Status Quo within Municipality	Proposed Local Intervention (appropriate municipal action)	Timeframe to deliver (Short / medium / long term or ongoing)	2022/23	2023/24	2024/25	2025/26	2026/27	
Farmer Support	Lease agreement for use of commonage land (e.g., terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	4	3	2	2	In 2023/24, an item was prepared for the Council, and the four (4) portions of land were approved and allocated to the successful applicants.
								n/a	n/a	In 2024/25, an item was prepared for the Council, and the (3) three portions of land were approved and allocated to the successful applicants.
Market Access	Infrastructural development that supports the agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	2	2	2	2	In 2024/25 and 2025/26 the Section: Economic Development and Tourism obtained approval in term of Regulation 29 (1) (a) of the Municipal SCM Regulation and paragraph 5(2)(b)(i) of Stellenbosch Municipality Supply Chain Policy for the supply and installation of an agricultural irrigation network system (mainline & sub-mainline) on farm 502 BH (WC024)
									n/a	

6.9 Stellenbosch Municipality Operational Support Plan

The projects listed in the table below were identified as projects / programmes / initiatives that would require assistance and funding from other spheres of government:

Table 36: Stellenbosch Municipality Operational Support Plan

Responsible Internal Department / Agency	Project / Programme / Initiative	Action(s)
Department Community Service	Climate Change Adaptation Strategy (Alien Clearing, River Management and Wildfire Management)	Implementation of Alien Clearing, River Management and Wildfire Management Plans.
Department: Housing Development	Mega-human settlement project monitoring	Kayamandi Town Centre: To obtain development rights/township establishment. Jamestown: Housing (Phases 2, 3, and 4): To obtain development rights / township establishment. Erf 7001 and other possible sites for mixed-use development in Cloetesville: To obtain development rights / township establishment.
Municipality / DLG / Water Services	Stellenbosch Municipality:	Financial support is required for the development of pico hydropower units.
Stellenbosch Municipality and DLG	Resource Resilience: Municipal Energy Resilience	Financial support is required for the development of real-time management control centres.
Department: Roads, Stormwater and Transport	Stellenbosch Municipality:	Upgrading and implementing new taxi and bus stops in rural and semi-rural areas within the Stellenbosch municipal area.
Department: Roads, Stormwater and Transport	Resource Management Resilience: Water Management Resilience	Construction of sidewalks and NMT facilities in rural and semi-rural residential settlements located within the Stellenbosch Municipal area.
Department: Development Planning (Spatial Planning)	Improvements to public transport facilities in rural and semi-rural areas within the Stellenbosch Municipal area	Compilation of a Local SDF for the Adam Tas Corridor Study Area. The compilation of a Land Use Framework to develop a Development Incentive Overlay Zone (Urban Development Zone).
Department: Development Planning (Spatial Planning)	Improvements to the NMT network in rural and semi-rural residential settlements located within the Stellenbosch Municipal area	Inclusion of Klappmuts within the Cape Metro Regional Spatial Implementation Framework ("RSIF") in partnership with WCG, CoCT, Cape Winelands District, and Drakenstein Municipality, which focuses on the following themes: <ul style="list-style-type: none"> Smart City Concept; Economic Development and Job Creation; and Cost-effective Services
Department: Development Planning (Spatial Planning)	Compilation of the Adam Tas Corridor Local Spatial Development Framework	Draft Economic Development Strategy (an Approach to Stimulate Economic Growth). <ul style="list-style-type: none"> Inclusionary Housing Policy. Jamestown Housing Project. De Novo. Vaaldracai. Jonkershoek. Erf 7001, Stellenbosch (Soekmekaar).

6.10 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation,

monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and the District Development Model (DDM) objectives. The SDG (Goal 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to insufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix is in alignment with the principles of gender mainstreaming as stipulated below:

- ♣ Gender-sensitive language;
- ♣ Gender-specific data collection and analysis;
- ♣ Equal access to and utilisation of services;
- ♣ Women and men are equally involved in decision-making; and
- ♣ Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- ♣ Positive impact on individuals, organisations, and at a societal level;
- ♣ Acceleration of the implementation of Sustainable Development Goals (SDGs);
- ♣ Higher rate of growth and development;
- ♣ Improved resource management;
- ♣ Improved productivity; and
- ♣ By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.10.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the Provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

Table 37: Gender-Based Interventions

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The GBV Forum has been established by the Department of Social Development (DSD) in the 2023/24 financial year.
Hosting of the 16 Days of Activism event	Number of 16 days of activism events hosted by 30 November	The 16 Days of Activism event will be hosted each financial year for the period 2022 – 2027. This programme is linked to the Mayoral Outcome to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.

6.10.2 Gender Disaggregated Matrix³

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality in determining whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 38: Gender Disaggregated Matrix

Directorate	Department	Indicator Description	5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27	
			M	F	M	F	M	F	M	F	M	F	M	F

Community and Protection Services	Community Development	5.7	Number of participants in accredited training programmes, disaggregated by gender	99	93	19	13	20	20	20	20	20	20	20	20
Community and Protection Services	Community Development	5.8	Number of participants in programmes for vulnerable groups (Youth, Elderly and Disability)	1 287	3 061	807	2 581	120	120	120	120	120	120	120	120

Note: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.

CHAPTER 7:

Sector Plans and Implementation

7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the mSDF has a 20-year horizon, the IDP has a 5-year horizon, and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 30: Service Delivery Implementation Plans

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 39: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
Municipal Spatial Development Framework (mSDF)		<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs. Designates areas for developmental needs. Indicates areas desirable for a specific nature and form of urban development. Indicates areas desirable for conservation. Spatially, it reflects the distribution of community facilities. Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). Designates housing priority / restructuring areas. Integrates settlement patterns with infrastructure plans. 	<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs. Indicates areas desirable for conservation. Spatially, it reflects the distribution of community facilities. Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). Designates housing priority / restructuring areas. Indicates areas desirable for densification / specific land use / integrated networks. Spatially, it reflects the Council's approved nature and form of urban development. 	<ul style="list-style-type: none"> Identifies municipal growth direction. Identifies areas to be protected from development (e.g. heritage, agriculture and natural). Identifies priority development areas. Identifies infrastructure priority areas.

Identifies interventions required to support growth / infill. Provides for services not provided by the municipality, e.g., SANRAL, provincial roads, PRASA, and Transnet. 	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) was approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is cooperatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.

The goals to achieve the mission of the AQMP are listed below, and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- ✦ **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework, and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'effective air quality management';
- ✦ **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDMAQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- ✦ **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management.
- ✦ **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact.

7.3.1.2 Time frames

The timeframes defined for the Implementation of the AQMP are:

Figure 31: AQMP Time frames

The following immediate items were included in the AQMP:

Table 40: Items in AQMP

Nr.	Objective	Activity	Responsibility
1.	Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
2.	The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
3.	A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law	Air Quality Officer, Council
4.	Emissions from waste burning are reduced.	Enforcement of the by-law	Air Quality Officer
5.	An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
6.	Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g., EIA, SDF, SEMF).	Air Quality Officer
7.	Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
8.	Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality developed an Air Quality by-law in 2018, which, together with the above AQMP, is implemented and enforced by the local Air Quality Control Officer.

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development

Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document was reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (a nature reserve), and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- Mont Rochelle Nature Reserve: approved by the Council in 2022;
- Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review;
- Jan Marais Nature Reserve: Final draft EMP prepared;
- Paradyskloof Nature Area: approved by the Council in 2019 and reviewed in 2024; and
- Ida's Valley / Botmaskop Nature Area: Approved by the Council in 2023, to be reviewed in 2027.

In 2024, Stellenbosch Municipality also drafted a Nature Reserve and Nature Area By-Law. This by-law was made public before a final draft was presented to the Council in 2025.

7.3.3 Integrated Human Settlement

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

The aim of the Integrated Human Settlements Plan (IHSP) is therefore to:

- ✦ To outline the municipality's implementation plan for providing for the housing needs of its steadily growing and increasing population.
- ✦ To enable the municipality to prepare funding applications for submission to the Provincial Department of Infrastructure (branch Human Settlements) (PDol) that are consistent with funding conditions and included in the municipal IDP and Housing Pipeline as per Provincial Department of Infrastructure guidelines is a requirement; and
- ✦ To inform the municipal Housing Pipeline spanning over ten years, reflected in five-year periods, the funding required in the Provincial Department of Infrastructure's Business Plan.

The IHSP will therefore not only comply with the requirements of the National Housing Act, whereby the municipality is obliged to facilitate the delivery of housing opportunities as part of their municipal function, but will also develop a credible Housing Pipeline and operational models for human settlement development within the WC024.

7.3.3.2 Housing Pipeline

The PDol requires that every municipality have a Housing Pipeline. The Housing Pipeline is premised on a **five-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements Business Plan.

It is required that the Housing Pipeline be reviewed annually. The latest review of the Housing Pipeline was approved by the Council in May 2025. This revision includes the following:

Figure 32: Housing Pipeline Time Frame, Objective and Estimated Cost

The objective of the Housing Pipeline is to place more emphasis on the following housing types or programmes:

- Social housing (Affordable Rental);
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Upgrading of informal settlements; and
- Mixed-use housing (which includes formalised homeownership, especially employer housing).

The estimated cost of this programme will be approximately **R10 billion** over **15 years**.

- Upgrading of informal settlements (La Rochelle, Klapmuts, Langrug, and Franschhoek);
- Access to basic services (ABS);
- Jamestown, Farm 527 (Phases 2, 3, and 4);
- Upgrading of Zone O, Kayamandi;
- Enumeration of people on farms and backyarders;
- Erf 64, Kylemore;
- Erf 7001, Cloetesville (known as “Soek-mekaar”);
- Upgrade of the Kayamandi CBD;
- Adam Tas Corridor Precinct 10 (Northern Extension);
- Social Housing (Farms 81/2 and 81/9); and
- Formalisation of Forestry Villages (La Motte, Meerlust, Jonkershoek and Maasdorp Villages)

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements through the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

7.3.3.4 Informal Backyard Dwellings

The municipality, through the Housing Pipeline, is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database, and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious, and the chance of actually obtaining a formal house is not guaranteed. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes, especially Social Housing (affordable rental).

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017 by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality, and the latter culminated in a Council decision instructing the

administration to attract social housing institutions (SHIs) and / or other development agencies (ODAs) to effect the municipality's social housing programme.

This programme aims to ensure improved quality of life for communities through a rental housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock, etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational, and health facilities, etc.; and
- Ecological sustainability: conservation of scarce resources.

The aim and objective of Social Housing is to offer safe and affordable rental units for families with monthly incomes ranging from R1 850 to R22 000.

The figure below depicts areas that have been declared **restructuring zones** for the Stellenbosch Municipality.

Figure 33: Restructuring Zones as indicated in green

7.3.3.6 Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements gazetted the declaration of Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households, and overcome apartheid spatial patterns by fostering integrated urban forms.

The current status of the PSHDA for Stellenbosch Municipality, namely:

- ✚ The “Stellenbosch Urban Core” Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazetted on **15 May 2020** (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi, and Central Stellenbosch;
- ✚ To date, the Housing Development Agency (HDA), with assistance from the Provincial Department of Infrastructure (PDol), have undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PSHDA Development Plan. The Status Quo Analysis has been completed and will inform the Development Plan drafting going forward;
- ✚ The HDA appointed Plan Associates Development Planners to prepare a Development Plan for Stellenbosch Urban Core PSHDA (Priority Human Settlement and Housing Development Area) located within the jurisdiction of the Stellenbosch Municipality. The first inception meeting (Phase 1) took place on **15 April 2024**;
- ✚ As a first step in Phase 2 (Situational Analysis and Vision Directives), the project team conducted a literature study and multi-sectoral situational analysis of the study area, looking at the current situation within the study area. This included the following components:
 - An assessment of the current regional development context of the study area and focus areas.
 - An assessment of historic and contextual documentation consisting of the following:
 - National Development Plan (NDP);
 - Western Cape Provincial Spatial Development Plan;
 - Spatial Planning and Land Use Management Act (SPLUMA);
 - Western Cape Multi-Year Housing Development Plan and Business Plan;
 - Municipal Housing Sector Plan;
 - Precinct Plans;
 - Strategic Integrated Projects (SIPS);
 - Key legislative requirements;
 - Approved development rights; and
 - Identified properties falling within the Priority Housing Development Area (PHSHDA) and immediate surrounds.

It should be noted that phases 1 and 2 were completed by 30 June 2024.

Phase 2(b) of the project involves formulating a synthesis based on the information collected as part of the situational analysis. As part of the synthesis, the project team will formulate the identified development opportunities and constraints about the study area, highlight the factors that attract business or investments to the area, and identify the factors that drive investment away from the area.

This information will be based on the technical information collected in Phase 2 and on the input received from the public during the public liaison programme. It is anticipated that Phase 2(b) would take about four weeks to complete.

The draft vision formulated in Phase 3(a) will be refined, informed by the previous phases. The objectives will strongly link to the outcome of the Situational Analysis and Synthesis and will specifically focus on the development issues, opportunities, and challenges identified to ensure that the final plan incorporates all the form-giving elements identified.

Based on the philosophy and the objectives referred to above, the project team will then design the Development Concept and the detailed Development Plan for the study area.

The Focus Area Plans (Phase 3b) will provide more detail on the specific areas within the overall PSHDA Development Plan.

The implementation programme (Phase 4) will provide clear, separate phases that can allow for multi-year phased implementation. A priority matrix will be included in the implementation plan to provide a guide to which projects need to be implemented in the short, medium, and long-term. It must be noted that phases 3 and 4 have been completed.

The final Development Plan (Phase 5) will be presented to the various decision-making bodies in preparation for the adoption of the plan by the Council. The PHSHDA Plan will be advertised for public input once the Council has adopted the Plan. The Stellenbosch Municipality will drive the formal public participation with the assistance of Plan Associates.

Phase 6 will consist of the submission of the close-out report.

It was agreed upon with all stakeholders that the development plan be rolled out in different phases. The project programme below illustrates the different phases in which the project will be executed and the time frames linked to each milestone.

Figure 34: Project Programme

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 35: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8758 or via email at: lester.vanstavel@stellenbosch.gov.za.

7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA) requires “Type 1” planning authorities (the country's major cities and towns (including Stellenbosch Municipality)) to prepare a Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate, and provide for all modes of transport in their areas of jurisdiction.

The Stellenbosch Municipal Council as well as the Provincial Department of Mobility, has approved the Municipality's 2023-2028 CITP. The vision for the municipality's 2023–2028 CITP is as follows: Stellenbosch Municipality has an integrated, effective, and sustainable transport system that unlocks economic opportunities and is accessible, safe, reliable, and affordable to all communities serviced by the municipality.

Pursuant to achieving the vision and addressing user needs, issues, and gaps, the objectives for the transport system for Stellenbosch Municipality over the next 5 years and beyond are as follows (Chapters 2.3 and 2.4 of the CITP):

Figure 36: Objectives for the Stellenbosch Municipality Comprehensive Integrated Transport Plan (CITP)

7.3.5 Integrated Waste Management Plan (IWMP)

The third-generation IWMP, developed in 2020, was replaced with the 4th Generation Integrated Waste Management Plan (IWMP) as approved by the Council in 2024.

The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. The IWMP must be incorporated as part of each municipality's Integrated Development Plan (IDP), although it is submitted as a separate document. The IWMP also indicates the alignment of its goals with the Western Cape IWMP, the District Municipality IWMP and the National Waste Management Strategy, 2020 (NWMS).

Stellenbosch Municipality's 4th Generation IWMP includes a status quo analysis of the solid waste management system of the Stellenbosch Municipality and provides an overview of the strengths, weaknesses, and risks of the service provided. This overview includes the various aspects of, and the factors impacting, the solid waste management system. These range from relevant legislation, the socioeconomic context of the Stellenbosch Municipality, waste types and quantities generated, waste management systems and infrastructure, education and awareness initiatives, and financing.

The analysis of the status quo assessment is utilised to identify the gaps and needs of Stellenbosch Municipality's waste management system. The scope also includes the formulation of goals and objectives required to address the gaps and needs. The goals and objectives are limited to implementation at the local authority level. The implementation plan to improve the waste management system and to achieve the identified goals is coupled with a monitoring and review programme to ensure the successful implementation of the IWMP. The IWMP will be implemented over the period 2024 - 2029 and will be reviewed annually.

With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

7.3.5.1 Goals and Objectives

Five goals were identified for the Stellenbosch Municipality. The development of these goals has been informed by the previous IWMP, situational analysis, and gap and needs assessment, as follows:

Figure 37: Goals and objectives of the IWMP

7.3.5.2 Waste Management Systems and Infrastructure

The waste management division within the municipality provides the following services: collections, recycling, disposal to landfill site, wheelie bins (240 L), hiring of wheelie bins (for special events), emptying of skips, and drop-offs.

The Stellenbosch Municipality serves approximately 38 500 households with solid waste management services. The 28 751 collection points are spread across the WCO24. The refuse collection breakdown is approximately 20 000 wheelie bins and 4 000 standard refuse bags as of 2019. The most recent survey showed that approximately 106 000 wheelie bins are serviced monthly. The refuse bins are used to collect from formal areas, while the refuse bags are used to collect from informal settlements. The municipality utilises 11 refuse collection trucks that are operated by more than 60 crew members.

The municipality renders an area cleaning service seven (7) days a week. The area cleaning covers all urban areas within the WC024. The area cleaning service entails street sweeping, litter collection and removal within the road servitudes and clearing of illegal dumping on municipal properties.

The municipality provides a two-refuse collection system in formal areas where wheelie bins for non-recyclable waste and clear bags for recyclable waste are collected once a week. Households are required to separate and sort waste at source into two streams, namely non-recyclable waste for landfill (Wheelie bin)) and recyclable waste for recycling (clear bags).)

Figure 38: Waste types and waste sources addressed in the IWMP

7.3.5.3 Monitoring and Review of the IWMP

To ensure corrective action is taken where necessary, and that long-term strategic goals are met, it is imperative that the monitoring focuses on the short-term objectives of the IWMP. The monitoring of the IWMP also makes provision for the adjustment of the IWMP.

The effectiveness of the Stellenbosch Municipality's 4th Generation IWMP will be reviewed 5 years after its implementation date. Within 3 months of the end of the 5-year IWMP implementation period, a review report of the IWMP must be documented for formal submission to the Stellenbosch Municipal Council and to the DEA&DP.

7.3.5.4 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.6 Electrical Master Plan

With the approval of the SDF in November 2019, which was almost within the time that the masterplan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have had major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire masterplan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and conducted by the Council for Scientific and Industrial Research (CSIR), which forms the basis for how electricity is likely to be generated or purchased. The Energy Masterplan was finalised in December 2022 and approved by the Council in March 2023, and the Electricity Masterplan was completed in June 2023 and approved by the Council in February 2024.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Masterplan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium, and long term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Master Plan is updated every five years and is used in medium-term project planning, prioritisation, and budgeting.
- The current Electrical Master Plan is valid until June 2028. The Department: Electrical Services will timeously initiate the necessary processes to have a new master plan in place, following the expiry of the current plan.

7.3.7 Water Services Development Plan

As per the Constitution Section 156(1), Stellenbosch is authorised and required to provide services as per Schedule 4B & 5B. Schedule 4B indicates: The following local government matters to the extent

set out in section 155(6)(a) and (7): Water and sanitation services limited to potable water supply systems and domestic wastewater and sewage disposal systems

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997), to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019, each valid for a period of five years. A revision and updating of the WSDP was conducted in the 2022/23 financial year and completed in the 2025/26 financial year, but has not been approved by Council.

The total population supplied with water in the Stellenbosch municipal area amounts to more than 200 000 residents. Water is also supplied to a fairly extensive industrial area. Emergency water is supplied to farm communities that do not get water from the farms on which they reside.

The Department of Water and Sanitation is responsible for providing after South Africa's scarce water resources and the health thereof. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of municipal by-laws, policies, and procedures related to the provision of this service.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Master Plans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Master Plan, Sanitation Master Plan, Bulk Water Resources / Drought Intervention Plan, Asset Register, and Pipe Replacement Prioritised Programme were updated in 2019, after the previous major drought.

A new master plan has commenced and will be completed in the **2025/26** financial year. Since the water management function has drastically changed with the aforementioned previous drought, the use of greywater and the increasing cleansing of rivers have been prioritised. The Municipality, together with Stellenbosch University and IMESA (Institute of Municipal Engineers of South Africa) was instrumental in the creation of a new South African Grey Water Policy. These updates were taken up into the Water Master Plan with the latest changes to the SDF.

The **Water Conservation** and **Water Demand Management** (WC and WDM) strategy is a comprehensive study that includes a 10-year financial plan. The strategy has two goals:

- Prioritising the implementation of WC and WDM, and
- Ensuring ongoing planning, management, monitoring, and an enabling environment.

The WC and WDM initiatives include:

- A water pipe replacement programme,
- An indigent domestic leak repair and meter replacement programme,
- A Stellenbosch water meter audit, and
- An in-house water services operation and maintenance programme.

Poverty reduction and improved water management are closely linked.

Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced in the late 2010's and the very low drought-causing rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in the early 2020's. The Western Cape has been fortunate with above-average rainfall in the last two years, and thus, no water restrictions have needed to be implemented since the previous drought ended.

Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

Sub Town: Stellenbosch North		Sub Town: Stellenbosch South	
Water Supplying System: Ida's Valley Water Purification Plant Raw Water or Purified Water Source: Raw Water from Ida's Valley Dams, Eerste River		Water Supplying System: Paradyskloof Water Purification Plant Raw Water or Purified Water Source: Raw Water from Theewaterskloof Dam	
Sub Town: Stellenbosch North		Sub Town	
Water Supplying System: Franschhoek Water Purification Plant Raw Water or Purified Water Source: Franschhoek River		Boschendal Franschhoek West La Motte, Pniël, Kylemore Wemmershoek	Elsenburg Franschhoek West Johannesdal Klapmuts, Koelenhof, Lanquedoc Mulders Vlei
		Water Supplying System: Wemmershoek Water Treatment Works Black Heath Water Treatment Works	
↓ Wemmershoek (treated water imported from the City of Cape Town); ↓ Blackheath (treated water imported from the City of Cape Town); ↓ Faure (treated water imported from the City of Cape Town); and ↓ Other sources (boreholes)			

Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek. The potable water supply from these works amounts to 28 Ml/d on average, and a further 12 Ml/d was obtained from the City of Cape Town during the 2024/25 financial year, ensuring a supply of approximately 40 Ml/d to the municipal area.

Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier, and Vloffenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact on water quality and quantity needs to be monitored and considered by the Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 48 reservoirs / holding tanks, and water towers, 36 water pump stations, 44 pressure-reducing valve installations, 734 kilometers of pipeline, and 84 water supply zones. The network is fully controlled and operated by a telemetry system. The telemetry system is outdated and is currently planned for an upgrade in the following three financial years.

The bulk water input into the water network for 2024/25 was 12 623 309 kl, with an annual average daily demand of 34.584 kl/day. About 34.3% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of

Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 39: WCWSS Storage Record (2008 – present)

Subject to a revised graph with the approval of a new WSDP

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. The maintenance of equipment is performed in-house and by specialist contractors.

7.3.7.1 Basic Services and Level of Services

- There is no backlog of basic water and sanitation services in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- The clinics, hospitals, and schools in the municipal area have adequate and safe water supply and sanitation services.
- All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.
- All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current service backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.7.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition, and the condition backlog is

more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. The update to the Pipe Replacement Prioritisation study will indicate what percentage of sanitation infrastructure is in poor or very poor condition and what the condition backlog is. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life, and the necessary capital funds must be allocated for this purpose. Maintenance activities have historically been focused on reactive maintenance as opposed to preventative maintenance. The Stellenbosch Municipality has, in recent years, increased its focus on preventative maintenance, and there are early signs of a positive effect on the failure rate of equipment on treatment works.

7.3.7.3 Implementation Plan: Water Services Development Plan**Table 49: Summary Results: WSDP - IDP Deliverables 2022 - 2027**

7.3.8 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme, which includes repairs to private leaks and the installation of water demand management devices. These devices restrict users to 400 litres of water per day. More than 1 753 devices have been installed, saving over 493 084 litres of water per day.

7.3.8.1 Climate Change

In terms of adapting to climate change, water systems will need to be more robust, and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers, and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind, could have an impact on water sources, particularly surface waters. It is, therefore, advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- ✦ Establish assurance of the supply levels of all water sources;
- ✦ Increase assurance of the supply of water resources by ensuring that there is at least 10% additional capacity (headroom) when considering the maximum 24-hour demand in the peak month of the year;
- ✦ Do not undertake new developments unless a proper investigation of the implications for water sources and sustainability in the long term has been undertaken.
- ✦ Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- ✦ The IRIS monitoring system, including the Blue Drop Awards system, is active in the municipality. The municipality did not receive a Blue Drop Award for the recent Blue Drop assessment period. The municipality received a No Drop score of 57% in the most recent No Drop audit per by DWS in 2023.

7.3.8.2 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over their land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and 1:2 in the urban areas, as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past, but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschhoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.8.3 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of all natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Due to the threat of reoccurring droughts and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality

implemented water restrictions to lower water consumption. No water restrictions are currently implemented by the Stellenbosch Municipality, and there is no indication that restrictions are needed prior to December 2025. A determination on future restrictions is normally made at the end of the rainy season.

The success of this initiative is largely dependent on the consumer's cooperation in taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received positive reaction from the community.

An update to the Water Services By-Laws will be undertaken in the 2024/25 financial year to be approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

The following planning documents are continuously updated to include the latest planning: the Water Master Plan, Water Services Audit Report, and the Pipe Replacement Study and Model, and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.8.4 Backlogs in Water and Sanitation Services

A municipality, as a Water Services Authority (WSA), has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical, and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this, it is important that the backlogs within the water and sanitation infrastructure be addressed. Backlogs could be defined in three broad categories:

- ⚙ Backlogs regarding access to basic water and sanitation services (basic water and sanitation services in terms of national norms and standards);
- ⚙ Conditional backlogs (lack of maintenance); and
- ⚙ Capacity backlogs (increase in consumers).

7.3.8.5 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first six (6) kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting private landowners as far as possible in addressing the current service backlog on farms.

Figure 40: Water supply and accommodating growth (Total for WCO24)

Updated growth in demand: 20-year planning horizon (subject to a revised graph with the approval of a new WSDP)

Detailed water balance and future water demand projection models were developed as part of the WSDP process to adequately plan for the augmentation of the existing water sources. Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance Sheet for the 2023/24 financial year, the municipality recorded 31.2% for "non-revenue" water, which is an increase of 3.0% from the previous financial year, and 17.1% for real network losses. The non-revenue water for the 2023/24 financial year is 31.2%, which is above the target set of 25%. The real physical network losses are 17.1%, which is above the best practice value of 15%.

Figure 41: Water Losses from July 2022 to June 2023

System input volume (SIV): Jul 2023 to Jun 2024 ; kL				12 554 132	100%
(water demand in reticulation system)					
Potable water	Authorised consumption 79.4%	Revenue water 68.8%	Billed metered	8 631 963	68.8%
			Billed unmetered	0	0.0%
	Non-revenue water 31.2%	Unbilled metered	0	0.0%	
		Unbilled unmetered	1 334 032	10.6%	
		Apparent losses	439 983	3.5%	
		Real network losses	2 148 154	17.1%	
	Water losses 20.6%				
Non-revenue water (NRW) ; kL				3 922 170	31.2%
Real network losses ; kL				2 148 154	17.1%

7.3.8.6 Borehole Drilling in WCO24

Part of the drought mitigation plan was to manufacture and install water purification plants in the Stellenbosch Municipality water networks at strategic positions. The containerised water purification plants treat water up to SANS 241 standards before it is included in the water supply networks. This water is, however, more expensive compared to our Ida's Valley WTP supply and is not used unless necessary.

Figure 42: Stellenbosch Bulk Water Consumption

Subject to a revised graph with the approval of a new WSDP

7.3.9 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy, which includes a 10-year financial plan, has been developed. The strategy has two goals. The municipality will:

- Prioritise the implementation of the WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring, and an enabling environment.

This long-term WC and WDM Strategy was approved by the Council on Tuesday, 25 February 2014, and has since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a lower environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years, which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident, with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Programme, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and non-revenue water losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 43: WC / WDM Measures

Figure 44: Stellenbosch Bulk Water input volumes

Subject to a revised graph with the approval of a new WSDP

Figure 45: Stellenbosch Bulk Water Sales

Subject to a revised graph with the approval of a new WSDP

Figure 46: Water Volume vs Billed Consumption

Subject to a revised graph with the approval of a new WSDP

The unrestricted growth in water demand versus the growth in water demand assuming WC and WDM are implemented as shown in the figure below.

Figure 47: Unrestricted versus WDM growth in demand

Subject to a revised graph with the approval of a new WSDP

Note that each town in the municipality has water supplies independent of each other. When implementing WC / WDM in the municipality, it is critical to implement it in those towns where the existing supply will become inadequate for the demand as soon as possible. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.

The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 48: Updated growth in demand 20-year planning horizon

Subject to a revised graph with the approval of a new WSDP

Figure 49: Bulk Water Resources

7.3.10 Safety and Security Strategy

The purpose of the Safety and Security Strategy is thus to reduce crime and increase safety through an integrated, multi-pronged approach. The strategy is revised annually to ensure that it remains relevant to the real challenges of the day. To this end, the municipality partners with a range of stakeholders, ranging from the Western Cape Government, the Cape Winelands District Municipality, SAPS, and Stellenbosch University, as well as various private, public, and community-based safety and security organisations and institutions.

The Stellenbosch Safety Partnership (SSP) serves as an operational platform for safety and security entities to plan and operationalise enforcement plans. It's very important to break down barriers between departments and private organisations that have similar goals. Without an integrated, multidisciplinary approach that includes everyone, no strategy will work. This method has been shown to work in reducing crime. The SSP is open to any registered entity that contributes towards safety and security initiatives in the Stellenbosch Municipality.

The Stellenbosch Municipality has and continues to invest in and support neighbourhood watches (NHWs) and mobilise communities to support them. This includes direct assistance to NHWs to formalise their registration with the Department of Police Oversight and Community Safety (POCS) so that they can qualify for financial support and participate in sanctioned safety projects. The NHWs form a critical part of the community-based safety focus of the municipality in that they are located in the communities and understand the particular challenges faced by those communities. In addition to the support received from POCS, the municipality continues to provide training for under-resourced neighbourhood watches and provides them with radios for swift and effective communication with the municipal control room as and when required. To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services (SAPS);
- Department of Police Oversight and Community Safety (POCS);
- Cape Winelands District Municipality (CWDM);
- Neighbourhood watches and farm watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Winelands Safety Initiative (WSI);
- Department of Correctional Services (DCS);
- Department of Justice (DoJ);
- University of Stellenbosch (Campus Security); and
- Stellenbosch Municipality
 - Law Enforcement
 - Traffic Services
 - Fire and Rescue
 - Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting the Council's commitment to maintaining strong partnerships with primary law enforcement agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

The control room is fully functional and situated at the Stellenbosch Fire Department. The municipality still strives and will continue to, as part of the strategy, to provide a space where all safety and security stakeholders can jointly monitor and communicate with each other on safety and security matters. This includes the monitoring of municipal bylaw transgressions, criminal activity, emergency response in case of disasters, emergencies, and a range of other safety and security-related incidents.

One dedicated emergency number is available to residents within the municipal boundaries, which will mobilise all relevant units in response to alerts received on this number: **021 808 8999**. Additionally, the control room also monitors a dedicated WhatsApp number for general and safety complaints within the municipal boundaries of Stellenbosch. The WhatsApp number is **079 622 4722**.

All registered NHWs and security companies registered with the SSP have been and are in the process of being allocated space in the control centre.

Awareness initiatives have been and will continue to be launched as they contribute to making communities aware of crime prevention tips and other preventative tips, for example, fire safety and what to do in case of disasters. This will be a joint approach between role-players, supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives, for example, road safety (crossing of roads).

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024 area. The purpose of the CSF is to promote the development of communities in a safe environment and provide access to high-quality services at the local government level through multi-agency collaboration between the different spheres of government and communities. The CSF, as a multi-sectoral structure, would champion the coordination, integration, and implementation of crime and violence prevention and community safety initiatives. The CSF has three clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Urban Design.

7.3.10.1 Fire Services

The Section: Fire and Rescue is dedicated to the provision of services that seek to safeguard the public against fires, other natural and man-made disasters, and emergencies. Stellenbosch Municipality currently have three fire stations located in Ida's Valley, Klapmuts and Franschhoek. The new Jamestown fire station is currently in its planning phase.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- ✦ Integrated development planning towards uniform services;
- ✦ Coordination and regulation of local authority fire services, designated fire authorities, and volunteer fire associations;
- ✦ Development of specialised fire services capacity to deal with specialised fire risks prevalent in the area, such as veldfires, chemical fires, informal settlements fires, etc.;
- ✦ Development of specialised dangerous goods incident response capacity to perform incident stabilisation and perform oversight of cleaning operations;
- ✦ Development of specialised rescue services capacity focusing on the rescue disciplines prevalent in the area of jurisdiction as a priority;
- ✦ Coordination of the standardisation of infrastructure, vehicles, equipment, and operational procedures;
- ✦ Facilitation and coordination of the training and development of practitioners;
- ✦ Development and facilitation of the implementation of standardised municipal by-laws;
- ✦ Coordinate planning for the provision of fire safety and prevention;
- ✦ Development, implementation, and maintenance of mutual aid agreements amongst the local fire services, designated fire authorities, Fire Protection Associations, and volunteer fire associations;
- ✦ Development, support and implementation of community-based fire safety and prevention programmes;
- ✦ Establishment and maintenance of a District Fire Service Coordination Forum;
- ✦ Preventing the outbreak and or spread of a fire, by making arrangements amongst others for: -

- the provision of information, publicity, training, education, and encouragement in respect of the steps to be taken to prevent fires and death, or injury by fire.
- the giving of advice, on request, about – how to prevent fires and restrict their spread in buildings and other property; the means of escape from buildings and other property in case of fire;
- conducting regular and random fire safety inspections at any premises where the Chief Fire Officer or his or her designate deems necessary.
- providing advice on the means of escape from buildings and other property in case of fire;
- ✚ Fighting and extinguishing a fire; by making arrangements amongst others for: -
 - having sufficient staff, equipment, and vehicles at its disposal to deal with the fire risks in its area of jurisdiction – a risk-based approach.
 - the development and implementation of standard operating procedures for use during firefighting operations; and
 - call taking and dispatching facilities training for dealing with incoming calls to report fires and summoning personnel, amongst others.
- ✚ Protection of life and or property against fire or other related danger.
- ✚ Rescue of life and or property from fire or another form of entrapment.
- ✚ Rendering of emergency medical care.
- ✚ Performance of fire safety activities.
- ✚ Participation in special events planning.
- ✚ Provision of fire resilience training to fire practitioners and civil society at large.
- ✚ Maintenance of fire service equipment, infrastructure and or materials.
- ✚ Conducting fire risk assessments.
- ✚ Provision of training to fire services practitioners.
- ✚ Procurement of equipment, materials and other supplies required to perform the functions optimally.
- ✚ Provision of support in the implementation of the Disaster Management Act, 2002 (Act No. 57 of 2002).
- ✚ Performance of any other function connected with any of the matters contemplated in paragraphs (m) to (v).

7.3.10.2 Disaster Management

This unit primarily performs a coordinating function and to implement measures aimed at:

- ✚ Preventing or reducing the risk of disasters;
- ✚ Mitigating the severity or consequences of disasters;
- ✚ Emergency preparedness;
- ✚ A rapid and effective response to disasters; and
- ✚ Post-disaster recovery and rehabilitation.

The figure below is an illustration of the disaster cycle:

Figure 50: Disaster Cycle

7.3.10.3 Traffic Services

Stellenbosch Municipality has a legislative mandate to provide traffic services to the general public and its community and to ensure safe road usage in the municipal area. Traffic Services is committed to managing, controlling, and improving road safety in the municipal area by providing effective Traffic Administration and Traffic Law Enforcement services.

This will be achieved through the implementation of specific operational activities throughout the year, which focus on enforcement and education. The enforcement of public transport violations, speed violations, and sustained education at schools will be a specific focus for this year.

Another focus is also to improve the smart policing concept by optimally utilising technology for our officers, fine devices, and other policing techniques to provide effective and efficient services at our Motor Vehicle Registration and Licensing, Driver License Testing Centre, and the Vehicle Testing Centre.

The Traffic Management Plan contains the full spectrum of road safety programmes and projects across all functions, stakeholders, and users in WC024. The plan describes the various challenges to road safety and presents a range of action plans to address or mitigate these challenges.

Traffic Services is committed to:

- Ensure the road safety of all members of the community by providing quality traffic services in all its divisions (Traffic Administration, Traffic Law Enforcement, Licensing, Education, and Accident Statistics);
- Reducing the accident rate, which will result in fewer fatalities and injuries;
- Increase the voluntary compliance of road users with respect to the rules, legislation, and regulations of the road;
- Improve management practices throughout all traffic services divisions; and
- Provide a safe environment by integrating best practices with internal and external agencies and role players.

Traffic Services will focus on:

- Ensure the constant free flow of traffic;
- Enforcement of the National Road Traffic Act and the National Land Transport Act;
- To achieve a measurable improvement in road user behaviour, including the skill level of drivers, safer decision-making, and better regard for other road users;

- ✚ To reduce the incidence of traffic offences, including speeding, dangerous driving, drunk driving, driving under the influence of a narcotic substance, dangerous overtaking, moving violations, etc.;
- ✚ Parking enforcement / management;
- ✚ To ensure that un-roadworthy (including overloaded) vehicles are removed from the road;
- ✚ Point duty during the morning, midday, and evening peak at critical locations, during loadshedding, as well as school points;
- ✚ Special operations team to focus on driving under the influence of alcohol or drugs, illegal racing, and transportation of illegal substances;
- ✚ Road safety training and education are provided for crèches, nurseries, schools, primary / high schools, colleges, and universities, as well as for pedestrians, cyclists, farm workers, rehabilitation centres and youth groups. Training also includes learner's license programmes for youth and scholar patrol and level-crossing awareness;
- ✚ Events (road closures, escort duties);
- ✚ Public transport activities and checking of the roadworthy status of buses and minibuses;
- ✚ ANPR (automatic number-plate recognition) focusing on offenders with outstanding fines;
- ✚ Conducting driving and learner's license testing;
- ✚ Conducting driver's license conversions / renewals;
- ✚ Accepting and processing Professional Driving Permit (PrDP) applications;
- ✚ Vehicle registration and licensing;
- ✚ Ensure effective court section functioning with the assistance of the appointed external service provider to process all notices; and
- ✚ Sound financial management of the court section.

7.3.10.4 Law Enforcement

With the review of the Safety Strategy, the municipality has had to adapt to the changing environment of crime in its area and actively pursue closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities, which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all three phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas, which make it possible to track the direction of suspect vehicles linked to crimes picked up by these. The municipality continuously invests in CCTV to enhance safety. The municipality also has a CCTV Masterplan, which is a "living" document and is frequently updated based on needs identified concerning safety.

The use of neighbourhood watches to enhance public safety within the CBDs under the auspice of the "eyes and ears" project has assisted with crime prevention and is deemed to be a successful project.

To strengthen municipal law enforcement, the department recruits Peace Officers through the Expanded Public Works Programme (EPWP), in collaboration with the Department of Police Oversight and Community Safety (POCS). This initiative enhances enforcement capacity, increases visibility, supports by-law compliance, and contributes to crime deterrence.

7.3.10.5 The focus of Law Enforcement

- ✚ Effective monitoring and surveillance of CCTV cameras with reaction units to respond immediately;

- Establishment and implementation of the CBD Safety Project—a zero-tolerance approach;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Deployment of a 24/7 Tactical Response Unit (TRU);
- Strengthening coordination of communication strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of the Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compile a Security and Safety Camera Master Plan for WC024;
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to neighbourhood watches.
- Deployment of Peace Officers to enhance law enforcement capacity and increase visibility
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) Policy

7.3.11 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines, developed in terms of Section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and Section 3.6 of the National Disaster Management Framework, 2005 (NDMF), that provide a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)

- a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
- b) Coordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
- c) Regularly review and update its plan, and through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

7.3.11.1 The Key Outcome of the Disaster Management Plan

The Disaster Management Plan (DMP) is reviewed annually and:

- anticipates the types of disasters that are likely to occur in its area of jurisdiction and their possible effect;
- places emphasis on measures that reduce the vulnerability of disaster-prone areas, communities, and households at risk;
- promotes disaster management research;
- identifies and addresses weaknesses in capacity to deal with disasters;
- provides for appropriate prevention and mitigation strategies;
- facilitates a rapid and effective response to disaster; and
- Post-disaster recovery and rehabilitation.

7.3.11.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.

7.3.11.3 Linkage to the Disaster Management Framework of the CWDM

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial, and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.11.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 51: Structure of Disaster Management Plan

7.3.11.5 The key responsibilities of the Stellenbosch Municipality Disaster Management

The Municipal Disaster Centre must:

- ✚ Establish and maintain institutional arrangements that will enable the implementation of the Act;
- ✚ Implement measures to develop progressive risk profiles to inform municipalities' IDP processes for disaster risk reduction and to determine the effectiveness of specific disaster risk reduction programmes and projects undertaken;
- ✚ Facilitate and regularly update disaster risk assessments within the municipal area;
- ✚ Supply the relevant Provincial Disaster Centre with risk assessment results;

- ✚ Facilitate the development, implementation and maintenance of disaster risk reduction strategies that will result in resilient areas, communities, households and individuals;
- ✚ Monitor the integration of disaster risk reduction initiatives with development plans;
- ✚ Facilitate the development of response and recovery plans to ensure a rapid and effective response to disasters that are occurring or are threatening to occur, and to mitigate the effects of those disasters that could not have been prevented or predicted;
- ✚ Leading coordination of disaster response actions;
- ✚ Facilitate and coordinate the development of integrated contingency plans for disaster response and recovery;
- ✚ Submit copies of its disaster risk management plans to the National Disaster Centre, the Provincial Disaster Centre, neighbouring disaster management centres and, where applicable, disaster risk management entities in neighbouring countries;
- ✚ Develop and implement mechanisms for creating public awareness to inculcate a culture of risk avoidance;
- ✚ Facilitate and promote disaster risk management education, training and research in the municipality;
- ✚ Implement and maintain dynamic disaster risk management monitoring, evaluation and improvement programmes;
- ✚ Measure performance to evaluate the effectiveness of disaster risk management and risk reduction initiatives and submit copies of evaluation reports to the National Disaster Centre and the Provincial Disaster Centre;
- ✚ Monitor compliance in the municipal area with the key performance indicators outlined in the disaster management framework; and
- ✚ Make recommendations regarding funding disaster risk management in the municipal area and the initiation and facilitation of efforts to make such funding available.

Two (2) disaster assessments have been completed. One assessment has been completed to date for the 2025/26 financial year.

7.3.12 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. However, Sections 152 and 153 of the Constitution outline the objectives of local government, which include promoting social and economic development within a municipality's financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning. Local economic development involves the identification, development and utilisation of economic opportunities to benefit local businesses and to create opportunities to improve the lives of residents.

The economic growth metrics like the GDP differ from LED outcomes such as better life expectancy, lower infant mortality, literacy, and poverty levels.

Formal and Informal Economy

The economy blends formal and informal sectors across areas like manufacturing, tourism, services, and construction. Both ends form a continuum. Therefore, municipalities must create jobs along this continuum while ensuring health, safety, planning, and management. High unemployment links to crime, so all work must be valued. As the formal economy struggles globally, more people rely on informal work.

Multi-Stakeholder Role

In creating economic opportunities, multi-stakeholder efforts are required from the municipality, the private sector and local communities.

7.3.12.1 Strategic approach

The strategic approach to LED in general is to create economic opportunities for all citizens residing in the Stellenbosch Municipal Area. It is imperative that the municipality, in partnership with role players in society, review its strategy going forward to ensure better resilience in its economy to deal with future challenges and contribute towards better livelihoods for all.

Technology changes, especially connectivity, have become more important for businesses and the government to do business. This was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following are the key priorities:

-  Boost competitiveness through networking, responsive services, and business – focused structures;
-  Promote new investment and business growth via spatial planning, zoning, infrastructure, and financial tools;
-  Support informal economy expansion with zoning, infrastructure, and finance;
-  Build an enabling environment with policies, services, and conditions for businesses to thrive in; and
-  Link formal and informal sectors through dedicated networking projects.

7.3.13 Community Development Strategy

Moreover, Schedules 4b and 5b list the functions of local government to include the following, which have relevance to community development functions:

- Childcare facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure, inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sports fields (regarding their contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA, which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation, and realisation of national policies. Because these services are primarily provided by the national and provincial spheres of government but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in Chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23–26) identifies four interrelated characteristics of the role and function of local government related to community development:

- Maximising social development and economic growth: The role and function of the local government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves the regulation of service delivery. This means that the local government is not directly responsible for services but rather takes steps (i.e., strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided, and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups, and private sector institutions. "Developmental local government must provide a vision and leadership for all those who have a role to play in achieving local prosperity." An IDP could contribute to proper coordination. To this extent, a Community Safety Forum includes a Social Cohesion committee to promote community safety.
- Democratising Development: Local Government practices should be aimed at the involvement of "...citizens and community groups in the design and delivery of municipal programmes".

Coordination should lead to democratic "...leadership, encouragement, practical support, and resources for community action." Another key aspect is that democratic development should aim to involve all community groups; and

✚ Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.

✚ It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at improving service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and non-profit organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups, and social issues are also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

✚ The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development, forging relations with national, provincial, and local stakeholders, and the generation of current social data; and

✚ The development of six vulnerable groups (youth, gender, children, elderly, people who are homeless, and people living with disabilities) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

7.3.14 Human Resource Strategy

High quality and a responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability, and social mobility, is essential if the municipality is to realise its IDP ambitions. As such, Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 57: Clarifying the role of HRM&D vis-à-vis the manager and employees

HRM	Line Managers	Employees
<ul style="list-style-type: none"> • Develop HRM&D strategies, principles, policies, and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure the application of appropriate best practice HRM&D service. • Partners with line management in effective people practices • Enables change and transition. • Facilitates the assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback. 	<ul style="list-style-type: none"> • Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies, and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building their own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas. 	<ul style="list-style-type: none"> • Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for your own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with Unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor, and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. Therefore, the Council, management, staff, and trade unions must "own" this framework, making it not just an HR document. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality's environment.

Table 58: Key HR Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and service planning and resourcing occur sustainably over the long term and draw on the expertise of other service delivery agencies, the private sector, and the university.	 Strategic HR Management.
SFA 2: Green and Sustainable Valley	Focusing more strongly on the environmental planning and management function, including appropriate resourcing.	 Strategic HR Management.  Talent Management.  Learning and Development.
SFA3: Safe Valley	<p>Securing adequate permanently employed HR, facilities, and equipment (specifically fleet) to undertake the specialist functions of traffic management, fire and rescue services, and disaster and event management on a 24/7 basis and to comply with legal standards.</p> <p>Establishing adequate, integrated law enforcement capacity is present in every ward of the municipality.</p>	 Strategic HR Management.  Learning and Development.
SFA 4: Dignified Living	Ensuring the delivery of a comprehensive range of services to vulnerable groups and the coordinated cooperation of service providers at all levels in the delivery and management of services to these groups.	 Learning and Development.
SFA 5: Good Governance and Compliance	<p>Ensuring that functional areas have the capacity and readiness to deliver services in terms of short-, medium-, and long-term objectives and targets.</p> <p>Ensuring that all staff have the opportunity for leadership development within their functional areas and municipal management generally.</p> <p>Ensuring regular performance management of staff at all levels within the organisation.</p> <p>Undertaking strategic planning for the longer and shorter terms, the municipality, and local areas</p> <p>Implementing regular auditing of processes.</p> <p>Celebrating excellence in service delivery, both external and internal to the municipality.</p> <p>Renewing intergovernmental efforts to establish a municipal court in Stellenbosch.</p>	 Strategic HR Management.  Talent Management.  Learning and Development.  Performance Management / Reward and Recognition.  Strategic HR Management.  HR Risk Management.  Reward and Recognition.  Talent Management.

7.3.15 ICT Strategy

7.3.15.1 Background

Information and Communication Technology (ICT) systems and services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government, imposes major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view of ensuring alignment with the municipality's strategy. The emphasis is placed on identifying the municipality's new requirements and opportunities for information and communication technology to move towards meeting the ICT-related requirements of the municipality and management. The revised ICT Strategy were submitted to the ICT Steering Committee on 14 March 2024.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources, and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- ✦ Provisioning of Municipal Financial Management and Payroll Management software applications;
- ✦ Hosting of the municipal website;
- ✦ E-mail and internet services;
- ✦ Data storage;
- ✦ Data recovery;
- ✦ ICT planning;
- ✦ Provisioning of the network, wireless networks, and telephony services;
- ✦ End-user support for the ICT environment;
- ✦ Disaster Recovery Management;
- ✦ Business Continuity;
- ✦ ICT Risk Management;
- ✦ ICT contract management; and
- ✦ Public Wi-Fi.

7.3.15.2 The Mission and Vision of ICT

ICT's mission is to deliver cost-effective ICT infrastructure and ICT business solution services that will provide the most enabling environment to assist the Stellenbosch Municipality in delivering sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities, which include:

- ✦ Cost-effective solutions;
- ✦ Quality Service Delivery;
- ✦ Ongoing performance monitoring; and
- ✦ Aligned to business processes.

The vision of the ICT Department is to become a trusted and reliable information and communication technology partner to enable Stellenbosch Municipality's management and end-users to build a better town using cutting-edge ICT solutions.

7.3.15.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive to achieve its goals of closing the gap between the municipality and the community by improving services and engagement. These goals include:

- ✦ Understanding the needs of the community;
- ✦ Always deliver a consistent and quality service; and
- ✦ Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:

Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent in efficient cities with fewer red tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth and, in response, applies information and communication technologies to enhance performance and urban services to respond to demand while reducing consumption, waste, and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information, support more efficient delivery of goods and services, and contribute to the greater vibrancy of cities.

A smart city is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public, and improve both the quality of government services and citizen welfare.

8.1.1 Guiding Principles to Create Inclusive Smart Cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions must be made regarding the identification, planning, and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by and respond to the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership, and collaboration; and
6. It should be sustainable, resilient, and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

Smart Governance

Transform the institutional systems, processes, and organisational structure into a high-performance organisations to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy

Grow and diversify the local economy through the attraction of new investment, skills development, and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The Nature and Purpose of a Proposed Smart City Initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 52: Smart City Components and Initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will require the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027), Stellenbosch Municipality will emphasise smart governance with a focus on e-governance.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning, and implementing smart city initiatives that are appropriate to the theme of smart governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and the respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five-Year Plans

8.2.1 Executive Mayor

In developing the draft 4th review of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans to respond to the needs of the community, but also ensure that development is sustainable, spatially integrated and that service delivery follows a clear long – term vision.

As this review of the IDP, constitutes the fourth review of the 5th Generation IDP 2022 – 2027, the municipality's five – year strategic roadmap reflects measurable progress and notable impact in the implementation of the identified projects, programmes, and initiatives since the first adoption of the 5th Generation IDP by Council in 2022. In making greater Stellenbosch an integrated valley of opportunity and innovation, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable, and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpies across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation;

Mayoral Outcome 9: Alternative Energy.

8.3 Mayoral Portfolios

The mayoral portfolios serve as a strategic instrument that enables the Executive Mayor to advance and achieve the mayoral priorities set for the period 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes.

The performance-based strategic priorities for the 4th review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management;
3. Portfolio: Sport, Youth, and Culture;
4. Portfolio: Planning, LED, and Tourism;
5. Portfolio: Financial Services;
6. Portfolio: Community Development and Protection Services;
7. Portfolio: Corporate Services;
8. Portfolio: Infrastructure Services; and
9. Portfolio: Parks, Open Spaces and Environment.

8.3.1 Portfolio: Human Settlements
