L	**REQUIREMENTS CATEGORY B APPLICATIONS** (Please note that Category B applications **MUST** adhere to the following requirements **and** those listed under section K, except where indicated otherwise.)	
1	**AUDITED FINANCIAL STATEMENTS** A copy of the latest audited financial statements must be included in the application. Category B applications **MUST** submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	
2	**THREE YEAR BUSINESS PLAN** See the requirements for the business plan as listed under section K as guideline. NOTE: Category B applications MUST provide a clear proposal for a period of three years. Each year must be indicated separately and be costed per annum indicating all expenditure against the projected measurable outcomes. Outcomes must be listed ito how they will be reported on and measured on a monthly basis.	
M	**FORMAT FOR FEEDBACK REPORT**	
1	Narrative report on the project including numbers reached, outcomes reached, evaluation of the project indicating successes and failures/lessons learned.	
2	Pictures of the project/program.	
3	Financial report on expenditure regarding previous donation separate from the annual financial statements. (Attach proof of expenditure).	
N	**THE FOLLOWING SHALL APPLY:**	
1	The allocation of Grant-In-Aid will only be considered if the application document has been **fully completed** and signed and is accompanied by the required and supporting documentation referred to therein.	
2	An applicant who has been registered as a NPC, NGO, NPO or PBO with the necessary proof thereof, submitted together with this application.	
3	Applicants must in their submission clearly indicate/specify and motivate what the funds will be utilized for.	
4	The Grant-In-Aid must be exclusively utilized for the purpose defined and the successful applicant must submit the necessary undertaking to this effect.	
5	Applicants must in their submission satisfy the Council of their ability to execute the project successfully.	
6	Organisations who have already received financial or other assistance from the Council during the previous financial year MUST specify same in their application.	
7	No funding will be considered for political groupings, ratepayers organisations or for religious purposes..	
8	No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain.	
9	Projects outside the boundaries of the Council will not be considered.	
10	Expenditure that will not be funded includes: travel costs (unless it is for the transport of beneficiaries), subsistence, accommodation, food (unless intended for the beneficiaries) or entertainment expenses of any kind, staff salaries including bonuses, bursaries and payments in lieu of rates or other municipal charges.	
11	Subsequent requests from the applicants to cover overspending on projects will not be considered.	
12	Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance management Act no. 56 of 2003 which inter alia stipulates that the organization or body has to:-	
	❖ Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting financial management and auditing requirements as may be contained in such an agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programs of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion.	
	❖ Report at least once a year on the actual expenditure of the amount allocated to it. Should monthly allocations be made, monthly reports will be required.	
13	The Council reserves the right not to give a Grant-In-Aid to any organization applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.	
14	Funding will not be considered where a project or organization is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified.	
15	Funding will not be considered where in Council's opinion, an organization received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year.	
16	Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attach to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of Section 17 of the Non-profit Organisation Act, 1997 and Section 67(1) of the Municipal Finance Management Act, 2003 (MFMA).	
17	Funding will not be considered where expenses have already been incurred on a project by the applicant. (The Council's Grant-In-Aid Policy must be consulted for the sake of completeness).	

O	DECLARATION OF INTEREST:

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations:

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

MEMORANDUM OF AGREEMENT

Entered into and between

STELLENBOSCH MUNICIPALITY

(hereafter called the "***MUNICIPALITY***")

Herein represented by **Geraldine Mettler**, in her capacity as **Municipal Manager**, being duly authorised

and

NEWTONS AFC

(hereafter called the "***BENEFICIARY***")

Herein represented by MS B ROBYN in his/her capacity as SECRETARY, being duly authorised.

WHEREAS Section 67(1) of the Local Government: Municipal Finance Management Act, Act 56 of 2003 (MFMA) oblige the Accounting Officer of a **MUNICIPALITY** to satisfy himself that, before transferring funds of the **MUNICIPALITY** to an organisation or body outside any sphere of government otherwise than in compliance with a commercial or other business transaction, that such organisation or body:-

(a) has the capacity and has agreed-

(i) to comply with any agreement with the **MUNICIPALITY**;

(ii) for the period of the agreement to comply with all reporting, financial management and auditing requirements as may be stipulated in the agreement;

(iii) to report at least monthly (Cat B) to the Accounting Officer on actual expenditure against such transfer (where transfers are done on a monthly basis); and

(b) implements effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement; and

(c) has in respect of previous similar transfers complied with all the requirements as set out above; and

(d) give permission to site visits done by the **MUNICIPALITY.**

WHEREAS the **MUNICIPALITY** has approved a Grants-in-Aid Policy, in terms whereof applications are considered;

WHEREAS the **BENEFICIARY** has applied for a grant-in-aid as per the official grant-in-aid application form; and

WHEREAS the **MUNICIPALITY** has approved such application, subject to certain conditions;

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

1. TRANSFER OF FUNDS

1.1 The **MUNICIPALITY** hereby undertakes to transfer an all-inclusive amount of

R40 000.00…… (…….), being a donation for the period **01 July 2026...** to **30 June 2027** to the **BENEFICIARY**.

1.2 Bank Account details: (The following are confirmed through a correctly completed Creditors Control Form.)

Account number	:	2016309296
Name of financial institution	:	NEDBANK
Name of account holder	:	NEWTONS AFC
Branch code	:	198765
Type of account	:	SAVINGS ACCOUNT

1.3 The all-inclusive amount will be transferred in equal amounts on the following dates (if applicable):

_____

2. OBLIGATIONS OF BENEFICIARY

2.1 The **BENEFICIARY** must acknowledge in writing to the Municipal Manager that the amount(s) was(were) received in its bank account.

2.2 The **BENEFICIARY** hereby certifies that the money will be utilised in accordance with the role of the organisation or society, to the benefit of the community and in accordance with the project(s) / programme(s) as indicated in the application form.

2.3 The **BENEFICIARY** undertakes to regularly report on a monthly basis (Cat B) to the Municipal Manager regarding the activities conducted, actual expenditure against such transferred funds, as well as the number of people benefiting from the activities should monthly payments be made. If not, an annual report compliant with the reporting requirements will be submitted.

3. SPECIFIC CONDITIONS

3.1 The parties specifically agree on the following:

That the organization will commit to active involvement in any programme run by the municipality in the area of operation of the organization when such a programme is active in the community.

Other conditions:

_____

_____

4. DECLERATION OF INTEREST

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations: (Name and designation)

_____

_____

5. ACQUISITION OF ASSETS

5.1 Should the **BENEFICIARY** wish to acquire any moveable or immovable assets with the money donated in terms of this Agreement, the **BENEFICIARY** hereby undertakes to:-

5.1.1 adhere to the principles as per the **MUNICIPALITY'S** Supply Chain Management Policy, and

5.1.2 take all reasonable steps to ensure that such assets are maintained and that a system of internal control of such assets is in place.

6. RIGHTS OF THE MUNICIPALITY

6.1 The **MUNICIPALITY** shall be entitled, from time to time, to verify the existence and to inspect the activities of the **BENEFICIARY**, having regards for its right to privacy as entrenched in terms of the Constitution of the Republic of South Africa.

6.2 The **MUNICIPALITY** shall further be entitled to peruse the budgets and any progress reports related to the project / programme as per this Agreement.

7. FAILURE TO COMPLY

7.1 Failure by the **BENEFICIARY** to comply with the obligations as set out in Clause 2 of this Agreement, may lead to the cancellation of this Agreement, in which case the **MUNICIPALITY** may demand that the organisation pays back any unspent funds as per this Agreement. The **MUNICIPALITY** may even, depending on the circumstances leading to the non-compliance by the **BENEFICIARY**, demand that the organisation pays back the full amount paid to the **BENEFICIARY**. Failure to comply may result in not considering applications for grants from the **BENEFICIARY** for a period of 5 years.

8. INDEMNIFICATION

8.1 The **BENEFICIARY** hereby acknowledges that it receives the grant voluntarily and that it shall keep the **MUNICIPALITY** indemnified at all times against any loss, cost, damage, injury or liability suffered by the **MUNICIPALITY** resulting from any action, proceeding or claim made by any person (including themselves) against the **MUNICIPALITY** caused directly or indirectly by the use/spending of the grant.

9. DISPUTE RESOLUTION

9.1 Any dispute arising from this Agreement shall be mediated between the Parties by a mutually agreed upon and suitably skilled mediator. Should the mediator be unsuccessful and the Parties fail to reach agreement, the dispute may be referred by the aggrieved Party to the arbitration of a single arbitrator, to be agreed upon between the Parties, or failing agreement, to be nominated on the application of any Party, by the President for the time being of the South African Association of Arbitrators. The decision of the single arbitrator shall be final and binding on the Parties.

10. NOTICES AND DOMICILIA

10.1 The parties choose as their *domicilia citandi et executandi* their respective addresses as set out in this clause for all purposes arising out of or in connection with the agreement at which addresses all processes and notices arising out of or in connection with this Agreement, its breach or termination, may validly be served upon or delivered to the Parties.

10.2 For purposes of this Agreement the Parties' respective addresses shall be:

10.2.1 The **MUNICIPALITY:**

Town House
Plein Street
Stellenbosch
7600

10.2.2 The **BENEFICIARY:**

_____

_____

_____

_____

or at such other address of which the Party concerned may notify the other(s) in writing provided that no street address mentioned in this sub-clause shall be changed to a post office box or poste restante.

10.3 Any notice given in terms of this Agreement shall be in writing and shall-

10.3.1 if delivered by hand be deemed to have been duly received by the addressee on the date of delivery;

10.3.2 if posted by prepaid registered post be deemed to have been received by the addressee on the 8th (eighth) day following the date of such posting;

10.3.3 if transmitted by facsimile/ electronic mail be deemed to have been received by the addressee on the day following the date of dispatch;

10.4 Notwithstanding anything to the contrary contained or implied in this Agreement, a written notice or communication actually received by one of the Parties from another, including by way of facsimile transmission/ electronic mail, shall be adequate written notice or communication to such party.

11. ENTIRE AGREEMENT

This Agreement, including the **Grant-in-Aid policy and application form**, reflects the entire Agreement between the Parties and no variation, amendment or addendum shall be of any force and effect between the Parties unless contained in writing, signed and agreed on by both Parties.

REPRESENTATIONS REGARDING STELLENBOSCH MUNICIPALITY 2026/2027 GRANT IN AID APPLICATION BY SPES BONA ASSOCIATION FOOTBALL CLUB: NPO 321-114

Following the feedback received regarding our Grant-in-Aid application, we note with concern that our application was not successful, or not recommended, due to the reason stated as: *"Executive members listed not aligned with the constitution."*

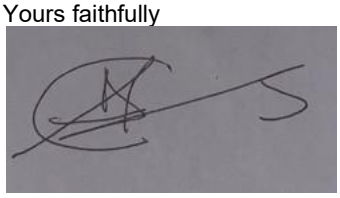
We hereby respectfully request clarity on this matter. Specifically, we would appreciate further detail on:

- Which aspects of our executive member listings were found not to be aligned with the constitution; and
- What criteria or provisions were used in making this determination.

We hereby wish to inform you as follows:

The initial application submitted by Spes Bona AFC for registration as a non-profit organisation did not meet the required standards due to certain shortcomings, including aspects related to its management and governance structure, as well as its office bearers

Accordingly, Spes Bona AFC was requested by the Office of the Director of Non-Profit Organisations to redraft its constitution in line with the recommendations, examples, and guidelines provided on 11 March 2025 (Annexure 1: Paragraph (h), Page 2 – Governance), and to resubmit both the revised constitution and a new application. This was duly completed on 18 March 2025.



Following this process, Spes Bona AFC was successfully registered and entered into the Register of Non-Profit Organisations on 1 July 2025, with formal confirmation of its office bearers on 2 July 2025 (Annexures 2 and 3).

Furthermore, following the notification that Spes Bona AFC was not recommended for the Grant-in-Aid by Stellenbosch Municipality, we have taken additional steps to seek clarity and guidance from the Directorate of Non-Profit Organisations

This is due to the fact that our executive committee structure is aligned with both our club constitution and the NPO registration documents submitted as part of our application. Supporting documentation has been attached for your reference.

We therefore request further clarification on the discrepancy identified, as this finding appears to be inconsistent with our submitted and compliant governance records.

Yours faithfully

Ashley Davids
HEAD OF FOOTBALL CLUSTER
SPES BONA ASSOCIATION FOOTBALL CLUB

Subject: INCOMPLETE SUBMISSION OF APPLICATION

REF: APP-25/474451.

Dear Mr. AC Davids

INCOMPLETE SUBMISSION OF AN APPLICATION FOR REGISTRATION IN TERMS OF THE NONPROFIT ORGANISATION ACT, 1997 (ACT NO.71 OF 1997): SPES BONA AFC

With reference to the above-mentioned application, you are hereby informed that the application has not met the requirements for registration.

(a): State the organisation's name:
It does not make provision for the organisation's name.

(b): Organisation's main and ancillary objectives:
It does not make provision for Organisation's main and ancillary objectives.

(c): Income and property:
It does not make provision that the organizations income and property are not distributable to its members or office-bearers, except as reasonable compensation for services rendered. (Herewith an example clause to be added):

 - The organisation may not give any of its money or property to its members or office bearers. The only time it can do this is when it pays for work that a member or office bearer has done for the organisation. The payment must be a reasonable amount for the work that has been done.

(d): Body corporate:
It does not make provision for the organization to be a body corporate and have an identity and existence distinct from its members or office-bearers. (Herewith an example clause to be added):

The organisation shall:

 - Exist in its own right, separately from its members.
 - Be able to own property and other possessions.

 - Be able to sue and be sued in its own name.

(e): Continued existence:
It does not make provision for the organizations continued existence notwithstanding changes in the composition of its members or office-bearers. (Herewith an example clause to be added):

 - Continue to exist even when its membership changes and there are different office bearers.

(f): Rights in the property or other assets of the organization:
It does not make provision to ensure that members or office-bearers have no rights in the property or other assets of the organization solely by virtue of their being members or office-bearers. (Herewith an example clause to be added):

 - Members or office bearers of the organisation do not have rights over things that belong to the organisation.

(g): Powers of the organisation:
It does not make provision for the powers of the organisation. (Herewith an example clause to be added):

 - The management committee may take on the power and authority that it believes it needs to be able to achieve the objectives of the organisation.

(h): Governance:
It does not make provision for the organisation's structure and governance (Herewith an example clause to be added).

 - A Management committee will manage the organisation. The management will be made up of not less than 10 members. They are the office-bearers of the organisation.

(i): Rules for convening and conducting meetings:
(i) It does not set out the rules for convening and conducting meetings, including quorums for and the minutes to be kept of those meetings. (Herewith an example clause to be added):

Meetings and procedures of the committee

 - The management committee must hold at least two ordinary meetings each year.
 - The chairperson, or two members of the committee, can call a special meeting if they want to. But they must let the other management committee members know the date of the proposed meeting not less than 21 days before it is due to take place. They must also tell the other members of the committee which issues will be discussed at the meeting. If, however, one of the matters to be discussed is to appoint a new management committee member, then those calling the meeting must give the other committee members not less than 30 days notice.
 - The chairperson shall act as the chairperson of the management committee. If the chairperson does not attend a meeting, then members of the committee who are present choose which one of them will chair that meeting. This must be done before the meeting starts.
 - There shall be a quorum whenever such a meeting is held.

 - If the management committee thinks it is necessary, then it can decide to set up one or more sub-committees. It may decide to do this to get some work done quickly. Or it may want a sub-committee to do an inquiry, for example. There must be at least three people on a sub-committee. The sub-committee must report back to the management committee on its activities. It should do this regularly.
 - Minutes of all meetings must be kept safely and always be on hand for members to consult.

 - Rules for conducting meetings the keeping of minutes have not been specified

(j): Quorum:
It does not make provision for the inclusion of a clause in the constitution, which indicate the amount of persons that must attend a meeting to form a quorum.

 - Manner in which decisions are to be made has not been specified

(k): Financial transactions:
It does not provide for the organizations financial transactions to be conducted by means of a banking account. (Herewith an example clause to be added):

 - The organisations financial transactions shall be conducted by means of a banking account.

(l): Financial year:
It does not determine a date for the end of the organizations financial year. (Herewith an example clause to be added):

 - The financial year of the organisation ends on 31 March each year.

(m): Procedure for changing the constitution:
It does not set out the procedure for changing the constitution. (Herewith an example clause to be added):

Changes to the constitution

 - The constitution can be changed by a resolution. The resolution has to be agreed upon and passed by not less than two thirds of the members who are at the annual general meeting or special general meeting. Members must vote at this meeting to change the constitution.
 - Two thirds of the members shall be present at a meeting ('the quorum') before a decision to change the constitution is taken. Any annual general meeting may vote upon such a notion, if the details of the changes are set out in the notice referred to in the previous paragraph.
 - A written notice must go out not less than fourteen (14) days before the meeting at which the changes to the constitution are going to be proposed. The notice must indicate the proposed changes to the constitution that will be discussed at the meeting.

(n): Procedure to wind up or dissolve:

It does not set out the procedure by which the organization may be wound up or

dissolved. (Herewith an example clause to be added):

- The organisation may close down if at least two-thirds of the members present and voting at a meeting convened for the purpose of considering such matter, are in favour of closing down.

(o): Assets remaining after winding up:
It does not provide that, when the organization is wound up or dissolved, any assets remaining after its liabilities have been met, must be transferred to another non-profit organization having similar objectives. (Herewith an example clause to be added):

 - When the organisation closes down it has to pay off all its debts. After doing this, if there is property or money left over it should not be paid or given to members of the organisation. It should be given in some way to another nonprofit organisation that has similar objectives. The organisation's general meeting can decide what organisation this should be.

The application will be considered on receipt of a fully completed application form and a signed copy of the constitution of the organisation which complies with the requirements of section 12 of the NPO Act, 1997.

We herewith return the incomplete application for that reason.

For any further inquiries please contact our office on the provided contact details.

Kindly note that you can submit electronic documentation at www.dsd.gov.za/npo.

Yours faithfully

APPLICATION FOR REGISTRATION IN TERMS OF NON-PROFIT ORGANISATIONS ACT, 1997 (ACT 71 OF 1997): Spes Bona Association Football Club

With reference to your application for registration in terms of the Non-Profit Organisation Act 1997, please find herewith attached certificate of registration as well as a certified copy of registered constitution. The name of your organization was entered into the register on: 01 July 2025

Please be advised that every registered organisation must:

- Reflect its registered status or registration number on all its documents;
- Submit financial statements (compiled by **registered accounting officer** or a firm of auditors/accountants) and a narrative report effective from the date of registration;
- In terms of section 60 of the Close Cooperation Act, (No 69, 1984) an accounting officer means a person should be a registered member of one of following Accounting and Auditing professions e.g. The Institute of Administration and Commerce of Southern Africa, The Chartered Association of Certified Accountants, The South African Institute of Chartered Accountants etc. No person shall be appointed as or hold the office of an accounting officer of a corporation unless he/she is a member of recognized profession as stated above. A member or employee of corporation and a firm whose partner or employee is member or employee of an association/company shall not qualify for appointment as an accounting officer of such corporation unless all the members consent in writing to such appointment;

- A narrative report, which would detail any additions or changes of its office-bearers, name or address and its own constitution or founding documents. A copy of the format of the model narrative report is available on the NPO website www.npo.gov.za or on request.

Please note that in terms of section 17 and 18 of the Act, your organisation is expected to submit the above reports within **9 months after the end of its financial year**. Failure to comply with this requirement may lead to cancellation or deregistration of the organisation from the register of NPO's.

For any further inquiries please contact our office on the provided contact details.

Kindly note that you can submit electronic documentation at www.npo.gov.za.

IDP Ward priorities - zone i

I am writing this message on behalf of the community of Zone i in Kayamandi, for the municipality to recognize these priorities.

1. 3 years ago the municipality vandalized the back of one of the community toilets in in the area. They said that the dug the hole because the were going to install pipes. The only dug the hole and let it as is. No pipes were installed and the hole was left uncovered.
2. The roof and doors of the toilets are damaged and need to be repaired. We reported them a long time ago and they were verified but never repaired.
3. We would also like to remind about the tree felling. There are still trees that remains uncut and a safety concern, particularly the one next to i-199 Makupula str.
4. The land at Swartz close and setona street was serviced. The community Wants the municipality to build them houses on that land.

We hope that the municipality will consider our concerns. For any questions you may have do not hesitate to contact the following community leaders.

1. Ms N Mxesibe (street committee)- +27 73 896 1671
2. Mr M Sisilana (street committee)-0711965881
3. Ms Bulelwa Mbaqa (ward committee)- 0791297739

FOR ATTENTION: THE MUNICIPAL MANAGER
Stellenbosch MunicipalityStellenbosch
Date : 22 April 2026

RE: REQUEST FOR INCLUSION OF INFRASTRUCTURE FOR 8-MANGRONDE JOHANNESDAL IN THE INTEGRATED DEVELOPMENT PLAN (IDP)

Dear MS Mettler

This matter has been the subject of many, many discussions, email submissions, and numerous representations to senior personnel in the Planning and Development Department, as well as the office of the Municipal Manager and previous Mayors of Stellenbosch Municipality. The letter attached, dated 19th April 2024, was a formal request to construct a basic road into the area to enable landowners to access their properties. We have received no response to this request.

Access to and into the 8-mangronde has become increasingly urgent and we therefore request that the provision of basic infrastructure, specifically an access road, be included in the IDP for implementation. Our motivation is as follows:

1. APPROVED LAND USE AND EXISTING PRECEDENT:
The piece of land in question consists of 8 portions of approximately 1.2 hectares each. A road layout for the area has already been formally planned and approved by the Municipality. The subdivision of one portion, portion 11, was approved and a house, that of Mr Lotter Lackay, was constructed several years ago. Why then this reluctance and apparent negative response to further request for development. Land has become an increasingly scarce resource in the Dwarsriver Valley, and this beautiful piece of land could make a huge contribution housing needs if made accessible.

2. DISASTER RISK - FIRE
Mountain fires pose a constant threat, not only to the people of the Johannesdal and Pniel, but also to farms on the other side of Simonsberg.
Despite repeated discussion and request for a road into the area to allow people to access and clear and/or start utilising the properties for housing, little progress has been made. And importantly, this prevents emergency responses access when needed.

3.SAFETY AND SECURITY
The absence of access and occupation has led to an increase in unauthorised occupation (squatters) on the land with an increase in burglaries in Pniel and Johannesdal, a trend we are not accustomed to and not properly prepared for.

4. FINANCIAL BURDEN AND GENTRIFICATION RISK Municipal property rates on the properties have increased steadily over the past years, despite people being unable to utilise their land due to lack of access. This financial burden has already forced four families to sell their land to eager developers. The continued inaccessibility contributes directly to the loss of our heritage and accelerates the unwanted spiral of gentrification in the valley.

REQUEST
WE HEREBY FORMALLY REQUEST THAT THE CONSTRUCTION OF AT LEAST AN ACCESS ROAD TO SERVICE THE 8-MANGRONDE , JOHANNESDAL, BE PRIORITISED AND INCLUDED IN TE
2026/2027 INTEGRATED DEVELOPMENT PLAN AND CAPITAL UDGET FOR IMPLIMENTATION.
We further please request written acknowledgement of this submission and an indication of the process and timeframes for further consideration.

This request is undersigned by representatives of affected parties of the different portions and is in full support hereof.

Stellenbosch Municspaliteit

Stellenbosch

Beste Me Mettler

IDP INSET vir u aandag

Ek verwys na u skrywe van 18 / 01/ 2024 wat verband hou met die aanbring van grootmaatdienste op `n gebied algemeen bekand as die 8-mangronde te Johannesdal.

Ons het die skrywe bespreek en vra hiermee dat die aanbring van grootmaatdienste op die gebied as `n saak van dringendheid en prioriteit as **IDP INSET** gelys word asseblief. Ons doen dit om die volgende redes:

1. U sal weet dat die Dwarsrivier vallei gelys is as `n Erfenis gebied wat meebring dat daar nie op enige of alle grond `n gebou opgerig mag word nie.
2. In die naasliggende Pniël is daar ook geen grond beskikbaar waar ons kinders self ordentlike huise kan bou of koop nie, met die gevolg dat hierdie gronde `n enigste opsie geword het.
3. Hierdie grond lê lank reeds braak met plakkers wat hul intrek neem en so die rustige karakter en kultuur van die area verander en wat dan ook lei tot sosiale euwels soos dwelms en ander wat vloei uit werkloosheid en leegleêry.
4. Daar is die afgelope aantal jare min of geen ontwikkeling in Johannesdal gedoen nie, `n belangrike aspek wat vervat is in "section 26 of the MSA" waarna u ook in u skrywe verwys en wat sekerlik aandag behoort te kry. En indien daar verwarring is ten spyte van die erwe wat in u skrywe genoem word:
5. Die gebied waarvoor ons grootmaakdienste vra is nie die gedeelte wat bekend staan as die Berggrond van plaas 1331 Johannesdal en wat wel groen area is nie, maar grond waaarop daar volgens die munisipaliteit se struktuurplan reeds paaie beplan is en waarvoor daar reeds onderverdelings toegelaat is.

Ons vertrou dat u die skrywe in `n ernstige lig sal sien en met die sluitingsdatum van 23 April, die nodige ernstige aandag daaraan sal gee.

Vriendelike groete, met dank.

Matthew Cyster

Goeie dag Mnr Cyster

Hiermee erken ek ontvangs van u epos, ek bring u skrywe onder die aandag van die Munisipal Bestuurder en keer terug aan u.

Vriendelike groete

Kind regards,

Raydine Wenn

Idas Valley Ward Office, Idas Valley
Stellenbosch, 7600
www.stellenbosch.gov.za

Safety and Security

- Installation of Close Circuit Camera on Old Helshoogte Park in Old Helshoogte Road
- Installation of an LPR Camera at the Main Road 5 (Traffic lights on the corner of Helshoogte Road and R44)
- New camara installation on the corner of Rustenburg Road and Sonnebloem Street
- Use of building at the Community Market as a Satellite Police Station
- Cleaning and fencing (Clearview of Betafence) of all Electricity Boxes in the ward.
- More visibility and regular patrols of the Police and Law Enforcement officials in all roads, the Sport Ground, and farms in the area.
- Regular pruning of tress hanging over electricity wires in the roads of Ward 6, as the need requires,
- Removal of the trees between the back of No 86 to 94 in Botmanskop Road and Helshoogte Road.
- Conduct a need and cost analysis for fencing off with clear fencing the area near the big tree next to the Water Reservoir between Dahlia Street and Helshoogte Road.

Infrastructure

- Construct of pavements or sidewalks for Weber Street, Erasmussmith Street, Bakker Street, Botmanskop Road, Dahlia Street and Speler Street
- Tar the Public parking area next to Idas Valley Library and the Ward Office.
- Upgrading and resealing of roads and potholes as required in the ward.
- Upgrading and replacement of sewer reticulation in Rustenburg Road and other roads if needed.
- Replacement of current over electrical wires with under ground electrical wires
- More regular basis cutting of the grass on the parks and on all pavements in Ward 6. As well as on Helshoogte Road and R44. Not only the 6-week cycle as currently implemented for the Main Roads
- Request traffic lights on the turn-off from Kromme Rhee Road in the direction of Koelenhoff and turn-off from Elsenburg (near Kanonkop). Follow up with Province the status.
- Warning sign board indicating pupils/people crossing the R44 near the second entrance of Cloetesville near Nietvoorbij in the direction of Klapmuts. Follow up with Province the status.
- Warning sign board indication pupils/people crossing the R44 near Timerlea Farm (Blue Jay) in the direction of town. Follow up with Province the status
- Warning sign boards indication pupils/people rossing the R44 on both sides near Remhoogte and Lavinir Follow up with Province the status
- Pedestrian Traffic light on Helshoogte Road near Spar in the direction of Stellenbosch Primary and High School. Follow up with Province the status
- Parking Embayment in front of Old Apostolic Church in Luckhoff Street to help ease the parking problem of dropping and picking up pupils of the nearby schools. Please note no evidence of a Parking Embayment.
- Parking Embayment in front of the New Apostolic Church in Hahn Street. During big services the road is too narrow for other road users to use it.
- Paint the Bus shelters in the ward which is covered by graffiti.
- Regular cleaning of the drains of all roads in the ward to prevent overflowing during rainy conditions and challenges during the warmer seasons.
- Investigate and possible removal of sewages systems in Luckhoff Street (no 19, 23 and St. Jospeph Pre-School), Kahler Streetn(19) , Juffenburg Road, Bakker Street (no 42) As well as other properties experience simal challenges in the ward.
- Regular maintenance and repairs of all streetlights in Ward 6.

- Installation of traffic mirror Infront of Rustenburg House in Rustenburg Road to address the parking challenges of the ballet parents, etc. Please note there was not one installed.

LED Planning

- Request a Building Plan with the correct Land use approval for waterproof covers for the Community Market to allow residents to use the facility as a hall and through all weather conditions.
- Reasonable price for a permit to use the Community for Tourism/Running/Cycling/Walking programs.
- Reasonable price for a permit to use the Community for Skills Development (Arts and Crafts), Reading and other Informal Sport Codes (Chess, Dominoes, etc.)

Recreation and Sport

- Replacement of the vibrance wall with a solid wall on the side of Bloekomlaan Avenue and at the back of the Sport Grounds
- Conduct a feasibility study for the planning of a new rugby clubhouse.
- Conduct regular maintenance of the facilities of the sport field in Idas Valley
- Tar the entrances of Idas Valley Sportsground
- Upgrade seating in the stadium with recycling chairs or wooden panels.
- Upgrade of BMX Track and clear view fencing around it
- Purchase of BMX Bicycles
- Request First Aid equipment set and a stretcher for the following sport code soccer, rugby and netball.

Dear Geraldine/IDP office

The official notice inviting comments on the Draft 4TH Review of the 5th Generation IDP 2022-2027 and the Stakeholder Engagement meeting held on 2026-04-21 in the Town Hall have reference.

Attached hereby please find the comments of the Stellenbosch Agricultural Society. The following documents are attached:

- Comments on tariff and rates policy
- Comments on the Infrastructure Services : Development charges policy
- Comments on the 4TH Review of the 5th Generation IDP 2022-2027

We trust that our comments will be considered in a transparent and positive manner.

It will be appreciated if you can please acknowledge receipt of the said documents.

Kind regards

Emile

Dear Madam

COMMENTS: 4th REVIEW OF THE 5TH GENERATION IDP 2022–2027 DRAFT BUDGET: TARIFF AND RATES POLICY

The Agricultural and associated tourism industry contributes significantly to the areas gross geographic product (GGP) of the Stellenbosch Municipal (WC0024) area.

However as a result of various environmental and economic conditions in the Western Cape the agricultural sector is becoming under severe pressure and the majority of the producers are experiencing difficulty in sustaining their farming operations. These detrimental economic factors leads to severe pressure to conform to the recommendations indicated in the Integrated Development Plan (IDP) read together with the National Development Plan. It therefore is imperative that the IDP and associated budget policies creates an enabling environment that is conducive to increased agricultural activities, so as to ensure food security as well as sustaining the employment opportunities related to the sector.

According to recent statistics new vineyard establishment has decreased significantly over the last few years with declining profit margins in relation to other production areas. These detrimental economic circumstances currently associated with the production and wine industry can lead to an ever changing rural environment to the detriment of the town, the

historical and cultural landscape as well as sustaining the employment opportunities that benefit from the agricultural sector.

As a result of constant increasing external factors influencing the rural economy there are unfortunately various needs and priorities like farm worker housing, installation and upgrading of essential services, provision of social facilities (schools, crèches etc.), the provision and upgrading of the sport facilities as well as skills and training programmes that cannot be addressed adequately by farming entities alone. In light of the current economic environment the producers and land owners are really experiencing great difficulties to maintain the services on an acceptable level of standard. Research however has shown that "*rebates on property tax"* can be of great value to encourage the farmers in assisting municipalities with the provision and maintenance of these services as far as possible.

The Stellenbosch Agricultural Society in association with The Stellenbosch Farmworker Forum hereby requests and propose that the Stellenbosch Municipality adopts the same financial model as currently being implemented by the Bergriver Local Municipality as part of their budget and rates policy framework. The proposed tax rebate policy will apply to bona-fide agricultural owners belonging to agricultural societies affiliated to Agri Western Cape and subsequently also to the SA Agricultural Union, situated in the Stellenbosch WC0024 municipal area.

PROPOSAL

"Agricultural properties will be granted rebates as determined by council in its annual Budget.

(a) An additional 10% rebate calculated as follow could also be granted:

i.	1 x two bedroom houses on property	1.00%
ii.	2 x two bedroom houses on property	2.00%
iii.	3 x two bedroom houses on property	4.00%
iv.	>3 x two bedroom houses on property	5.00%
v.	If electricity provided to worker's houses	0.25%
vi.	If water is provided to worker's houses	0.25%
vii.	If sewer is removed from worker's houses	0.25%
viii.	If refuse is removed from worker's houses	0.25%
ix.	If school on property or transport is provided to learners	1.00%
x.	If sport facilities on property	1.00%
xi.	If transport to nearest town is provided at	

	no cost to workers at least once per month	1.00%
xii.	If training is provided to workers	1.00%”

(b) An additional 2.5 % for every 5ha of newly planted vineyards
(An additional proposal for rebate specifically for the SW024 area)

The above additional rebate will only be evaluated and granted to Bona Fide farmers with submission of the following documentation with their application:

(i) Proof of VAT registration
(ii) Existing account must not be in arrears with the Municipality.
(iii) Copy of I.D. Document of all workers residing on the farm

Applications for the rebate must be submitted in accordance with the prescribed process in terms of the Rates Policy. The additional rebate can only be granted on the value of the property as it appears on the valuation roll. Properties of the same owner, but valued separately cannot be added together for the calculation purposes.

The Stellenbosch Agricultural Society as well as the Stellenbosch Farmworker Forum sincerely believes that the implementation of the above holds a significant advantage to stimulate public private working relations to the benefit of the area and its community in a sustainable manner. The proposal is consistent with the vision and it will give practical execution to the five (5) strategic objectives as adopted in terms of the existing and proposed Municipal Integrated Development Plan.

We trust that the Stellenbosch Municipality favourably will consider these requests and recommendations in support of the agricultural sector.

Your feedback in this regard is kindly awaited.

Yours faithfully,

Emile van der Merwe

Dear Madam

COMMENTS: 4TH REVIEW OF 5th GENERATION IDP 2022- 2027: INFRASTRUCTURE SERVICES DEVELOPMENT CHARGES POLICY (DC POLICY); 2026/2027

The Stellenbosch Agricultural Society, hereby comments on the *2025/2026 Revised Infrastructure Services Development Charges Policy.*

DEVELOPMENT CHARGES (APPENDIX 10 OF IDP)

The Stellenbosch Municipality adopted the new Stellenbosch Zoning Scheme By-law that came into effect on 1 November 2019 as amended during November 2023. The properties that are **located outside the urban areas are predominantly zoned Agricultural/Rural Zone** in terms whereof certain additional land use and consent uses are permitted with the approval of Council. These rights were specifically incorporated in order to assist the farmers with small scale diversification in support of local and rural economic development.

Paragraph 6.2 of the Policy makes provision for certain types of land uses where development **charges do not apply** since the impact of the land use will have an insignificant impact on engineering services infrastructure and it may have a social and/or economic benefit to the Municipality and/or the community:

Paragraph 6.2: Development charges do not apply

It also does not apply to the following types of land use applications, as the impact of these land uses have an insignificant impact on engineering services infrastructure and those uses have a social and/or economic benefit to the Municipality and/or the community. An example as provided for in terms of the policy is provided below:

6.2.3. *House shops up to the lesser of 30% of the floor area of the buildings on the site or 50m2 per erf*

The Society hereby proposes and recommends that provision must also be **made for a <u>home occupation practise</u>** that is conducted from the dwelling house on a farm as per the requirements of the zoning scheme by-law (2023) listed below:

(16) For a <u>home occupation practice</u> in this zone, the following further parameters shall apply together with the provisions in subsections (1) to (13):
- (a) the activity should be of such a limited nature that the operator shall employ no more than two persons.
- (b) the hours of operation shall be limited to between 07:30 to 18:00 Mondays to Saturdays.
- (c) the maximum floor area for a home occupation practice (including storage) shall be no more than 30% of the floor area of the buildings on the land unit up to a maximum of 50m².

Reason for exemption:

- The primary uses of the land unit shall remain the residence of the proprietor
- The maximum area will not exceed 50m²
- The proposed area (for examples an administrative office for the on-line marketing and sale of wine) will have no impact on engineering services
- The area is not open for the public and no goods can be purchases on site
- No additional traffic will be generated

<u>The Society therefore proposes that a home occupation practise on a farm (existing dwelling) also be exempted from paying development charges and that it be included under Section 6.2</u>

PARAGRAPH 13 SPECIAL ARRANGEMENTS

The Stellenbosch Agricultural Society fully supports the provision on farms whereby development charges will not be levied in respect of buildings that are reasonably connected with the permissible main farming activities on the farm (e.g. wine cellars, bottling facilities, packaging and storage). Development charges however will be levied of any other development on farms that requires land use applications. A scientifically calculated reduction **factor of 75% is proposed for farms that are not located within the approved edges as demarcated in the Spatial Development Framework.**

Notwithstanding the above provision the Society is of the opinion that tourism related facilities on farms also be exempted from paying development charges. The current formula, even with the current 50% reduction and **our proposed 75%** reduction will restrict and prevent rural investment and associated job opportunities. The rate per square meter (based on Gross Leasable Area) differs substantially in an urban and rural context. The extreme inset costs together with a development charge is considered counterproductive and is seen as additional burden placed on farmers to sustain their farming practises.

It is sincerely trusted that the Municipality favourably will consider the comments and revision of Development Charges Policy.

Yours faithfully,

Emile van der Merwe

Dear Madam

COMMENTS: 4th REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP 2022 – 2027)

The Stellenbosch Agricultural Society representing organised agricultural in the Stellenbosch area hereby formally provides their comments on the 4TH Review of the 5th Generation IDP 2022/2027 (April 2026).

The Society over the last number of years has submitted comments on the IDP and associated processes. The Society however remains concerned about the lack of integration and alignment between the IDP and SDF with special reference to land reform, rural development programmes, farm worker housing and incentives for commercial farmers to sustain their farming activities.

CHAPTER 4: SPATIAL DEVELOPMENT FRAMEWORK

Local Spatial Development Frameworks

The formulation, preparation and approval of local spatial development frameworks for the rural nodes have been outstanding for a long period of time. It is noted that the Koelenhof Local Spatial Development Framework has been prepared and advertised for public

comment and that the Dwarsriver Valley Local Spatial Development Framework is in process.

The Society welcomes the above planning initiatives are hereby request that priority be given for the Vlottenburg, Spier and Lyndoch Local Spatial Development Frameworks that is located alongside Baden Powell Drive and Polkadraai Roads, respectively.

INTEGRATED HUMAN SETTLEMENTS: HOUSING PROJECTS – FARMWORKER HOUSING

The objective of the Housing Pipeline is to provide more emphasis on the following housing types or programmes:

- Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Mixed-use housing (formalised homeownership **-** especially employer housing).

It is our understanding that employer housing includes farm worker housing and that is should be catered for in mix-use developments. The Stellenbosch Agricultural Society through its affiliated membership structure can leverage private partenship and initiatives to ensure appropriate infrastructe arragements, public facilities and areas earmarked to accommodate farm worker housing.

Apart from the identified mix use developments it is proposed that Spatial Development Framework be amended to include the areas of De Novo and Vaaldraai as potential areas for farmworker housing.

SPECIFIC PROJECTS

KAYAMANDI NORTHERN EXTENSION

The Stellenbosch Agricultural Society supports the northern extension of Kayamandi. The area indicated in green on the proposed rezoning and subdivision plan however must be retained and protected for agricultural purposes. The said area is located on the eastern boundary of commercial farms and our concern is that further residential development on this portion could infringe on property rights and operational management and agricultural activities of the farms.

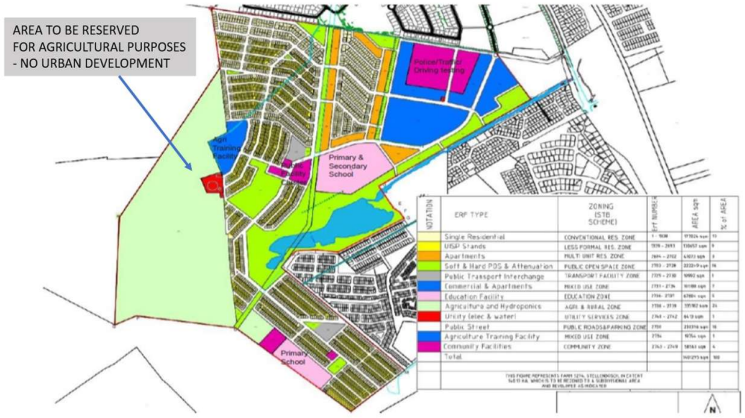

Figure 25 - Northern Extension Integrated Mixed-Income Human Settlement Development Subdivision Layout

SOCIAL HOUSING PROPOSED ON FARM 81/2 AND FARM 81/9

The proposed development of approximately 250 social housing units on the properties will not complement the social functionality of the neighbourhood since it cannot be integrated with other minimum ancillary and complementary uses. The properties are wedged between the railway line to the east and the R304 to the west which does not allow for holistic and integrated neighbourhoods. Urban development in the form of social housing units on the said properties furthermore will compromise the objectives of the Scenic Overlay Zone as set out in the approved Stellenbosch Zoning Scheme By-Law (2023).

2.1. Farms 81/2 and 81/9 Stellenbosch - Ward 16

LOCAL ECONOMIC DEVELOPMENT STRATEGY

Local economic development is the means of systematic identification, development and utilisation of economic opportunity, to benefit local businesses and create opportunities for local communities to improve the lives of residents. The Stellenbosch Agricultural Society in dealing with the rural community and organised agriculture hereby proposed the following interventions:

- Red tape reduction in planning department
- Building plan approvals
- Streamlined process that conforms to By-Laws stipulations
- Tax rebates in relation to heritage protection of farms, new vineyard plantations, provision of institutional/community facilities on farms (creches, pre-schools, public transport, housing, sport fields etc)
- Alien clearing and river management practises
- Partnering/engaging with the Society and the Farm worker Forum in relation to land availability and allocation to emerging farmers
- Liquor and trade licences
- Issuing of zoning certificates
- Streamline/prioritise applications aimed and agri-processing and related tourist facilities

CONCLUSION

It is trusted that the Municipality will consider and include the comments of the Stellenbosch Agricultural Society as part of the 4TH Review of the 5th Generation IDP 2022/2027.

Yours faithfully

Comments: Draft Budget 2026/27 – 2028/29

Appeal for Reconsideration of Funding – 2026/27 Grant-in-aid Applications

Dear Municipal Manager,

I trust this letter finds you well.

I write to formally appeal the decision not to recommend funding for Lord's Acre Christian Community centre in the current municipal budget, and to request that this matter be reopened for reconsideration.

The community centre is a critical asset within ward 1, serving not only as a hub for social, educational, and developmental programmes, but also as a key partner in supporting the municipality during times of crisis. During incidents such as fires and flooding, the centre has consistently assisted with disaster relief efforts by providing a safe space for displaced residents, coordinating the distribution of food and essential supplies, and helping to organise community-led support for affected families.

In many instances, the centre acts as a first point of response—bridging the gap between emergency services and the community. This support reduces pressure on municipal resources and ensures that vulnerable residents receive immediate care and assistance in times of need.

Without adequate funding, the centre's ability to continue offering both its daily programmes and its vital disaster relief support will be severely compromised. This could have far-reaching consequences, particularly as our community continues to face increasing risks related to fires and flooding.

We acknowledge the financial limitations faced by the municipality and the complexity of budget allocation decisions. However, we strongly believe that continued investment in the community centre is both a proactive and cost-effective approach to strengthening local resilience and disaster response capacity.

We therefore respectfully request a reconsideration of the decision not to fund the community centre. We remain committed to working alongside the municipality to support our community, especially in times of crisis, and trust that this appeal will receive your careful consideration.

Thank you for your time and dedication to serving our community.

Yours sincerely,

Pastor Archie Jefthas
Lord's Acre Christian Community Centre

CONSTITUTION

AMENDED FEBRUARY 2025

TABLE OF CONTENT

ABBREVIATIONS AND TERMS

In this Constitution, except where contrary to the context, the following terms have the meanings indicated:

Board	Board of elected Members as constituted in terms of Chapter 4
Chair	The chair of the Board as described in Article 25, who shall also be the President
Club	A club affiliated to a Union
Constitution	The Constitution of Paddlesport South Africa
Delegate	A delegate to a General Meeting
Member	A member of PSA as appointed in accordance with Article 25
DSAC	Department of Sport, Arts and Culture
Federation	Paddlesport South Africa (PSA)
General Meeting	A meeting as described in Chapter 3
Board Member	A Board Member appointed in accordance with Article 27
Advisory Board Members	A Member elected in accordance with Article 26
ICF	The International Canoe Federation
Member Union	A duly affiliated Union of Paddlesport South Africa
Officer	A duly appointed or elected officer bearer on the PSA Board, technical committee or Union representative
President	The president of PSA as elected in accordance with Article 26
Regulations or By-Laws	The constitutional regulations relative to the administration of paddlesport
Rules	The rules of the ICF and any South African rules duly approved
SASCOC	South African Sport Confederation and Olympic Committee
Special General Meeting	A meeting duly convened in accordance with Article18
Special Resolution	Means a resolution passed: (a) at a General Meeting of PSA of which 21 days' notice, accompanied by notice of intention to propose the resolution as a special resolution, has been given to the Members in accordance with this Constitution; and (b) by at least three quarters of votes of those Unions who, being entitled to vote, vote in person at the meeting.
South Africa	The Republic of South Africa (SA)
Standing Committees	The Standing Committees as constituted in terms of Article 33
Union	Any provincial Union affiliated with the Federation.

Vice President	The vice president of PSA as elected in accordance with Article 26.
WADA	(World Anti Doping Agency)

All references made to persons or positions in this Constitution, or the Rules and Regulations are not gender specific. Terms such as chairman shall refer equally to male and female persons.

CONSTITUTION

CHAPTER 1

GENERAL PROVISIONS

1. NAME AND PRINCIPLE

(a) The name of the Federation shall be Paddlesport South Africa (PSA).

(b) PSA is a non-governmental, non-profit, public benefit organisation for multi-discipline canoe-kayak activity of unlimited duration.

(c) Paddlesport activity is defined as any water sport in which a paddler is facing the direction of travel using a single or double bladed paddle for propulsion.

(d) PSA is recognised by the International Canoe Federation (ICF), South African Sport Confederation and Olympic Committee (SASCOC), and the department of Sport Art and Culture (DSAC), as the sole controlling body for paddlesport in South Africa.

(e) PSA is to observe the general and fundamental principles of the International Canoe Federation and Olympic Charter.

(f) PSA is accountable to its stakeholders through normal democratic processes, i.e. via its member Unions and their affiliated Clubs.

2. OBJECTIVES

The objectives of Paddlesport South Africa shall be:

(a) To make every possible effort to develop paddlesport activity on a national and international level, with the priority given to maintaining paddlesport as an Olympic discipline.

(b) To settle disputes that may arise within the sport, and to be the highest authority for the sport in South Africa.

(c) To ensure that SA Championships and international competitions are governed by Competition Rules adapted to the development of paddlesport.

(d) To encourage and safeguard the organisation of SA Championships and international competitions open to all Unions and Federations.

(e) To co-operate with SASCOC and organising committees of National games.

(f) To encourage the development of the sport in communities where there has been no history of participation.

(g) To encourage the development of touring and recreational paddlesport.

(h) To obviate the inherent danger involved in paddlesport as far as practically possible, in particular with respect to children.

(i) The Federation is committed to addressing imbalances resulting from historical inequities, and to ensure that active steps are taken to address these inequalities and will commit to establishing and supporting projects in disadvantaged communities aimed at making the sport accessible and sustainable in these areas.

(j) The Federation is committed to ensuring that participation in the sport is open to all persons. In particular, the Federation will strive to make all disciplines of the sport accessible to physically and/or mentally challenged persons, and to ensure that its rules and events make provision for the fair participation of challenged athletes of all abilities.

(k) The Federation is wholly committed to protecting the confidentiality of its affiliated members, including privacy on the issue of HIV/AIDS.

(l) The Federation is committed to ensuring that the sport is practiced in a non-discriminatory, prejudice-free environment, and that all instances of discrimination or prejudice against any athlete, whether on grounds of race, gender, sex, pregnancy, marital status, ethnic or social origin, colour, sexual orientation, age, disability, religion, conscience, belief, culture, language, birth or any other reason, are acted against swiftly and strongly.

(m) The Federation will strive to afford all girls and women equal opportunities, equal access and equal support in paddlesports at all levels and in all capacities as decision makers, administrators, coaches, technical officials as well as participants so that women and girls may develop and achieve their full potential and enjoy the benefits that paddlesports has to offer. In furtherance of this objective, the Federation will not tolerate any form of harassment against girls or women.

(n) The Federation will support any campaign to provide literature and information to its members on issues relating to HIV/AIDS.

(o) Whereas paddlesport is a non-contact sport, and therefore the risk of transmission of the HI Virus is extremely low, the Federation will ensure that its procedures and policies adequately deal with the threat of transmission during normal paddlesport activities.

(p) The Federation is committed to ensuring that all canoe and kayak activity is conducted in such a way that the environment is not adversely affected.

(q)These objects of PSA shall be carried out in a non-profit manner, and with altruistic or philanthropic intent and the activities of PSA shall be for the benefit of or widely accessible to the general public at large. The powers of

PSA may only be executed in pursuit of the objects of PSA.

3. HEAD QUARTERS

The headquarters of PSA shall be situated at the address of the Secretary General, or any other address stipulated by the Board.

4. PSA EMBLEM

The emblem of PSA is on a black background and is represented by one single kayaker (gold) contained within a circle (black) divided into four. The bottom left of the circle represents the water (blue waves). The lower half of the circle is surrounded by laurel wreath (green). The name – Paddlesport South Africa (gold) –- is written above the single kayaker, i.e. in the upper half of the circle.

5. NATIONAL AND PADDLESPORT SOUTH AFRICA COLOURS

(a) The National Colours of South Africa are green and gold. The badge will be as decided by SASCOC.

(b) Federation teams and PSA sanctioned teams/individuals compete in PSA colours, subject to the requirements set out in Regulation 16 of the SASCOC National Sports Colours Regulations.

(c) The Federation's competition colours are green and gold with the Federation badge, or any design of competition clothing that has been approved by the board.

(d) The Federation's blazer is black with the Federation badge.

6. AWARDS

6.1 SERVICE AWARDS

(a) Paddlesport South Africa may honour its officers for distinguished services with the award of Honorary Life Member.

(b) The award will be of an honorary nature only, and does not entitle the holder thereof, by virtue of the award, to any right to vote or participate in the affairs of PSA.

6.2 HONORARY LIFE MEMBERSHIP

(a) Honorary Life Membership can be awarded in recognition of services rendered in the field of paddlesport.
(b) The award will be presented at an occasion to be decided by the PSA Board.
(c) A candidate must have served paddlesport for at least 10 years.
(d) Nominations may be made by a Union or the Board and must be accompanied by an account of services rendered to the sport to be

submitted to PSA Secretary General for consideration at a PSA General Meeting.

(e) A nominee must receive a minimum of 75% of the vote to be eligible for the award.

(f) The colours of this Award shall be the official badge of the Federation with the following wording added below the blazer badge: Honorary Life Membership.

(g) Honorary life members are exempt from paying PSA levies.

6.3 COMPETITOR AWARDS

(a) Competitors may be awarded National Colours if they have been selected as a Member, a Coach, or a Manager, of a team to a junior, Under 23 or senior World Championships, or the Olympic Games, and having participated in the event in question.

(b) All senior and junior National colour awards are subject to approval by SASCOC and to the conditions and processes set out in Regulations 13 and 14 of the SASCOC National Sports Colours Regulations as amended from time to time.

(c) Competitors may be awarded Federation colours if they have been selected as a member, a coach, or a manager of a team for a World Cup, or any other international event, either in South Africa or overseas, subject to approval by the PSA board, and having participated in the event in question.

(d) Officials selected to accompany teams representing South Africa may wear the official colours of the Federation, provided that their official capacity is stated on the badge (coach/manager).

(e) If an athlete is selected as a reserve for a national or Federation team, that athlete shall be entitled to the relevant competitor award only if the athlete is called up to the team and participates in the event in question.

6.4 PRESIDENTS AWARD

The President's award is a special award that is given to an individual, club, organizing committee or team in recognition of an outstanding contribution to the sport. The award is nominated by the president and ratified by a majority vote of the board. The award will take the form of a certificate with the appropriate wording.

7. LANGUAGES

(a) The official language of PSA is English.

(b) All meetings shall be conducted in English unless there is a majority vote to the contrary.

(c) All correspondence will be in English.

CHAPTER 2

MEMBERSHIP

8. ELIGIBILITY

(a) PSA consists of those Unions which have been approved by the General Meeting.

(b) Between Annual General Meetings the Board has the right to accept Unions into provisional membership, and recognise affiliated Provincial Clubs, subject to ratification by a General Meeting.

(c) Members of a provisional Union or Club are entitled to compete in all competitions.

9. ADMISSION TO MEMBERSHIP

A Union wishing to become a Member of PSA shall:

Make formal application, signed by their Chairman and Secretary, to the Board.

Submit with its application:

(i) A copy of its Constitution
(ii) The list of their officers
(iii) Information regarding the number of its Clubs and members Competition colours of the Union
(iv) A formal undertaking to observe the Constitution, Competition Rules and Regulations of PSA
(v) The payment of the membership fee, the amount of which has been fixed by the Board.

PSA must be notified of particulars (name, chairman, address, number of members) of newly formed clubs of a Union.

Applications for the formation of a Union shall be considered by the next General Meeting and shall be accepted in case of two-thirds (2/3) majority of the votes.

10. EXPULSION AND DEFUNCT UNIONS

(a) If a Union does not continue to fulfil the membership duties or requirements of PSA and does not rectify the situation by a date fixed by the Board, or if there are other justified reasons, the Board may initiate disciplinary proceedings against that Union, including suspending such Union pending further investigation by the Board.

(b) If an affiliated Union should become defunct or should cease its activities for a period of two years, the Federation, after all legal claims have been settled, shall decide whether it will take over all the property, books and records of such a Union.

(c) Any Union expelled from PSA shall have the right to appeal against its expulsion through the Arbitration Foundation of South Africa, or any other body approved by the SA Sports Commission.

11. MEMBERSHIP FEE

(a) An annual membership fee will be paid to PSA by each individual member. The amount for each category of membership will be decided at the Annual General Meeting at the beginning of each year. Annual fees will be paid to the Federation by the members using the online PSA registration system. Membership of the Federation will last for one calendar year from the date on which the affiliation fee is paid.

12. ADMINISTRATION

The Administration of PSA shall consist of:

General Meetings
Board Meetings

CHAPTER 3

GENERAL MEETINGS

13. GENERAL MEETINGS

(a) An Annual General Meeting of the Federation shall be held in accordance with the provisions of this Constitution and on a date and at a venue to be determined by the Board.

(b) All General Meetings other than the Annual General Meeting shall be Special General Meetings and shall be held in accordance with this Constitution.

14. DELEGATES

(a) Each Union shall be entitled to send their Chairman or appointed representative, either of whom must be appropriately empowered by the Union to consider, make decisions and vote at General Meetings.

(b) Each Union shall, at least 48 hours prior to any General Meeting, advice the Secretary General of its appointed Delegate.

15. NOTICE OF GENERAL MEETING

Notice of General Meetings

(a) Notice of General Meetings shall be given to the board members at the email address provided to PSA by the board member. No other person shall be entitled as of right to receive notices of General Meetings.

(b) Notice of General Meeting shall be given at least forty five (45) days prior to the General Meeting and shall specify the place and day and hour of the General Meeting.

(c) The draft agenda for the General Meeting stating the business to be transacted at the General Meeting shall be given at least thirty (30) days prior to the General Meeting, together with any notice of motion received from Unions. A final agenda shall be given at least 7 (seven) days prior to the meeting.

Entitlement to Attend General Meeting

Notwithstanding any other Rule, no Union or Member shall be represented at, or take part in a General Meeting, if they are not in good financial standing with PSA.

16. BUSINESS

Business of General Meetings

(a) The business to be transacted at the Annual General Meeting includes any amendments to the Constitution, the consideration of accounts, reports of the Board (including in relation to the activities of PSA during the last preceding Financial Year) and auditors and the election of Board Members and Life/Honorary Members.

(b) All business that is transacted at a General Meeting, and all that is transacted at the Annual General Meeting, with the exception of those matters set out in **Article 16(a)** shall be special business. “Special business” is business of which a notice of motion has been submitted in accordance with **Article17**.

Business Transacted

No business other than that stated on the notice of motion shall be transacted at that meeting without the approval of the Chair.

17. NOTICES OF MOTION

All notices of motion for inclusion as special business at a General Meeting must be submitted in writing (on the required form) to the Secretary General not less than seven (7) days (excluding receiving date and meeting date) prior to the General Meeting.

18. SPECIAL GENERAL MEETINGS

(a) When Special General Meetings may be held

The Board may, whenever it thinks fit, convene a Special General Meeting of PSA and, where, but for this Rule, more than 15 months would elapse between Annual General Meetings, shall convene a Special General Meeting before the expiration of that period.

(b) Requisition of Special General Meetings

(a) The Board shall on the requisition in writing of the majority of the Unions convene a Special General Meeting.

(b) The requisition for a Special General Meeting shall state the object(s) of the meeting shall be signed by the Unions making the requisition and be sent to PSA. The requisition may consist of several documents in a like form, each signed by 1 or more of the Unions making their requisition.

(c) If the Board does not hold a Special General Meeting within 3 months after the date on which the requisition is sent to PSA, the Unions making the requisition, or any of them, may convene a Special General Meeting to be held not later than 4 months after that date.

(d) A Special General Meeting convened by Unions under this Constitution shall be convened in the same manner, or as nearly as possible as that, in which meetings are convened by the Board.

19. PROCEEDINGS AT GENERAL MEETINGS

(a) Quorum

No business shall be transacted at any General Meeting unless a quorum is present at the time when the meeting proceeds to business. A quorum for General Meetings of PSA shall be the majority of the Unions.

(b) President of Federation to Preside

The President of the Federation shall, subject to this Constitution, preside as Chair at every General Meeting of PSA. If the President is not present, or is unwilling or unable to preside, the board members shall choose one of their numbers present who shall, subject to this Constitution, preside as chair for that meeting only.

(c) Adjournment of Meeting

(a) If within half an hour from the time appointed for the General Meeting a quorum is not present the meeting shall be adjourned to such other day and at such other time and place as the Chair may determine. If at the adjourned meeting a quorum is not present within half an hour from the time appointed for the meeting the meeting will lapse.

(b) The Chair may, with the consent of any General Meeting at which a quorum is present, and shall, if so directed by the meeting, adjourn the meeting from time to time and from place to place but no business shall be transacted at any adjourned meeting other than the business left unfinished at the meeting from which the adjournment took place.

(c) When a General Meeting is adjourned for 30 days or more, notice of the adjourned meeting shall be given as in the case of an original meeting.

(d) Except as provided in **Article 19(c)** it shall not be necessary to give any notice of an adjournment or the business to be transacted at any adjourned meeting.

(d) Voting Procedure

At any General Meeting a resolution put to the vote of the meeting shall be decided on a show of hands, unless a poll is (before or on the declaration of the result of the show of hands) demanded:

(a) by the Chair; or

(b) by the majority of the Delegates, in accordance with the union voting rights.

(e) Recording of Determinations

Unless a poll is demanded under **Article 19(d)**, a declaration by the Chair that a resolution has on a show of hands been carried or carried unanimously or by a particular majority or lost and an entry to that effect in the minutes of the proceedings of PSA shall be conclusive evidence of the fact without proof of the number of the votes recorded in favour of or against the resolution.

(f) Where Poll Demanded

If a poll is duly demanded under **Article 19(d)** it shall be taken in such manner as the Chair directs, and the result of the poll shall be the resolution of the meeting at which the poll was demanded.

(g) Resolutions at General Meetings

Except where a Special Resolution is required, all questions at General Meetings shall be determined by the majority of votes (as set out in **Article 20 & 21**), except as otherwise provided in this Constitution, in the case of an equality of votes on a question at a General Meeting, the Chair is entitled to a casting vote.

(h) Minutes

The Secretary General will arrange for minutes of the resolutions and proceedings of each General Meeting to be recorded and stored, together with a record of the names of persons present at all meetings.

20. VOTING AT GENERAL MEETINGS

Each Union in attendance shall, subject to this Constitution, be entitled to 1 vote plus 1 additional vote for each complete 500 registered members as determined by the paid-up members reflected on the PSA database seven days prior to the meeting.

21. LIMITATION OF VOTING POWER AT GENERAL MEETINGS

No one Union can secure a motion at a General Meeting without the support of at least one other Union.

22. PROXY AND POSTAL VOTING

(a) Proxy Voting Not Permitted

Proxy voting shall NOT be permitted at General Meetings.

(b) Postal Ballot

Should an issue arise between General Meetings that requires a decision or ratification by Unions, the Board may call a postal or email vote in such manner as it considers necessary.

CHAPTER 4

THE BOARD

23. ELECTION OF INITIAL BOARD MEMBERS

Upon approval of this Constitution, the General Meeting of PSA shall determine which 3 of the properly nominated persons will hold the Board Member positions on the Board as set out in **Article 25(a)** and **(b)** until the next Annual General Meeting following the approval of this Constitution. All Unions shall be entitled to nominate persons for election onto the Board, and all such nominations shall be received by the Secretary General at least thirty (30) days prior to the General Meeting at which the Board shall be elected. At the next Annual General Meeting following the approval of this Constitution, 2 of the Board Members shall be elected until the conclusion of the next Annual General Meeting following and the President and 1 of the Board Members shall be elected until the conclusion of the second Annual General Meeting following, to allow for alternative elections of Board Members.

24. POWERS OF THE BOARD

Subject to this Constitution and the direction as laid down by the Annual General Meeting, the business of PSA shall be managed, and the powers of PSA shall be exercised, by the Board. In particular, the Board as the controlling authority of PSA shall be responsible for acting on all national issues in accordance with the objects of PSA and shall operate for the collective and mutual benefit of PSA and the sports of paddlesport throughout South Africa and shall:

(a) Govern the sport of paddlesport in South Africa in accordance with the objects of PSA.
(b) Determine major strategic directions of PSA.
(c) Review PSA's performance in achieving its pre-determined aims, objectives and policies.
(d) Manage international responsibilities.
(e) Appoint ad hoc tribunals, from time to time, to exercise final jurisdiction over any dispute of a disciplinary or sporting nature, adjudicated over by any of its affiliated Unions.

25. COMPOSITION OF THE BOARD

Board Composition

The Board shall comprise the following members:

(a) A President elected by the Unions in accordance with A**rticle 26**;
(b) Three (3) board members elected by the Unions in accordance with

Article 26

(c) The five (5) Chairmen of the member Unions, or a person elected at a general meeting of such Union;

(d) Three (3) advisory board members which may be appointed in accordance with **Article 27.**

(e) A vice president will be elected from the 8 board members, representing the 5 union chairmen and the 3 elected board members.

At least three board members shall not be 'connected persons' in relation to each other (as defined in the Income Tax Act, 58 of 1962 as amended) [Income Tax Act] and no single person shall directly or indirectly control the decision-making powers of PSA.

Chair of Board

The position of Chair shall be held by the President.

26. ELECTION OF BOARD MEMBERS

(a) Qualifications for Board Members

(a) Nominees for board member must meet the qualifications as prescribed from time to time by the Board and set out in the By-laws.

(b) Nominees for board member must declare any position or interest they hold in a Union or discipline, including as an office bearer, director, or a paid appointee.

(b) Elections of Board Members

(a) The Secretary General shall call for nominations forty five (45) days before the date of the Annual General Meeting, except for the election of the Board, as described under **Article 23**. All Unions shall be notified of the call for nominations.

(b) Nominations for board members must be:
  (i) In writing
  (ii) On the prescribed from provided for that purpose – Annexure B
  (iii) Signed by the Delegate of a Union

(c) Certified by the nominee (who must be a member of an affiliated Club) expressing his or her willingness to accept the position for which he or she is nominated.

(d) Nominations must be received by the Secretary General at least thirty (30) days prior to the Annual General Meeting, except for the election of the Board as described in **Article 23.**

(e) If the number of nominations received for the Board is equal to the number of vacancies to be filled or if there are insufficient nominations received to fill all vacancies on the Board, then those nominated shall only be selected if they are elected by the Members by secret ballot in such usual and proper manner as the Chair directs. If the nominees are not elected or if there are vacancies to be filled, further nominations shall be called for at the Annual General Meeting from the floor.

(f) If the number of nominations exceeds the number of vacancies to be

filled, a secret ballot shall be taken in such usual and proper manner as the Chair directs.

(g) The voting shall be conducted by exhaustive ballot, with the nominee with the smallest number of votes being eliminated at each round of voting. The meeting shall first elect the President, followed by the other board member positions. A candidate must attract an absolute majority of the eligible vote (50% plus one vote, rounded down to the nearest integer) to secure election, in which event the candidate will be declared elected whether or not two or more candidates remain. In the event of a tie in the voting, then, say in the instance of the election of the President, the President shall exercise a casting vote. In any event of a tie in voting in the election of the President, then, after announcement of the result, the election shall be resubmitted to vote of the meeting. If that vote also results in a tie then the President shall be determined by lot and the losing nominee shall automatically be appointed as one of the remaining Board Members.

(h) The Board shall include at least one female.

(i) The Board shall include at least one historically disadvantaged member.

(j) The Board shall include at least one paddler representative.

(c) Terms of Appointment

(a) Board Members shall be elected in accordance with this Constitution for a term of 2 years, which shall commence from the conclusion of the Annual General Meeting at which the election occurred until the conclusion of the second Annual General Meeting following.

(b) The President and 1 Board Member (athlete's representative) shall be elected in each year of even number and 2 Board Members (female representative and PDI representative) shall be elected in each year of odd number.

(c) Should any adjustment to the term of Board Members elected under this Constitution be necessary to ensure rotational terms, in accordance with this Constitution, this shall be determined by the Board. Elections to subsequent Boards shall then proceed in accordance with the procedures in this Constitution with approximately half the Board retiring each year.

27. APPOINTMENT OF ADVISORY BOARD MEMBERS

(a) Appointment of Advisory Board Members

The Board may appoint a maximum of 3 advisory Board Members.

(b) Qualifications for Advisory Board Members

The Advisory Board Members may have specific skills in commerce, finance, marketing, law or business generally or such other skills which complement the Board composition, but need not have

experience in or exposure to the sport of paddlesport. They do not need to be members of an affiliated Club of PSA. The Advisory Board Members shall have no voting rights.

(c) Terms of Appointment

(a) Advisory Board Members may be appointed by the Board in accordance with this Constitution for a term of 2 years, which shall begin after the Annual General Meeting until after the conclusion of the second Annual General Meeting following.

(b) One (1) Advisory Board Member may be appointed in each year of odd number and 1 Board Member may be appointed in each year of even number.

(c) Should any adjustment to the term of a Board Member, appointed under this Constitution, be necessary to ensure rotational terms in accordance with this Constitution, this shall be determined by the Board. Appointments to subsequent Boards shall then proceed in accordance with the procedures in this Constitution with approximately half the Board retiring each year.

28. VACANCIES OF BOARD MEMBERS

(a) Grounds for Termination of a Board Member

In addition to the circumstances (if any) in which the office of a Board Member becomes vacant by virtue of the laws of South Africa, the office of a Board Member becomes vacant if the Member:

(a) Dies.

(b) Becomes bankrupt or makes any arrange mentor composition with his creditors generally.

(c) Becomes of unsound mind or a person whose person or estate is liable to be dealt with in anyway under the law relating to mental health.

(d) Resigns his office in writing to PSA

(e) Is absent without the consent of the Board from 2 consecutive meetings of the Board.

(f) Holds any office of employment of PSA.

(g) Without the prior consent or later ratification of the Members in General Meeting holds any office of profit under PSA.

(h) Is directly or indirectly interested in any contract or proposed contract with PSA and fails to declare the nature of his interest.

(i) Is removed from office by Special Resolution under **Article 28.2**.

(j) Would otherwise be prohibited from being a director of a company under the Laws of South Africa or is disqualified from office under such laws.

(b) Removal of a Board Member

(a) PSA in a General Meeting may by Special Resolution remove any Member, before the expiration of their term of office. If a Member is removed in accordance with this Rule the office of the Member becomes vacant and shall be filled in accordance with the procedure

set out in **Article 28.(c)**

(b) Where the Member to whom a proposed resolution referred to in **Article 28.(a)(d)** makes representations in writing to the Secretary General and requests that such representations be notified to the Members, the Secretary General may send a copy of the representations to each Union or, if they are not so sent, the Board Member may require that they be read out at the meeting, and the representations shall be so read.

(c) Casual Vacancies

(c) A vacancy in the position of President shall be filled by a voting member of the board, elected by way of postal vote, as set out in **Article 22.(a)**. Any other Board Member casual vacancy may be filled by the Board, until the next Annual General Meeting of PSA, by means of a nomination by a union, and voted for, by the board, in accordance with the voting procedures in **Article20**.

(d) Any Advisory Board Member casual vacancy may be filled by the Board from among appropriately qualified persons, for the remainder of the Member's term.

(d) Remaining Members

May act in the event of a casual vacancy or vacancies in the office of a Board Member, the Board may act but, if the number of remaining Members is not sufficient to constitute a quorum at a meeting of the Board, they may act only for the purpose of increasing the number of Members to a number sufficient to constitute such a quorum.

29. MEETINGS OF THE BOARD

(a) Board to Meet

The Board shall meet as often as is deemed necessary in every calendar year for the dispatch of business and may adjourn and, subject to this Constitution otherwise regulate, its meetings as it thinks fit. The Secretary General shall, on the requisition of 3 members of the Board, convene a meeting of the Board within a reasonable time. The Board shall meet at least three times in a calendar year. Meetings may be conducted by teleconference, video conference, or other electronic means.

(b) Decisions of Board

Subject to this Constitution, questions arising at any meeting of the Board shall be decided by a simple majority of votes and all questions so decided shall for all purposes be deemed a determination of the Board. The President, the three (3) elected Board Members and the Union Chairman shall each have 1 vote on any question (9 votes in total). The Chair shall also have a casting vote where voting is equal.

(c) Resolutions not in Meeting

(a) A resolution in writing signed or assented to by electronic mail or other form of visible or other electronic communication by the Board shall be as valid and effectual as if it had been passed at a meeting of the Board duly convened and held. Any such resolution may consist of several documents in like form each signed by 1 or more members of the Board.

(b) Without limiting the power of the Board to regulate their meetings as they think fit, a meeting of the Board may be held where 1 or more of the members is not physically present at the meeting, provided that:

(i) All persons participating in the meeting are able to communicate with each other effectively, simultaneously and instantaneously, whether by means of telephone or other form of communication;

(ii) Notice of the meeting is given to all the Members entitled to notice in accordance with the usual procedures agreed upon or laid down from time to time by the Board and such notice specifies that Directors are not required to be present in person;

(iii) In the event that a failure in communications prevents condition (i) from being satisfied by that number of Members which constitutes a quorum, and none of such Members are present at the place where the meeting is deemed by virtue of the further provisions of this article to be held, then the meeting shall be suspended until condition is satisfied again. If such condition is not satisfied within 15 minutes from the interruption the meeting shall be deemed to have terminated.

(iv) Any meeting held where 1 or more of the Members is not physically present shall be deemed to be held at the place specified in the notice of meeting provided a Member is there present and if no Member is there present the meeting shall be deemed to be held at the place where the Chair is located.

(d) Quorum

At meetings of the Board the number of Members whose presence (or participation under **Article 29(c)**) is required to constitute a quorum is the majority of the Members but shall be a minimum of five (5) voting Members.

(e) Notice of Board Meetings

Unless all Members agree to hold a meeting at shorter notice (which agreement shall be sufficiently evidenced by their presence) not less than 7 days' oral or written notice of the meeting of the Board shall be given to each Member by the Secretary General. The agenda shall be forwarded to each Member not less than 3 days prior to such meeting.

(f) Validity of Board Decisions

A procedural defect in decisions taken by the Board shall not result in such decision being invalidated.

(g) Chair of Board Meeting

The Chair appointed under **Article 25** shall preside at every meeting of the Board. If the Chair is not present, or is unwilling or unable to preside, the Members shall choose one of their numbers to preside as chair for that

meeting only.

30. CONFLICTS

(a) Members' Interests

A Member is disqualified by holding any place of profit or position of employment in PSA, any Union or in any company or incorporated association in which PSA is a shareholder or otherwise interested, or from contracting with PSA or a Union either as vendor, purchaser or otherwise except with express resolution of approval of the Board. Any such contract or any contract or arrangement entered into by or on behalf of PSA in which any Member is in any way interested will be voided for such reason.

(b) Conflict of Interest

A Member shall declare his interest in any:

(a) contractual matter;
(b) selection matter;
(c) disciplinary matter; or
(d) other financial matter;

In which a conflict of interest arises or may arise, and shall, unless otherwise determined by the Board, recuse himself from discussions of such matter and shall not be entitled to vote in respect of such matter. If the Member votes, the vote shall not be counted. In the event of any uncertainty as to whether it is necessary for a Member to recuse himself from discussions and refrain from voting, the issue should be immediately determined by vote of the Board, or if this is not possible, the matter shall be adjourned or deferred.

(c) Disclosure of Interests

The nature of the interest of such Member must be declared by the Member at the meeting of the Board at which the contract or other matter is first taken into consideration if the interest then exists or in any other case at the first meeting of the Board after the acquisition of the interest. If a Member becomes interested in a contract or other matter after it is made or entered into the declaration of the interest must be made at the first meeting of the Board held after the Member becomes so interested.

(d) General Disclosure

A general notice that a Member is a member of any specified firm or company and is to be regarded as interested in all transactions with that firm or company is sufficient declaration under **Article 30(c)** as regards such member and the said transactions. After such general notice it is not necessary for such Director to give a special notice relating to any particular transaction with that firm or company.

(e) Recording Disclosures

It is the duty of the Secretary General to ensure that any declaration made or any general notice given by a member in accordance with **Articles 30(c) and 30(d)** is minuted.

31. SECRETARY GENERAL

(a) Appointment of Secretary General

A Secretary General may be appointed by the Board for such term and on such conditions as it thinks fit. The Secretary General, shall be entitled to notice of, attend and participate in debate at, all meetings of the Board, but shall have no entitlement to vote.

(b) PSA Management and Administration

The Secretary General shall administer and manage PSA in accordance with this Constitution, and the decisions and directives of the Board. Subject to this Constitution, the By-Laws and any directive of the Board, the Secretary General is required to undertake all such things as appear necessary or desirable for the proper management and administration of PSA.

(c) Secretary General may employ

The Secretary General, in consultation with the Board, may employ such office personnel as are deemed necessary from time to time and such appointments shall be for such period and on such conditions as the Secretary General and the Board determine.

CHAPTER 5

MISCELLANEOUS

32. STRATEGIC FORUM OF DISCIPLINES

Annual Strategic Forum

PSA shall hold a Strategic Forum at least once per year which is to meet to:

(a) inform the Board of significant membership issues
(b) assist the Board to design or review the organisation's strategic direction
(c) discuss nationwide issues
(d) provide feedback to the Board on the results of its governance decisions in practice at the member level
(e) the strategic forum does not need to be a face to face meeting, but can be held in accordance with **Article 29(c)**

The Board shall in its decision making, subject to the provisions of the Constitution and, in so far as it is practically possible, give effect to the strategic decisions made at the meeting.

33. DELEGATIONS

(a) Board may Delegate Functions to Committees

(a) The Board may delegate any duty, task or function to a Union, committee or a PSA member. This delegation shall take place in writing and must specify the scope of authority accorded to that body or individual.
(b) All committees formed by an act of delegation shall be subject to the same rules set for the functioning of the PSA Board under **Article 29**.
(c) A Board Member or Secretary General shall be *ex-officio* members of any committee so appointed. (The Secretary General shall serve as an *ex-officio* member on all Technical Committees, but shall not be entitled to a vote).
(d) The Board may revoke or modify any decision made by a delegated body or individual, once due consultation has taken place, if it is not consistent with the aims, objectives and principles of PSA.

(b) Technical Committees and Individual Portfolios

The Board shall establish the following technical committees ("Technical Committees") and Individual Portfolios under this power of delegation:

(c) Committees

(i) Surf Ski
(ii) Canoe Polo
(iii) Marathon Racing

(iv) Flat water Racing
(v) Slalom Racing
(vi) Wild water Racing
(vii) Freestyle
(viii) Rafting
(ix) Dragon boat Racing
(x) Officials Association
(xi) Para canoe
(xii) Any of the other disciplines that formally affiliates to PSA.

(d) Individual Portfolios

(i) Safety Officer
(ii) Medical Officer
(iii) Environmental Officer
(iv) Development Officer
(v) Officials

The following procedure shall apply in relation to the appointment of members of the Technical Committees and the Individual Portfolios:

i) The Board shall call for nominations for position of Chair and general committee members of the Technical Committees from the member Unions.
ii) The Board shall call for nominations for the individual portfolios from the member unions.
The Board will appoint the required positions from the nominations received and based on the recommendations of the technical committee chair.
iii) If insufficient nominations are received from the Members, or the nominations are considered inappropriate by the Board, the Board shall call for further nominations from Members, failing which the Board shall appoint the positions on the Technical Committee at its discretion.
iv) Each Technical Committee shall include one person to act as an athlete's representative.
v) The Secretary General shall serve as an *ex officio* member on all technical committees.

(e) Procedure of Delegated Entity

(a) Within 7 days of any meeting of any committee, the Committee shall send a copy of the minutes and any supporting documents to the Secretary General.
(b) Every Technical Committee shall meet at least two (2) x per annum. One of these meetings should be a face-to-face meeting of all the committee members. Other meetings may be held in accordance with **Article 29(c)**.

34. BY-LAWS

(a) Board to Formulate By-laws

The Board may (by itself or by delegation to a committee) formulate, approve, issue, adopt, interpret and amend such By-laws, regulations and policies ("By-Laws") for the proper advancement, management and administration of PSA, the advancement of the objects of PSA and the sport of paddlesport as it thinks necessary or desirable. Such By-laws must be consistent with this Constitution. In the event of a conflict between this Constitution and any By-Law, the provisions of this Constitution shall prevail.

(b) By-laws Binding

The following documents listed under this article shall be binding on PSA and its members:

- Advertising Rules By-law
- Competitor and Competitions By-law
- Development By-law
- Safety Regulations By-law
- Disciplinary By-law
- Selection Procedures By-law
- Team Members By-law
- Technical Committee By-law
- Team Managers Manual
- Child Protection Policy
- Sexual Harassment Policy

(c) By-laws Deemed Applicable

All By-Laws, regulations and policies of PSA in force at the date of the approval of this Constitution in so far as such By-Laws, regulations and policies are not inconsistent with, or have been replaced by this Constitution, shall be deemed to be By-Laws under this Article.

(d) Notices Binding on Members

Amendments, alterations, interpretations or other changes to By-Laws shall be advised to the Unions by means of notices approved by the Board and prepared and issued by the Secretary General. The Unions shall be obliged to draw such notices to the attention of their respective Members. Notices are binding upon all Members.

35. RECORDS AND ACCOUNTS

(a) Record keeping

The Secretary General shall establish and maintain proper records and minutes concerning all transactions, business, meetings and dealings of PSA and the Board and shall produce these as appropriate at each Board meeting or General Meeting.

(b) Keeping of Records

Proper accounting and other records shall be kept in accordance generally

accepted accounting principles and/or any applicable code of conduct. The books of account shall be kept in the care and control of the Secretary General.

(c) PSA to Retain Records

PSA shall retain such records for 5 years after the completion of the transactions or operations to which they relate.

(d) Board to Submit Accounts

The Board shall submit to the Annual General Meeting the accounts of PSA in accordance with this Constitution.

(e) Negotiable Instruments

The Federation shall be entitled to open and administer banking accounts for the purpose of carrying out the objectives of the Federation as set out in **Article 2**. All cheques, promissory notes, bankers drafts, bills of exchange and other negotiable instruments, and all receipts for money paid to PSA, shall be signed, drawn, accepted, endorsed or otherwise executed, as the case may be, by 2 persons appointed in writing by the Board.

(f) Financial Year End

The financial year end of the Federation shall run from 1 April to 31 March the following year.

(g) Access to Information

The Federation shall provide such access to information as is required in accordance with the Promotion of Access to Information Act 2 of 2000.

(h) Reporting to the Department of Sport, Arts and Culture (DSAC)

The Federation shall submit such annual reports to DSAC as is required under Article 10(2)(b) and Articles 13(B) and (C) of the National Sport and Recreation Act 110 of 1998.

36. AUDITOR

A properly qualified auditor or auditors shall be appointed and the remuneration of such auditor or auditors fixed by the Board. The auditor's duties shall be regulated in accordance with generally accepted accounting principles and/or any applicable codes of conduct.

37. NOTICE

(a) Manner of Notice

(a) Notices may be given by the Secretary General to any Member by sending the notice by electronic mail, to the Member's electronic mail address.

(b) Where a notice is sent by electronic mail, service of the notice shall be deemed to be effected upon receipt of a confirmation report confirming the electronic mail message was received at the electronic mail address to which it was sent.

(b) Notice of General Meeting

Notice of every General Meeting shall be given in the manner authorised and to the persons entitled to receive notice under this Constitution.

(c) Notice to Member Unions and Affiliated Clubs

Notice to Member Unions or affiliated Clubs (where appropriate or required) shall be deemed given by notice being given in accordance with **Article 37(a)**.

38. ALTERATION OF CONSTITUTION

This Constitution shall not be altered except by Special Resolution.

A copy of the amended Constitution shall, if the Federation is exempted from payment of normal tax under the Income Tax Act, be sent for their records to the Commissioner for the South African Revenue Services or his authorised representative; and

A copy of the amended Constitution shall, if the Federation is registered as a non-profit organisation, be sent to the Directorate of Non-Profit Organisations.

39. INDEMNITY

(a) Members to be indemnified

Every Member, auditor, manager, employee or agent of PSA shall be indemnified against any liability incurred by him/her in his/her capacity as Member, auditor, manager, employee or agent in defending any proceedings, whether civil or criminal, in which judgment is given in his/her favour or in which he/she is acquitted or in connection with any application in relation to any such proceedings in which relief is granted to him/her by the Court.

(a) PSA to Indemnify

PSA shall indemnify its Members and employees against all damages and costs (including legal costs) for which any such Member or employee may be or become liable to any third party in consequence of any act or omission except wilful misconduct:

(a) In the case of a Member performed or made whilst acting on behalf of and with the authority, express or implied of PSA;

(b) In the case of an employee, performed or made in the course of, and within the scope of his/her employment by PSA.

(a) Independently Identity and distribution of assets

(a) The Federation shall exist in its own right, separately from its members, be able to own property and any other assets, and be able to be sued and be sued in its own name. The Federation shall continue to exist even if its members change.

(b) The Federation may not distribute any of its assets or property to its Members or office bearers, except where this is payment for work done for the Federation as authorised by the Federation. In such cases, the payment must be a reasonable sum for the work that has been done.

(c) Members or office bearers of the Federation do not have rights to the assets or property of the Federation solely by virtue of their being members or office bearers.

(d) All funds received by the Federation shall be used solely for the objects for which the Federation was established, or for investment for furtherance of these objects. No funds will be distributed to any person other than in the course of undertaking any 'public benefit activity' (as defined in the Income Tax Act) and no portion of the income or property of the Federation shall be paid or transferred, or indirectly by way of dividend, bonus or otherwise howsoever, to the members or employees, provided that nothing contained in this Constitution shall prevent the payment in good faith of reasonable remuneration to any officer or servant or employee of the Federation in return for services actually rendered to the Federation.

(e) The Federation will not pay any remuneration, as defined in the Fourth Schedule of the Income Tax Act, to any employee, office bearer or other person which is excessive, having regard to what is generally considered reasonable in the sector and in relation to the service rendered, and will not economically benefit any person in a manner which is not consistent with its objects.

(f) No public benefit activity of the Federation will directly or indirectly promote the economic self-interest of any office-bearer or member of the Federation, otherwise than by reasonable remuneration.

(g) The Federation will not knowingly be a party to, or will not knowingly permit, itself to be used as part of any transaction, operation or scheme of which the sole or main purpose is the reduction, postponement or avoidance of liability for any tax, duty or levy which, but for the transaction, operation or scheme, would have been or would have become payable by any person under the Income Tax Act or any other Act administered by the Commissioner for SARS.

(h) The Federation shall be prohibited from using its resources directly or indirectly to support, advance or oppose any political party.

(l) The Federation shall be entitled to accept donations including revocable and conditional donations provided that:

- the Federation may only accept revocable donations where the reason for the revocation is:
    - a material failure to conform to the designated purpose and conditions of the donation; and
    - any misrepresentation with regard to the tax deductibility thereof in terms of section 18A of the income Tax Act;
- a donor (other than a donor which is an approved public benefit organisation or an institution or body which is exempt from tax in terms of section 10(1)(cA)(i) of the Income Tax Act, which has as its sole or principle object the carrying on of any public benefit activity) may not impose conditions which could enable the donor or any connected person in relation to the donor to derive some direct or indirect benefit from the application of the donation.

CHAPTER 6

DISCIPLINARY REGULATIONS

40. DISCIPLINARY MEASURES

Any disciplinary action to be taken shall be carried out in accordance with the PSA Discipline By-Laws.

CHAPTER 7

DISPUTE RESOLUTIONS

41. DISPUTE RESOLUTION

Any dispute arising out of or in connection with the enforceability of this Constitution, or the application and interpretation of the provisions hereof shall be referred to the Arbitration Foundation of South Africa (AFSA) for resolution through mediation or expedited arbitration in terms of the Rules & Procedures for the Resolution of Disputes in Sport, prevailing at the time such dispute is so referred. In the event of arbitration in terms of the foregoing, such resolution shall be final and binding on the parties to the dispute.

42. DISSOLUTION

The dissolution of PSA shall only be valid if carried by four‐fifths of the votes of Unions represented at a Special General Meeting specifically convened for the purpose. Furthermore, a quorum of two‐thirds of the Unions Clubs is necessary.

If the proposal for dissolution is carried, the assets of PSA shall be transferred to a similar, non-profit and SARS ‐recognised PBO that carries on a public benefit activity at national or provincial level in South Africa similar to the objects Federation's main object. Such body or bodies, and the share of the distribution of the assets, must be carried out in proportions agreed to by the Board.

43. MATTERS NOT COVERED BY THE CONSTITUTION

All matters not specifically covered by the PSA Constitution and the PSA & ICF Competition Rules shall be decided by the Board, subject to ratification by a General Meeting.

44. ADMINISTRATIVE JUSTICE

The Federation is committed to ensuring that any administrative action that is taken by PSA which materially and adversely affects the rights or legitimate expectations of any person is procedurally fair and in accordance with the Promotion of Administrative Justice Act, 3 of 2000.

REPORT OF THE INDEPENDANT AUDITORS TO THE MEMBERS OF PADDLESPORT SOUTH AFRICA

We have audited the financial statements of PADDLESPORT SOUTH AFRICA as set out on Pages 5 - 12 for the year ended 31 March 2025. These financial statements are the responsibility of the members. Our responsibility is to express an opinion on these annual financial Statements based on our audit.

Audit Opinion

In our opinion, the financial statements fairly present, in all material respects, the financial position of the organisation at 31 March 2025 and the results of its operations and cash flows for the year ended in accordance with South African Statements of Generally Accepted Accounting Practice, appropriate to the business and in the manner required by the Companies Act in South Africa.

Scope

We have conducted our audit in accordance with the statements of South African Auditing Standards..

Those standards require that we plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatement. An audit includes:

· examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements
· assessing the accounting principles used and significant estimates made by management, and
· evaluating the overall financial statements presentation.

We believe that our audit provides a reasonable basis for our opinion.

Special Paragraph

The organisations' system of controls is dependent on the close involvement of the members. Where independent confirmation about completeness of the accounting records was not available, we have obtained our assurance from the members that all the organisation's transactions have been correctly reflected in the records.

The members are responsible for the preparation of the financial statements in accordance with the basis of accounting as described in note 1 , for the determining that the basis of preparation is acceptable in the circumstances and for such internal controls as the members determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the member's are responsible for assessing the organisation's ability to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless the member's intend to either liquidate or cease the operations, or have no realistic alternative but to do so.

Email: Office@muir-sa.co.za

Q.P. MUIR
ASSOCIATES CA (SA)
Practice No: 980112-0000

Auditors responsibility for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA's will always detect material misstatement when it exists. Misstatement can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISA's, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

· Identify and access the risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or even override of internal control.

· Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the organisation's internal control.

· Conclude on the appropriateness of the members use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the organisations ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our auditor's report. However, future events or conditions may cause the organisation to cease to continue as a going concern.

· Evaluate the appropriateness of accounting policies used and the reasonableness of the accounting estimates and related disclosures made by the members.

Emphasis of matter

We draw attention to the directors' responsibilities and approval page wherein the directors have considered possible effects of further lockdown periods for the Covid-19 pandemic and the ability of the federation to continue as a going concern. Whilst the directors have reported that they have taken every step possible to ensure this event and its related conditions do not cast a significant doubt on the federations ability to continue as a going concern, it is impossible to accurately determine the prolonged effect of any further lockdown periods or the pandemic itself.

Annual Financial Statements for the year ended 31 March 2025

Board of Directors' Responsibility and Approval

The board of directors are required by the Companies Act of South Africa, to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the federation as at the end of the financial year and the results of its operations and cash flows for the year then ended, in conformity with the International Financial Reporting Standard for Small and Medium-sized Entities. The external auditor is engaged to express an independent opinion on the annual financial statements.

The annual financial statements are prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The board of directors acknowledge that they are ultimately responsible for the system of internal financial control established by the federation and place considerable importance on maintaining a strong control environment. To enable the board of directors to meet these responsibilities, the board of directors sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the federation and all employees are required to maintain the highest ethical standards in ensuring the federation’s business is conducted in a manner that in all reasonable circumstances is above reproach.

The focus of risk management in the federation is on identifying, assessing, managing and monitoring all known forms of risk across the federation. While operating risk cannot be fully eliminated, the federation endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The board of directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The board of directors have reviewed the federation’s cash flow forecast for the year to 31 March 2026 and, in the light of this review, the current financial position, they are satisfied that the federation has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditor is responsible for independently reviewing and reporting on the federation's annual financial statements. The annual financial statements have been examined by the federation's external auditor and his report is presented on pages 3 to 4.

The annual financial statements set out on pages 6 to 12, which have been prepared on the going concern basis, were approved by the board of directors and were signed on the 17 September 2025 on its behalf by:

Annual Financial Statements for the year ended 31 March 2025

Accounting policies

Figures in Rand

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities. The annual financial statements have been prepared on the historical cost basis, and incorporate the principal accounting policies set out below. They are presented in South African Rands.

These accounting policies are consistent with the previous period.

1.1 Property, Plant and Equipment

Property, plant and equipment are tangible items that are held for use in the production or supply of goods or services, for rental to others or for administrative purposes, and are expected to be used during more than one period.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Depreciation is provided using the straight-line method to write down the cost, less estimated residual value over the useful life of the property, plant and equipment, which is as follows:

Computer equipment	3 to 2 years
Developed software	6 years
Office equipment	3 years
Safety equipment	4 years

The residual value, depreciation method and the useful life of each asset are reviewed at each annual reporting period if there are indicators present that there is a change from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item and have significantly different patterns of consumption of economical benefits is depreciated separately over its useful life. Property, plant and equipment with a cost below R7,000 are written off in the year of acquisition.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss in the period.

1.2 Grants received

Grants received are recognised in revenue to the extent that the expenditure , in accordance with the conditions attaching to the grants, has been incurred.

Grants to be utilised in future periods are reflected under liabilities in the statement of financial position.

1.3 Revenue from other resources

Revenue from other sources is recognised to the extent that it is probable that the economic benefits will flow to the federation and the revenue can be reliably measured.

1.4 Medal stock

Medal stock is stated at the lower of cost or net realisable value. Cost is determined on a first in , first out basis.

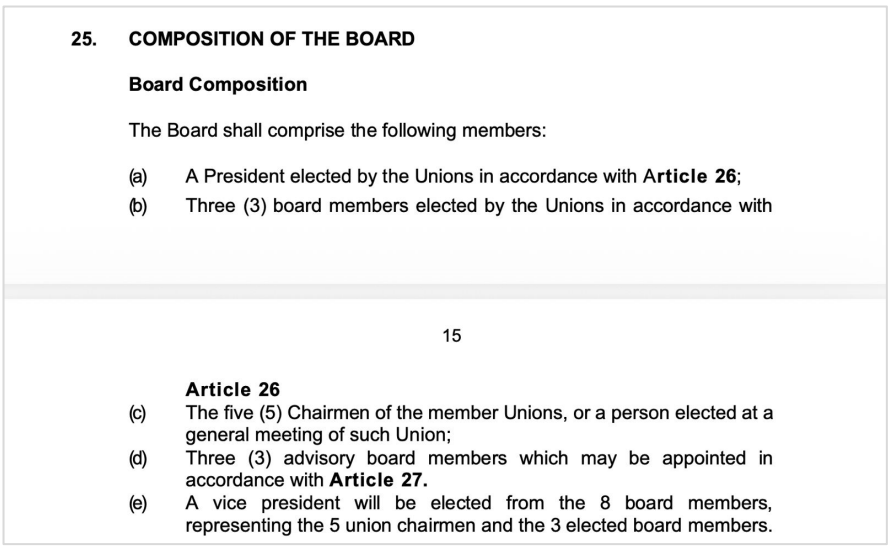
Appeal Against Funding Decision – Paddlesport South Africa Grant in Aid application

Dear Stellenbosch Municipality, attn. Michelle Aalbers and Portia Jansen,



I am writing to formally appeal the decision regarding Paddlesport South Africa's Grant in Aid application for funding (Application Sports Clubs, #91, 27_2_45 in the Council Agenda document).

Having considered the feedback provided, I would like to request a reconsideration of the decision on the following grounds (see screenshot from Council Agenda document below for your perusal).

1. ***Exec listed not aligned with the constitution*** *– The exec list given on page 2-3 of the application does align with the constitution as outlined in section "Composition of the Board Members" on page 14-15.*
2. ***AFS not signed by chairperson –*** *The AFS is signed by the chairperson in the digital version; an apparent printing error has led to the missing or poorly printed signature on the printed document that I submitted.*

I would like to elaborate the following clarifications:

With respect to *1. Exec listed not aligned with the constitution*, we wish to clarify that the names do align but the way I listed them was indeed not optimal. Please consider Table 1 and Table 2 below that link the listed names with the relevant roles as board members according to the Constitution. Please note the screenshot below and p. 14-16 of the attached Constitution.

25. COMPOSITION OF THE BOARD

Board Composition

The Board shall comprise the following members:

(a) A President elected by the Unions in accordance with **Article 26**;
(b) Three (3) board members elected by the Unions in accordance with

15

Article 26
(c) The five (5) Chairmen of the member Unions, or a person elected at a general meeting of such Union;
(d) Three (3) advisory board members which may be appointed in accordance with **Article 27.**
(e) A vice president will be elected from the 8 board members, representing the 5 union chairmen and the 3 elected board members.

Screenshot 1. Section of the Constitution clarifying the composition of the Board.

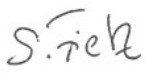
With respect to *2. AFS not signed by chairperson*, we apologise for the oversight from our side on the printed document. Both signatures reflect on our online version, and we did not notice that it did not or too poorly reflect on the print copy. We herewith wish to emphasise that the signature is on the original documents as demonstrated in the full AFS document attached and the screenshot below.

The board of directors have reviewed the federation's cash flow forecast for the year to 31 March 2026 and, in the light of this review, the current financial position, they are satisfied that the federation has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditor is responsible for independently reviewing and reporting on the federation's annual financial statements. The annual financial statements have been examined by the federation's external auditor and his report is presented on pages 3 to 4.

The annual financial statements set out on pages 6 to 12, which have been prepared on the going concern basis, were approved by the board of directors and were signed on the 17 September 2025 on its behalf by:

President Secretary General



Page 5

Screenshot 2. Both signatures reflected on page 5 of the AFS in the original document.

I trust that the above clarifications address the concerns raised and demonstrate that the application meets the criteria for funding. We would appreciate if the committee could review this additional information and reconsider the application.

Please let me know if any further information is required.

Kind regards / Ngemibuliso emihle / Vriendelike groete

Good afternoon,

Attached please find our formal appeal regarding the recent Grant-in-Aid (GiA) application round. It responds to the reasons provided for the non-recommendation of the GiA application submitted on 28 November 2025 by the Sustainability Institute (SI) for the Valley Collaborative (VC) project. I have attached the following documents:

- Appeal letter
- Certificate of NPO registration
- Organisational constitution and Trust Deed
- Audited financial statements
- Resolution on the amendment of the Trust Deed
- Screenshot of email to confirm sustained effort at NPO compliance (Appendix 1 on letter)
- A copy of the full application, as submitted in November 2025, with all documents in one (if you need to review all documents together)

Kind regards,

Irma

INTERPRETATION

In this Trust Deed :

1.1 Clause headings are for convenience only and may not be used in its interpretation.

1.2 Unless the context clearly indicates a contrary intention :

1.2.1 words indicating the singular shall include the plural and vice versa;

1.2.2 any reference to a natural person shall include a juristic person and vice versa;

1.2.3 the words "capital" and "amount" shall be given their widest meanings and shall include assets or rights of any kind;

1.2.4 the word "pay" and its derivatives shall mean and include the words "pay", "deliver", "give possession", "cede" or "transfer" and their respective derivatives.

1.3 The following words and expressions shall bear the meanings assigned to them and cognate words and expressions shall bear corresponding meanings, namely :

1.3.1 **"The Act"** means the Income Tax Act No. 58 of 1962, as amended, or any statute replacing it.

1.3.2 **"Beneficiaries"** means :

1.3.2.1 students, selected by the Trustees, who are enrolled in management and leadership development programmes at the University of Stellenbosch; University of the Witwatersrand; and

any other Universities that may be approved by the Trustees from time to time;

1.3.2.2 programme participants, who shall be selected in accordance with the beneficiary selection criteria set out in clause 18 below;

1.3.2.3 such other persons (including juristic persons) as may from time to time be eligible to receive benefits from this Trust, as a Public Benefit Organisation exempt from income tax in terms of section 10(1)(cN) of the Act; and as an organisation approved by the Commissioner in terms of section 18A of the Act; including institutions, boards, bodies, and other associations of persons, and also the State itself, and all levels of Government as are referred to in this context in terms of the relevant provisions of the Act.

1.3.3 **"The Commissioner"** means the Commissioner for South African Revenue Service (SARS).

1.3.4 **"Financial year"** means the financial period or year ending on the last day of March of each year or such other date as the trustees may from time to time determine, with the consent of the Commissioner.

1.3.5 **"Net income"** means the gross income of the TRUST, less the costs of its administration.

3.1.6 **"Ninth Schedule"** means the Ninth Schedule to the Act, in terms of which "Public Benefit Activities" are defined for purposes of both section 30 (Part I), and for purposes of section 18A (Part II); including any such amendments or additions thereto as may from time to time be of force and effect.

1.3.7 **"Prescribed Fiscal Conditions"** means the provisions prescribed in terms of section 30(1), and in terms of section 18A of the Income Tax Act, as set forth in Schedule "B" to this Trust Deed.

1.3.8 **"Programme participants"** means those persons enrolled from time to time in the educational and training programmes designed and delivered by the TRUST, who are selected by the TRUSTEES and the School of Public Management and Planning at the University of Stellenbosch, and who are drawn from the public and private sectors, and from nonprofit organisations.

1.3.9 **"TRUST"** means this Trust, as originally established under the name "The Spier Leadership Institute Trust', but which is now known as THE SUSTAINABILITY INSTITUTE TRUST.

1.3.10 **"TRUST FUND"** means the assets and investments presently vested in the TRUSTEES for purposes of this TRUST, including amounts actually received, and amounts due or accrued, whether of an income or capital nature, and whether deriving from donations, grants, bequests, or otherwise howsoever; provided that the existing TRUST Fund shall be capable of being added to and increased at any time by means of donation, grant, bequest, or in any other manner howsoever; including additions and accruals, whether of a capital or income nature, and whether devolving upon the TRUST by payment, accrual, transfer, cession, or otherwise.

1.3.11 **"TRUSTEES"** means the Trustees for the time being of this TRUST.

1.4 Reference to a month means a calendar month reckoned from the first of the month to the end of that month.

1.5 Reference to days means calendar days, which shall be counted by excluding the first day and including the last day, unless the latter falls on a Saturday, Sunday or public holiday, in which event the last day shall be the first business day thereafter;

1.6 If any provision in the definitions is a substantive provision conferring rights or imposing obligations, then notwithstanding that such provision is contained only

in these definitions, effect shall be given thereto as if such provision were a substantive provision.

2.

CONTINUATION AND RENAMING OF TRUST

2.1 The TRUST shall continue for an indefinite period, and shall henceforth be known as :

THE SUSTAINABILITY INSTITUTE TRUST

2.2 The TRUSTEES shall have power to change the name of the TRUST, subject to compliance with the formalities stipulated in clause 20 hereunder.

3.

OBJECTS OF THE TRUST

3.1 The main object of the TRUST shall be to establish a permanent institution located in the so-called Lynedoch EcoVillage Development, Lynedoch Road, Stellenbosch:

3.1.1 To act as an implementation agent for the University of Stellenbosch with respect to the design, co-ordination and implementation of a range of transdisciplinary academic programmes aimed at building the leadership and managerial capacity of the beneficiaries to effectively and efficiently manage community-based sustainable development programmes in general, and anti-poverty initiatives, in particular.

3.1.2 To provide the University of Stellenbosch with a means to provide training, support and assistance to community-based projects that benefit poor and needy persons, and which are involved in :

3.1.2.1 anti-poverty initiatives;

3.1.2.2 environmental awareness, and sustainable development projects;

3.1.2.3 youth leadership and development;

3.1.2.4 the design and delivery of training for unemployed persons to obtain SETA-accredited qualifications for employment in the construction sector;

3.1.2.5 the support and facilitation of processes to access land for housing and infrastructure for promoting the Government's land reform and subsidised housing programme in the Lynedoch EcoVillage, and in similar communities across the Republic of South Africa;

3.1.2.6 the provision of early childhood development services for pre-school children;

3.1.2.7 the provision of preventative and education programmes relating to HIV/AIDS.

3.2 The ancillary objects of the TRUST shall be :

3.2.1 to raise, receive and administer funds necessary to establish, equip and operate the permanent educational institute referred to in clause 3.1 and to fund and support the other public benefit activities of the TRUST from time to time;

3.2.2 to establish a full-time administration to manage any building or conversion works, and to design and deliver the various educational and training programmes offered by the permanent educational institution from time to time;

3.2.3 to establish information and data storage systems that will enhance and support the objects of the TRUST.

3.3 The TRUST shall :

3.3.1 not carry on any activities other than those contemplated in clauses 3.1 and 3.2 above;

3.3.2 actively pursue the objects as set out above;

3.3.3 utilise its funds solely for the purpose of such objects;

3.3.4 confine its activities to the Republic of South Africa, except to the extent that the TRUSTEES may otherwise determine; but in that event only as may be permitted in terms of the relevant provisions of the Income Tax Act, and other applicable legislation.

4.

TRUSTEES

4.1 The presently-serving Trustees are :

EVE ANNECKE
LAWRENE BOYA
GITA GOVEN
GERRIT HENDRICKS
NALEDI STELLA FATIMA MABEBA
EDGAR ARTHUR PETERSE
ADRIAN DOMINIC 'T HOOFT ENTHOVEN
ROSIEDA SHABODIEN

such persons having been duly authorised thereto by Master's Certificate dated 5 March 2004, issued by the Master of the High Court, Cape Town, under Master's Reference Number IT.3011/99.

4.2 The TRUSTEES shall at all times have the right to appoint additional Trustees, provided that such appointment is effected in accordance with the decision-making procedure set out herein, and such further Trustees are duly authorised thereto by the Master of the High Court, as required by law.

4.3 There shall be at all times be not less than three (3) TRUSTEES in office for the valid exercise of the powers and discharge of the duties of the TRUSTEES in terms of this TRUST DEED. In the event of such minimum not being fulfilled at any time, then the TRUSTEES remaining in office shall be empowered to act only in the preservation of the TRUST assets, and to appoint the additional TRUSTEE/S necessary for the valid exercise and discharge of their duties in terms of this TRUST DEED; and once such additional TRUSTEES have been appointed and authorised, then the TRUSTEES shall once again be empowered to act in all respects in terms of this TRUST DEED.

4.4 The following persons shall be disqualified from serving or being appointed as TRUSTEES :

4.4.1 any person who is disqualified from occupying office as a director of a company in terms of the company laws for the time being of the Republic of South Africa;

4.4.2 a person whose estate has been sequestrated (provisionally or finally) and has not been rehabilitated;

4.4.3 a person who has been found, by a competent authority, to be of unsound mind; or lunatic; or incapable of managing his or her own affairs.

GCH NSF

4.5 A TRUSTEE shall cease to hold office if he or she :

4.5.1 becomes disqualified from holding office as such in terms of clause 4.4 above; or

4.5.2 resigns office as TRUSTEE by notice in writing to the other TRUSTEES; or

4.5.3 becomes otherwise disqualified in law to hold the office of TRUSTEE; or

4.5.4 is removed as TRUSTEE by a resolution supported by not less than seventy-five percent (75%) of the TRUSTEES then in office; or

4.5.5 dies.

4.6 No portion of the trust assets shall form part of the personal assets of the TRUSTEES, nor shall it be paid or transferred to the TRUSTEES or any member of their families, and all TRUST assets shall be registered in the name of the TRUST, or in the names of the TRUSTEES, or a nominee for the TRUSTEES.

4.7 Nothing herein contained shall prevent the payment in good faith of reasonable remuneration to any TRUSTEE, officer or servant of the TRUST, commensurate with and in return for services actually rendered to the TRUST, at the written request of the TRUSTEES, and in accordance with the decision-making procedures set out in this TRUST Deed.

4.8 The TRUSTEES shall be entitled to the reimbursement of actual costs, expenses and commitments reasonably incurred in good faith on behalf of the TRUST and with the authority of the TRUSTEES.

APPLICATION OF TRUST FUNDS

5.1 The costs of administration of the TRUST shall be a first charge against the TRUST's income; which costs shall include, but not be limited to, all TRUST expenses, and any levy, duty or tax whatsoever levied on the TRUSTEES in such capacity; and all costs, charges and disbursements whatsoever duly incurred by the TRUSTEES in or arising from the performance of their duties under this TRUST DEED.

5.2 The TRUSTEES shall:

5.2.1 apply so much of the available funds of the TRUST, whether capital or income, as they deem necessary for the attainment of the TRUST's objects as set out in clause 3 above;

5.2.2 not distribute any of its assets or net income, save as permitted and for the purposes specified in this TRUST DEED.

5.3 Subject to clause 5.2 above, and due compliance at all times with the Prescribed Fiscal Conditions, the TRUSTEES shall have the power, in their sole discretion to:

5.3.1 determine the manner in which the TRUST capital and the net income shall be applied or dealt with from time to time;

5.3.2 determine the terms and conditions, if any, to be attached to the payment, application or expenditure of the net income or TRUST capital or any portion thereof;

5.3.3 determine when the TRUST capital or net income or any portion thereof shall be applied, expended, paid or used in any manner whatsoever towards the furtherance of the purposes and objects of the TRUST;

5.3.4 accumulate, at any time and from time to time, any portion of the TRUST capital or net income for any capital project or projects or for any other purpose or reason whatsoever which they in their discretion, deem to be in the interests of the TRUST and in the furtherance of purposes and objects of the TRUST, but subject to the constraints stipulated in terms of section 18A of the Act;

5.3.5 invest responsibly any portion of the TRUST capital or net income not immediately required for the attainment of the TRUST objectives, as may be permitted by the Prescribed Fiscal Conditions, viz :

5.3.5.1 with a financial institution as defined in section 1 of the Financial Services Board Act, 1990 (Act No. 97 of 1990);

5.3.5.2 in securities listed on a stock exchange as defined in section 1 of the Stock Exchanges Control Act, 1985 (Act No. 1 of 1985); or

5.3.5.3 in such other prudent investments in financial instruments and assets as the Commissioner may determine after consultation with the Executive Officer of the Financial Services Board and the Director of Nonprofit organisations; provided that the provisions of this sub-paragraph shall not prohibit any such organisation from retaining any investment (other than any investment in the form of a business undertaking or trading activity or asset which is used in such business undertaking or trading activity) in the form that it was acquired by way of donation, bequest or inheritance.

5.4 The TRUST is to be administered in such a manner as to preclude any donor or his or her family from deriving any advantage or benefit from moneys paid to, by, or for the benefit of the TRUST.

6.

SECURITY DISPENSED WITH

No TRUSTEE, whether appointed or co-opted in terms of this TRUST Deed, or appointed as a successor to a TRUSTEE, shall be required by the Master of the High Court, or any other competent authority, to furnish any security of any nature, nor shall any security be required for the due performance of any duty under the Trust Property Control Act No. 57 of 1988, as amended, or under any other statutory provision which may now be or may hereafter become of force or effect; the intent and purpose being that no TRUSTEE shall be required to give any security in respect of or in connection with or arising out of such appointment.

7.

DECISIONS OF THE TRUSTEES AND PERFORMANCE OF THEIR DUTIES

7.1 The business of the TRUST shall be managed by the TRUSTEES. Subject to the TRUSTEES giving effect to the terms and conditions of this Deed, they shall, in administering the TRUST and its affairs, generally adopt such procedures and take such administrative steps as they may from time to time deem necessary and advisable. They shall meet together for the dispatch of business, adjourn and otherwise regulate their meetings as they think fit, provided that the TRUSTEES shall meet no less than twice per annum, and one such meeting must be held within ninety (90) days of the end of the financial year.

7.2 Any TRUSTEE shall be entitled at any time to summon a meeting of the TRUSTEES, provided that any TRUSTEE calling a meeting shall endeavour to

give at least twenty-one (21) days written notice to the other TRUSTEES thereof, save in respect of urgent matters requiring a meeting on less than twenty-one (21) days notice. If for any reason it is impracticable to meet as contemplated in clause 7.1, or pass a resolution as contemplated in clause 7.7, a meeting may be conducted and a resolution may be passed utilising conference telephone and electronic media facilities, provided that the required quorum is satisfied.

7.3 The TRUSTEES may elect from their number a chairperson, a secretary and such other officers of the TRUST as they may deem necessary. The chairperson shall NOT have a casting vote.

7.4 The TRUSTEES shall decide, as soon as possible, after the establishment of the TRUST, what arrangements shall be made for the performance of the secretarial and administrative work of the TRUST.

7.5 Save where otherwise specified in this TRUST Deed, decisions and questions arising at any meeting of TRUSTEES shall be decided by a simple majority at a quorate meeting.

7.6 Fifty percent (50%) plus one (1) of the TRUSTEES in office from time to time shall be required to form a quorum of TRUSTEES for the purposes of meetings of the TRUSTEES.

7.7 A resolution in writing signed by seventy-five percent (75%) of the TRUSTEES in office from time to time shall be valid and effectual as if it had been passed at a meeting of the TRUSTEES duly called and constituted; provided that the proposed resolution is duly communicated to all the TRUSTEES. Any TRUSTEE may indicate his or her agreement in the context of this clause, by way of a signed letter or facsimile transmission, or by electronic mail transmission. A resolution as contemplated in this clause may consist of several documents each signed by one or more of the TRUSTEES (provided that the requisite

number of TRUSTEES have so signed) and shall be deemed to have been passed on the date of signature of the last TRUSTEE who signed.

7.8 All resolutions taken by the TRUSTEES shall be recorded and retained by the secretary of the TRUST.

7.9 The TRUSTEES may appoint any committee from among the TRUSTEES, and may grant or delegate any of their powers to such committees. Any such delegation or grant of powers shall not preclude the TRUSTEES from themselves exercising such powers. The TRUSTEES may withdraw any such delegation or grant of powers at any time. The TRUSTEES may authorise such committees to seek the advice of further persons, who are not TRUSTEES.

7.10 The TRUSTEES may co-opt or appoint a person or entity, whether a TRUSTEE or not, to attend meetings of the TRUSTEES, or of any committee, and/or to undertake any of the duties that the TRUSTEES may from time to time delegate to them. Such persons who are not TRUSTEES shall act in an advisory capacity only and shall not have a vote at any meeting of the TRUSTEES.

7.11 All contracts, deed, cheques or documents required to be signed on behalf of the TRUST shall be signed in such manner as the TRUSTEES from time to time determine.

8.

PRESCRIBED FISCAL CONDITIONS

This TRUST Deed shall be construed subject to due compliance with the Prescribed Fiscal Conditions applicable from time to time. Accordingly, it is hereby stipulated that, notwithstanding anything to the contrary contained or implied in this TRUST Deed :

8.1 The powers of the TRUSTEES shall be subject to their complying at all times

with the constraints and conditions stipulated in section 18A and section 30 of the Income Tax Act, as read with the Ninth Schedule thereto; in order to ensure that the TRUST is eligible for tax-exempt status in terms of section 10(1)(cN), and is further eligible for the fiscal benefit envisaged by section 18A of the Act. The Prescribed Fiscal Conditions applicable to the TRUST as at the date of this Trust Deed are such as are set forth in Schedule "A" hereto.

8.2 Upon approval of the TRUST for purposes of section 18A, the TRUSTEES may accept and issue statutory receipts in respect of donations in support of its public benefit activities referred to in Part II of the Ninth Schedule; and they shall in that event at all times comply with the conditions prescribed by section 18A of the Income Tax Act with respect thereto.

9.

POWERS OF TRUSTEES

9.1 Subject to the express limitations on TRUSTEES' powers set out in this TRUST Deed, the TRUSTEES shall have all such powers and capacity in relation to the TRUST and the TRUST assets as :

9.1.1 are legally required and/or permitted;

9.1.2 any natural person with full legal capacity may have in relation to his own affairs;

and subject as aforesaid, the discretionary powers vested in the TRUSTEES in terms of this TRUST Deed shall be complete and absolute, and any decision made by the TRUSTEES pursuant to any such discretionary powers shall be unchallengeable by any person affected thereby.

9.2 The TRUSTEES shall, subject to the provisions of clause 9.4, and provided that the TRUST's financial transactions are conducted by means of a banking account, deal with the TRUST assets in order to achieve the object of the TRUST, and shall, subject to the provisions of this TRUST Deed, possess and enjoy all rights and powers necessary for and incidental to such purpose.

9.3 Subject to the Prescribed Fiscal Conditions, but otherwise without limitation of the general powers and discretion conferred on the TRUSTEES, they shall have, *inter alia*, the following rights and powers which they may exercise for the purposes of the TRUST in their discretion:

9.3.1 to open and operate any banking account and/or building society account and to draw and issue cheques and to receive cheques, promissory notes and/or bills of exchange, and to endorse any of the same for collection by the bank and/or building society at which the said account was opened;

9.3.2 to take such steps as may be necessary to form any company, trust, voluntary association or other legal entity to carry out more effectively the objects of the TRUST as set out in clause 3, and to delegate to such company, association or legal entity such powers as the TRUSTEES may deem fit, provided that, in the event of the TRUST being approved by the Commissioner as tax exempt, such company, association or legal entity is similarly exempt from the payment of income tax, and entitled to the benefit of section 18A;

9.3.3 to buy or sell (by public auction, private treaty or otherwise) movable, immovable or incorporeal property of whatever nature, and to sign and execute any agreement or deed of sale in relation thereto, and to sign and execute all requisite documents, and do all such things necessary for the purpose of effecting and registering, if needs be, transfers according to law of any such property, whether movable, immovable or incorporeal, bought or sold by the TRUSTEES;

9.3.4 to receive, accept or acquire, or donate, cede, assign or otherwise dispose of, any other right to or over immovable property not constituting full ownership, whether registrable or not;

9.3.5 subject to the Prescribed Fiscal Conditions, and the provisions of clause 9.4, to buy, sell and/or exchange shares, interests, stocks, debentures, debenture stock, units, promissory notes, bills of exchange and any other negotiable instruments and documents of any kind, and to do all things requisite and sign all documents requisite to acquire or, as the case may be, to give transfer and title thereto;

9.3.6 to make loans for the benefit of the eligible beneficiaries (but not to any TRUSTEE, or to any donor and/or any of their relatives or to any private company) on such terms and conditions and at such interest rate, if any, as the TRUSTEES may determine, and to sign and execute all requisite documents and to do all things necessary for the effecting and registration of any security;

9.3.7 to vary any investment made in terms hereof by realising the same and/or by substituting therefor any other investment which the TRUSTEES are empowered in terms hereof to make;

9.3.8 to borrow money on such terms and conditions and at such interest and from such person as the TRUSTEES may determine, and either without security or upon such security over movable or immovable property as the TRUSTEES may determine, and to sign and execute all requisite documents and to do all things necessary for the effecting and registration of any requisite instrument of debt and of any such security;

9.3.9 to mortgage, pledge and/or hypothecate any movable, immovable or incorporeal property forming part of the assets of the TRUST and, for the

purpose of any such mortgage, pledge or hypothecation, to sign and execute all requisite documents and do all things necessary for effecting and registering the same;

9.3.10 subject to the Prescribed Fiscal Conditions, to let, either by written agreement of lease or otherwise, improve, alter or maintain any immovable property belonging to the TRUST or any improvements thereon;

9.3.11 to collect and receive rents and, if necessary, cancel any lease or other tenancy and take all legal proceedings for ejectment or otherwise in connection with any such lease or other tenancy or the cancellation thereof;

9.3.12 to sue for, recover and receive all debts or sums of money, goods, effects and things whatever, which may become due, owing, payable or belonging to the TRUST;

9.3.13 to institute, defend, oppose, adjust, settle, compromise and/or submit to arbitration all accounts, debts, claims, demands, disputes, legal proceedings and matters which may subsist or arise between the TRUST and any person, company, corporation or body whatever, and for the purposes aforesaid, to do and execute all necessary acts and documents;

9.3.14 to attend all meetings of creditors of any person, company, corporation or body whatever indebted to the TRUST, whether in insolvency, liquidation, judicial management or otherwise, and to vote for the election of a TRUSTEE or TRUSTEES and/or liquidator/s and/or judicial manager/s and also to vote on all questions submitted to any such meeting of creditors, and generally to exercise all rights accruing to a creditor;

9.3.15 to exercise the voting power attached to any share, stock, debenture or unit, in such manner as they may deem fit, for the purpose of amalgamation, merger of or compromise in any company or trust in which the share, stock, debenture or unit is held;

9.3.16 to exercise and take up or to sell and realise any rights of conversion or subscription attaching, accruing or appertaining to any share, debentures or units forming part of the assets of the TRUST;

9.3.17 to cause, in the case of any company or unit trust scheme which is precluded by its articles of association or trust deed or which refuses to transfer any shares, debentures or units forming part of the assets of the TRUST into the name of the TRUSTEES as such, the transfer of the said shares, debentures or units into their own names or into the name of a bank, trust company or other designated nominee;

9.3.18 to give receipts, releases or other effectual discharges for any sum of money or things recovered;

9.3.19 to pay out of the funds of the trust all debts incurred on behalf of the TRUST by the TRUSTEES in the exercise of their powers in terms hereof;

9.3.20 subject to clause 9.4.2, to accept on behalf of the TRUST all or any donations of whatsoever nature, from the donor or from any other person whatever;

9.3.21 to determine whether any surplus on the sale of any assets of whatever description of the TRUST, and whether movable or immovable property, and the receipt of any bonus, shares or units by the TRUST be regarded as income or capital of the TRUST, and to revise any such decision taken by them;

9.3.22 to employ professional practitioners, agents and employees, to carry out the objectives of the TRUST and to pay their fees, commissions, remuneration and any other charges out of the funds of the TRUST, and to confer, if necessary, upon such agents or employees so appointed the right to exercise any discretion which may be vested in the TRUSTEES, and to terminate the employment of any such professional practitioners, agents or employees;

9.3.23 to improve and develop immovable property acquired by the TRUST and to expend the capital and/or net income of the TRUST upon the preservation, maintenance and upkeep of any such property;

9.3.24 to enter into any contract and execute any documents by or on behalf of the TRUST for the purposes of giving effect to the objects of the TRUST.

9.4 Notwithstanding anything to the contrary herein contained:

9.4.1 no benefits may be allocated by the TRUST during its existence for any purpose other than those envisaged in clause 3 above;

9.4.2 all donations made by or to the TRUST must be irrevocable and must be subject to the terms and conditions of the TRUST DEED;

9.4.3 any TRUSTEE who renders services to or on behalf of the TRUST shall be entitled to charge and be paid all professional or other charges made by him or her, or his or her firm, for business done by him or her, or his or her firm, in relation to this TRUST DEED, whether or not in the ordinary course of his profession or business, and whether or not such business required the employment of a person engaged in any such profession or business; including commission and/or brokerage, at the usual and normal rates applicable thereto; provided that any remuneration paid is commensurate with the value of actual services rendered to the TRUST by

such TRUSTEE; and provided further that in regard to the appointment of any such TRUSTEE or organisation in which such TRUSTEE has an interest, such TRUSTEE shall :

9.4.3.1 disclose his/her interest;

9.4.3.2 not participate in any decision relating to such appointment or the terms and conditions of such appointment;

9.4.4 the TRUSTEES may not allow immovable property owned by the TRUST to be occupied free of charge by any person save in furtherance of the objects of the TRUST, and save for eligible beneficiaries, or the TRUST's own officers and employees;

9.4.5 paid officials of the TRUST may serve on the management committee or board of TRUSTEES in an advisory capacity only, and, unless they are appointed as TRUSTEES, they will have no voting rights;

9.4.6 no competition, contest, game, scheme, arrangement or system in connection with which any prize may be won shall be conducted or caused to be conducted by the TRUST, unless an authority in terms of the relevant act has been obtained beforehand.

10.

BOOKS OF ACCOUNT

10.1 The TRUSTEES shall keep true and accurate records and books of account of their administration of the TRUST, in such manner and form as may be necessary to reflect fairly the position of the TRUST at all times. There shall be recorded in such books and records, *inter alia*, any change of the TRUST assets from time to time, the income, and all outgoings applicable to the TRUST.

NJF GCH

10.2 The TRUSTEES shall cause the TRUST's books of account to be audited by an independent practising chartered accountant duly appointed in terms of clause 11.

10.3 Copies of the Annual Financial Statements shall be made available to each of the TRUSTEES, as soon as possible after the close of each financial year.

11.

APPOINTMENT OF AUDITOR

11.1 It shall be the responsibility of the Trust Board to appoint an independent practising Chartered Accountant, or firm of independent practising Chartered Accountants, as Auditors to the TRUST. The Trust Board shall also determine the period and conditions of appointment of such Auditors; with power, if deemed necessary, to remove and substitute any such appointee/s as may be deemed appropriate from time to time.

11.2 The Auditor/s appointed as aforesaid shall have unrestricted access to the systems, books, vouchers, and records of the TRUST, and shall be entitled to require from the TRUSTEES, officers, and employees of the TRUST, any information or explanation the Auditor/s may deem necessary for the proper performance of such audit.

12.

ANNUAL FINANCIAL YEAR - ANNUAL GENERAL MEETINGS

12.1 The Financial Year of the TRUST shall commence on 1 April and terminate on the last day of March in each year; unless otherwise determined by the Trust Board

with the approval of the Commissioner.

12.2 The Annual General Meeting of the TRUST shall be held by the TRUSTEES within three (3) months of the end of each financial year.

12.3 The business of an Annual General Meeting shall include:

12.3.1 The presentation and adoption of the TRUSTEES' Annual Report.
12.3.2 The consideration of the Annual Financial Statements.
12.3.3 The (re-)appointment of the Auditors.
12.3.4 Such other matters as may be deemed appropriate.

12.4 Notice of each Annual General Meeting shall be accompanied by a copy of the relevant Annual Financial Statements and any ancillary documentation, and shall be delivered to each of the TRUSTEES, at least Fourteen (14) days prior to the date of such meeting.

13.

NOTICES AND MEETING FORMALITIES

13.1 Notices of Meetings shall be delivered in writing, either personally, or by intranet, internet, fax, prepaid registered post, or in such other manner as may be deemed appropriate by the Chairperson (or Vice-Chairperson), and shall be directed to the last known address of the party concerned, as recorded with the TRUST.

13.2 The inadvertent, but *bona fide*, omission to address notices to any TRUSTEE/S shall not invalidate the proceedings of the ensuing meeting.

13.3 If despatched by Intranet or Internet, such notices shall be deemed to have been received twenty-four (24) hours after data transmission.

13.4 If despatched by prepaid registered post, such notices shall be deemed to have been received five (5) days after the date of posting.

14.

BANKING ACCOUNT – SIGNATURES

14.1 One or more banking accounts shall be maintained in the name of the TRUST with a duly registered banking institution; and all payments and cash received by the TRUST shall be deposited to the credit of such banking account/s, through which the TRUST's financial transactions are conducted.

14.2 All cheques, promissory notes, financial instruments, and banking instructions, requiring signature or authorisation on behalf of the TRUST, shall be signed or authorised, as the case may be, in such manner and by such persons as the Board of TRUSTEES may from time to time determine.

15.

REGISTRATION : NONPROFIT ORGANISATIONS ACT

The TRUSTEES shall take all necessary steps to ensure that the TRUST is registered in terms of the Nonprofit Organisations Act ("the NPO Act"), as required by section 30(3)(g) of the Income Tax Act, as applicable to "Public Benefit Organisations" exempted from income tax in terms of section 10(1)(cN) of the Income Tax Act.

Accordingly, and in compliance with the prescriptive requirements of the NPO Act, it hereby is stipulated with respect to this TRUST (in this clause described as "the Organisation"), as follows:

15.1 the Organisation's name shall be as stated in clause 2;

15.2 the Organisation's object shall be as stated in clause 4;

15.3 the Organisation's income and property shall not be distributable to its TRUSTEE members or office-bearers, save insofar as they may be reimbursed for reasonable out of pocket expenses incurred in the execution of their duties on behalf of the TRUST, and with the authority of the Board of TRUSTEES;

15.4 the Organisation shall be deemed to be a body corporate, and shall have an identity and existence distinct from its TRUSTEE members or office-bearers;

15.5 the Organisation shall continue to exist notwithstanding changes that may from time to time occur in the composition of its TRUSTEE members or office-bearers, as envisaged by clause 4;

15.6 the TRUSTEE members or office-bearers shall have no rights in the property or assets of the Organisation by virtue of their membership or office;

15.7 the powers of the Organisation shall be as set forth in this Trust Deed, including clause 9, as read with Schedule "A";

15.8 the organisational structure and mechanisms for the Organisation's governance shall be as set forth in this Trust Deed, including clauses 4 and 7;

15.9 the rules for convening and conducting meetings, including quorums required for and the minutes to be kept of those meetings, shall be as stated in clauses 7 and 13;

15.10 the manner in which decisions are to be made shall be as stated in clause 7;

15.11 the Organisation's financial transactions shall be conducted by means of a banking account, as stated in clause 14;

15.12 the date for the end of the Organisation's financial year shall be as stated in clause 12.1;

15.13 the procedure for changing the constitution shall be as stated in clause 20;

15.14 the procedure by which the Organisation may be wound up, or dissolved, shall be as stated in clause 20;

15.15 if the Organisation is wound up or dissolved, any assets remaining after all liabilities have been met, must be transferred to some other eligible Public Benefit Organisation, having the same or similar Objects, as stated in clause 20.3 read with clause 9 of Schedule "A".

16.

TRUSTEE INDEMNITY

16.1 Subject to the provisions of any relevant statute, each of the TRUSTEES, shall be indemnified by the TRUST for acts done in good faith; and it shall be the duty of the TRUST to pay all costs and expenses which a TRUSTEE may incur, or become liable for, as a result of a contract entered into, or act done by such TRUSTEE, with the authority of the Trust Board, in the *bona fide* discharge of his/ her duties on behalf of the TRUST.

16.2 Subject to the provisions of any relevant statute, no TRUSTEE shall be liable:

16.2.1 for the acts, receipts, neglects or defaults of any other TRUSTEE or office bearer, or for the acts and decisions of any duly authorised Committee, manager, representative or agent;

16.2.2 for any loss or expense suffered by the TRUST through the insufficiency of, or deficiency in, any title to property acquired by the TRUST;

16.2.3 for the insufficiency of, or deficiency in, any security in or upon which the funds of the TRUST may be invested;

16.2.4 for any loss or damage arising from the bankruptcy, insolvency or delictual act of any person or institution with whom money, securities or assets of the TRUST are deposited; or

16.2.5 for any loss or damage caused to the TRUST in any other manner;

which occurs in the *bona fide* administration of the TRUST; unless it arises in consequence of dishonesty on the part of such TRUSTEE; or the failure by such TRUSTEE to exercise that degree of care, diligence and skill required by law.

17.

LEGAL PROCEEDINGS

All legal proceedings by or against the TRUST shall be instituted in the name of the TRUST.

18.

BENEFICIARY SELECTION

The TRUSTEES shall meet from time to time to determine eligible beneficiary and project selection criteria, which shall take account of, *inter alia*, the following factors:

18.1 whether potential beneficiaries currently occupy or aspire to occupy managerial and leadership positions in Government, non-profit organisations and the small business sector and require educational and training support to build their capacity to effectively and efficiently manage sustainable development programmes and anti-poverty initiatives; and/or

18.3 whether potential beneficiaries will be able to make a meaningful contribution to the development of, in particular, poor and needy persons and communities once they have participated in any of the educational and training programmes offered by the trust; and/or

18.4 whether potential beneficiaries come from historically disadvantaged communities due to legally enforced discrimination based on racial criteria and who, as a result of their participation in education and training programmes will return to their communities to use their skills to implement anti-poverty initiatives and sustainable development programmes in general.

19.

GUIDING PRINCIPLES

The TRUSTEES, in making the decisions in terms of this TRUST Deed, shall do so in a manner which is non-racial, non-sexist, impartial, democratic, accountable and financially responsible.

20.

AMENDMENTS; NAME CHANGE AND DISSOLUTION

20.1 This TRUST Deed may at any time be amended; the name of the TRUST may be changed; and the TRUST may be dissolved; in any such instance, by Resolution

supported by no less than seventy-five percent (75%) of all the TRUSTEES then appointed, being not less than the minimum number stipulated in this TRUST DEED.

20.2 Any such Resolution duly adopted by the TRUSTEES, shall be formalised by Deed as soon as reasonably possible after its adoption.

20.3 A copy of such Deed shall be submitted forthwith upon its execution to the Commissioner, and to the Director of Nonprofit Organisations.

20.4 In the event of the dissolution of the TRUST, any net residue of the TRUST FUND remaining after satisfaction of grants and awards made or committed to eligible Beneficiaries, and after due provision for all the TRUST's liabilities and expenses, shall be given or transferred to one or more other Approved Public Benefit Organisations having the same or similar objects as those of this TRUST, as may be determined by the Trust Board at its discretion; or failing such determination by the Trust Board, then as determined by the Court; provided that any such portion of the net residue as may arise in consequence of a donation made by a taxpayer to whom a receipt has been issued in terms of section 18A of the Income Tax Act, must be given or transferred only to one or more eligible Beneficiaries for purposes of section 18A; and provided further that each such disposition occurring on dissolution of this TRUST, must be approved by the Commissioner, as required in terms of the Income Tax Act.

21.

PATRON/S

The Trust Board shall be entitled, but not obliged, to appoint from time to time one or more persons as Patron/s to the TRUST; in which event such Patron/s shall serve for such term, and shall exercise such prerogatives, as the Trust Board may deem appropriate from time to time.

GCH NSF

THE PRESENTLY-SERVING TRUSTEES HEREBY CONFIRM THEIR ACCEPTANCE OF APPOINTMENT AS TRUSTEES, AND AGREE TO CONTINUE TO UNDERTAKE THE FIDUCIARY RESPONSIBILITY FOR THIS TRUST, UPON THE TERMS AND SUBJECT TO THE CONDITIONS SET FORTH IN THIS SUBSTITUTED DEED OF TRUST.

THUS DONE AND SIGNED at the place, and on the day, month, and year first aforementioned, in the presence of the undersigned witnesses.

RESOLUTION OF THE TRUSTEES OF THE SUSTAINABILITY INSTITUTE TRUST NO._____

Whereby it is resolved that the Trust Deed shall be amended by the substitution of Clause 3.1 with the following:

3.1 The main objectives of the SI are the following:

3.1.1 To have a transformative impact on the lives of the children and youth in the Lynedoch valley through the educational programmes offered;

3.1.2 To contribute towards the realisation of sustainable development through its role as an African thought leadership institute researching, teaching and practicing social innovation for the transition to just and generative futures;

3.1.3 To act as an implementation agent for the University of Stellenbosch (US) with respect to the design, co-ordination and implementation of a range of transdisciplinary academic programmes aimed at building the leadership and capacity of the beneficiaries to effectively and efficiently manage socially just and ecologically restorative oriented sustainable development programmes.

SUSTAINABILITY INSTITUTE: VALLEY COLLABORATIVE

APPLICATION FOR GRANT-IN-AID: 2025/26

Cover Letter

We are pleased to submit this Grant-in-Aid (Category B) funding application on behalf of the Valley Collaborative (VC), with the Sustainability Institute (SI) serving as the fiscal host and institutional partner. The SI and VC work in close partnership: the VC is a community-led initiative rooted in the Lynedoch and Vlottenburg communities, while the SI provides administrative oversight, fiduciary management and strategic support. As fiscal host, the SI will be fully accountable for ensuring that all funds are responsibly managed, transparently administered and used strictly for their intended purpose, while enabling the VC to retain its community-driven character and growing independence.

Founded in 1999, the Sustainability Institute is an international living and learning centre dedicated to teaching, researching and practising restorative ways of being. Our educational and social programmes are deeply rooted in community, with a strong focus on children and youth through the Lynedoch Children's House, Lynedoch Primary School partnership, and the Lynedoch Youth Programme. We bring over two decades of experience in learning design, transformative education, sustainability practice, advisory work and consulting in African contexts. The Institute is recognised as a leading expert institution in navigating transitions toward social justice in complex futures, with our research, teaching and community programmes contributing to sustainable African futures.

The Valley Collaborative emerged from the SI's Covid-19 response, when we, together with local partners, convened a grassroots community committee to coordinate food security efforts, support emergency healthcare and address urgent social needs. This early work highlighted deep systemic challenges and the need for a long-term, community-led approach. In 2023, we began a deliberate process of bringing the Lynedoch and Vlottenburg communities together around a shared agenda: to build a safer, healthier, economically active and socially cohesive valley.

We did this by partnering with Ranyaka to conduct a comprehensive community mapping process, identifying local assets, needs and opportunities. From this, four community-led working groups were formed around the priority themes of **youth empowerment, food security & wellbeing, economic empowerment, and housing, safety & infrastructure**. These groups composed of community members, youth leaders, community kitchen coordinators, local volunteers and practitioners are now actively organising around solutions to the valley's most urgent challenges. Since starting this process, we have built a volunteer base of more than 50 people.

On 15 November 2025, we convened a co-creation workshop with representatives from all four working groups to plan for the coming year and collaboratively shape this funding proposal. The Valley Collaborative Housing, Safety & Infrastructure group is not submitting a GiA proposal, as their activities fall outside the scope of what the GiA funds; however, they continue to play an important supporting and coordinating role in the broader initiative. Across all groups, we intentionally focus on activities that make use of existing community buildings and local partners, given the limited availability of shared community facilities in the valley.

The three groups each address a distinct but interrelated community priorities:
Youth Empowerment:

- Mentorship opportunities for youth offering psychosocial support, skills development and employment pathways - specialised youth interventions.

- Empowering young people through active citizenship to enhance their employability, foster community engagement, and inspire a sense of hope.

Food & Wellbeing: Building community, identity and belonging

- Regular food-based heritage and cultural festivals to strengthen identity, cohesion and intergenerational connection. These activities focus on social cohesion rather than markets or youth mentorship.
- 7 cultural festivals over a three year period
- Annual women's gathering during August (women's month)

Economic Empowerment: Growing economic activity in the Valley

- 8 community markets over a three year period to stimulate local enterprise and income generation.

These proposals reflect the priorities identified by 25 community representatives who live and work directly on the ground and who collaboratively shaped the activities outlined in this application.

In this application we have included the following documents:

	Item	
1	**Cover letter**	X
2	**Application form**	X
3	**AUDITED FINANCIAL STATEMENTS** A copy of the latest audited financial statements must be included in the application. APPENDIX A
(Category A & B)

SUSTAINABILITY INSTITUTE: VALLEY COLLABORATIVE

APPLICATION FOR GRANT-IN-AID: 2025/26

NOTE: ***ATTENDANCE OF THE GRANT-IN-AID WORKSHOP IS COMPULSORY***

PLEASE COMPLETE THE FOLLOWING
(Incomplete and/or late application forms will not be considered.)

A	**REGISTERED NAME OF ORGANISATION**
	The Sustainability Institute Trust
B	**DATE AND YEAR IN WHICH THE ORGANISATION WAS FOUNDED:** (include a brief description of the business or activities of the organization)
	The Sustainability Institute (SI), founded in 1999, is dedicated to activating collective imagination to drive shifts toward just and regenerative futures. Guided by a vision of a world rooted in joy, justice and abundance for people and the planet, SI centres its work around place-based, whole-person learning and regenerative action. SI operates through three core programmes: ● The Imaginarium, a learning campus where people can practise regenerative ways of living and organising. ● Learning at the SI, intergenerational programmes for children, youth and adults that nurture agency, creativity and *ukama*. ● The Knowing Collective, a networked commons that amplifies regenerative knowledge and practice through research and co-learning. Our expertise includes the Research and Advisory services, the design and implementation of training, courses, and research projects for companies across a range of sustainability themes. The Institute is recognised as a leading expert in navigating transitions toward systemic change in complex African futures and serves as a home to some of the foremost academics and practitioners in the field. All our programmes are grounded in organisational resilience, covering governance, people, finance, leadership, brand, and MERL to ensure excellence and long-term impact. Through this integrated approach, the SI fosters imaginative, life-affirming pathways for social and ecological transformation. **The Valley Collaborative (VC)** emerged through our Covid-19 response to community food security and emergency healthcare relief. We established a grass roots community committee working together with volunteers from across the valley community to address systemic concerns in the community. In 2023,

	we started a process to bring the Lynedoch and Vlottenburg communities around a common agenda so that we can build a safer, healthier, economically active and socially cohesive community. We have completed a comprehensive valley mapping initiative, in partnership with Ranyaka to identify our own resources and needs to be met by our community. We have formed 4 community-led working groups around the following issues: youth empowerment, food security & wellbeing, economic empowerment, and housing, safety & infrastructure. With your support, we would like to support these working groups with basic resources to self-organise and solve for our major social challenges.

J	SERVICE FOCUS	Page 998
	Ward number/s in which services are delivered	20
	Which Ward Priority/ies are addressed through the service (Please provide details below)	
	By offering structured youth support, cultural festivals and community markets, these activities create safe spaces, meaningful opportunities and cultural expression directly responding to Ward Priority 2's needs for youth development, arts, culture and alternatives to wandering or substance-related risks. Because residents repeatedly request community facilities and the IDP notes land scarcity, our initiatives also tackle this constraint by activating existing spaces such as local schools, churches and other areas to provide accessible, meaningful programmes.	
	Describe the services for which funds are requested:	
	Youth Empowerment: ● Mentorship opportunities for youth offering psychosocial support, skills development and employment pathways - specialised youth interventions. ● Empowering young people through active citizenship to enhance their employability, foster community engagement, and inspire a sense of hope. **Food & Wellbeing: Building community, identity and belonging** ● Regular food-based heritage and cultural festivals to strengthen identity, cohesion and intergenerational connection. These activities focus on social cohesion rather than markets or youth mentorship. ● 7 cultural festivals over a three year period ● Annual women's gathering during August (women's month) **Economic Empowerment: Growing economic activity in the Valley** ● 8 community markets over a three year period to stimulate local enterprise and income generation.	
	Which Municipal Strategic Goal/s is linked to the services: (Please mark with a X)	
	Valley of Opportunities and Possibilities	X
	Safety and Security	
	Dignified Living	
	Good Governance and Compliance	
	Green and Sustainable Valley	
K	**THE FOLLOWING MUST BE ATTACHED TO THIS APPLICATION: (Category A and B applications) (Please use this form as a check-list, to ensure that you comply to the specified requirements)**	
1	**AUDITED FINANCIAL STATEMENTS** A copy of the latest audited financial statements must be included in the application. Category B applications MUST submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	**X**

2	**ORGANISATIONAL CONSTITUTION** (A signed and dated copy of the Organisation's Constitution, as well as a signed copy of **the Minutes of the AGM/Special Meeting**, to verify the acceptance of the Constitution.)	X
3	**PROJECT PROGRAMME/BUSINESS PLAN** (A copy of the project/program description and/or a business plan for the ensuing financial year. Please ensure that the following is included in the project/program and or business plan, by using the below mentioned bullet points as a guide).	**X**
	❖ Full details of the proposal/project/business plan including objectives; ❖ The number of people from WC024 who will benefit and how the project/program will contribute or enhance the strategic objectives of Stellenbosch Municipality; ❖ The project/program commencement and completion dates; ❖ Information on the total costs of the project/program budget; ❖ A breakdown of costs and an outline of any contributions by fundraising and / or own contributions; ❖ A list of all other sources of funding together with the assessments; ❖ A summary of past achievements; ❖ Reference independent of the applicant and its executive/board or committee members.	
4	**CONFIRMATION OF BANK DETAILS**(An electronic generated confirmation of bank details created through online banking)	**X**
5	**ACCOUNT ON EXPENDITURE FOR PRECEDING FUNDING** (If you have received funding from Stellenbosch Municipality previously, expenditure of the funds received needs to be accounted for with this new application). Please refer to Section M for the format.	**Not applicable (previous funding form the municipality was not Grant in Aid funding)**
6	**PROOF OF REGISTRATION/AFFILIATION** (Attach a copy of the organisation's Registration Certificate of Affiliation)	**X**
L	**REQUIREMENTS CATEGORY B APPLICATIONS** (Please note that Category B applications **MUST** adhere to the following requirements and those listed under section K, except where indicated otherwise.)	
1	**AUDITED FINANCIAL STATEMENTS** A copy of the latest audited financial statements must be included in the application. Category B applications MUST submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	**X**
2	**THREE YEAR BUSINESS PLAN** See the requirements for the business plan as listed under section K as guideline. NOTE: Category B applications MUST provide a clear proposal for a period of three years. Each year must be indicated separately and be costed per annum indicating all expenditure against the projected measurable outcomes. Outcomes must be listed ito how they will be reported on and measured on a monthly basis.	**X**
M	**FORMAT FOR FEEDBACK REPORT**	

1	Narrative report on the project including numbers reached, outcomes reached, evaluation of the project indicating successes and failures/lessons learned.
2	Pictures of the project/program.
3	Financial report on expenditure regarding previous donation separate from the annual financial statements. (Attach proof of expenditure).
N	**THE FOLLOWING SHALL APPLY:**
1	The allocation of Grant-In-Aid will only be considered if the application document has been **fully completed** and signed and is accompanied by the required and supporting documentation referred to therein.
2	An applicant who has been registered as a NPC, NGO, NPO or PBO with the necessary proof thereof, submitted together with this application.
3	Applicants must in their submission clearly indicate/specify and motivate what the funds will be utilized for.
4	The Grant-In-Aid must be exclusively utilized for the purpose defined and the successful applicant must submit the necessary undertaking to this effect.
5	Applicants must in their submission satisfy the Council of their ability to execute the project successfully.
6	Organisations who have already received financial or other assistance from the Council during the previous financial year MUST specify same in their application.
7	No funding will be considered for political groupings, ratepayers organisations or for religious purposes..
8	No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain.
9	Projects outside the boundaries of the Council will not be considered.
10	Expenditure that will not be funded includes: travel costs (unless it is for the transport of beneficiaries), subsistence, accommodation, food (unless intended for the beneficiaries) or entertainment expenses of any kind, staff salaries including bonuses, bursaries and payments in lieu of rates or other municipal charges.
11	Subsequent requests from the applicants to cover overspending on projects will not be considered.
12	Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance management Act no. 56 of 2003 which inter alia stipulates that the organization or body has to:-
	❖ Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting financial management and auditing requirements as may be contained in such an agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programs of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion.
	❖ Report at least once a year on the actual expenditure of the amount allocated to it. Should monthly allocations be made, monthly reports will be required.
13	The Council reserves the right not to give a Grant-In-Aid to any organization applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.
14	Funding will not be considered where a project or organization is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified.
15	Funding will not be considered where in Council's opinion, an organization received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year.
16	Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attach to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of Section 17 of the Non-profit Organisation Act, 1997 and Section 67(1) of the Municipal Finance Management Act, 2003 (MFMA).
17	Funding will not be considered where expenses have already been incurred on a project by the applicant. (The Council's Grant-In-Aid Policy must be consulted for the sake of completeness).

O	**DECLARATION OF INTEREST**
The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations:

Annual Financial Statements for the year ended 31 December 2024

Trustees' Responsibilities and Approval

The trustees are required to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. These annual financial statements have been prepared in accordance with the IFRS for SMEs® Accounting Standard as issued by the International Accounting Standards Board (IASB®) and it is their responsibility to ensure that the annual financial statements satisfy the financial reporting standards with regards to form and content and present fairly the statement of financial position, results of operations and business of the trust, and explain the transactions and financial position of the business of the trust at the end of the financial year. The annual financial statements are based upon appropriate accounting policies consistently applied throughout the trust and supported by reasonable and prudent judgements and estimates.

The trustees acknowledge that they are ultimately responsible for the system of internal financial control established by the trust and place considerable importance on maintaining a strong control environment. To enable the trustees to meet these responsibilities, the trustees set standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the trust and all employees are required to maintain the highest ethical standards in ensuring the trust's business is conducted in a manner that in all reasonable circumstances is above reproach.

The focus of risk management in the trust is on identifying, assessing, managing and monitoring all known forms of risk across the trust. While operating risk cannot be fully eliminated, the trust endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The trustees are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss. The going-concern basis has been adopted in preparing the financial statements. Based on forecasts and available cash resources the trustees have no reason to believe that the trust will not be a going concern in the foreseeable future. The annual financial statements support the viability of the trust.

The annual financial statements have been audited by the independent auditing firm, Theron du Plessis Somerset West Incorporated, who have been given unrestricted access to all financial records and related data, including minutes of all meetings of the beneficiaries, the trustees and committees of the trustees. The trustees believe that all representations made to the independent auditor during the audit were valid and appropriate. The external auditor's unqualified audit report is presented on pages 7 to 8.

Trustees' Report

The trustees present their report for the year ended 31 December 2024.

1. Review of activities

Main business and operations

The Sustainability Institute Trust is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects. There were no major changes herein during the year.

The operating results and statement of financial position of the trust are fully set out in the attached financial statements and do not in our opinion require any further comment.

2. Objective of the trust

The Sustainability Institute Trust is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects.

3. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

4. Events after reporting date

The trustees are not aware of any matter or circumstance arising since the end of the financial year to the date of this report that could have a material effect on the financial position of the trust.

5. Trust capital

No changes were made to the trust capital during the year under review.

6. Trustees

The trustees of the trust during the year and up to the date of this report are as follows:

G Prince
H Newton-King (Chairperson)
J Schulschenk
KA Savin
PS Semprini
R van Niekerk
SB Dunn

Independent Auditor's Report

To the Trustees of THE SUSTAINABILITY INSTITUTE TRUST

Opinion

We have audited the annual financial statements of THE SUSTAINABILITY INSTITUTE TRUST set out on pages 9 to 25, which comprise the statement of financial position as at 31 December 2024, and the statement of comprehensive income, the statement of changes in trust funds and the statement of cash flows for the year then ended, and notes to the annual financial statements, including a summary of significant accounting policies.

In our opinion, the annual financial statements present fairly, in all material respects, the financial position of THE SUSTAINABILITY INSTITUTE TRUST as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Annual Financial Statements section of our report. We are independent of the trust in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter – Donations

We draw attention to Note 13 and 15 in the financial statements, which deals with managed funds and operating income. Donations received by The Sustainability Trust are merely incidental as the most significant part of The Sustainability Institute Trust income arises from funding and grants. However, as with similar organisations, it is not feasible for the organisation to institute accounting controls over donations prior to the entry of the collections into the accounting records, and therefor, it is impracticable for us to extend our examination beyond donation receipts actually recorded. Our opinion is not modified in respect of this matter.

Other Information

The trustees are responsible for the other information. The other information comprises the information included in the document titled "THE SUSTAINABILITY INSTITUTE TRUST Annual Financial Statements for the year ended 31 December 2024", which includes the Trustees' Report, and the statement of Trustees' Responsibilities and Approval, which we obtained prior to the date of this report, and the supplementary information set out on pages 26 to 28. The other information does not include the annual financial statements and our auditor's report thereon.

Our opinion on the annual financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

THERON DU PLESSIS SOMERSET-WES INCORPORATED Reg No: 2005/028545/21

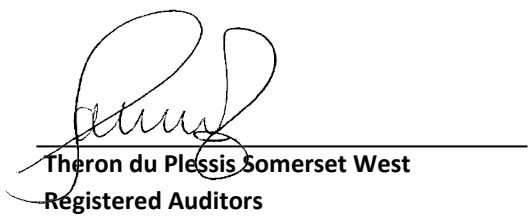
In connection with our audit of the annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Trustees for the Annual Financial Statements

The trustees are responsible for the preparation and fair presentation of the annual financial statements in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities, and for such internal control as the trustees determine is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the trustees are responsible for assessing the trust's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustees either intend to liquidate the trust or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Annual Financial Statements



Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the trust's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the trustees.
- Conclude on the appropriateness of the trustees' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the trust's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the trust to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the trustees regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

THE SUSTAINABILITY INSTITUTE TRUST

(Registration Number IT3011/99)
Annual Financial Statements for the year ended 31 December 2024

Accounting Policies

1. General information

THE SUSTAINABILITY INSTITUTE TRUST ('the trust') is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects.

The trust is registered with the Master of the High Court and domiciled in South Africa. The address of its registered office is Lynedoch Eco Village, Lynedoch Road, 7603.

2. Basis of preparation and summary of significant accounting policies

The annual financial statements of THE SUSTAINABILITY INSTITUTE TRUST have been prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities. The annual financial statements have been prepared under the historical cost convention, as modified by the revaluation of investment property, certain property, plant and equipment, biological assets and derivative financial instruments at fair value. They are presented in South African Rand.

The preparation of financial statements in conformity with the International Financial Reporting Standard for Small and Medium-sized Entities requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the trust's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in note 3.

The principal accounting policies applied in the preparation of these annual financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the trustees.

The trust adds to the carrying amount of an item of property, plant and equipment the cost of replacing parts of such an item when that cost is incurred if the replacement part is expected to provide incremental future benefits to the trust. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to surplus or deficit during the period in which they are incurred.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within 'other gains / (losses)' in the statement of comprehensive income.

The trust elected to adopt a depreciation policy where assets is not depreciated and carried at their original cost. As the trust is a Non-Profit Organisation, the assets is expected to have an extended useful life and value as what would typically be expected.

2.2 Financial instruments

Trade and other receivables

Most sales are made on the basis of normal credit terms and the receivables do not bear interest. Where credit is extended beyond normal credit terms, receivables are measured at amortised cost using the effective interest method. At the end of each reporting period, the carrying amounts of trade and other receivables are reviewed to determine whether there is any objective evidence that the amounts are not recoverable. If so, an impairment loss is recognised immediately in surplus or deficit.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

Accounting Policies

Trade and other receivables are classified as debt instruments and loan commitments at amortised cost.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, demand deposits and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are shown in current liabilities on the statement of financial position.

Trade and other payables

Trade payables are obligations on the basis of normal credit terms and do not bear interest.

Trust capital and retained earnings

All funds of a capital nature received by the trust are accounted for directly to the Trust Capital account. This includes the original donation received by the trustees to establish the trust, as well as all donations received by the trustees since the trust's inception. This excludes capital gains and losses realised by the trust in the normal course of its business activities. Trust capital is reduced by any capital distributed by the trustees to any capital beneficiary.

Retained earnings consist of all revenues, capital gains and losses retained by the trust after the payment of all expenses, taxes and distributions of income and capital gains to beneficiaries.

2.3 Inventories

Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost is determined using the first-in, first-out (FIFO) method. The cost of finished goods and work in progress comprises packaging costs, raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). At each reporting date, inventories are assessed for impairment. If inventory is impaired, the carrying amount is reduced to its selling price less costs to complete and sell; the impairment loss is recognised immediately in profit or loss.

2.4 Provisions

Provisions are measured at the present value of the amount expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.5 Revenue

Revenue is measured at the fair value of the consideration received or receivable. Revenue is shown net of value-added tax, returns, rebates and discounts.

Revenue from the sale of goods is recognised when:

- significant risks and rewards of ownership of the goods have been transferred to the buyer;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

Accounting Policies

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the end of the reporting period. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity;
- the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of transactions involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

The stage of completion of a transaction may be determined by a variety of methods, depending on the nature of the transaction:

- surveys of work performed;
- services performed to date as a percentage of total services to be performed;
- the proportion that costs incurred to date bear to the estimated total costs of the transaction. Only costs that reflect services performed to date are included in costs incurred to date. Only costs that reflect services performed or to be performed are included in the estimated total costs of the transaction.

Interest income is recognised using the effective interest method.

Rental income from investment property that is leased to a third party under an operating lease is recognised in the statement of comprehensive income on a straight-line basis over the lease term and is included in 'other income'.

Dividend income is recognised when the trust's right to receive payment has been established and is shown as 'finance income'.

Royalties are recognised on an accrual basis in accordance with the substance of the relevant agreement.

2.6 Donations and sponsorships

Donations and sponsorships are recognised as income on the date that they are received. Donations and sponsorships in the form of assets are recognised at the value of the asset on the date the asset is received by the trust. Donations and sponsorships are recognised as a liability when received and recognised as income when the conditions are met. Donations and sponsorships are conditional if the trust will have to pay them back to the providers if they are not used in line with the set conditions.

Employee benefits

Compensation paid to employees for the rendering of services are recognised at the undiscounted amount paid or expected to be paid in the accounting period in which the services were rendered.

Where employees accumulate entitlement for paid absences, an expense is recognised as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. In the case of non-accumulating paid absences, the expense is recognised only when the absences occur.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

THE SUSTAINABILITY INSTITUTE TRUST

(Registration Number IT3011/99)
Annual Financial Statements for the year ended 31 December 2024

Accounting Policies

2.7 Grants and subsidies received

Unconditional grants and subsidies received from the government are recognised as income when they are received. Conditional grants and subsidies are recognised as a liability when received and recognised as income when the condition are met. The grants and subsidies are conditional if the trust will have to pay them back to the government if they are not used in line with the set conditions.

2.8 School fees

The amount of school fees receivable is calculated based on learner enrolments multiplied by the school fee amount approved by parents. The amount receivable is recognised when the learners register at the school.

2.9 Related parties

A related party is a person or entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to a reporting entity if that person:
  - has control or joint control of the reporting entity;
  - has significant influence over the reporting entity; or
  - is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - The entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
  - One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
  - Both entities are joint ventures of the same third party;
  - One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;
  - The entity is controlled or jointly controlled by a person identified as a related party;
  - A person identified as having control or joint control over the reporting entity has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or
  - The entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

3. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

No significant estimates and adjustments have been applied in the preparation of these annual financial statements.

Annual Financial Statements for the year ended 31 December 2024

Notes to the Annual Financial Statements

Figures in R	2024	2023
Land and buildings consist of the following:		
Farm House	220,000	220,000
- Cost of Land	534,961	534,961
- Cost of land	1,072,738	1,072,738
- Cost of buildings	2,414,040	2,414,040
- Improvements	4,241,739	4,241,739
- Revaluation surplus		
The Pink House (Creche)	150,000	150,000
- Cost of land	1,083,651	1,083,651
- Cost of buildings	3,847,392	3,847,392
- Revaluation surplus	5,081,043	5,081,043
Guest House		
- Cost of land	1,865,000	1,865,000
- Cost of buildings	875,494	875,494
- Improvements	370,348	370,348
- Revaluation surplus	7,912,635	7,912,635
	11,023,477	11,023,477
Main Building		
- Cost of land	500,000	500,000
- Cost of buildings	4,000,000	4,000,000
- Revaluation surplus	34,750,435	34,750,435
	39,250,435	39,250,435
Old Grade R Building (The Barn)		
- Cost of land	-	-
- Improvements	44,348	44,348
- Revaluation surplus	733,413	733,413
	777,761	777,761
Spier Wine Farm (Wendy house)		
- Improvements	48,326	48,326
Total land and buildings:	60,422,782	60,422,782

Valuations were done by Santam's professional valuation and quantity surveyor on 5 September 2023.

The main building and land on which it is situated has been paid in full by The Sustainability Institute Trust. However, it currently still forms part of Erf 1, Lynedoch, which is subject to a pending sub-division application. The trust therefore has no title deed for the property, but the transaction has been underwritten by Old Mutual - Risk Benefit Solutions (Pty) Ltd and this indemnity insurance will remain in place until the transaction is properly concluded. The sub-division is currently in process and is aimed to be completed within the next financial year.

Although the trust utilises the majority of land and buildings for operational purposes, a part of the premises are leased to third parties. As the portion that are rented out, are immaterial to the value of land and buildings, it is considered impractical and not cost effective to determine the value and reclassify that portion to investment property.

INTERPRETATION

In this Trust Deed :

1.1 Clause headings are for convenience only and may not be used in its interpretation.

1.2 Unless the context clearly indicates a contrary intention :

1.2.1 words indicating the singular shall include the plural and vice versa;

1.2.2 any reference to a natural person shall include a juristic person and vice versa;

1.2.3 the words "capital" and "amount" shall be given their widest meanings and shall include assets or rights of any kind;

1.2.4 the word "pay" and its derivatives shall mean and include the words "pay", "deliver", "give possession", "cede" or "transfer" and their respective derivatives.

1.3 The following words and expressions shall bear the meanings assigned to them and cognate words and expressions shall bear corresponding meanings, namely :

1.3.1 **"The Act"** means the Income Tax Act No. 58 of 1962, as amended, or any statute replacing it.

1.3.2 **"Beneficiaries"** means :

1.3.2.1 students, selected by the Trustees, who are enrolled in management and leadership development programmes at the University of Stellenbosch; University of the Witwatersrand; and

any other Universities that may be approved by the Trustees from time to time;

1.3.2.2 programme participants, who shall be selected in accordance with the beneficiary selection criteria set out in clause 18 below;

1.3.2.3 such other persons (including juristic persons) as may from time to time be eligible to receive benefits from this Trust, as a Public Benefit Organisation exempt from income tax in terms of section 10(1)(cN) of the Act; and as an organisation approved by the Commissioner in terms of section 18A of the Act; including institutions, boards, bodies, and other associations of persons, and also the State itself, and all levels of Government as are referred to in this context in terms of the relevant provisions of the Act.

1.3.3 **"The Commissioner"** means the Commissioner for South African Revenue Service (SARS).

1.3.4 **"Financial year"** means the financial period or year ending on the last day of March of each year or such other date as the trustees may from time to time determine, with the consent of the Commissioner.

1.3.5 **"Net income"** means the gross income of the TRUST, less the costs of its administration.

3.1.6 **"Ninth Schedule"** means the Ninth Schedule to the Act, in terms of which "Public Benefit Activities" are defined for purposes of both section 30 (Part I), and for purposes of section 18A (Part II); including any such amendments or additions thereto as may from time to time be of force and effect.

1.3.7 **"Prescribed Fiscal Conditions"** means the provisions prescribed in terms of section 30(1), and in terms of section 18A of the Income Tax Act, as set forth in Schedule "B" to this Trust Deed.

1.3.8 **"Programme participants"** means those persons enrolled from time to time in the educational and training programmes designed and delivered by the TRUST, who are selected by the TRUSTEES and the School of Public Management and Planning at the University of Stellenbosch, and who are drawn from the public and private sectors, and from nonprofit organisations.

1.3.9 **"TRUST"** means this Trust, as originally established under the name "The Spier Leadership Institute Trust', but which is now known as THE SUSTAINABILITY INSTITUTE TRUST.

1.3.10 **"TRUST FUND"** means the assets and investments presently vested in the TRUSTEES for purposes of this TRUST, including amounts actually received, and amounts due or accrued, whether of an income or capital nature, and whether deriving from donations, grants, bequests, or otherwise howsoever; provided that the existing TRUST Fund shall be capable of being added to and increased at any time by means of donation, grant, bequest, or in any other manner howsoever; including additions and accruals, whether of a capital or income nature, and whether devolving upon the TRUST by payment, accrual, transfer, cession, or otherwise.

1.3.11 **"TRUSTEES"** means the Trustees for the time being of this TRUST.

1.4 Reference to a month means a calendar month reckoned from the first of the month to the end of that month.

1.5 Reference to days means calendar days, which shall be counted by excluding the first day and including the last day, unless the latter falls on a Saturday, Sunday or public holiday, in which event the last day shall be the first business day thereafter;

1.6 If any provision in the definitions is a substantive provision conferring rights or imposing obligations, then notwithstanding that such provision is contained only

in these definitions, effect shall be given thereto as if such provision were a substantive provision.

2.

CONTINUATION AND RENAMING OF TRUST

2.1 The TRUST shall continue for an indefinite period, and shall henceforth be known as :

THE SUSTAINABILITY INSTITUTE TRUST

2.2 The TRUSTEES shall have power to change the name of the TRUST, subject to compliance with the formalities stipulated in clause 20 hereunder.

3.

OBJECTS OF THE TRUST

3.1 The main object of the TRUST shall be to establish a permanent institution located in the so-called Lynedoch EcoVillage Development, Lynedoch Road, Stellenbosch:

3.1.1 To act as an implementation agent for the University of Stellenbosch with respect to the design, co-ordination and implementation of a range of transdisciplinary academic programmes aimed at building the leadership and managerial capacity of the beneficiaries to effectively and efficiently manage community-based sustainable development programmes in general, and anti-poverty initiatives, in particular.

3.1.2 To provide the University of Stellenbosch with a means to provide training, support and assistance to community-based projects that benefit poor and needy persons, and which are involved in :

3.1.2.1 anti-poverty initiatives;

3.1.2.2 environmental awareness, and sustainable development projects;

3.1.2.3 youth leadership and development;

3.1.2.4 the design and delivery of training for unemployed persons to obtain SETA-accredited qualifications for employment in the construction sector;

3.1.2.5 the support and facilitation of processes to access land for housing and infrastructure for promoting the Government's land reform and subsidised housing programme in the Lynedoch EcoVillage, and in similar communities across the Republic of South Africa;

3.1.2.6 the provision of early childhood development services for pre-school children;

3.1.2.7 the provision of preventative and education programmes relating to HIV/AIDS.

3.2 The ancillary objects of the TRUST shall be :

3.2.1 to raise, receive and administer funds necessary to establish, equip and operate the permanent educational institute referred to in clause 3.1 and to fund and support the other public benefit activities of the TRUST from time to time;

3.2.2 to establish a full-time administration to manage any building or conversion works, and to design and deliver the various educational and training programmes offered by the permanent educational institution from time to time;

3.2.3 to establish information and data storage systems that will enhance and support the objects of the TRUST.

3.3 The TRUST shall :

3.3.1 not carry on any activities other than those contemplated in clauses 3.1 and 3.2 above;

3.3.2 actively pursue the objects as set out above;

3.3.3 utilise its funds solely for the purpose of such objects;

3.3.4 confine its activities to the Republic of South Africa, except to the extent that the TRUSTEES may otherwise determine; but in that event only as may be permitted in terms of the relevant provisions of the Income Tax Act, and other applicable legislation.

4.

TRUSTEES

4.1 The presently-serving Trustees are :

EVE ANNECKE
LAWRENE BOYA
GITA GOVEN
GERRIT HENDRICKS
NALEDI STELLA FATIMA MABEBA
EDGAR ARTHUR PETERSE
ADRIAN DOMINIC 'T HOOFT ENTHOVEN
ROSIEDA SHABODIEN

such persons having been duly authorised thereto by Master's Certificate dated 5 March 2004, issued by the Master of the High Court, Cape Town, under Master's Reference Number IT.3011/99.

4.2 The TRUSTEES shall at all times have the right to appoint additional Trustees, provided that such appointment is effected in accordance with the decision-making procedure set out herein, and such further Trustees are duly authorised thereto by the Master of the High Court, as required by law.

4.3 There shall be at all times be not less than three (3) TRUSTEES in office for the valid exercise of the powers and discharge of the duties of the TRUSTEES in terms of this TRUST DEED. In the event of such minimum not being fulfilled at any time, then the TRUSTEES remaining in office shall be empowered to act only in the preservation of the TRUST assets, and to appoint the additional TRUSTEE/S necessary for the valid exercise and discharge of their duties in terms of this TRUST DEED; and once such additional TRUSTEES have been appointed and authorised, then the TRUSTEES shall once again be empowered to act in all respects in terms of this TRUST DEED.

4.4 The following persons shall be disqualified from serving or being appointed as TRUSTEES :

4.4.1 any person who is disqualified from occupying office as a director of a company in terms of the company laws for the time being of the Republic of South Africa;

4.4.2 a person whose estate has been sequestrated (provisionally or finally) and has not been rehabilitated;

4.4.3 a person who has been found, by a competent authority, to be of unsound mind; or lunatic; or incapable of managing his or her own affairs.

GCH NSF

4.5 A TRUSTEE shall cease to hold office if he or she :

4.5.1 becomes disqualified from holding office as such in terms of clause 4.4 above; or

4.5.2 resigns office as TRUSTEE by notice in writing to the other TRUSTEES; or

4.5.3 becomes otherwise disqualified in law to hold the office of TRUSTEE; or

4.5.4 is removed as TRUSTEE by a resolution supported by not less than seventy-five percent (75%) of the TRUSTEES then in office; or

4.5.5 dies.

4.6 No portion of the trust assets shall form part of the personal assets of the TRUSTEES, nor shall it be paid or transferred to the TRUSTEES or any member of their families, and all TRUST assets shall be registered in the name of the TRUST, or in the names of the TRUSTEES, or a nominee for the TRUSTEES.

4.7 Nothing herein contained shall prevent the payment in good faith of reasonable remuneration to any TRUSTEE, officer or servant of the TRUST, commensurate with and in return for services actually rendered to the TRUST, at the written request of the TRUSTEES, and in accordance with the decision-making procedures set out in this TRUST Deed.

4.8 The TRUSTEES shall be entitled to the reimbursement of actual costs, expenses and commitments reasonably incurred in good faith on behalf of the TRUST and with the authority of the TRUSTEES.

NSF

APPLICATION OF TRUST FUNDS

5.1 The costs of administration of the TRUST shall be a first charge against the TRUST's income; which costs shall include, but not be limited to, all TRUST expenses, and any levy, duty or tax whatsoever levied on the TRUSTEES in such capacity; and all costs, charges and disbursements whatsoever duly incurred by the TRUSTEES in or arising from the performance of their duties under this TRUST DEED.

5.2 The TRUSTEES shall:

5.2.1 apply so much of the available funds of the TRUST, whether capital or income, as they deem necessary for the attainment of the TRUST's objects as set out in clause 3 above;

5.2.2 not distribute any of its assets or net income, save as permitted and for the purposes specified in this TRUST DEED.

5.3 Subject to clause 5.2 above, and due compliance at all times with the Prescribed Fiscal Conditions, the TRUSTEES shall have the power, in their sole discretion to:

5.3.1 determine the manner in which the TRUST capital and the net income shall be applied or dealt with from time to time;

5.3.2 determine the terms and conditions, if any, to be attached to the payment, application or expenditure of the net income or TRUST capital or any portion thereof;

NSF

5.3.3 determine when the TRUST capital or net income or any portion thereof shall be applied, expended, paid or used in any manner whatsoever towards the furtherance of the purposes and objects of the TRUST;

5.3.4 accumulate, at any time and from time to time, any portion of the TRUST capital or net income for any capital project or projects or for any other purpose or reason whatsoever which they in their discretion, deem to be in the interests of the TRUST and in the furtherance of purposes and objects of the TRUST, but subject to the constraints stipulated in terms of section 18A of the Act;

5.3.5 invest responsibly any portion of the TRUST capital or net income not immediately required for the attainment of the TRUST objectives, as may be permitted by the Prescribed Fiscal Conditions, viz :

5.3.5.1 with a financial institution as defined in section 1 of the Financial Services Board Act, 1990 (Act No. 97 of 1990);

5.3.5.2 in securities listed on a stock exchange as defined in section 1 of the Stock Exchanges Control Act, 1985 (Act No. 1 of 1985); or

5.3.5.3 in such other prudent investments in financial instruments and assets as the Commissioner may determine after consultation with the Executive Officer of the Financial Services Board and the Director of Nonprofit organisations; provided that the provisions of this sub-paragraph shall not prohibit any such organisation from retaining any investment (other than any investment in the form of a business undertaking or trading activity or asset which is used in such business undertaking or trading activity) in the form that it was acquired by way of donation, bequest or inheritance.

5.4 The TRUST is to be administered in such a manner as to preclude any donor or his or her family from deriving any advantage or benefit from moneys paid to, by, or for the benefit of the TRUST.

6.

SECURITY DISPENSED WITH

No TRUSTEE, whether appointed or co-opted in terms of this TRUST Deed, or appointed as a successor to a TRUSTEE, shall be required by the Master of the High Court, or any other competent authority, to furnish any security of any nature, nor shall any security be required for the due performance of any duty under the Trust Property Control Act No. 57 of 1988, as amended, or under any other statutory provision which may now be or may hereafter become of force or effect; the intent and purpose being that no TRUSTEE shall be required to give any security in respect of or in connection with or arising out of such appointment.

7.

DECISIONS OF THE TRUSTEES AND PERFORMANCE OF THEIR DUTIES

7.1 The business of the TRUST shall be managed by the TRUSTEES. Subject to the TRUSTEES giving effect to the terms and conditions of this Deed, they shall, in administering the TRUST and its affairs, generally adopt such procedures and take such administrative steps as they may from time to time deem necessary and advisable. They shall meet together for the dispatch of business, adjourn and otherwise regulate their meetings as they think fit, provided that the TRUSTEES shall meet no less than twice per annum, and one such meeting must be held within ninety (90) days of the end of the financial year.

7.2 Any TRUSTEE shall be entitled at any time to summon a meeting of the TRUSTEES, provided that any TRUSTEE calling a meeting shall endeavour to

give at least twenty-one (21) days written notice to the other TRUSTEES thereof, save in respect of urgent matters requiring a meeting on less than twenty-one (21) days notice. If for any reason it is impracticable to meet as contemplated in clause 7.1, or pass a resolution as contemplated in clause 7.7, a meeting may be conducted and a resolution may be passed utilising conference telephone and electronic media facilities, provided that the required quorum is satisfied.

7.3 The TRUSTEES may elect from their number a chairperson, a secretary and such other officers of the TRUST as they may deem necessary. The chairperson shall NOT have a casting vote.

7.4 The TRUSTEES shall decide, as soon as possible, after the establishment of the TRUST, what arrangements shall be made for the performance of the secretarial and administrative work of the TRUST.

7.5 Save where otherwise specified in this TRUST Deed, decisions and questions arising at any meeting of TRUSTEES shall be decided by a simple majority at a quorate meeting.

7.6 Fifty percent (50%) plus one (1) of the TRUSTEES in office from time to time shall be required to form a quorum of TRUSTEES for the purposes of meetings of the TRUSTEES.

7.7 A resolution in writing signed by seventy-five percent (75%) of the TRUSTEES in office from time to time shall be valid and effectual as if it had been passed at a meeting of the TRUSTEES duly called and constituted; provided that the proposed resolution is duly communicated to all the TRUSTEES. Any TRUSTEE may indicate his or her agreement in the context of this clause, by way of a signed letter or facsimile transmission, or by electronic mail transmission. A resolution as contemplated in this clause may consist of several documents each signed by one or more of the TRUSTEES (provided that the requisite

number of TRUSTEES have so signed) and shall be deemed to have been passed on the date of signature of the last TRUSTEE who signed.

7.8 All resolutions taken by the TRUSTEES shall be recorded and retained by the secretary of the TRUST.

7.9 The TRUSTEES may appoint any committee from among the TRUSTEES, and may grant or delegate any of their powers to such committees. Any such delegation or grant of powers shall not preclude the TRUSTEES from themselves exercising such powers. The TRUSTEES may withdraw any such delegation or grant of powers at any time. The TRUSTEES may authorise such committees to seek the advice of further persons, who are not TRUSTEES.

7.10 The TRUSTEES may co-opt or appoint a person or entity, whether a TRUSTEE or not, to attend meetings of the TRUSTEES, or of any committee, and/or to undertake any of the duties that the TRUSTEES may from time to time delegate to them. Such persons who are not TRUSTEES shall act in an advisory capacity only and shall not have a vote at any meeting of the TRUSTEES.

7.11 All contracts, deed, cheques or documents required to be signed on behalf of the TRUST shall be signed in such manner as the TRUSTEES from time to time determine.

8.

PRESCRIBED FISCAL CONDITIONS

This TRUST Deed shall be construed subject to due compliance with the Prescribed Fiscal Conditions applicable from time to time. Accordingly, it is hereby stipulated that, notwithstanding anything to the contrary contained or implied in this TRUST Deed :

8.1 The powers of the TRUSTEES shall be subject to their complying at all times

with the constraints and conditions stipulated in section 18A and section 30 of the Income Tax Act, as read with the Ninth Schedule thereto; in order to ensure that the TRUST is eligible for tax-exempt status in terms of section 10(1)(cN), and is further eligible for the fiscal benefit envisaged by section 18A of the Act. The Prescribed Fiscal Conditions applicable to the TRUST as at the date of this Trust Deed are such as are set forth in Schedule "A" hereto.

8.2 Upon approval of the TRUST for purposes of section 18A, the TRUSTEES may accept and issue statutory receipts in respect of donations in support of its public benefit activities referred to in Part II of the Ninth Schedule; and they shall in that event at all times comply with the conditions prescribed by section 18A of the Income Tax Act with respect thereto.

9.

POWERS OF TRUSTEES

9.1 Subject to the express limitations on TRUSTEES' powers set out in this TRUST Deed, the TRUSTEES shall have all such powers and capacity in relation to the TRUST and the TRUST assets as :

9.1.1 are legally required and/or permitted;

9.1.2 any natural person with full legal capacity may have in relation to his own affairs;

and subject as aforesaid, the discretionary powers vested in the TRUSTEES in terms of this TRUST Deed shall be complete and absolute, and any decision made by the TRUSTEES pursuant to any such discretionary powers shall be unchallengeable by any person affected thereby.

9.2 The TRUSTEES shall, subject to the provisions of clause 9.4, and provided that the TRUST's financial transactions are conducted by means of a banking account, deal with the TRUST assets in order to achieve the object of the TRUST, and shall, subject to the provisions of this TRUST Deed, possess and enjoy all rights and powers necessary for and incidental to such purpose.

9.3 Subject to the Prescribed Fiscal Conditions, but otherwise without limitation of the general powers and discretion conferred on the TRUSTEES, they shall have, *inter alia*, the following rights and powers which they may exercise for the purposes of the TRUST in their discretion:

9.3.1 to open and operate any banking account and/or building society account and to draw and issue cheques and to receive cheques, promissory notes and/or bills of exchange, and to endorse any of the same for collection by the bank and/or building society at which the said account was opened;

9.3.2 to take such steps as may be necessary to form any company, trust, voluntary association or other legal entity to carry out more effectively the objects of the TRUST as set out in clause 3, and to delegate to such company, association or legal entity such powers as the TRUSTEES may deem fit, provided that, in the event of the TRUST being approved by the Commissioner as tax exempt, such company, association or legal entity is similarly exempt from the payment of income tax, and entitled to the benefit of section 18A;

9.3.3 to buy or sell (by public auction, private treaty or otherwise) movable, immovable or incorporeal property of whatever nature, and to sign and execute any agreement or deed of sale in relation thereto, and to sign and execute all requisite documents, and do all such things necessary for the purpose of effecting and registering, if needs be, transfers according to law of any such property, whether movable, immovable or incorporeal, bought or sold by the TRUSTEES;

9.3.4 to receive, accept or acquire, or donate, cede, assign or otherwise dispose of, any other right to or over immovable property not constituting full ownership, whether registrable or not;

9.3.5 subject to the Prescribed Fiscal Conditions, and the provisions of clause 9.4, to buy, sell and/or exchange shares, interests, stocks, debentures, debenture stock, units, promissory notes, bills of exchange and any other negotiable instruments and documents of any kind, and to do all things requisite and sign all documents requisite to acquire or, as the case may be, to give transfer and title thereto;

9.3.6 to make loans for the benefit of the eligible beneficiaries (but not to any TRUSTEE, or to any donor and/or any of their relatives or to any private company) on such terms and conditions and at such interest rate, if any, as the TRUSTEES may determine, and to sign and execute all requisite documents and to do all things necessary for the effecting and registration of any security;

9.3.7 to vary any investment made in terms hereof by realising the same and/or by substituting therefor any other investment which the TRUSTEES are empowered in terms hereof to make;

9.3.8 to borrow money on such terms and conditions and at such interest and from such person as the TRUSTEES may determine, and either without security or upon such security over movable or immovable property as the TRUSTEES may determine, and to sign and execute all requisite documents and to do all things necessary for the effecting and registration of any requisite instrument of debt and of any such security;

9.3.9 to mortgage, pledge and/or hypothecate any movable, immovable or incorporeal property forming part of the assets of the TRUST and, for the

purpose of any such mortgage, pledge or hypothecation, to sign and execute all requisite documents and do all things necessary for effecting and registering the same;

9.3.10 subject to the Prescribed Fiscal Conditions, to let, either by written agreement of lease or otherwise, improve, alter or maintain any immovable property belonging to the TRUST or any improvements thereon;

9.3.11 to collect and receive rents and, if necessary, cancel any lease or other tenancy and take all legal proceedings for ejectment or otherwise in connection with any such lease or other tenancy or the cancellation thereof;

9.3.12 to sue for, recover and receive all debts or sums of money, goods, effects and things whatever, which may become due, owing, payable or belonging to the TRUST;

9.3.13 to institute, defend, oppose, adjust, settle, compromise and/or submit to arbitration all accounts, debts, claims, demands, disputes, legal proceedings and matters which may subsist or arise between the TRUST and any person, company, corporation or body whatever, and for the purposes aforesaid, to do and execute all necessary acts and documents;

9.3.14 to attend all meetings of creditors of any person, company, corporation or body whatever indebted to the TRUST, whether in insolvency, liquidation, judicial management or otherwise, and to vote for the election of a TRUSTEE or TRUSTEES and/or liquidator/s and/or judicial manager/s and also to vote on all questions submitted to any such meeting of creditors, and generally to exercise all rights accruing to a creditor;

9.3.15 to exercise the voting power attached to any share, stock, debenture or unit, in such manner as they may deem fit, for the purpose of amalgamation, merger of or compromise in any company or trust in which the share, stock, debenture or unit is held;

9.3.16 to exercise and take up or to sell and realise any rights of conversion or subscription attaching, accruing or appertaining to any share, debentures or units forming part of the assets of the TRUST;

9.3.17 to cause, in the case of any company or unit trust scheme which is precluded by its articles of association or trust deed or which refuses to transfer any shares, debentures or units forming part of the assets of the TRUST into the name of the TRUSTEES as such, the transfer of the said shares, debentures or units into their own names or into the name of a bank, trust company or other designated nominee;

9.3.18 to give receipts, releases or other effectual discharges for any sum of money or things recovered;

9.3.19 to pay out of the funds of the trust all debts incurred on behalf of the TRUST by the TRUSTEES in the exercise of their powers in terms hereof;

9.3.20 subject to clause 9.4.2, to accept on behalf of the TRUST all or any donations of whatsoever nature, from the donor or from any other person whatever;

9.3.21 to determine whether any surplus on the sale of any assets of whatever description of the TRUST, and whether movable or immovable property, and the receipt of any bonus, shares or units by the TRUST be regarded as income or capital of the TRUST, and to revise any such decision taken by them;

9.3.22 to employ professional practitioners, agents and employees, to carry out the objectives of the TRUST and to pay their fees, commissions, remuneration and any other charges out of the funds of the TRUST, and to confer, if necessary, upon such agents or employees so appointed the right to exercise any discretion which may be vested in the TRUSTEES, and to terminate the employment of any such professional practitioners, agents or employees;

9.3.23 to improve and develop immovable property acquired by the TRUST and to expend the capital and/or net income of the TRUST upon the preservation, maintenance and upkeep of any such property;

9.3.24 to enter into any contract and execute any documents by or on behalf of the TRUST for the purposes of giving effect to the objects of the TRUST.

9.4 Notwithstanding anything to the contrary herein contained:

9.4.1 no benefits may be allocated by the TRUST during its existence for any purpose other than those envisaged in clause 3 above;

9.4.2 all donations made by or to the TRUST must be irrevocable and must be subject to the terms and conditions of the TRUST DEED;

9.4.3 any TRUSTEE who renders services to or on behalf of the TRUST shall be entitled to charge and be paid all professional or other charges made by him or her, or his or her firm, for business done by him or her, or his or her firm, in relation to this TRUST DEED, whether or not in the ordinary course of his profession or business, and whether or not such business required the employment of a person engaged in any such profession or business; including commission and/or brokerage, at the usual and normal rates applicable thereto; provided that any remuneration paid is commensurate with the value of actual services rendered to the TRUST by

such TRUSTEE; and provided further that in regard to the appointment of any such TRUSTEE or organisation in which such TRUSTEE has an interest, such TRUSTEE shall :

9.4.3.1 disclose his/her interest;

9.4.3.2 not participate in any decision relating to such appointment or the terms and conditions of such appointment;

9.4.4 the TRUSTEES may not allow immovable property owned by the TRUST to be occupied free of charge by any person save in furtherance of the objects of the TRUST, and save for eligible beneficiaries, or the TRUST's own officers and employees;

9.4.5 paid officials of the TRUST may serve on the management committee or board of TRUSTEES in an advisory capacity only, and, unless they are appointed as TRUSTEES, they will have no voting rights;

9.4.6 no competition, contest, game, scheme, arrangement or system in connection with which any prize may be won shall be conducted or caused to be conducted by the TRUST, unless an authority in terms of the relevant act has been obtained beforehand.

10.

BOOKS OF ACCOUNT

10.1 The TRUSTEES shall keep true and accurate records and books of account of their administration of the TRUST, in such manner and form as may be necessary to reflect fairly the position of the TRUST at all times. There shall be recorded in such books and records, *inter alia*, any change of the TRUST assets from time to time, the income, and all outgoings applicable to the TRUST.

NJF GCH

10.2 The TRUSTEES shall cause the TRUST's books of account to be audited by an independent practising chartered accountant duly appointed in terms of clause 11.

10.3 Copies of the Annual Financial Statements shall be made available to each of the TRUSTEES, as soon as possible after the close of each financial year.

11.

APPOINTMENT OF AUDITOR

11.1 It shall be the responsibility of the Trust Board to appoint an independent practising Chartered Accountant, or firm of independent practising Chartered Accountants, as Auditors to the TRUST. The Trust Board shall also determine the period and conditions of appointment of such Auditors; with power, if deemed necessary, to remove and substitute any such appointee/s as may be deemed appropriate from time to time.

11.2 The Auditor/s appointed as aforesaid shall have unrestricted access to the systems, books, vouchers, and records of the TRUST, and shall be entitled to require from the TRUSTEES, officers, and employees of the TRUST, any information or explanation the Auditor/s may deem necessary for the proper performance of such audit.

12.

ANNUAL FINANCIAL YEAR - ANNUAL GENERAL MEETINGS

12.1 The Financial Year of the TRUST shall commence on 1 April and terminate on the last day of March in each year; unless otherwise determined by the Trust Board

with the approval of the Commissioner.

12.2 The Annual General Meeting of the TRUST shall be held by the TRUSTEES within three (3) months of the end of each financial year.

12.3 The business of an Annual General Meeting shall include:

12.3.1 The presentation and adoption of the TRUSTEES' Annual Report.
12.3.2 The consideration of the Annual Financial Statements.
12.3.3 The (re-)appointment of the Auditors.
12.3.4 Such other matters as may be deemed appropriate.

12.4 Notice of each Annual General Meeting shall be accompanied by a copy of the relevant Annual Financial Statements and any ancillary documentation, and shall be delivered to each of the TRUSTEES, at least Fourteen (14) days prior to the date of such meeting.

13.

NOTICES AND MEETING FORMALITIES

13.1 Notices of Meetings shall be delivered in writing, either personally, or by intranet, internet, fax, prepaid registered post, or in such other manner as may be deemed appropriate by the Chairperson (or Vice-Chairperson), and shall be directed to the last known address of the party concerned, as recorded with the TRUST.

13.2 The inadvertent, but *bona fide*, omission to address notices to any TRUSTEE/S shall not invalidate the proceedings of the ensuing meeting.

13.3 If despatched by Intranet or Internet, such notices shall be deemed to have been received twenty-four (24) hours after data transmission.

13.4 If despatched by prepaid registered post, such notices shall be deemed to have been received five (5) days after the date of posting.

14.

BANKING ACCOUNT – SIGNATURES

14.1 One or more banking accounts shall be maintained in the name of the TRUST with a duly registered banking institution; and all payments and cash received by the TRUST shall be deposited to the credit of such banking account/s, through which the TRUST's financial transactions are conducted.

14.2 All cheques, promissory notes, financial instruments, and banking instructions, requiring signature or authorisation on behalf of the TRUST, shall be signed or authorised, as the case may be, in such manner and by such persons as the Board of TRUSTEES may from time to time determine.

15.

REGISTRATION : NONPROFIT ORGANISATIONS ACT

The TRUSTEES shall take all necessary steps to ensure that the TRUST is registered in terms of the Nonprofit Organisations Act ("the NPO Act"), as required by section 30(3)(g) of the Income Tax Act, as applicable to "Public Benefit Organisations" exempted from income tax in terms of section 10(1)(cN) of the Income Tax Act.

Accordingly, and in compliance with the prescriptive requirements of the NPO Act, it hereby is stipulated with respect to this TRUST (in this clause described as "the Organisation"), as follows:

15.1 the Organisation's name shall be as stated in clause 2;

15.2 the Organisation's object shall be as stated in clause 4;

15.3 the Organisation's income and property shall not be distributable to its TRUSTEE members or office-bearers, save insofar as they may be reimbursed for reasonable out of pocket expenses incurred in the execution of their duties on behalf of the TRUST, and with the authority of the Board of TRUSTEES;

15.4 the Organisation shall be deemed to be a body corporate, and shall have an identity and existence distinct from its TRUSTEE members or office-bearers;

15.5 the Organisation shall continue to exist notwithstanding changes that may from time to time occur in the composition of its TRUSTEE members or office-bearers, as envisaged by clause 4;

15.6 the TRUSTEE members or office-bearers shall have no rights in the property or assets of the Organisation by virtue of their membership or office;

15.7 the powers of the Organisation shall be as set forth in this Trust Deed, including clause 9, as read with Schedule "A";

15.8 the organisational structure and mechanisms for the Organisation's governance shall be as set forth in this Trust Deed, including clauses 4 and 7;

15.9 the rules for convening and conducting meetings, including quorums required for and the minutes to be kept of those meetings, shall be as stated in clauses 7 and 13;

15.10 the manner in which decisions are to be made shall be as stated in clause 7;

15.11 the Organisation's financial transactions shall be conducted by means of a banking account, as stated in clause 14;

15.12 the date for the end of the Organisation's financial year shall be as stated in clause 12.1;

15.13 the procedure for changing the constitution shall be as stated in clause 20;

15.14 the procedure by which the Organisation may be wound up, or dissolved, shall be as stated in clause 20;

15.15 if the Organisation is wound up or dissolved, any assets remaining after all liabilities have been met, must be transferred to some other eligible Public Benefit Organisation, having the same or similar Objects, as stated in clause 20.3 read with clause 9 of Schedule "A".

16.

TRUSTEE INDEMNITY

16.1 Subject to the provisions of any relevant statute, each of the TRUSTEES, shall be indemnified by the TRUST for acts done in good faith; and it shall be the duty of the TRUST to pay all costs and expenses which a TRUSTEE may incur, or become liable for, as a result of a contract entered into, or act done by such TRUSTEE, with the authority of the Trust Board, in the *bona fide* discharge of his/ her duties on behalf of the TRUST.

16.2 Subject to the provisions of any relevant statute, no TRUSTEE shall be liable:

16.2.1 for the acts, receipts, neglects or defaults of any other TRUSTEE or office bearer, or for the acts and decisions of any duly authorised Committee, manager, representative or agent;

16.2.2 for any loss or expense suffered by the TRUST through the insufficiency of, or deficiency in, any title to property acquired by the TRUST;

16.2.3 for the insufficiency of, or deficiency in, any security in or upon which the funds of the TRUST may be invested;

16.2.4 for any loss or damage arising from the bankruptcy, insolvency or delictual act of any person or institution with whom money, securities or assets of the TRUST are deposited; or

16.2.5 for any loss or damage caused to the TRUST in any other manner;

which occurs in the *bona fide* administration of the TRUST; unless it arises in consequence of dishonesty on the part of such TRUSTEE; or the failure by such TRUSTEE to exercise that degree of care, diligence and skill required by law.

17.

LEGAL PROCEEDINGS

All legal proceedings by or against the TRUST shall be instituted in the name of the TRUST.

18.

BENEFICIARY SELECTION

The TRUSTEES shall meet from time to time to determine eligible beneficiary and project selection criteria, which shall take account of, *inter alia*, the following factors:

18.1 whether potential beneficiaries currently occupy or aspire to occupy managerial and leadership positions in Government, non-profit organisations and the small business sector and require educational and training support to build their capacity to effectively and efficiently manage sustainable development programmes and anti-poverty initiatives; and/or

18.3 whether potential beneficiaries will be able to make a meaningful contribution to the development of, in particular, poor and needy persons and communities once they have participated in any of the educational and training programmes offered by the trust; and/or

18.4 whether potential beneficiaries come from historically disadvantaged communities due to legally enforced discrimination based on racial criteria and who, as a result of their participation in education and training programmes will return to their communities to use their skills to implement anti-poverty initiatives and sustainable development programmes in general.

19.

GUIDING PRINCIPLES

The TRUSTEES, in making the decisions in terms of this TRUST Deed, shall do so in a manner which is non-racial, non-sexist, impartial, democratic, accountable and financially responsible.

20.

AMENDMENTS; NAME CHANGE AND DISSOLUTION

20.1 This TRUST Deed may at any time be amended; the name of the TRUST may be changed; and the TRUST may be dissolved; in any such instance, by Resolution

supported by no less than seventy-five percent (75%) of all the TRUSTEES then appointed, being not less than the minimum number stipulated in this TRUST DEED.

20.2 Any such Resolution duly adopted by the TRUSTEES, shall be formalised by Deed as soon as reasonably possible after its adoption.

20.3 A copy of such Deed shall be submitted forthwith upon its execution to the Commissioner, and to the Director of Nonprofit Organisations.

20.4 In the event of the dissolution of the TRUST, any net residue of the TRUST FUND remaining after satisfaction of grants and awards made or committed to eligible Beneficiaries, and after due provision for all the TRUST's liabilities and expenses, shall be given or transferred to one or more other Approved Public Benefit Organisations having the same or similar objects as those of this TRUST, as may be determined by the Trust Board at its discretion; or failing such determination by the Trust Board, then as determined by the Court; provided that any such portion of the net residue as may arise in consequence of a donation made by a taxpayer to whom a receipt has been issued in terms of section 18A of the Income Tax Act, must be given or transferred only to one or more eligible Beneficiaries for purposes of section 18A; and provided further that each such disposition occurring on dissolution of this TRUST, must be approved by the Commissioner, as required in terms of the Income Tax Act.

21.

PATRON/S

The Trust Board shall be entitled, but not obliged, to appoint from time to time one or more persons as Patron/s to the TRUST; in which event such Patron/s shall serve for such term, and shall exercise such prerogatives, as the Trust Board may deem appropriate from time to time.

GCH NSF

THE PRESENTLY-SERVING TRUSTEES HEREBY CONFIRM THEIR ACCEPTANCE OF APPOINTMENT AS TRUSTEES, AND AGREE TO CONTINUE TO UNDERTAKE THE FIDUCIARY RESPONSIBILITY FOR THIS TRUST, UPON THE TERMS AND SUBJECT TO THE CONDITIONS SET FORTH IN THIS SUBSTITUTED DEED OF TRUST.

THUS DONE AND SIGNED at the place, and on the day, month, and year first aforementioned, in the presence of the undersigned witnesses.

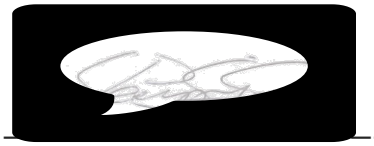
SUSTAINABILITY INSTITUTE TRUST NO. IT 3011/991

RESOLUTION ON THE AMENDMENT OF THE TRUST DEED DOCUMENT CLAUSE 1.3.4

The Sustainability Institute Trustees below hereby agree that clause 1.3.4 in the Trust Deed be amended as follows:



1.3.4 “Financial year” means the financial period or year ending on the last day of December of each year or such other date as the Trustees may from time to time determine, with the consent of the Commissioner.

This is a round robin resolution

RESOLUTION OF THE TRUSTEES OF THE SUSTAINABILITY INSTITUTE TRUST NO._____

Whereby it is resolved that the Trust Deed shall be amended by the substitution of Clause 3.1 with the following:

3.1 The main objectives of the SI are the following:

3.1.1 To have a transformative impact on the lives of the children and youth in the Lynedoch valley through the educational programmes offered;

3.1.2 To contribute towards the realisation of sustainable development through its role as an African thought leadership institute researching, teaching and practicing social innovation for the transition to just and generative futures;

3.1.3 To act as an implementation agent for the University of Stellenbosch (US) with respect to the design, co-ordination and implementation of a range of transdisciplinary academic programmes aimed at building the leadership and capacity of the beneficiaries to effectively and efficiently manage socially just and ecologically restorative oriented sustainable development programmes.

Group photo form our Proposal co-creation session 15 November

1. Project Overview and Objectives

Project Name: The Valley Collaborative **Lead Organisation:** Sustainability Institute **Timeframe:** 08/2026 –07/2029

Objectives, Rationale and Background:

This three year business plan reflects the priorities identified by 25 community representatives who live and work directly on the ground and who collaboratively shaped the activities outlined in this application. The VC has 4 community-led working groups (Action Groups), namely **youth empowerment, food security & wellbeing, economic empowerment, and housing, safety & infrastructure.** Altogether, the groups represent a volunteer base of more than 50 people.

On 15 November 2025, we convened a co-creation workshop with representatives from all four working groups to plan for the coming year and collaboratively shaped this funding proposal. The Valley Collaborative Housing, Safety & Infrastructure group is not submitting a GiA proposal, as their activities fall outside the scope of what the GiA funds. Across all groups, we intentionally focus on activities that make use of existing community buildings and local partners, given the limited availability of shared community facilities in the valley.

The three groups each address a distinct but interrelated community priorities and objectives:

Youth Empowerment:

- Mentorship opportunities for youth offering psychosocial support, skills development and employment pathways - specialised youth interventions.
- Empowering young people through active citizenship to enhance their employability, foster community engagement, and inspire a sense of hope.

Food & Wellbeing: Building community, identity and belonging

- Regular food-based heritage and cultural festivals to strengthen identity, cohesion and intergenerational connection. These activities focus on social cohesion rather than markets or youth mentorship.
- 7 cultural festivals over a three year period
- Annual women's gathering during August (women's month)

Economic Empowerment: Growing economic activity in the Valley

- 8 community markets over a three year period to stimulate local enterprise and income generation.

2. Beneficiaries and Alignment

Objective	Estimated number of participants or households and demographic focus	Alignment with Ward 20 IDP priorities:
Youth empowerment	200 youth over 3 years	By offering structured youth support, cultural festivals and community markets, these activities create safe spaces, meaningful opportunities and cultural expression directly responding to Ward 20 Priority 2's needs for youth development, arts, culture and alternatives to wandering or substance-related risks. Because residents repeatedly request community facilities and the IDP notes land scarcity, our initiatives also tackle this constraint by activating existing spaces such as local schools, churches and other areas to provide accessible, meaningful programmes. Ensuring sustainability of circular economies and starting with the youth has a knock-on effect, not just for the immediate families of these youth but for the broader community for the current generation and for generations to come. The Valley Collaborative focuses on providing excellent **quality** support and collaborative community building events over high quantity events.
Building community, identity and belonging	Ward 20 residents 500 people over 3 years	
Growing economic activity in the Valley	Ward 20 residents 800 people over 3 years	

3. Implementation Plan

3.1: Youth empowerment		
Note: Main responsible parties for implementation include the VC Youth Empowerment Action Group ● Currently this group includes representatives (high school learners and adults) from Vlottenburg Primary, Vlottenburg afterschool programme, Ubuntu Youth Co-operative, Aurora Kaleidoscope Movement, Vlottenburg VGK church, the Sustainability Institute (Lynedoch Youth programme, Lynedoch Children's House/Community school), Living Arts Foundation, Spier, Klein Ma Getrein Creche, and local residents.		
Foundation/pilot initiatives prior to GiA funding ● One of the key motivations for GiA funding is to build on collaborative efforts of existing initiatives including Vlottenburg Aftercare and Lynedoch Youth Programme, which form the base for how we will start carrying out activities		
Key Activities and outputs	**Description**	**Timeframe**

● The Lynedoch Youth Programme and the youth that participate in this programme are key partners, but have a limited scope on the amount of youth that can benefit from their programme. GiA funding will aid in expanding the impact of youth activities to reach more youth in Vlottenburg and build youth ownership ie creating a space to allow for youth to lead their own activities			
1	**Activities** Growing and scaling of existing pilot initiatives mentioned above including: ● Regular sports (eg netball, soccer, rugby) activities at Vlottenburg Afterschool program, supported by Stellenbosch University Biokinetics Practice and other partners **Outputs** ● Increased impact of existing sports initiatives ● Overall improvement of physical and mental health for youth ● Reduced idle youth	● Outputs will be achieved by working closely with partner organisations ● Activities will take place at existing spaces in the community through VC partnerships (schools, churches, local NGO's etc) ● Outputs will be achieved by working closely with partner organisations ● Activities will take place at existing spaces in the community through VC partnerships (schools, churches, local NGO's etc)	January 2026 (prior to GiA funding period)- December 2026
2	**Activity** ● Training/upskilling youth in the Valley with sports coach training, basic health & safety and communication skills **Output** ● 20 youths from Lynedoch Valley will be able to coach children in various sports, bringing the young community together and enabling youth to facilitate regular activities confidently		Starting January 2027
3	**Activity:** ● Counseling methodology training to youth ● Train 20 youth on basic counseling skills **Outputs:** ● Creating safe spaces in the community: Youth in the Valley highlighted that they need safe spaces within their peer groups to share what they are going through. They specified that this should not be adults.	● Training will be provided by registered councillors with experience, once a month. ● Youth champions (in partnershipwill be creating safe spaces for their peers to learn, grow and lead the community ● Sessions will take place at local venues, as identified by the group.	Starting May 2027

4	**Activities** ● Job readiness training and basic education skills (reading, writing, maths) **Outputs:** ● Youths will be trained to do surveys of unemployed youth in the valley. ● A vital and necessary resource for accurate reading of unemployment rates. ● A growing network of youth being community champions.	● Job readiness training will include CV development, interview preparation, communication skills and basic literacy/numeracy strengthening.	Starting July 2027, building up to twice a year

3.2: Building community, identity and culture

Note: Main responsible parties for implementation include the VC Food and Wellbeing Action Group

- Currently this group includes representatives from 6 local community kitchens, Vlottenburg Community Online NPC, Living Soils Community Learning Farm, Aurora Kaleidoscope Movement, Sustainability Institute (Local Wild Food Hub), a local medical doctor, and residents.

Foundation/pilot initiatives prior to GiA funding

- The foundation and strength of these activities lies in the existence of 6 local community kitchens that are run from people's homes in the community
- Food insecurity was highlighted as a key concern during the COVID 19 pandemic, which sparked the formation of some of these kitchens and food relief activities - including support from Living Soils Community Learning farm over 400 families during lockdown level 5
- Today, each of the community kitchens support between 40 and 80 beneficiaries on a regular basis, each time they cook

	Key Activities	Description	Timeframe
1	**Activities:** Cultural heritage day festival **Outputs:** ● 1 annual Heritage Day festival ● Participation of local cooks (potjie kos competition), youth performers, craft makers ● Strengthened cultural pride and community cohesion ● Increased engagement between Lynedoch, Vlottenburg, Raithby and Vlaeberg residents	● 7 Cultural festivals over a three year period ● Events listed on the left revolve around organizing cultural festivals/events to bring community together through activities including potjie competitions, rooster/pot brood competitions, best flowers/vegetables grown, crafts, singing/ dancing performances ● A key aim of the Valley Collaborative is to build agency and self-organisation to enable community-led change. Growing a sense of	September each year, (2026-2028)
3	**Activities:**		July 2027-2029

	Youth Day festival **Outputs:** ● Youth-led performances and exhibitions ● Activities that celebrate youth leadership, creativity and history ● Engagement of local youth organisations and schools ● Opportunity for youth to lead planning and facilitation, building leadership and confidence.	community and a sense of pride in the cultural identity of the community strengthens social cohesion, trust and confidence in one another - leading to a greater capacity to work together ● Initiatives will be implemented through collaborative planning with community kitchens, local artists and youth groups. ● Events will be hosted at existing community venues (e.g., school hall, church grounds).	
2	**Activities:** Human Rights Day/harvest festival **Outputs:** ● 1 festival celebrating local food traditions and community values ● Showcasing produce grown by community members ● Participation of local artists and cultural groups		March 2029
5	**Activities:** Women's gathering (smaller scale): ● Activities may include wellness workshops, storytelling circles, cooking demonstrations, and craft sharing. **Outputs:** ● An annual gathering focused on women's wellbeing, support networks and cultural expression. Group size will range, starting small in year one and building up to a bigger group ● Intergenerational participation ● Space for sharing stories, skills and experiences ● Strengthened trust and connection between women across the valley.	● This will be implemented through small-group sessions hosted by community kitchens and local women leaders. ● This will be done in close partnership with local women's circles in the community and partner organisations such as Aurora Kaleidoscope Movement (ie, not overly reliant on community kitchen network) ● A women's gathering was piloted in November 2025 in the form of a gender-based violence (GBV) reflection circle	August each year (2026-2029)

3.3: Growing economic activity in the Valley

Note: responsible parties for implementation include the VC Economic Empowerment Action Group ● Currently this group includes representatives from Stellenbosch FPSU (Farmer Production Support Unit)/Lynedoch Agrihub project, Vlottenburg Farming Cooperative, Tree-Preneurs, Spier, Vlottenburg VGK church, Stellenbosch University, Klein Ma Getrein Creche and other local residents.			
Foundation/pilot initiatives prior to GiA funding ● This group builds on collaboration between cooperatives, NGO's, local businesses and the municipality ● Markets will take place by making use of existing spaces including the Lynedoch Agrihub, local churches, schools and other locations			
	Key Activities and outputs	**Description**	**Timeframe**
	Activities ● Community markets where residents and small businesses can sell locally produced products, featuring seasonal themes **Outputs:** ● 8 Community markets hosted over a three year period ● Growing a circular economy in the community ● Boosting economic activity in the Valley Communities ● Creating regular income opportunities for small vendors ● Strengthening local food, craft and micro-enterprise networks	● The first year involves creating and designing a viable economic model. ● Year two focuses on implementation and innovation. ● Year three focuses on achieving an economically sustainable market with a long-term vision of revenue generation. ● Activities use existing spaces (Agrihub, churches, schools), reducing cost barriers and activating underused facilities.	Year 1: Market model development Year 2: Monthly markets implemented Year 3: Scaling and moving toward sustainability

4. Budget

Total Estimated Budget (3 years): R600 000

			GiA Funding Requested			
Budget Line Item	**Description**	**Justification/ Details**	**Year 1**	**Year 2**	**Year 3**	**Existing funding/own contributions**
Transport Costs	Travel provided for individuals in the community to attend events and meetings / workshops	Transport costs are necessary to ensure equitable access and full participation from community members, especially those who live far from the event venue or face economic or mobility barriers. This includes hiring buses, vans, or reimbursing transport fares for participants from underserved areas. Providing transport removes a significant barrier for many households and promotes inclusivity by ensuring that no one is excluded due to cost or distance.	**R8,200.00**	**R15,500.00**	**R22,000.00**	Encourage lift clubs as far as possible. Use local, affordable transport services
Communications	Flyers, Digital Media, Data,	Creates awareness in the community and good design will get people interested in attending which will drive attendance and participation	**R7,600.00**	**R12,400.00**	**R18,300.00**	Volunteers currently using their own resources which is unsustainable
Valley Collaborative Booklet	Booklet of positive stories, facts, histories and recipes of the Valley communities. Also shares the role and vision the Valley Collaborative plays in the community. Booklet(s) can be used in the long term to generate revenue.	Creates awareness of the Valley Collaborate and strengths in the community. Increases participation and collaboration by growing a sense of pride in being part of the Valley communities / VC.	**R5,000.00**	**R7,000.00**	**R10,000.00**	No funding currently for printing this. Some work is already underway in terms of content creation for the booklet through partnerships

Stationery	Paper, crafts, paints, coloured pens, paint, scissors, glue, receipt books, tickets, wrist bands, name tags, sign-in sheets,	Stationery is required to support the smooth coordination and delivery of the community events. These materials enable effective facilitation, participant engagement, record-keeping, and documentation. Providing adequate stationery ensures that all activities run efficiently and that the events remain organised and accessible to all participants.	**R5,700.00**	**R10,300.00**	**R15,400.00**	Volunteers currently using their own resources which is unsustainable
Printing	Printing flyers, posters, documents, training materials, signage, banners, agenda's, feedback, surveys, certificates of participation, prizes (non monetary)	Printing costs cover the production of essential materials needed for outreach, event implementation, and post-event evaluation.	**R7,900.00**	**R15,200.00**	**R20,300.00**	Sustainability Institute; Spier and volunteer resources
Equipment hire	Tables, chairs, umbrella's, gazebo's, toilets, tents, lighting, staging, audio equipment such as speakers and microphones	Due to limited community facilities, equipment hire is necessary to ensure that the community events are delivered effectively, safely, and at a professional standard. Costs increase as events get bigger each year.	**R16,700.00**	**R48,000.00**	**R55,000.00**	Where possible, events will be run at venues (SI, local schools/churches) where equipment hire not needed.
Security	Security at events	Security services are essential to ensure the safety and wellbeing of all participants, staff, and equipment during the community events. These costs cover professional security personnel, access control, crowd management, and safeguarding protocols.	**R9,700.00**	**R24,600.00**	**R40,500.00**	Will make use, where possible, of venues that include/do not charge extra for security
Catering for meetings around events	Basic refreshments	Catering is needed to support planning meetings and provide refreshments for event volunteers. It helps maintain focus, energy, and active participation during long planning sessions and volunteer shifts.	**R2,200.00**	**R3,000.00**	**R3,500.00**	Encourage donations from volunteers, supporting local, affordable catering options

Training and capacity building	Hourly rates for subject matter experts / registered councilors / sports coaches / dance instructors	Will work with existing networks and partner organisations/volunteer base where possible. Currently these services are limited, especially in Vlottenburg	**R14,000.00**	**R25,000.00**	**R40,000.00**	Work with existing networks and partner organisations/volunteer base where possible. Currently these services are limited, especially in Vlottenburg
Professional Services for Event Delivery	To ensure high-quality delivery of the cultural festivals and community markets, we request support for professional services related to event preparation, coordination, communication design and monitoring & evaluation.	All activities in this proposal are led by community volunteers. However, to ensure effective planning and delivery of large events, we request limited project coordination and technical support as an approved activity cost. This support covers essential tasks such as logistics management, vendor coordination, communication design, booklet production and reporting. These costs are strictly project-based and not salaries or stipends.	**R11,500.00**	**R13,000.00**	**R28,000.00**	Main implementers are either on a volunteer basis or funded independently of GiA funding
Entertainment	Artist, singers and/or performers	Entertainment mainly for cultural festivals and other relative events	**R5,500.00**	**R10,000.00**	**R30,000.00**	Encourage community/voluntary participation
Contingency costs	Unforeseen	Covers unexpected expenses to ensure smooth operations	**R6,000.00**	**R16,000.00**	**R17,000.00**	
Total			**R100,000**	**R200,000**	**R300,000**	

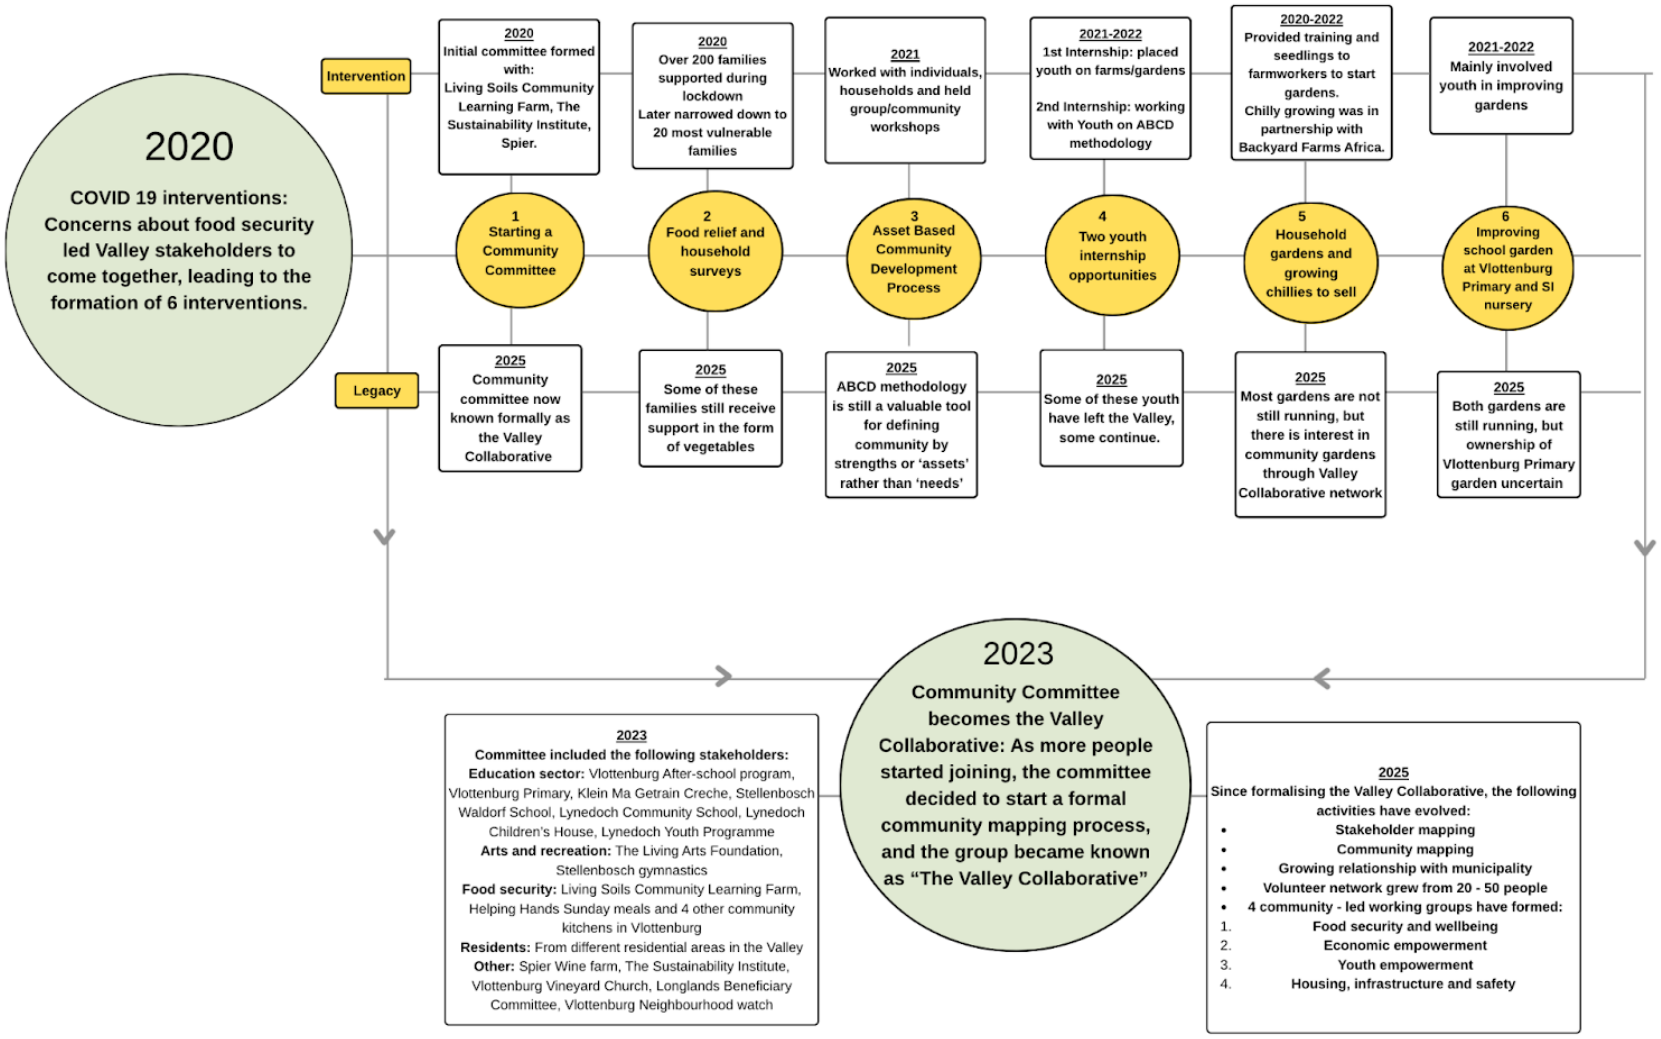
Note: Summary of additional funding and own contributions:

- We have applied for funding via the Stellenbosch University Social Impact grant and are waiting to hear back
- In March 2024 we held a business engagement event and will continue to host such events without tapping into GiA funding
- Continuous stakeholder mapping and building partnerships with local businesses, luxury housing estates and others.
- Sharing resources where possible with other partner organisations
- For events: Will work with using existing spaces in the community (schools, churches, halls/sheds on farms) as far as possible
- The Valley Collaborative will have a stand at the markets, advertising the work we do, selling goods that will go towards projects and fundraising
- The markets are being designed in a way that, over time, they will become income-generating by charging a reasonable fee to have a stall etc.

5. Monitoring, and Sustainability

The purpose of the plan below is to ensure transparent, accountable use of municipal funds and to measure the effectiveness, reach, and impact of community events across the three major pillars (youth empowerment, food and well-being, economic empowerment) implemented by the Valley Collaborative. This high level plan outlines the tools, processes, indicators, responsibilities, and reporting cycle.

All reports will be signed off for authenticity and accuracy by two or more leaders of the Valley Collaborative team. Each sign-off must represent a different team in addition to Irma or an equivalent leader.



Monitoring approach/how progress will be tracked	**Reporting cycle**	**Tools**
Financial Monitoring ● Ensure spending aligns with the approved budget. ● - Track **actual** expenditure monthly against forecasted budgets and avoid overspending. ● - Provide evidence-based reporting to the municipality.	Monthly with the team leads / champions of the various groups	MS Excel
Receipt & Invoice Archive ● Digital folder system ● Each expense must have a supporting document (invoice, receipt, proof of payment)	Weekly VC lead, admin assistant and team leads / champions of the various groups	Google Drive
Market	Post event and Monthly / Ongoing	Google drive

• Number of markets held • Number of vendors participating per market • Estimated income generated by vendors • Attendance numbers (tickets upon entry) • Diversity of vendor types (youth, farmers, food vendors, home enterprises)	VC lead, admin assistant and team leads / champions of the various groups Volunteers	Excel Other
Event Monitoring Objectives - Evaluate reach and engagement. - Ensure events meet community needs. - Provide evidence of impact.	Immediately post the event as well as monthly tracking through community discussions or representatives from the community	Various (excel, word, powerpoint)
Event Cost Summary Template For each event: • Planned event cost • Actual cost • Variance (%) • Explanation for variations	Post event	Various (excel, word, powerpoint)
Event Monitoring Process Before Event: • - Pre-event checklist and targets. During Event: • - Attendance, photos, observation. After Event:	Valley Collaborative leadership team	Various (excel, word, powerpoint) Google docs

• - Surveys, cost summary, lessons learned. Quarterly: • - Consolidated Event Impact Report.		
Quarterly Reports (3 monthly round up)	Quarterly Valley Collaborative leadership team	Various (excel, word, powerpoint)
Annual Report (12 month round up)	Annually Valley Collaborative leadership team	Various (excel, word, powerpoint)

6. Past Achievements

A: COVID 19 RELIEF ACTIVITIES (PRIOR TO FORMALLY ESTABLISHING THE VALLEY COLLABORATIVE)

As mentioned earlier, the Valley Collaborative emerged through a small number of local stakeholders coming together to address challenges that came with the COVID 19 pandemic. Starting with food relief, this work included household surveys, Asset Based

Community Development (ABCD) initiatives, youth internships, community gardening and more. Over time, a network started building that is now known as the Valley Collaborative. The diagram above summarises the outcome of 6 COVID 19 relief initiatives.

B: ACHIEVEMENTS SINCE FORMALISING THE VALLEY COLLABORATIVE

The diagram below provides a summary of what the VC has achieved since starting a formal community mapping process towards the end of 2023. See appendix A for a more detailed summary of the project.

ACTION GROUP PARTICIPATION	
Group	**Number of members**
Youth Empowerment	19
Food security and wellbeing	16
Economic empowerment	7
Housing and infrastructure	16
Total # of Volunteers	53

The Lynedoch Valley: Vlottenburg , Vlaeberg and Lynedoch Communities

About the Valley Collaborative

We are a community-driven initiative based in the Lynedoch Valley that brings together partners who share our vision and are committed to co-creating a valley worth believing in. We aim to strengthen communication, coordination, and project clarity to address challenges and create lasting impact. Our focus areas include youth empowerment, food security & wellbeing, housing, infrastructure & safety, and economic empowerment.

Our aim is to collaborate for a Valley that is:

These focus areas are aligned with the Ranyaka model, the approach that we are following: https://ranyaka.co.za/

1
Healthy, educated, active

2
Productive and employed

3
Safe, clean, attractive

4
Socially cohesive

How and why we started:

- The Valley Collaborative began during the COVID-19 pandemic with local leaders addressing food security in the Lynedoch Valley. This evolved into monthly Community Committee meetings, expanding the focus to other areas.
- **In 2023, the Collaborative had 20 members, today, this network has grown to over 50 volunteers and over 90 active participants*!**

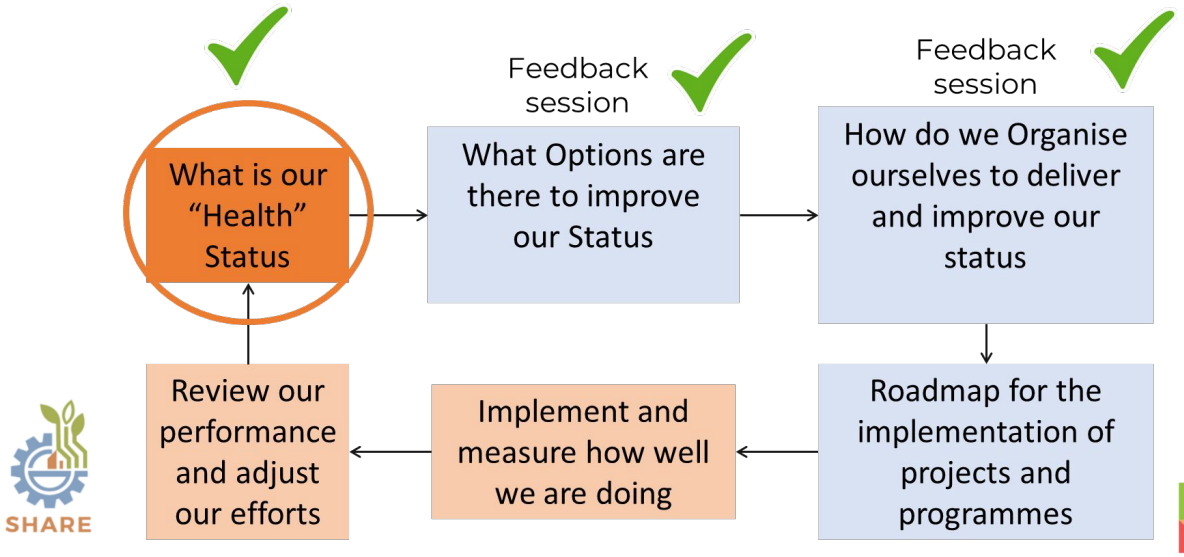
*Active participants include people that signed up for action groups, are part of our WhatsApp group, engage regularly in meetings/workshops or have shown interest in other ways.

The Valley Collaborative started with the following role players:

Education sector: Vlottenburg After-school program, Vlottenburg Primary, Klein Ma Getrain Creche, Stellenbosch Waldorf School, Lynedoch Community School, Lynedoch Children's House, Lynedoch Youth Programme

Arts and recreation: The Living Arts Foundation, Stellenbosch gymnastics

Food security: Living Soils Community Learning Farm, Helping Hands Sunday meals and 4 other community kitchens in Vlottenburg



Residents: From different residential areas in the Valley

Other: Spier Wine farm, The Sustainability Institute, Vlottenburg Vineyard Church, Longlands Beneficiary Committee, Vlottenburg Neighbourhood watch

Our approach:

- **Ranyaka** is a pioneering urban planning NP Company the co-designs, implements and sustains social and economic development.
- **SHARE** is a PTY (Ltd) company established by Ranyaka to design and sustain new economic and ownership models in towns and townships
- Towards the end of 2023, the Valley Collaborative started a partnership with Ranyaka Community Transformation to help guide us on our journey

The Ranyaka model:

For more information see: https://ranyaka.co.za/

2024 Focus: Identifying the strengths, pain points and priorities

In 2024, we co-facilitated a workshop with Ranyaka where we gathered with local stakeholders and community leaders. We completed two tasks:

1) A DNA map with 93 different indicators to assess the social, economic, spatial and social cohesion dynamics of the communities
2) An aerial map where participants highlighted areas of concern and of opportunity

See Appendix A: p8-9 for more results

1) DNA map

2) Aerial map

Action groups

Based on a long process of consulting with community members after our initial community mapping, 4 groups were formed around priority areas:

Youth empowerment

Food security and wellbeing

Economic Empowerment

Housing, infrastructure and safety

ACTION GROUP PARTICIPATION	
Group	Number of members
Youth Empowerment	19
Food security and wellbeing	16
Economic empowerment	7
Housing and infrastructure	16
Total # of Volunteers	53

Group photo: Community mapping workshop, April 2024

How does an action group work?

The goal of an action group is to work together to address specific issues in the communities that were highlighted as a priority. Each group plays an important role in designing and implementing a plan for action

What it means to be part of an action group:

- Participate in a small team focused on solving a specific community issue and contribute ideas to help shape decisions and actions.
- Attend monthly/quarterly meetings (frequency depends on dynamics of the group)
- Help plan and implement solutions or activities that address the identified issue.
- Collaborate with community members and stakeholders to achieve sustainable, long-term goals.
- Join a WhatsApp group for regular communication with the group (optional)

2025 Focus: A shift towards action

We co-facilitated a workshop with Ranyaka in April 2025 where the 4 action groups got together to work on a shared long term vision

- Each group worked to complete 3 activities to build long term visions
- Input from this was used to submit comments to the IDP
- Since then the action groups have continued to plan long and short term initiatives

Ongoing Activities

- **Building Partnerships:** Engage community leaders, businesses, NGOs, and the municipality.
- **Continuously Activate People:** Train leaders, mentor volunteers, and strengthen self-organization.
- **Ongoing Project Management** Refine management structures and explore collaborative leadership.
- **Managing Funds:** Plan and track project and group finances.
- **Ongoing Measurement:** Measure project outcomes.

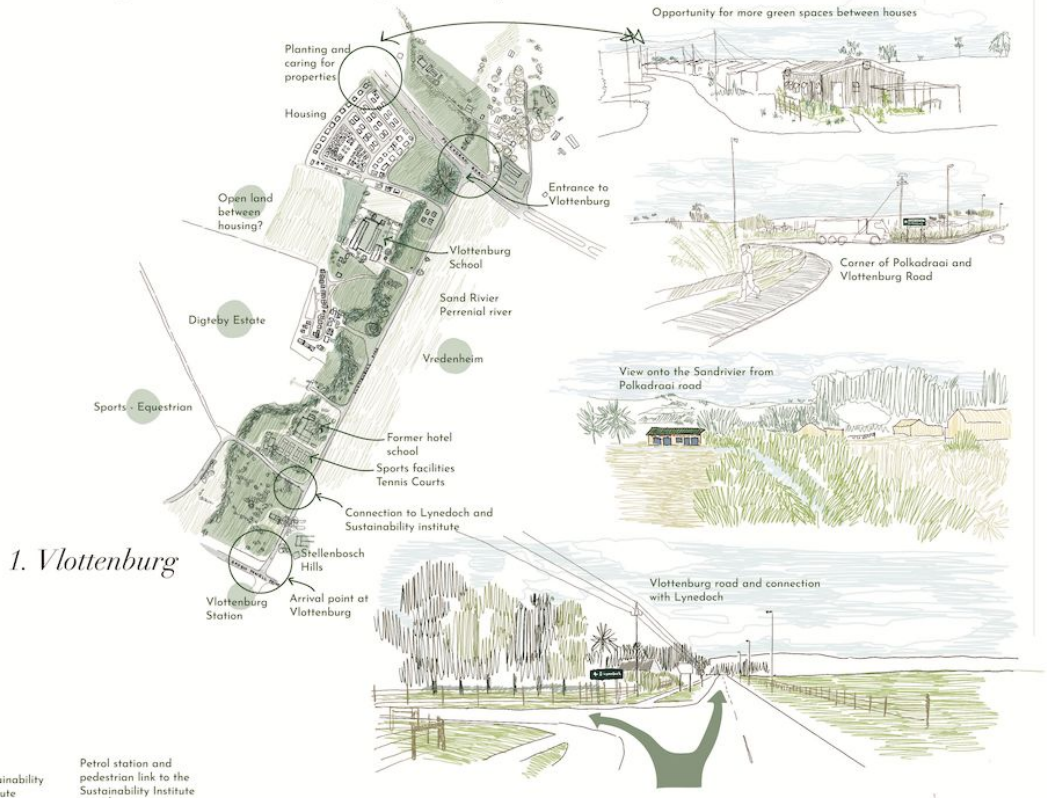
Activity Mapping



1. Vlottenburg

2. Lynedoch

can we use what we have as a starting point to dream?

Zooming in on Vlottenburg and Lynedoch

1. Vlottenburg

Arrival Points

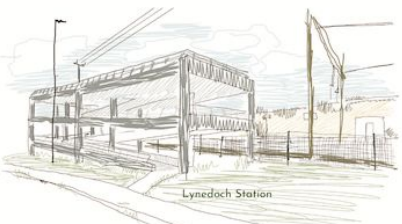
Development Principles

Environmental Sustainability

Focus on preserving and restoring natural ecosystems, biodiversity, and water resources. Implement renewable energy sources and sustainable agricultural practices.

Economic Sustainability

Develop local economies that are resilient and diverse. Promote activities that have minimal environmental impact and encourage circular economy practices.



Social Sustainability

Focus on full participatory planning, social equity, access to essential services, and community well-being.

THE SUSTAINABILITY INSTITUTE TRUST (IT3011/1999)

CONSTITUTION AND TERMS OF REFERENCE

PREAMBLE

Good governance is dependent on two factors: the effective and legitimate distribution of authority within the organisation; and the collective action of all members of the Board of Trustees. In their decision-making role, each of the Trustees must apply care, skill, good faith and diligence. At the simplest level, good governance is effective leadership based on responsibility, accountability, fairness and transparency.

It is imperative that the composition of the Board reflects intellectual, analytical and interpersonal skills, and that the Board strive to maintain an effective balance of power, expertise, diversity and stakeholder representation, so no one group can dictate agenda and direction.

Equally important is the understanding that the Board will evolve and change. The ideal being that the Board of Trustees will advance to the point of equilibrium, where power is balanced, leadership is experienced and the focus is firmly on the long-term health of the organisation. However, the organisation cannot stagnate, and the Board needs to guide it through change, within itself and within society, in order to survive and to remain relevant.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

1. PURPOSE OF THE TRUST

The Trust exists to benefit the following:

1.1. Programme beneficiaries; and

1.2. Any other persons (including juristic persons) who are eligible to receive benefits from the Trust as Public Benefit Organisations.

2. OBJECTIVES OF THE TRUST

The Trust has established a permanent institution known as the Sustainability Institute (SI) in the Lynedoch Ecovillage.

2.1. The main objectives of the SI are the following:

2.1.1. To have a transformative impact on the lives of the children and youth in the Lynedoch valley through the educational programmes offered

2.1.2 To contribute towards the realisation of sustainable development through our role as an African thought leadership institute researching, teaching and practicing social innovation for the transition to just and generative futures.

2.2. The ancillary objectives of the Trust are the following:

2.2.1. To raise, receive and administer funds to establish, equip and operate the SI and to fund and support any other public benefit activities of the Trust.

2.2.2. To establish a full-time administration to manage any building or conversion works, and to design and deliver the various educational and training programmes offered by the SI from time to time.

2.2.3. To establish information and data systems that will enhance the objectives of the Trust.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa

TEL +27 (0) 21 881 3500

2.3. The Trust will:

2.3.1. Only carry on those activities as envisaged in Clauses 2.1. and 2.2. above.

2.3.2. Actively pursue these objectives.

2.3.3. Utilise its funds only for the purpose of these objectives.

2.3.4. Only operate in South Africa, except where the Trustees determine otherwise.

3. TRUSTEES

3.1. Appointment of Trustees: The Trustees shall at all times have the right to appoint additional Trustees, provided that their appointment is in accordance with the Trust Deed and that they are duly authorised by the Master of the Supreme Court. The following may not be appointed as Trustees:

3.1.1. Any person who is disqualified from occupying office as a director in terms of the Companies Act.

3.1.2. Any unrehabilitated insolvent.

3.1.3. Any person who has been found to be of unsound mind.

3.2. There will be at any time a minimum of three Trustees. In the event of there not being three, the remaining two will only act to preserve Trust assets and to appoint the additional Trustee/s required, at which time the Trustees will again be empowered to act in all respects in terms of the Trust Deed.

3.3. Resignation or expulsion of Trustees: A Trustee will cease to hold office where he/she:

3.3.1. Becomes disqualified from holding office in terms of the Trust Deed.

3.3.2. Resigns as a Trustee in writing to the other Trustees.

3.3.3. Becomes disqualified to act as a Trustee under the Law.

3.3.4. Is removed as a Trustee by a resolution of at least seventy-five percent of the Trustees.

3.3.5. Dies.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

3.4. All Trust assets will be registered in the name of the Trust and will not be transferred to, or form part of, the assets of the Trustees.

3.5. The Trustees may, in writing, authorise the payment of a reasonable remuneration to any Trustee for services actually rendered.

3.6. Trustees may be reimbursed for actual expenses reasonably incurred on behalf of the trust.

3.7. No Trustee will be required to give any security in respect of or in connection with or arising out of their appointment as Trustee.

4. CONTROL OF FINANCE AND ASSETS

4.1. The expenses of administering the Trust, including any levies or taxes and the expenses of the Trustees in performing their duty as Trustees, will have first call on the Trust income.

4.2. The Trustees will use the funds of the Trust to attain its objectives but will not distribute its assets or net income other than as provided for in the Trust Deed.

4.3. Subject to the Trust Deed and legal compliance, the Trustees will have the discretionary power to:

4.3.1. Manage the distribution of the Trust capital and net income and determine any conditions to be attached thereto, as well as the nature and timing thereof.

4.3.2. Accumulate Trust funds for any project or other purpose which they deem to be in the interests of the Trust.

4.3.3. Responsibly invest trust funds not immediately required, in a financial institution or on the Stock Exchange or in other prudent investments, in compliance with Clause 5.3.5 of the Trust Deed.

4.4. The Trustees will administer the Trust in a manner that will preclude any donor from gaining any advantage or benefit from funds donated to the Trust.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

5. DECISIONS OF THE TRUSTEES AND PERFORMANCE OF THEIR DUTIES

5.1. The Trustees will manage the Trust subject to the terms of the Trust Deed, administering it in the manner they deem appropriate. They will hold a minimum of two meetings a year, one of which will be held within ninety days of the financial year end.

5.2. Any Trustee may call a meeting at any time, giving twenty-one days' notice, unless the urgency of the matter requires otherwise. Where a meeting is not possible, it may be held and a resolution passed, using electronic media, subject to the required quorum being satisfied.

5.3. The Trustees may elect among themselves a chairperson (who will not have a casting vote), a secretary or any other officers deemed necessary.

5.4. Fifty percent plus one of the Trustees will form a quorum for meetings and a simple majority will suffice at a quorate meeting. Trustees may resolve that one or more Trustees sign a document on behalf of the Trust.

5.5. A written resolution signed by seventy-five percent of the Trustees but not in a meeting will be valid provided that it is communicated to all the Trustees, and will be deemed to have been signed on the date the last Trustee signed.

5.6. All resolutions of the Trust will be recorded and retained by the Secretary of the Trust.

5.7. The Trustees may appoint a committee among themselves and delegate their powers to that committee, without precluding their own exercise of that power and may withdraw their delegation at any time.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

5.8. The Trustees may co-opt non Trustees to serve on the Trust from time to time, in an advisory capacity only.

5.9. The Trustees will determine from time to time, the manner in which all documents pertaining to the Trust will be signed.

6. PRESCRIBED FISCAL CONDITIONS

The powers of the Trustees will at all times be subject to compliance with all laws and regulations, having specific regard to the tax-exempt status of the Trust and its status to issue tax donation certificates under Section 18A of the Income Tax Act.

7. POWERS OF TRUSTEES

7.1. Subject to the limitations imposed by the Trust Deed, the Trustees will have full discretionary power and capacity as is legally required and permitted, and as any natural person would have in relation to his/her own affairs.

7.2. The Trustees will have, but not be limited to, the following discretionary rights and powers:

7.2.1. To open and manage any bank accounts of the Trust.

7.2.2. To form any organisation to further the objectives of the Trust, provided that such entity similarly has tax exemption.

7.2.3. To buy or sell any movable or immovable property; to sign any documents relating thereto: and to effect and register the necessary transfers.

7.2.4. To acquire or dispose of any interest in immovable property which does not constitute full ownership, whether registrable or not.

7.2.5. To buy or sell or otherwise acquire or dispose of any negotiable instruments of any kind.

Stellenbosch, 7603, South Africa

TEL +27 (0) 21 881 3500

7.2.6. To make loans to any eligible beneficiaries (but not to any Trustee or donor) under such terms and conditions as they deem fit.

7.2.7. To vary any investment by realising the same or substituting same for any other investment.

7.2.8. To borrow money on such terms and conditions as the Trustees decide, whether without security or upon such security over property as the Trustees may determine.

7.2.9. To mortgage or pledge the assets of the Trust.

7.2.10. To let, either by lease or otherwise, improve, alter or maintain any property of the Trust.

7.2.11. To collect and receive rents and cancel any tenancy and undertake the necessary proceedings to do so.

7.2.12. To incur, manage, pay, or receive payment on, all debts owed by the Trust or to the Trust, including any legal proceedings relating thereto.

7.2.13. To exercise the voting power or rights attached to any investment of the Trust regarding matters relating to that investment, such as amalgamation.

7.2.14. To effect the transfer of title of any shares which are precluded from being owned by the Trust, into the name of the Trustees or other designated nominee.

7.2.15. To accept on behalf of the Trust any donations made subject to the conditions of the Trust Deed.

7.2.16. To determine whether any surplus on the sale of any assets or any proceeds from any investment be regarded and accounted for as income or capital of the Trust, and to revise any such decision where necessary.

7.2.17. To employ, or terminate the employment of, professional practitioners, agents and employees necessary to carry out the objectives of the Trust; to remunerate them and to confer the right to exercise any discretion vested in the Trustees upon them.

7.2.18. To improve and develop immovable property of the Trust and to spend capital or income upon the preservation, maintenance and upkeep of such property.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

7.2.19. To enter into any contract by or on behalf of the Trust for the purpose of effecting the objectives of the Trust.

7.3. In the event that any other clause contradicts the following, this clause will prevail:

7.3.1. The Trustees may not allocate any Trust benefits other than in keeping with Clause 3 of the Trust Deed.

7.3.2. All donations made by or to the Trust will be irrevocable and subject to the terms and conditions of the Trust Deed.

7.3.3. Any Trustee who renders valid services to the Trust may be remunerated therefor, provided that: the charge is market related; the Trustee has disclosed his/her interest; and has not taken part in the decision to use such services.

7.3.4. The Trustees may not allow property of the Trust to be occupied free of charge unless by eligible beneficiaries or in pursuance of the objectives of the Trust.

7.3.5. Paid employees of the Trust may serve thereon in an advisory capacity only and will have no voting rights.

7.3.6. The Trust may not hold any competition or other arrangement whereby a prize may be won, unless permission has been received in accordance with the relevant legislation.

8. AUDIT PROCESS

8.1. The Trustees will keep, or responsibly delegate the keeping of, true and accurate records and books of account of the administration of the Trust, which will fairly reflect the position of the Trust at all times.

8.2. The Trustees will ensure that the books of account are timeously audited by an auditor appointed in terms of this clause.

8.3. Copies of the Annual Financial Statements (AFS) will be made available to all Trustees as soon as possible.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

8.4. The Board of Trustees will appoint to the Trust an independent, qualified and registered auditor.

8.5. The auditor will have unrestricted access to the books of account and all relevant supporting documentation and will be entitled to request from anyone related to the Trust any information or explanation required.

9. ANNUAL GENERAL MEETING (AGM)

9.1. The Financial Year of the Trust will commence on 1 January, unless it is resolved and legally arranged to change the Financial Year.

9.2. The AGM of the Trust will be held by the Trustees within three months of the end of the Financial Year.

9.3. The agenda of the AGM will include;

9.3.1. Presentation and adoption of the Trustees' Annual Report.

9.3.2. Ratification of the AFS.

9.3.3. Appointment or re-appointment of the Auditors.

9.3.4. Other necessary business.

9.4. The Trustees will each receive, at least fourteen days before the AGM, a copy of the AFS and any ancillary documentation.

10. NOTICES AND MEETING FORMALITIES

10.1. Delivery of notices will be done in writing either by hard copy or electronically, to the address on record of the Trustee.

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa

TEL +27 (0) 21 881 3500

10.2. Where a Trustee has not received a notice for a bona fide reason, the proceedings of the ensuing meeting will not be invalidated.

10.3. Notices sent electronically will be deemed to have been received twenty-four hours after dispatch.

10.4. Notices sent by registered post will be deemed to have been received five days after posting.

11. BANKING ACCOUNT

11.1. One or more banking accounts will be maintained in the name of the Trust and all financial transactions of the Trust will be done through such accounts.

11.2. All bank related documents will be signed in the manner prescribed by the Trustees from time to time.

12. REGISTRATION: NON PROFIT ORGANISATIONS ACT

The Trust is registered as a Non-Profit Organisation and accordingly, in keeping with the relevant legislation, the Trust and the Trustees will adhere to the conditions of the Trust Deed.

13. TRUSTEE INDEMNITY

13.1. Subject to legislation, the Trustees will be indemnified by the Trust for acts done in good faith, and the Trust will pay Trustees all expenses incurred by them in the discharge of their duties as Trustees.

13.2. Subject to legislation, no Trustee will be liable for:

13.2.1. the acts of any other Trustee or office-bearer or agent of the Trust;

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa

TEL +27 (0) 21 881 3500

13.2.2. any loss or expense suffered by the Trust through title to property or investment acquired by the Trust;

13.2.3. any loss arising from insolvency or any delictual act of any person or entity with whom Trust assets are deposited; or

13.2.4. any loss or damage caused to the Trust in any other way; and

which occurs in the proper administration of the Trust, unless the Trustee acted dishonestly or failed to exercise due care as required by law.

14. LEGAL PROCEEDINGS

All legal proceedings by or against the Trust will be instituted in the name of the Trust.

15. BENEFICIARY SELECTION

The Trustees will from time to time determine appropriate beneficiary and project selection criteria, having regard to the following:

15.1. Whether potential beneficiaries are or could be leaders in government, the non-profit sector or business, and whether they need training and support to effectively occupy those positions.

15.2. Whether they will be able to make a difference to vulnerable and at-risk people and communities once they have received training through the Trust.

15.3. Where they come from historically racially disadvantaged communities whether they will, after training, return to those communities and implement initiatives and programmes to develop those communities.

16. ETHOS

THE SUSTAINABILITY INSTITUTE

PO Box 162, Lynedoch,
Stellenbosch, 7603, South Africa
TEL +27 (0) 21 881 3500

The Trustees, in making decisions of the Trust, will at all times respect the rights and dignity of others and will act in a non-racial, non-sexist, impartial, democratic, accountable, financially responsible and compassionate manner.

17. AMENDMENTS, NAME CHANGE AND DISSOLUTION OF THE TRUST

17.1. The Trustees may at any time amend the Trust Deed, the name of the Trust, or dissolve the Trust, by a resolution of not less than seventy-five percent of all the Trustees, being not less than the minimum number stipulated in the Trust Deed.

17.2. Any such resolution will be formalised by Deed as soon as is reasonably possible, and such Deed will then be submitted to the Commissioner and Director of Non-profit Organisations forthwith.

17.3. Should the Trustees resolve to dissolve the Trust, having accounted for all liabilities of the Trust, the net residue of the Trust fund will be transferred to one or more other approved Public Benefit Organisations which have the same or similar objectives as this Trust, as determined by the Trustees, or failing that, by the Court; provided that the remaining portion of any donation for which a S18A certificate has been issued will be transferred to another organisation able to issue such certificates; and provided further that each disposition must be approved by the Commissioner, as required in terms of the Income Tax Act.

18. PATRONS

The Trustees may from time to time appoint one or more persons as patron/s to the Trust, and such patrons will serve for a time and in manner as deemed appropriate by the Board of Trustees.

Dear Taxpayer

TAX COMPLIANCE STATUS PIN ISSUED

The South African Revenue Service (SARS) has issued your tax compliance status (TCS) PIN as indicated below:

TCS Details:	
Taxpayer Name	The Sustainability Institute Trust
Trading Name	THE SUSTAINABILITY INSTITUTE TRUST
Taxpayer Reference Number(s)	IT - 0607194149 Vat - 4110198795 PAYE - 7420740070
Purpose of Request	Good Standing
Request Reference Number	0004786404GS1504251044504
PIN	9F251G55I5
PIN Expiry Date	15/04/2026

You may authorise a third party to view your TCS by providing them the PIN. The PIN only allows the third party access to your TCS. All your other tax information remains secure.

Your TCS displayed is based on your compliance as at the date and time the PIN is used.

You may cancel this PIN at any time before the expiry date reflected above. Once cancelled, a third party will not be able to verify your TCS.

SARS reserves the right to cancel the TCS application and associated PIN in the event that it was issued in error or provided on the basis of fraud, misrepresentation or non-disclosure of material facts.

More details regarding our channels, office hours, services, tailored information regarding tax as well as a comprehensive FAQ repository are available on the SARS website: www.sars.gov.za.

We value your support and contribution to our country's economy and prosperity. We strive to ensure that you clearly understand what is expected from you, as well as what your rights as a taxpayer are.

Sincerely

ISSUED ON BEHALF OF THE COMMISSIONER FOR THE SOUTH AFRICAN REVENUE SERVICE

Trustees' Responsibilities and Approval

The trustees are required to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. These annual financial statements have been prepared in accordance with the IFRS for SMEs® Accounting Standard as issued by the International Accounting Standards Board (IASB®) and it is their responsibility to ensure that the annual financial statements satisfy the financial reporting standards with regards to form and content and present fairly the statement of financial position, results of operations and business of the trust, and explain the transactions and financial position of the business of the trust at the end of the financial year. The annual financial statements are based upon appropriate accounting policies consistently applied throughout the trust and supported by reasonable and prudent judgements and estimates.

The trustees acknowledge that they are ultimately responsible for the system of internal financial control established by the trust and place considerable importance on maintaining a strong control environment. To enable the trustees to meet these responsibilities, the trustees set standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the trust and all employees are required to maintain the highest ethical standards in ensuring the trust's business is conducted in a manner that in all reasonable circumstances is above reproach.

The focus of risk management in the trust is on identifying, assessing, managing and monitoring all known forms of risk across the trust. While operating risk cannot be fully eliminated, the trust endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The trustees are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss. The going-concern basis has been adopted in preparing the financial statements. Based on forecasts and available cash resources the trustees have no reason to believe that the trust will not be a going concern in the foreseeable future. The annual financial statements support the viability of the trust.

The annual financial statements have been audited by the independent auditing firm, Theron du Plessis Somerset West Incorporated, who have been given unrestricted access to all financial records and related data, including minutes of all meetings of the beneficiaries, the trustees and committees of the trustees. The trustees believe that all representations made to the independent auditor during the audit were valid and appropriate. The external auditor's unqualified audit report is presented on pages 7 to 8.

Trustees' Report

The trustees present their report for the year ended 31 December 2024.

1. Review of activities

Main business and operations

The Sustainability Institute Trust is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects. There were no major changes herein during the year.

The operating results and statement of financial position of the trust are fully set out in the attached financial statements and do not in our opinion require any further comment.

2. Objective of the trust

The Sustainability Institute Trust is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects.

3. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

4. Events after reporting date

The trustees are not aware of any matter or circumstance arising since the end of the financial year to the date of this report that could have a material effect on the financial position of the trust.

5. Trust capital

No changes were made to the trust capital during the year under review.

6. Trustees

The trustees of the trust during the year and up to the date of this report are as follows:

G Prince
H Newton-King (Chairperson)
J Schulschenk
KA Savin
PS Semprini
R van Niekerk
SB Dunn

Independent Auditor's Report

To the Trustees of THE SUSTAINABILITY INSTITUTE TRUST

Opinion

We have audited the annual financial statements of THE SUSTAINABILITY INSTITUTE TRUST set out on pages 9 to 25, which comprise the statement of financial position as at 31 December 2024, and the statement of comprehensive income, the statement of changes in trust funds and the statement of cash flows for the year then ended, and notes to the annual financial statements, including a summary of significant accounting policies.

In our opinion, the annual financial statements present fairly, in all material respects, the financial position of THE SUSTAINABILITY INSTITUTE TRUST as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Annual Financial Statements section of our report. We are independent of the trust in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter – Donations

We draw attention to Note 13 and 15 in the financial statements, which deals with managed funds and operating income. Donations received by The Sustainability Trust are merely incidental as the most significant part of The Sustainability Institute Trust income arises from funding and grants. However, as with similar organisations, it is not feasible for the organisation to institute accounting controls over donations prior to the entry of the collections into the accounting records, and therefor, it is impracticable for us to extend our examination beyond donation receipts actually recorded. Our opinion is not modified in respect of this matter.

Other Information

The trustees are responsible for the other information. The other information comprises the information included in the document titled "THE SUSTAINABILITY INSTITUTE TRUST Annual Financial Statements for the year ended 31 December 2024", which includes the Trustees' Report, and the statement of Trustees' Responsibilities and Approval, which we obtained prior to the date of this report, and the supplementary information set out on pages 26 to 28. The other information does not include the annual financial statements and our auditor's report thereon.

Our opinion on the annual financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

In connection with our audit of the annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Trustees for the Annual Financial Statements

The trustees are responsible for the preparation and fair presentation of the annual financial statements in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities, and for such internal control as the trustees determine is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the trustees are responsible for assessing the trust's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustees either intend to liquidate the trust or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the trust's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the trustees.
- Conclude on the appropriateness of the trustees' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the trust's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the trust to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the trustees regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

THE SUSTAINABILITY INSTITUTE TRUST

(Registration Number IT3011/99)
Annual Financial Statements for the year ended 31 December 2024

Accounting Policies

1. General information

THE SUSTAINABILITY INSTITUTE TRUST ('the trust') is an international living and learning centre for studies in ecology, community and spirit. The Trust established a permanent educational institution and provides a range of transdisciplinary academic programmes, conducts anti-poverty initiatives, environmental awareness and sustainable development projects.

The trust is registered with the Master of the High Court and domiciled in South Africa. The address of its registered office is Lynedoch Eco Village, Lynedoch Road, 7603.

2. Basis of preparation and summary of significant accounting policies

The annual financial statements of THE SUSTAINABILITY INSTITUTE TRUST have been prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities. The annual financial statements have been prepared under the historical cost convention, as modified by the revaluation of investment property, certain property, plant and equipment, biological assets and derivative financial instruments at fair value. They are presented in South African Rand.

The preparation of financial statements in conformity with the International Financial Reporting Standard for Small and Medium-sized Entities requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the trust's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in note 3.

The principal accounting policies applied in the preparation of these annual financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the trustees.

The trust adds to the carrying amount of an item of property, plant and equipment the cost of replacing parts of such an item when that cost is incurred if the replacement part is expected to provide incremental future benefits to the trust. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to surplus or deficit during the period in which they are incurred.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within 'other gains / (losses)' in the statement of comprehensive income.

The trust elected to adopt a depreciation policy where assets is not depreciated and carried at their original cost. As the trust is a Non-Profit Organisation, the assets is expected to have an extended useful life and value as what would typically be expected.

2.2 Financial instruments

Trade and other receivables

Most sales are made on the basis of normal credit terms and the receivables do not bear interest. Where credit is extended beyond normal credit terms, receivables are measured at amortised cost using the effective interest method. At the end of each reporting period, the carrying amounts of trade and other receivables are reviewed to determine whether there is any objective evidence that the amounts are not recoverable. If so, an impairment loss is recognised immediately in surplus or deficit.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

Accounting Policies

Trade and other receivables are classified as debt instruments and loan commitments at amortised cost.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, demand deposits and other short-term highly liquid investments with original maturities of three months or less. Bank overdrafts are shown in current liabilities on the statement of financial position.

Trade and other payables

Trade payables are obligations on the basis of normal credit terms and do not bear interest.

Trust capital and retained earnings

All funds of a capital nature received by the trust are accounted for directly to the Trust Capital account. This includes the original donation received by the trustees to establish the trust, as well as all donations received by the trustees since the trust's inception. This excludes capital gains and losses realised by the trust in the normal course of its business activities. Trust capital is reduced by any capital distributed by the trustees to any capital beneficiary.

Retained earnings consist of all revenues, capital gains and losses retained by the trust after the payment of all expenses, taxes and distributions of income and capital gains to beneficiaries.

2.3 Inventories

Inventories are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost is determined using the first-in, first-out (FIFO) method. The cost of finished goods and work in progress comprises packaging costs, raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). At each reporting date, inventories are assessed for impairment. If inventory is impaired, the carrying amount is reduced to its selling price less costs to complete and sell; the impairment loss is recognised immediately in profit or loss.

2.4 Provisions

Provisions are measured at the present value of the amount expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.5 Revenue

Revenue is measured at the fair value of the consideration received or receivable. Revenue is shown net of value-added tax, returns, rebates and discounts.

Revenue from the sale of goods is recognised when:

- significant risks and rewards of ownership of the goods have been transferred to the buyer;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

Accounting Policies

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the end of the reporting period. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity;
- the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of transactions involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

The stage of completion of a transaction may be determined by a variety of methods, depending on the nature of the transaction:

- surveys of work performed;
- services performed to date as a percentage of total services to be performed;
- the proportion that costs incurred to date bear to the estimated total costs of the transaction. Only costs that reflect services performed to date are included in costs incurred to date. Only costs that reflect services performed or to be performed are included in the estimated total costs of the transaction.

Interest income is recognised using the effective interest method.

Rental income from investment property that is leased to a third party under an operating lease is recognised in the statement of comprehensive income on a straight-line basis over the lease term and is included in 'other income'.

Dividend income is recognised when the trust's right to receive payment has been established and is shown as 'finance income'.

Royalties are recognised on an accrual basis in accordance with the substance of the relevant agreement.

2.6 Donations and sponsorships

Donations and sponsorships are recognised as income on the date that they are received. Donations and sponsorships in the form of assets are recognised at the value of the asset on the date the asset is received by the trust. Donations and sponsorships are recognised as a liability when received and recognised as income when the conditions are met. Donations and sponsorships are conditional if the trust will have to pay them back to the providers if they are not used in line with the set conditions.

Employee benefits

Compensation paid to employees for the rendering of services are recognised at the undiscounted amount paid or expected to be paid in the accounting period in which the services were rendered.

Where employees accumulate entitlement for paid absences, an expense is recognised as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. In the case of non-accumulating paid absences, the expense is recognised only when the absences occur.

Docusign Envelope ID: 5869AC4A-5A23-48B0-8E33-96F2F3EA4CF0

THE SUSTAINABILITY INSTITUTE TRUST

(Registration Number IT3011/99)
Annual Financial Statements for the year ended 31 December 2024

Accounting Policies

2.7 Grants and subsidies received

Unconditional grants and subsidies received from the government are recognised as income when they are received. Conditional grants and subsidies are recognised as a liability when received and recognised as income when the condition are met. The grants and subsidies are conditional if the trust will have to pay them back to the government if they are not used in line with the set conditions.

2.8 School fees

The amount of school fees receivable is calculated based on learner enrolments multiplied by the school fee amount approved by parents. The amount receivable is recognised when the learners register at the school.

2.9 Related parties

A related party is a person or entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to a reporting entity if that person:
  - has control or joint control of the reporting entity;
  - has significant influence over the reporting entity; or
  - is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - The entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
  - One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
  - Both entities are joint ventures of the same third party;
  - One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;
  - The entity is controlled or jointly controlled by a person identified as a related party;
  - A person identified as having control or joint control over the reporting entity has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or
  - The entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

3. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

No significant estimates and adjustments have been applied in the preparation of these annual financial statements.

Notes to the Annual Financial Statements

Figures in R	2024	2023
Land and buildings consist of the following:		
Farm House	220,000	220,000
- Cost of Land	534,961	534,961
- Cost of land	1,072,738	1,072,738
- Cost of buildings	2,414,040	2,414,040
- Improvements	4,241,739	4,241,739
- Revaluation surplus		
The Pink House (Creche)	150,000	150,000
- Cost of land	1,083,651	1,083,651
- Cost of buildings	3,847,392	3,847,392
- Revaluation surplus	5,081,043	5,081,043
Guest House		
- Cost of land	1,865,000	1,865,000
- Cost of buildings	875,494	875,494
- Improvements	370,348	370,348
- Revaluation surplus	7,912,635	7,912,635
	11,023,477	11,023,477
Main Building		
- Cost of land	500,000	500,000
- Cost of buildings	4,000,000	4,000,000
- Revaluation surplus	34,750,435	34,750,435
	39,250,435	39,250,435
Old Grade R Building (The Barn)		
- Cost of land	-	-
- Improvements	44,348	44,348
- Revaluation surplus	733,413	733,413
	777,761	777,761
Spier Wine Farm (Wendy house)		
- Improvements	48,326	48,326
Total land and buildings:	60,422,782	60,422,782

Valuations were done by Santam's professional valuation and quantity surveyor on 5 September 2023.

The main building and land on which it is situated has been paid in full by The Sustainability Institute Trust. However, it currently still forms part of Erf 1, Lynedoch, which is subject to a pending sub-division application. The trust therefore has no title deed for the property, but the transaction has been underwritten by Old Mutual - Risk Benefit Solutions (Pty) Ltd and this indemnity insurance will remain in place until the transaction is properly concluded. The sub-division is currently in process and is aimed to be completed within the next financial year.

Although the trust utilises the majority of land and buildings for operational purposes, a part of the premises are leased to third parties. As the portion that are rented out, are immaterial to the value of land and buildings, it is considered impractical and not cost effective to determine the value and reclassify that portion to investment property.

VALLEY COLLABORATIVE
Collaborating for a Valley Worth Believing In

To whom it may concern,

This letter serves as a formal appeal, submitted in accordance with the Grant-in-Aid (GiA) Appeals Process outlined in the municipal GiA FAQ and the call for comments on the draft budget. It responds to the reasons provided for the non-recommendation of the GiA application submitted on 28 November 2025 by the Sustainability Institute (SI) for the Valley Collaborative (VC) project. We were informed that the application was not recommended primarily due to concerns related to the SI's compliance status as a Trust. Below, we outline the municipality's comments under each heading, followed by our corresponding responses.

1) TRUST DEED REQUIRES REGISTRATION ITO NPO ACT.
The SI is a registered Trust and has been operating successfully, managing large sums of donor funding, for more than 2 decades. See attached NPO registration document. We also shared a copy of this with Ms Michelle Aalbers, who confirmed via email that "this certificate indicates that SI has been registered ito of the NPO Act as per article 15 of the SI Deed of Trust".

2) NPO REGISTRATION STATUS = NOT COMPLIANT.
Last year the SI was recognised as part of the 5% of NPO's that qualified to apply for NLC (Lotto) funding, based on the fact that we were compliant. At the time, the NPO website was not functional yet & the NLC created their own with the assistance of Social Development. In the most recent effort, the NPO website was still not functional (screenshot available upon request). See Appendix 1 for correspondence from Ruth Magrath of Stellenbosch Municipality to confirm our efforts to ensure that compliance is reached.

3) AFS NOT ALIGNED WITH FIN YEAR INDICATED IN TRUST DEED.

In the Deed of Trust that we submitted with our application, it is stipulated that the financial year of the SI is from 1 April – 31 March of each year. We submitted financial statements for the year ending December 2024, suggesting a mismatch between the period covered by the AFS and what the SI Deed of Trust indicates. In light of this, we are providing a document that shows the resolution where a new financial year ending in December each year was adopted.

In sum, please find attached the following documents:

- Certificate of NPO registration
- Organisational constitution and Trust Deed
- Audited financial statements
- Resolution on the amendment of the Trust Deed
- Screenshot of email to confirm sustained effort at NPO compliance
- A copy of the full application, as submitted in November 2025, with all documents in one (if you need to review all documents together)

Kind regards,

Irma Faul

APPENDIX 1

Sustainability Institute 051 245 NPO (Valley Collaborative) Inbox ×

Ruth Magrath
to Michelle, rene@sustainabilityinstitute.net, Valley

Thu, Apr 23, 5:32 PM (15 hours ago)

Dear Michelle,

Valley Collaborative contacted our office to explain that they require assistance to bring the NPO up to compliance status as they had applied for GIA funding at Stellenbosch Municipality.

Rene Human from the Sustainability Institute Trust has been in contact with our office . The organisation has made significant and sustained effort to ensure that compliancy is reached. They have submitted their outstanding reports.

It is important to note is that many organisations are currently facing significant delays due to the NPO Directorate's transition from an email-based system to a new online platform. Common challenges include slow feedback on compliance reports, delays in general correspondence, and difficulties uploading reports on the new system.

The Sustainability Institutive has shown genuine commitment and effort to resolve their compliance standing.

Kind regards,

Ruth Magrath

Integrated Development Planning Team
idp@stellenbosch.gov.za

Dear IDP Team

COMMENT ON THE INTEGRATED DEVELOPMENT PLAN AND BUDGET STAKEHOLDER ENGAGEMENT MEETING: TOWN HALL, STELLENBOSCH: 21 APRIL 2026: CONCERN ABOUT ROAD INFRASTRUCTURE ITEMS INCLUDED IN THE BUDGET

1. I refer to the above-mentioned meeting held in the Town Hall on 21 April 2026 which was attended by a member of the Stellenbosch Interest Group (SIG).

2. As a point of departure SIG is most concerned about the inclusion of certain items in the capital infrastructure budget of the Municipality. The first concern relates to the proposed construction of the Wildebosch – Trumali link road, referred to in the IDP as the following projects: “Wilderbosch Extension to Trumali” and “Wilderbosch Extension to Technopark”. As you must be aware there have been numerous objections by a variety of interest groups about the costs and benefits of this road link. Considering all the available information the proposed construction of this road link appears to be irrational as no transportation benefits will be realised by its construction. SIG accordingly requests that funding for these projects be removed from the budget and that the funds should be allocated to a more worthy cause such as projects in support of public transport.

3. The second issue of concern relates to the proposed “upgrade: Lower Dorp Street”. The approval of the project is subject to the outcome of appeals addressed to the Western Cape Minister of Cultural Affairs and Sport. Implementation of the project is accordingly subject to the outcome of the appeals.

Kind regards

Claire Erasmus (Chairperson)

Dear Sir/Madam

I refer to the recent municipal budget meeting for 2026/2027, specifically regarding the GIA applications.

I noted that our application was declined based on 3 reasons. We have since addressed those issues and herewith wish to appeal the decision as expressed in the attached appeal letter and attached those supporting documents for clarification.

I am not including all the supporting documents as per the initial application. Should you however require those, I will gladly submit those again if it is required.

Hope that this appeal will be considered favourably.

Dear Michelle

I trust that you are fine. I am not sure who to address my query to, but your name came to mind.

I am enquiring about the last GIA submissions which closed in November 2025 for funding proposals. I am just wondering whether successful applicants were notified already. If no notification were received, does that mean that the application was unsuccessful?

If unsuccessful, I believe there is an appeal process and period?

Are you perhaps able to shed some light, or refer me to the correct person that can assist me.

Our NPO's details are below:

Dear Fiona and Michelle

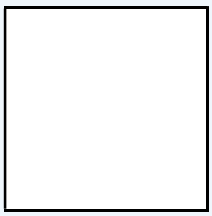
I hope you are well, whilst trying to finalise things as the year is coming to an end and you are wrapping up most of your work/projects!

@Fiona, I just have a question for you. I am busy preparing the required documentation for the GIA application for 2025/2026. I just want to make 100% sure that our organisation's details are listed for attending the compulsory workshop in this regard. I am not sure if you remember, but our name was not initially recorded on the attendees list on the day of the workshop, although we registered prior. You allowed our attendee to indeed attend the workshop. BUT I just want to make 100% sure. Are you able to check for me please.

Our NPO is registered as 'L Roi "The God Who Sees"

@Michelle, can I ask you a question regarding the application form please? The question is related to the last bullet point on K3"

"Reference independent of the applicant and its executive/board or committee members" What is meant by this statement?



Your help in this regard will be much appreciated.

Kind Regards

Dear Fiona

I hope you well.

I refer to the workshop that was held regarding the above.

Could you manage to distribute the presentation to the attendees already, as it was not received by either the attendee or any of the other members?

I think there could have been an oversight. As per my email below, I confirm the attendees for the 28th of October 2025, but our name was not listed as being registered on that day. Thankfully you allowed our representative to still attend the workshop on the 28th.

Could the presentation be emailed to me in my capacity as the secretary of our organisation at nicky.hendricks@elroicommunity.org perhaps?

Your assistance would be greatly appreciated.

Kind Regards

To: The Financial Board of the Stellenbosch Municipality
Per email: idp@stellenbosch.gov.za
cc:michelle.aalbers@stellenbosch.gov.za

Dear GIA Committee

Appeal Letter: Grant-in-Aid Application

We acknowledged the minutes of the council meeting held on 31 March 2026, and the outcome of our GIA application. We appreciate the time and consideration given to our submission.

We respectfully submit this appeal for reconsideration of our application, and wish to address the 3 concerns raised as pointed out below:

1. The AFS not aligned with our financial year-end period:

According to our constitution, our financial year ended in August (for the last period it was August 2025). In our GIA submission, we erroneously stipulated the period on the AFS ending on September 2025 instead of August 2025. We have corrected this error and attached the edited AFS for your revised consideration. Refer to updated attachment.

2. Overall budget not linked to a financial period:

We also initially included our full budget (including our wishlist for the Afterschool centre) with the GIA application. We now understand the importance of aligning project budgets. We have revised our budget to reflect the periods (2025 to 2026 and 2026 to 2027.Refer to updated attachment.

3. Budget not feasible with a half million deficit

As per point 2 above, we included our "full wishlist" in the proposed budget. The noted deficit of R500 000,00 was not intended to reflect ongoing unsustainability, but rather indicating what we would like to work towards creating a fully fletched Afterschool Centre and the continuous running costs thereof.

We have since adjusted our budget to work on realistic projected income and expenditure as an emerging NPO, which significantly reduces this gap. Refer to attachment.

4. Feasibility and Community Impact

Despite the earlier concerns, our project remains feasible and impactful. Our organisation continues to serve the community and the beneficiaries in Idas Valley, addressing critical needs in education. The grant-in-aid will enable us to expand these services, ensuring measurable outcomes aligned with municipal priorities.

Request for Reconsideration

We kindly request that the municipality reconsider our application in light of the revised financial documentation and clarifications provided. We remain committed to transparency, compliance, and effective delivery of community-based projects.

Thank you for your attention to this appeal. We look forward to the opportunity to engage further and provide any additional information required.

Yours sincerely

Nicolett Hendricks

FORMAL SUBMISSION

Draft 4th Review of the 5th Generation Integrated Development Plan 2022–2027

Stellenbosch Municipality (WC024)

With particular reference to: the CITP's standalone statutory status; the investment bias toward road infrastructure over walking, cycling and public transport; Triple Access Planning and the 15-minute city as accountability frameworks; post-apartheid spatial reinforcement and high-income peripheral development; transport system resilience and climate adaptation; micromobility; and alignment with the NLTSF, WCIF 2050, Draft PLTF, WC Biodiversity Act, WC Biodiversity Spatial Plan, and the Kunming-Montreal Global Biodiversity Framework through NEMBA

Submitted by	Pedal Power Association (PPA) and SEE Sustainability
Date	April 2026
Document reference	Draft 4th Review, 5th Generation IDP 2022–2027 (March 2026)
Key frameworks	NLTA (s.36 / GN 954 of 2014); NLTSF 2023–2028; WCIF 2050 (adopted Oct 2024); Draft PLTF 2024/25–2028/29; Kunming-Montreal GBF (2022) → NEMBA (2004) → WC Biodiversity Act (2021) → WC Biodiversity Spatial Plan (Dec 2024); Triple Access Planning (EU Handbook 2024); 15-Minute City (Moreno, 2016); OECD Catalonia Attractiveness Gap (2025); ITF/OECD Vision-Led Transport Planning (2025); Harvard Growth Lab (2023); Wales Roads Review (2023)
Central ask	Establish the standalone annual CITP review process the NLTA requires; use it to incorporate the measurement framework and investment reorientation that would make the IDP's spatial vision measurable and accountable
Disclosure	SEE Sustainability was previously engaged as a subconsultant on the development of the Stellenbosch CITP approved in March 2023. The comments in this submission relate primarily to frameworks, legislation, and operational developments arising after that date, and to the statutory review process required by the NLTA.

1. Executive Summary

The Pedal Power Association (PPA) and SEE Sustainability submit these comments on the Draft 4th Review of Stellenbosch Municipality's 5th Generation Integrated Development Plan (IDP) 2022–2027. This submission primarily focuses on the Comprehensive Integrated Transport Plan (CITP) and its treatment of active and public transport investment, travel demand management, road safety, and — most fundamentally — the municipality's sustained planning for, and investment bias toward road infrastructure for private vehicles over walking, cycling, and public transport.

South Africa's spatial form — low-income communities placed on the periphery, far from employment, services, and economic opportunity, dependent on expensive and unreliable transport — was not an accident of history. It was the product of a deliberate planning system. What is less often stated plainly but is extensively documented in the academic and policy literature, is that more than thirty years of planning practice since 1994 have not reversed this spatial structure. Urban planning regulations and zoning policies continue to prevent dense, affordable housing in well-located areas. New developments, as Stellenbosch's own IDP acknowledges, 'reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport.' The transport system has not been restructured to serve many employment centres that have been developed in recent years. The Harvard Growth Lab's diagnosis is unambiguous: policies since 1994 have unintentionally perpetuated sprawl and spatial exclusion, and transport costs representing up to 57% of net wages for low-income workers are not a legacy — they are a current, measurable consequence of ongoing planning decisions.

The 15-minute city concept — developed by Professor Carlos Moreno in 2016 and now adopted as a planning framework by cities worldwide — provides both a diagnosis and an accountability standard: a well-functioning city should ensure every resident can access the six essential urban functions of living, working, commerce, healthcare, education, and recreation within 15 minutes on foot or by bicycle. Stellenbosch's own IDP states this vision precisely: 'compact settlements, cyclable and walkable, linked using public transport.' The IDP has the aspiration. It has no instrument to measure whether it is being achieved or whether planning decisions are moving toward or away from it.

This submission analyses the CITP and associated IDP documents across all three cycles — the approved original IDP (May 2022), the 3rd Review (May 2025), and the draft 4th Review (March 2026) — and is informed by nine bodies of evidence and statutory frameworks: the National Land Transport Strategic Framework 2023–2028 (NLTSF) and the NLTA, which are legally binding on Stellenbosch's CITP; the Western Cape Infrastructure Framework 2050 (WCIF 2050), adopted by Cabinet in October 2024; the Draft Western Cape Provincial Land Transport Framework 2024/25–2028/29 (PLTF), published for comment in April 2025; the Triple Access Planning framework (Lyons and Davidson, 2016; EU Handbook, 2024); the ITF/OECD's Vision-Led Transport Planning guide (2025), which provides independent international corroboration of the paradigm shift from predict-and-provide to vision-led planning; the OECD's analysis of the Catalonian mobility transition and its attractiveness gap model; the Harvard Growth Lab's diagnosis of spatial exclusion as a binding constraint on South African growth; the biodiversity policy cascade from the Kunming-Montreal Global Biodiversity Framework (2022) through NEMBA (2004), the Western Cape Biodiversity Act (2021), and the Western Cape Biodiversity Spatial Plan (gazetted December 2024); and the extensive South African and international literature on post-apartheid spatial planning failure.

Our central finding: the Stellenbosch CITP formally endorses a modal hierarchy placing walking, cycling and public transport ahead of private vehicles — a hierarchy the NLTSF requires it to uphold. The investment decisions, project deferrals, and budget allocations documented across three IDP cycles systematically invert that hierarchy in practice. The spatial planning chapter of the same IDP acknowledges that new development is entrenching car dependency and that sustainable transport has been overlooked in favour of traditional engineering solutions. These are not incidental failures. They are the predictable consequence of a planning and delivery system that measures mobility but not access, optimises for vehicle throughput but not spatial proximity, and has reproduced the spatial exclusion characteristic of South Africa's apartheid-era cities in the name of addressing it — for low-income communities through failed housing policy, and for high-income communities through gated peripheral development that planning approvals continue to enable. This same development pattern is simultaneously a

transport failure, a biodiversity failure, and a breach of South Africa's obligations under NEMBA and the Kunming-Montreal Global Biodiversity Framework. This submission identifies what needs to change — in the CITP's measurement framework, its investment priorities, its institutional processes, and its relationship to the spatial vision the IDP articulates but does not yet have the instruments to track.

The submission identifies fourteen interconnected issues, structured around a single central ask: treat the CITP as the standalone statutory document the NLTA requires it to be, establish the annual review process that the law mandates, and use that process to incorporate the measurement framework and investment reorientation that would make the IDP's stated spatial vision measurable and accountable. Everything else in this submission follows from that.

---

2. The Missing Framework: Triple Access Planning

The most significant opportunity for strengthening the Stellenbosch CITP is one of framing: the plan currently measures transport, not access. This distinction matters more than it might appear — and the methodology to address it has only recently become available in practitioner form.

Triple Access Planning (TAP), developed by Professor Glenn Lyons and Cody Davidson and formalised in the EU-funded Handbook for Practitioners (2024), establishes that access to opportunity — the fundamental purpose of any transport system — is delivered through three interdependent means, not one:

- Physical mobility: the ability to move from place to place, provided by the transport system;
- Spatial proximity: the ability to access what you need without travelling far, provided by land use planning and mixed-use development; and
- Digital connectivity: the ability to access services, employment, and social interaction without physical travel, provided by telecommunications infrastructure and policy.

A CITP that measures only physical mobility — vehicle throughput, travel time, signal synchronisation performance — is measuring one dimension of a three-dimensional system. Critically, TAP also requires a shift in planning paradigm: from 'predict and provide' (forecast traffic demand and build infrastructure to meet it) to 'decide and provide' (identify a preferred accessibility future and build the systems required to achieve it). The predict-and-provide paradigm is precisely what produces the road investment bias — it takes existing vehicle demand as a given and optimises for it, rather than asking what access outcomes the municipality wants to achieve and working backwards to the modal mix that would achieve them most equitably and sustainably.

TAP on the planning paradigm shift: 'The alternative is a paradigm of decide and provide. This is vision-led rather than forecast-led and identifies a preferred future for accessibility, and alternative pathways.' The Stellenbosch CITP has a vision — an integrated, effective, and sustainable transport system. What it lacks is a measurement framework that would allow it to track whether that vision is being achieved across all three pillars of access. — Triple Access Planning for Uncertain Futures: A Handbook for Practitioners, EU Horizon 2020 / JPI Urban Europe, 2024

ITF/OECD on vision-led planning: 'Authorities should complement traditional trend-based forecasting with forward-looking, goal-driven analysis' — and should codify vision-led strategies in legislation and planning mandates to ensure long-term continuity. This is the

> *institutional expression of TAP's decide-and-provide paradigm: identify the preferred accessibility future, then build the systems required to achieve it. The TAP Handbook (EU Horizon 2020, 2024) and this ITF/OECD guide reach the same conclusion from different institutional traditions — making the case for the paradigm shift substantially harder to dismiss as a regional or academic preference. — ITF/OECD, Vision-Led Transport Planning: A Guide for Policymakers, 2025*

The Triple Access Planning framework and its formalisation as a practitioner tool postdate the approval of the Stellenbosch CITP. The EU Horizon 2020 TAP Handbook for Practitioners was published in March 2024, and the ITF/OECD's Vision-Led Transport Planning guide — which independently corroborates TAP's central paradigm shift argument from a separate institutional tradition — was published in 2025. Neither was available to inform the CITP's conceptual framework at the time of its preparation. This is precisely the kind of methodological development that a properly constituted standalone annual CITP review is designed to incorporate: the Handbook is explicit that TAP is intended as a living framework for practitioners to adopt iteratively, not a one-time redesign requirement. The annual review process provides the appropriate and proportionate mechanism for introducing TAP's access-to-opportunity framing into the CITP's measurement architecture without requiring a full five-year revision cycle.

Why This Matters for Stellenbosch Specifically

Stellenbosch's context makes TAP particularly relevant. The municipality is aiming to developing the Adam Tas Corridor as its primary spatial investment — a mixed-use, transit-oriented development zone that is explicitly premised on reducing car dependence through spatial proximity (bringing housing, employment, and services closer together) and public transport connectivity. The CITP does not yet include KPIs measuring whether the Corridor is achieving proximity outcomes: whether the mix of uses is reducing the need to travel, whether walkable distances between housing and employment are being created, or whether digital connectivity is being planned alongside physical connectivity. The Corridor's transport deliverable — a Link Road rights approval, targeted for Year 5 — is a physical mobility measure. The TAP framework, now available as a practitioner tool, provides the methodology to add the spatial proximity and digital connectivity dimensions to the measurement framework in the next revision cycle.

The Growth Lab's finding that South Africa's unusually low rate of informal self-employment is partly explained by low foot traffic near people's homes is a spatial proximity argument in TAP terms: compact, mixed-use, walkable environments generate economic activity that dispersed, car-dependent ones do not. Every planning decision that increases spatial separation — peripheral development, single-use zoning, road-widening that prioritises vehicle throughput over pedestrian environment quality — is a decision against the spatial proximity pillar of access, with direct economic inclusion consequences.

The 15-Minute City: Giving the Spatial Proximity Pillar a Measurable Standard

The spatial proximity pillar of TAP is given concrete, measurable form by the '15-minute city' concept, developed by French-Colombian urbanist Professor Carlos Moreno in 2016 and formalised in academic literature in the years that followed. The concept is simple in structure and radical in implication: a well-functioning city should be organised so that every resident can fulfil the six essential social functions of urban life — living, working, accessing commerce, receiving healthcare, obtaining education, and enjoying recreation — within a 15-minute walk or cycle from their home. The four enabling conditions Moreno identifies are density (enough people to sustain local services), proximity (short distances between functions), diversity (mixed-use development rather than single-use zones), and digitalization (digital access extending the reach of services beyond their physical location). Subsequent practice and scholarship have extended Moreno's original framework to recognise effective

access to public transport as a key destination in its own right: a resident who can reach effective public transport — a service of sufficient frequency and reliability to be genuinely useful — within 15 minutes on foot or by cycle has, through that connection, access to a far wider geography of opportunity than the immediate neighbourhood alone provides. In Stellenbosch's context — where Kayamandi and Cloetesville are separated from the town centre by arterial roads and the railway line — this extension is not a refinement of an abstract model but a practical necessity: walkable or cyclable access to effective public transport is what connects peripheral communities to economic opportunity. The proximity indicator recommended in this submission therefore includes effective public transport among the essential destinations that residents should be able to reach within 15 minutes on foot or by cycle.

The concept gained significant policy traction when Paris Mayor Anne Hidalgo adopted it as the central plank of her 2020 re-election campaign under the 'Paris en Commun' programme, and it has since been adopted as a planning framework by cities including Melbourne, Ottawa, Copenhagen, and Portland (as the '20-minute neighbourhood'). The C40 Cities Climate Leadership Group has endorsed it as a key strategy for post-COVID urban recovery. It is not a European invention imposed on other contexts: research presented at the World Urban Forum in 2024 explored its application specifically across African cities, and a study at Stellenbosch University found that in Cape Town, a 10% shift from private car use to walking and cycling — the kind of shift a 15-minute city orientation would support — could cut 190,000 metric tonnes of greenhouse gas emissions annually, with an associated social value of R36 million.

For a town like Stellenbosch, where low-income communities sit physically close to but functionally disconnected from the town centre, the 15-minute city is both more urgent and more achievable than in sprawling metros. The separation of Kayamandi, Cloetesville, and Ida's Valley from employment, services, and commerce is not a product of vast distances — it is a product of infrastructure gaps, arterial barriers, and a transport system that has not been designed around their needs. The critical point for this submission is one that the Growth Lab study makes explicitly and that the IDP's own spatial challenges table touches on without fully confronting: this spatial structure has not been corrected in the more than thirty years since 1994. It has been reinforced by planning decisions that continue to prioritise vehicle movement over walkable access.

In Stellenbosch's case, the spatial separation of Kayamandi, Cloetesville, and Ida's Valley from the town's economic and social fabric has persisted despite more than thirty years of democratic governance. The mechanisms differ from those of larger metros — Stellenbosch does not have large-scale peripheral RDP estates — but the outcome is the same: established low-income communities remain physically close to, but functionally disconnected from, the employment, services, and economic opportunity concentrated in the town centre and university precinct. The IDP's own spatial challenges table acknowledges that new development continues to entrench this pattern rather than reverse it, noting that developments 'reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport.' The gap is not closing. It is being reproduced by planning decisions made annually.

Urban planning regulations and zoning policies continue to prevent dense, affordable housing in well-located areas, further limiting both formal and informal employment. The Growth Lab study identifies this directly: 'urban planning regulations and zoning policies prevent dense, affordable housing in desirable locations and consequently limit both formal and informal employment.' The Stellenbosch University research on Cape Town transport affordability found that lower-income households spend well over 10% of income on commuting — some up to 42% — and that 'the transport system has not adapted to serve other employment centres since apartheid.' These are not historical wounds. They are live, current, measurable conditions that planning decisions made every year — including

development approvals, TIA outcomes, infrastructure budget allocations, and deferred NMT investment — are either closing or widening.

A critical refinement to the conventional narrative is necessary here: peripheral, car-dependent development is not only a low-income housing policy failure. It is also being generated at the opposite end of the market, through private development decisions that planning approvals are actively endorsing. The Stellenbosch municipal area is characterised by a significant and growing proliferation of high-income gated estates on the periphery of settlements — wine estate residential developments along the Helshoogte corridor and R44, security villages on the rural edges of Stellenbosch town, golf estate developments, and lifestyle precincts accessible only by private vehicle. These developments are, by design, car-dependent: gated access, no pedestrian or cycling permeability, no public transport connectivity, located on agricultural or peri-urban land. They generate vehicle trips, consume road capacity, and occupy land that the SDF's own principles identify as requiring containment. The IDP's own spatial challenges table acknowledges this directly: 'Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.'

The submission makes this point because it matters for how the attractiveness gap is understood. Car-dependent sprawl is being produced simultaneously at both ends of the income spectrum — by housing policy failure at the low-income end, and by private development market logic at the high-income end — and planning approvals are permitting both. The CITP's TIA methodology, which assesses vehicle performance rather than sustainable access, is the mechanism through which both types of peripheral development receive planning permission without being required to demonstrate NMT connectivity, public transport access, or proximity to the six essential urban functions. The Wales appraisal criteria and the TAP proximity test we recommend apply equally to a gated wine estate development as to an RDP housing project: both must demonstrate that they contribute to, rather than deepen, the municipality's stated spatial vision of compact, walkable settlements linked by public transport.

The consequences of this pattern are not borne only by those who cannot afford a car. Generations of higher-income residents in Stellenbosch have grown up in an environment where driving is the only realistic option for most daily trips — where the NMT network is discontinuous, public transport is unreliable, and the distances between home, work, school, and services are calibrated for vehicles rather than people. The student population — tens of thousands of young people, many of them car-free by necessity or choice, and in principle the most receptive demographic for walking, cycling and public transport — should represent Stellenbosch's strongest natural constituency for sustainable mobility. Yet the CITP's own evidence shows that high-density student development is being planned for private vehicle users, and the NMT and public transport infrastructure that would serve a car-free student life remains underfunded and discontinuous. Students who experience a car-dependent Stellenbosch normalise that environment; those who experience a genuinely walkable, cyclable town carry that expectation with them. The municipality has a very significant opportunity here that the current investment pattern has not yet fully recognised.

Car captivity at the higher end of the income spectrum carries its own compounding cost: residents whose entire frame of reference for how a town functions is organised around the car will, when asked what they need, ask for better roads and more parking — and when they experience congestion, will understand it as a problem of insufficient road capacity rather than as the inevitable consequence of a car-dependent spatial form. This is not irrationality — it is the logical response to the only environment they have known. Car captivity describes this condition precisely: not the absence of a car, but the absence of alternative modes that are safe, reliable and attractive enough to represent a real choice — a dependency that the built environment has created, and that each new car-dependent development deepens. But it is also precisely the demand signal that feeds the predict-and-provide cycle: car-dependent development produces car-dependent residents, whose

experience of congestion reinforces the demand for road capacity solutions, which induces further vehicle demand, which produces more congestion and more car-dependent development. The Fundamental Law of Road Congestion — that a 1% increase in road capacity generates approximately a 1% increase in vehicle kilometres travelled — is the scientific expression of this loop: the solution that feels intuitive within a car-dependent frame of reference is the one the evidence shows makes the problem worse. Demand-responsive planning cannot break this cycle on its own — because the demand it responds to has itself been shaped by the car-dependent environment it built. The cycle repeats across generations and becomes progressively harder to break. This is the structural argument for vision-led, decide-and-provide planning: the municipality must decide what kind of town Stellenbosch should be — compact, walkable, cyclable, as its own SDF states — and build toward that vision, rather than optimising for the preferences and the congestion responses that the current car-dependent environment has itself produced.

Transport captivity: Are car users captives too?

South African transport planning has long recognised the concept of the 'captive user' — a person who has no realistic alternative to their current mode of travel, not by preference but because their economic circumstances and built environment have removed genuine choice. The research literature identifies two distinct captive conditions at the lower end of the income spectrum.

The captive walker is perhaps the most numerous and most invisible: someone who walks not because walking is their preferred mode, but because no affordable alternative exists. Between 33 and 90% of trips in African cities are made on foot, with residents described in the literature as 'captive NMT users due to their economic circumstances' (Okyere et al., 2021). In low-income areas of South African cities, walking is the main mode for 61% of households (Vanderschuren and Jennings, 2017). Captive walkers navigate arterial roads without adequate crossings, travel long distances on foot because spatial separation places destinations beyond comfortable walking range, and do so in conditions that are frequently unsafe, poorly lit and unprotected from weather. They are captive to a mode that the planning system has consistently underfunded and underdesigned.

The captive public transport user is similarly constrained: someone dependent on minibus taxis or formal public transport services that may be unreliable, unsafe or unaffordable, with no practical alternative. As Lucas (2011) documents, for many low-income urban residents formalised public transport is not even an option given their location and travel patterns, making them captive users of informal paratransit by default.

Car captivity is the mirror condition, produced by the same underlying planning failure but experienced across the middle and higher income spectrum. A car captive is not someone who cannot afford a car — it is someone for whom the spatial form of their environment has removed the alternative modes that are safe, reliable and attractive enough to represent a real choice. Car captivity is produced by low-density development, discontinuous NMT infrastructure, unreliable public transport, and land uses separated by distances calibrated for vehicles rather than people. It affects higher-income residents, students, and middle-income households alike — anyone whose built environment has been designed around the assumption of private vehicle access.

All three conditions are the product of a planning system that has consistently failed to create the spatial proximity, modal diversity and infrastructure quality that genuine transport choice requires. The captive public transport user and the captive walker bear the most severe consequences — unreliable services, unsafe walking conditions, and

transport costs that consume a disproportionate share of already constrained incomes. But the car captive is also denied something they should reasonably expect: the ability to choose how they move through their own town. Residents in compact, walkable cities do not give up their cars because they are forced to — they do so because their city has given them something better. Stellenbosch's higher-income residents and its students deserve that choice too. The planning decisions that have consistently denied it are not inevitable — they are the cumulative product of a predict-and-provide paradigm that has taken car dependency as a given rather than asking what genuine transport choice for all residents should look like, and then building toward it.

In Stellenbosch's specific context, Kayamandi, Cloetesville, and Ida's Valley sit on the western periphery of the town, separated from the university, the CBD, and employment opportunities by the R44 and the railway line. The Adam Tas Corridor's stated purpose is precisely to begin reversing this separation — integrating these communities into the spatial and economic fabric of Stellenbosch town. But as this submission has documented, the ATC's transport deliverable is a Link Road rights approval targeted for Year 5; the pedestrian bridge connecting Kayamandi to the town has been deferred for four years; and the CITP has no proximity indicator that would allow the municipality to determine whether the ATC is actually reducing the spatial exclusion it was designed to address. More than thirty years of planning practice since 1994 have not closed the gap. The 4th IDP Review, and the CITP it contains, has an opportunity to be explicit about this — and to adopt measurement tools that make progress visible rather than assumed.

The 15-minute city framework, in this context, is not a quality-of-life aspiration for affluent residents. It is a diagnostic and accountability tool for measuring whether post-apartheid spatial transformation is actually occurring — or whether, as the evidence overwhelmingly suggests, planning practice continues to reproduce the spatial exclusion it formally commits to reversing. Critics have rightly noted that the model requires adaptation where low-density sprawl and long commutes are already entrenched — but this is precisely the argument against enabling further peripheral, car-dependent development, not an argument against the proximity principle itself.

Moreno's '15-minute city' is TAP's spatial proximity pillar made spatially concrete and politically legible. It answers the question 'what does a good spatial proximity outcome look like?' with a measurable standard: can every resident access the six essential urban functions within 15 minutes on foot or by bicycle? The Stellenbosch IDP's own 20-year spatial vision — 'compact settlements, cyclable and walkable, with settlements linked using public transport' — is a description of the 15-minute city. What the IDP lacks is a KPI that would allow it to track whether it is moving toward or away from that vision in practice.

The Spatial Planning Gap: When the SDF Says One Thing and the CITP Measures Another

The most revealing finding from a close reading of the IDP's spatial chapter is not a gap in stated policy — it is a gap between what the spatial policy says and what the CITP measures. The SDF's own spatial challenges table contains this explicit self-diagnosis: ..'*Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low-occupancy private vehicles at the cost of local mobility. Sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions.*' .This is predict-and-provide named and condemned — in the IDP's own spatial chapter. Yet the CITP, which sits in the same document, continues to deliver the very investments the SDF identifies as the problem.

Five specific findings from the SDF and spatial chapter reinforce and extend the transport arguments in this submission:

1. The SDF's 20-year vision is the 15-minute city — without the KPI to track it

The SDF's 20-year vision statement describes exactly the 15-minute city model: 'In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable.' This is Moreno's proximity, density, and diversity in direct language. The CITP's current KPI framework contains no indicator that would allow the municipality to measure whether it is moving toward or away from this stated vision. The spatial proximity sub-indicator we recommend — percentage of residents within 15-minute walk or cycle of the six essential urban functions — would fill this gap directly and would connect the IDP's spatial vision to a transport measurement system that is currently blind to it.

2. New development is explicitly identified as entrenching car dependency — and is accepted

The SDF's spatial challenges table contains two admissions that belong in the CITP's investment bias analysis. First: 'Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, among other inefficiencies.' Second: 'The new high-density development mostly focuses on the student market and target groups using private vehicles.' The MSDF annual review asks whether development approvals are aligned with the MSDF's objectives — but it does not ask specifically whether approved developments reduce car dependence, improve walkability, or increase proximity to the six essential functions. This monitoring gap means that development can be formally 'aligned' with the MSDF while systematically deepening the car-dependent spatial pattern the SDF identifies as a challenge. The revised TIA terms of reference we recommend — requiring sustainable access criteria alongside vehicle performance measures — would close this gap at the development approval stage.

3. The SDF calls for removing car parking minimums — the CITP does not track it

The SDF's non-spatial policy guidelines explicitly state the need to 'move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use.' This is the parking management KPI argument, already present in this submission's TDM recommendations, now directly supported by the IDP's own stated spatial policy intent. The SDF says to move away from car parking minimums. The CITP has no indicator tracking whether this is happening. The municipality is simultaneously endorsing the policy and failing to measure its implementation.

4. The Koelenhof development trajectory is a live test of the 15-minute city principle

The SDF contains an explicit warning about enabling development in Muldersvlei, Koelenhof and Vlottenburg before the preconditions for transit-oriented development are in place: 'Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.' Yet Koelenhof has now been designated a priority development area, and its LSDF is being developed as 'a private-public-partnership initiative driven by the private landowners.' The SDF's own preconditions for enabling development — public transport integration, housing for a range of income groups, minimising inter-settlement movement — are not tracked by any CITP indicator. The Koelenhof development is therefore proceeding without the transport measurement framework that would allow the municipality to determine whether its own spatial warning is being heeded.

5. The Drakenstein 1600ha greenfield expansion requires a proximity response, not just a vehicle infrastructure study

The IDP acknowledges that Drakenstein Municipality has extended its urban edge adjacent to Klapmuts with 1600ha of greenfield development. The proposed response is an N1 corridor infrastructure study characterised primarily in terms of vehicle movement ('bulk infrastructure services', 'movement routes as drivers of economic development'). There is no parallel analysis of whether this greenfield expansion will be car-dependent, what it means for the corridor's public transport viability, or how it affects the 15-minute city accessibility of the settlements being planned. This is predict-and-provide at regional scale, and Stellenbosch's CITP has no instrument to detect or respond to its implications for the spatial proximity pillar of access.

The Predict-and-Provide Problem in the CITP

The CITP's two most consistently delivered transport commitments — Traffic Signal Synchronisation and Main Road Intersection Improvements — are canonical predict-and-provide investments. They take current and projected vehicle demand as given, and optimise and expand the road system to accommodate it more efficiently. They are not investments in the municipality's stated preferred future of reduced car dependence and a sustainable transport system. They are investments in the continuity of the current system.

The scientific evidence on what these investments achieve is unambiguous and deeply inconvenient for the predict-and-provide model. The Fundamental Law of Road Congestion — first established for US cities by Duranton and Turner (2011) and subsequently confirmed for European cities, Japan, and other contexts — finds that a 1% increase in road capacity generates approximately a 1% increase in vehicle kilometres travelled. Congestion returns to pre-improvement levels, or worsens, because the additional capacity induces new demand: existing residents drive more, transportation-intensive activity increases, and new residents are attracted to car-dependent locations. As Duranton and Turner concluded: "expansions of the bus network are more likely to pass a cost-benefit test than expansions of the highway network."

For Stellenbosch, this finding has a direct implication. Every round of Traffic Signal Synchronisation and intersection improvement — delivered consistently and on budget across four IDP years — is inducing additional vehicle demand that will negate the travel time benefit within years and justify further predict-and-provide investment in the next cycle. The municipality is not solving a congestion problem; it is caught in a cycle of induced demand that deepens path dependency and makes the modal shift it seeks progressively harder to achieve. This is the scientific basis of the decide-and-provide critique: not merely that a different planning philosophy is preferable, but that the dominant one is empirically demonstrated not to achieve its stated objectives.

This is not an argument against road maintenance or intersection safety improvements per se. It is an argument that the CITP's KPI framework rewards predict-and-provide delivery — because vehicle throughput investments are quantifiable, fundable, and technically straightforward — while the decide-and-provide investments in walking, cycling, and public transport that would move the system toward the preferred future are consistently deferred, inadequately measured, and not held to the same delivery standard.

Recommendations on Triple Access Planning

- Adopt Triple Access Planning as the explicit conceptual framework for the CITP's next revision cycle, referencing the EU Handbook (2024) and aligning with the NLTSF 2023–2028's stated goal of providing 'access to opportunities' as the purpose of the transport system.

- Introduce an access-to-opportunity KPI covering all three TAP pillars: a physical mobility sub-indicator (current Core KPI 2, walking access time); a spatial proximity sub-indicator (percentage of residents within 15-minute walk or cycle of the six essential urban functions: employment, commerce, healthcare, education, recreation, and effective public transport services — measurable using existing GIS data and directly tracking the SDF's own 20-year spatial vision); and a digital connectivity sub-indicator (percentage of households with adequate broadband access, referenced from existing DITT data).
- Explicitly reframe the Adam Tas Corridor deliverables to include spatial proximity and digital connectivity outcome indicators alongside the transport Link Road milestone. The Corridor's value to the municipality lies in reducing the need to travel, not only in providing an additional road connection.
- Apply the 'decide and provide' test to proposed capital expenditure: for each major transport investment, the CITP should require a statement of how the investment advances the municipality's preferred accessibility future, not merely how it accommodates forecast demand.

---

3. NLTSF 2023–2028: The Stellenbosch CITP's Binding Policy Obligation

The National Land Transport Strategic Framework 2023–2028 (NLTSF), published in the Government Gazette (No. 48873, 30 June 2023), is a legal requirement under Section 34 of the National Land Transport Act 5 of 2009. It is the binding national framework within which Stellenbosch's CITP must operate. Municipalities are required to align their Integrated Transport Plans with the NLTSF's Key Performance Areas.

There is an important temporal context to the NLTSF compliance gaps identified in this section: the NLTSF 2023–2028 was published in the Government Gazette on 30 June 2023 — more than three months after the Stellenbosch CITP was approved in March 2023. The CITP therefore could not, at the time of its preparation, have been aligned with a framework that did not yet exist.

This is not a criticism of the CITP's preparation — it is a structural argument for the annual review process. Section 36(1) of the NLTA and the Minimum Requirements prescribed by GN 954 of 2014 exist precisely to ensure that CITPs are updated to reflect new binding national frameworks as they are adopted. The first standalone annual CITP review following the NLTSF's publication in June 2023 should have incorporated a formal alignment assessment. The fact that it did not — because no standalone annual review has been conducted — is the compliance gap this submission identifies. The remedy is not retrospective criticism of the 2023 CITP; it is the establishment of the review process that would have caught this automatically, and the incorporation of the NLTSF compliance assessment as the first-year priority of that process.

The NLTSF 2023–2028 contains several provisions that are directly relevant to the issues raised in this submission — and against which the Stellenbosch CITP, as documented across the three IDP review cycles, is arguably non-compliant.

What the NLTSF Requires

On TIA reform and the NMT deficit

The NLTSF is explicit about the systemic failure of Traffic Impact Assessment methodology. It states directly that "historically, traffic impact assessment studies provided greater emphasis on single occupancy vehicles and less focus on public transport, and the

developer was obligated to provide part of the road infrastructure, while the Municipality is supposed to address mass transit operations and infrastructure. This has resulted in the lack of provision for walking and cycling, dangerous roads and poorly planned communities, with highly restricted access to amenities." The NLTSF identifies the reform of TIA methodology — toward sustainable access assessment — as a national priority. Stellenbosch's current TIA terms of reference, which have not been updated to reflect this requirement, are therefore out of alignment with a binding national framework.

On spending priorities

The NLTSF explicitly identifies that "exorbitant amounts are spent on private cars, relative to the fraction of the population that the car services, which is unjustified." This is a direct statement of national policy on transport investment priority. Stellenbosch's pattern of consistently delivering vehicle throughput investments while deferring active and public transport investments is not consistent with this policy position.

On rail over road

The NLTSF and its parent document, the National Spatial Development Framework (2023), both explicitly state the priority of rail over road infrastructure investment. The NSDF "prioritise[s] rail over road infrastructure" as a national spatial development lever. The Stellenbosch CITP's treatment of the Baden Powell Drive – Adam Tas – R304 rail corridor — where the possibility of a light rail or tram service has been discussed across all three IDP cycles without any movement toward commitment or funding — is not consistent with this national priority.

On access to opportunity as the CITP's purpose

The NLTSF defines its overarching vision as an integrated and efficient transport system "that provides access to opportunities" — language that aligns directly with the TAP framework. It requires transport planning to achieve "social, health, economic and environmental outcomes," not simply to manage vehicle movement. This is the decide-and-provide framing in legislative form.

On school safety as a Key Performance Area

The NLTSF identifies investment in safe NMT facilities for learners at schools and surrounding areas as a statutory Key Performance Area. The absence of a school zone safety indicator in the Stellenbosch CITP is therefore not only a planning gap — it is non-compliance with a defined national KPA.

What the CITP Currently Does

The IDP's 4th Review references the NLTSF in the CITP's policy alignment section. However, a systematic review of the CITP's KPI framework against the NLTSF's Key Performance Areas reveals the following gaps:

NLTSF Requirement	Status in Stellenbosch CITP	Consequence
Reform of TIA methodology to include sustainable access criteria	Not implemented. TIA terms of reference unchanged.	NMT and PT deficit reproduced in every new development approval. Direct NLTSF non-compliance.
Spending prioritisation toward public transport and	Inverted in practice: vehicle throughput investments delivered; NMT and PT	Expenditure pattern contrary to stated national policy.

NMT over private vehicles	investments consistently deferred.	
Rail prioritised over road infrastructure	Baden Powell–ATC rail corridor: discussed across all three IDP cycles; no commitment, no funding, no KPI.	NSDF spatial lever not operationalised.
School zone NMT safety as a Key Performance Area	No school zone safety KPI exists in the CITP.	Statutory KPA not met.
Access to opportunity as transport system purpose	CITP measures mobility (throughput, travel time); does not measure spatial proximity or digital connectivity.	TAP and NLTSF access-to-opportunity framing absent from KPI architecture.
Universal accessibility	Referenced in CITP policy section; no dedicated KPI tracking universal design compliance of NMT and PT infrastructure.	NLTSF KPA on universal accessibility not tracked.
Annual CITP review (NLTA s.36(1) / GN 954 of 2014)	CITP treated as IDP sector plan subset. No standalone annual review, independent public participation, or MEC submission under s.36(1) and s.36(6).	Non-compliance with NLTA s.36(1) and GN 954 of 2014. CITP accumulates misalignment annually. Legal exposure on operating licence function under s.36(6). Provincial investment opportunities missed.

Recommendation

- The final 4th Review should include a formal NLTSF compliance assessment as an annex, mapping the CITP's KPIs against each of the NLTSF's thirteen functional areas and their Key Performance Areas. Where gaps exist, the assessment should specify the amendments required and the timeline for addressing them. This is not optional: CITPs are legally required to align with the NLTSF, and the Provincial Department of Mobility, which has approved the 2023–2028 CITP, should be consulted on the compliance gaps identified in this submission.

---

4. The Attractiveness Gap and the Case Against Road-First Investment

The foundational challenge facing Stellenbosch's transport system — one the CITP's current investment pattern is making worse — is what the OECD describes, in its January 2025 report on the Catalonian mobility transition, as the 'attractiveness gap.' Decades of investment in road infrastructure for private vehicles have made driving more attractive than sustainable alternatives, and that attractiveness gap actively discourages the modal shift that climate and equity commitments and improved urban functioning require.

The OECD is direct: a policy package is required that simultaneously makes sustainable modes more attractive and driving less so. Road building, in this framework, is not a solution to transport problems — it is the primary mechanism through which the attractiveness gap is reproduced and deepened. This is precisely what the predict-and-provide paradigm that TAP

critiques produces: each round of vehicle demand forecasting and road investment deepens the path dependency that makes the modal shift harder to achieve.

> *OECD on Catalonia: 'By reducing the currently over-dimensioned road capacity for cars, the redistribution of road space to sustainable modes acts on both sides of the attractiveness gap. It liberates space for sustainable modes and increases their attractiveness, while also making driving less attractive. Evidence shows that, when implemented at scale, road space redistribution has led to significant reductions in traffic volume.' — OECD, Transforming Catalonia's Mobility System for Net Zero, January 2025*

The Wales Precedent: Raising the Threshold for Road Investment

The Welsh Government's response to six decades of road-first investment is the most significant transport policy reorientation in the United Kingdom in a generation. In June 2021, Wales became the first UK national government to call a moratorium on new road building, establishing an independent Roads Review Panel to assess whether proposed schemes met a new set of policy tests. The panel reviewed 48 schemes and recommended that 31 — nearly two-thirds — be cancelled or significantly amended.

The four tests any new road scheme must now satisfy in Wales are directly applicable as a model for Stellenbosch's capital appraisal process: does the scheme reduce carbon emissions by supporting a shift to sustainable travel? Does it improve safety through targeted, small-scale change? Does it adapt to climate change? Does it provide connections to economic activity while maximising sustainable transport use? A road investment that cannot satisfy all four criteria is, under Welsh policy, the wrong investment. The Deputy Minister for Climate Change put the governing logic plainly: "six decades of road building hasn't worked."

The savings from cancelled road schemes are being reinvested in Wales in active travel infrastructure, public transport, and integrated metro rail–bus–active travel networks. The active travel budget reached approximately £60 million annually as part of this reorientation — a direct expression of the decide-and-provide paradigm in practice.

The Economic Cost: Growth Lab Evidence

The Harvard Growth Lab's 'Growth Through Inclusion in South Africa' (Hausmann et al., November 2023) quantifies what is at stake when transport investment reinforces spatial exclusion rather than addressing it. The study identifies spatial exclusion as one of the two binding constraints on South African growth and inclusion. Its transport findings are stark: direct transport costs represent more than 35% of labour income for workers in the lowest income quintile, and total costs (including the opportunity cost of commuting time) reach 57% of net wages. The Growth Lab's spatial labour market modelling demonstrates that higher transport costs are directly associated with lower formal and informal employment.

The study also finds that South Africa's unusually low rate of informal self-employment — around 4% versus an expected 20% for a country at its income level — is partly explained by low foot traffic near people's homes in low-density, car-dependent residential areas. This is the spatial proximity pillar of TAP in economic terms: compact, walkable, mixed-use environments generate informal economic activity; dispersed, car-dependent ones do not. Every road investment that enables further sprawl and undermines walkability is therefore a direct contribution to the labour market exclusion the Growth Lab identifies as South Africa's defining development failure.

> *Growth Lab: 'South Africa's unusual urban structure with very distant and low-density residential areas leads to very high transport costs, lowering formal employment, but also very low foot traffic near people's homes, lowering the viability of informal work.' For*

> *Stellenbosch, a municipality with significant low-income, pedestrian-dependent communities, NMT and spatial proximity investment is not a quality-of-life preference — it is an economic inclusion imperative. — Hausmann et al., Growth Through Inclusion in South Africa, Harvard Growth Lab, 2023*

The Investment Bias: Evidence from the IDP Documents

The claim that Stellenbosch's transport investment is biased toward private vehicle infrastructure is documented in the IDP's own tables. The contrast is unambiguous. It is also a pattern that the province's own transport frameworks explicitly acknowledge and seek to reverse. The Western Cape Infrastructure Framework 2050 (WCIF 2050), endorsed by Cabinet in October 2024, commits the province to designing and delivering 'resilient, transformative infrastructure that offsets climate change impacts' and identifies infrastructure mobility and resource resilience as a transversal theme of the Provincial Strategic Plan. The Draft Western Cape Provincial Land Transport Framework 2024/25–2028/29 — published for public comment in April 2025 and still awaiting finalisation — signals unambiguously that the province's transport direction is away from road dependence: it states directly that 'a heavy reliance on road transport causes congestion, safety risks and high emissions,' and its primary objective is to restore rail as the backbone of public and logistics transport. Although the PLTF is not yet adopted, its direction is clear and its alignment with the already-adopted WCIF 2050 and NLTSF is explicit. Stellenbosch's 4th Review — produced after both documents were published — should already be positioning the CITP to meet these emerging requirements rather than waiting for formal adoption.

Deliverable	Primary Beneficiary Mode	Delivery Record	Note
Traffic Signal Synchronisation programme	Private vehicles	Achieved every year 2022–2025	Optimises vehicle throughput
Main Road Intersection Improvements (R44, R45)	Private vehicles	Achieved every year 2022–2025	99–100% capital spend
Lanquedoc Access Road and Bridge	Private vehicles/mixed	Achieved Year 3 (2024/25)	One-year delay only
Kayamandi Pedestrian Bridge	Pedestrians	Year 1 target → Year 5 (2026/27)	Funding decision still pending Year 4
Tour Bus Facilities	PT/tourism	Year 1 target → Year 5 (2026/27)	Deferred twice
Park and Ride / Feeder System	PT users	Year 1 target → Year 5 (2026/27)	Fourth consecutive deferral
R44 Public Transport Lanes	PT users	Year 1 target → Year 5 (2026/27)	Deferred across full IDP cycle
ATC Corridor Transport / Link Road	Mixed/PT-oriented	Year 1 target → Year 5 (2026/27)	Rights approval only, not construction

The Kayamandi Pedestrian Bridge epitomises the inversion. Kayamandi is the municipality's largest township — overwhelmingly pedestrian-dependent, consistently identifying transport as its top public participation priority. The bridge was a Year 1 CITP commitment in 2022. Four years later, the 4th Review records that the tender has closed but that 'a decision

needs to be made on funding.' In the same period, Main Road intersection improvements for private vehicles have been delivered every year without exception. This is the attractiveness gap in operation: not as an abstract concept but as a measurable budget and delivery pattern, documented in the municipality's own planning records.

Recommendations on Investment Bias

- Adopt Wales-style appraisal criteria for new road capital expenditure proposals: any new road scheme must demonstrate that it reduces carbon emissions by supporting modal shift, improves safety for vulnerable road users, adapts to climate change, and maximises sustainable transport use alongside any vehicle connectivity it provides. Schemes that cannot satisfy these criteria should not proceed.
- Establish a mode-equity reporting requirement in the annual IDP review: disaggregate capital expenditure by primary beneficiary mode (private vehicles, public transport, NMT) and report the ratio publicly. This makes the investment bias visible and creates the basis for rebalancing it in alignment with the adopted WCIF 2050's resilience objectives and in anticipation of the Draft PLTF's stated priority of reducing road dependence.
- For the Baden Powell–Adam Tas–R304 rail corridor: move from discussion to commitment. After three IDP cycles, the CITP should contain a specific feasibility programme for light rail or enhanced bus service on this corridor, with a timeline, a lead agency, and a budget line. The NLTSF (binding) and NSDF (binding) both prioritise rail over road. The Draft PLTF (not yet adopted, but signalling clear provincial direction) makes restoring rail as the backbone of public transport its primary objective. Committing to a feasibility programme now positions the municipality to access provincial co-investment as the PLTF is finalised — a strategic opportunity that will be harder to claim once the provincial funding pipeline is established without Stellenbosch's participation.

---

5. The Spatial Planning Gap: When the SDF Says One Thing and the CITP Measures Another

The gap between the SDF's spatial vision and the CITP's measurement framework is a structural challenge that is not unique to Stellenbosch — it reflects the way South African planning legislation separates spatial and transport planning into different documents, different teams, and different performance systems. SDFs and CITPs are prepared under different statutory frameworks and have historically been measured against different outcomes. What the Triple Access Planning framework — formalised as a practitioner tool only in 2024 — now provides is a methodology for bridging exactly this gap: connecting land use proximity outcomes directly to transport measurement. This section documents the specific points where the SDF's spatial policies are not yet tracked by any CITP indicator, and recommends that the annual review process be used to introduce that connection. The SDF has articulated the spatial vision; the opportunity now is to give the CITP the instruments to track whether it is being achieved.

5.1 The SDF's Own Diagnosis of Predict-and-Provide

The SDF's spatial challenges table contains a passage that is, in effect, a self-contained critique of the municipality's dominant transport planning paradigm: 'Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low-

occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns.' The IDP goes on to note that 'sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions.'

This is predict-and-provide, named and condemned in the municipality's own strategic document. It is the Fundamental Law of Road Congestion — the empirical finding that road capacity expansion induces demand rather than resolving congestion — expressed as a local planning observation. And yet the CITP, which sits in the same document and is reviewed in the same annual cycle, continues to deliver the Traffic Signal Synchronisation programme and Main Road Intersection Improvements as its most consistent transport investments: canonical predict-and-provide responses to forecast vehicle demand. The SDF's diagnosis is not reflected in the CITP's investment pattern. This is the same structural disconnect that TAP identifies between the 'decide and provide' vision and the 'predict and provide' delivery reality — documented here in the IDP's own internal contradiction.

> *The IDP says: 'sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions.' The CITP then reports, in the same document, that Traffic Signal Synchronisation — a traditional engineering solution — has been achieved at 90%+ capital expenditure every year, while every active and public transport commitment has been deferred to Year 5. The IDP is critiquing its own practice without the measurement framework to change it.*

5.2 The SDF's 20-Year Vision Is the 15-Minute City — With No Instrument to Track It

The SDF's 20-year spatial vision statement is, in substance, a definition of the 15-minute city: 'In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape.' This is spatial proximity — the second pillar of Triple Access Planning — stated as the municipality's long-term spatial aspiration. It is an aspiration that can only be achieved if daily destinations (employment, education, health, retail, social facilities) are within walking or cycling distance of where people live.

The connection between this spatial vision and the CITP's measurement framework is not yet made — and the reason is partly temporal. The 15-minute city as a formalised, measurable planning standard gained significant policy traction from 2020 onwards, and the TAP framework that provides the practitioner methodology for operationalising it as a transport KPI was published in 2024. Neither was available in the form required to inform the CITP's KPI architecture at the time of its preparation. The annual review process is now the appropriate mechanism to introduce this connection: the TAP spatial proximity indicator — the percentage of residents within a 15-minute walk or cycle of employment, education, health, and retail services — would directly measure the SDF's stated 20-year vision and make visible whether approved developments are moving the municipality toward or away from it.

The SDF's own development monitoring questions ask: 'Are development permissions aligned with the objectives, principles, and policies set out in the MSDF?' This is the right question. The TAP framework now provides the transport-access methodology to answer it fully: do approved developments reduce car dependence, improve walkability, or increase proximity to services? Adding this dimension to the MSDF annual review would connect spatial alignment monitoring directly to the 15-minute settlement form the SDF's vision describes.

5.3 Parking Minimum Standards: Policy Commitment Without Measurement

The SDF's policy framework includes an explicit commitment to 'move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use.' This is one of the most direct statements in the entire IDP of the structural reform required to close the attractiveness gap: minimum parking requirements are car-centric infrastructure mandates baked into the development approval system, and they compound the car dependency of every new development that meets them.

The gap between this SDF commitment and the CITP's measurement framework reflects the same structural separation between spatial and transport planning that this section has identified throughout: the SDF adopts a parking policy and the CITP, prepared under a different statutory framework, does not automatically inherit a monitoring obligation for it. The annual review process is the mechanism to close this gap: introducing a parking management KPI — tracking the number of development approvals requiring minimum parking provision, and the percentage granted reductions in key activity nodes — would directly operationalise a spatial policy the municipality has already adopted, without requiring any new data collection infrastructure.

5.4 New Development Is Actively Entrenching Car Dependency

The SDF's spatial challenges section makes a finding that should be read as a planning emergency: 'Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, among other inefficiencies. The new high-density development mostly focuses on the student market and target groups using private vehicles.'

This is the spatial proximity failure described in the Growth Lab's analysis: new development is not producing the compact, walkable, mixed-income, mixed-use settlement form the SDF's 20-year vision requires. It is producing peripheral, car-dependent development that deepens the spatial exclusion the SDF is designed to address, and student-market high-density development that is calibrated for private vehicle users rather than for the pedestrian and cycling access that the SDF's vision prioritises. The TAP framework's central insight is that access is determined by the interaction of mobility, proximity, and connectivity — and that building more road capacity for the mobility of car users while approving car-dependent development that reduces proximity for non-car users is a compounding failure on both dimensions simultaneously.

The CITP does not currently include an indicator that detects this pattern. There is no development-level transport access assessment, no modal access audit of approved developments, and no mechanism by which a pattern of car-dependent approvals would become visible in the CITP's performance reporting. As noted in Section 3, the NLTSF — which explicitly requires TIA methodology to assess sustainable access alongside vehicle performance — was published three months after the CITP was approved, making this a post-approval compliance requirement rather than an original omission. The TIA terms of reference reform recommended in Section 7 is the appropriate response, and the annual review process is the mechanism to introduce it.

5.5 The Koelenhof Trajectory: A Live Test of Whether Spatial Policy Is Operationally Real

The SDF contains an explicit warning about premature development in the Koelenhof/Muldersvlei area: 'Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.' The preconditions the SDF sets for enabling significant development in these areas are precisely the TAP preconditions: establishing regular public

transport services, ensuring mixed-income settlement form, and minimising the need for inter-settlement movement.

Koelenhof is now a named priority development area in the 4th Review, with an LSDF being prepared as ‘a private-public-partnership initiative driven by the private landowners.’ The SDF’s own warning — that premature development in this area will be car-focused and higher-income — is being tested in real time, driven by exactly the private landowner momentum the SDF cautioned against. The question the CITP should be tracking, and currently is not: does the Koelenhof LSDF satisfy the public transport integration and mixed-income preconditions the SDF required before significant development was enabled? If the LSDF is approved without those preconditions being met, the car-centric pattern will be spatially locked in.

5.6 The Drakenstein 1600ha Greenfield Expansion: A Regional Car-Dependency Risk Without a Transport-Access Response

The IDP notes that Drakenstein Municipality has extended its urban edge adjacent to Klapmuts with 1600ha of greenfield development. The IDP acknowledges this creates significant cross-boundary infrastructure challenges. The proposed response — a regional infrastructure study focused on the N1 corridor, due December 2026 — is framed throughout in terms of vehicle infrastructure: bulk services, movement routes as economic drivers, vehicular accessibility. There is no parallel analysis of what 1600ha of new greenfield development adjacent to Klapmuts means for the public transport viability of the Baden Powell–ATC–R304 corridor, for the spatial proximity of the settlements that are supposed to grow along it, or for the walkability and cycling accessibility that the SDF’s vision requires.

This is predict-and-provide at regional scale. The infrastructure study will forecast vehicle demand from 1600ha of new development and recommend road capacity to accommodate it. Unless the study is explicitly scoped to assess public transport viability and walkable settlement form alongside vehicle infrastructure, it will produce a road investment programme that deepens the very car dependency the SDF warns against — and will do so across municipal boundaries, making it structurally harder to reverse. Stellenbosch’s CITP has no instrument to detect this risk, no indicator tracking the transport-access implications of cross-boundary development, and no formal mechanism to require that the N1 corridor study addresses public transport and NMT alongside vehicle infrastructure.

Recommendations on the Spatial Planning Gap

- Introduce a TAP spatial proximity KPI into the CITP: the percentage of residents within a 15-minute walk or cycle of employment, education, health, and retail services. This directly measures the SDF’s stated 20-year vision and makes visible whether approved developments are moving the municipality toward or away from it. It is measurable using existing GIS data and land use mapping.
- Add a transport-access dimension to the MSDF annual review’s development alignment assessment. The existing monitoring question — ‘are development permissions aligned with the MSDF?’ — should include specific transport-access sub-questions: does the approved development reduce car dependence? Does it improve walkability and cycling access? Is it consistent with the settlement form the SDF’s 20-year vision requires? These questions require no new data collection — they require the existing development monitoring process to ask them.
- Introduce a parking supply monitoring indicator: total new parking bays approved in key activity nodes per annum, and the percentage of approvals in those nodes granted reductions or exemptions from minimum parking standards. This directly operationalises the SDF’s stated commitment to move away from car parking minimum standards, and provides the baseline for the parking management KPI recommended in Section 6.5.

- Require that the Koelenhof LSDF demonstrate satisfaction of the SDF's stated preconditions before Council approves it: a confirmed public transport service plan for the area, a mixed-income housing programme, and a walkability and cycling access assessment. These are the municipality's own preconditions from its own spatial framework — the LSDF process is the mechanism to verify they are met.
- Require that Stellenbosch's participation in the N1 corridor infrastructure study explicitly includes a brief covering public transport viability, walkable settlement form, and NMT access alongside vehicle infrastructure. Without this, the study will default to predict-and-provide vehicle infrastructure planning, locking in car dependency across the Klapmuts–Drakenstein corridor for a generation. The municipality's own SDF provides the policy basis for insisting on this scope.

---

6. Specific CITP KPI Deficiencies

The following issues address specific gaps in the CITP's measurement framework. They are presented in condensed form; the full analytical basis for each is available from the submitting organisations on request.

5.1 NMT Quality Standards Absent

The CITP's Core KPI 3 counts kilometres of dedicated NMT routes without specifying a minimum design quality standard. A painted strip on a road shoulder counts identically to a continuous, safely separated, universally accessible route. Without a quality threshold, the headline delivery figure is meaningless as an access or outcome measure, and directly inconsistent with the NLTSF's requirement for universally accessible NMT infrastructure.

The compliance dimension: the WCIF 2050 — adopted by Cabinet in October 2024 and therefore directly applicable to this IDP Review — requires infrastructure to be designed and delivered to be 'resilient' and to provide 'safe and efficient connectivity to opportunities, services, and facilities.' NMT infrastructure without a defined quality standard cannot be demonstrated to meet this requirement. Establishing a quality standard is therefore not optional under the WCIF 2050 — it is a condition for the CITP to claim alignment with the provincial infrastructure framework it is supposed to operationalise at municipal level.

The opportunity dimension: the Western Cape Department of Mobility has launched an NMT Demonstration Town Project in Hermanus — explicitly described as 'a blueprint for future mobility in the Western Cape' intended to 'guide similar developments across other municipalities.' The Provincial Sustainable Transport Programme previously identified Stellenbosch as a priority municipality for sustainable transport development. A municipality without a defined NMT quality standard, without a current NMT network audit, and with a CITP that cannot demonstrate how its NMT investment is building toward a safe, connected network is not positioned to attract or justify this kind of provincial investment. Municipalities that do have these foundations in place will have the stronger case when provincial NMT investment is allocated. The reforms recommended below are therefore simultaneously a compliance requirement and a prerequisite for accessing the provincial programme pipeline.

- Amend Core KPI 3 to require compliance with a minimum design quality standard referenced to the NMT Master Plan. Non-compliant infrastructure to be recorded separately and excluded from the core count.
- Add a network condition sub-indicator to detect deterioration of the existing NMT network. Without this, capital delivery is not contextualised against existing network quality.

- Add a universal design compliance sub-indicator: what percentage of new NMT infrastructure meets universal accessibility requirements? This is a specific NLTSF KPA and is required for WCIF 2050 alignment.
- Engage proactively with the Western Cape Department of Mobility's NMT Demonstration Town programme to assess Stellenbosch's candidacy for a similar initiative. The prerequisites — a defined quality standard, an NMT network plan, and CITP alignment — are the same reforms this submission recommends, creating a direct line between adopting these recommendations and accessing provincial investment.

5.2 Deferred Deliverables Without Accountability

Every major NMT and PT deliverable from the original IDP's Year 1 programme has been deferred to Year 5. The explanations are individually plausible; the pattern is structurally revealing. There is no mechanism to make the human cost of deferrals visible: four years of pedestrians crossing at Kayamandi without the bridge the municipality committed to in 2022.

- Require formal root cause analysis and a fully funded delivery plan for any deliverable deferred two or more consecutive years, reported to Council.
- Introduce a deferred deliverables register in the annual IDP review, reporting cumulative impact on affected communities.
- Commit to a specific, funded construction start date for the Kayamandi Pedestrian Bridge within the 4th Review cycle.

5.3 Walking Access Not Disaggregated by Need

The CITP's Core KPI 2 (walking access time ≤15 minutes) tracks a city-wide average that masks conditions in informal settlements, where routes are longest, least safe, and most interrupted. The Growth Lab evidence on transport cost as a labour market barrier underscores why this disaggregation matters: the gap is largest for the communities most dependent on walkable access.

- Add a disaggregated sub-indicator for informal settlement residents, tracked separately from the city-wide average.
- Add a pedestrian route quality proviso: walking time to PT counts only where the route meets minimum quality standards (continuous footway, lighting, designated crossings on arterials).
- Link Core KPI 2 explicitly to PT service reliability: walking catchment expansion is a function of service quality, not only infrastructure provision.

5.4 Safety Framework Does Not Prioritise Vulnerable Road Users

The CITP endorses walking as the priority mode but tracks no pedestrian or cyclist fatality KPI. This structural inconsistency expresses, in the safety measurement framework, the same modal hierarchy inversion visible in the investment pattern. The NLTSF's school zone safety KPA is also unmet.

- Introduce pedestrian and cyclist fatalities per 100,000 population as a co-primary safety KPI with a differentiated reduction target.
- Add a school zone safety KPI (percentage of priority schools with completed audit and at least one implemented intervention). This is a statutory NLTSF KPA.
- Add gender-disaggregated safety perception as a supporting indicator. Women's fear of crime is a documented constraint on active transport use and is currently untraceable in the CITP.

5.5 TDM Reduced to a Single Deferred Study

The original four-strand TDM programme has contracted to a Park and Ride feasibility study in its fourth consecutive year of deferral. The Congestion Charge Strategy was dropped without replacement. Neither side of the attractiveness gap is being addressed: the sustainable alternatives are deferred and the demand management tools have been removed.

- Introduce a parking management KPI: percentage of public parking in key activity nodes subject to demand-responsive pricing. This is the most directly controllable TDM lever available and its absence is a material gap.
- Reinstate workplace travel planning as a tracked output with an interim target for the Municipality's own departments (100% with approved Travel Plans by 2027).
- Publish a TDM Programme for 2025–2027 specifying concrete measures, expected outcomes, and tracked KPIs.

5.6 Sustainability Framework Absent as Accountability

The CITP contains no KPI tracking the municipality's contribution to transport-sector greenhouse gas emissions, despite South Africa's Second NDC (2025) and Climate Change Act (2024) creating binding obligations on planning authorities to track and reduce transport emissions.

- Introduce a transport-sector emissions trajectory KPI: establish a 2025/26 baseline and track annual progress against an NDC-aligned decline pathway.
- Add an explicit NDC emissions linkage to the NMT mode share KPI: walking and cycling modal share growth is a direct NDC compliance contribution, not only a mobility objective.
- Position the sustainability and TAP framework as the governing introduction to the CITP's KPI section, not as a compliance chapter near the end of the document.

5.7 The Western Cape Biodiversity Spatial Plan and the Kunming-Montreal Global Biodiversity Framework

A further provincial framework adopted after the 3rd IDP Review is absent from the 4th Review's transport planning content: the 2023 Western Cape Biodiversity Spatial Plan (WC BSP), formally adopted by the Provincial Minister of Local Government, Environmental Affairs and Development Planning under the Western Cape Biodiversity Act No. 6 of 2021, gazetted on 13 December 2024 (Gazette Extraordinary 9017). To understand why this matters for a transport planning submission, it is necessary to trace the policy cascade from which the WC BSP derives its authority.

Like several other frameworks referenced in this submission, the Western Cape Biodiversity Spatial Plan postdates the approval of the Stellenbosch CITP: it was formally gazetted on 13 December 2024, nearly two years after the CITP's March 2023 approval. Its absence from the CITP's project appraisal criteria is therefore not a gap in the original plan — it is an illustration of exactly the kind of post-approval policy development that an annual CITP review process is designed to incorporate. The BSP's statutory authority under the Western Cape Biodiversity Act means that its incorporation into the CITP's transport project appraisal criteria is now a legal obligation, not merely good practice; the annual review process is the appropriate mechanism to discharge that obligation in a structured and proportionate way.

At the apex of this cascade is the Kunming-Montreal Global Biodiversity Framework (GBF), adopted at the United Nations Convention on Biological Diversity's COP15 in December 2022 and agreed by 196 countries including South Africa. Described at the time as 'a Paris moment for biodiversity,' the GBF sets four global goals for 2050 and 23 action-oriented targets to be achieved by 2030. While the GBF itself is not a treaty requiring separate

ratification, it was adopted as a decision of the Convention on Biological Diversity (CBD), which South Africa ratified in 1995. This matters for the legal cascade: the National Environmental Management: Biodiversity Act No. 10 of 2004 (NEMBA) was enacted specifically to give domestic legal effect to South Africa's CBD commitments. NEMBA's own objectives state explicitly that the Act 'gives effect to ratified international agreements affecting biodiversity to which South Africa is a party' and that the state, through its organs, must manage, conserve and sustain South Africa's biodiversity in fulfilment of the rights in Section 24 of the Constitution. Since the GBF is adopted under the CBD, it flows into NEMBA's statutory obligations. The cascade is therefore: CBD (ratified treaty) → GBF (adopted under CBD, implementing South Africa's CBD commitment) → NEMBA (national statute giving CBD obligations domestic legal force) → NBSAP (national implementation plan) → WC Biodiversity Act No. 6 of 2021 (provincial statute) → WC BSP (provincial spatial instrument) → municipal SDF and CITP alignment obligation. Municipalities are organs of state implementing legislation applicable to biodiversity. They are bound by this cascade.

Three GBF targets are directly relevant to Stellenbosch's transport planning and development approval system. Target 1 requires spatial planning to be biodiversity-sensitive, ensuring that land-use change, infrastructure development, and urban expansion do not threaten biodiversity priority areas. This is the TIA reform argument, now supported by a global framework: development approvals assessed only on vehicle performance, without biodiversity-sensitive land-use assessment, are non-aligned with South Africa's GBF commitments. Target 11 requires the maintenance and enhancement of nature's contributions to people, including protection from natural hazards and disasters through nature-based solutions — directly linking functioning ecosystems, flood protection, and ecological infrastructure to the transport system resilience argument in Section 6. Target 12 is the most specifically urban and directly transport-relevant: it requires municipalities to 'significantly increase the area, quality and connectivity of green and blue spaces in urban and densely populated areas, ensuring biodiversity-inclusive urban planning, enhancing native biodiversity, ecological connectivity and integrity.' This is a commitment to integrate biodiversity considerations into the urban planning system — including development approvals, TIAs, and transport infrastructure investment. The COP15 decisions explicitly recognised that local and subnational governments are GBF implementation actors, not merely national governments: municipalities' planning decisions are direct contributions to or detractions from South Africa's GBF Target 12 commitments.

In Stellenbosch's specific context, this matters acutely. The municipality sits within the Cape Floristic Region, one of the world's six Global Biodiversity Hotspots — an area of such exceptional biodiversity concentration and endemism that it represents a disproportionate fraction of South Africa's biodiversity commitment under the GBF. Every development approval that permits peripheral, car-dependent expansion into agricultural or peri-urban land adjacent to CBA and ESA areas, every road scheme that fragments ecological corridors, and every NMT investment decision that fails to consider biodiversity co-benefits is a municipal-level decision with direct GBF Target 1, 11, and 12 implications. The CITP's current measurement framework is entirely blind to these implications.

The WC BSP is the spatial instrument through which these GBF commitments are operationalised at provincial level. Under Section 37(c) of the Western Cape Biodiversity Act, municipalities are required to align their zoning schemes, as part of their Spatial Development Frameworks, with WC BSP categories. The BSP map identifies Critical Biodiversity Areas (CBAs) and Ecological Support Areas (ESAs) across the province. In CBA 1 areas, only low-impact, biodiversity-sensitive land uses are appropriate; in ESAs, habitat loss must not compromise ecological functioning. These categories are not advisory — they are the provincial spatial expression of South Africa's GBF and NBSAP commitments, backed by the authority of the WC Biodiversity Act. Three transport-specific implications of this framework for the Stellenbosch CITP have not been acknowledged in the 4th Review:

First, new road infrastructure, urban edge expansions, and peripheral developments in or adjacent to CBA and ESA areas require assessment against the BSP map categories. The IDP's SDF acknowledges the ecological sensitivity of the Stellenbosch landscape — the Eerste River corridor, Jonkershoek, Simonsberg, the Helshoogte pass, the agricultural landscape — but does not connect this to transport investment decisions. The WC BSP makes this connection legally operational: transport infrastructure proposals in biodiversity priority areas must demonstrate that they do not compromise ecological functioning. The Wales appraisal criteria we recommend elsewhere in this submission — specifically the requirement that new road schemes adapt to climate change and minimise ecological impact — are directly reinforced by the WC BSP's statutory requirements under NEMA and SPLUMA.

Second, the WC BSP explicitly identifies Climate Adaptation Corridors as a sub-category of Ecological Support Area. These are areas that facilitate species movement in response to climate change and must be maintained in a functional near-natural state. Road infrastructure that fragments these corridors creates both biodiversity loss and climate adaptation failure. The Stellenbosch CITP contains no ecological connectivity indicator and no requirement for transport projects to assess their impact on biodiversity corridors. This is a gap against both the WC BSP and the WCIF 2050's requirement to design resilient infrastructure that offsets climate change impacts.

Third — and this is the counterintuitive argument — NMT infrastructure, when well-designed and routed, can contribute positively to the biodiversity network. Linear NMT routes along river corridors, greenways through agricultural buffers, and cycling paths integrated with ecological open space can function simultaneously as active travel infrastructure and as biodiversity connectivity corridors. Cape Town's biodiversity network planning explicitly recognises that transport routes, road verges, and linear parkways can facilitate species movement as secondary biodiversity corridors. A CITP that tracks kilometres of NMT infrastructure without assessing its ecological co-benefits — or its ecological impacts where poorly routed — is missing both a compliance requirement and a design optimisation opportunity. Well-designed NMT routes in the Stellenbosch context can simultaneously serve commuter pedestrians, recreational cyclists, and ecological connectivity. Poorly designed ones can fragment habitats. The current KPI framework cannot distinguish between them.

Recommendations: Biodiversity, the GBF, and the CITP

- The 4th Review and the CITP should formally acknowledge the 2023 WC BSP (adopted 13 December 2024) as a binding provincial framework requiring alignment. Given that the BSP was adopted after the 3rd Review, its incorporation into the CITP's project appraisal criteria should be a first-year priority for the standalone annual CITP review we recommend.
- Require that all transport infrastructure projects above a defined capital value include a WC BSP map category assessment as part of project appraisal: does the project affect CBA or ESA areas? If so, does it comply with the applicable land-use guidelines and, where required, NEMA environmental authorisation requirements?
- Add an ecological connectivity indicator to the CITP's NMT KPI cluster: the percentage of new NMT infrastructure that is assessed as contributing to, rather than detracting from, the biodiversity network as defined by the WC BSP and the municipality's Environmental Management Framework. This connects the NMT programme to the statutory biodiversity framework and creates a positive co-benefit tracking mechanism.
- Apply the WC BSP category assessment to all urban edge expansion proposals and peripheral development applications, including high-income gated estate developments. The CITP's revised TIA terms of reference should require this

assessment alongside sustainable access criteria: a development that cannot demonstrate compatibility with adjacent CBA or ESA categories, or that generates vehicle-only access in an ecologically sensitive corridor, should not receive transport approval as a default.

- Engage CapeNature and the Western Cape Department of Environmental Affairs and Development Planning on a joint assessment of the Stellenbosch CITP's transport network against the WC BSP map. The province has an established process for mainstreaming the BSP into municipal planning; the CITP's transport infrastructure programme should be part of that process.

---

7. Institutional Accountability: Closing the Plan-Delivery Gap

The Growth Lab study identifies a pattern directly applicable to Stellenbosch: South African planning institutions have demonstrated a capacity to adopt sophisticated frameworks and then fail to implement them, not because of individual failure but because institutional workflows, performance management systems, and professional accountability frameworks remain calibrated around an older paradigm. Three specific mechanisms would begin to close this gap.

TIA terms of reference: NLTSF-compliant reform

The NLTSF explicitly identifies TIA methodology as a cause of the NMT deficit in South African cities. Notably, the CITP's own preferred scenario included a commitment that "TIAs are based on person trips (not vehicle trips) and include NMT" — meaning the intent for sustainable access assessment was present in the plan. The gap is therefore one of operationalisation: the TIA terms of reference do not yet reflect this stated intent, making it a delivery gap rather than an original omission, but one that the NLTSF now makes a compliance requirement to close. Revised TIA terms of reference should require that every development application assess pedestrian connectivity, cycling access, and public transport integration alongside vehicle performance. A development that performs well on active and public transport access should not be required to 'mitigate' a vehicle level of service 'problem' by building more road capacity.

Public participation demand-to-delivery tracking

'Roads, Transport and Stormwater' has ranked as the number one community priority in every public participation round since September 2024. The IDP does not report on the connection between this expressed demand and CITP delivery — what was demanded, what was committed, and what was actually delivered. The annual review should include a section explicitly mapping community transport priorities to CITP deliverables and delivery outcomes. This creates visible accountability between community demand and municipal response.

Executive reporting: a transport performance dashboard

The Mayoral Outcome 5 framework tracks Adam Tas Corridor development milestones but includes no transport-mode outcome indicator. The Executive Mayor's quarterly performance reporting should include a transport performance dashboard tracking active and public transport outcomes, mode-disaggregated capital expenditure, and deferred deliverable status alongside road infrastructure spend — so that the quality and equity of transport delivery, not only its quantity, is visible at the political level.

The CITP's legal status and the annual review obligation

The most structurally significant institutional issue identified in this submission is one that underlies all the others: the Stellenbosch CITP is being treated as a sector plan subset of the IDP. The CITP itself adopted this framing, describing itself as “one of the sectoral plans that forms part of this 5-year update cycle.” However, the legal status of a CITP under the National Land Transport Act is that of a standalone statutory document with its own approval authority, its own submission requirements, and its own independent review cycle — and the practice of treating it as an IDP sector plan, however understandable as a coordination mechanism, does not discharge those statutory obligations.

The distinction matters legally and practically. Section 36(1) of the NLTA requires every planning authority to prepare an integrated transport plan and submit it for approval to the MEC — not to Municipal Council as part of an IDP process. The MEC approves it independently. On approval, it must be submitted to the National Public Transport Regulator and Provincial Regulatory Entity under Section 36(6). It has direct legal force in the operating licence system: municipalities are required to respond to operating licence applications with reference to their ITP, and a municipality whose ITP is out of date is legally exposed in that function. None of this applies to an IDP sector plan chapter.

Section 36(1)’s requirement that ITPs be updated ‘in the prescribed manner and as frequently as prescribed’ is given concrete effect by the Minimum Requirements for the Preparation of Integrated Transport Plans (Government Gazette No. 38256, GN 954 of 2014), which prescribe a five-year cycle for new CITPs and annual updates in the intervening years. The City of Cape Town’s practice reflects exactly this: its annual CITP review is a standalone document subjected to its own public participation process, aligned to the IDP and budget cycle but adopted and submitted to the Provincial Minister separately. This is what the law requires. It is not what Stellenbosch is doing.

What Stellenbosch is doing — updating the CITP’s implementation tables within the IDP review, carrying forward deferred deliverables, and refreshing performance commentary — is a necessary but insufficient subset of a proper annual CITP review. It does not constitute the standalone transport planning document with independent MEC submission and approval that the NLTA requires. This is a compliance gap, but — more importantly for this submission — it is an explanatory gap: it is the structural reason why the CITP’s KPI framework is accumulating misalignment with binding frameworks, why new policy developments are not incorporated until they are raised in civil society submissions, and why the accountability mechanisms proposed above have no dedicated forum in which to operate.

The current practice gap: what is being missed

The consequence of treating the CITP as an IDP subset rather than a standalone document is directly visible in the issues this submission has raised. The WCIF 2050 was adopted by Cabinet in October 2024. The Draft PLTF was published for comment in April 2025. The December 2024 NRTA amendment reclassified a significant proportion of the e-bike delivery workforce’s vehicles as motor vehicles. The Triple Access Planning Handbook was published in 2024. The Hermanus NMT Demonstration Town programme was launched in October 2025. The ITF/OECD’s Vision-Led Transport Planning guide was published in 2025, providing an international best-practice governance framework for exactly the institutional shift this submission recommends — and explicitly calling for vision-led strategies to be codified in legislation and planning mandates, a governance requirement that maps directly onto Stellenbosch’s NLTA obligations. None of these developments — all with direct implications for the CITP’s KPI framework, investment priorities, and policy alignment — has been acknowledged or incorporated into the CITP through any formal review process. They are being raised here, in a civil society submission on an IDP review, because the statutory process that should have surfaced them does not exist in Stellenbosch’s current institutional practice.

A properly constituted standalone annual CITP review — with its own dedicated public participation, updated baseline data, policy alignment assessment, and MEC submission — would have incorporated the WCIF 2050 alignment requirement within months of its Cabinet adoption in October 2024, well ahead of this 4th IDP Review. It would have triggered a municipal response to the December 2024 NRTA amendment before the informal delivery workforce was left in regulatory uncertainty. It would have created a structured forum in which 'Roads, Transport and Stormwater' — the community's consistently stated number one priority — is mapped to CITP commitments and delivery outcomes, not merely recorded in a ward priority table.

The annual review as the mechanism for all proposed amendments

This is the submission's most important structural recommendation, and it reframes the relationship between all the other recommendations. Rather than asking the municipality to adopt twelve separate KPI amendments immediately, we are asking it to establish one process — the legally required standalone annual CITP review — and to use that process to incorporate the amendments proposed throughout this submission systematically and in accordance with the statutory framework within which the CITP sits.

This reframing is deliberate. We recognise that twelve simultaneous KPI demands, however well-grounded, create an institutional burden that may be used to justify inaction on all of them. A single ask — establish the process the law requires — is harder to decline, and the process itself, once established, creates the accountability structure through which each amendment is addressed in the appropriate annual cycle. The first standalone annual CITP review would incorporate the WCIF 2050 alignment and the resilience KPI. The second would address the TAP framework and access-to-opportunity indicators. The third would incorporate micromobility policy and the NMT quality standard audit. This is a manageable programme; it is also how a properly functioning statutory transport planning system is supposed to work.

> *The central ask of this submission, distilled to its simplest form: treat the CITP as what the law says it is — a standalone statutory transport planning document with its own annual review, its own public participation, and its own MEC approval. Everything else in this submission follows from that. A municipality that does this will, over the remaining two years of the 5th Generation IDP cycle, naturally incorporate the NLTSF compliance requirements, the WCIF 2050 alignment, the TAP framework, the resilience KPI, and the micromobility response that this submission identifies as urgent. A municipality that continues to treat the CITP as an IDP chapter will continue to accumulate the misalignment this submission documents.*

Compliance and opportunity dimensions

The compliance dimension is clear: the absence of a standalone annual CITP review is non-compliance with NLTA Section 36(1) read with the Minimum Requirements for the Preparation of ITPs (GN 954 of 2014). It is also non-compliance in a legally consequential sense — an ITP that is not independently reviewed and submitted to the MEC is not properly available for the operating licence function it is required to support under Section 36(6). If a development applicant or operating licence applicant were to challenge a municipal decision on the basis that the municipality's ITP is not current, the absence of a standalone annual review would be a material vulnerability.

The opportunity dimension is equally concrete. A municipality with a demonstrably current, independently reviewed, MEC-approved CITP is a more credible partner for the Western Cape Department of Mobility's investment programmes. The NMT Demonstration Town programme's prerequisites — a defined quality standard, an NMT network plan, a current CITP — are the same as the requirements for a properly reviewed standalone CITP. The

Province's Park and Ride MOU and the secondment of provincial consultants already demonstrate that the Department of Mobility is prepared to invest in Stellenbosch's transport programme when the institutional foundations are in place. A standalone annual CITP review deepens that foundation and signals to the Province that the municipality is a serious, accountable transport planning partner.

- Establish a standalone annual CITP review process, separate from but coordinated with the IDP annual review cycle, in compliance with NLTA Section 36(1) and GN 954 of 2014. The review should include: updated baseline transport data; a formal KPI performance report disaggregated by mode; a deferred deliverables accountability report with root cause analysis for multi-year deferrals; a policy alignment assessment against applicable frameworks (NLTSF, WCIF 2050, NDC, Climate Change Act); dedicated public participation on transport-specific priorities; and formal Council adoption followed by MEC submission under Section 36.
- The first standalone annual CITP review — to be conducted in the 2026/27 financial year — should prioritise: WCIF 2050 alignment (adopted October 2024, already overdue for incorporation); the December 2024 NRTA e-bike amendment and its implications for the informal delivery workforce; Triple Access Planning as the governing conceptual framework; a Transport System Resilience KPI; and the NMT quality standard and network condition sub-indicator. Subsequent annual reviews would address the fuller programme of amendments proposed in this submission.
- Engage the Provincial Department of Mobility proactively on the standalone annual review requirement. The Province has approved the 2023–2028 CITP, signed an MOU with the municipality, and seconded consultants to the Park and Ride feasibility study. It has a direct interest in Stellenbosch's CITP being current and aligned. The annual review is an opportunity to formalise that collaborative relationship as a structured annual process rather than a project-by-project engagement.
- In the interim — pending establishment of the standalone review process — the final 4th IDP Review should include an explicit acknowledgement that the CITP is a standalone statutory document under NLTA Section 36, and a commitment to conducting the first standalone annual review in 2026/27. This acknowledgement costs nothing and creates the institutional signal that the municipality understands its legal obligations and intends to meet them.

8. Transport System Resilience: An Evolving Dimension the CITP Does Not Measure

The transport system resilience gap identified in this section needs to be understood in its temporal context. The Western Cape Infrastructure Framework 2050 — the provincial framework that creates the most direct alignment obligation for the CITP on resilience — was adopted by Cabinet in October 2024, nineteen months after the CITP's March 2023 approval. The two major flood events that exposed the vulnerability of Stellenbosch's transport infrastructure occurred in June and September 2023, both after the CITP was prepared.

The CITP's silence on resilience is not a planning oversight that should have been caught in 2023 — it reflects a policy and operational landscape that changed materially in the period since approval. This is the annual review process working as designed: new provincial frameworks and new operational evidence create new obligations, and the review cycle is the mechanism for incorporating them. The resilience KPI recommended in this section is therefore presented not as a correction of the original CITP but as a first-year deliverable for the standalone annual review.

The 2023 Western Cape floods are not background context for this submission — they are directly embedded in the CITP's performance record. Two major flood events struck the

Stellenbosch municipal area: the June 2023 event, which the IDP records as the heaviest rainfall in 45 years, saw the Eerste River break its banks, road closures across the municipality, the historic Markotter pedestrian bridge destroyed, and parts of the Franschhoek area isolated. The September 2023 event — which delivered 193mm of rain in two days — was even more destructive: the Lacotte and Stiebeuel rivers caused widespread infrastructure damage in Franschhoek, washing away parks, walkways, and pedestrian bridges. Over 200 roads were closed across the Western Cape. The provincial road damage since June 2023 has been assessed at more than R1.8 billion.

These events have direct consequences visible in the CITP's own tables. The Tour Bus Facilities deliverable — deferred for the third time in the 4th Review — was explicitly deferred in 2023/24 because "the 1–100 year flood rehabilitation took precedence." Climate disruption is not a future risk to Stellenbosch's transport system. It is a present operational reality that is already consuming capital budget, delaying CITP commitments, and exposing systemic vulnerability in the transport infrastructure.

Yet the CITP contains no resilience KPI. There is no indicator tracking the climate vulnerability of transport infrastructure, the redundancy of the transport network during disruption events, or the time required to restore mobility after a climate shock. The Climate Change Adaptation chapter in the IDP (Chapter 4) identifies transport infrastructure vulnerability but this content does not flow into CITP KPIs or project prioritisation. The two documents sit alongside each other without structural connection.

This gap has two distinct dimensions that the municipality should treat separately. The compliance dimension: the WCIF 2050, adopted by Cabinet in October 2024, is a provincial framework with which Stellenbosch's infrastructure planning — including its CITP — is expected to align. One of its eight strategic objectives is to 'design and deliver resilient, transformative infrastructure that offsets climate change impacts.' The framework is explicit that 'a more resilient and spatially transformed Western Cape' requires that 'mobility systems and transportation corridors provide safe and efficient connectivity to opportunities, services, and facilities.' The two transversal themes of the Provincial Strategic Plan are spatial transformation and infrastructure mobility and resource resilience. A CITP with no transport resilience KPI cannot demonstrate alignment with an already-adopted provincial framework. This is not a future compliance burden — it is a current gap against a framework that was in place before this 4th Review was drafted.

The opportunity dimension: the Draft PLTF 2024/25–2028/29 — not yet finalised, but published for comment in April 2025 and clearly signalling provincial direction — reinforces the resilience agenda and identifies reducing road dependence as a primary objective. Municipalities that demonstrate WCIF 2050 alignment in their CITPs and IDPs are better positioned to access provincial infrastructure investment as the PLTF is finalised and its associated funding programmes are established. Early alignment is a strategic opportunity, not only a compliance obligation.

The Resilience Case for NMT Investment

There is a dimension of transport system resilience that is rarely articulated but is directly relevant to Stellenbosch's situation: active travel modes are the most resilient modes in a climate disruption event. Walking and cycling do not depend on powered infrastructure, are not stopped by fuel shortages, and — critically — do not necessarily become impassable when roads flood. Pedestrian and cycling routes on higher ground, along river banks at adequate elevation, or through parks and open space often remain accessible when arterial roads are blocked. A municipality that has invested primarily in motorised road infrastructure has, by that investment pattern, reduced the resilience of its transport system: when the roads close, there is no alternative.

The 4R resilience framework applied to South African public transport systems — robustness, redundancy, resourcefulness, and rapidity — identifies 'inadequate

infrastructure maintenance' as the primary driver of South Africa's transport system vulnerability to climate disruption, in contrast to the UK and Mexico where sustained investment in resilient multimodal infrastructure has produced demonstrably better recovery. Stellenbosch's pattern of deferring NMT infrastructure while consistently maintaining road infrastructure for private vehicles is, through this lens, actively reducing the municipality's transport system resilience: it is concentrating access dependency on the mode most vulnerable to the flood events that the climate record shows are increasing in frequency and intensity.

> *The resilience argument for NMT investment is distinct from the equity and climate arguments — and may be more politically tractable. When roads close during a flood event, residents who walk and cycle retain mobility. Residents who depend on private vehicles do not. A municipality serious about climate resilience should be investing in the modes that keep people moving when the roads close — not deferring them.*

Recommendations on Transport System Resilience

- Introduce a Transport System Resilience KPI into the CITP, covering at minimum: (a) percentage of transport infrastructure assessed as climate-resilient to a defined return period; (b) network redundancy indicator — the percentage of key origin-destination pairs served by at least two independent route options across different modes; and (c) recovery time indicator — average time to restore core network functionality following a Level 5+ weather event. This KPI directly operationalises the WCIF 2050's adopted strategic objective to design and deliver resilient infrastructure, and positions the municipality for alignment with the Draft PLTF's resilience agenda once finalised.
- Require the Climate Change Adaptation content in IDP Chapter 4 to feed directly into CITP project prioritisation criteria. Projects in identified flood-vulnerable areas should be required to demonstrate climate-resilient design as a condition of capital approval.
- Apply the Wales appraisal criterion on climate adaptation to all new transport infrastructure: does the project adapt to the effects of climate change? This criterion should include a minimum assessment of flood vulnerability, drainage design standards, and alternative route provision.
- Treat NMT investment explicitly as a resilience investment in the CITP narrative and budget justification — not only as a sustainable transport or equity investment. This framing strengthens the funding case for NMT when it competes against road rehabilitation in post-disaster budget environments.
- In the specific case of the Franschhoek area, which has experienced two major flood events in one year: the pedestrian bridges and active travel routes identified for restoration or construction should be designed to flood-resilient standards, with their redundancy function — providing mobility when roads close — explicitly documented in the project brief.

---

9. Micromobility: Opportunity and Risk the CITP Does Not Acknowledge

The Stellenbosch CITP's treatment of e-bikes is limited to noting that their popularity is growing and that infrastructure "can be explored" — without a dedicated policy framework, infrastructure standard, or delivery programme. There is no treatment of e-scooters, cargo bikes, or the rapidly growing informal delivery economy that relies on them. This is a significant gap, and it has widened considerably since the CITP's approval in 2023.

The pace of growth is already visible in Stellenbosch itself. GoNow on Demand launched an electric scooter rental service in Stellenbosch in October 2020, deploying an initial fleet of 200 scooters across the town within weeks of launch. By 2024, scooters had become a fixture of daily movement in the town centre — and the municipality's own response was telling: the Executive Mayor acknowledged at a Council meeting that "when the municipality's ordinances were drafted, scooters were not taken into account," describing a regulatory gap that requires active resolution rather than passive acceptance. The appeal of this mode and the speed at which it responded to an unmet mobility need cannot be wished away — it requires the legal and administrative frameworks to support it.

The broader market trajectory reinforces the urgency. According to IMARC Group (2024), the South African e-bike market reached USD 184.8 million (approximately R3.05 billion) in 2024 and is projected to reach USD 395.7 million (approximately R6.5 billion) by 2033, a compound annual growth rate of 7.9% — growth that has accelerated substantially since the CITP was prepared. In Cape Town, fleets of hundreds of electric cargo bikes already operate in the last-mile delivery economy, predominantly operated by migrant workers earning a living in the informal sector. This is not a future trend in Stellenbosch — it is already present in the municipality's service economy, its wine and tourism logistics, and its growing food delivery sector.

Simultaneously, a significant regulatory change took effect in December 2024 that the CITP has not acknowledged: an amendment to the National Road Traffic Act now classifies any electric bicycle capable of travelling above 45km/h as a motor vehicle, requiring registration, a road licence, and a driver's licence. Given that the majority of e-bikes on the market are capable of reaching this threshold under typical riding conditions, this amendment has the potential to effectively criminalise a large proportion of the existing e-bike commuter and delivery workforce — without any municipal response in place to manage the transition.

The regulatory dimension of this gap has a specific temporal character that is worth making explicit. The December 2024 NRTA amendment reclassifying e-bikes capable of exceeding 45km/h as motor vehicles took effect nearly two years after the CITP's March 2023 approval. No transport plan prepared in early 2023 could have anticipated this regulatory shift or its implications for the informal delivery workforce. This is among the clearest illustrations in this submission of why the standalone annual CITP review process matters in practice: a regulatory change with immediate, material consequences for a significant cohort of transport users in the municipality should trigger a formal municipal response within the annual review cycle — not surface for the first time in a civil society submission on an IDP review three years later. The micromobility recommendations in this section are therefore framed as first- and second-year priorities for the annual review process, not as retrospective criticisms of the 2023 CITP's scope.

The Opportunity Dimension

E-bikes, cargo bikes and e-scooters represent a genuinely transformative opportunity for Stellenbosch's transport system, particularly in the context of the Growth Lab's findings on spatial exclusion and informal employment, and for short trips of all purposes. Electric cargo bikes have demonstrably lower operating costs than motorcycles, are accessible to workers without a driver's licence (under current sub-45km/h classification), reduce transport cost burden on low-income communities, and create viable last-mile employment that does not require access to a motor vehicle. In a municipality where transport cost as a proportion of income is a documented barrier to labour market participation, the growth of micromobility is also a poverty alleviation mechanism that the transport planning system should be actively supporting.

There is also a direct spatial proximity argument in TAP terms: e-bikes and cargo bikes extend the effective cycling range to 20–30km, transforming the spatial proximity catchment for employment and services. For residents of Kayamandi and other communities that are

physically close to employment centres in Stellenbosch town but separated by infrastructure quality and safety concerns, an e-bike-friendly NMT network could dramatically extend economic access without requiring any change to the road network.

Micromobility's contribution to Stellenbosch's transport system is therefore not only economic and social — it is climatic. Every e-bike, cargo bike or e-scooter trip that replaces a private vehicle trip is a direct reduction in transport-sector emissions. For a municipality with binding obligations under South Africa's Second NDC and the Climate Change Act, and with a transport system overwhelmingly dependent on private vehicles, the growth of micromobility is one of the few genuinely scalable near-term pathways to reducing transport emissions without requiring large-scale infrastructure investment. The same spatial proximity argument that makes micromobility an economic inclusion tool — extending the effective range of low-income communities to employment and services — also makes it a climate tool: shorter trips by lower-emission modes, enabled by a denser and better-connected urban form. A transport planning system that is not actively supporting this transition — through infrastructure standards, regulatory clarity and investment — is leaving one of its most accessible and lowest-cost climate levers unused.

The Risk Dimension

The risks are equally real. Micromobility users in South African cities face disproportionate safety risks: they share road space and NMT infrastructure with pedestrians and motor vehicles without adequate separation, and they operate without the regulatory protection, insurance, or safety support available to formally employed transport workers. The growth of informal delivery work on e-bikes and motorcycles has been documented as producing high rates of road crashes, violence, and hijacking, with limited recourse for workers. The NRTA amendment creates a further risk: if enforcement is applied to the delivery workforce without a transition programme, it will criminalise the most economically precarious group of micromobility users while leaving the safety infrastructure gap unaddressed.

The infrastructure dependency is the same as for conventional NMT: e-bike and cargo bike users overwhelmingly share pedestrian and cycling infrastructure. The CITP's failure to specify quality standards for NMT infrastructure is therefore simultaneously a failure for e-bike users. An NMT network that is discontinuous, unsafe at crossings, and inadequately lit is not only a barrier for pedestrians and conventional cyclists — it is a barrier for the growing e-bike economy.

Recommendations on Micromobility

- Add a micromobility section to the CITP's next revision, covering: the current and projected scale of e-bike, cargo bike and e-scooter use in the municipality (commuter and delivery); the regulatory implications of the December 2024 NRTA amendment for the existing informal delivery workforce; and the infrastructure requirements for safe micromobility operation.
- Engage with the December 2024 NRTA amendment proactively: identify the scale of e-bike delivery and commuter use in the municipality, assess the compliance gap, and develop a municipal response that supports transition rather than criminalisation. The municipality should coordinate with the Provincial Department of Mobility and the Department of Transport on a transition programme for sub-threshold e-bike users.
- Make the NMT infrastructure quality standard (recommended in Section 5.1) explicitly applicable to micromobility: the minimum design quality for 'dedicated NMT infrastructure' should include assessment of suitability for e-bike and cargo bike use, including width, surface quality, and turning radii.
- Introduce a micromobility safety indicator as a supporting indicator under the CITP's safety KPI: crash rates and serious injuries involving e-bike and cargo bike users,

tracked separately from pedestrian and conventional cyclist data, with specific attention to informal delivery workers as the highest-risk sub-cohort.

- Consider a municipal e-bike support programme for Kayamandi and other low-income communities, modelled on similar programmes in Cape Town: subsidised access to sub-45km/h e-bikes for commuters and small business owners, linked to safe NMT route investment. This would directly address both the spatial exclusion and transport cost barriers the Growth Lab identifies as binding on economic inclusion.

---

10. Summary of Recommendations

#	Issue	Recommended Amendment	Basis / Priority
1	TAP framework absent	Adopt Triple Access Planning as CITP conceptual frame; introduce access-to-opportunity KPI across all three pillars (mobility, proximity, digital); reframe ATC Corridor deliverables to include proximity outcomes; apply 'decide and provide' test to capital expenditure	EU Handbook 2024; NLTSF access-to-opportunity objective — Foundational
2	NLTSF non-compliance	Formal NLTSF compliance assessment as annex to final 4th Review; revise TIA terms of reference; add school zone safety KPI; add universal accessibility KPI; progress rail corridor commitment	NLTSF 2023–2028, Section 34 NLTA — Statutory, High
3	Road investment bias / attractiveness gap	Adopt Wales-style appraisal criteria for new road capex; establish mode-equity reporting (capex by primary beneficiary mode); move Baden Powell–ATC rail corridor from discussion to committed feasibility programme	OECD Catalonia 2025; NLTSF; NSDF — High
4	SDF / CITP disconnect: spatial policies without transport measurement	TAP spatial proximity KPI (15-min walk/cycle to key destinations); transport-access dimension in MSDF development alignment review; parking supply monitoring indicator; Koelenhof LSDF precondition test; N1 corridor study scoped for PT viability and NMT	IDP SDF chapter; SPLUMA; GrowthLab — High
5	NMT quality standard absent	Minimum design quality standard in Core KPI 3; network condition sub-indicator; universal design compliance sub-indicator	NLTSF NMT KPA — High
6	Deferred deliverables without accountability	Root cause analysis + funded delivery plan for multi-year deferrals; deferred deliverables register; Kayamandi Bridge committed construction date	Governance — High
7	Walking access not disaggregated	Informal settlement sub-indicator; route quality proviso; PT reliability linkage; disaggregated Council reporting	GrowthLab spatial equity; NLTSF — High

8	VRU safety not primary metric	Pedestrian/cyclist fatalities as co-primary KPI; school zone safety KPI (NLTSF statutory); gender safety perception indicator	NLTSF statutory KPA — High
9	TDM reduced to deferred study	Parking management KPI; workplace travel plan reinstatement; TDM Programme 2025–2027	OECD attractiveness gap — High
10	Sustainability not operationalised	Transport emissions trajectory KPI (NDC-aligned); NDC linkage in NMT mode share; TAP/sustainability as governing KPI introduction	NDC 2025; Climate Change Act 2024 — Medium/Statutory
11	WC Biodiversity Spatial Plan not incorporated; peripheral development (high and low income) deepening car dependency	WC BSP map category assessment required for all transport infrastructure and development applications; ecological connectivity indicator in NMT KPI; WC BSP incorporated into TIA terms of reference; engage CapeNature on joint CITP-BSP assessment; first-year priority for standalone annual CITP review	WC Biodiversity Act 2021; WC BSP Dec 2024 — Statutory, High
12	CITP treated as IDP subset; standalone legal status and annual review obligation not met	Acknowledge CITP's standalone statutory status under NLTA s.36; establish standalone annual review (s.36(1) / GN 954 of 2014) with independent public participation and MEC submission; use annual review as the mechanism for incorporating all proposed amendments; first review in 2026/27	NLTA s.36(1) and s.36(6); GN 954 of 2014 — Statutory, High
13	Transport system resilience absent from CITP	Transport System Resilience KPI (climate vulnerability, network redundancy, recovery time); Climate Change chapter feeds into CITP project criteria; Wales climate adaptation test; NMT investment framed as resilience investment	IDP Ch.4 / Climate Change Act / 2023 floods — High
14	Micromobility absent from CITP	Micromobility section in next CITP revision; proactive response to Dec 2024 NRTA e-bike amendment; NMT quality standard extended to micromobility; micromobility safety indicator; consider e-bike support programme	NRTA Dec 2024; GrowthLab — Medium/Emerging

11. Conclusion

Stellenbosch Municipality has formal transport planning commitments that should align with national policy and international best practice. What it lacks is the measurement architecture,

investment discipline, and institutional accountability required to deliver on those commitments rather than simply documenting them.

The Triple Access Planning framework reveals that the CITP is measuring the wrong things: it tracks mobility but not access, vehicle throughput but not spatial proximity, traffic signal performance but not whether residents can reach employment and services without a car. The NLTSF 2023–2028 establishes binding obligations that the current CITP does not fully meet, most critically in the reform of TIA methodology and the provision of school zone NMT safety infrastructure. The OECD's attractiveness gap model and the Growth Lab's economic evidence both point to the same conclusion: road-first investment in South African municipalities is not a neutral technical choice — it is a contribution to the spatial exclusion and labour market disconnection that define South Africa's most persistent development failure.

The Pedal Power Association and SEE Sustainability respectfully submit that the amendments proposed in this document would not add new aspirations to the IDP — they would create the accountability structures required to hold the municipality's existing aspirations to account, bring the CITP into compliance with its binding national framework, and begin to close the gap between Stellenbosch's stated commitment to sustainable transport and the investment pattern its own records document. We commend these recommendations to the municipality and welcome direct engagement with the transport team on any aspect of this submission.

Submitted by:

Pedal Power Association (PPA)

SEE Sustainability

The remedy is not retrospective criticism of the 2023 CITP; it is the establishment of the review process that would have caught this automatically, and the incorporation of the NLTSF compliance assessment as the first-year priority of that process.

Dear Mr Boshoff

Formal Submission: Comment on the Draft 4th Review of the 5th Generation Integrated Development Plan 2022–2027 (WC024)

1 INTRODUCTION AND BACKGROUND

1.1 The Pedal Power Association

Established in 1976 the Pedal Power Association (PPA), the oldest and one of the largest membership based cycling organisations in South Africa, promotes the interests of cyclists and cycling in all its forms especially as a means of transport whilst simultaneously considering other forms of non-motorized transport. As part of our mandate, PPA recognises the need to embed everyday cycling within both government and society as a desirable, acceptable and well used means of travel.

1.2 SEE Sustainability

SEE Sustainability is a small consultancy and advocacy firm focussed on helping raise awareness, shape thinking and develop strategies to address sustainability issues with a focus on sustainable and equitable access to opportunity in both the Public and Private Sectors

2 COMMENTS AND RECOMMENDATIONS

The comments and recommendations are covered in the comprehensive document attached to this covering letter and comprise PPA's and SEE Sustainability's joint comments on the 4th Review of the 5th Integrated Development Plan of Stellenbosch Municipality. Both organisations have a focus on sustainable mobility which looks to decrease the need to travel and improve accessibility whilst meeting the key objectives of universal access, enhanced safety, reduced environmental impact (**including climate change**), improved resilience and greater efficiencies whilst contributing towards equitable access and a Just Transition

Chairperson: Ivor Myburgh 073 181 1308
Secretary: Dudley Lackay- Cell: 084 701 1196 ~ dudleylackay@gmail.com

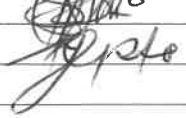
Aan : Munisipale Bestuurder/IDP Komitee

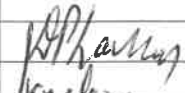
Van: Pniel Old Boys Gemeenskap
Datum: 25 April 2026.
Ref. APR26/A2/168 - Ref APR26/A2/246

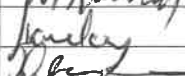
ONDERWERP: Insette vir IDP/2026
1.Bou van multifunksionele Sporthub.
2.Opgradering van ingang en kaartjie kantoor

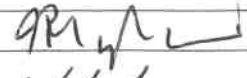
Geagte Mnr/Me,

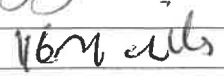
Ons die ondergetekendes,lede,gemeenskap en ondersteuners van Pniel Villagers Old Boys,wil graag deur middel van die IDP proses ons insette lewer.Hiermee doen ons 'n erenstige dog dringende beroep op die Munisipaliteit om aandag te skenk aan die volgende prioriteite in ons gemeenskap:











1.Die oprigting van 'n multifunksionele sporthud vir alle sport kodes in Pniel.

2.Opgradering van die ingangspad asook die voorsiening van 'n kaartjieskantoor vir beskutting teen wind en weer.

Hierdie aspek het 'n direkte invloed op die gesondheid en welstand van ons gemeenskap en haar jeug,asook die ontwikkeling van sport in ons jeug,die bekamping van dwelms en jeugmisdaad.
Ons vertrou dat hierdie aanbouings die nodige oorwegings sal geniet in u huidige beplanningsproses.

Byvoortbaat dank vir u aandag en samewerking.
Vriendelike groete

D.P.Lackay
Sekretaris.

Subject: Budget documents: Appendix 12 (DC policy)

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Colleagues, please find herewith comments on the DC policy for your consideration.

Refer to Section 13.13 (page 27) of the document:

- The section refers to credit, reimbursement and off-set however the policy does not contain the definitions relevant to these terms. The suggestion is to include definitions of these terms.
- The section highlights criteria applicable to credits and off-set, and the off-set requirements does not follow the same process. The term off-set should be removed in the section.
- The delegation for the granting of the credit and reimbursement is vague with reference to the 'municipality'. It is suggested that a committee be established to assist in the evaluation of the criteria and the outcomes related to credit and reimbursement. It is suggested that the committee should include a representative from spatial planning, infrastructure services, and finance as the criteria and its interpretation fall within the expertise of these sections.
- The definition of priority development area should be included in the definition list.
- The following section should be amended to read "whether the development is located within the municipal urban edge and has been designated for urban development"
- The following section should be amended to read "whether the development or engineering services to be installed is provided for in the Municipality's budget that is linked to and/or based (remove the wording) to the Municipality's approved Integrated Development Plan."
- The following section should be amended to read "whether the developer has constructed or upgraded and/or will construct or upgrade infrastructure services (add wording)..."
- The section should specify when the timeframe (i.e. 3 years) commence, the suggestion from a land use management perspective is that the date of validity commences when the Section 28 clearance has been given.

Refer to the Definitions on page 3:

- The engineering service definition should comply with Chapter 1 of SPLUMA;
- Internal engineering service should comply with the definition in Chapter 1 of SPLUMA;
- Consider the inclusion of the definition of land as it relates to section 13.13;
- The definitions should be aligned to SPLUMA, LUPA, and the Planning By-laws as there are some discrepancies e.g. engineering service.

The continued DC discount for Inclusionary Zoning should remain in the policy as part of the municipal incentive mechanisms and support.

If you require any clarification, please do not hesitate to contact me.

Regards,
Chantel

Piet van Blerk

MINUTES OF IDP PUBLIC PARTICIPATION OPEN DAYS APRIL 2026

Description of Issue/s
Technopark Special Rating Area 1. Vision Man – Municipality to consider vision plan – submitted see attached 2. Transport 2.1 NMT – improved NMT facilities required 2.2 Excessive speeds on Technopark Roads, Traffic calming require 3. Great need for parking

Departmental Comment / Action	**Transversal Issue** *(indicate the internal department)*	**Provincial Competency** (indicate the provincial department)
1. Technopark vision plan to be reviewed by Planning department and other Municipal 2. RTS to implement NMT facilities, traffic calming measures by 30 June 2027 3. Meetings to be scheduled to find best approach to deal with parking issues		

A Manifesto for the Future of Technopark

1. Technopark will transform into a **diverse 24 hour neighbourhood** that is attractive and vibrant.
2. Technopark will strengthen its **position within the broader urban system** of Stellenbosch through stronger physical and programmatic integration.
3. Technopark will become the **icon of innovation in technological research and design**.
4. Technopark will **invest in functional recreational spaces** to improve the public domain and to attract visitors and surrounding residents.
5. Technopark will define **incentives to encourage investment** in the innovation of business, mobility and public space.
6. Technopark will remain **accessible to all groups of society** through opening up the public domain and through targets for accessibilty of residential and entrepreneurial space.
7. The sustainable future of Technopark will be driven by a **collaborative process between TechStel and Stellenbosch Municipality** through an urban development team with regular scheduled engagement.
8. Technopark will establish a clear path for the **future of all vacant land parcels** through a precinct plan process supported by land agreements and suitable zoning.
9. The future of Technopark will remain **founded on the needs of existing businesses and users** through continuous surveys.
10. Technopark will retain its established alliance with Stellenbosch University to encourage **ongoing research-driven innovation**.

Why do we need a Manifesto for Technopark?

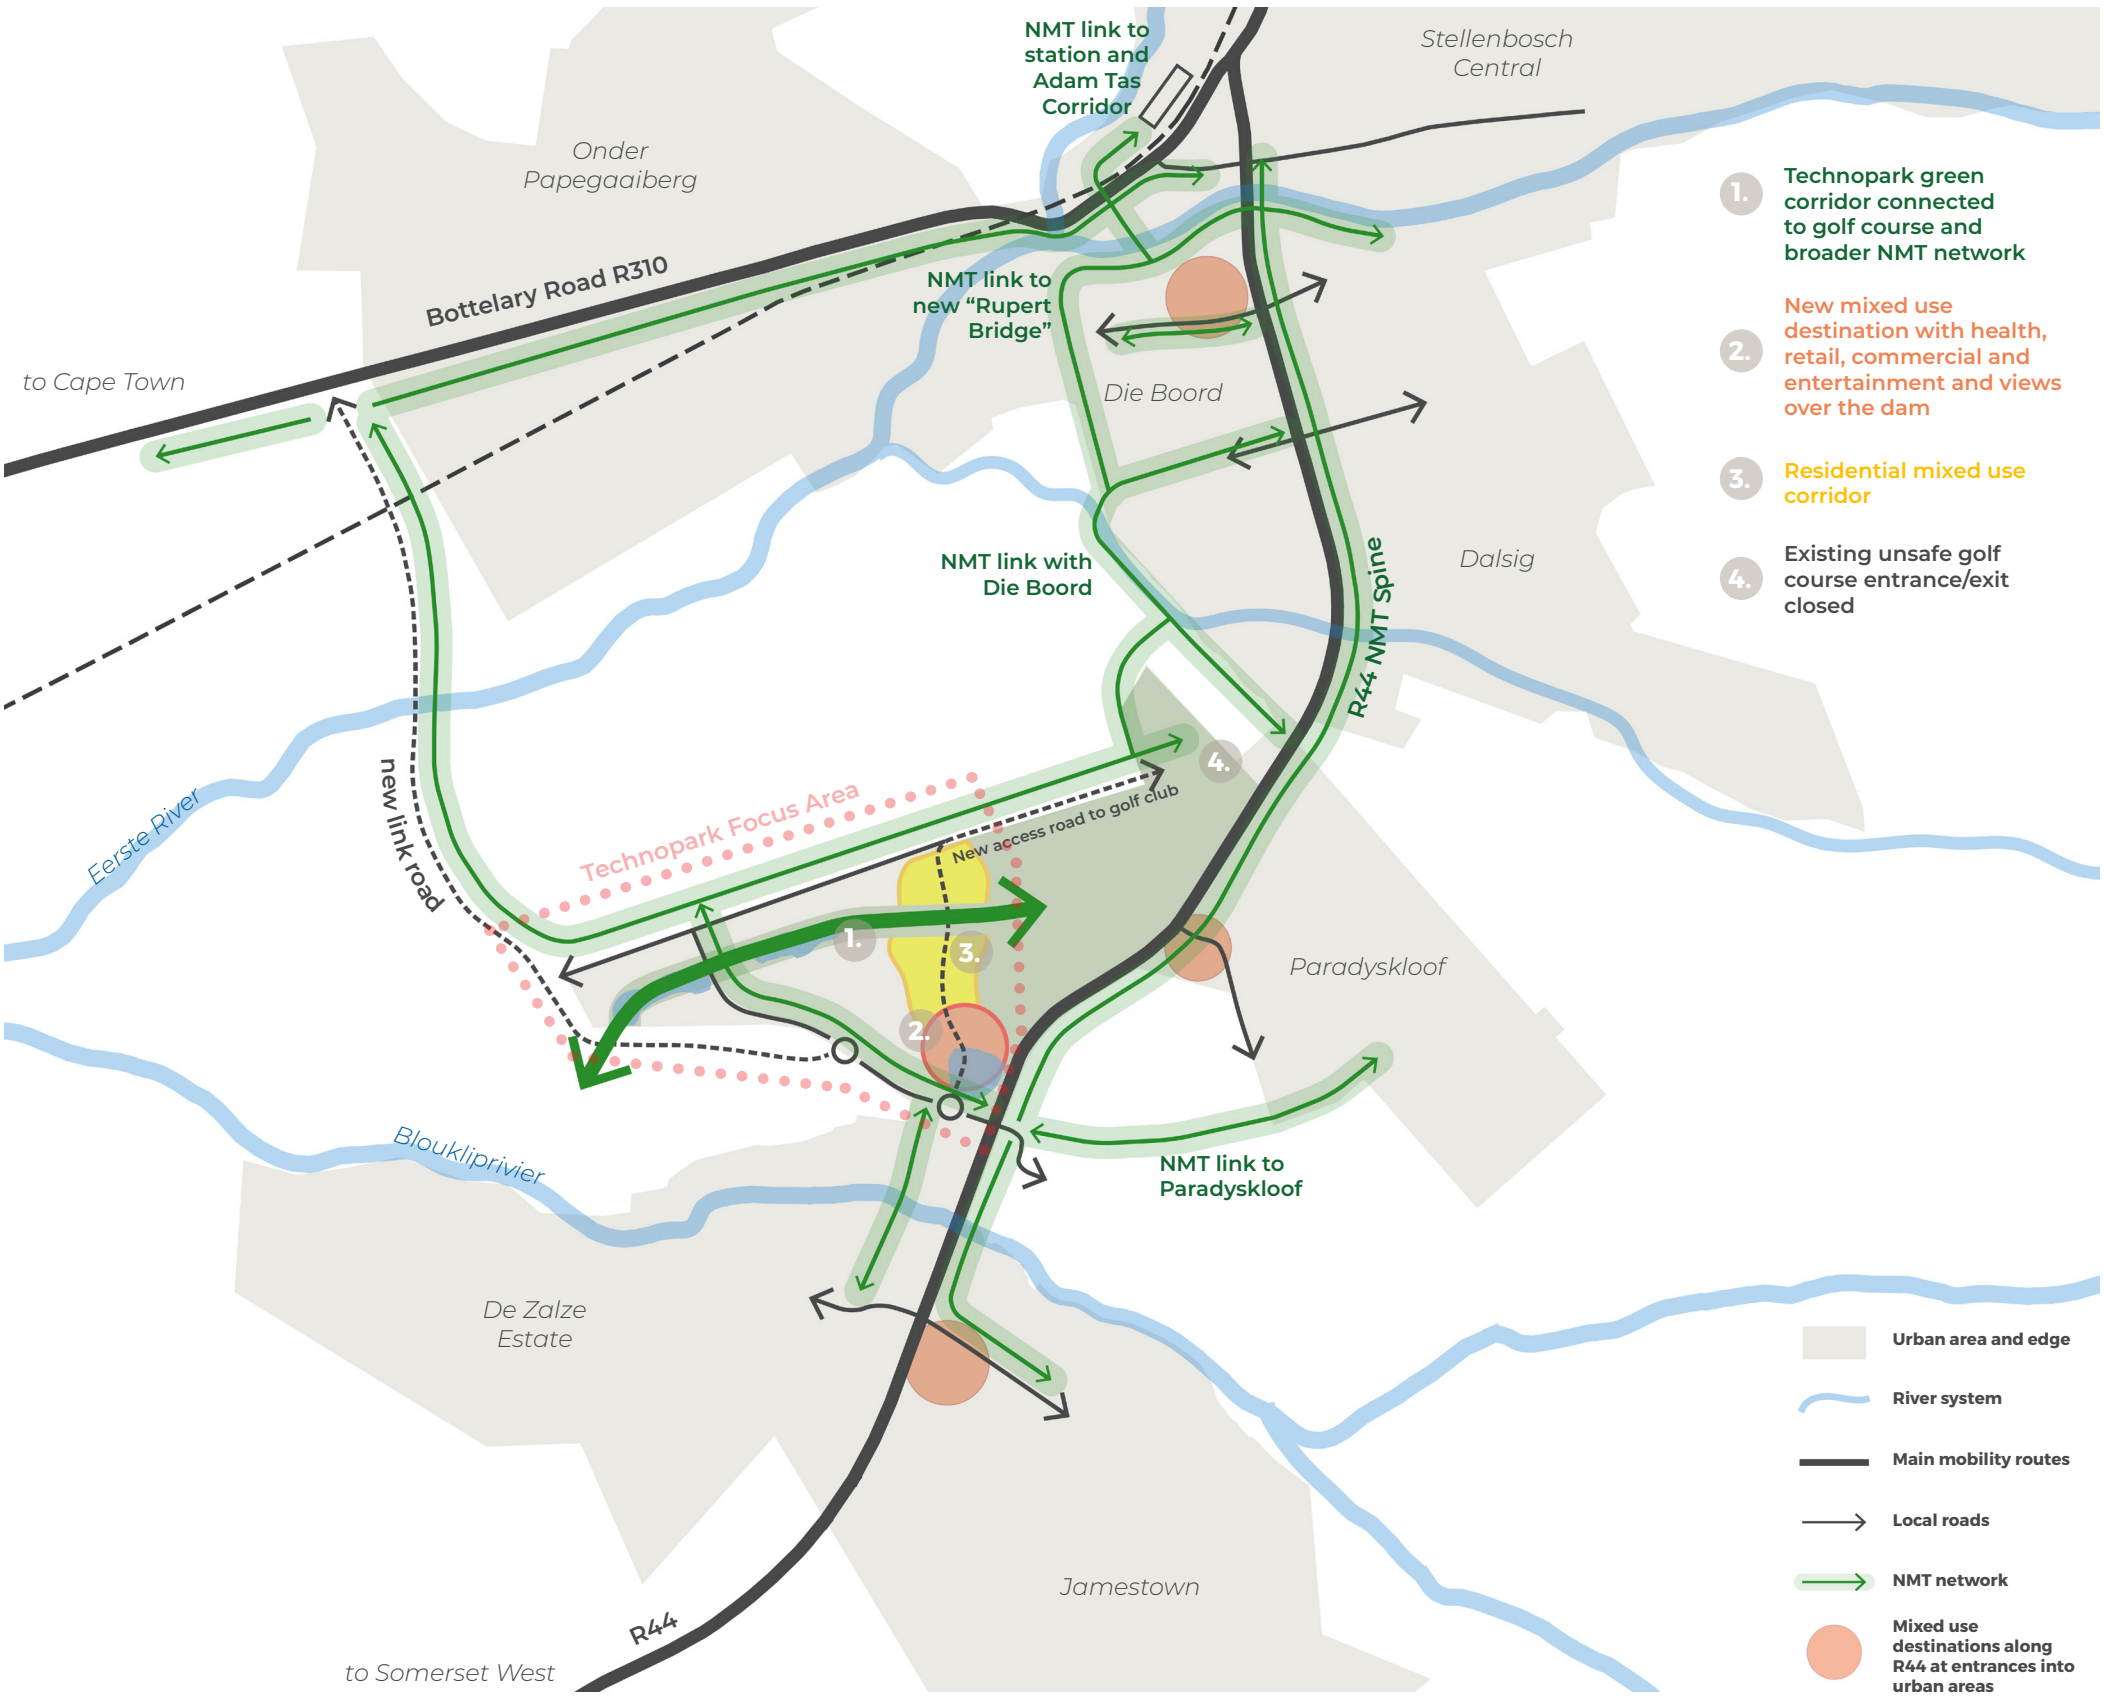
Since its inception four decades ago Technopark and its context of Stellenbosch have experienced economic, social and political change. This requires a repositioning of the role and character of Technopark and a re-think of how it interacts with the environment it functions within.

National and international case studies* teach us that:

- **There is a declining global demand for office space** (mixed use office parks have a 30% lower vacancy rate than single use office locations).
- **The COVID-19 pandemic and advancements in digital technology accelerated this transition.**
- **In order to retain financial sustainability business parks are hence forced to diversify.**
- **The integration of residential, commercial, and recreational spaces foster social interaction, networking and more vibrant places.**
- **Global and local trends indicate a shift towards collaborative, flexible, and amenity-rich work environments driven by the need for innovation, productivity, and employee satisfaction.**
- **The workforce is showing an increasing preference for flexible work options and a greater emphasis on work-life balance.**
- **This implies better access to residential opportunities close to places of employment.**
- **At the same time there is an emphasis on sustainability and environmental stewardship which prompts the prioritization of eco-friendly design features and green initiatives.**

**source: Matuba, T. (2024). Stellenbosch University Masters Thesis (in draft) titled: Exploring the evolution of office parks transitioning to mixed-use developments: implications for Technopark, Stellenbosch.*

Why do we need a manifesto now? The local spatial narrative in Stellenbosch is changing. We are running out of developable space. A more efficient use of land in our existing urbanised areas are seen as the key driver for sustainable change. Vacant land in Technopark provide the perfect opportunity and must be transformed from unproductive spaces to strategic sites for development. In addition, projects like the Adam Tas Corridor and the current review of the Municipal Zoning Scheme are important indications that this is an opportune moment in time to re-think the future of Technopark.



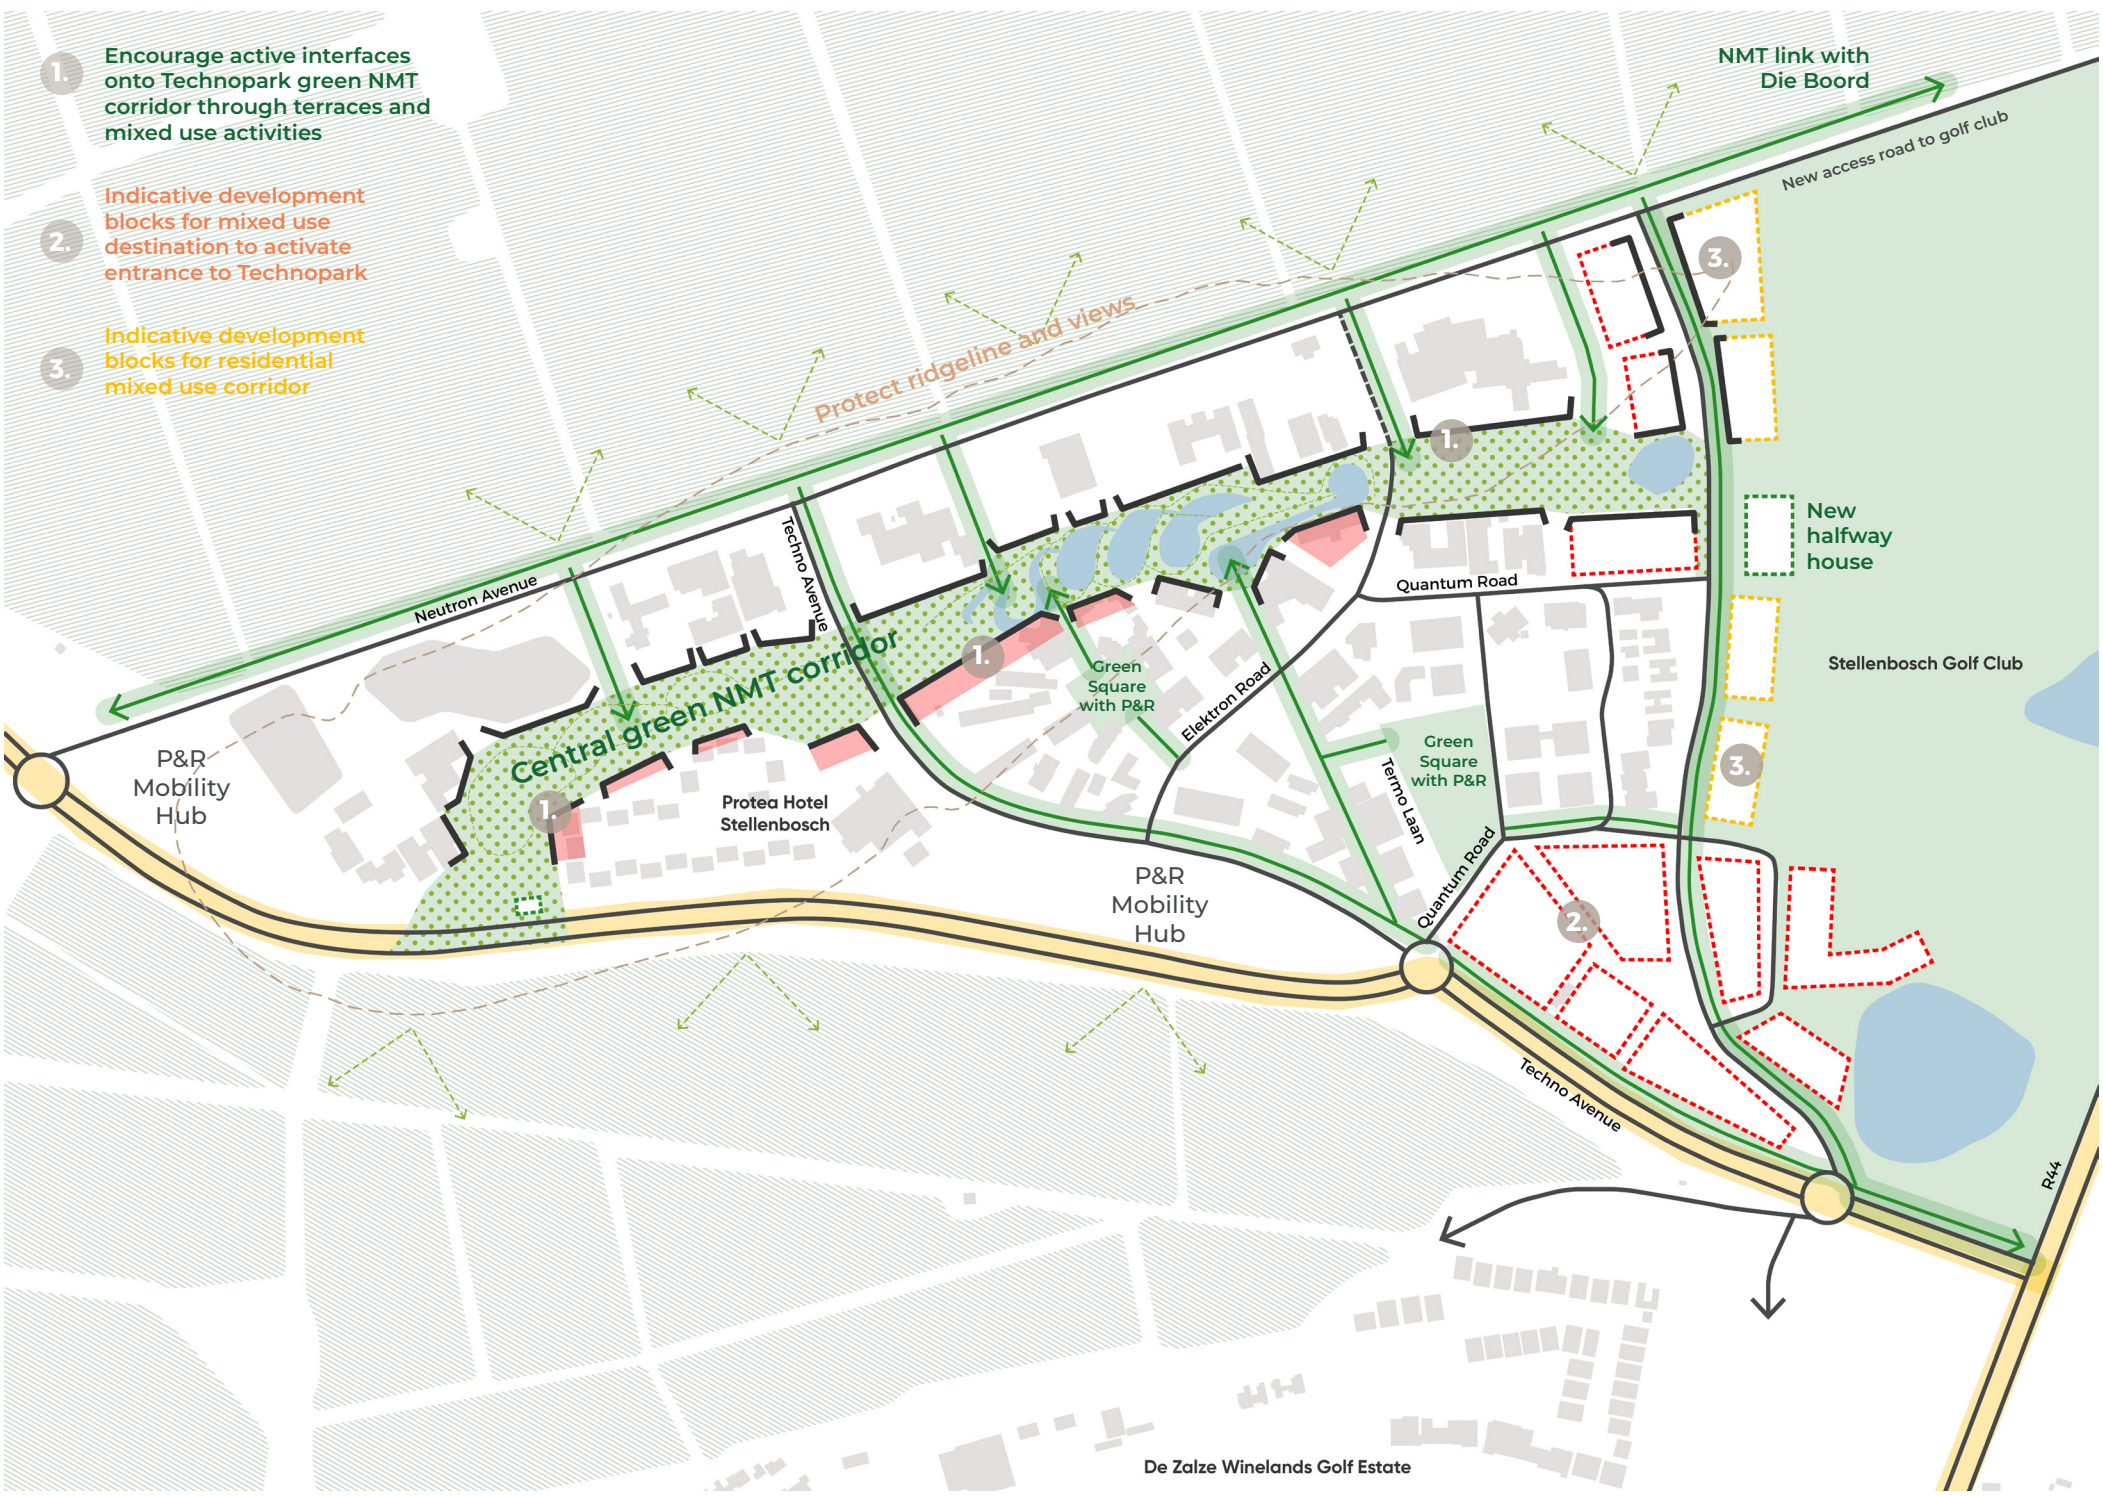
The question is how Technopark is choosing to position itself in this changing landscape and who are the partners in this transition. Technopark is in a fortunate position that there are many opportunities for change which includes both private as well as publicly owned land. A strong partnership and shared vision for the future will create opportunity, confidence and optimisation of opportunities for both Technopark as well as the surrounding area.

The underlying Spatial Logic

The Broader Scale:

Technopark can and should be integrated into the broader urban system of Stellenbosch. Currently it is situated relatively isolated from the surrounding urban areas which creates a variety of challenges related to mobility, service delivery and vibrancy of the area. However, the location and existing infrastructure of Technopark has great potential to be transformed to a significant destination along the R44, as part of the broader urban system in the southern part of Stellenbosch. This is possible through transforming the entrance at the R44 intersection into a vibrant mixed use urban node and extending into a development corridor stitching together Technopark and the golf course. While the node hosts health care, hospitality, small scale retail and residential activities, the corridor is predominantly residential in nature.

This new corridor creates the opportunity for a new entrance to the golf course so that the current dangerous entrance/exit on the R44 can be closed. The new access road on the northern edge of the golf course can also accommodate an important new Non-motorised transport (NMT) route linking towards Die Boord and across the NMT bridge towards Adam Tas Corridor, Stellenbosch Central and beyond. A central green NMT route through Technopark becomes the centre point of this broader pedestrian and cycling movement system.



The underlying Spatial Logic

The Local Scale:

The broader spatial logic also provides a new internal structure for Technopark. The mixed use node at the R44 entrance creates a lively destination with developable land for commercial, retail and other diverse 24 hour activities. This node opens up a more transparent relationship between Technopark and the golf course, making use of the natural features and dams, while allowing for a safer, more urban transition into the neighbourhood. From here a more residential mixed use corridor extends north along the edge of the golf course, with active groundfloor activities facing onto the new entry route to the golf course. There is even opportunity to relocate the halfway house along this route, enjoying a prime location within the green corridor linking Technopark and the golf club.

The existing landscaped dams and green corridor of Technopark becomes this major public recreational space, encouraged through safe walkways, lighting, sports and activity. Businesses can activate their edges through terraces and more mixed use activities facing onto this green spine. This corridor will link existing internal NMT routes but also create broader links to the surrounding landscape and neighbourhoods. Two green squares, one existing and one proposed, serve as parking and mobility hubs in an urban green setting, while two more significant park and ride (P&R) facilities are located on the edges of Technopark. The existing northern ridgeline and stunning views to and from Technopark remains retained, respecting the unique qualities of the area.

How do we get there?

A 7 Step Roadmap for the future:

1. TechStel and the Stellenbosch Municipality will sign the Technopark Manifesto to kickstart the transformation process.
2. TechStel will present the Technopark manifesto to the Stellenbosch Council to a) agree on the rules of engagement and b) formulate a cooperation agreement to drive the future vision for Technopark.
3. TechStel and Stellenbosch Municipality will establish a Technopark urban development team, with representatives from both to meet regularly. The elected Stellenbosch Municipality official will represent the municipality as a key landowner and facilitate strategic discussions with various local or provincial departments.
4. The first objective of the Technopark urban development team is to create a clear timeline for engaging with the current revision of the Municipal Development Management Scheme and Local Area Overlay Zone for Technopark.
5. The second objective for the Technopark urban development team is to define the scope of works for a collaborative precinct plan process to take the spatial component of the manifesto further. This needs to include clear development guidelines and urban management tools as well as financial management tools that can encourage investment in the precinct.
6. The third objective for the Technopark urban development team is to define a land release and phasing strategy for undeveloped and strategic land based on the outcomes of the precinct plan process.
7. Finally the established alliance with Stellenbosch University will be retained to encourage ongoing research-driven innovation. A representative from the University must be invited to regularly join meetings and discussions.

Subject: [EX] Franschhoek IDP - Cabriere Street

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Cabriere Street is rapidly becoming a traffic nightmare.

I saw that over the Jazz Festival weekend a map was widely circulated showing Cabriere Street as an alternative route for Main Street traffic.

This was never implemented, but experience shows indicates a possible or maybe likely future plan.

It's problematic for a number of reasons, among them that if there was prior consultation on the plan, that was never widely publicised. Second, the road isn't designed as an alternative for high street traffic.

In any event, Cabriere St is already overburdened with overflow traffic. What was a quiet side lane now carries a lot of traffic. The four way stop at the corner with Kruger/Annemarie is seldom respected and daily we see vehicles racing through without slowing (let alone stopping). There is no street side parking for visitors. Traffic to Mont Rochelle and to and from Pick n Pay overburdens the street. At times it's difficult to enter one's own property.

Once the road is used temporarily for overflow, from past experience the municipality will gradually let it become a default.

Subject: [EX] Serruria Park Upgrades

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi

I would like to please submit a request for the upgrade of Serruria Park.

It is a lovely large park space but could do with some upgrades. I would be happy to work with someone to determine the best design and outcome for the space but requests would include:

- planting additional trees to provide more shade in summer
- removing the devil thorns from the grass
- additional jungle gym - probably a wooden one so that it is also suitable for younger kids (2 years +). Wooden jungle gyms work well as they are safe for younger kids but also suitable for older ones.
- an obstacle course set up would work well too - using natural elemetns like logs, stepping stumps
- a bike track (similar to that at Dalsig park)
- if possible to fence off a small section of the park where the playground is so that it is safe for the children and they can't run onto the road
- Picnic table & bench

thanks
Ashleigh

INPUT TO DRAFT STELLENBOSCH MUNICIPAL ZONING SCHEME BY-LAW 2025

We, the registered owners of Erf 15794, Technopark, Stellenbosch, through the Jan Jooste Familie Trust (in the process of transferring the property to 1 Technopark (Pty) Ltd), respectfully submit this motivation for amendment to the proposed zoning scheme, updating the zoning regulations of Technopark to allow the inclusion of residential use developments within the Technopark Area Overlay Zone.

The Original Vision of Technopark

Technopark was inspired by Taiwan's Hsinchu Science Park, visited in the late 1970's by Prof. Christo Viljoen, then Vice-Dean of Engineering at Stellenbosch University. Hsinchu became Taiwan's "Silicon Valley" a hub for semiconductors, optoelectronics, Communications Technology (ICT) and biotechnology. Professor Viljoen was passionate about electronics, and he also lectured to the author of this document in the 1970's when he studied Electrical and Electronic Engineering at the University.

Importantly Hsinchu Science Park developed not only as a place of work, but also as a community with housing, services, and recreation, which ensured both productivity and quality of life for its workforce.

When Technopark was established in 1985, the vision was similar: a center for research, development, and innovation in electronics and related technologies. However, in its early years, the Information and Communications Technology (ICT) sector in South Africa was still small, and growth was slow. To keep activity alive, the Municipality allowed non-technology businesses to settle in the park. In 1996, Technopark was formally zoned as "Special Zone 1." These regulations have remained essentially unchanged for 29 years, despite major changes in the global economy and the local business environment.

The Reality of Technopark Today

Technopark has grown into a general business and office park, rather than a dedicated science park. Today it hosts a wide variety of enterprises: law firms, accounting, agriculture, architecture, aviation, brokers, banking, finance, food and drink, geological services, consultants, logistics companies, educators, graphic designers, medical practitioners,

hospitality, hair and beauty, internet services, media, photography, printing, marketing and advertising, nutrition, property, software, technology, travel, recruitment and HR, and more.

Technology companies are now just one part of this diverse mix. In other words, Technopark is already functioning as a mixed-use business precinct. The original "technology only" model no longer applies, and the zoning scheme no longer reflects the real character or needs of the area.

Traffic and parking problems in Stellenbosch and Technopark

Traffic congestion and insufficient parking in Stellenbosch are already serious problems for residents and visitors. It has been widely reported that some visitors actively avoid the town because of this. In addition, there will be a new link road to Adam Tas (R310) to the south of the Protea Hotel in Technopark. The extra traffic generated by this road will make conditions at the Technopark entrance even more difficult for existing road users, especially at peak hours. The solution of building more roads does not necessarily solve the problem of congestion but rather motivates the use of more cars in the area – this is an outdated approach of solving this problem.

Initially the Municipality specified only 3 parking bays per 100 square meters of office space which was clearly not adequate. The result is that cars are now parked in public open spaces and not on private property.

With the inclusion of residential components within Technopark, one creates a more balanced, and walkable neighborhood with the following benefits: Reduced travel time to and from the workplace, improved quality of life, healthier lifestyle and social interaction with community members fostering a sense of place.

This highlights the urgent need to allow workers in Technopark to live closer to their place of work, rather than having to drive in and out every day. Residential facilities are now essential within Technopark itself.

Why Mixed Use (Including Residential) Is Needed

Around the world, successful innovation hubs are no longer just office parks. They have become live-work-play neighborhoods where people can live near where they work. This model:

- Reduces commuting time and traffic congestion.
- Improves security in Technopark by ensuring activity after hours and on weekends. Substantial amounts of money are presently spent on providing security systems in the park.

- Attracts top talent by offering a higher quality of life.
- Supports productivity, collaboration, and innovation.
- Increases property values and strengthens economic resilience.
- Builds a stronger sense of community identity in the precinct.

This is already standard practice in progressive cities worldwide. Allowing a balanced mix of residential, business, and community uses is the best way to ensure that Technopark remains competitive, attractive, and sustainable for the future.

Addressing Possible Concerns

Some may worry that residential development will undermine Technopark's "character." In reality:

- A hotel already operates within the park.
- Very little vacant land remains, which limits the scale of new development.
- Any residential projects would be limited, high-quality, and complementary to the existing business environment.

Rather than weakening Technopark's character, mixed use would strengthen it by making it more dynamic, desirable, and future-ready.

Our Proposal

We propose amendments to the proposed Zoning Scheme By-law, 2025, specifically the Local Area Overlay Zone provisions for Technopark to allow for residential components to be added to developments for a more balanced neighborhood/precinct. The proposed addition of residential components to the properties can still be regulated with specific requirements, ensuring good governance and transparency. The following amendments are proposed:

- Paragraph 5.4.2. (pg 162): The purpose of the Techno Park Local Overlay Zone is to retain the development parameters applicable to this area, and to ensure a more spatially balanced area and sense of place.
- Paragraph 5.4.4. (pg 162 and 163): To add the following paragraph to the table under Additional Uses: Flats (subject to the approval of the site development plan).
- Paragraph 5.4.4. (d) (Pg 163): Parking for business/commercial use shall be provided at four bays per 100 m Gross Leasable Area of the building, *and for residential use as provided under the standard parking provisions of the zoning scheme*

Benefits to our proposal

The regulated inclusion of the residential components to developments on our property within Technopark will contribute to the area as follows:

- An upmarket, landmark development at the park's entrance that will raise Technopark's profile and property values.
- It will attract large-scale investments within the Municipal Area by international hi-tech companies, promoting them to establish facilities for their employees to live, work and play, which is in line with the founding vision of Technopark.
- It will address the need for housing within the Municipality, close to where people work, creating a safer, healthier, and happier demographic, in line with international best practices.
- There are already between 7 500 and 8 000 workers in Technopark that will eventually rise to 10 000, putting more focus on the need for residential components.
- If not accepted, the traffic congestion and parking problems will only worsen in the area and the greater Stellenbosch.
- The establishment of a community-focused ICT training facility to support skills development particularly of young people in the area.
- Shared recreational green space, created in partnership with the Municipality, providing sports and outdoor recreation facilities for all Technopark workers and inhabitants.
- Incorporation of food-related services like a convenience food store, coffee shops, restaurants and other services like medical doctors and a pharmacy to serve the inhabitants of Technopark thus no need to travel in and out of the park to access these services.

Conclusion

Technopark is no longer the narrowly defined science park imagined in the 1980s. It has evolved into a diverse business community. To stay relevant and competitive in the 21st century, it must take the next step: becoming a modern, mixed-use precinct that combines business, innovation, housing, and recreation.

We therefore respectfully ask that Stellenbosch Municipality update the zoning scheme to allow residential components in Technopark as well as our property: Erf 15794. This provision will enhance Technopark's character, improve quality of life, and secure its future as a place of excellence and innovation.

Attached: Map of Erf 15794 (in yellow) and adjacent municipal land (in blue).

Please acknowledge receipt of this letter.

INTEGRATED PLANNING AND BUDGETING ASSESSMENT: ANALYSIS OF MUNICIPAL IDP, SDF AND BUDGET

Western Cape Government

APRIL/MAY 2026

STELLENBOSCH MUNICIPALY DIAGNOSTIC AND SUMMARY OF KEY RECOMMENDATIONS

Integrated Development & Spatial Planning	It is recommended that the Municipality: • Prioritise corrective interventions to improve wastewater quality management and finalise the waste reclaimer strategy under SFA 2; • Strengthen performance targets under SFA 3 to move achievement beyond baseline compliance towards higher impact outcomes; • Accelerate measures to address water losses and sustain water quality compliance under SFA 4; • Enhance coordination and long-term planning to manage housing demand and informal settlement growth; • Fast-track the finalisation and approval of outstanding governance instruments, including communication, sewerage, electrical and smart city plans; • Improve capital planning and expenditure monitoring to consistently meet budget targets; • Mitigate staffing and capacity constraints through targeted skills development and strategic resourcing; and • Use lessons from the 2024/25 implementation cycle to inform the development of its IDP for the next 5-year IDP Cycle.
Economic Sustainability	• Declining Capital Investment in Economic Enablers: Capital expenditure for the "Valley of Possibility" SFA is projected to decline annually. This trend risks creating infrastructure backlogs across bulk water supply, wastewater systems, roads and electricity networks, which will constrain long term economic growth and job creation. • Stagnant Economic Growth Amid Rising Unemployment**:** GDPR growth was only 0.1% in 2024, while total employment contracted by -1.3% and the unemployment rate rose to 13.8%. Without a strategic pivot toward labour-absorbing sectors and SMME support, the municipality's revenue base will remain under pressure, limiting its ability to fund sustainable service delivery. • Over-Reliance on Operational Spending at the Expense of Future Capacity**:** Over 88% of operational expenditure is consumed by "Good Governance" (running the municipality) and "Dignified Living" (basic services). With capital investment declining in real terms across most SFAs, the municipality is effectively trading off future economic resilience to address immediate social needs, a fiscally unsustainable long-term strategy.
Revenue and Expenditure	• The Municipality tabled a funded budget for the entire 2026/27 MTREF period, with no immediate risk to its financial sustainability or going-concern position. However, the Municipality must resolve misalignments between NT data strings and A-schedules to ensure a consistent and accurate reflection of the funded position. • Trading services, particularly sanitation and waste, should progressively move towards full cost recovery in line with MFMA Circular 134. This should be supported by cost of supply studies, phased tariff adjustments and improved operational efficiencies to reduce reliance on cross subsidisation from other services. • The Municipality should enhance project readiness, procurement planning and implementation capacity to improve capital spending performance. Capital investment must be aligned to delivery capability. • The Municipality should formalise and document its revenue enhancement strategy, with a targeted focus on reducing debtors over 90 days and implementing measurable interventions to reduce water losses, in order to sustain collection levels and protect revenue. • Full alignment with MFMA Section 19 and Regulation 13 be considered in the adoption of the final budget.
Capital Budget & Infrastructure	• A decline in the capital expenditure to total expenditure ratio over the MTREF has been noted. The Municipality must ensure that sufficient capital investment is maintained to support growth. • Capital spending over the past few years has been below the National Treasury norm. Continuous efforts to improve this ratio are encouraged.

SECTION 1: INTRODUCTION

The 2026 SIME assessment summarises comments by the Western Cape Government (WCG) on the draft 2026/27 MTREF Budget, Integrated Development Plan (IDP), Spatial Development Framework (SDF) and other relevant polices and documents.

The assessment covers the following key areas; conformance with the Municipal Finance Management Act 56 of 2003 (MFMA), Municipal Systems Act 32 of 2002 (MSA) and Municipal Budget and Reporting Regulations (MBRR); an integrated, spatial and environmental planning analysis of the IDP and SDF and the responsiveness, credibility and sustainability of the tabled budget.

The WCG intends meeting the executives of your Municipality in May 2026, where the key findings and recommendations of this report will be presented and deliberated upon. The planned engagement will contextualise the Municipality's challenges and responses as presented in the draft budget, IDP, Local Economic Development (LED), SDF and as well as other strategic matters for discussion between the two spheres of government. All the information related to the assessment and analysis of the draft annual budget, IDP and SDF is found in the report below.

SECTION 2: INTEGRATED PLANNING

2.1 Integrated Development Planning

The Municipal Systems Act 32 of 2000 (MSA) requires every municipal council to review its Integrated Development Plan (IDP) annually, based on an assessment of its performance measurements, and to the extent that changing circumstances demand. The MSA further provides that a municipal council may amend its IDP by following the prescribed process set out in Regulation 3 of the Local Government: Municipal Planning and Performance Management Regulations, 2001 (MSA Regulations).

In compliance with these provisions, the Stellenbosch Municipality (the Municipality) conducted the annual review of its IDP during the 2025/26 financial year. This represents the fourth and final review of the 2022 – 2027 IDP, and the Municipality resolved to adopt a reviewed IDP in May 2026.

2.1.1 IDP Compliance

The core components of an IDP are outlined in Section 26 of the MSA and Regulation 2 of the MSA Regulations. Sections 28 and 29 of the MSA require municipalities to adhere to an established process when reviewing or amending their IDPs. The compliance of the reviewed IDP with legislative requirements and the process followed were assessed using a compliance checklist. The assessment was shared and discussed with the Municipality.

2.2 IDP Implementation

Section 41 of the MSA provides for a municipality to, in accordance with its performance management system, set performance measures with regard to its development priorities and objectives set out in the IDP. In addition, Section 41 provides for the monitoring of performance, measuring and reviewing performance at least once per year, implementing steps to improve performance, and setting up a regular reporting system.

Following the assessment of the Municipality's implementation of the IDP as part of the 2024/25 IDP assessment process, this section reflects on whether previously identified implementation risks have been addressed. For the assessment, the DLG has consulted the statutory reporting documents of the Municipality, including the 2024/25 Annual Report, the Section 72 Report, and the 2025/26 Technical Integrated Municipal Engagement (TIME) Report. The Municipality is encouraged to take these analyses into account to address identified shortcomings over the remainder of the term of office and to inform planning processes for the upcoming 2027 -2032 IDP cycle.

To enable a direct year-on-year comparability, the analysis is structured in accordance with the Municipality's five Strategic Focus Areas (SFAs) as set out in Section 3.2 of the IDP, which remained unchanged. The assessment further reflects on whether the implementation risks identified per SFA during the 2025 IDP assessment cycle have been adequately addressed through subsequent performance and implementation. Last year, it was found that the Municipality's performance challenges are concentrated within SFA 2 and SFA 5, while SFA 4 also reflected areas of concern (for completeness, all the SFAs will, however, be alluded to, but with the main focus on SFA's 2, 4 and 5).

Strategic Focus Area 1:

- Implementation under this SFA focuses firstly on the provision of services to citizens and how these can facilitate development and job creation. Secondly, on the internal workings of the Municipality and how procurements provide opportunities for enterprise development. Lastly, it is about efficient infrastructure fulfilling the needs of citizens. The 2024/25 Annual Report confirms that the Municipality again achieved all of its key performance indicators (KPIs) for this SFA (with 60 per cent well or extremely well met), which demonstrates a stable performance trajectory.

Strategic Focus Area 2:

- Several dimensions of the environment and its management fall under this SFA, including the fact that the natural environment underpins the important tourism and agricultural sectors. Also, the citizens live their lives in geographic spaces that impact people's access to opportunities. The 2024/25 Annual Report reflects stable performance in that 75 per cent of the KPIs for this SFA were again met (with 25 per cent well or extremely well met). KPIs not met include those for wastewater quality and the submission of a waste reclaimer strategy. Wastewater quality was also raised as a risk in the 2025 assessment, whilst the submission of a waste reclaimer strategy is a new KPI. There is room for improvement under this SFA.

Strategic Focus Area 3:

- This SFA is about safety and law-abiding behaviour. It is further about assets not being vandalised. Safety underpins the Municipality's economic and social development strategies. The 2024/25 Annual Report confirms that the Municipality again achieved all of its key performance indicators for this SFA. All of these were met with none of the KPIs falling into the well or extremely well met categories, which indicates there is room for further improvement.

Strategic Focus Area 4:

- This SFA is about dignified living in that all residents must have access to shelter, ethical administration of municipal housing, and a sufficient choice in housing opportunities. This SFA continues to experience pressure, particularly in relation to housing demand, informal settlement growth and pressure on services. Performance for this SFA decreased from 91.67 per cent in 2023/24 to 83.34 per cent in 2024/25. The 2024/25 Annual Report reflects that the KPI for water quality were not met by a small margin, as well as those for water losses (unaccounted water). The latter was identified as a risk in the 2025 assessment.
- While the risks identified in 2025 have not been eliminated, the municipality has strengthened mitigation mechanisms and delivery sequencing. Furthermore, it should be noted that at mid-year in 2025/26, nine out of the twelve KPIs for this SFA were met.

Strategic Focus Area 5:

- This SFA is about governance, financial management and institutional performance. Whilst the Municipality achieved a clean audit outcome, which demonstrated strong revenue management and maintained effective performance management systems, the 2024/25 Annual Report reflects that performance for this SFA dropped from 84.21 per cent to 73.69 per cent. KPIs not met include the submission of a revised communication policy, revised sewerage master plan, revised electrical masterplan and a draft smart city framework. The target for capital expenditure was also not met, albeit by a very small margin.

A year-on-year review indicates that overall organisational performance increased from 82.6 per cent in 2022/23 to 87.23 per cent in 2023/24, followed by a reduction to 80.25 per cent in 2024/25. Although overall performance declined in percentage terms during 2024/25, the underlying evidence confirms strong governance, financial viability and consistent service delivery outcomes, with 90.1 per cent of capital budget spent. The reduced percentage reflects the impact of external pressures (including staffing constraints, climate-related events and heightened safety challenges) and a stricter performance measurement environment rather than systemic implementation failure. The municipality has adequately addressed many of the implementation risks identified during the 2025 assessment cycle and retains an implementable, fundable and strategically coherent IDP.

2.3 Key findings and recommendations

2.3.1 Key Findings

Based on the above assessment, below is a summary of key findings:

- Strong overall governance and financial management evidenced by clean audit outcomes and high capital budget expenditure.
- Stable and strong performance under Strategic Focus Area (SFA) 1, with all KPIs achieved.
- SFA 2 shows stable but uneven performance, with persistent challenges in wastewater quality and delays in developing a waste reclaimer strategy.
- All KPIs under SFA 3 were achieved, though none exceeded performance expectations, indicating scope for improvement.
- SFA 4 continues to experience pressure due to housing demand, informal settlement growth, and service delivery constraints, with declining KPI performance. Water quality and water loss KPIs were not fully met, remaining a recurring implementation risk.
- Performance under SFA 5 declined, with delays in revising key strategic policies and master plans.
- Overall organisational performance declined in 2024/25 compared to the previous year, largely due to external pressures.

2.3.2 Recommendations

It is recommended that the Municipality:

- Prioritise corrective interventions to improve wastewater quality management and finalise the waste reclaimer strategy under SFA 2;
- Strengthen performance targets under SFA 3 to move achievement beyond baseline compliance towards higher impact outcomes;
- Accelerate measures to address water losses and sustain water quality compliance under SFA 4;
- Enhance coordination and long-term planning to manage housing demand and informal settlement growth;
- Fast-track the finalisation and approval of outstanding governance instruments, including communication, sewerage, electrical and smart city plans;
- Improve capital planning and expenditure monitoring to consistently meet budget targets;
- Mitigate staffing and capacity constraints through targeted skills development and strategic resourcing.; and
- Use lessons from the 2024/25 implementation cycle to inform the development of its IDP for the next 5-year IDP Cycle.

2.4 Environmental and Planning Analysis

2.4.1 Spatial Performance

- The DEA&DP utilises a comprehensive index framework to monitor spatial performance across all districts, tracking shifts in human welfare, liveability, and environmental systems. This data-driven, indicator-led approach serves as a critical decision-making tool to advance the Provincial and Departmental Strategic Plans' spatial transformation goals while strengthening governance through evidence-based research and growth analysis.

- The Municipality exhibits strong overall spatial performance, contributing also to the District's overall strong performance where human welfare, natural systems efficiency and growth potential reinforce one another. Whilst Stellenbosch notably achieve high Human Welfare/Equitable, and Liveability Outcomes, uniform distribution of broad access to social services, economic opportunity, and high-quality living environments reflected at municipal wide scale are not necessarily equally distributed. Building on the strong foundations, the Municipality could build on the strong Built Environment System performance, well-developed infrastructure, agglomeration economies, and employment concentration, to support equal distribution of spatial advantage and prosperity. Supported by robust Socio-economic systems linked to income, education and health, overall contribution to continued very high growth potential, which continues over the next 5-year IDP cycle. In 2018, the overall Growth Potential for Stellenbosch showed improvement and the overall measured potential ranked 1st overall, and in the high growth potential category. The updated Growth Potential report (GPS 24) will become available for distribution early in May 2026 for consideration in the final IDP.
- The overall spatial performance for Stellenbosch highlights the importance of leveraging the Municipal Spatial Development Framework (MSDF) and Capital Expenditure Framework (CEF) to ensure that infrastructure investment, and programmes in the municipality improve further on strong foundations that exists, and delivers equal access to basic services, economic opportunities, and quality living environments across. This includes leveraging inclusionary housing and a vibrant housing market further. Focus should also be on addressing some vulnerabilities observed in the built environment system, and mounting pressure on natural resources highlights the importance to leveraging ecological infrastructure, and importantly, giving effect to Climate Change responsiveness.

2.4.2 Assessment of Strategic Planning and Environmental Pressures and Risks

- The purpose of this assessment is to evaluate the extent to which municipal planning and budgeting instruments are aligned to give practical effect to the municipality's spatial vision and development trajectory. In particular, it seeks to determine whether the draft IDP and MTREF reflect and implement the spatial priorities set out in the MSDF and, where applicable, the CEF, so that investment decisions are directed in a manner that supports spatial transformation, restructuring and more efficient urban form. The assessment focuses on whether municipalities are moving beyond policy intent toward plan-led budgeting and implementation, where spatial plans inform capital allocation, infrastructure sequencing and development outcomes. In doing so, it aims to identify gaps between spatial planning and budgeting, highlight areas requiring municipal action, and support a more deliberate translation of spatial strategies into funded, implementable programmes that advance inclusive, well-located and sustainable human settlements.
- This approach enables a clear theory of change for spatial transformation. Spatial plans, on their own, do not change spatial outcomes, they must shape where and how public investment is directed. When MSDF priorities are translated into a prioritised capital investment pipeline, and that pipeline is reflected in the MTREF and annual budgets, infrastructure and service delivery begin to reinforce the intended spatial structure. Over time, this shifts growth toward priority nodes and corridors, improves access to well-located land and opportunities, and reduces inefficient and fragmented development patterns. Without this link between planning and budgeting, spatial transformation remains aspirational rather than implementable.

2.4.2.1 Municipal Spatial Development Framework Performance Review

- Stellenbosch Municipality has provided evidence in its Draft 4th Review IDP (March 2026) that annual reviews of the amended 2023 IDP/MSDF/CEF are being undertaken as part of the IDP review process, including a second annual MSDF review for the 2025/26 cycle focused on implementation monitoring and a forthcoming third annual review report. The review framework is conceptually sound and addresses the correct Section 34(a) tests, including implementation, sector alignment, budgeting, development approvals and amendment triggers. However, the uploaded documents do not include

a standalone annual MSDF review report with a sufficiently robust indicator-based scorecard, spatial budgeting analysis or formal trigger register, which weakens the municipality's ability to demonstrate implementation progress and planning-budget alignment in a rigorous way. Key spatial issues requiring municipal action to remain ecological and agricultural resource protection, climate and water resilience, urban growth pressure, inequality, housing and service backlogs, and the need to direct infrastructure investment more demonstrably toward MSDF priority development areas and priority local planning areas such as Klapmuts, Koelenhof and Dwarsrivier Valley.

Recommendations

It is recommended that the Municipality:

- Institutionalise the MSDF Performance Review across IDP cycles:
  - While a structured MSDF Annual Review Report has previously been prepared, the municipality should ensure that a standalone, consistently formatted MSDF Performance Review Report is produced and included in every IDP performance review cycle, including the 2026 process, to strengthen compliance with Section 34(a) and improve transparency.
- Introduce a standardised, indicator-based scorecard:
  - Build on the existing review methodology by incorporating a core set of measurable indicators to track implementation, including infrastructure delivery, housing outcomes and alignment of development approvals with the MSDF, with year-on-year comparison.
- Strengthen spatial budgeting alignment:
  - Ensure that future MSDF performance reviews include a clear spatial analysis of capital expenditure, demonstrating the extent to which investment is directed toward MSDF priority development areas.
- Formalise the amendment trigger system:
  - Consolidate the existing narrative discussion of amendment triggers into a formal trigger register, clearly identifying thresholds, trends and decision points for MSDF amendment.
- Track investment in priority development areas:
  - Introduce a place-based investment tracking mechanism within the MSDF performance review framework to monitor capital investment and track implementation progress.
- Strengthen integration across planning instruments:
  - Use the MSDF performance review to demonstrate clear alignment between the MSDF, IDP, CEF and MTREF, supported by a simple alignment matrix linking spatial priorities to projects and budgets.

2.4.2.2 Capital Expenditure Framework and Alignment of Budget with MSDF Priorities

- Stellenbosch Municipality is clearly using its Capital Expenditure Framework (CEF) as part of an integrated strategic, spatial and financial planning approach, and the draft IDP and 2026/27 MTREF explicitly position the CEF as a mechanism to align infrastructure investment with the MSDF, settlement hierarchy and priority development areas.
- The CEF is therefore reflected in the municipality's policy and budgeting framework at a strategic level. However, the draft capital budget is not consistently spatially referenced by settlement, node, corridor, priority development area or CEF phase in its detailed schedules, which limits the ability to robustly test whether budget allocations fully implement the MSDF's spatial priorities and CEF investment logic on a project-by-project basis.

- On the evidence available, there is explicit strategic alignment and partial implicit budget alignment, but not enough systematic spatial detail in the capital tables to verify alignment comprehensively or to assess phasing rigorously across the full programme. It would appear that there is no clear contradiction between the budget and the MSDF, but stronger spatial referencing and project-level reconciliation are required to demonstrate this with confidence.

Recommendations

It is recommended that the Municipality:

- Include a spatial capital budget matrix, mapping each capital project (where possible) to its settlement, corridor or node, relevant MSDF priority area, and CEF prioritisation category, in the final versions of the IDP and MTREF.

2.4.2.3 Incremental Upgrading of Informal Settlements

- The Stellenbosch MSDF (2023), through its appended Housing Pipeline, spatially identifies specific settlements and projects for formalisation, upgrading and implementation, including Klapmuts La Rochelle, Langrug, Kayamandi Town Centre, Zone O, Enkanini and Watergang, and links several of these to phased delivery and subsidy instruments such as ISUPG and UISP. The draft IDP further operationalises this agenda through a housing pipeline and broad upgrading objectives, while the CEF and budget scenario include named informal-settlement-related projects such as ISSP Kayamandi, Klapmuts Emergency Housing, access to basic services and Langrug engineering services.
- However, while the MSDF demonstrates substantive intent and a project-level response to informal settlement upgrading, it does not explicitly identify or designate "incremental upgrading areas" within the MSDF itself in the manner envisaged by Section 21(k) of SPLUMA. The identification of upgrading interventions is primarily located within the appended Housing Pipeline rather than being translated into a distinct spatial category or mapped layer in the main MSDF. This reflects a partial gap between policy intent and spatial articulation, where upgrading is addressed programmatically rather than as a clearly defined spatial structuring element of the MSDF.
- In addition, the draft MTREF does not present a single, consolidated, settlement-based upgrading budget with clear annual outputs, and some formal budget tables contain generic headings for upgrading without populated amounts. While several upgrading-related projects are identifiable, the linkage between spatially identified upgrading areas and fully transparent three-year budget commitments remains only partly clear. This limits the ability to robustly assess implementation pace, sequencing and proportionality relative to the scale of need.
- The municipality demonstrates a substantive policy and project pipeline response to Section 21(k) of SPLUMA, but the spatial expression of upgrading areas and the alignment between the MSDF, IDP, CEF and MTREF require strengthening to support effective implementation and monitoring.

Recommendations

It is recommended that the Municipality:

- In the next iteration of the MSDF should explicitly identify and map "incremental upgrading areas" in the MSDF, clearly linked to settlement-specific upgrading approaches, service level trajectories and tenure pathways, in line with Section 21(k) of SPLUMA.
- In parallel, the IDP and MTREF should consolidate all upgrading initiatives into a single, settlement-based programme in which each upgrading area identified in the MSDF and the Housing Pipeline, is matched to a clearly costed three-year budget allocation, defined annual household or site targets, service-level milestones, and associated tenure or formalisation actions. (This will strengthen the alignment between spatial planning and budgeting and enable more robust monitoring of implementation progress.)

2.4.2.4 Inclusionary and Affordable Housing Policy Responsive and Use of Housing Market Evidence

- While the 2023 Stellenbosch MSDF reflects the broad spatial implications of the 2022 Housing Market Study, in particular its emphasis on compact growth, densification and well-located mixed-income development, it does not systematically incorporate the Study's detailed affordability analysis and quantified housing gaps into its spatial proposals, policies or implementation mechanisms. Similarly, the Draft IDP does not explicitly reflect this evidence base, resulting in only partial translation of market analysis into planning and delivery responses. Notwithstanding this, Stellenbosch Municipality has led through the adoption of an Inclusionary Zoning Policy. The Inclusionary Zoning Policy is however, as the title suggests primarily focused on private sector delivery and does not constitute a comprehensive affordable housing strategy.

Recommendations

It is recommended that the Municipality:

- In the next iteration of the MSDF should explicitly integrate the findings of the latest Housing Market Study (2025), including affordability thresholds and spatial demand patterns, and translate these into clear spatial priorities, housing targets and infrastructure requirements.
- Develop a comprehensive Affordable Housing Strategy that extends beyond inclusionary housing to address public land release, infrastructure prioritisation, subsidy alignment and project pipeline development, and ensure that the IDP, CEF and MTREF demonstrate clear alignment by linking affordable housing interventions to specific spatial priority areas, defined outputs, phasing and budget allocations.

2.4.3 Climate Change Resilience

- During 2025/26, Municipalities continue to experience the impact of climate-linked extreme weather events like extreme heat, extensive veld fires and flooding across the province.
- Climate change, however, should not be seen only in a negative light and as a disaster management issue but also from an opportunity perspective. While extreme weather events are important to plan for, municipalities also need to consider longer-term and less visible impacts. Conditions like extended fire seasons, persistent water security concerns as well as coastal erosion impact significantly on municipal resources and increasingly do so in the near future.
- The most effective way to deal with these impacts is to shift from disaster response to proactive risk reduction, or what is referred to as climate change resilience. As indicated, resilience is a key focus of the WCSDF and revolves around reducing existing and structural vulnerabilities that make communities, economic activities, systems and infrastructure sensitive to climate related threats. This could include economic impacts such as reduced demand for our carbon-intensive products, and how climate change will gradually affect land use, infrastructure, and settlement patterns over time.

Key recommendations for integration of climate change considerations into the operations of the Municipality are:

- **Risk Assessments:** The assessment of risks to municipal operations and services, including but not limited to disaster risks, is already well-entrenched as mechanism to ensure accountability, responsible investment and change management. The same mechanism should recognise the short- and long-term risks exacerbated by changing climatic conditions and accordingly inform and direct municipal planning and spending.
- **Communication and Awareness:** Surveys indicate poor climate change awareness in the Western Cape. This likely inhibits the rate of behaviour change towards climate responses and decisions. WCG is working towards consolidated climate change messaging and encourages Municipalities to do the same within

their communications and environmental education spheres. A recently launched WCG resource for climate change related communication materials can be accessed here: https://museumstories.co.za/climate-change/

- **Focus on vulnerability:** There are many resources available to assess vulnerability to climate related stresses. These should be accessed to guide municipal planning and interventions to areas or situations where exposure to physical, economic or well-being threats are the greatest. DEA&DP can assist municipalities in many of these aspects.
- **Focus on Energy Resilience:** There are opportunities for municipalities to improve energy resilience within their operations and for their customers through promotion of energy efficiency and renewable energy opportunities at both the small and large scale.
- With improved energy resilience, the Western Cape will be able to manage energy-related disasters (including loadshedding) more effectively and work towards a more secure, decarbonised and sustainable energy system for the Western Cape. A number of WCG departments, including DEA&DP, DoTP through the Energy Resilience Programme and DoI, can assist municipalities in implementing interventions that support energy resilience.
- Municipal officials must remain aware of the prescripts of the Climate Change Act, especially those related to the compilation of Climate Change Needs and Response Assessments for District Municipalities. Although the obligations are currently deferred, the Department of Forestry, Fisheries and the Environment (DFFE) is developing guidelines to support its development and implementation. The WCG's Climate Change Directorate is assisting Districts with pre-emptive work on revised climate change response plans and encourages broad collaboration between the Districts and Local Municipalities as well as participation by technical departments within municipalities to ensure effective mainstreaming of climate change responsiveness.

2.4.4 Environmental Quality

- Adoption of the Western Cape Provincial Biodiversity Strategy and Action Plan 2025 – 2030
  - The Provincial Biodiversity Strategy and Action Plan is the strategic umbrella for coordinated action across government as well as civil society and business, with explicit alignment with both national and international biodiversity aspirations and agreed upon targets. Municipalities play a vital role in the achievement of these biodiversity targets and should take note of this recent adoption in relation to their own strategies and biodiversity management targets.
- Ecological Infrastructure Investment Framework and Plans
  - Ecological infrastructure entails naturally functioning ecosystems that provide services to people and the economy. When ecological infrastructure functions correctly, it supports municipal service delivery by providing reliable, good-quality raw water supply, disaster risk reduction (especially protection against wildfire risks and inland/coastal flooding) and climate regulation, etc.
- Municipalities are encouraged to include ecological infrastructure into strategic plans and budgets. Some practical steps include:
  - Incorporate the Western Cape Biodiversity Spatial Plan (WCBSP 2023) outcomes into MSDFs. Where appropriate, ensure alignment with Municipal Land Use Schemes by assigning the correct zoning to secure protection of ecological infrastructure and incorporating these areas as part of a wider municipal open space system;
  - Incorporate ecological infrastructure as part of asset management plans and budgets;

- Draft and secure approval for strategic Maintenance Management Plans to ensure compliance with legislation; and
- Collaborate with other stakeholders by participating in programmes such as Working for Water, Working for Wetlands, Boland Groot Winterhoek Collective, Outeniqua to Tsitsikamma Water Working Group, etc.

- To guide municipalities in investing in Ecological Infrastructure, the Western Cape Government developed the Western Cape Ecological Infrastructure Investment Framework. Guiding materials and examples are also available from the DEA&DP. Municipalities are urged to tailor ecological infrastructure investment to their local context as a complementary strategy to enhance service delivery and human wellbeing within their administrative domains. When designed carefully, these strategies could be used to attract external funding and boost service delivery effectiveness.
    - Ecological Infrastructure Management Programmes are currently being developed by municipalities in the Western Cape, and a dedicated programme to roll out these EIMPrs within strategically important municipalities will be undertaken over the Medium-Term Expenditure Framework.

2.4.5 Waste Management

- Over the past five years, Stellenbosch Municipality has demonstrated a robust commitment to modernizing its waste management framework, transitioning from basic disposal toward a more circular economy model. The following narrative summarizes the municipality's performance and strategic trajectory from 2021 to 2026.

2.4.5.1 Incremental Upgrading of Informal Settlements

Operational Performance and diversion

- Stellenbosch has solidified its operational foundation by ensuring all three primary waste activities are actively reporting through the **Integrated Pollutant and Waste Information System (IPWIS)**. A critical component of this success is the integration of weighbridge technology across disposal, diversion, and recovery activities, providing the data accuracy necessary for high-level oversight.
- In the 2024 calendar year, the municipality handled a total waste stream that saw **51 411 tonnes** sent to disposal, while successfully diverting **17 202 tonnes**-achieving a commendable **25 per cent diversion rate**. Key drivers of this performance include:
    - **Beneficiation Initiatives:** The municipality has turned construction and demolition (C&D) waste into a resource, selling materials back to the construction industry and utilizing builder's rubble for landfill cover.
    - **Public Participation:** Through a partnership with a private service provider, the municipality has scaled up its waste awareness strategy. This includes the distribution of recycling bags and brochures, closely linked to the operations of the **Material Recovery Facility (MRF)**.
    - **Organic Waste Management:** With the 2021 adoption of the Organic Waste Diversion Plan (OWDP), the municipality has begun the systemic shift of organic matter away from landfills, supported by ongoing annual reviews.

2.4.5.2 Strategic Planning and Governance

- The governance of waste in Stellenbosch reached a significant milestone in **February 2021** with the formal designation of a Waste Management Officer (WMO). This appointment provided the leadership necessary to steer the municipality through the development of its **4th Generation Integrated Waste Management Plan (IWMP) for 2024 – 2029**.
- While the IWMP is fully endorsed by the DEA&DP and its projects are integrated into the broader **Integrated Development Plan (IDP)**, the municipality's strategic maturity is evidenced by its regulatory alignment. The municipal waste by-law, promulgated in 2021, is now fully harmonized with the **National Environmental Management: Waste Act (NEM:WA)**. However, while the "playbook" is modern and compliant, administrative consistency remains an area for refinement-specifically regarding the formal submission of council resolutions and annual reports to provincial authorities.

2.4.5.3 Key Challenges and compliance

- On the ground, Stellenbosch's facilities maintain a high standard of regulatory health. The **Klapmuts Waste Transfer Station** leads with a **96 per cent compliance status**, followed closely by the **Devon Valley Waste Disposal Facility at 92.42 per cent**. A major victory for long-term provincial planning was the recent activation of **Cell 4A** at Devon Valley; once the subsequent cells (4B and 4C) are completed, the municipality will have secured an additional **20 years of landfill lifespan**.

  Despite these strengths, the municipality faces specific hurdles:

  - **Reporting Gaps:** There is a persistent need to formalize the submission of annual NEMWA reports and council resolutions to the DEA&DP to ensure the administrative record matches the operational success.
  - **Innovation in Green Waste:** Current efforts are heavily reliant on shredding. To meet future sustainability targets, the municipality is encouraged to explore more innovative beneficiation methods for green waste.
  - **Implementation Evidence:** While the Organic Waste Diversion Plan is ambitious, provincial oversight has noted a lack of documented evidence regarding the implementation status of its specific interventions.
  - **Summary Outlook:** Stellenbosch Municipality is operating from a position of strength with high facility compliance and a clear strategic map. By tightening administrative reporting and injecting innovation into green waste processing, the municipality is well-positioned to exceed its current 25 per cent diversion milestone.

2.4.5.4 Western Cape Integrated Waste Management Plan 2027 – 2032 & Budget Facility for Infrastructure

The Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) has launched a strategic **R3.1 billion** initiative under the Budget Facility for Infrastructure (BFI). This program is designed to systematically modernize waste management across the province's municipalities by transitioning from traditional disposal to a resource-recovery model.

Core Strategic Pillars:

- **Infrastructure Backlog & Lifecycle Planning:** The initiative targets a **R3.1 billion** funding gap. Crucially, it shifts the planning burden onto municipalities to account for **full lifecycle costs**-ensuring that facilities are not just built but are financially sustainable over their entire operational life.
- **Green Initiatives & Circularity:** The strategy pivots toward aggressive sustainability targets, specifically **organic waste diversion** (aiming for 100 per cent diversion by 2027), large-scale recycling, and the development of **waste-to-energy** technologies.

- **Integration with Provincial Growth:** This waste-specific funding is a vital subset of the **R132 billion long-term infrastructure pipeline** announced in April 2026. It positions waste management as a "catalytic" sector for economic growth rather than just a basic service.
- **Priority Projects:** Immediate implementation is focused on regionalization, such as the **Karwyderskraal Regional Landfill Facility expansion** (specifically Cell 5A), which serves as a blueprint for shared municipal infrastructure.
- **Alternative and Blended Finance (ABF):** To circumvent national fiscal limitations, the province is utilizing the **ABF Framework**. This model leverages public funds to de-risk projects, attracting private sector investment to ensure long-term capital stability.

The BFI initiative serves as the primary financial engine for the 4th Generation Western Cape Integrated Waste Management Plan (WCIWMP) 2027 – 2032.

- **Strategic Alignment:** While the WCIWMP sets the regulatory and policy targets (the "what"), the BFI application provides the capital (the "how"). The plan explicitly incorporates the R3.1 billion backlog data into its **Phase 1 Situational Analysis**, which was finalized in early 2026.
- **Implementation Progress:** As of April 2026, the transition from Phase 1 to **Phase 2 (Implementation Plan)** is underway. The progress is currently focused on "bankable" project preparation, ensuring that municipal projects meet the technical and financial criteria required by the BFI and the Blended Finance Framework.

SECTION 3: ECONOMIC AND FINANCIAL SUSTAINABILITY

3.1 Introduction

This section provides an assessment of key indicators related to the responsiveness, credibility and sustainability of the tabled budget.

Key to assessing the above criteria is the alignment of the Municipality's budget to its strategic objectives, where if there are gaps identified, recommendations will be provided considering the budget responsiveness to the municipal area's current socio-economic context and challenges.

The revenue and expenditure analysis and risks section provide a gap analysis with regard to trading services, analysing the credibility and tariff structure of the Municipality's budget.

As capital infrastructure development is a key catalyst for economic growth and sustainability, the Municipality's capital funding mix, capital budget implementation and procurement planning assessment are also critical to understand the municipal area's growth trajectory.

3.2 Sustainable Economic Development

3.2.1 Socio-economic context

Table 1 Socio-economic indicators

Population ('26,'27,'28)	Population Growth Rate ('26,'27,'28)	Poverty (GDPR Per Capita) ('14,'20,'24)	Poverty (Headcount Rate- LBPL Trend) ('14,'19,'24)	Education (Matric Pass Rate) ('22,'23,'24)	Health (Malnutrition Rate) ('22/'23, '23/'24, '24/'25)	Crime (Drug Related) ('22,'23,'24)	Population ('26,'27,'28)
216125	2.4%	R87 833.51	41.0%	84.7%	1.6%	1233	216125
220086	1.8%	R77 609.30	53.0%	80.2%	1.3%	1474	220086
224068	1.8%	R78 991.96	50.3%	88.0%	1.3%	1464	224068

MUNICIPAL GDPR (CURRENT PRICES) AND EMPLOYMENT, Stellenbosch, 2024		
Total GDPR	**R25.2 billion**	
GDPR growth 2023 - 2024	0.1%	
Stellenbosch contribution to Cape Winelands GDPR	24.0%	
Stellenbosch contribution to Western Cape GDPR	2.7%	
Total employment	**77.504**	
Employment growth 2023 - 2024	-1.3%	
Stellenbosch contribution to Cape Winelands employment	19.8%	
Stellenbosch contribution to Western Cape employment	3.0%	
Formal employment	76.9%	
Informal employment	23.1%	

MUNICIPAL GDPR (CURRENT PRICES) AND EMPLOYMENT, Stellenbosch, 2024		
Employment profile	**2023**	
Unemployment rate	13.6%	
Labour force participation rate	67.6%	
Labour absorption rate (employment-to-population ratio)	58.4%	
Not economically active proportion of working-age population	32.4%	
GDPR growth forecast		
2025	0.3%	F
2026	0.8%	F

F denotes forecast

- Over the 2026 – 2028 period, Stellenbosch's population is projected to grow steadily from 216 125 to 224 068, though the growth rate slows from 2.4 per cent to 1.8 per cent. However, economic prosperity as measured by GDPR per capita has weakened sharply-falling from R87 834 in 2014 to R78 992 in 2024 - while the poverty headcount rate rose from 41.0 per cent to 50.3 per cent over the same period.
- These trends signal that despite a growing population, average incomes are declining and more residents are falling below the lower-bound poverty line, creating a more vulnerable local economy.
- At the same time, the matric pass rate improved from 80.2 per cent (2023) to 88.0 per cent (2024), offering a potential long-term human capital dividend, but malnutrition rates remain stuck at 1.3 per cent, and drug-related crime-though down slightly from 1 474 (2023) to 1 464 (2024)-stays at alarmingly high levels, indicating persistent social distress.
- The municipal economy shows clear signs of sluggishness (in sync with national and provincial growth trajectories). Total GDPR reached R25.2 billion in 2024, but annual growth was just 0.1 per cent, with forecasts only marginally improving to 0.8 per cent by 2026. Stellenbosch contributes 24 per cent of the Cape Winelands' GDPR and 2.7 per cent of the Western Cape's, but employment contracted by -1.3 per cent in 2023 - 2024, with total jobs at 77 504.
- The unemployment rate sits at 13.6 per cent, while informal employment makes up 23.1 per cent of all work, a high share that often indicates inadequate formal job creation. Labour absorption stands at 58.4 per cent, meaning over 40 per cent of working-age adults are either unemployed or not economically active, putting pressure on municipal service delivery as more households depend on social support or under-the-radar economic activity.
- For economic growth and service delivery, these trends imply a narrowing tax base relative to needs. Sluggish GDPR growth and rising poverty reduce own-revenue collection (e.g., property rates, service fees), yet demand for social services, safety, and health interventions increases - particularly given high drug-related crime and malnutrition.
- Without a sharp acceleration in formal employment, the municipality may struggle to maintain infrastructure and basic services. Positively, improving matric results could lift long-term productivity, but immediate pressures require targeted pro-employment investments, small business support, and integrated crime prevention. If Stellenbosch fails to reverse the decline in per capita output and job creation, service delivery gaps will likely widen, especially in lower-income wards.

3.2.2 Budget alignment to IDP Strategic Objectives

Table 2 Strategic Objectives for the 2026/27 Medium Term Revenue & Expenditure Framework

Strategic Objective	2026/27 Medium Term Revenue & Expenditure Framework OPEX				2026/27 Medium Term Revenue & Expenditure Framework CAPEX			
R thousand	Budget Year 2026/27	Budget Year 2027/28	Budget Year 2028/29	Average Annual Growth	Budget Year 2026/27	Budget Year 2027/28	Budget Year 2028/29	Average Annual Growth
Green and Sustainable Valley	5533676	7210249	5921863	3.4%	31 124	47 052	7 938	-49.5%
Valley of Possibility	113222636	116950045	121015246	3.4%	173 734	141 782	113 309	-19.2%
Dignified Living	408269232	409269021	432971980	3.0%	280 435	314 732	266 857	-2.5%
Safe Valley	219691221	232898808	247462085	6.1%	41 827	56 520	87 248	44.4%
Good Governance and Compliance	2326436645	2497431659	2668626104	7.1%	52 182	49 945	45 418	-6.7%
Total Expenditure	3 073 153	3 263 760	3 475 997	6.4%	579 302	610 030	520 771	-5.2%

Source: Stellenbosch Municipality, A-Schedules

Responsiveness to the strategic objective (table and high-level overview) - Key budget priorities in terms of IDP Strategic Objectives:

- Responsive to Community Needs: The budget directly answers the top public priorities identified in Chapter 9 of the IDP-Housing, Roads, and Safety & Security-through the dominant allocations to Dignified Living and Safe Valley.
- Vertically Aligned: The budget is consistent with national (NDP, MTDP) and provincial (WCG PSP) frameworks, particularly on job creation, safety, and housing. Local investments in the Municipal Energy Resilience (MER) project also support the Joint District and Metro Approach (JDMA).
- Mixed Real Growth: The total operational budget grows at 6.4 per cent, ahead of the 3.4 per cent inflation estimate. However, this masks significant disparities:
- Positive Real Growth: Safe Valley (6.1 per cent) and Good Governance (7.1 per cent).
- Negative Real Growth: Dignified Living (3.0 per cent) and Valley of Possibility (3.4 per cent). This erodes the real value of spending on core social services over time.
- Declining Capital Investment: Total capital expenditure is projected to fall by an average of -5.2 per cent per year. The sharpest declines are in Green and Sustainable Valley (-49.5 per cent) and Valley of Possibility (-19.2 per cent). This trend, if sustained, will create future infrastructure backlogs and hamper economic competitiveness.

Real Growth vs. Inflation:

- While the total operational budget grows at 6.4 per cent (above the 3.4 per cent inflation estimate), the picture for core mandates is mixed.
- **Positive Real Growth (above 3.4 per cent): Safe Valley (6.1 per cent)** and **Good Governance (7.1 per cent)** show strong real growth, reflecting the commitment to address safety and crime and institutional capacity. This is a positive and responsive trend.
- **Negative Real Growth (below 3.4 per cent): Valley of Possibility (3.4 per cent)** matches inflation, representing a stagnant budget in real terms. **Dignified Living (3.0 per cent)** and **Green and Sustainable Valley (3.4 per cent)** are experiencing negative real growth, which is a significant risk. Maintaining a R400m+ operational budget for Dignified Living while its real value erodes could lead to a decline in service quality for the poor.

- **CAPEX Decline:** The **-5.2 per cent AAG decline in total CAPEX**. Continued moderation in capital investment-most notably in the **Green and Sustainable Valley (-49.5 per cent)** and the **Valley of Possibility (-19.2 per cent)**-may, if sustained, place pressure on future infrastructure capacity, limit longer-term economic expansion, and slow progress toward strategic sustainability priorities such as climate resilience.

Critical Tensions & Strategic Risks:

- The analysis reveals one primary strategic tension that defines this budget:
- Present Needs vs. Future Capacity: The municipality is prioritising operational spending on Dignified Living and Safe Valley to address urgent socio-economic crises. This is fiscally and politically rational. However, it is doing so while crowding out real capital investment in economic and environmental infrastructure. This trade-off risks:

    1. Slower long-term job growth as a result of reduced investment in key economic enablers outlined in the Valley of Possibility SFA.

    2. Constraining progress on climate resilience by scaling back investment in the Green and Sustainable Valley.

Conclusion:

- Stellenbosch Municipality has produced a fiscally coherent budget that is highly responsive to its IDP and its community's most urgent demands. The budget is a model of strategic alignment at the level of stated priorities.
- The primary concern is not a lack of alignment, but a question of strategic balance.
- The declining real growth in Dignified Living and the sharp cuts to capital investment for economic and environmental sustainability suggest that the current fiscal strategy may be mortgaging the municipality's long-term prosperity and resilience to solve today's most pressing social problems.
- The key risk is that future infrastructure deficits and a lack of economic dynamism will recreate the very poverty and service backlogs the current budget seeks to eliminate.

3.2.3 Budget Responsiveness to Services, Socio-Economic Environment & Growth

Service area	Municipal challenges/risks	Budget responsiveness Budget responsiveness to services challenges/risks and the socio-economic environment Capital budget responsiveness – current need vs geared for growth
Water	• **Climate change-induced scarcity:** Projected reduction in annual rainfall (~12% by 2050) and increased evaporation, directly affecting river, dam, and groundwater systems. • **Aging infrastructure and high water losses:** Approximately one-third of water supply infrastructure is in poor condition (R300m+ backlog), with water losses at 31.2% (exceeding the 25% target) and real network losses at 17.1%. • **Dependence on external suppliers:** Reliance on the City of Cape Town for a significant portion of bulk water supply, creating vulnerability to external service disruptions and tariff increases.	• **Expenditure Lagging Behind Inflation & Risk:** The total OPEX for "Water management" is projected to grow from R178.8 million in 2025/26 to only R188.6 million by the end of the 2026/27 MTREF, an average annual growth of just **1.8%**. This is significantly below the estimated inflation rate of 3.4%. In real terms, this represents a **cut to operational capacity**. This poses a risk given the IDP's own warning (Chapter 3.11) that climate change will cause a hotter, drier climate with a projected **~12% decrease in rainfall** and a **~5% reduction in runoff**, demanding more robust management, not less. • **The "Water Distribution" OPEX budget will be cut by 6% in real terms** over the MTREF, risking an increase in the already-high 31.2% water losses. • **Strong CAPEX Focus on Current Need (Backlogs & Security):** The budget responds directly to the **R300 million+ condition backlog** (IDP, p. 186) for water infrastructure. Key projects include the **R30.9 million "Bulk Water Supply Pipe and Reservoir: Stellenbosch"** (2026/27) and the **R24.0 million "Bulk Water Supply Pipe: Cloetesville/Ida's Valley"** (2026/27). These address the failing "Asbestos Cement (AC) water reticulation pipeline assets" and improve supply security for growing residential areas. • **Geared for Growth (New Infrastructure):** The budget is strongly geared for future growth. The **R16.0 million "New Reservoir and Pipeline: Vlottenburg"** (2026/27) and the R15.9 million "Upgrading of the new Stellenbosch Reservoir" (IDP, p. 188) are clear examples of planning for population increases (2.4% annual growth, IDP, p. 30) and densification along corridors like the Adam Tas Corridor. This helps prevent future service backlogs. • The upgrade of the Idas Valley Water Treatment Plant is deferred, indicating adequate short to medium-term capacity.

Service area	Municipal challenges/risks	Budget responsiveness Budget responsiveness to services challenges/risks and the socio-economic environment Capital budget responsiveness – current need vs geared for growth
Electricity	• **Regulatory and market transition:** The shift towards purchasing electricity from multiple sources (IPPs, SSEG) requiring complete redesign of network master plans. • **Load-shedding and energy insecurity** creates economic disruption, reputational risk, and increased criminal activity (identified as a top 5 strategic risk). • **Network capacity and vandalism:** Ageing infrastructure (substations, 66kV cables) and vandalism of electrical boxes/mini-substations threaten service reliability and require substantial capital investment (R89.3m in 2026/27).	• The rapidly rising Electricity OPEX (projected +16.4% over the MTREF from R1 128.0 m to R1,405.5 m) is outpacing general inflation (3.4%), placing a direct socio-economic burden on households and businesses. • This sharp increase, driven almost certainly by higher bulk purchase costs from Eskom, will force the municipality to raise electricity tariffs significantly. For a population where 50.3% live below the poverty line, higher electricity costs will reduce real disposable income, increase household energy poverty, and raise operating costs for SMMEs, potentially slowing local job creation. • Despite the large OPEX increase, there is no budget allocation for "Nonelectric Energy" or "Street Lighting and Signal Systems" over the entire MTREF. These zero allocations ignore a critical service delivery risk. Functional street lighting is a proven tool for improving public safety and reducing crime (a top community priority from Table 98), particularly in high-density, poorer areas like Kayamandi and Cloetesville. The lack of investment will disproportionately affect the safety and security of vulnerable residents. • The following is noted in relation to alternative energy: As per SA36, R9.5 m is provided for battery storage and Solar PV projects. Also, R2.0 m for landfill gas to energy project. AS per SA37, R3.2 m is listed for hybrid inverter with battery storage. **Capital Budget Responsiveness: Current Need vs. Geared for Growth** • Capital investment in electricity is heavily skewed towards "current need" (network reliability) rather than "geared for growth" (new capacity for economic expansion). Major CAPEX items include "Switchgear Substations" (R3.5m – R20m), "Network Cable Replacements" (R3.6m – R4.4m), and "System Control Centre" (R4.8m). These are largely refurbishment and replacement projects, not the new, large-scale infrastructure required to unlock major industrial or residential development in growth nodes like Klapmuts or the Adam Tas Corridor.

Service area	Municipal challenges/risks	Budget responsiveness Budget responsiveness to services challenges/risks and the socio-economic environment Capital budget responsiveness – current need vs geared for growth
Wastewater	• Challenging infrastructure condition: A significant portion of sanitation infrastructure (Asbestos Cement and Pic Fibre sewer reticulation assets) is in poor condition, with a substantial condition backlog. • Inadequate treatment capacity and effluent quality: Wastewater Treatment Works (e.g., Klapmuts, Wemmershoek) require upgrades to increase capacity and improve effluent quality to meet license conditions. • Sewer network blockages and pollution: Illegal dumping of objects into the sewer network causes blockages, while sewerage outlets into rivers (e.g., Stiebeuel River) create environmental and health risks.	• **OPEX growth for Wastewater Management (11.2% in 2026/27) is noted.** The increase will cover rising energy and chemical costs, but the near-flat growth in outer years suggests a failure to scale up operations to tackle the R300 million asset condition backlog, increasing long-term socio-economic risk for poor communities. • **Critical Sewerage reticulation OPEX is being reduced.** After a minimal 4.5% increase in 2026/27, funding for the **Sewerage** sub-function is cut by **R15.7 million (18.3%) in 2027/28**. This directly undermines the IDP's "Dignified Living" goal, increasing the likelihood of sewer spills in densely populated informal areas. • **CAPEX is aligned towards "gear for growth" projects.** The capital budget prioritises large-scale, future-oriented projects like the **R30.3m Klapmuts WWTW upgrade** and **R36.3m Stellenbosch WWTW extension** to unlock economic development. • **Funding for maintenance of existing networks (Sewer pipe Replacement) is sluggish.** At only **R10.0 million per year**, the pipe replacement programme is dwarfed by the scale of the asbestos cement pipe backlog requiring higher responsiveness to the current needs of existing households.
Waste/ Refuse	• Landfill capacity and expansion: The need for new landfill cells is critical, with capital expenditure planned (R23m in 2027/28), but delays or funding shortfalls would create a major service delivery crisis. • Illegal dumping and environmental degradation The municipality's inability to fully control illegal dumping leads to environmental degradation, health problems, and increased clean-up costs. • Recycling programme implementation challenges: Expanding the separation-at-source recycling programme has faced contractual delays, and formalising wate pickers into an integrated system, requires a new strategy still under development.	• **OPEX Budget is Static in Real Terms, Constraining Service Expansion:** The Waste Management operational budget declines in real terms, with allocations of **R159.1m (2026/27), R166.8m (2027/28), and R164.2m (2028/29)**. This represents an average annual growth of just **1.1%**, well below the projected inflation rate of 3.4%. This is misaligned with the IDP's own diagnosis (Chapter 2) of rising illegal dumping, backlogs in informal settlements (e.g., La Rochelle, Mandela City), and the socio-economic need for waste-picker integration. • **Funding constraints of Key Operational Sub-Programmes:** The budget reveals critical underfunding for frontline services: 1. **Solid Waste Disposal (Landfill Sites)** is down from **R73.7m to R63.3m** (-14%). 2. **Street Cleaning**, essential for dignity and tourism, sees minimal growth, rising only from **R21.9m to R23.3m** over three years.

Service area	Municipal challenges/risks	Budget responsiveness Budget responsiveness to services challenges/risks and the socio-economic environment Capital budget responsiveness – current need vs geared for growth
Waste/ Refuse		• **Capital Spending Focused Entirely on Current Backlogs:** The CAPEX budget addresses immediate needs, with allocations for the **Franschhoek Major Drop-Off (R1m in 2026/27, R5m in 2027/28)** and the **Klapmuts Major Drop-Off (R7.1m in 2026/27, R2m in 2027/28)**. • These projects directly respond to community needs identified in the IDP (e.g., Ward 1's request for waste processing space, Ward 18's need for improved infrastructure). • **No Capital Investment Geared for Growth:** There are **no capital allocations for new landfill cells** beyond the current planning horizon and funding for the **Expansion of the landfill site** is only R23m in 2027/28 and zero in other year. Crucially, there is **zero capital budget for any waste-to-energy or recycling infrastructure**, which would be necessary to handle increased waste volumes from future population and economic growth.
Housing	• Land availability and cost: Property and land are inordinately expensive, unaffordable for poor and middle-income workers. The municipality does not own sufficient land in key areas (e.g., Pniel, Johannesdal, Vlottenburg) for housing development. • Increased risk of land invasions: Identified as a top 5 strategic risk (Impact 9, Likelihood 10), with legal precedents limiting the municipality's ability to evict and compromising planned housing development. • Dependence on external funding and approvals.	• **OPEX is a Standstill Budget for Housing Management.** The Housing operational budget (R84.9m in 2026/27) grows only at the inflation rate (3.4% AAG). With a poverty rate of 50.3% and a housing demand database of over 18,000 applicants (Chapter 6.10.2), this flat funding profile means the municipality's housing delivery programme is constrained. • **Capital Spending is Volatile and Project-Linked.** CAPEX for Housing fluctuates significantly from R31.2m to R46.2m, to R33.8m over the MTREF. This indicates a project-linked funding model rather than a stable, multi-year program. The sharp drop in 2028/29 creates a risk of disrupting construction momentum, which has direct negative socio-economic consequences for families awaiting homes and for local construction employment. • **Strategic Shift from RDP to Mixed-Use & GAP Housing.** The budget prioritises large catalytic projects like the **Adam Tas Corridor Precinct 10 (R28.7m)** and **Erf 7001 GAP Housing (R7.0m)** over traditional RDP projects. This is a deliberate spatial transformation strategy. The socio-economic implication is that delivery will be slower but more sustainable, creating integrated communities rather than peripheral poverty nodes. • **Informal Settlements are Under-Resourced.** The "Informal Settlements" OPEX is only R18.5m (22% of the Housing OPEX), while capital for upgrading (e.g., ISSP Kayamandi) is minimal. This is poorly matched to the scale of the challenge: **10.0% of households live in informal dwellings**, and the IDP lists 29 informal settlements requiring monitoring and upgrading. The risk is that current spending only manages, rather than reduces, informal settlements.

Service area	Municipal challenges/risks	Budget responsiveness Budget responsiveness to services challenges/risks and the socio-economic environment Capital budget responsiveness – current need vs geared for growth
Economic infrastructure	• Declining capital investment in economic enablers: Capital expenditure for the "Valle of Possibility" SFA is declining at -19.2% AAG, risking future infrastructure backlogs and constraining long-term economic growth. • Stagnant GDPR growth and rising unemployment: GDPR growth was only 0.1% in 2024, with employment contracting by -1.3% and the unemployment rate rising to 13.8%, limiting the revenue base for infrastructure maintenance. • The lack of a reliable, frequent rail service along the Baden Powell-Adam Tas-R304 corridor, illegal taxi ranks, and insufficient NMT/pedestrian infrastructure create mobility constraints and road safety hazards.	• **The OPEX for Roads is growing at a rate (8.7% AAG) that significantly outpaces both inflation (3.4%) and total municipal OPEX growth (6.4%).** This indicates a strong fiscal responsiveness to the current condition of road infrastructure, which is identified as the **number one priority** by the community across nearly all 23 wards (Table 98 & Graph 40). The allocation grows from R64.2 million (2025/26) to R69.1m (2026/27) and further to R83.8m (2028/29). • **Despite the high growth, the R69.1 million OPEX for 2026/27 is focused on maintenance and regulation**, not new construction. This aligns with the IDP's stated challenge of a significant "conditional backlog" (Chapter 2) and ward-level complaints about potholes, resealing, and stormwater cleaning (Wards 5, 6, 7, 11). The budget is responsive to the risk of infrastructure failure, but it is a reactive, preservation-oriented strategy. **Assessment of Capital Budget Responsiveness (Roads Only)** • **The Capital budget for Roads is aggressively geared for future growth, growing at a massive 44.4% average annual rate (from R29.5m to R143.2m).** This strategic pivot is a direct response to the IDP's Spatial Development Framework (SDF), which identifies the **Adam Tas Corridor** and the **Klapmuts node** as catalytic growth areas (Chapter 4). **The current need vs. growth tension is stark: R69.1m OPEX for maintenance vs. R90.8m CAPEX for new growth-enabling infrastructure.** The CAPEX explicitly funds major intersection upgrades (e.g., Strand/Adam Tas/Alexander at R17m), the Adam Tas-Technopark Link Road (R4.0m), and Park & Ride facilities. The budget is clearly prioritizing long-term economic restructuring (Valley of Possibility SFA) over immediate maintenance of the existing network.
Social infrastructure	• Contraction of capital investment in community facilities. • No operational expenditure is budgeted for "Aged Care" or "Child Care Facilities," creating a critical gap between the IDP's stated commitment to supporting vulnerable groups (youth, elderly, disabled) and actual fiscal resourcing. • Declining real spending on social programmes.	• Safety is the Overarching Priority: OPEX for "Community and public safety" shows strong real growth (6.1% AAG), reaching R765 million by 2028/29. This is a direct fiscal response to the IDP's "Safe Valley" objective and high crime rates. • Social Services Face a Real-Terms Cut: OPEX for "Community and social services" (libraries, halls, cemeteries) is growing below inflation (3.3% AAG), representing a shrinking real commitment to preventative social infrastructure. • Critical Social CAPEX declines: Capital investment for "Community and social services" is projected to fall by over 80% - from R39.5 million to just R7.4 million. • Capital is Being Redirected from Social to Safety: While social CAPEX contracts, "Public safety" CAPEX skyrockets by 353% in the outer year.

Source: A1 schedules, NT funding tool, ORGB data strings.

- The Municipality is commended for tabling a funded budget over the 2026/27 MTREF, in compliance with the requirements of Section 18 of the MFMA. The approved budget reflects increasing operational surpluses over the 2026/27 MTREF period, which indicates the Municipality's ability to strengthen its financial position through contributions to reserves and sustained revenue growth in the outer years.
- However, differences were identified between Table A6 (Budgeted Financial Position) and Table A8 (Surplus or Deficit after Application of Cash and Investments) when comparing the NT data strings and the municipal approved budget schedules. These discrepancies relate primarily to projections for other working capital and, cash and cash equivalents. As a result, the funding assessments reflects different outcomes across data platforms, with the National Treasury budget tool and the Municipal approved budget schedules indicating a funded position, while the National Treasury data strings reflect an unfunded position. Thus, creating a distorted view of the budget position. The Municipality is encouraged to review and correct these inconsistencies to ensure full alignment across all reporting platforms and to support an accurate reflection of the funding position.
- The projected operating expenditure growth of 8.5 per cent exceeds the revenue growth of 8 per cent, primarily driven by increases in key cost components. Bulk electricity purchases increase by 10 per cent to R962.64 million, exceeding the 9.01 per cent NERSA-approved bulk tariff adjustment, thereby placing upward pressure on expenditure to accommodate consumption increases. Employee related costs also contribute to this growth, increasing by 7.8 per cent, which is above the SALGA approved wage increases and reflects potential changes in staff numbers and cost structures.
- In addition, contracted services increase by 13 per cent and account for 13.4 per cent of total operating expenditure, largely driven by security, unspecified assets and refuse-related services. Further cost pressures are observed in inventory consumed, which increases by 8.1 per cent due to fuel and input cost escalation.

- While revenue growth is supported mainly through tariff adjustments, expenditure growth is driven by structural cost increases across core service areas. This results in expenditure growing at a faster rate than revenue, which may place pressure on the operating position if not actively managed. The Municipality is encouraged to continue strengthening cost containment measures, ensure that expenditure assumptions are aligned to realistic revenue projections and enhance operational efficiencies to maintain a balanced and sustainable budget position over the MTREF.
- The capital expenditure budget of R579.30 million for 2026/27 reflects a slight decrease from the prior year, however investment in core infrastructure continues to be prioritised. While the composition of the capital budget supports the renewal and upgrading of existing assets, sustained improvements in capital spending performance and project implementation will be important to ensure that planned infrastructure investments translate into service delivery outcomes and support the underlying assumptions informing tariffs and operational expenditure.
- In line with the Municipality's Borrowing, Funds and Reserves Policy, the Capital Replacement Reserve is required to be cash backed, supporting a balanced and sustainable capital funding approach. While this principle has been applied in the approved budget, a misalignment between the capital reserve balances reflected in the data strings and the Municipal A-schedules was identified across the MTREF period. This misalignment, rather than the funding approach itself, is the primary concern, as it may result in an overstatement of reserves in the data strings and distort the reported funding position. The Municipality should prioritise aligning the reporting to ensure that the capital reserve position is consistently and accurately reflected.
- The Municipality projects positive cash and cash equivalents throughout the MTREF, amounting to R534.57 million in 2026/27, R538.88 million in 2027/28, and R632.9 million in 2028/29. An analysis of the Budgeted Financial Position (Table A6) further indicates a sustained positive working capital position over the MTREF period, suggesting that the Municipality will have adequate liquidity to meet its short-term obligations.
- It should be noted that differences exist between the cash and cash equivalents reported in Table A6 (Budgeted Financial Position) and Table A7 (Budgeted Cash Flows), as Table A7 reflects short-term investments with maturities exceeding 90 days, which are not classified as cash equivalents. For purposes of the liquidity and cost coverage ratio calculations, the figures from Table A6 were utilized as they more accurately reflect the Municipality's financial position.
- The Municipality liquidity position shows a marked improvement over the MTREF period, with the liquidity ratio increasing from 4.20:1 in 2026/27 to 6.21:1 in 2027/28 and significantly to 28.03:1 in 2028/29. This sustained upward trend, with all ratios well above the recommended National Treasury benchmark of 1:1, indicates a strong capacity to meet short-term obligations. In addition, the cost coverage ratio is projected to be 1.29 months in 2026/27, 1.20 months in 2027/28, and 1.37 months in 2028/29. These levels fall within the National Treasury norm of 1 to 3 months, reflecting adequate cash availability to meet monthly fixed operating commitments over the MTREF period.

Source: Stellenbosch Municipality budget documents 2026

- The outcomes of the National Treasury Cost-Reflective Tariff Tool indicate that Stellenbosch Municipality is cost-reflective in aggregate across its trading services, but that this position is uneven at the individual service level. In the 2026/27 tabled budget, the tariff tool indicates that the municipality is required to generate approximately R1.77 billion (revenue required) across water, wastewater, electricity and solid waste services, while the revenue budget provides approximately R1.86 billion, resulting in a total surplus of about R95.6 million, or roughly 5.4 per cent above the cost-reflective requirement. This confirms that, at system level, the municipality's trading services are financially sustainable and that the operating budget is funded.
- However, the service level outcomes reveal important structural differences. Water and electricity services are fully cost-reflective, with water generating a surplus of approximately R31.1 million and electricity a substantial surplus of approximately R190.0 million in the base year. By contrast, wastewater and solid waste services are not fully cost-reflective, recording revenue shortfalls of approximately R101.7 million and R23.7 million, respectively. These deficits are implicitly offset by surpluses generated in electricity and water services.
- The pattern is broadly sustained across the outer years of the MTREF. While total trading service revenue continues to exceed National Treasury's cost benchmarks in nominal terms, wastewater and solid waste under-recover, whereas electricity continues to generate large surpluses. This confirms that Stellenbosch's cost reflectivity is achieved through cross-subsidisation between services, rather than through full cost recovery in each individual trading service each individual trading service.

Source: NT GoMun 2026/27 Draft Budget

- Electricity revenue remains the Municipality's single largest source of operating income, contributing an average of 44.9 per cent of total operating revenue over the 2026/27 MTREF. The performance and sustainability of this service therefore remain critical to the Municipality's overall financial position and its ability to sustain core service delivery. Electricity revenue is projected to grow by an average of 10.7 per cent over the MTREF, driven primarily by the proposed 10.7 per cent tariff increase in 2026/27. However, the Municipality's own projections indicate limited underlying growth in consumption, with volumes increasing by 1 per cent in 2026/27 and 2027/28 with no growth in 2028/29. This trend reflects constrained consumption patterns and highlights a risk that revenue growth is largely tariff driven and may not be sustainable over the medium term without stabilising demand. This is further supported by socio economic trends indicating declining average incomes and an increasing proportion of households falling below the lower bound poverty line, which creates a more vulnerable local economy and places additional pressure on affordability. The proposed tariff remains subject to potential revision pending the outcomes of the cost of supply study and approval by NERSA.
- The Municipality is commended for exploring alternative energy procurement from renewable sources, which is intended to reduce reliance on Eskom-generated electricity and improve cost management over the medium to long term. This supports the objective of providing reliable, affordable, and sustainable electricity services to residents. To strengthen this transition, the Municipality is encouraged to formalise these initiatives through the development of a comprehensive renewable energy policy and implementation plan, with clearly outlined timelines, defined funding mechanisms, and quantified operational impacts.
- The proposed 10.7 per cent electricity tariff increase for 2026/27 exceeds both the projected CPI inflation rate of 3.4 per cent and the 9.01 per cent bulk electricity increase approved by NERSA. This suggests sustaining the cost-reflective tariff structure, supported by projected operating surpluses of R190 million in 2026/27, R200.59 million in 2027/28, and R191.70 million in 2028/29. These surpluses indicate improved cost recovery and provide capacity to fund infrastructure maintenance and future capital investment within the electricity service.
- While this is essential for long-term financial sustainability, reliance on tariff increases requires careful management given prevailing economic pressures. The Municipality should finalise and implement the findings of the electricity cost-of-supply study to ensure that tariff decisions are evidence-based, compliant, and aligned to affordability considerations.

- Population growth is projected at 1.7 per cent per annum, which is expected to increase demand for electricity services, consumption growth is projected at 1 per cent, suggesting the need for continuous assessment. The number of indigent households may fluctuate in response to ongoing economic challenges and high unemployment levels. In this context, the provision of 100 kWh free basic electricity cost the Municipality R100.63 million in 2026/27 which far exceed the proportion allocated towards electricity provision in the LGES. The current subsidised electricity also exceeds the National Treasury norm of 50 kWh. While this directly responds to the social needs of communities, the expansion of indigent support should remain within the affordability framework to ensure long term sustainability and alignment with available resources.
- Electricity distribution losses remain low at 5.6 per cent, well below the national benchmark of 7 to 10 per cent, reflecting strong operational control. Maintaining this performance will require continues focus on technical and non-technical losses management.
- The Municipality continues to expand on prepaid metering, with 34 075 prepaid meters compared to 4 793 conventional meters. The continued rollout of prepaid meters remains is supported as it strengthens revenue management and debt recovery.
- Although there has been improvement in the reduction in debtors older than 90 days, the persistence of long-term arrears remain a concern. The Municipality should accelerate the conversion of the remaining conventional meters and integrate this with its revenue enhancement strategy to stabilise collections and improve cashflow sustainability.

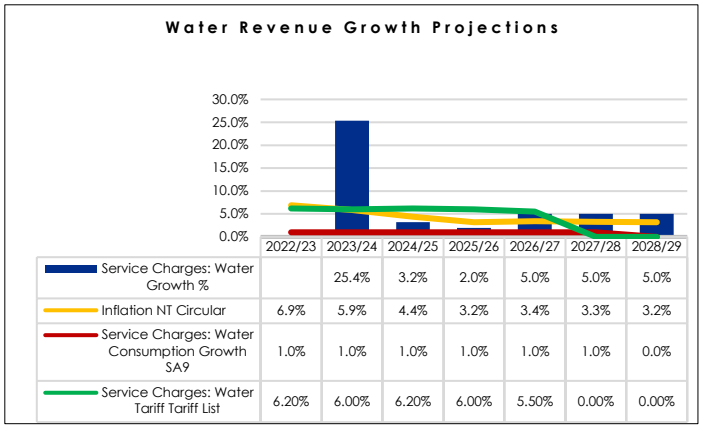
3.4.2.2 Energy tariff analysis

- Residential electricity consumers are mainly charged under inclining block tariffs, with lower blocks priced to protect basic consumption and indigent households receiving free basic electricity. Fixed charges and capacity charges apply, with phasing arrangements in place to limit abrupt affordability impacts. As a result, lower consuming households experience a lower effective increase, while higher consumption households face progressively higher marginal tariffs. The structure remains socially progressive and aligned with affordability principles.
- Business, commercial and industrial consumers face higher fixed charges, demand-based charges and flat energy rates, with no free basic allocation. Although percentage increases are broadly uniform, the absolute Rand impact is significantly higher for these users due to larger contracted capacity and exposure to demand charges. The tariff structure therefore strongly reflects cost-causation principles, ensuring that high demand users bear a proportional share of electricity system costs.
- The National Treasury tariff tool confirms that electricity tariffs are fully cost-reflective, generating a significant surplus in all years of the MTREF. While this strengthens municipal financial sustainability, it also highlights a structural dependency on electricity revenue to subsidise other trading services

3.4.2.3 Policy Implications: Electricity Regulation Reform

South Africa's evolving electricity sector, particularly under the Electricity Regulation Amendment Act, introduces significant reforms, including:

- Establishment of a competitive electricity market.
- Separation of generation, transmission, and distribution functions.
- Increased role for independent power producers (IPPs).
- Enhanced regulatory oversight of tariffs.



The proposed electricity tariff adjustments must then be considered within this changing policy environment. Municipalities will be required to align tariffs more closely with actual cost structures, particularly in distribution, meaning the NT cost reflective tariffs tool and accurate cost of supply data becomes essential for tariff setting and regulatory compliance. Increased market transparency will limit the ability for municipalities to cross-subsidise between customer categories without clear justification. Because of increased competition and customer choice, large customers may seek alternative electricity suppliers, reducing municipal revenue if tariffs are not competitive. The potential decline in municipal electricity revenue poses a significant risk, given its critical role in cross-subsidising other trading services.

This poses a strategic risk for Stellenbosch Municipality, given the extent to which electricity surpluses support overall trading service sustainability. Going forward, reliance on electricity based cross-subsidisation may become increasingly constrained.

3.4.3 Water Services

3.4.3.1 Water Services Credibility and Sustainability

Diagram 2 Water trading service trends

Cost Recovery	Direct and Indirect	2026/27	2027/28	2028/29

Indigent (LGES)	31 681	R88 180	R93 308	R94 618

Source: A1 schedules

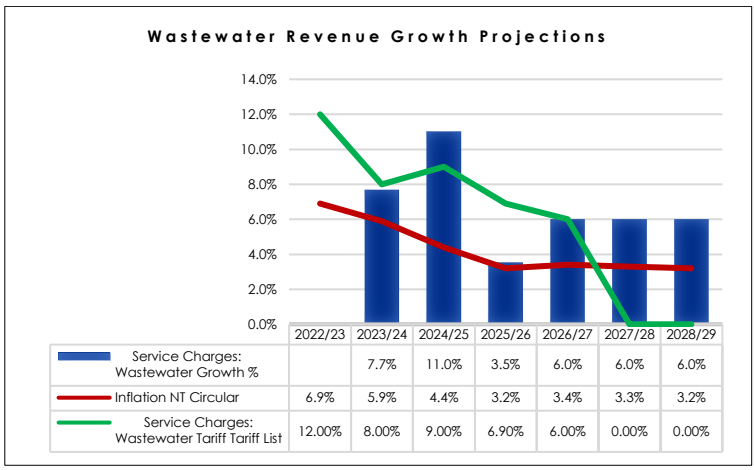
Source: NT GoMun 2026/27 Draft Budget

- Revenue from water services is projected to amount to R224.65 million in 2026/27, R235.88 million in 2027/28, and R247.68 million in 2028/29, reflecting an average increase of 5 per cent over the 2026/27 MTREF when compared to the 2025/26 Adjusted Budget. This growth is underpinned by a proposed 5.5 per cent tariff increase for 2026/27, which is intended to support both current operations and future capital infrastructure investments, while ensuring that the water trading service remains financially viable and generates an operational surplus. Expenditure related to the water trading service function is anticipated to increase by 5.3 per cent in 2027/28, followed by a decrease of 8.6 per cent in 2028/29, while revenue for the service is projected to increase by 5 per cent per year over the same period. Notwithstanding these fluctuations the water trading service projects surpluses of R31.07 million, R32.03 million, and R61.45 million across the MTREF, indicating improved cost recovery towards the strengthening of its financial sustainability. This position enables the Municipality to support both operational requirements and future infrastructure investment.
- The Municipality's forecast of a 1 per cent increase in water consumption in 2026/27 and 2027/28 appears to be reasonable when considered against the 1.8 per cent growth in the number of sales reported in the latest AFS. However, consumption growth is stabilising at around 1 per cent, which requires further assessment to determine whether this is driven by effective water demand management measures or reflects limited economic and population growth. This distinction is important to ensure that revenue projections remain realistic and aligned to actual consumption trends. The zero increase in water consumption projected for 2028/29 should be reviewed.

- Water losses remain high at 31.3 per cent in 2024/25 exceeding the National Treasury's norm range of 15 to 30 per cent. This indicates ongoing structural challenges, largely linked to aging infrastructure particularly the asbestos cement pipe network. The Municipality is encouraged to prioritise targeted capital investment aimed at network replacement to reduce losses, improve efficiency and protect revenue.
- Reduction of water losses initiatives should form a core component of the revenue enhancement strategy. Measurable loss reduction targets should be implemented and monitored, with clear linkage to infrastructure planning and maintenance programs.
- While the tariff strategy supports cost recovery, it is important to balance financial sustainability with affordability. The Municipality should continue to structure tariffs in a manner that limits the impact on vulnerable households while ensuring adequate funding for infrastructure and service delivery.
- The continued application of an inclining block tariff structure is supported as it promotes responsible consumption. The Municipality is encouraged to continue public awareness campaigns and regular assessment of consumption behaviour aimed at responsible water usage, particularly in the context of declining dam levels and potential future water restrictions, to ensure that revenue assumptions remain responsive to changing conditions.

3.4.3.2 Water Tariff Analysis

- A 5.5 per cent increase in water tariffs is proposed for the 2026/27 financial year, above the inflation benchmark of 3.4 per cent and slightly below the 6.05 per cent provincial average. Bulk water cost assumptions are informed by the relevant water service providers and future infrastructure investment requirements.
- Residential water tariffs are structured around steep inclining block tariffs, with free basic water provided to registered indigent households. The tariff design ensures that essential consumption remains affordable, while discretionary and luxury consumption becomes progressively more expensive. This structure strongly supports water demand management and conservation objectives, particularly in a water-stressed environment.
- Business and industrial users are subject to higher per-kilolitre tariffs across all consumption bands, with limited tolerance for high consumption before punitive tariffs apply. Drought and restriction tariffs apply earlier to non-residential users, ensuring that water scarcity risk is appropriately priced. The tariff structure therefore enforces the user pays principle and shifts the cost burden of high-water demand toward economic users.



Water Sector Reform: National Water Amendment Bill

- The National Water Amendment Bill introduces significant reforms aimed at strengthening water resource management, institutional arrangements, and financial sustainability within the water sector.
- Key policy objectives include strengthening water resource management institutions by enhancing the role of Catchment Management Agencies (CMAs) and improving oversight of water allocation and use. Greater emphasis is placed on cost recovery and efficient pricing, with tariffs aligned to the true cost of water supply and infrastructure maintenance. The policy also introduces stronger compliance requirements for water service authorities, including municipalities, alongside improved monitoring of financial and operational performance. A central focus is placed on water security and demand management by incentivising efficient water use through pricing mechanisms and addressing non-revenue water, system inefficiencies, and infrastructure losses.

3.4.4 Wastewater Services

3.4.4.1 Wastewater Services Credibility and Sustainability

Diagram 3 Wastewater trading service trends

Cost Recovery	Direct and Indirect	2026/27	2027/28	2028/29
	Revenue Required	R241 786 722	R255 784 160	R237 937 475
	Revenue	R140 039 546	R148 441 918	R157 348 434
	Surplus/ Deficit	-R101 747 176	-R107 342 242	-R80 589 041

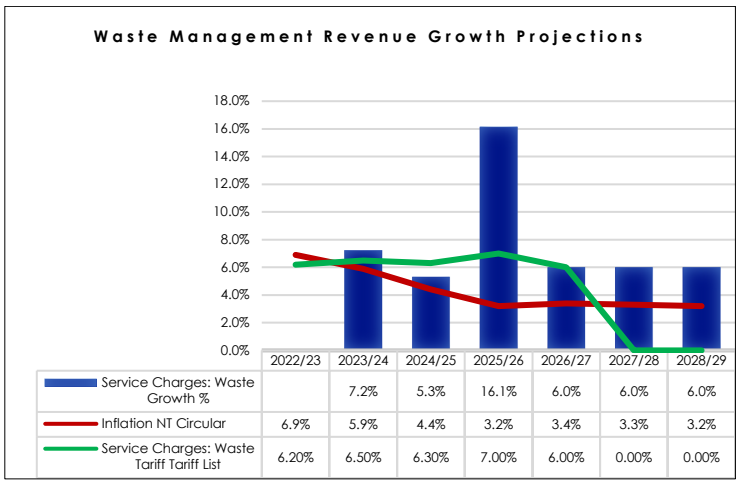
Indigent (LGES)	31 681	R52 733	R55 800	R56 583

Source: A1 schedules

Source: NT GoMun 2026/27 Draft Budget

- The Municipality projects revenue of R140.04 million from sanitation services for the 2026/27 financial year. This represents a 5.7 per cent increase from the 2025/2026 adjustment budget, aligned with the proposed tariff increases of 6 per cent, which exceeds the CPI target of 3.4 per cent.
- Despite this above inflation increase in revenue, the sanitation trading service is expected to record a significant deficit of R101.75 million in the 2026/27 financial. The tariff adjustment appears to be driven by increasing operational pressures, including the maintenance of aging infrastructure and the need to fund future capital investment.
- The continued deficit indicates structural pressure within the sanitation service and increased reliance on cross subsidisation from other revenue sources. While this may be manageable in the short term, it limits the service's ability to sustain itself independently over the medium to long term. The Municipality should assess whether all revenue streams relating to sanitation are fully reflected in the National Treasury tariff tool, including non-exchange revenue such as transfers and subsidies, as well as availability charges and interest on trade receivables, to ensure an accurate cost recovery assessment for the service.
- In line with MFMA Circular 134, the Municipality should prioritise a comprehensive cost of service assessment to ensure that tariffs are cost reflective and aligned to the cost of providing the service, thereby supporting long-term cost recovery and financial sustainability.



3.4.4.2 Wastewater Services Tariff Analysis

- The municipality proposes a 6.0 per cent increase in wastewater tariff for the 2026/27 financial year, above inflation and provincial average in 3.4 per cent and 6.2 percent respectively.
- The tariff structure for residential sanitation is largely based on fixed charges per erf or dwelling unit, resulting in predictable but relatively inflexible revenue. While this approach limits volatility for households, it lacks sensitivity to service intensity and wastewater generation. For business and institutional users, tariffs increase more sharply and are linked to property size, number of units and, in some cases, pollution load. This reflects the polluter-pays principle, particularly for wet industries that place higher pressure on wastewater treatment systems.
- Despite these structural features, the National Treasury tariff tool indicates that wastewater services are not cost-reflective, with a substantial revenue shortfall in 2026/27 and throughout the MTREF. This suggests that tariffs remain structurally below the level required to sustain ageing wastewater treatment works and sewer networks, posing medium- to long-term infrastructure risks.

3.4.5 Waste Removal Services

3.4.5.1 Waste Removal Services Credibility and Sustainability

Diagram 4 Waste removal service trends

	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29

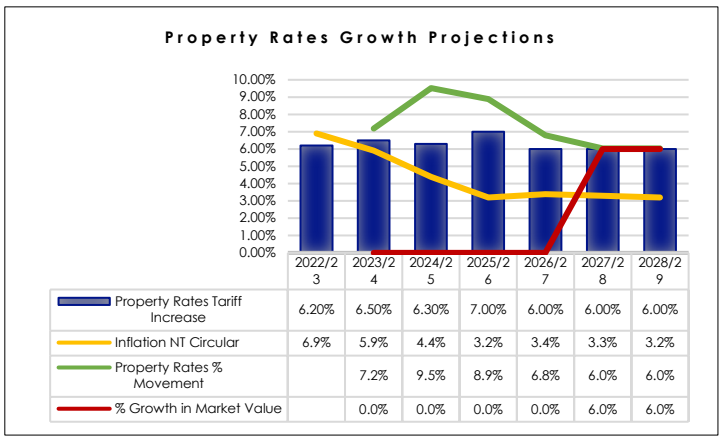
		2026/27	2027/28	2028/29
Indigent (A10,SA1)	10 506 149	R26 044	R27 607	R29 263
Indigent (LGES)	31 681	R44 205	R46 776	R47 433

Source: A1 schedules

Source: NT GoMun 2026/27 Draft Budget

- The Municipality has proposed a 6 per cent tariff increase for waste removal services for the 2026/27 financial year, which exceeds the projected CPI of 3.4 per cent. Despite this, the service is projected to operate at deficits of R23.69 million, R22.13 million, and R15.16 million over the MTREF. While the deficits are expected to reduce over time, this indicates that the service is not yet achieving full cost recovery, despite tariffs being modelled on cost reflective principles.
- The continued deficits suggest that current tariffs remain insufficient to fully fund both operational requirements and future infrastructure needs. Reliance on own reserves to finance landfill expansion is not uncommon, as municipalities are generally required to fund such capital investment from internal sources. This may reflect that sufficient reserves have been built up over time, either through past operating surpluses or cross subsidisation from other services. The Municipality should, however, continue to assess whether the current tariff structure adequately supports long term sustainability, while ensuring that the use of reserves remains prudent and aligned to future funding requirements.
- The provision for the rehabilitation of landfill amounts to R154.43 million and is projected to increase to R159.42 million over the 2026/27 MTREF, as reflected in Table SA3 of the A1 schedules. While cells 1 and 2 have reached capacity and rehabilitation commenced in 2025/26, actual spending remains low at R179 thousand, raising concern regarding implementation delays relative to the provision. This may expose the Municipality to environmental and compliance risks if not addressed, particularly as cells 3 and 4 remain in active use.
- In line with MFMA Circular 134, the Municipality should strengthen the alignment between tariffs and the full cost of service provision, including both operational and long-term environmental obligations. Consideration should be given to a phased tariff strategy to improve cost recovery over time.
- Ring fencing funds for this purpose will ensure that sufficient resources are available when required, reduce future fiscal pressure and support compliance with environmental and regulatory requirements.

3.4.5.2 Waste Removal Services Tariff Analysis



- Residential refuse tariffs are largely flat per refuse unit or bin, ensuring predictability and affordability, particularly for standard households and indigent users.

- Business and institutional users face significantly higher tariffs, with charges linked to bin size, collection frequency and service intensity. While this partially reflects cost-causation, the tariff structure remains largely volume-insensitive, limiting revenue growth relative to rising operational and landfill development costs.
- The National Treasury tariff tool confirms that solid waste services are not fully cost-reflective, with consistent revenue shortfalls across the MTREF. While these shortfalls are currently absorbed through cross-subsidisation, the approach is not sustainable in the long run, particularly given increasing landfill capital requirements and contracting costs.

3.5 Revenue

3.5.1 Property Rates

Diagram 5 Property rates

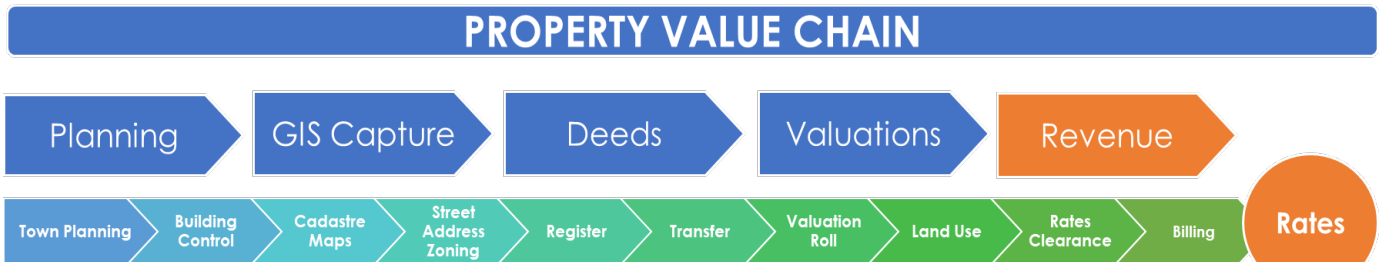
2026/27 Tariffs	Rate in Rand (Mun)	Rate in Rand (WC Avg)	Tariff Increase (Mun)	Tariff Increase (WC Avg)
Business	R0.00979	R0.01488	6.0%	R0.01488
Households	R0.00466	R0.00905	6.0%	R0.00905

Source: Municipal Budget Assumptions

Property Rates Rebates	Number of Indigent HH	Rebates		
		2026/27	2027/28	2028/29
Indigent (A10,SA1)	10 506 149	R55 289	R58 606	R62 123
Last GV date	02-07-24			

Source: A1 schedules

Source: A1 Schedules



- Revenue from property rates is projected to increase 6 per cent in the 2026/27 financial year. Property rates revenue constitutes 19.6 per cent of the total projected revenue for the 2026/27 financial year, making it the Municipality's second-largest source of income.
- The Municipality should confirm the reference to the implementation of a new General Valuation Roll on 1 July 2026, as the budgeted market values and property rates tariff assumptions do not appear to reflect a material change linked to a new valuation roll. Any inconsistency should be clarified to ensure that the property rates revenue assumptions are supported by the correct valuation data and tariff basis.
- In accordance with National Treasury Circular 129, the Municipality is also expected to establish a robust data management plan and build internal capacity to conduct regular reconciliations and verifications. The use of National Treasury's cost-reflective tariff tools and valuation roll reconciliation templates is encouraged to improve the completeness of invoicing and the integrity of the revenue base
- Provision is made for rates rebates to qualifying senior citizens and disabled persons with a monthly income of R15 000 or less, in line with the Rates Policy. The financial impact of these rebates should be carefully monitored to ensure that they remain appropriately funded and do not weaken the overall revenue position.

3.5.2 The Property Value Chain

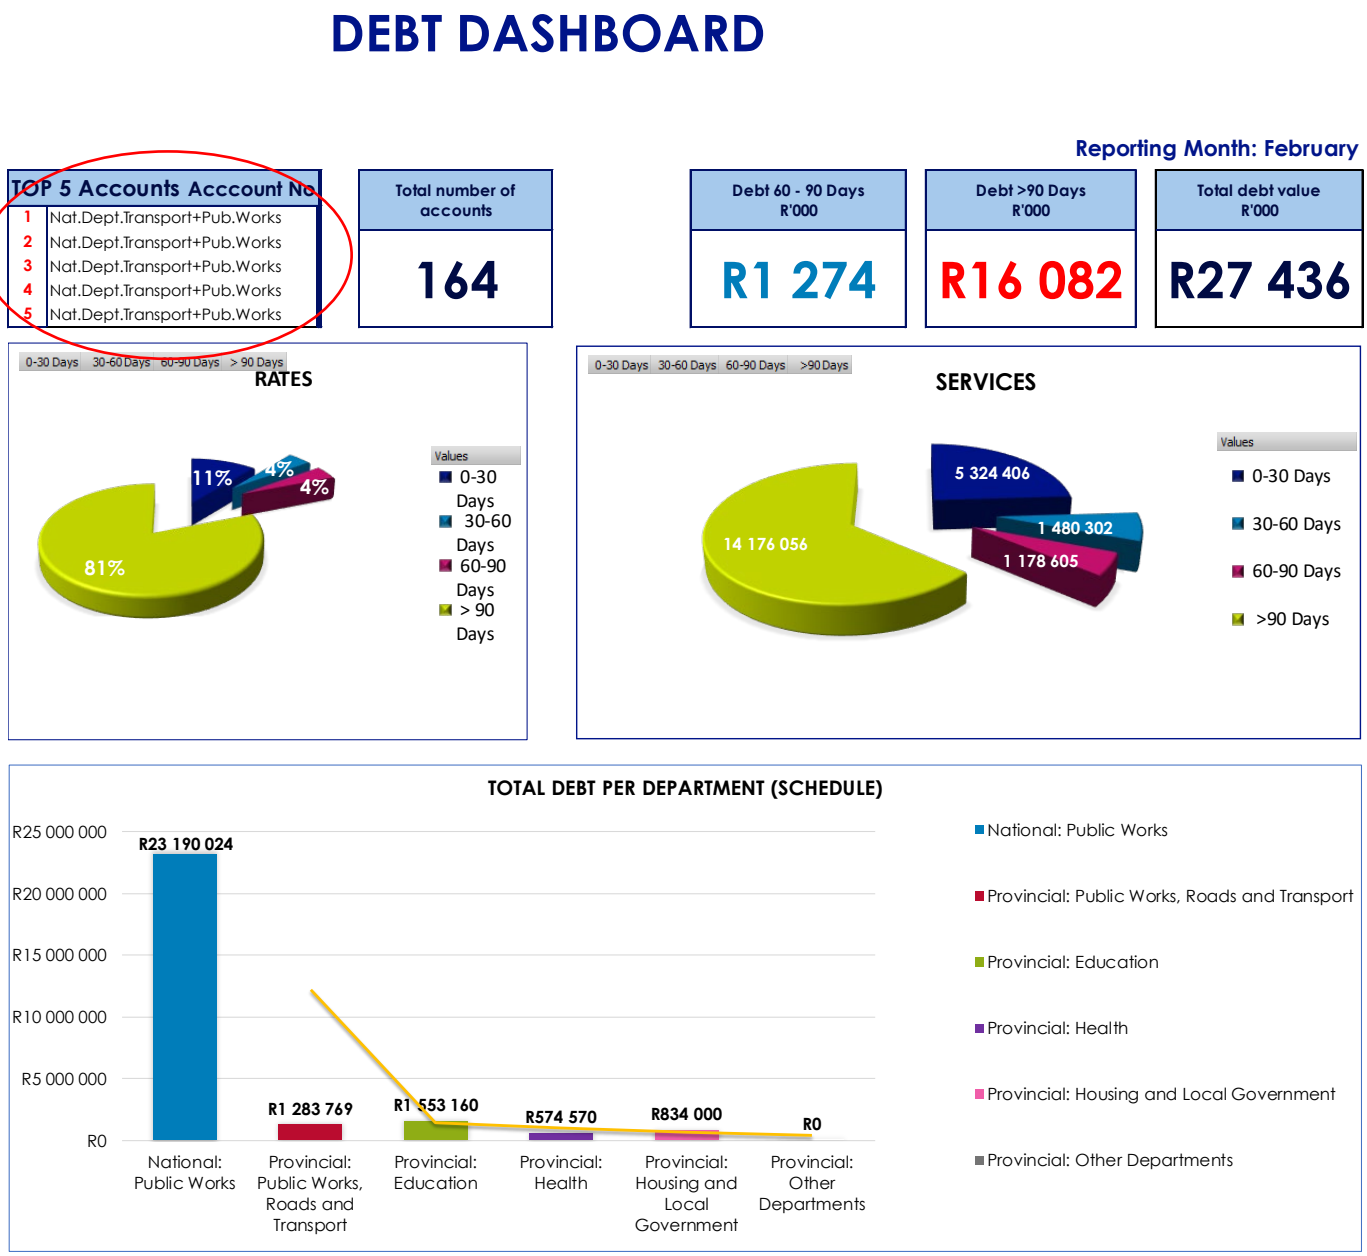
The Municipality's main asset is its property. Its main source of income is derived from charging for property rates. It is essential that municipalities reconcile their most recent consolidated valuation roll data to that of the current billing system data to ensure that revenue anticipated from property rates is realistic. Municipalities should implement a data management strategy and develop internal capacity to perform

these reconciliations and investigations to improve completeness of billing. Diagram 6 below highlights the key inputs into the Property Value Chain to realise maximum revenue from property rates.

Diagram 6 Property Value Chain

Source: City of Cape Town Municipality

3.5.3 Other Revenue Risks



- The Municipality has projected revenue from fines, penalties, and forfeits at R182.07 million, R191.18 million, and R200.74 million over the MTREF. This revenue stream constitutes 5.8 per cent of the total budgeted revenue for the 2026/27 financial year, making it a noteworthy contributor to the Municipality's overall revenue base.
- Despite this, historical collection is at a consistently low average of 27.2 per cent per annum over the past three audited financial years. Indicating that a significant portion of billed fines cannot be converted into cash. The anticipated implementation of AARTO may further influence the collection of fines revenue and should be considered in the underlying assumptions.

3.5.4 Government Debt Management

Treasury Circular Mun 10 of 2024 WCPT introduced a revised debt template and dashboard for Municipalities to track ageing debt per department. Together with the unbundling of government debtors, the template links municipal records to department asset registers and the MFMA s71 Age Analysis of Debtors (AD) mSCOA code.

There are still some challenges with the full implementation of the template, including specification of ownership of Erf's. Given these challenges WCPT would like to encourage the Municipality to fully utilise the Government Debt Dashboard by implementing the following steps:

1. Implement a focused **monitoring system**, using the debt dashboard to track ageing of debt for each department responsible, and the payment history.

The Government Debt Dashboard displays the "top 5 accounts", for the over 90 days age category. The respective sector departments will be required to provide feedback/comments on the "top 5 accounts" on a monthly basis. The Municipality should therefore ensure that the "Municipal Comments" column is as detailed as possible (per guidance below) to enable constructive responses from departments.

2. **Data-cleansing exercise**: The purpose of asset verification process is to equip municipalities with the tools to correctly identify property ownership and ensure that invoices are directed to the appropriate department for payment. WCPT acts as a mediator in cases where properties are missing from the asset register, or where devolution/ transfers have occurred, but ownership was not properly recorded at the Deeds Office. However, this requires the municipality to actively undertake the data-cleansing exercise. In many cases this exercise provides sufficient information for the municipality to update its billing records with the correct department, thereby resolving the issue. Where WCPT's mediation is needed, municipalities should provide as much detail as possible in "**Municipal Comments**", including:

   - Verify if the erf/property of the accounts is on any of the departmental asset registers.

- who is utilising the property? is it a multi-use property?
- is it a vacant erf or is its undeveloped property?
- which department made the last payment?

The details of the Municipality's monthly Government Debt schedule show that the Municipality has not yet fully utilised the provincial asset register data, as there are still misalignments between municipal and departmental records for some properties (as identified by erf numbers).

3. **Regular Reconciliation**: Furthermore, the monthly dashboard assists with credible data reporting to all spheres of government, via the comparison between National Treasury Age Analysis of Debtors (AD) for "Organ of State debt" and the Provincial Treasury Govt Debt Schedules.

Comparison Matrix between NT Section 71 (DB) and PT Govt Debt Schedule		
Municipality	NT S71 Total	PT Gov Debt Schedule
	R25 778 310.00	R27 435 523.80

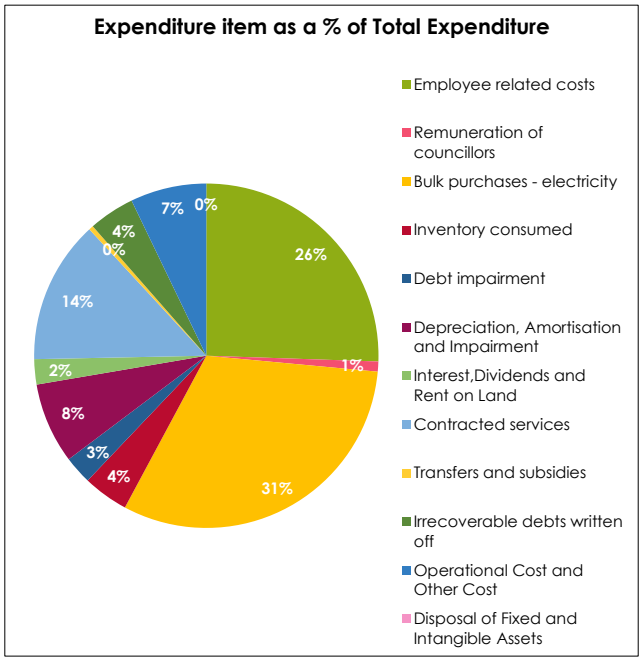
The table above compares data for February 2026, highlighting discrepances between the National Treasury Age Analysis of Debtors (AD) return and the Govt Debtor Schedules reported to WCPT. These inconsistencies in reporting undermine effective debt management and recovery.

To address this, the Municipality needs to reconcile and investigate the differences in the detailed comparison matrix table below. By completing the asset verifications process (discussed above) the Municipality can confirm that all the properties are reported under the correct department. WCPT can also create new departmental sheets on the Govt Debt Schedule where needed.

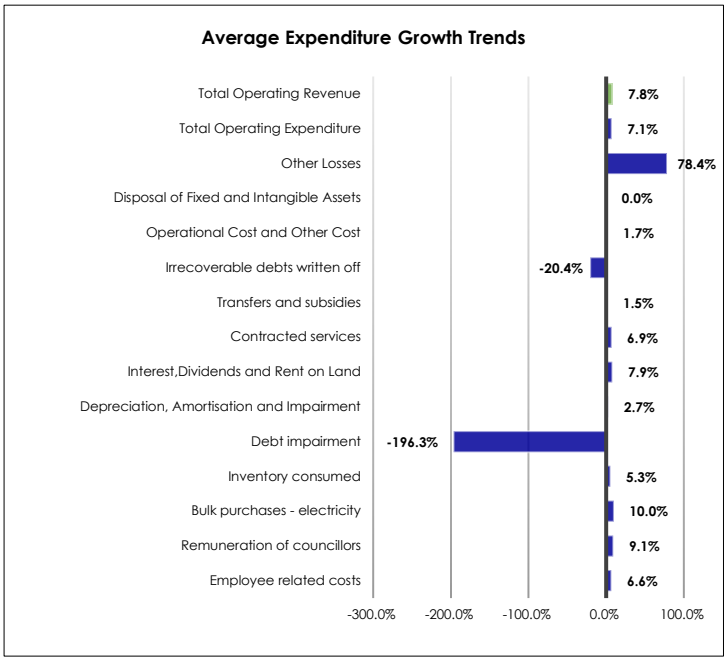
Comparison Matrix between MFMA s71 (DB) and PT Government Debt Schedule			
Municipality	Customer Group	MFMA s71 Total	PT Govt Debt Schedule
Stellenbosch	National: Public Works	21 670 545	23 190 024
	Provincial: Education	1 551 516	1 553 160
	Provincial: Health	551 254	574 570
	Provincial: Housing and Local Government	833 919	834 000
	Provincial: Other Departments	-	-
	Provincial: Public Works, Roads and Transport	1 171 076	1 283 769
TOTAL		25 778 310	27 435 524

Given that the national Department of Public Works and Infrastructure has devolved all their tenants/client departments to pay all their service accounts (effective April 2026), WCPT will within the next two to three months create new sheets within the Govt Debt Schedule to reflect the devolution process. The Municipality need to ensure that invoices are forward to the correct department to ensure payment.

In addition, monthly Government Debt Schedule submissions indicate that the Municipality continues to report "rates accounts" to WCED. The user department are only responsible for service accounts, while "rates accounts" must be directed to the Provincial Department of Infrastructure to ensure proper payment.



4. **Structured Engagement**: WCPT aims to have quarterly intergovernmental meetings (municipality-provincial/national departments) from July 2026, to have a collaborative platform for addressing municipal debt, leveraging the strengths and opportunities available, and ensuring that government departments meet their obligations to municipalities in a timely and transparent manner.

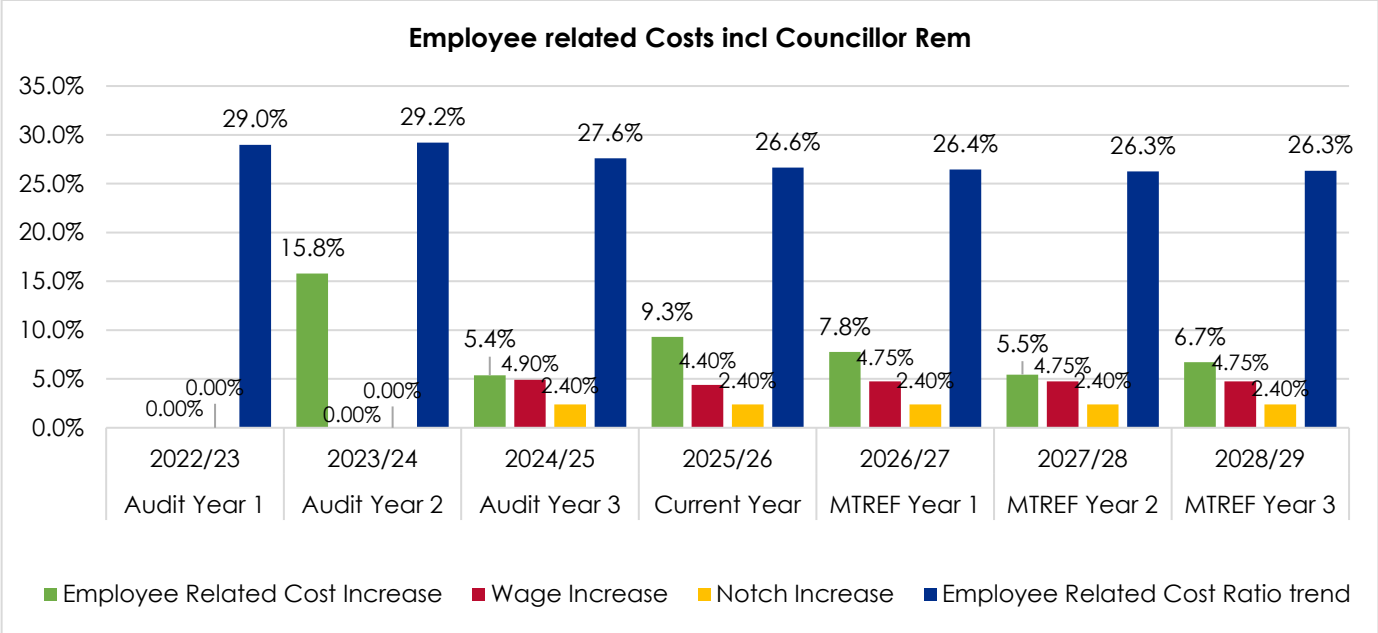


Provincial Treasury is committed to working together to resolve outstanding amounts owed to the municipality.

3.5.5 Operating Expenditure

Diagram 7 Operating expenditure trends

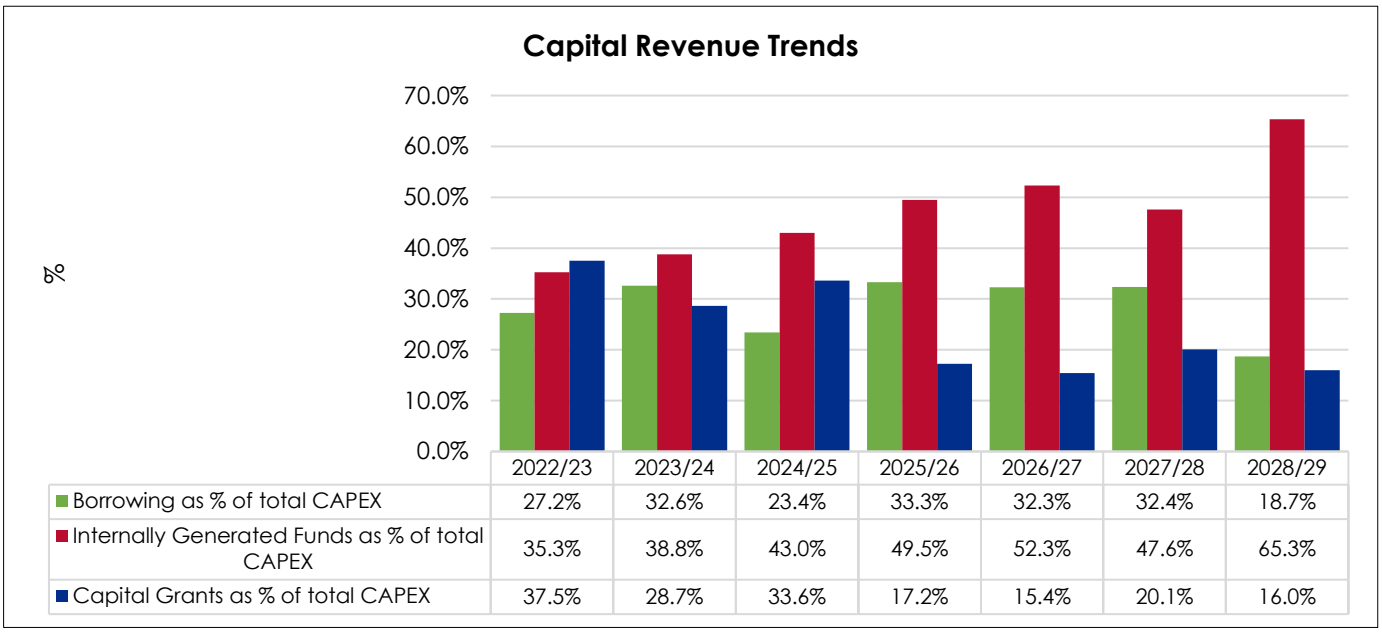
Source: NT GoMun 2026/27 Draft Budget



- The Municipality has projected average operating expenditure growth of 8.5 per cent over the 2026/27 MTREF. Bulk purchases, employee related costs and contracted services remain the primary cost drivers, contributing 31.3 per cent, 25.5 per cent and 13.4 per cent respectively to total operating expenditure.
- Revenue growth of 8 per cent is slightly below the projected expenditure growth of 8.5 per cent, indicating emerging pressure on the operating budget over the MTREF. This will require continued focus on expenditure management and revenue optimisation to maintain a balanced budget position.
- The Municipality projected bulk purchases for electricity of R962.64 million in 2026/27, indicating an increase of 10 per cent from the 2025/26 adjusted budget which is slightly above per cent above the NERSA approved tariff. The corresponding tariff increase of 10.7 per cent supports cost recovery. The Municipality's initiative to procure energy from renewable sources is noted, as this is expected to reduce reliance on Eskom supply and improve cost efficiency over time.
- Contracted services are projected to increase by 13 per cent in 2026/27, 2.7 per cent in 2027/28 and 5.2 per cent in the 2028/29 financial year and accounts for 13.4 per of the total operating expenditure for the 2026/27 financial year, which exceed the National Treasury norm of between 2 and 5 per cent. This may indicate a higher reliance on outsourced services. The increase is driven by growth in consultants and professional services of 29.2 per cent, contractors of 10.1 per cent and outsourced services of 11.3 per cent, with key cost drivers relating to security, unspecified assets and refuse removal services.
- Notably, security services alone account for 2.5 per cent of the total operating expenditure budget, reflecting the continued pressure of this cost item. The allocation is consistent with the Municipality's approach in the 2025/26 budget, where additional funding was provided to safeguard municipal properties and infrastructure from vandalism and theft, thereby supporting continuity of service delivery. The Municipality should continue to ensure that these costs are appropriately managed and aligned to service delivery outcomes, with a focus on achieving value for money.

3.5.6 Employee Related Cost

Diagram 8 Employee related cost including councillor remuneration



Source: NT GoMun 2026/27 Draft Budget

- Employee related costs are projected at R812.76 million for the 2026/27 financial year, translating to an increase of 7.8 per cent from the 2025/26 budget. Variances in the reporting of staff numbers across permanent, contract and total employees should be reviewed to ensure consistency and accuracy.
- Overtime expenditure is projected at R58.14 million and contributes 7.2 per cent to employee related costs. The Municipality should identify and respond to operational inefficiencies in order to reduce projected overtime.

3.6 Capital Funding Mix

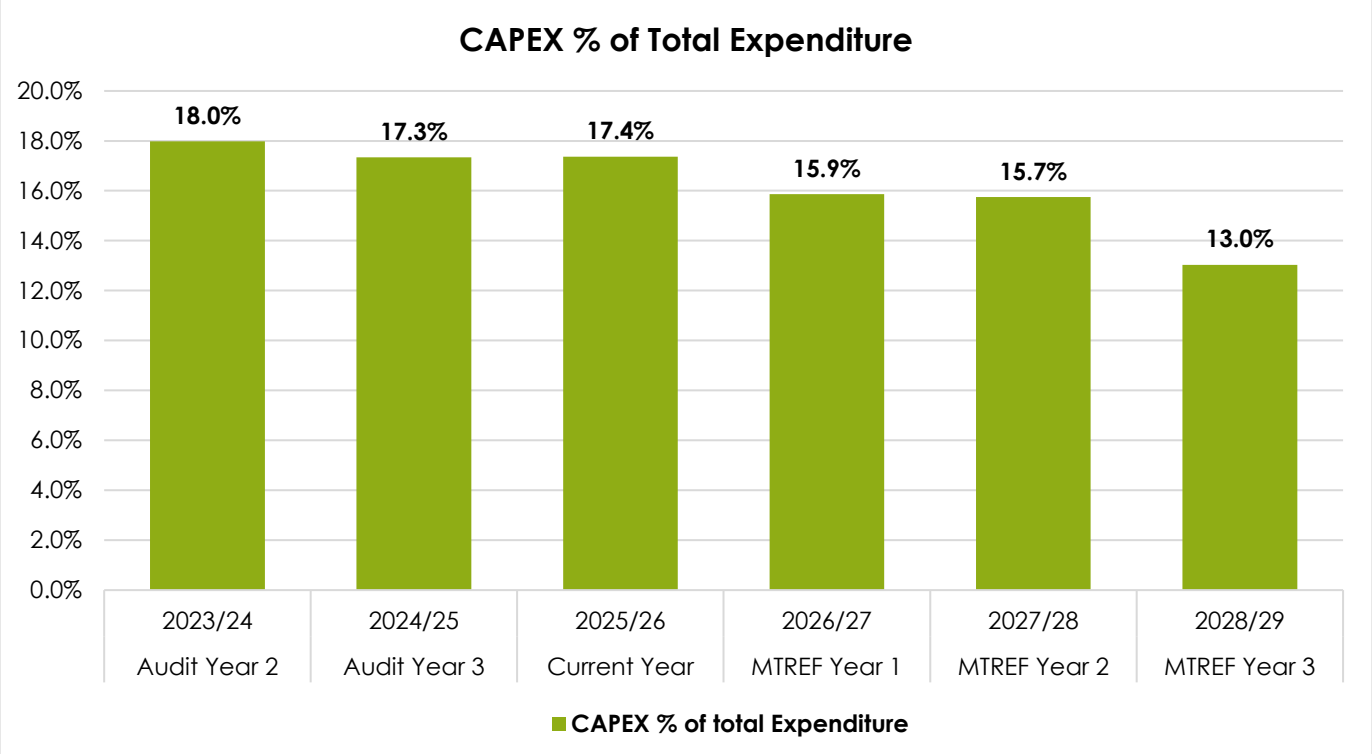
Diagram 9 Capital funding mix

	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29
Borrowing as % of total CAPEX	27.2%	32.6%	23.4%	33.3%	32.3%	32.4%	18.7%
Internally Generated Funds as % of total CAPEX	35.3%	38.8%	43.0%	49.5%	52.3%	47.6%	65.3%
Capital Grants as % of total CAPEX	37.5%	28.7%	33.6%	17.2%	15.4%	20.1%	16.0%

Source: NT GoMun 2026/27 Draft Budget

- The Municipality has budgeted capital funding of R1.71 billion over the MTREF, with 52.3 per cent financed through internally generated funds. Allocations from the Capital Replacement Reserve amount to R302.98 million in the 2026/27, R290.21 million in 2027/28, and R340.13 million in 2028/29, indicating a strong reliance on own funding to support the capital program.
- Borrowing contributes 32.3 per cent of the 2026/27 capital budget, reflecting a strong focus on infrastructure investment. While the utilisation of borrowing can support service delivery and reduce immediate pressure on tariffs, the associated finance charges will place upward pressure on future operating costs. The Municipality should continuously monitor the impact of borrowing on tariff increases and collection rates, ensuring that borrowing decisions remain aligned to affordability considerations. Maintaining an appropriate balance between infrastructure delivery and tariff affordability remains essential, with consideration given to alternative funding sources and expenditure prioritisation where required.
- In line with the Municipality's Borrowing, Funds and Reserves Policy, it is required that the CRR be cash-backed. This practice supports a more balanced and sustainable capital funding strategy in the long term, thereby reducing the risk of exceeding the Municipality's maximum gearing ratio or depleting available free cash. However, a misalignment in capital reserve balances between the data strings and Municipal A-schedules was observed across the MTREF period, which may result in an overstated reserve in the strings. The Municipality is encouraged to correct the misalignment between the data strings and Municipal A-schedules.

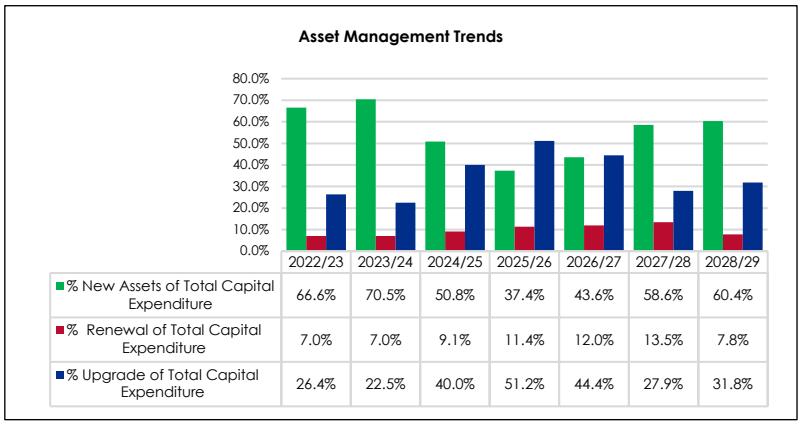
3.6.1 Grants



- The Municipality intends to fund a portion of its total capital expenditure through grant allocations amounting to R89.35 million in 2026/27, R122.44 million in 2027/28, and R83.42 million in 2028/29. Grant funding represents an average of 17.2 per cent of the total capital budget over the MTREF period.
- The Municipality has demonstrated a consistent commitment to utilising grant funding to support infrastructure delivery. Continued focus on effective project planning and implementation will further enhance grant utilisation, support timely delivery of infrastructure projects and minimise the risk of rollovers.

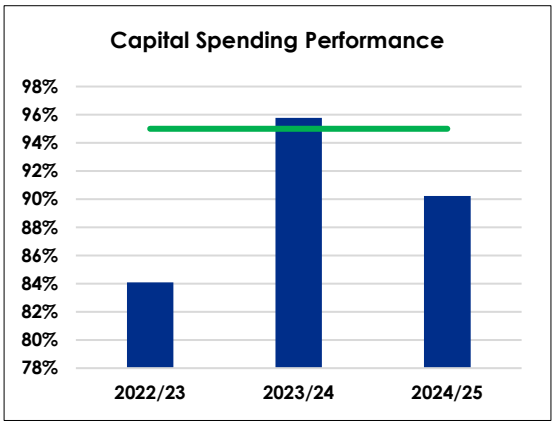
3.6.2 Borrowing

- The Municipality plans to finance capital expenditure through borrowings over the MTREF period, with R186.97 million in 2026/27, R197.38 million in 2027/28, and R97.22 million in 2028/29. The revenue-to-debt (gearing) ratio is projected to improve from 18.0 per cent in 2026/27 to 16.7 per cent in 2027/28, and further to 13.6 per cent in 2028/29, all of which are well within the National Treasury's recommended norm of below 45 per cent. This suggests the Municipality has capacity for further borrowing, although any future borrowings should be weighed against overall cash flow requirements. It should be noted that financial liabilities under current liabilities in Table A6 were excluded from the gearing ratio calculation; however, the overall gearing position remains within acceptable limits.
- A positive cash position is projected, including provision for repayment obligations as reflected in the Budgeted Cash Flow Statement (Table A7). Repayments on borrowings are budgeted at R63.46 million in 2026/27, R77.76 million in 2027/28, and R79.09 million in 2028/29. While sufficient revenue and cash generation are projected to service debt, all factors that may impact cash flow should continue to be monitored. Tariff structures should also incorporate capital charges to ensure adequate provision for debt repayment obligations.



3.7 Capital Expenditure Trends

Diagram 10 CAPEX % of total exp.



- The above graph indicates total capital expenditure as a percentage of total expenditure. The norm requires that between 10 and 20 per cent of total expenditure be allocated to capital investment. The Municipality has maintained a ratio towards the upper threshold; however, this ratio is gradually declining over the MTREF. The Municipality must ensure that sufficient investment in capital is maintained to support growth. Furthermore, the sharp decline over the MTREF should be reviewed to prevent potential underinvestment.
- The Municipality's capital expenditure budget for 2026/27 amounts to R579.30 million reflecting a decrease of 2.6 per cent from the 2025/26 adjusted budget of R594.99 million. Historical capital performance over the past three audited years ranged between 84.9 per cent and 90.2 per cent, below the National Treasury norm of 95 per cent.
- As at 28 February 2026, capital expenditure amounted to 33.5 per cent of the adjusted budget. Continued focus on project planning, procurement readiness and implementation capacity will be important to support improved capital spending performance and alignment with the approved budget. This is particularly relevant given the link between capital delivery and the operational cost base that informs tariff setting.
- Sector allocations are primarily directed towards energy sources at 31.4 per cent, followed by water at 17.8 per cent, roads at 15.7 per cent and community and safety services at 12.2 per cent, indicating a continued focus on core service delivery infrastructure. The large allocation towards energy also reflects the Municipality's intention to also diversify supply through alternative energy sources. In this regard, it is important that the integration of alternative energy is aligned with the existing electricity network infrastructure, including grid capacity, system stability and long-term maintenance requirements, to ensure that current assets remain effective and optimally utilised.

Diagram 11 Asset Management

	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29
% New Assets of Total Capital Expenditure	66.6%	70.5%	50.8%	37.4%	43.6%	58.6%	60.4%
% Renewal of Total Capital Expenditure	7.0%	7.0%	9.1%	11.4%	12.0%	13.5%	7.8%
% Upgrade of Total Capital Expenditure	26.4%	22.5%	40.0%	51.2%	44.4%	27.9%	31.8%

Source: NT GoMun 2026/27 Draft Budget

- The composition of the capital budget reflects a focus on sustaining existing infrastructure, with 12 per cent allocated to the renewal of assets and 44.4 per cent to the upgrade of existing assets. The Municipality is encouraged to continue aligning its capital budget towards the renewal and upgrading of existing assets, revised target of 60 per cent of capital expenditure. This is in line with MFMA Circular 130, to support the preservation of infrastructure, improve service delivery reliability and limit the growth of maintenance backlogs.
- Repairs and maintenance expenditure represent 2.3 per cent of property, plant and equipment for 2026/27, which is below the National Treasury benchmark of 8 per cent. It is noted that employee related costs have been excluded from this calculation, which understates the full investment in asset maintenance. The Municipality is encouraged to ensure that all relevant costs are appropriately recorded to provide a more complete view of maintenance investment and support effective asset management.
- Section 19 of the MFMA and Regulation 13 of the MBRR require that specific information be considered by Council for all individual capital projects where the estimated total cost at the time of budget approval exceeds R50 million. This information includes the projected cost over all financial years until the project is operational, as well as future operating costs, revenue projections, and municipal tax and tariff implications.
- Whilst the Municipality list the total projects exceeding R50 million on page 22 of the budget document, the council resolution does not consider the requirements of the relevant legislation. The Municipality must ensure alignment with the relevant legislative requirements be considered when adopting the budget. In addition, the Municipality should incorporate this guidance into its budget policies to ensure it forms part of the annual budget process.

SECTION 4: REVIEW OF THE HISTORICAL FINANCIAL INFORMATION

4.1 The Financial Performance as per the Audited Annual Financial Statements

The assessment of the financial health and performance is an integrated process involving a review of a municipality's audited annual financial statements, audit report and ratio analysis. The results of the ratio analysis are used to support financial decisions and to identify factors which may influence the financial stability of the municipality.

Adverse ratio outcomes show potential areas requiring action to ensure sustainability. The assessment trend analysis is based on the audited financial statements for 2023; 2024 and 2025; however, the table provides a five-year time frame (2021 to 2025) to provide a more comprehensive perspective for evaluating the 2026/27 budget.

The analysis is conducted largely on the National Treasury MFMA Circular No. 71 issued January 2014. PT has analysed these ratios, and the following items are highlighted.

4.2 Summary And Findings From Historical Trends

NT WEB-BASED PORTAL STATUS

The municipality has submitted the 2023/24 (restated) and 2024/25 (audited) ratio on the NT Portal. While PT has validated the ratios submitted by the municipality, the submission was rejected pending further engagement due to identified ratio calculation inconsistencies. It should be noted, in order for PT to formally engage, the ratio analysis must be submitted via the NT web enabled system, in accordance with MFMA Circular 114 issued in February 2022. Accordingly, this report is based on PT's calculations for the aforementioned two financial years per the guidance of MFMA Circular 71.

4.2.1 Asset Management

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
1.1	Impairment of Property, Plant and Equipment, Investment Property and Intangible Assets (Carrying Value): **0%**	0.0%	0.0%	0.0%	0.0%	0.0%	
2.2	Repairs and Maintenance as a % of Property, Plant and Equipment, Investment Property (Carrying Value): **8%**	1.4%	1.1%	0.9%	1.5%	1.1%	

	Favourable
	Unfavourable
	Needs Improvement

- Asset management ratios assess the municipality's ability to preserve the service potential of its assets through suitable maintenance and timely recognition of deterioration. The impairment ratio for Property, Plant and Equipment, Investment Property and Intangible Assets remained at 0 per cent across the 2021/22 to 2025/26, suggesting that asset values and service potential have been maintained over the period under review.
- Conversely, Repairs and Maintenance expenditure as a percentage of asset carrying value has consistently remained significantly below the norm of 8 per cent.

- The sustained combination of low repairs and maintenance expenditure alongside minimal impairment suggests a growing asset preservation risk. While current asset management practices appear sufficient to narrowly sustain service delivery in the short term, prolonged underinvestment in maintenance may compromise asset condition over time. If maintenance is 1.1 per cent (2025) and impairments are 0 per cent, one of two things is true: (a) assets are genuinely in excellent condition, or (b) impairment triggers are not being properly identified or applied. Strengthening preventative maintenance and aligning lifecycle funding with prescribed norms will be critical to mitigate future impairment risks and support long-term service delivery sustainability. It is further recommended if not already that for the 2026/27 budget the Municipality should include funding for an independent asset condition assessment to validate carrying values and ensure impairment testing is robust.

4.2.2 Working Capital

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
3	Net debtors' days: **≤30 days**	47 days	38 days	56 days	50 days	43 days	
4	Creditors Payment Period (Trade Creditors): **30 days**	67 days	58 days	73 days	57 days	51 days	

- Effective working capital management is essential to maintain liquidity, meeting short-term obligations, and ensuring the uninterrupted delivery of services. Key indicators for municipalities in this regard include net debtors' days and the creditors' payment period, which collectively provide insight into revenue collection efficiency and overall cash flow management.
- Net debtors' days remained consistently above the recommended norm of 30 days throughout the review period, peaking at 56 days in 2023 before improving to 43 days in 2025. At 43 days, the municipality is financing 1.4 months of consumer consumption. Although this improvement signals enhanced revenue collection compared to prior years, the ratio remains elevated, indicating persistent weaknesses in debtor management and an ongoing risk of cash flow constraints, impairments, and potential write-offs. The municipality has a solid asset base relative to liabilities as observed in Table 4.2.1. This suggests the long collection period is not due to cash shortage but due to administrative inefficiency. This is a governance issue, not a resource issue. For consideration it is recommended if not already explored that the Municipality implement a targeted credit control campaign for the top 100 defaulting accounts. A reduction to 35 days is a realistic 2026/27 target.
- Similarly, the creditors' payment period exceeded the 30-day benchmark in all years under review, despite a positive downward trend from 73 days in 2023 to 51 days in 2025. While this reflects improved payment performance, delays in settling trade creditors may still point to inefficiencies in payment processes or creditor management practices, rather than liquidity constraints, particularly in the context of the Municipality's strong liquidity and cost coverage ratios over the MTREF period. The Municipality should strengthen internal controls and payment processes to ensure full compliance with the 30 day requirement.
- Collectively, the combination of slow collections (43 days) and slow payments (51 days) creates a negative working capital spiral. The municipality is effectively using supplier credit to finance consumer debt. This is unsustainable and damages the local economic ecosystem.
- The extended debtor and creditor cycles highlight inefficiencies in working capital management, underscoring the need for strengthened revenue collection processes, debtor management and improved payment discipline to enhance cash flow sustainability and overall financial stability. Failure to do so exposes the municipality to interest claims and legal action.

4.2.3 Going Concern

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
5	Total Liabilities to Total Assets: **<50%**	17.0%	18.1%	17.5%	7.9%	6.7%	
6	Current Ratio: **1.5-2:1**	1.5	1.7	1.9	2.0	1.9	

- Evaluating going concern ratios is critical to assessing the municipality's ability to meet its financial obligations and sustain operations over the foreseeable future. The Total Liabilities to Total Assets ratio remained well below the norm of 50 per cent throughout the review period. This notable decline observed from 2023 to 2025 reflects a strengthened financial position, reduced leverage, and a solid asset base relative to liabilities, indicating a low risk of solvency pressure. Furthermore, the current ratio remained within the norm range of 1.5:1 to 2:1 over the period, stabilising at 1.9 in 2025. These indicators collectively demonstrate that the municipality has sufficient resources to meet both short- and long-term obligations, supporting a positive going concern conclusion.
- However, when contrasted with the working capital analysis, operational inefficiencies remain evident. Extended debtor and creditor cycles indicate weaknesses in cash flow management, suggesting that the municipality's positive going concern position is largely underpinned by financial position strength rather than optimal working capital discipline. While no immediate risk is identified, sustained shortcomings in revenue collection and payment practices could place downward pressure on liquidity if left unaddressed. It is recommended if not already considered that the Municipality in the 2026/27 budget should not increase current assets further and that any surplus be deployed to address the Repairs & Maintenance deficit Table 4.2.1.

4.2.4 Expenditure Management

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
7	Irregular, Fruitless and Wasteful and Unauthorised Expenditure/Total Operating Expenditure: **0%**	4.9%	1.4%	1.4%	0.6%	0.1%	

- The ratio of UIF&W Expenditure reflects a positive and sustained improvement over the five-year period under review. Although the 2025 outcome represents a reduction and signals improved expenditure discipline, the ratio remains above the prescribed norm, indicating that residual non-compliance and control weaknesses persist.
- When considered alongside broader financial indicators, including persistent working capital inefficiencies, the results suggest that although governance and expenditure controls have improved, risks have not been fully eliminated. Continued occurrences, albeit minimal, reinforce the need for sustained compliance enforcement, strengthened accountability, and effective consequence management to consolidate gains and support long-term financial sustainability and service delivery. Furthermore, refer to latest guidance per MFMA Circular No. 68 (updated 1 April 2026).

4.2.5 `Budget Implementation

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
8	Capital Expenditure Budget Implementation Indicator: **95% - 100%**	86.1%	83.2%	84.0%	95.7%	90.1%	
9	Service Charges and Property Rates Revenue Budget Implementation Indicator: **95% - 100%**	93.7%	96.4%	97.5%	99.6%	99.6%	

- The Capital Expenditure Budget Implementation Indicator reflects persistent underperformance across much of the review period, improving to the benchmark range only in 2024 at 95.7 per cent before declining again to 90.1 per cent in 2025. While this indicates progress compared to earlier years, the inability to consistently sustain implementation within the prescribed norm suggests ongoing challenges in project planning, execution capacity, and/or procurement efficiency. These outcomes are consistent with earlier observations around asset management and working capital constraints, which continue to place pressure on effective capital delivery. The municipality has failed to meet the 95 per cent norm in four of the last five years. This is a systemic issue of over-budgeting and under-delivery. Given the maintenance deficit (Table 4.2.1), the inability to spend the capital budget is a concern as the municipality is neither maintaining old assets nor building new ones effectively.
- In contrast, the Service Charges and Property Rates Revenue Budget Implementation Indicator show strong and sustained performance, achieving and maintaining the benchmark range from 2022 onwards and stabilising at 99.6 per cent in both 2024 and 2025. This reflects improved revenue forecasting and collection effectiveness and aligns with recent gains observed in debtor management trends. However, the divergence between strong revenue performance and weaker capital implementation underscores that while revenue generation has strengthened, structural and operational inefficiencies identified in earlier ratio analyses continue to limit the full translation of available resources into infrastructure delivery and service expansion.

4.2.6 Grant Dependency

No.	Financial ratios & norms	2021 Audited	2022 Audited	2023 Audited	2024 Audited	2025 Audited	Overall Rating
1.10	Own Funded Capital Expenditure (Internally Generated Funds + Borrowings) to Total Capital Expenditure: **no norm**	82.1%	71.8%	68.5%	77.3%	73.6%	

- The Own Funded Capital Expenditure ratio indicates that the municipality continues to finance the majority of its capital programmes through internally generated funds and borrowings. Own funding levels remained high, though volatile, ranging between 68.5 per cent and 82.1 per cent over the review period and stabilising at 73.6 per cent in 2025. This limited reliance on grant funding supports the municipality's state of financial position driven going concern position; however, it simultaneously increases exposure to internal liquidity and cash flow pressure.
- When considered alongside earlier ratio analyses, particularly persistent working capital inefficiencies and constrained repairs and maintenance investment, the reliance on self-funded capital expenditure presents a notable risk. While asset impairment levels remain low, continued underinvestment in asset maintenance combined with pressure on internally generated funding may erode asset condition and financial flexibility over time. Without sustained improvements in revenue collection, payment discipline, and lifecycle asset management, ongoing self-funding of capital projects could place downward pressure on liquidity, ultimately weakening the municipality's long term going concern resilience and ability to sustain infrastructure delivery.

4.2.7 Credibility of mSCOA DATA strings

MFMA Circular No.122 states that the credibility and accuracy of the data strings must be verified by municipalities before submission as the data strings submitted will be used as the single source for all analysis and publications in the 2023/24 municipal financial year. Municipalities have been given access to the GoMuni portal in April 2022 and should use the reports on GoMuni to verify the credibility of their submissions. It should be emphasized that errors in the data can only be corrected in the next open period. e.g., errors in the tabled budget (TABB) data string can only be corrected in the adopted budget data string (ORGB). Municipalities are not allowed to open closed periods to make corrections.

Table 5 mSCOA Segments Use Analysis

No	Segment	ADJB 2025/26	TABB 2026/27
1	**Project Segment**		
1.1	Use of the Project Segment	Adequate use of segment	Adequate use of segment
2	**Fund Segment**		
2.1	Use of Fund Segment	Adequate use of segment	Adequate use of segment
3	**Function Segment**		
3.1	**Use of Function Segment**	Adequate use of segment	Adequate use of segment
4	**Costing Segment**		
4.1	**Use of Costing Segment**	Adequate use of segment	Adequate use of segment
5	**Region Segment**		
5.1	**Use of Region Segment**	Adequate use of segment	Adequate use of segment
6	**Item Segment**		
6.1	The municipality applied balance sheet budgeting principles minor with misaligned in the A6 and A8 were noted. The municipality is encouraged to review these misalignments and make corrections.		

A TABB segment analysis will be provided to the municipality, with the goal of assisting municipalities in examining their data and determining if the information is appropriately retrieved across all segments before finalising the ORGB data strings. TABB shall be rectified in the ORGB before the adopted budget is locked on the financial system and the ORGB data string is created. Furthermore, it is recommended that the Municipality make themselves available for a session (through MS Teams) on the TABB segment analysis to provide further clarification on the segment analysis tools.

ANNEXURE A: MUNICIPAL BENCHMARKING GRAPHS

This Annexure presents a summary comparing key variables from the tabled 2026/27 budgets of the 24 local municipalities in the Western Cape.

8.2	**MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK 2026/2027-2028/2029**

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 20 May 2026 and 27 May 2026

1. SUBJECT: MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK 2026/2027-2028/2029

2. PURPOSE

The purpose of this report is as follows:

(a) To consider the views/submissions of the local community in terms of Section 23(1) (a) of Municipal Finance Management Act (Act 56 of 2003), herein after called the MFMA and to allow the Executive Mayor to respond to the views of the public envisaged in terms of Section 23 (2) (a) and (b).

(b) The Executive Mayor to approve the Medium-Term Revenue and Expenditure Framework (inclusive of property rates charges and taxes, tariffs and service charges), annexures and proposed amendments to the budget related policies and other policies to Council for approval in terms of Section 16(2) of the Municipal Finance Management Act, (Act 56 of 2003).

(c) That Council specifically note and consider the need to take up external loans to fund critically needed refurbishment of infrastructure to the amount of R520 million of which over the MTREF R187 million will be required in year one, R199 million in year two and R134 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirms draft approval of same in order for the Chief Financial Officer to attend to the necessary legislative requirements.

3. DELEGATED AUTHORITY

COUNCIL

4. EXECUTIVE SUMMARY

BUDGET

Attached as **APPENDIX 1** is an executive summary by the Accounting Officer.

5. RECOMMENDATIONS

(a) that the High-Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved;

(b) that the Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX 1 – PART 1 – SECTION D, be approved;

(c) that the three-year Capital Budget for 2026/2027, 2027/2028 and 2028/2029, as set out in APPENDIX 1 – PART 2 – SECTION N, be approved;

(d) that the proposed rates on properties in WCO24, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX 3, be approved;

(e) that the proposed amendments to existing budget related policies, other policies and by-laws as set out in APPENDICES 4 - 36, be approved;

(f) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R520 million of which R187 million will be required in year one, R199 million in year two and R134 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;

(g) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially; and

(h) that Council takes note of MFMA circulars 132 & 134 that was published to guide the MTREF for 2026/2027 to 2028/2029 as set out in APPENDICES 37- 38;

(i) that Council takes note of the mSCOA Road Map as set out in APPENDIX 39;

(j) that Council takes note of the Capital Projects above R50 million and confirm approval of same;

(k) that Council takes note that the public comments and submissions were considered with the compilation of the final budget.

6. DISCUSSION / CONTENTS

6.1 Background/ Legislative Framework

Section 23 of the MFMA (Act No 56 of 2003) prescribes to municipalities the process to be followed when the Annual Budget is tabled for approval, which is as follow:

(1) "The municipal council must consider any views of the local community, the National Treasury, the relevant Provincial Treasury and any provincial or national organs of state or municipalities which made submissions on the budget.

(2) After considering all budget submissions, the council must give the mayor an opportunity—
(a) to respond to the submissions; and
(b) if necessary, to revise the budget and table amendments for consideration by the council.

ANNEXURE B to the Council Item for the Integrated Development Plan includes the input and comments received during the IDP and Budget Public Participation Process.

6.2 Discussion

Economic Outlook

The South African economy has experienced over a decade of constrained growth, GDP growth is averaging below 2%, which is far below the level needed to meet national needs. In 2025, growth was a mere 1.4% and is projected to average 1.6% in 2026, 1.8% in 2027, settling at 2% at the end of the medium term in 2028, supported by continued momentum on structural reforms, improving confidence, lower interest rates and higher investment.

The 2026 National Budget highlights that while inflationary pressures began to moderate and interest rates were expected to stabilise, the global economic environment has become increasingly uncertain due to emerging geopolitical risks. In particular, the escalation of the conflict in Iran has introduced significant volatility into global energy markets.

The ongoing conflict has disrupted key global oil supply routes, particularly through the Strait of Hormuz, resulting in increased volatility in international oil prices. The rise in crude oil prices has translated directly into higher fuel prices globally, placing upward pressure on transport and production costs across economies.

These developments have introduced secondary inflationary pressures, as increased fuel costs raise the cost of goods and services across the economy. This has a direct impact on food prices, logistics, manufacturing input costs and overall cost of living. As a result, inflation forecasts have been revised upward relative to earlier projections, with expectations that inflation may remain elevated in the short term before stabilising over the medium term.

The Bureau for Economic Research (BER) indicates that inflation, which was previously expected to stabilise within the 4% to 5% range, may trend higher in the short term due to these global shocks. This creates additional pressure on household disposable income and increases the cost of doing business.

Although improvements in electricity supply have reduced the intensity of load shedding domestically, energy security risks remain, and the global energy shock further compounds the economic outlook. Rising living costs, high unemployment and constrained household income continue to place pressure on consumers and limit economic expansion.

Despite these challenges, there are still positive developments supporting economic recovery, including improved investor confidence, easing domestic inflation prior to the shock, gradual interest rate stabilisation and continued progress in structural reforms. However, the geopolitical environment introduces downside risks to these projections.

Government's strategic priorities remain focused on driving inclusive growth and job creation, reducing poverty and the cost of living, and building a capable, ethical and developmental state.

Economic & Fiscal Strategy

The Medium-Term Budget Policy Statement (MTBPS) outlines a pro-growth and fiscally responsible agenda built on four key pillars:

1. **Macroeconomic Stability:**

   Focus on reducing economic volatility and managing inflation to support investment, savings and sustainable growth. A stable macroeconomic environment contributes to reduced borrowing costs and improved fiscal sustainability.

2. **Structural Reforms:**

   Ongoing reforms aimed at improving efficiency and competitiveness in key sectors such as energy, logistics, water and telecommunications. The continuation of Operation Vulindlela remains central to unlocking economic growth and improving service delivery, with a growing focus on municipal performance and infrastructure delivery.

3. **State Capability & Governance:**

   Strengthening institutional capacity, governance and accountability across all spheres of government. This includes improved public financial management, digital transformation and enhanced service delivery capabilities.

4. **Public Infrastructure Investment:**

   Increased investment in strategic infrastructure, including electricity, transport and water, supported by improved public-private partnership frameworks. Infrastructure investment is recognised as a key driver of economic growth, job creation and long-term productivity.

Public Investment & Fiscal Measures

Government's fiscal strategy is designed to stabilise public finances while supporting economic growth and service delivery:

- **Debt and Fiscal Consolidation:** Government debt is expected to stabilise over the medium term, supported by efforts to maintain a primary budget surplus and manage borrowing levels.
- **Revenue Measures:** Targeted tax measures are implemented to support fiscal sustainability while balancing economic growth considerations.
- **Social Spending:** Continued prioritisation of social services, including health, education and social protection, to support vulnerable households.
- **Wage Agreements:** Public sector wage increases remain a significant cost driver and are managed within a constrained fiscal framework.
- **Infrastructure Investment:** Increased allocation towards infrastructure development to address service delivery backlogs and support economic growth.

Economic Growth & Domestic Outlook

Economic growth is expected to improve gradually, supported by:

- Improved energy supply stability and ongoing structural reforms
- Increased infrastructure investment and public spending
- Stabilising inflation and interest rates (subject to global pressures)
- Gradual recovery in global economic conditions

However, the global geopolitical environment, particularly the conflict in Iran and its impact on energy markets, presents a key downside risk to the economic outlook. Rising fuel prices and associated inflationary pressures may dampen growth prospects and delay further monetary policy easing.

The BER projects moderate economic growth over the medium term, with continued risks from global uncertainty, logistics constraints and domestic structural challenges. The focus remains on unlocking private sector investment, particularly in renewable energy, infrastructure and logistics.

Government Priorities & Budget Highlights

Key priorities in the 2026 Budget and Budget Review include:

- **Structural Reforms:** Accelerating reforms to improve energy security, logistics efficiency and digital infrastructure.
- **Social Protection and Public Services:** Continued investment in social services and support programmes.
- **Revenue and Tax Measures:** Ensuring sustainable revenue generation while minimising negative economic impacts.
- **Fiscal Discipline:** Maintaining a balanced approach to expenditure and borrowing.
- **Public Investment:** Scaling up infrastructure investment to support economic recovery.
- **Enhanced Governance:** Strengthening state capacity, financial management and accountability across all spheres of government.

Western Cape & Municipal Focus

The Western Cape Government aligns national priorities while emphasising regional growth through the Growth for Jobs Strategy, which focuses on:

- **Energy Resilience:** Expanding renewable energy and reducing reliance on Eskom supply
- **Economic Growth and Job Creation:** Supporting key sectors such as tourism, agriculture, manufacturing and technology
- **Infrastructure Investment:** Improving transport, logistics and bulk infrastructure
- **Municipal Financial Sustainability:** Strengthening municipal revenue management and cost-reflective tariffs
- **Public Safety:** Enhancing law enforcement and creating a safe environment for investment.

Economic Outlook: Stellenbosch Municipality

Economic Performance and Growth

According to MERO 2024/25, Stellenbosch Municipality remains a key economic hub within the Cape Winelands District, contributing significantly to regional GDP and employment. The local economy continues to demonstrate resilience, supported by a diversified sectoral base.

Sectoral Contributions

Key sectors contributing to the local economy include:

- Finance, Insurance, Real Estate and Business Services: 29.3%
- Wholesale and Retail Trade, Catering and Accommodation: 16.2%
- Manufacturing: 15.5%
- Agriculture and Agri-Processing
- Tourism
- Education

This diversified economic structure supports resilience and long-term growth.

Financial Management

Stellenbosch Municipality continues to demonstrate strong financial governance, as evidenced by five consecutive clean audit outcomes, reflecting sound financial management, accountability and transparency.

Capital Expenditure and Strategic Alignment

The Municipality's Capital Expenditure Framework (CEF) provides a structured approach to infrastructure investment, aligned with the Integrated Development Plan (IDP) and the Spatial Development Framework (SDF).

This alignment ensures that capital investment supports the Municipality's spatial vision, prioritises Priority Development Areas (PDIs) and addresses historical spatial inequalities.

Through this integrated planning framework, the Municipality is able to respond directly to economic challenges by directing investment towards areas with the highest potential for economic impact and social development.

Targeted investment in PDIs supports:

- economic growth and job creation
- local economic development (LED)
- expansion of the municipal revenue base
- improved access to services and infrastructure

Infrastructure-led development in these areas stimulates private sector investment, supports business development and contributes to long-term fiscal sustainability.

Economic Challenges

Stellenbosch Municipality continues to face the following challenges:

1. Economic growth volatility, exacerbated by global and domestic shocks
2. Unemployment and labour market pressures
3. Increasing infrastructure and service delivery demands due to urbanisation
4. Economic inequality and spatial disparities
5. Environmental sustainability and climate resilience requirements

Strategic Interventions Using the CEF

The Municipality addresses these challenges through targeted interventions:

Infrastructure Investment

- Upgrading road, electricity and bulk infrastructure
- Expanding waste management and mobility infrastructure
- Developing LED hubs to support economic activity

Job Creation and Skills Development

- Public employment programmes and EPWP initiatives
- Local labour sourcing requirements in municipal projects
- Skills development aligned to economic sectors

Housing and Urban Development

- Affordable housing programmes and inclusionary zoning
- Expansion of water, sanitation and basic services
- Development within Priority Development Areas

Renewable Energy and Sustainability

- Investment in solar and alternative energy solutions
- Energy security initiatives to support business continuity
- Climate resilience and environmental sustainability projects

Tourism and SME Support

- Investment in tourism infrastructure and destination development
- Support for small businesses, emerging farmers and local enterprises

Stellenbosch Economic Outlook

- **Short-term:** Economic recovery supported by infrastructure investment and energy initiatives
- **Medium-term:** Growth driven by skills development, business support and investment attraction
- **Long-term:** Sustainable and inclusive growth through diversification, innovation and spatial transformation

Municipality's Financial Planning

The constrained economic environment, compounded by rising inflationary pressures linked to global energy market volatility, continues to impact municipal finances and household affordability.

Municipalities are therefore required to:

- improve revenue collection and financial management
- implement cost containment measures
- ensure efficient and effective delivery service

National Treasury requires municipalities to adopt cost-reflective tariffs, while balancing affordability considerations, particularly in a high-inflation environment.

Budgets must be funded from realistically anticipated revenue, with conservative assumptions to account for economic uncertainty and affordability constraints.

The Municipality continues to align its financial planning with:

- National Treasury guidelines
- IDP priorities
- Inflation forecasts (including upward risks)
- Revenue and tariff strategies

The national fiscal framework emphasis fiscal discipline, requiring municipalities to maintain financial sustainability, responsible borrowing and efficient expenditure management.

In this context, Stellenbosch Municipality continues to prioritise sound financial management, infrastructure investment and revenue enhancement to ensure long-term sustainability and improved service delivery outcomes.

Municipality's Financial Planning considering the Economic Outlook and guidance from National Treasury

The economic outlook has improved moderately, however there are still room for improvement which continues to impact municipal finances, and this has strained consumers' ability to pay for services. Coupled with this is the marginal growth in national transfers compared to previous financial years. These two critical factors necessitate municipalities to function optimally, suggesting that municipal operations, processes and procedures must be efficient. Therefore, municipalities must maximize their revenue generating potential and collect what is due to them and at the same time eliminate wasteful and non-core spending.

National Treasury encourages municipalities to maintain tariff increases and adopt a tariff setting methodology at levels that reflects an appropriate balance between the affordability to poorer households and other customers, while ensuring the financial sustainability of the municipality. Headline inflation declined to 4.4 per cent during 2024/2025 fourth quarter, resulting in a average inflation of 4.4 per cent for the year. The Consumer Price Index (CPI) inflation is forecasted to increase from 3.3 per cent in 2025/2026 to 3.4 per cent in 2026/2027, thus municipalities are required to justify all increases more than the projected inflation target for 2026/2027. Municipalities must ensure that their budgets are funded from realistically anticipated revenues. This means that the municipality must refrain from assuming collection rates that are unrealistic and unattainable.

The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act, which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. The municipalities must therefore generate sufficient revenue to fully recover their costs, deliver services to customers sustainably and invest in the infrastructure that promises local economic development.

The municipality's revenue is determined by setting a package of tariffs that is not only considered to be affordable to its ratepayers and the users of its services but deemed to be at fair and realistic levels. It is important that municipalities periodically conduct cost of supply studies in the provision of each basic service.

Tariff increases by Eskom and Water Boards are above inflation and should be considered as such while determining cost reflective tariffs. In the instance of bulk tariff increases for electricity, municipalities are encouraged to apply for electricity tariff increases that reflect the total cost of providing the service, to ensure that they are working towards achieving fully cost-reflective tariffs that will assist them to achieve financial sustainability. Municipalities should consider the following facts during the tariff setting

process, namely, the costs of bulk purchases and the fluctuation in the seasonal cost thereof; the consumption patterns to enable better demand planning and management; and in the event that municipalities have been under recovering costs, embark on a process to correct their tariff structures over a reasonable time period so that cost reflective tariffs are achieved, which in turn will result in financial sustainability.

Local government confronts tough fiscal choices in the face of financial and institutional problems that result in service-delivery breakdowns and unpaid bills. Municipalities can offset these trends by improving their own revenue collections, working more efficiently and implementing cost-containment measures. To maintain a funded budget, municipalities need to not only focus on tariff increases but also focus on how to eliminate expenditure that is unnecessary. The Cost Containment Regulations were issued on 07 June 2019, as well as the municipality's Cost Containment Policy is embedded in the municipality's operations that assists in driving down costs, ensuring that value for money is achieved, and resources of the municipality are used effectively, efficiently and economically.

Municipalities are required to consider the following during the compilation of the 2026/2027 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulation read with MFMA Circular No.82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Water Conservation: Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- 2026 Local Government Elections (transitional processes and hand-over reports for the newly elected councils);
- Prioritize the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

The aforementioned were taking into account during the compilation of the municipality's budget.

2025/2026 represents the last year of the current municipal council's electoral term. The local government elections are scheduled to take place between November 2026 and January 2027. Circular 132 of the MFMA highlights the following four risks that should be managed. Firstly, if elections takes place after the start of the new financial year the outgoing council will be responsible to approve tariffs for the 2026/2027 financial year and newly elected council will implement it, secondly the outgoing council must ensure that they comply with the timeframes for the approval of the budget, thirdly the outgoing council should ensure that the budget is funded, and not prepare a "election friendly" budget that with unrealistically low tariffs and over-ambitious capital expenditure programme. Lastly municipalities must ensure that the public and stakeholder consultation processes are adhered to as required by the relevant legislature. Circular 132 of the MFMA also highlights the handover process from the current council to the newly elected council and stipulates the requirements that must be complied with. The municipality's financial sustainability should be protected at all times in the build-up to the elections. Sound decision-making is of utmost importance to ensure long-term sustainability of municipal finances and service delivery long after the election period is completed.

The application of sound financial management principles for the compilation of the Stellenbosch municipality's long term financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities. The municipality's business and service delivery priorities were reviewed as part of this year's planning, through the Integrated Development Plan (IDP), and the annual budget process.

Funds were shifted from low to high priority programmes to maintain sound financial stewardship. A critical review was also undertaken on non-core and 'nice to have' items with regards to expenditure. The municipality has embarked on developing a revenue enhancement strategy to optimize revenue, including the collection of debt owed by consumers. Furthermore, the municipality has undertaken various customer care initiatives to ensure that the municipality truly involves all citizens in the process of ensuring a people lead government.

The following budget principles and guidelines directly informed the compilation of the 2026/2027 MTREF:

- Integrated Development Plan was used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be affordable. However, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- National, provincial and local priorities;
- Headline inflation forecasts; and
- Funding choices and modelling.

The Integrated Development Plan (IDP) was used as a guiding strategic document to inform the budget compilation. The challenge, however, is still to deliver services more efficiently and effectively with a tight financial envelope.

Stellenbosch municipality's revenue strategy was based on the following fundamentals, namely, tariff policies of the municipality, economic outlook and development for Stellenbosch and surrounding areas, National Treasury's guidelines and macroeconomic policy, National, Provincial and Regional fiscal growth rates and electricity tariffs as approved by National Electricity Regulator of South Africa (NERSA).

The financial resources to fund the Operational Budget will and must consist of realistically anticipated revenue generated from property taxes, service charges and other income.

The municipality were mindful of the estimated headline inflation for 2026/2027 of 3.4% forming the basis of the extensive income modelling exercise but also taking into account the principles of economic services that are cost reflective, trading services generating surpluses, the effect of escalating salary costs and bulk purchases. Inflation is forecast to fluctuate around 3.4% to 3.2% over the medium term in line with moderating inflation expectations.

The national budget focuses on fiscal consolidation. This means that we as municipalities must ensure that we do not borrow beyond our ability to repay and we do not spend money we do not have, until we ignite growth and generate revenue, we have to be tough on ourselves.

Budget documentation in line with the budget and reporting regulations is attached as **APPENDIX 1 – PART 1**. The report serves as an overview of the budget as a whole, budget assumptions used to compile the budget, funding sources used to fund the capital budget, different income categories to fund priorities of the municipalities, as well as the different expenditure items, including non-cash items.

CAPITAL BUDGET 2026/2027 – 2028/2029

The capital budget is infrastructure orientated and addresses the huge backlog and urgent need to upgrade/refurbish Council's infrastructure as addressed by the different master plans. It is directed by the IDP (Integrated Development Plan) and the needs of the community.

It's also aligned to the strategic priority in the State of the Nation Address of Infrastructure investment and the "back to basics" approach. Council's attention is however drawn to the fact that not all needs identified by the community can realistically be funded by the municipality. Critical and committed programmes/projects were the focal point for the capital budget.

The main capital projects that the municipality will be investing in, include:

• Adam Tas Corridor Precinct 10
• Electricity Network: Pniel
• Energy Efficiency and Demand Side Management
• Network Cable Replace 11 Kv
• System Control Centre & Upgrade Telemetry
• Bird Street Dualling - Adam Tas to Kayamandi
• Major Drop-Offs: Construction - Franschoek
• Refurbish Plant & Equipment - Raithby WWTW
• Erf 7001 Cloetesville (380) FLISP
• Jamestown: Housing
• La Motte Old Forest Station (±430 services & ±430 units)
• Rehabilitation of Langrug Dam and Engineering Services
• Bien don 66/11kV substation new
• Cable replacement 66kV
• Electrification
• Kayamandi new substation 11 kV switching station
• Third transformer and associated works 20MVA Cloetesville
• Upgrade transformers at Main substation 7.5MVA to 20MVA
• Switchgear Substation University
• Kayamandi: Zone O (±711 services)
• Adhoc Reconstruction Of Roads (WC024)
• Lanquedoc Access road and Bridge
• Reseal Roads - Stellenbosch & Surrrounding
• Jamestown Transport Network - School Street
• Main Road Intersection Improvements: Strand / Adam Tas / Alexander
• Expansion of the landfill site (New cells)
• Extention Of WWTW: Stellenbosch
• Sewerpipe Replacement
• Upgrade of IdasValley WTP
• Upgrade of WWTW Wemmershoek
• Upgrade of WWTW: Klapmuts
• Bulk Water Supply Pipe and Reservoir: Stellenbosch
• Bulk Water Supply Pipeline & Pumpstations: Franschhoek
• Bulk Water Supply Pipe: Cloetesville/ Idas Valley
• New Reservoir & Pipeline: Vlottenburg
• Waterpipe Replacement

The detailed draft capital budgets for 2026/2027, 2027/2028 and 2028/2029 are attached as **APPENDIX 1.**

OPERATING BUDGET 2026/2027 – 2028/2029

The basis of the operating budget is aligned to the principle of total potential income from all our services as well as a projection of total direct income. The extent, to which tariffs and levies are proposed to increase, is in the main influenced by:

- The increase in bulk purchases (electricity)
- Employee related costs, as per SALGBC wage agreement
- Councillor remuneration, as per SALGA upper limits
- Service delivery challenges
- Repairs and maintenance
- Operational projects impacting job creation and economic development
- Contractual commitments
- Day to day operational costs (fuel & oil, telephones, bank costs, etc)
- Finance costs, influenced by level of borrowing

Taking all of these issues into consideration and to ensure the sustainability of our operations from realistically anticipated income flows, the following tariff and property tax increases are proposed for 2026/2027:

Electricity	**10.71%**
Sanitation	**6.00%**
Refuse removal	**6.00%**
Water	**5.50%**
Rates	**6.00%**

The proposed electricity tariffs are subject to change based on the final findings and recommendation of the cost of supply study. The proposed electricity charges and tariff structure is subject to National Electricity Regulator of South Africa (NERSA) approval.

The impact of the proposed tariff increases on the monthly services account for the various consumer categories is summarized in **APPENDIX 2.**

HIGH LEVEL CAPITAL AND OPERATING BUDGET FOR 2026/2027 – 2028/2029

The high-level budget depicting the total budget is attached as **APPENDIX 1 – PART 1 – SECTION C.**

TARIFFS

Council's attention is further drawn to the fact that the Tariff List attached as **APPENDIX 3** includes Sundry Tariffs as a basket of services and charges, i.e. Land Use Management Fees, Development contributions, Technical Charges, etc. In this regard, the proposed tariff list must be consulted for the detail.

BUDGET RELATED POLICIES & BY-LAWS

A summary of changes, emanating from the IDP and Budget public participation process/ roadshow, to budget related policies is attached as **Appendix 4.**

The following budget related policies and by-laws were revised:

Insurance Policy **(Appendix 5)**

Rates Policy **(Appendix 6)**

Indigent Policy **(Appendix 7)**

Credit Control and Debt Collection Policy **(Appendix 8)**

Irrecoverable Debt Policy **(Appendix 9)**

Development Charges Policy **(Appendix 10)**

Wayleave Policy **(Appendix 11)**

Cash Management and Investment Policy **(Appendix 12)**

Accounting Policy **(Appendix 13)**

Asset Management Policy **(Appendix 14)**

Pool Vehicle Policy **(Appendix 15)**

Supply Chain Management Policy **(Appendix 16)**

Grants-In-Aid Policy **(Appendix 17)**

Ward Allocation Policy **(Appendix 18)**

Ward Committee Policy **(Appendix 19)**

Petty Cash Policy **(Appendix 20)**

Virementation Policy **(Appendix 21)**

Preferential Procurement Policy **(Appendix 22)**

Travel and Subsistence Policy **(Appendix 23)**

Cost Containment Policy **(Appendix 24)**

Tariff Policy **(Appendix 25)**

Tariff By-law **(Appendix 26)**

The following budget related policies and by-laws were unchanged:

Rates By-law **(Appendix 27)**

Credit Control and Debt Collection By-law **(Appendix 28)**

Special Ratings Area Policy **(Appendix 29)**

Special Ratings Area By-law **(Appendix 30)**

Infrastructure Unbundling of Assets **(Appendix 31)**

Borrowing, Funds and Reserves Policy **(Appendix 32)**

Budget Implementation and Monitoring Policy **(Appendix 33)**

Liquidity Policy **(Appendix 34)**

Inventory Management Policy **(Appendix 35)**

Financing of External Bodies performing municipal functions Policy **(Appendix 36)**

OTHER SUPPORTING DOCUMENTATION

The additional information as prescribed by the budget and reporting regulations are attached as **APPENDIX 1 – PART 2 – SECTION P.**

6.3 Financial Implications

Financial impact already discussed above.

6.4 External Loan for 2026/2027

That Council specifically note and consider the need to take up external loans to fund critically needed refurbishment of infrastructure to the amount of R520 million of which over the MTREF R187 million will be required in year one, R199 million in year two and R134 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary).

6.4 Legal Implications

The item at my disposal is compliant with the relevant legislative framework.

6.5 Staff Implications

None.

6.6 Previous / Relevant Council Resolutions:

39th Council Meeting – 31 March 2026

Item 8.5: Medium Term Revenue and Expenditure Framework 2026/2027 – 2028/2029

6.7 Risk Implications

None.

6.8 Comments from Senior Management:

6.8.1 Director: Infrastructure Services

Noted.

6.8.2 *Director: Planning and Development Services*

Noted.

6.8.3 Director: Community and Protection Services:

Noted.

6.8.4 Director: Corporate Services:

Noted.

6.8.5 Chief Financial Officer:

Noted.

6.8.6 *Municipal Manager:*

Noted.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2026-05-20: ITEM 6.2

(a) that the High-Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved;

(b) that the Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX 1 – PART 1 – SECTION D, be approved;

(c) that the three-year Capital Budget for 2026/2027, 2027/2028 and 2028/2029, as set out in APPENDIX 1 – PART 2 – SECTION N, be approved;

(d) that the proposed rates on properties in WCO24, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX 3, be approved;

(e) that the proposed amendments to existing budget related policies, other policies and by-laws as set out in APPENDICES 4 - 36, be approved;

(f) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R520 million of which R187 million will be required in year one, R199 million in year two and R134 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;

(g) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially; and

(h) that Council takes note of MFMA circulars 132 & 134 that was published to guide the MTREF for 2026/2027 to 2028/2029 as set out in APPENDICES 37- 38;

(i) that Council takes note of the mSCOA Road Map as set out in APPENDIX 39;

(j) that Council takes note of the Capital Projects above R50 million and confirm approval of same; and

(k) that Council takes note that the public comments and submissions were considered with the compilation of the final budget.

APPENDIX 1

STELLENBOSCH MUNICIPALITY

MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK FOR THE FINANCIAL PERIOD 2026/2027 TO 2028/2029

Vision:

We describe the vision of where we want to be as a Municipality and the Greater Stellenbosch area as the

"An Integrated Valley of Opportunity and Innovation"

Mission:

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community.

Our Values

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the Municipality in an honest and ethical manner.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Transformation: We, as custodians of hope, will work tirelessly at transforming our Municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality to be a responsive municipal entity with zero tolerance for corruption and illegal actions.

PART A

A: RESOLUTIONS

It is recommended to Council,

a) that the High Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved;
b) that the Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX 1 – PART 1 – SECTION D, be approved;
c) that the three-year Capital Budget for 2026/2027, 2027/2028 and 2028/2029, as set out in APPENDIX 1 – PART 2 – SECTION N, be approved;
d) that the proposed rates on properties in WCO24, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX 3, be approved;
e) that the proposed amendments to existing budget related policies, other policies and by-laws as set out in APPENDICES 4 - 36, be approved;
f) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R520 million of which R187 million will be required in year one, R199 million in year two and R134 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;
g) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially;
h) that Council takes note of MFMA circulars 132 & 134 that was published to guide the MTREF for 2026/2027 to 2028/2029 as set out in APPENDICES 37- 38;
i) that Council takes note of the mSCOA Road Map as set out in APPENDIX 39;
j) that Council takes note of the Capital Projects above R50 million and confirm approval of same; and
k) that Council takes note that the public comments and submissions were considered with the compilation of the final budget.

B: EXECUTIVE SUMMARY

Economic Outlook

The South African economy has experienced over a decade of constrained growth, GDP growth is averaging below 2%, which is far below the level needed to meet national needs. In 2025, growth was a mere 1.4% and is projected to average 1.6% in 2026, 1.8% in 2027, settling at 2% at the end of the medium term in 2028, supported by continued momentum on structural reforms, improving confidence, lower interest rates and higher investment.

The 2026 National Budget highlights that while inflationary pressures began to moderate and interest rates were expected to stabilise, the global economic environment has become increasingly uncertain due to emerging geopolitical risks. In particular, the escalation of the conflict in Iran has introduced significant volatility into global energy markets.

The ongoing conflict has disrupted key global oil supply routes, particularly through the Strait of Hormuz, resulting in increased volatility in international oil prices. The rise in crude oil prices has translated directly into higher fuel prices globally, placing upward pressure on transport and production costs across economies.

These developments have introduced secondary inflationary pressures, as increased fuel costs raise the cost of goods and services across the economy. This has a direct impact on food prices, logistics, manufacturing input costs and overall cost of living. As a result, inflation forecasts have been revised upward relative to earlier projections, with expectations that inflation may remain elevated in the short term before stabilising over the medium term.

The Bureau for Economic Research (BER) indicates that inflation, which was previously expected to stabilise within the 4% to 5% range, may trend higher in the short term due to these global shocks. This creates additional pressure on household disposable income and increases the cost of doing business.

Although improvements in electricity supply have reduced the intensity of load shedding domestically, energy security risks remain, and the global energy shock further compounds the economic outlook. Rising living costs, high unemployment and constrained household income continue to place pressure on consumers and limit economic expansion.

Despite these challenges, there are still positive developments supporting economic recovery, including improved investor confidence, easing domestic inflation prior to the shock, gradual interest rate stabilisation and continued progress in structural reforms. However, the geopolitical environment introduces downside risks to these projections.

Government's strategic priorities remain focused on driving inclusive growth and job creation, reducing poverty and the cost of living, and building a capable, ethical and developmental state.

Economic & Fiscal Strategy

The Medium-Term Budget Policy Statement (MTBPS) outlines a pro-growth and fiscally responsible agenda built on four key pillars:

1. **Macroeconomic Stability:**

Focus on reducing economic volatility and managing inflation to support investment, savings and sustainable growth. A stable macroeconomic environment contributes to reduced borrowing costs and improved fiscal sustainability.

2. **Structural Reforms:**

Ongoing reforms aimed at improving efficiency and competitiveness in key sectors such as energy, logistics, water and telecommunications. The continuation of Operation Vulindlela remains central to unlocking economic growth and improving service delivery, with a growing focus on municipal performance and infrastructure delivery.

3. **State Capability & Governance:**

Strengthening institutional capacity, governance and accountability across all spheres of government. This includes improved public financial management, digital transformation and enhanced service delivery capabilities.

4. **Public Infrastructure Investment:**

Increased investment in strategic infrastructure, including electricity, transport and water, supported by improved public-private partnership frameworks. Infrastructure investment is recognised as a key driver of economic growth, job creation and long-term productivity.

Public Investment & Fiscal Measures

Government's fiscal strategy is designed to stabilise public finances while supporting economic growth and service delivery:

- **Debt and Fiscal Consolidation:** Government debt is expected to stabilise over the medium term, supported by efforts to maintain a primary budget surplus and manage borrowing levels.
- **Revenue Measures:** Targeted tax measures are implemented to support fiscal sustainability while balancing economic growth considerations.
- **Social Spending:** Continued prioritisation of social services, including health, education and social protection, to support vulnerable households.

- **Wage Agreements:** Public sector wage increases remain a significant cost driver and are managed within a constrained fiscal framework.
- **Infrastructure Investment:** Increased allocation towards infrastructure development to address service delivery backlogs and support economic growth.

Economic Growth & Domestic Outlook

Economic growth is expected to improve gradually, supported by:

- Improved energy supply stability and ongoing structural reforms
- Increased infrastructure investment and public spending
- Stabilising inflation and interest rates (subject to global pressures)
- Gradual recovery in global economic conditions

However, the global geopolitical environment, particularly the conflict in Iran and its impact on energy markets, presents a key downside risk to the economic outlook. Rising fuel prices and associated inflationary pressures may dampen growth prospects and delay further monetary policy easing.

The BER projects moderate economic growth over the medium term, with continued risks from global uncertainty, logistics constraints and domestic structural challenges. The focus remains on unlocking private sector investment, particularly in renewable energy, infrastructure and logistics.

Government Priorities & Budget Highlights

Key priorities in the 2026 Budget and Budget Review include:

- **Structural Reforms:** Accelerating reforms to improve energy security, logistics efficiency and digital infrastructure.
- **Social Protection and Public Services:** Continued investment in social services and support programmes.
- **Revenue and Tax Measures:** Ensuring sustainable revenue generation while minimising negative economic impacts.
- **Fiscal Discipline:** Maintaining a balanced approach to expenditure and borrowing.
- **Public Investment:** Scaling up infrastructure investment to support economic recovery.
- **Enhanced Governance:** Strengthening state capacity, financial management and accountability across all spheres of government.

Western Cape & Municipal Focus

The Western Cape Government aligns with national priorities while emphasising regional growth through the Growth for Jobs Strategy, which focuses on:

- **Energy Resilience:** Expanding renewable energy and reducing reliance on Eskom supply
- **Economic Growth and Job Creation:** Supporting key sectors such as tourism, agriculture, manufacturing and technology
- **Infrastructure Investment:** Improving transport, logistics and bulk infrastructure
- **Municipal Financial Sustainability:** Strengthening municipal revenue management and cost-reflective tariffs
- **Public Safety:** Enhancing law enforcement and creating a safe environment for investment

Economic Outlook: Stellenbosch Municipality

Economic Performance and Growth

According to the MERO 2024/25, Stellenbosch Municipality remains a key economic hub within the Cape Winelands District, contributing significantly to regional GDP and employment. The local economy continues to demonstrate resilience, supported by a diversified sectoral base.

Sectoral Contributions

Key sectors contributing to the local economy include:

- Finance, Insurance, Real Estate and Business Services: 29.3%
- Wholesale and Retail Trade, Catering and Accommodation: 16.2%
- Manufacturing: 15.5%
- Agriculture and Agri-Processing
- Tourism
- Education

This diversified economic structure supports resilience and long-term growth.

Financial Management

Stellenbosch Municipality continues to demonstrate strong financial governance, as evidenced by five consecutive clean audit outcomes, reflecting sound financial management, accountability and transparency.

Capital Expenditure and Strategic Alignment

The Municipality's Capital Expenditure Framework (CEF) provides a structured approach to infrastructure investment, aligned with the Integrated Development Plan (IDP) and the Spatial Development Framework (SDF).

This alignment ensures that capital investment supports the Municipality's spatial vision, prioritises Priority Development Areas (PDIs) and addresses historical spatial inequalities.

Through this integrated planning framework, the Municipality is able to respond directly to economic challenges by directing investment towards areas with the highest potential for economic impact and social development.

Targeted investment in PDIs supports:

- economic growth and job creation
- local economic development (LED)
- expansion of the municipal revenue base
- improved access to services and infrastructure

Infrastructure-led development in these areas stimulates private sector investment, supports business development and contributes to long-term fiscal sustainability.

Economic Challenges

Stellenbosch Municipality continues to face the following challenges:

1. Economic growth volatility, exacerbated by global and domestic shocks
2. Unemployment and labour market pressures
3. Increasing infrastructure and service delivery demands due to urbanisation
4. Economic inequality and spatial disparities
5. Environmental sustainability and climate resilience requirements

Strategic Interventions Using the CEF

The Municipality addresses these challenges through targeted interventions:

Infrastructure Investment

- Upgrading road, electricity and bulk infrastructure
- Expanding waste management and mobility infrastructure
- Developing LED hubs to support economic activity

Job Creation and Skills Development

- Public employment programmes and EPWP initiatives

- Local labour sourcing requirements in municipal projects
- Skills development aligned to economic sectors

Housing and Urban Development

- Affordable housing programmes and inclusionary zoning
- Expansion of water, sanitation and basic services
- Development within Priority Development Areas

Renewable Energy and Sustainability

- Investment in solar and alternative energy solutions
- Energy security initiatives to support business continuity
- Climate resilience and environmental sustainability projects

Tourism and SME Support

- Investment in tourism infrastructure and destination development
- Support for small businesses, emerging farmers and local enterprises

Stellenbosch Economic Outlook

- **Short-term:** Economic recovery supported by infrastructure investment and energy initiatives
- **Medium-term:** Growth driven by skills development, business support and investment attraction
- **Long-term:** Sustainable and inclusive growth through diversification, innovation and spatial transformation

Municipality's Financial Planning

The constrained economic environment, compounded by rising inflationary pressures linked to global energy market volatility, continues to impact municipal finances and household affordability.

Municipalities are therefore required to:

- improve revenue collection and financial management
- implement cost containment measures
- ensure efficient and effective delivery service

National Treasury requires municipalities to adopt cost-reflective tariffs, while balancing affordability considerations, particularly in a high-inflation environment.

Budgets must be funded from realistically anticipated revenue, with conservative assumptions to account for economic uncertainty and affordability constraints.

The Municipality continues to align its financial planning with:

- National Treasury guidelines
- IDP priorities
- Inflation forecasts (including upward risks)
- Revenue and tariff strategies

The national fiscal framework emphasises fiscal discipline, requiring municipalities to maintain financial sustainability, responsible borrowing and efficient expenditure management. In this context, Stellenbosch Municipality continues to prioritise sound financial management, infrastructure investment and revenue enhancement to ensure long-term sustainability and improved service delivery outcomes.

Municipality's Financial Planning considering the Economic Outlook and guidance from National Treasury

The economic outlook has improved moderately, however there is still room for improvement which continues to impact municipal finances, and this has strained consumers' ability to pay for services. Coupled with this is the marginal growth in national transfers compared to previous financial years. These two critical factors necessitate municipalities to function optimally, suggesting that municipal operations, processes and procedures must be efficient. Therefore, municipalities must maximize their revenue generating potential and collect what is due to them and at the same time eliminate wasteful and non-core spending.

National Treasury encourages municipalities to maintain tariff increases and adopt a tariff setting methodology at levels that reflects an appropriate balance between the affordability to poorer households and other customers, while ensuring the financial sustainability of the municipality. Headline inflation declined to 4.4 per cent during 2024/2025 in the fourth quarter, resulting in an average inflation of 4.4 per cent for the year. The Consumer Price Index (CPI) inflation is forecasted to increase from 3.3 per cent in 2025/2026 to 3.4 per cent in 2026/2027, thus municipalities are required to justify all increases more than the projected inflation target for 2026/2027. Municipalities must ensure that their budgets are funded from realistically anticipated revenues. This means that the municipality must refrain from assuming collection rates that are unrealistic and unattainable.

The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act, which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. The municipalities must therefore generate sufficient revenue to fully recover their costs, deliver services to customers sustainably and invest in the infrastructure that promises local economic development.

The municipality's revenue is determined by setting a package of tariffs that is not only considered to be affordable to its ratepayers and the users of its services but deemed to be at fair and realistic levels. It is important that municipalities periodically conduct cost of supply studies in the provision of each basic service.

Tariff increases by Eskom and Water Boards are above inflation and should be considered as such while determining cost reflective tariffs. In the instance of bulk tariff increases for electricity, municipalities are encouraged to apply for electricity tariff increases that reflect the total cost of providing the service, to ensure that they are working towards achieving fully cost-reflective tariffs that will assist them to achieve financial sustainability. Municipalities should consider the following facts during the tariff setting process, namely, the costs of bulk purchases and the fluctuation in the seasonal cost thereof; the consumption patterns to enable better demand planning and management; and in the event that municipalities have been under recovering costs, embark on a process to correct their tariff structures over a reasonable time period so that cost reflective tariffs are achieved, which in turn will result in financial sustainability.

Local government confronts tough fiscal choices in the face of financial and institutional problems that result in service-delivery breakdowns and unpaid bills. Municipalities can offset these trends by improving their own revenue collections, working more efficiently and implementing cost-containment measures. To maintain a funded budget, municipalities need to not only focus on tariff increases but also focus on how to eliminate expenditure that is unnecessary. The Cost Containment Regulations were issued on 07 June 2019, as well as the municipality's Cost Containment Policy is embedded in the municipality's operations that assists in driving down costs, ensuring that value for money is achieved, and resources of the municipality is used effectively, efficiently and economically.

Municipalities are required to consider the following during the compilation of the 2026/2027 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;

- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulation read with MFMA Circular No.82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Water Conservation: Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- 2026 Local Government Elections (transitional processes and hand-over reports for the newly elected councils);
- Prioritize the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

The aforementioned were taking into account during the compilation of the municipality's budget.

2025/2026 represents the last year of the current municipal council's electoral term. The local government elections are scheduled to take place between November 2026 and January 2027. Circular 132 of the MFMA highlights the following four risks that should be managed. Firstly, if elections takes place after the start of the new financial year the outgoing council will be responsible to approve tariffs for the 2026/2027 financial year and newly elected council will implement it, secondly the outgoing council must ensure that they comply with the timeframes for the approval of the budget, thirdly the outgoing council should ensure that the budget is funded, and not prepare a "election friendly" budget that with unrealistically low tariffs and over-ambitious capital expenditure programme. Lastly municipalities must ensure that the public and stakeholder consultation processes are adhered to as required by the relevant legislature.

Circular 132 of the MFMA also highlights the handover process from the current council to the newly elected council and stipulates the requirements that must be complied with. The municipality's financial sustainability should be protected at all times in the build-up to the elections. Sound decision-making is of utmost importance to ensure long-term sustainability of municipal finances and service delivery long after the election period is completed.

The application of sound financial management principles for the compilation of the Stellenbosch municipality's long term financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities. The municipality's business and service delivery

priorities were reviewed as part of this year's planning, through the Integrated Development Plan (IDP), and the annual budget process.

Funds were shifted from low to high priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken on non-core and 'nice to have' items with regards to expenditure. The municipality has embarked on developing a revenue enhancement strategy to optimize revenue, including the collection of debt owed by consumers.
Furthermore, the municipality has undertaken various customer care initiatives to ensure that the municipality truly involves all citizens in the process of ensuring a people lead government.

The following budget principles and guidelines directly informed the compilation of the 2026/2027 MTREF:

- Integrated Development Plan was used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be affordable. However, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- National, provincial and local priorities;
- Headline inflation forecasts; and
- Funding choices and modelling.

The Integrated Development Plan (IDP) was used as a guiding strategic document to inform the budget compilation. The challenge, however, is still to deliver services more efficiently and effectively with a tight financial envelope.

Stellenbosch municipality's revenue strategy was based on the following fundamentals, namely, tariff policies of the municipality, economic outlook and development for Stellenbosch and surrounding areas, National Treasury's guidelines and macroeconomic policy, National, Provincial and Regional fiscal growth rates and electricity tariffs as approved by National Electricity Regulator of South Africa (NERSA).

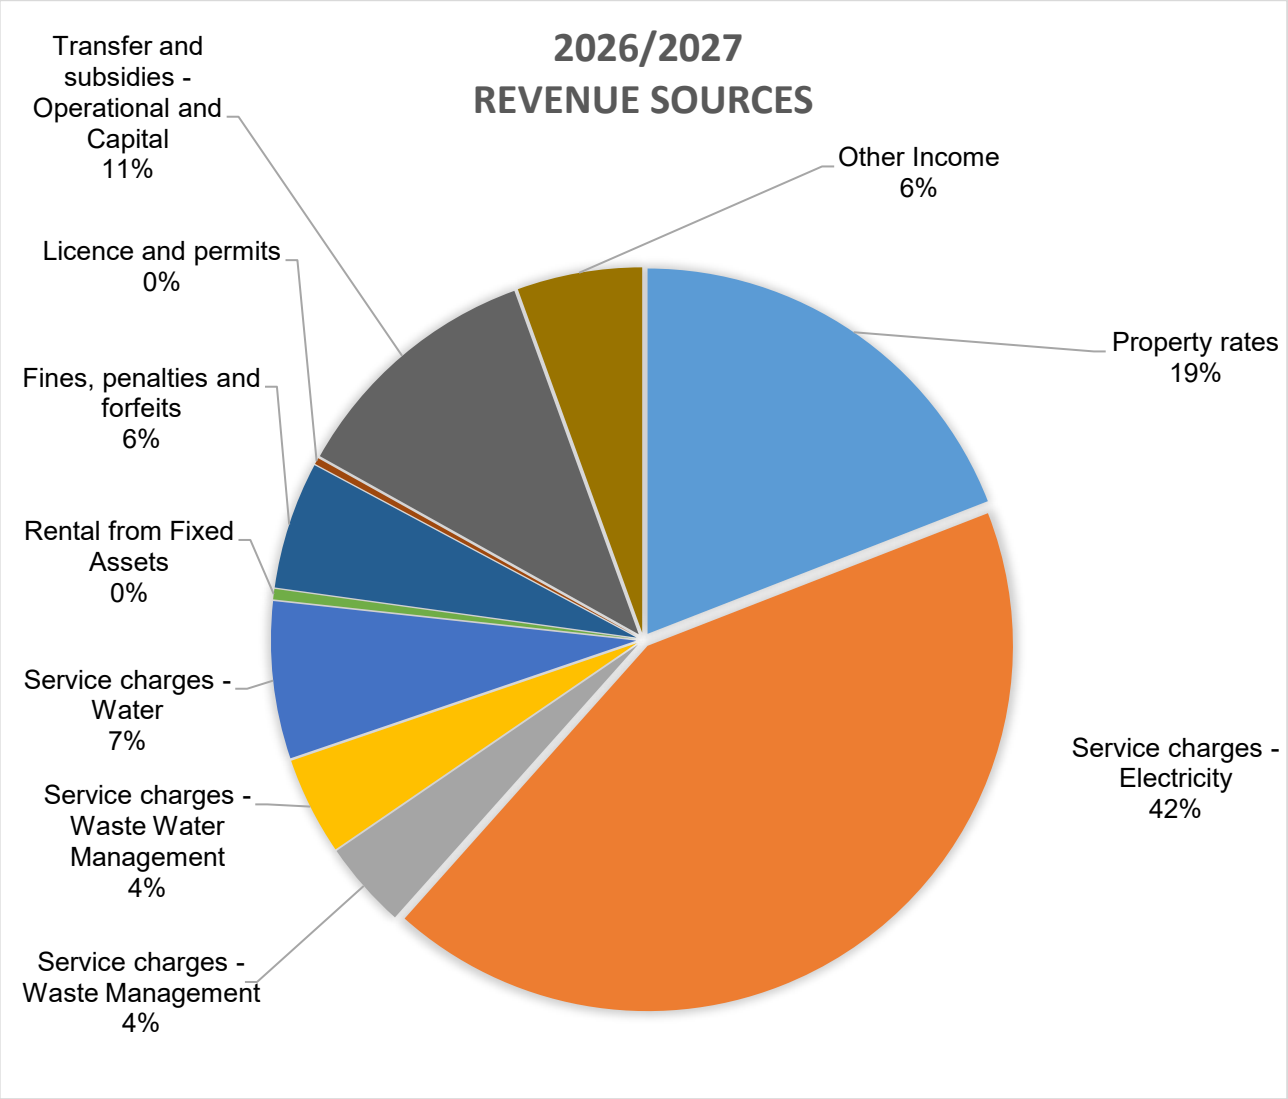
The financial resources to fund the Operational Budget will and must consist of realistically anticipated revenue generated from property taxes, service charges and other income.

The municipality were mindful of the estimated headline inflation for 2026/2027 of 3.4% forming the basis of the extensive income modelling exercise but also taking into account the principles of economic services that are cost reflective, trading services generating surpluses, the effect

of escalating salary costs and bulk purchases. Inflation is forecast to fluctuate around 3.4% to 3.2% over the medium term in line with moderate inflation expectations.

The national budget focuses on fiscal consolidation. This means that we as municipalities must ensure that we do not borrow beyond our ability to repay and we do not spend money we do not have, until we ignite growth and generate revenue, we have to be tough on ourselves.

The total budget quantum for the 2026/2027 year is R3 652 819 627 of which R3 073 517 776 (84%), is allocated to the operating budget and R579 301 851 (16%) to capital investment.



OPERATING BUDGET – REVENUE

Overall revenue budget increase was limited to 6,73% resulting in annual operating revenue increasing from R3 015 248 785 in 2025/2026 to R 3 232 648 139 in 2026/2027. Taking cognisance of the economic conditions, the resultant low employment levels and levels of disposable income, it was important to keep services affordable by critically looking at the costs associated with providing the service.

Accordingly, management investigated potential pitfalls and amongst others found that spiralling expenditure on electricity bulk purchases from Eskom, above inflation increase for employee costs and the Geopolitical outlook having an impact on Fuel and Oil prices. These expenditure items did not keep trend with the realistically anticipated revenue streams.

The municipality is in the process of procuring energy from renewable sources. We expect that renewable energy will cost less than what the Municipality is currently paying to Eskom, furthermore it will also reduce reliance on Eskom.

REVENUE SOURCES	**2025/2026**	**2026/2027**	**% INCR**
Property rates	577 762 768	616 977 073	6,36%
Service charges - Electricity	1 240 948 763	1 373 854 376	9,67%
Service charges - Waste Management	117 789 486	124 856 855	5,66%
Service charges - Waste Water Management	132 112 779	140 039 546	5,66%
Service charges - Water	213 953 009	224 650 659	4,76%
Rental from Fixed Assets	14 249 488	14 961 962	4,76%
Fines, penalties and forfeits	173 402 829	182 072 970	4,76%
Licence and permits	8 754 465	9 192 188	4,76%
Transfer and subsidies - Operational and Capital	361 900 880	367 285 409	1.47%
Other Income	174 374 318	178 757 101	2,45%
Total Operating Revenue	**3 015 248 785**	**3 232 648 139**	**6,73%**

- Average tariff increases:

Property Rates	6.00%
Electricity	10.71%
Water	5.50%
Sanitation	6.00%
Refuse removal	6.00%

- The proposed electricity tariffs are subject to change based on the final findings and recommendation of the cost of supply study. The proposed electricity charges and tariff structure is subject to National Electricity Regulator of South Africa (NERSA) approval.

- The Municipality succeeded in accessing the EPWP Incentive Grant for Municipalities in a bid to give some relief to the poorest of the poor by means of contract employment opportunities over the short term. The allocation for the 2026/27 financial year is R 2 731 000.

Rates

In the 2026/2027 financial year, the Property Rates Tariff paid by owners will increase with 6.00%, whilst total rates also increased with 6.00%. The new General Valuation Roll will be implemented on 01 July 2026. There will be an increase in valuations due to new properties being registered, improvements to existing properties and an increase in property valuations.

Rates rebates to senior citizens and disabled persons are also available as per the requirements of the amended Rates Policy to qualifying ratepayers with a monthly income of R15 000 or less.

Electricity

According to NERSA, the inclining block rate tariff structure is commonly used to charge water usage. The feature of this tariff structure is that the more you use, the higher the average price. The objective of the inclining block tariff is to provide protection for lower usage customers against high price increases resulting in a reduction in tariffs to these customers. This means that higher consumption customers will see increasingly punitive charges based on their electricity usage.

Council's attention is further drawn to the fact that the proposed electricity tariff is at 10.71% whereas the increase in electricity bulk purchases for the 2026/2027 financial year is 9.01% as approved by NERSA (National Electricity Regulator of South Africa) for implementation by all municipalities.
The municipality is in the process of procuring energy from renewable sources. The expectation is that renewable energy will cost less than what the Municipality is currently paying to Eskom, furthermore it will also reduce the reliance on Eskom. This will lower the cost of the providing electricity to residents and limit the impact of above inflation increases from Eskom.

Municipalities are also urged to examine the cost structure of providing electricity services and to apply to NERSA for electricity tariff increases that reflect the total cost of providing the service, so that they work towards achieving fully cost-reflective tariffs that will help them achieve financial sustainability.

Water

Taking cognizance of the challenges that the country is currently experiencing due to the severe drought, the plight of the poor and the affordability of basic services, the average tariff increase for the rest of the consumptive water scales is 5.50%. The tariff is designed to cater for current and future capital investment in basic water infrastructure and the need to generate surpluses. **It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2026/2027 and not based on the approved budget for the same year.**

Sewerage (Sanitation)

The proposed increase in this tariff is 6.00%. Sanitation services are classified as an economical service. This means that the service charges for sanitation must cover the cost of providing the service, i.e. it must at least break even. This tariff increase is necessitated by operational requirements, maintenance of existing aging infrastructure, new infrastructure financing/provision and to ensure that the service is delivered in a sustainable manner. **It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2026/2027 and not based on the approved budget for the same year.**

Refuse (Solid Waste)

Refuse removal services, like sanitation are also classified as an economical service. This means that the service charges for refuse must cover the cost of providing the service, i.e. it must at least break even. The municipality will implement an above inflation tariff increase as this service does not break even. The solid waste tariffs were modelled to give effect to the principle of the service charge being cost reflective as the service cannot be cross-subsidized. It is proposed that the tariff increases by 6.00% because of the before mentioned.

It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2026/2027 and not based on the approved budget for the same year.

Debt Management

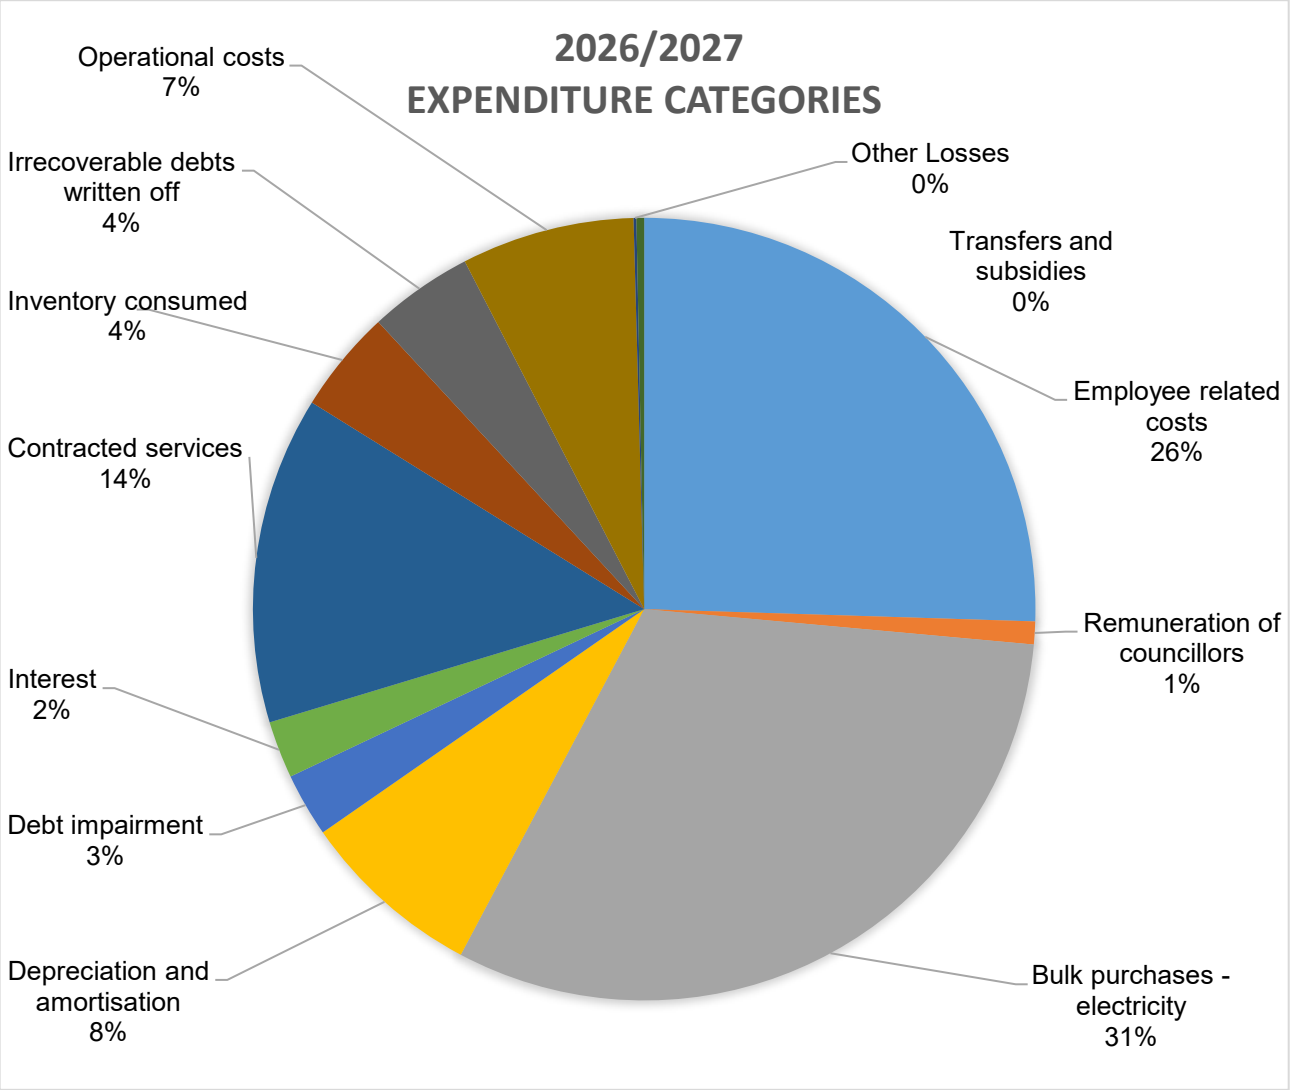
The municipality is currently executing all credit control and debt collection procedures as required in the approved Credit Control and Debt Collection policy. These internal procedures followed include the disconnection of services, where there are services that can be disconnected, the issuing of final notices, the conclusion of reasonable agreements where the settlement of the accounts is not possible and also the follow up on defaulting debtors not honoring arrangements. The municipality continuously enforces the above procedures to ensure that debt which is collectable is collected and all debt that is regarded as not recoverable, be written off.

The biggest challenge with the implementation of credit control and debt collection processes is in areas where the municipality is not supplying electricity. Eskom is the service provider in these areas and the blocking or restriction of the electricity supply is not possible.

The municipality developed a revenue enhancement strategy. The document focuses on the formulation and implementation of strategies to improve financial management and control within the municipality. The objective of any successful revenue enhancement strategy is to build and improve current payment levels and then to recover arrear debt.

The municipality has a Credit Control and Debt Collection By-Law to strengthen the internal credit control and debt collection procedures through handing over all debt over 90 days to the appointed attorneys.

A zero-tolerance approach will be followed where consumers are able to pay for services, as this indirectly denies paying consumers the level and standard of service that they are entitled to.



OPERATING BUDGET - EXPENDITURE

The budget sees an increase in annual operating expenditure from R2 831 662 033 in 2025/2026 to R 3 073 517 776 in 2026/2027. This 7.87% increase is primarily due to increases in several expenditure categories, examples which are included in the table below:

EXPENDITURE CATEGORIES	2025/2026	2026/2027	% INCR.
Employee related costs	727 234 893	783 788 311	7,22%
Remuneration of councillors	27 593 419	28 973 093	4.76%
Bulk purchases - electricity	875 125 647	962 638 212	9,09%
Depreciation and amortisation	225 960 324	232 739 088	2,91%
Debt impairment	-93 358 594	80 766 850	215,59%
Interest	70 951 095	72 630 924	2,31%
Contracted services	364 276 791	415 671 065	12.36%
Inventory consumed	120 281 165	130 898 104	8,11%
Irrecoverable debts written off	274 162 666	132 403 933	-107,07%
Operational costs	224 756 798	219 703 159	-2.30%
Other Losses	630 000	3 539 938	82,20%
Transfers and subsidies	14 047 829	9 765 099	-43.86%
Total Expenditure	**2 831 662 033**	**3 073 517 776**	**7,87%**

Council to note the upward pressure of external borrowing interest (Finance Charges) on future tariffs. In this regard, strong political will and strategic leadership is required to ensure that the municipality maintains the position of being responsive to its communities by ensuring that service charges are kept affordable and realistic by amongst other, critically investigating funding choices and expenditure decisions.

The Municipality have a balanced funding approach for its Capital Budget. The Capital Budget is funded from the Capital Replacement Reserve (Own Funds), External Loans and Grant Funding. External Loans are used to fund capital projects that will create additional infrastructure capacity that will be serviced by future consumers. This will result in an increase in the revenue base and contribute economic growth.

Explanation of significant expenditure variances:

Finance Charges

The interest payable for the 2026/2027 financial year has been calculated based on the maximum possible borrowings that could be drawn down by the end of the 2026/2027 financial year.

Bulk Purchases

The municipal tariff guideline increases issued by NERSA setting the bulk purchase increase at 9.01%.

Contracted Services

Budgetary constraints and economic challenges meant that the municipality had to apply a combination of cost-saving interventions and efficiencies.

Additional funding is allocated for security services. The additional funds will help safeguard municipal properties and facilities, potentially reduce vandalism, theft and other risks that could disrupt service delivery. The investment in security could also lead to long-term costs savings by minimizing repairs and maintenance expenses.

Irrecoverable debts written off

The municipality made provision for long outstanding debt to be written off as part of the adjustment budget for the 2025/2026 financial year. This comprises of debt older than 5 years as well as indigent debt. This provision is anomalous in nature and an isolated event contrary to the norms of previous years write offs. Subsequently, due to this large provision made in the 2025/2026, has cause a significant change for the provision then required in the 2026/2027 financial year.

Inventory Consumed

The Geopolitical outlook meant that the Municipality needed to provide above inflationary increase for affected goods and services like Fuel and Oil.

Operational costs

The ward allocations are increased from R200 000 in the current financial year to R250 000 in the 2026/2027 financial year. Provision is also made for above inflationary increase for the licensing and registration of municipal vehicles.

CAPITAL BUDGET

The capital budget decreased from R594 994 272 in 2025/2026 to R579 301 851 in 2026/2027.

DIRECTORATE	2025/2026	2026/2027	% INCR.
Municipal Manager	100 000	60 000	-40,00%
Planning and Development Services	34 485 819	34 125 065	-1.05%
Infrastructure Services	404 059 707	437 595 004	8.30%

CAPITAL PROJECTS ABOVE R50 MILLION INCLUDED IN THE THREE YEAR MTREF

The following projects included in the three-year MTREF budget are above R50 million:

Project Description	2026/2027	2027/2028	2028/2029	MTREF Total
Bien don 66/11kV substation new	35 913 852	45 843 905	58 200 000	139 957 757
Upgrade of WWTW: Klapmuts	30 272 850	2 500 000	30 000 000	62 772 850
Northern Extension Bulk Supply	27 000 000	35 500 000	-	62 500 000
Bird Street Dualling - Adam Tas to Kayamandi	-	10 000 000	50 000 000	60 000 000
Upgrade of IdasValley WTP	1 500 000	40 000 000	10 000 000	51 500 000
	94 686 702	**133 843 905**	**148 200 000**	**513 074 033**

Brief overview of Capital Projects Above R50 million included in the MTREF Capital Budget

1. BIEN DON 66/11Kv SUBSTATION NEW

Construct new 66/11kV substation with all its associated HV,MV equipment and plant and construct a 3,6 km of 66kV overhead line to Eskom distribution substation. The establishment of the 66/11kV Municipal substation yard (the Eskom 66kV metering substation yard will be constructed as a future phase) and will include earthworks for completion of the substation platform, installation of the substation earth mat, construction of the substation access and internal road, construction of the 11kV switching station and control room building and supply, installation, and commissioning of the 66kV outdoor primary plant including the 66/11kV 20MVA transformers, the 66kV protection and control plant and the 11kV indoor switchgear.

2. UPGRADE OF WWTW: KLAPMUTS

The project will be done in two phases; the first phase will aim to improve the efficiency and quality of effluent produced by the plant and the second phase will increase the capacity of the plant.

The first phase deliverables of the project is as follows;

- Modification on the Existing Inlet Works,
- Construction of a new Inlet Works,
- Construction of a new Secondary Settling Tank,
- Construction of a new Division Box,
- All associated pipework,
- Cable ducts,
- Existing services,
- Tie-ins to existing lines/manholes

3. NORTHERN EXTENTION BULK SUPPLY

The northern extension bulk supply project includes the following:

- Construction of a new 11kV switching station building at Newinbosch, Kayamandi & Gevonden;
- Install third 20 MVA Trfr at Cloetesville S/S including all associated works;
- Supply and installation of 11kV GIS indoor switchgear with onboard protection;
- Supply and installation of all secondary equipment (110V battery charger, telemetry/SCADA system, substation security);
- Supply and installation of 11kV gas insulated RMU;
- Supply and Installation 11kV underground cables;
- Excavation of cable trenches;
- Supply and installation of 11kV underground cables;

- Supply and installation of 32mm diameter sleeves for fiber cable;
- Supply and installation of single mode fiber optic cable in fiber sleeves;
- All reinstatement and removal of spoil material from site and
- Testing and commissioning of the complete works.

4. BIRD STREET DUALLING – ADAM TAS TO KAYAMANDI

The project entails the dualling of the R304 within the Municipal area of authority, to dovetail with the dualling of the Provincial Government's Department of Infrastructure Project of the dualling of their portion of the same road. This is to accommodate the growth of the Municipal and Provincial nodes as per the Municipal and Provincial Spatial Development Frameworks, and the Municipality's Council approved Comprehensive Integrated Transport Plan. This includes the construction of an additional lane on both carriageways, turning lanes, intersection upgrades, bridge/culverts upgrades and associated works. The project is in the design and landowner engagement phases and construction is earmarked for the 2027-28 to 2028-29 financial years.

5. UPGRADE OF IDASVALLEY WTP

With regards to the "Upgrade of IdasValley WTP", the municipality is still in initial concept and planning stage with the main aim to upgrade the existing Idas valley treatment plant capacity from treating Raw water into potable water, from 20 Million litres a day to 30 Million litres a day, whilst also upgrading the existing infrastructure to ensure compliance with the various water authorities and regulations.

Major capital expenditure is planned in the following areas during the 2026/2027 financial year:

• Adam Tas Corridor Precinct 10
• Adhoc Reconstruction Of Roads (WC024)
• Bien don 66/11kV substation new
• Bird Street Dualling - Adam Tas to Kayamandi
• Bulk Water Supply Pipe Line & Pumpstations: Franschhoek
• Bulk Water Supply Pipe and Reservoir: Stellenbosch
• Bulk Water Supply Pipe: Cloetesville/ Idas Valley
• Cable replacement 66kV
• Electricity Network: Pniel
• Electrification
• Erf 7001 Cloetesville (380) FLISP
• Expansion of the landfill site (New cells)
• Extention Of WWTW: Stellenbosch
• Fire Station - Jamestown
• Jamestown Transport Network - School Street
• Jamestown: Housing
• Kayamandi: Zone O (±711 services)
• La Motte Old Forest Station (±430 services & ±430 units)
• Lanquedoc Access road and Bridge
• Main Road Intersection Improvements: Strand / Adam Tas / Alexander
• Major Drop-Offs: Construction - Franschoek
• Network Cable Replace 11 Kv
• New Reservoir & Pipeline: Vlottenburg
• Refurbish Plant & Equipment - Raithby WWTW
• Rehabilitation of Langrug Dam and Engineering Services
• Reseal Roads - Stellenbosch & Surrrounding
• Sewerpipe Replacement
• Switchgear Substation University
• System Control Centre & Upgrade Telemetry
• Upgrade of IdasValley WTP

• Upgrade of WWTW Wemmershoek
• Upgrade of WWTW: Klapmuts
• Upgrade transformers at Main substation 7.5MVA to 20MVA
• Waterpipe Replacement

References

1. Include services provided by another entity; e.g. Eskom
2. Stand distance <= 200m from dwelling
3. Stand distance > 200m from dwelling
4. Borehole, spring, rain-water tank etc.
5. Must agree to total number of households in municipal area (informal settlements receiving services must be included)
6. Include value of subsidy provided by municipality above provincial subsidy level
7. Show number of households receiving at least these levels of services completely free (informal settlements must be included)
8. Must reflect the cost to the municipality of providing the Free Basic Service
9. Reflect the cost to the municipality in terms of 'revenue foregone' of providing free services (note this will not equal 'Revenue Foregone' on SA1)

PART 2

A: OVERVIEW OF STELLENBOSCH MUNICIPALITY

Background

Stellenbosch Municipality is located in the heart of the Cape Winelands. It is situated about 50 km from Cape Town and is flanked by the N1 and N2 main routes. The municipal area covers approximately 900 km².

State of the Greater Stellenbosch Area

Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch, and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements. Franschhoek, known as the "French Corner", is celebrated for its exceptional culinary scene, offering a delectable fusion of French and South African flavours. It is a favourite among local and international tourists. Due to recent developments, Klapmuts is considered a regional growth node thanks to its regional connectivity.

Stellenbosch is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone

is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), and Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

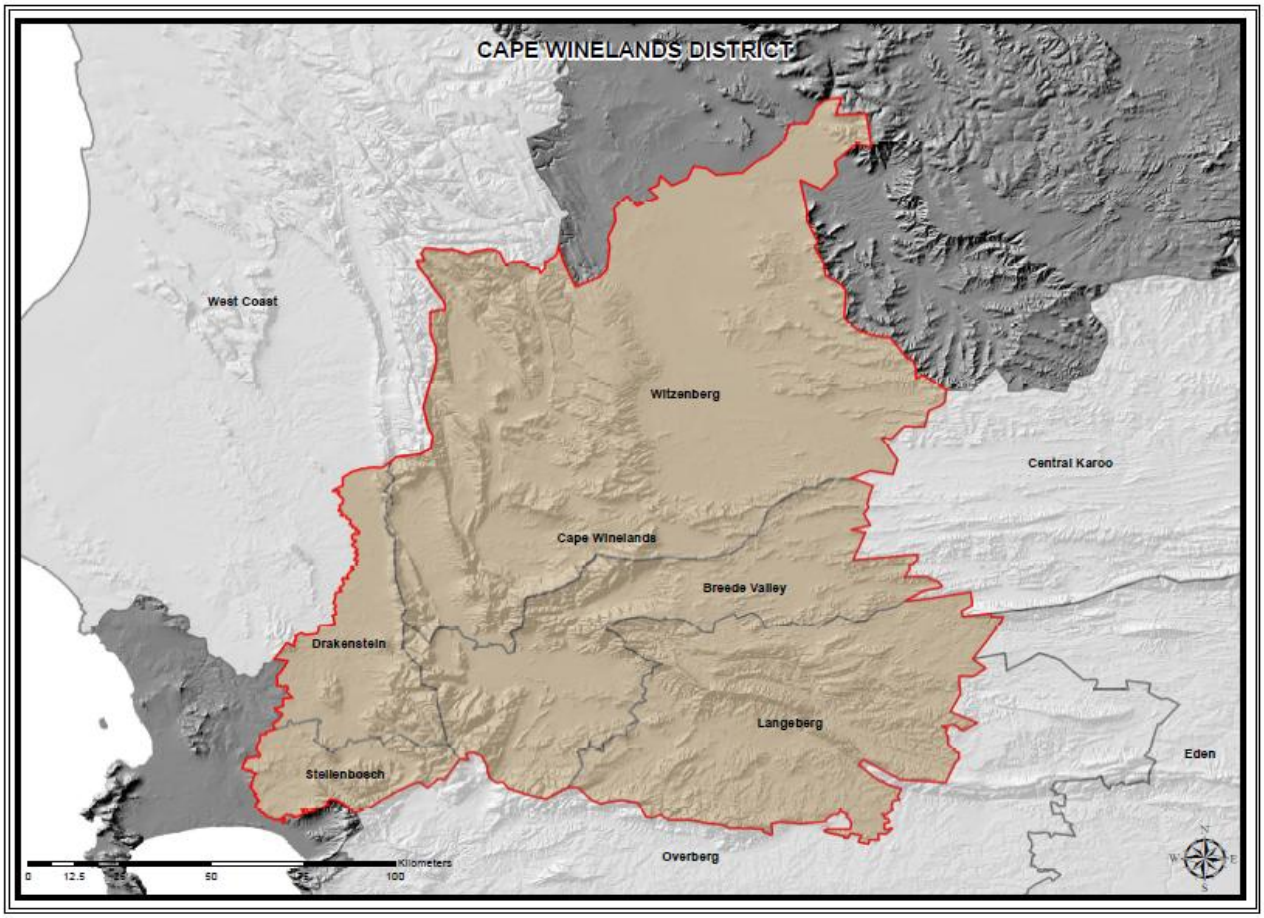
Table 12: Municipal ward demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	On the corner of Moffat Street to the end of Lelie Street, the Corner of Moffat Street to Rustenburg Road, Desch Street to Rustenburg Road, Moffat Street, Hahn Street, Weber Street, Tindell Street, Juffernbruch Street, Kahler Street, Luckhoff Street, Erasmussmith Street, Baker Street, Desch Street, Lelie Street, Protea Street to Erasmusmith Street, Botmanskop Way, Dahlia Street, Speler Street, Rustenburg road of the corner of Helshoogte Road to Lelie Street; Glenelly Estate in Lelie Street; Helderfontein in Helshoogte Road; Nietvoorbij on R44; Blue Jay/ Timberlea Trust Farm on R44; Kloofbosch on R44; Babin Farm on R44; Morgenhoff Wine Estate on R44; Remhoogte on R44; Groenhof on R44; Muratie Wine Estate on R44; Delheim Wine Estate on R44; Kanonkop on R44; Uitkyk on R44; Warrick on R44; Lievland on R44
7	Mostertsdrift, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side

Ward	Areas
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A George Blake Street, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone A Masithandane Street, Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang TRA 1, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4th and 5th Avenue, 10th, 12th and 14th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.

Ward	Areas
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultrey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

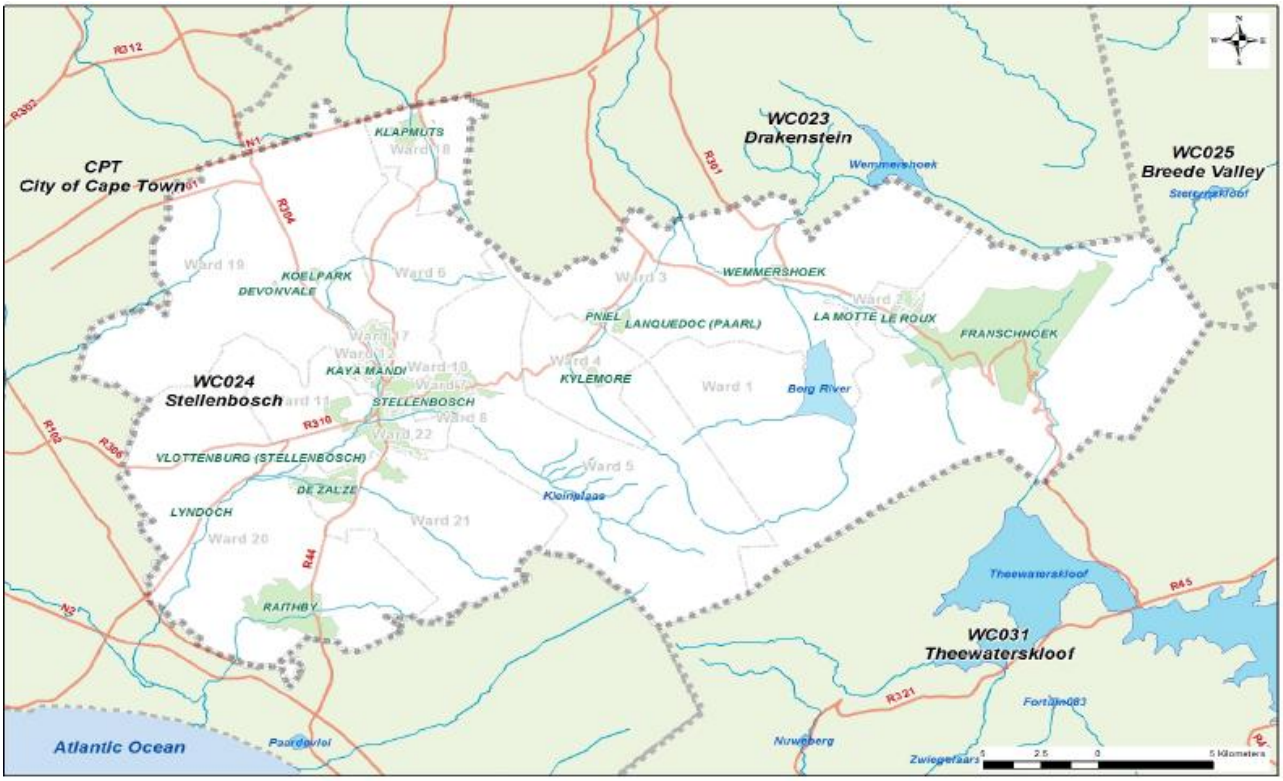
Below is a map of the Cape Winelands District concerning the provincial district boundaries:



Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km2. The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:



Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klapmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlottenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlottenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

1.3 Stellenbosch Municipality at a Glance

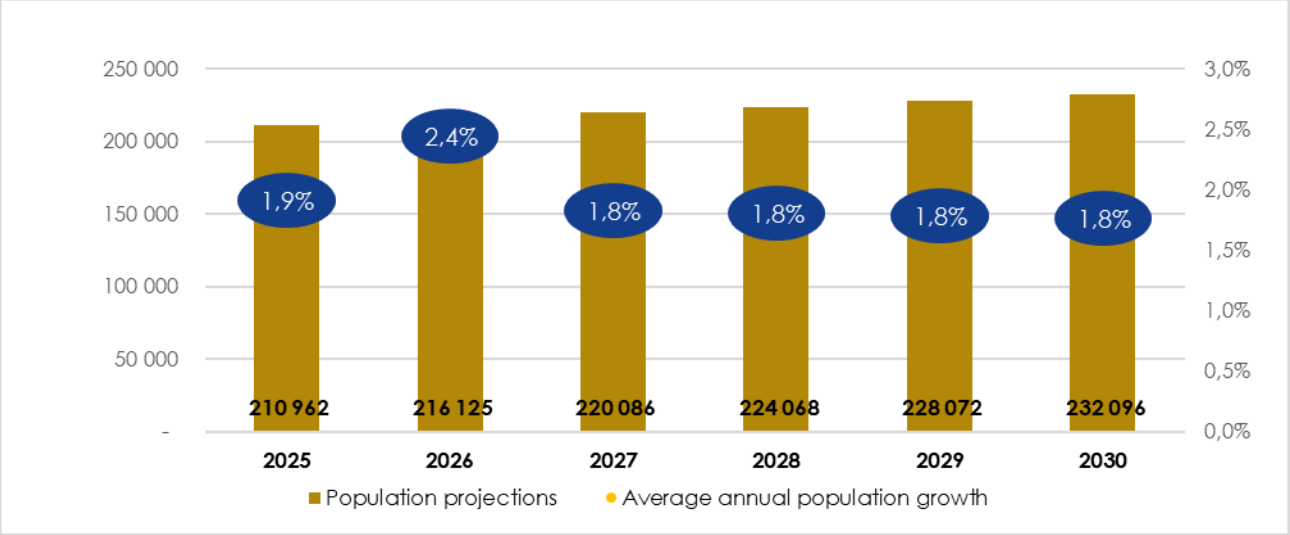
Socio – Economic Context

All socio-economic information is sourced from the Local Government 2025 – 2026 Municipal Economic Review and Outlook (MERO). The report provides a snapshot of the safety and wellbeing of our communities, and economic growth. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The population growth and socioeconomic data are essential for effective municipal planning and the equitable distribution of public services. Population size, household growth, age structure and migration patterns all have a direct impact on the demand for infrastructure, housing, education, healthcare and social services. In rapidly expanding economic hubs such as the Stellenbosch municipal area, monitoring these trends enables policymakers to better anticipate future service demands, allocate resources efficiently, and design targeted interventions that enhance social wellbeing while also strengthening economic resilience.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government MERO 2025 for the Stellenbosch municipal area.



Population Growth

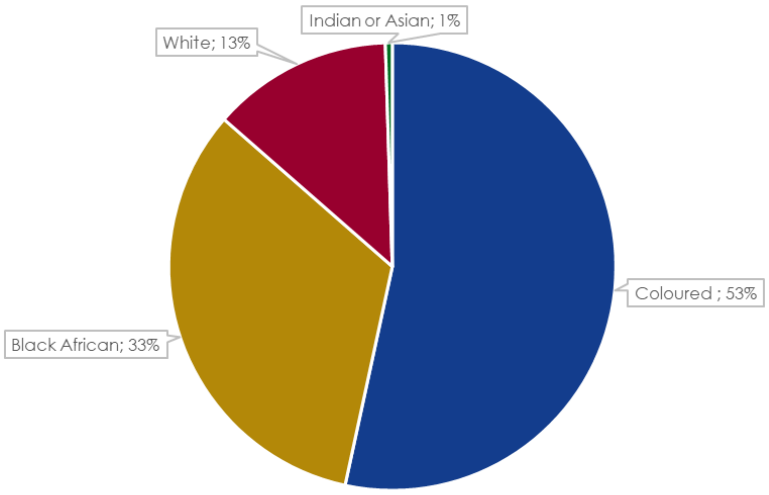
In 2025, the Stellenbosch municipal area was home to **210 962** individuals, reflecting an annual growth rate of **1.9** per cent during 2025. This significant increase illustrates Stellenbosch's appeal, particularly due to migration with the educational institutions and vibrant community atmosphere. This growth necessitates strategic planning for infrastructure and local services to support the needs of a larger population.

The household growth reflects the demographic expansion within Stellenbosch. In terms of households, Stellenbosch exhibits an annual growth from 57 520 in 2024 to **58 912 in 2025**, with an annual growth rate of approximately **3.6** persons. This increase highlights a growing demand for municipal services and housing that aligns with the growing population. Addressing this growth in households will require proactive planning and resource allocation for maintaining service quality and community engagement.

The figure below depicts the estimated population growth from 2025 - 2030:

Table 2: Population Growth, Stellenbosch, 2025 – 2030

Source: Western Cape Government, MERO 2025and Department of Social Development, Western Cape Provincial Population Unit (PPU), 2025



Racial Split

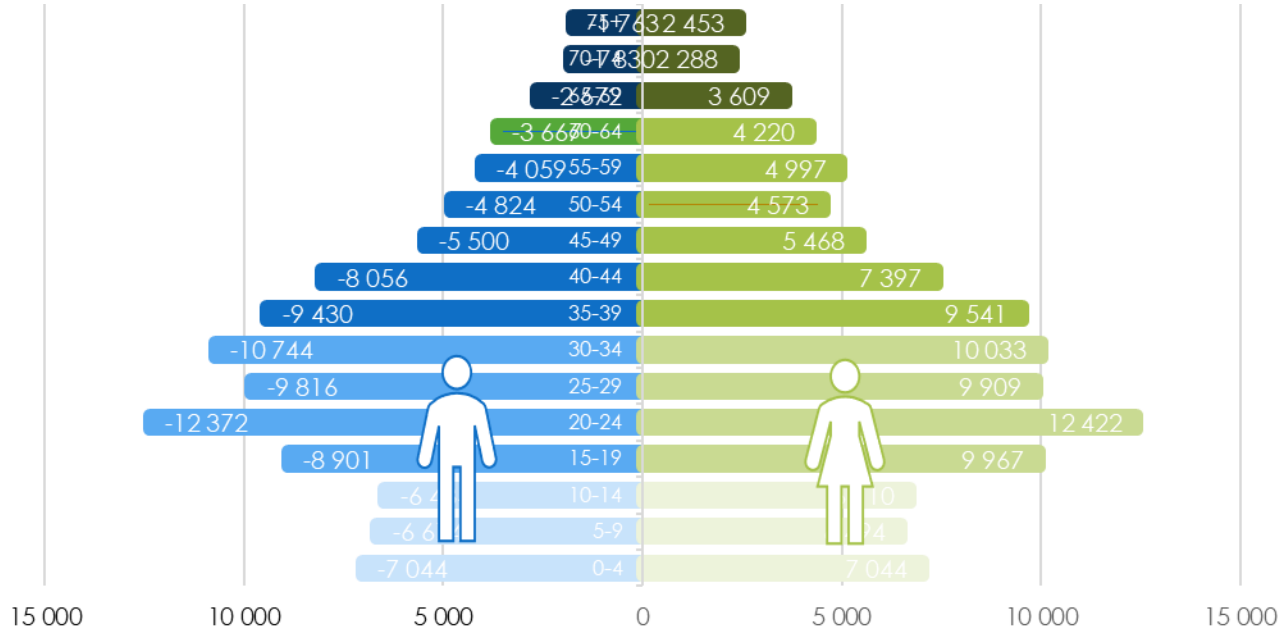
The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. Much of the population comprises Black African individuals, accounting for 33.1 per cent of the total, followed closely by the Coloured community, constituting 53.5 per cent. White residents make up 13.1 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.5 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The figure below indicates the ratio split within the Stellenbosch Municipality:

Figure 7: Racial Split for the WCO24

Source: Western Cape Government, MERO 2025 (Quantec, 2025)



Gender Ratio

The 2025 population pyramid of the Stellenbosch municipal area indicates a noticeable gender imbalance within the 202-24 and 25- 29 age cohorts, with 12 372 males compared to 12 422 females in the 20-24 age group. This pattern reflects underlying demographic and socio – economic dynamics of the area. The gender imbalances could be a nexus of labour migration patterns, the substantial student population (which often influences age–specific demographic distribution) and potential out–migration of males seeking employment opportunities elsewhere. These factors contribute toward shaping the structure of the local labour force and demographic profile of the Stellenbosch municipal area.

This demographic imbalance may contribute to a growing dependency burden. The relatively large base of children (0 to 14 years) and the rapidly expanding elderly population (especially females aged 60 and above) will place increasing pressure on a potentially constrained work – age population to sustain public expenditure on social services, healthcare and pensions. In addition, it will in the future strain public resources and shift housing demands and settlement patterns. To sustain economic growth and social stability, policy responses will need to focus on strategies that retain young male professionals or facilitate adaptation to a workforce with a higher female participation rate.

The table below depicts the gender ratio within the Stellenbosch municipal area.

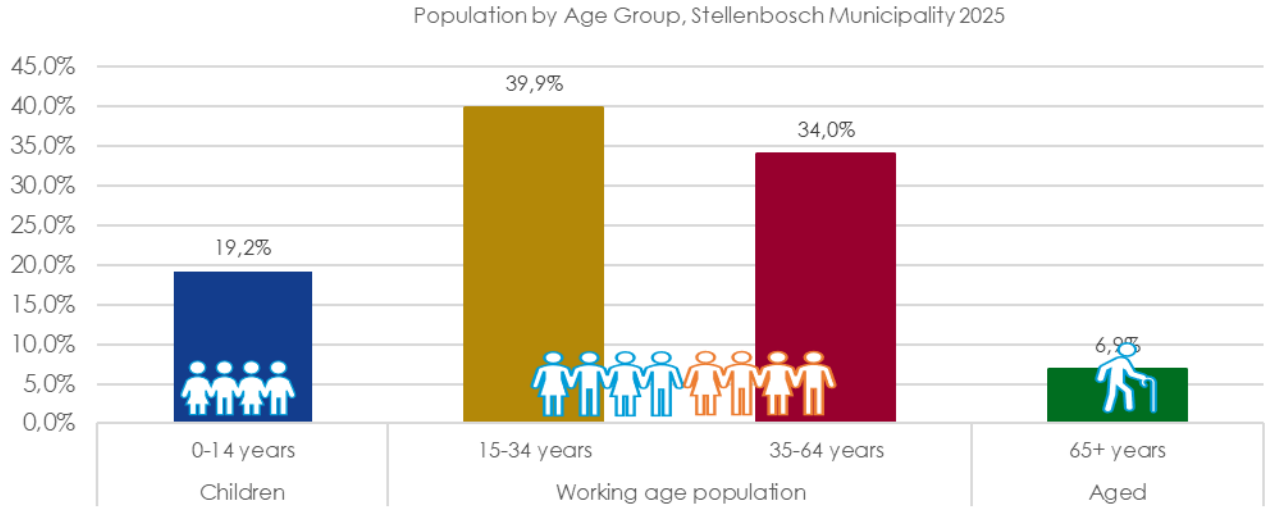


Figure 8: Ratio of % females and males

Source: Western Cape Government, MERO 2025and Department of Social Development, Western Cape Provincial Population Unit (PPU), 2025

Age Cohorts

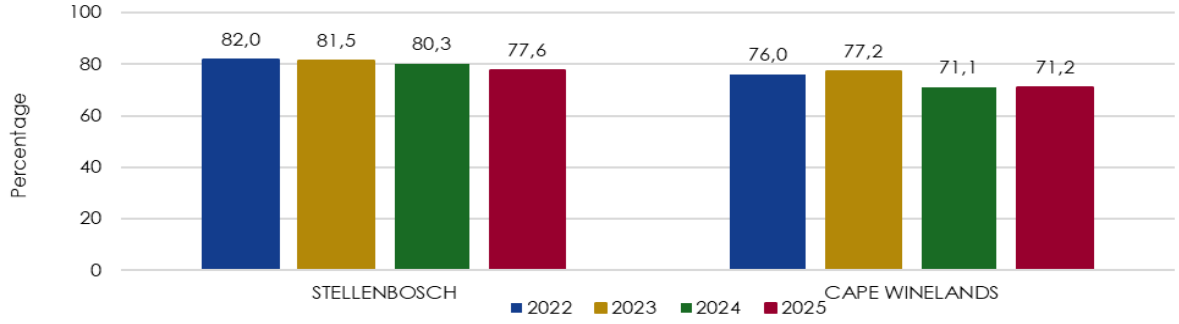
The age distribution of the Stellenbosch population has significant socioeconomic implications, particularly for future housing and service delivery. With a substantial **39.9 per cent** of the population **aged 15 to 34**, the Municipality is under pressure to facilitate job creation and supply affordable housing for young working-age persons. This demographic projection, combined with a sizeable child population (19.2 per cent), indicates continued high demand for basic services and infrastructure, placing a strain on municipal resources. The relatively small population of elderly residents (6.9 per cent) suggests a lower immediate burden on care systems for the aged. In addition, the overall youth-heavy structure points to sustained, long-term demand for indigent support as these young adults form households in a challenging economic environment.

Source: Western Cape Government, MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit (PPU), 2025

Education

The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Empowering the population will have a significant impact on the local economy's development and human resource capacity. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty. Learners in the Stellenbosch municipal area have access to education through the availability of 50 schools. Three-quarters of these education facilities **(74.0 per cent)** operate as no – fee schools.

The growing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in education capacity, as reflected in the learner – teacher ratio below. The ratio of the Stellenbosch municipal area has remained unchanged, rising marginally from 26.2 in 2024 to a projected **26.7 in 2025**.



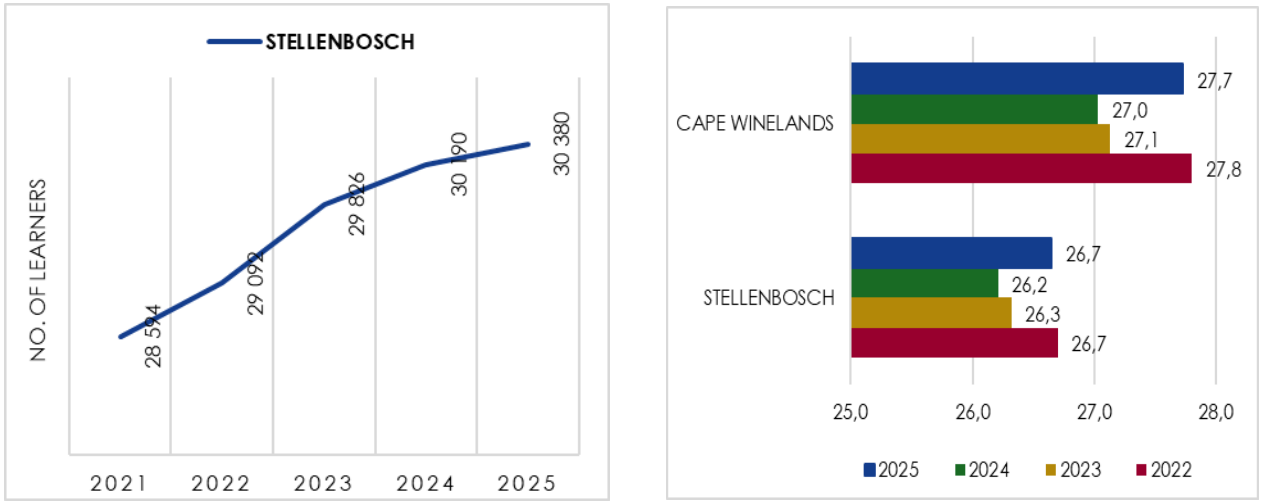
The combination of increasing learner enrolment and relatively unchanged learner–teacher ratio in Stellenbosch implies that the education system is struggling to keep pace with the population growth. Consequently, expanding larger class sizes and strained public resources, and educational quality is threatened. These risks exacerbating long-term inequality, undermining the very human capital development needed for sustainable economic inclusion.

Learner enrolment, the learner – teacher ration

Learner retention in Stellenbosch experienced a notable decline from **82.0 per cent in 2022** to a concerning **77.6 per cent in 2025**. It is evident that the educational decline depicts a deteriorating socio-economic challenge within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities. Stellenbosch is a hub for both education and agriculture, luring families to the area.

The graphs below depict the learner retention from 2022 – 2025.

Graph 2: Learner Retention Rate 2022 – 2025

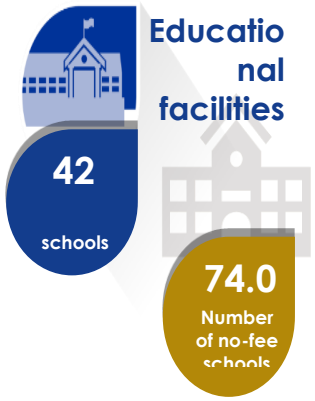


Source: Western Cape Government, MERO 2025

Learner enrolment in the Stellenbosch municipal area has steadily increased, rising from 28 594 in 2021 to a projected 30 380 in 2025. This trend reflects a pronounced in-migration dynamics to Stellenbosch, likely motivated by the area's superior economic opportunities and its reputation for high-quality educational institutions.

The increasing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in educational capacity, as reflected in the learner – teacher ratio. This ratio has remained largely static, increasing slightly from 26.2 in 2024 to a projected 26.7 in 2025. This highlights the persistent challenges in scaling educational resources to match population growth.

Graph 3: Learner Enrolment and Learner–Teacher Ratio 2021 - 2025

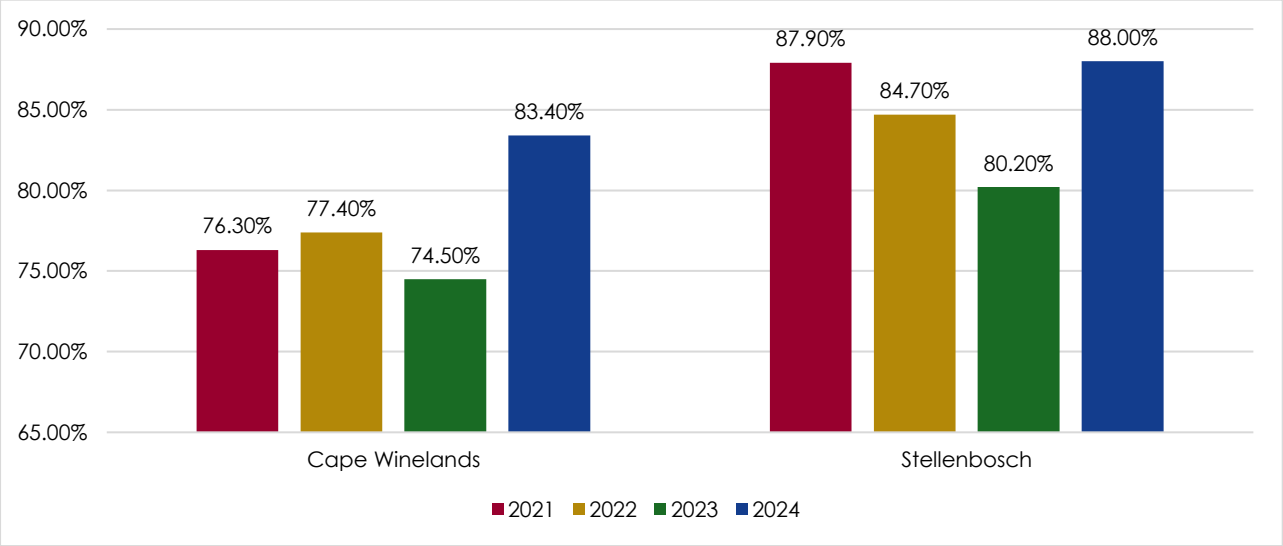


Source: Western Cape Government, MERO 2025

Number of schools and no-fee schools

Figure 10: Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area was recorded at 50 in 2025.
The proportion of no-fee schools in the Stellenbosch municipal area remains at 70 per cent in 2025, whereby 71.4 per cent are equipped with libraries.



Source: Western Cape Government, MERO 2025

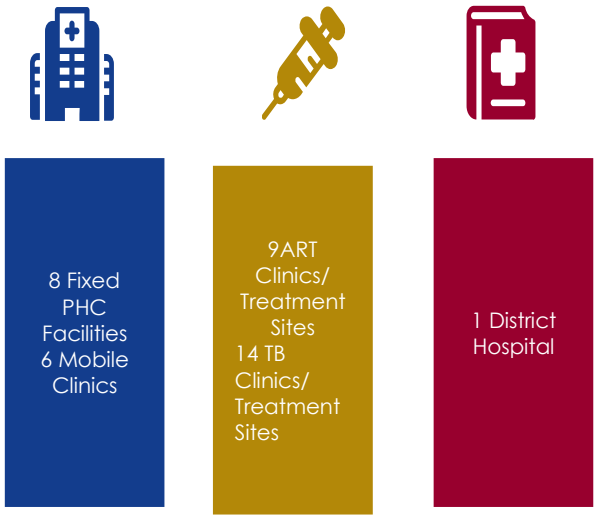
Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. The matric pass rate of the Stellenbosch municipal area has shown a strong recovery, rising to 88.0 per cent in 2024 after a concerning three-year decline to a low of 80.2 per cent. This high pass rate indicates that a significant proportion of learners in Stellenbosch are completing their schooling and performing well in the matric exams.

The graph below depicts the Matric pass rates from 2021 to 2024.

Graph 5: Education outcomes (matric pass rate) 2021 – 2024

Source: Western Cape Government, MERO 2025



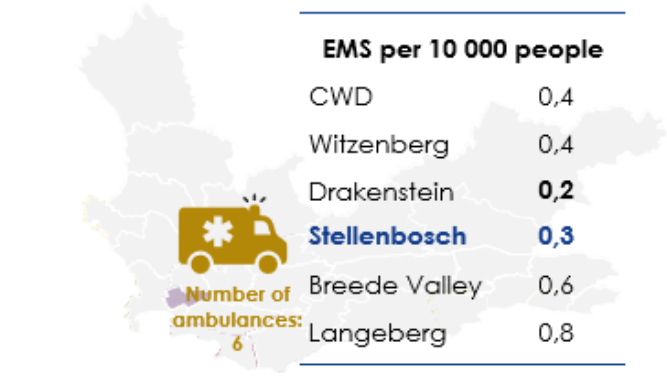
Health

Health Facilities

According to the MERO 2025, the Stellenbosch municipal area has 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites, and 14 TB clinics.

The table depicts the total healthcare facilities.

Table 16: Health facilities



Source: Western Cape Government, MERO 2025

Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 11: Emergency Medical Services

Tuberculosis and HIV/ AIDS

The number of TB patients in the Cape Winelands District (CWD) plateaued at a persistently high rate, increasing from **7 990 in 2022/23** to **8 038 in 2023/24**. The stagnation remains at levels considerably higher than those recorded prior to 2022, suggesting that the population continue to face heightened vulnerability due to overcrowded living conditions, inadequate nutrition, and persistent barriers to accessing healthcare services.

In contrast to the CWD statistics, Stellenbosch has demonstrated a more effective public health response. The TB patient count of the Stellenbosch municipal area remained stable, as indicated in the table below, with a slight improvement compared to the low record statistics in 2021/22. The divergence suggests that targeted localised interventions in Stellenbosch may be exerting a mitigating effect.

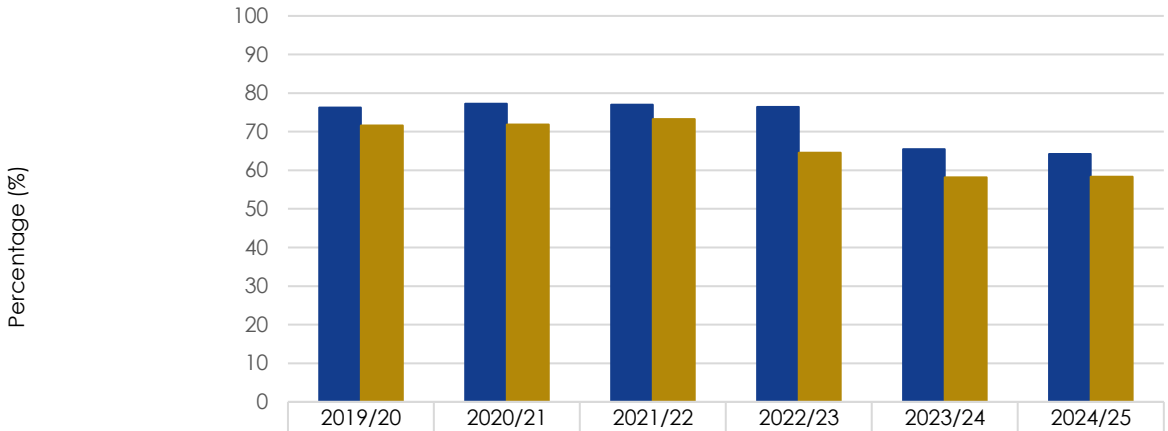
Table 17: Total Registered TB Patients, 2019/20 – 202/25

Municipality	Number of TB patients registered on Treatment				
	2019/20	2020/21	2021/22	2022/23	2023/24
Cape Winelands	7 000	7 285	7 235	7 990	8 038
Stellenbosch	1 175	1 176	1 062	1 230	1 229

Source: Western Cape Department, of Health and Wellness, 2025

The District – wide number of patients receiving antiretroviral therapy (ART) has shown a trend of stabilization coupled with continued, though gradually slowing, growth, reaching 38 361 in 2024/25. This reflects a sustained and effective public health effort to ensure ongoing access to treatment. However, the Stellenbosch municipal area witnessed a significant and unprecedented 12.4 per cent year on year decline from 2023/24 to 2024/25, with the patient total decreasing sharply from 7 327 to 6 422. This decrease might suggest a potential crisis in healthcare access or retention, potentially driven by socioeconomic pressures such as patient migration due to rising living costs and service delivery disruption.

Table: Number of registered patients on ART, 2019/20 – 2024-25



Municipality	Total registered patients receiving ART					
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Cape Winelands District	**32 366**	**32 949**	**32 719**	**36 681**	**38 247**	**38 361**
Stellenbosch	6 960	6 914	6 915	7 066	7 327	6 422

Source: Western Cape Government, MERO 2025

Child Health

Following relatively stable rates ranging from approximately 71.6 per cent to 77.0 per cent between 2019/20 and 2021/22, both jurisdictions experienced a dramatic and sustained decline at the beginning of 2022/23. The immunisation rate decreased in Stellenbosch to 58.1 per cent in 2023/24, with a slight recovery to 58.4 per cent in 2024/25. This sharp decline signals pressure on the primary healthcare system and is potentially driven by post – pandemic resource limitations, growing vaccine hesitancy or logistical challenges in reaching vulnerable communities.

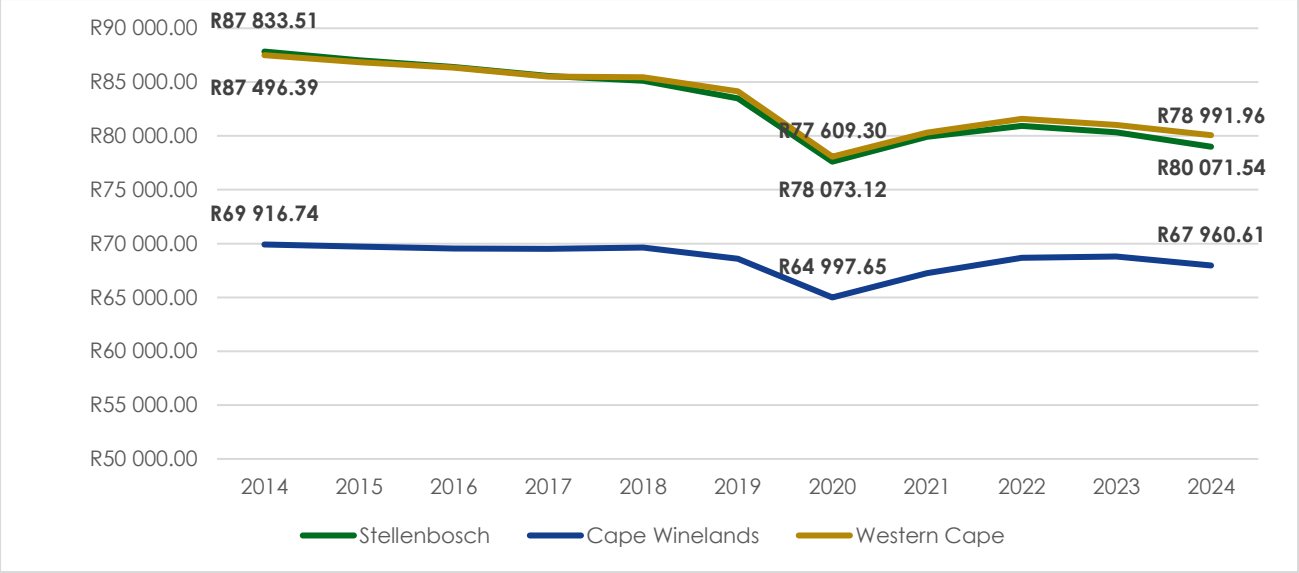
Graph 1: Child Health

	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Cape Winelands District	76.3	77.21	77.0	76.4	65.5	64.2
Stellenbosch	71.6	71.85	73.3	64.5	58.1	58.4

Source: Western Cape Government, MERO 2025

Based on the malnutrition data for the CWD and Stellenbosch Municipality from 2019/20 to 2024/25 both CWD and Stellenbosch show a significant overall improvement from their 2019/20 rates. For two consecutive reporting periods, the rate in Stellenbosch has remained constant at 1.3 per cent.

Malnutrition, 2019/20 – 2024/25



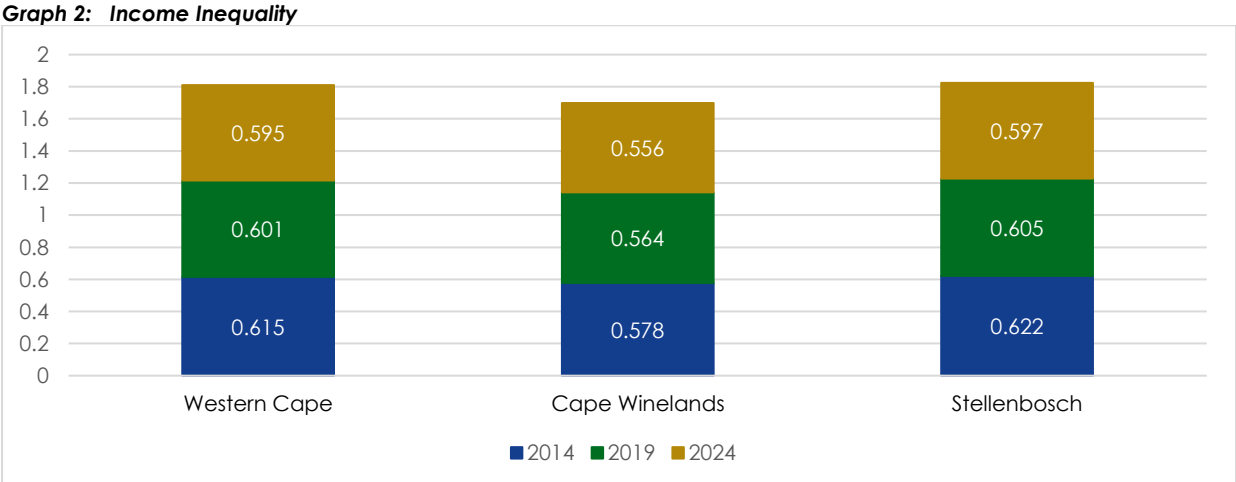
Source: Western Cape Government, MERO 2025

Poverty

GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the MERO 2025, Stellenbosch's GDP per capita consistently exceeds the Cape Winelands region and Provincial averages, indicating its economic growth. In 2020, per capita GDPR in Stellenbosch contracted sharply (declining to R77 609), then peaked in 2022 (R80 943). It has declined for two consecutive years to R78 992 in 2024. This indicates that Stellenbosch's high – value economy, underpinned by viticulture, tourism and academia, is confronting structural headwinds, including inflationary pressures or slower export growth, which are limiting gains in per capita economic wellbeing.

Graph 9: GDP Per Capita



Source: Western Cape Government, MERO 2025

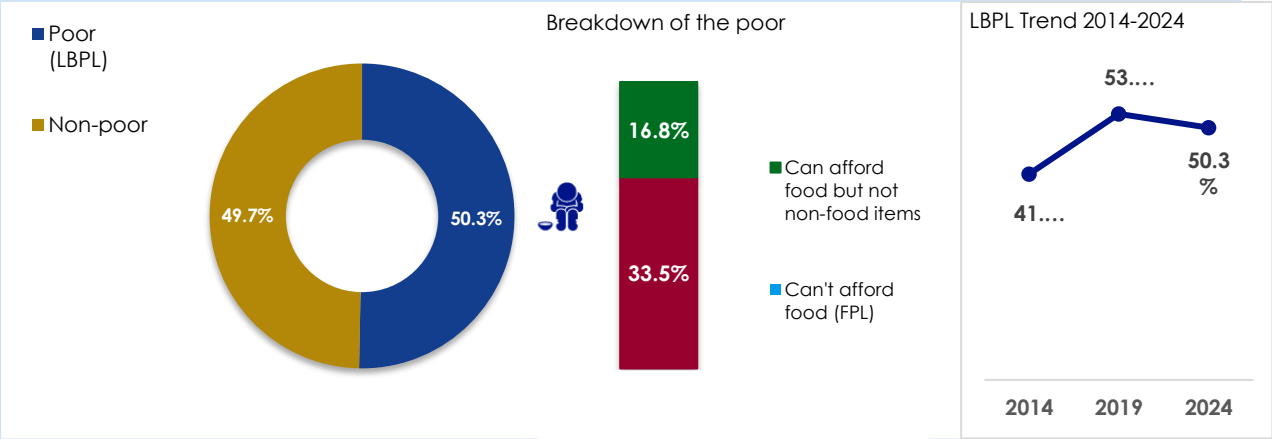
Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. The Gini coefficient of the Stellenbosch municipal area decreased from 0.605 in 2019 to 0.597 in 2024. However, the improvement was negligible, and the figure remains close to 0.600 – a ratio indicative of severe social strain. The Stellenbosch coefficient exceeds the average for the Western Cape and far surpasses that of the CWD.

Graph 2: Income Inequality

Source: Western Cape Government, MERO 2025 (Quantec, 2025)



Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2024, 50.3 per cent of Stellenbosch's population fell below the lower – bound poverty line (LBPL). Of this population, 33.5 per cent fell below the Food Poverty Line (FPL), indicating an inability to afford basic nutritional requirements, while 16.8 per cent were able to meet food needs but remained unable to cover essential non – food needs. Although an improvement has been shown from 2019 of 53.0 per cent, poverty levels remain substantially higher than those recorded in 2014 (41.0 per cent).

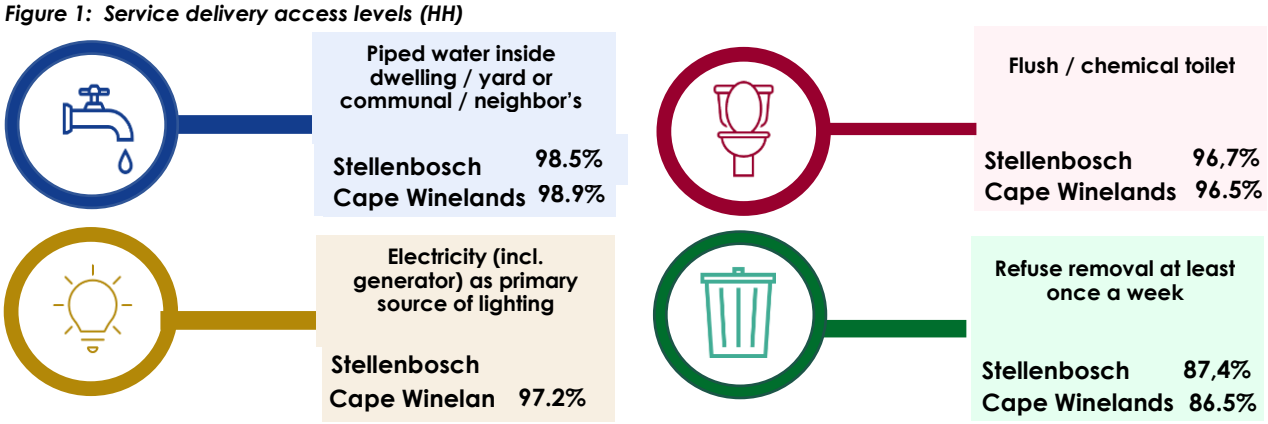
Graph 3: Poverty Headcount Rate, 2014 – 2024

Source: Western Cape Government, MERO 2025

Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.

This section reflects on the latest available information from the MERO 2025 and Quantec Research for 2025. The latest official statistics were collected by Statistics South Africa in the 2022 Census, but for the purpose of these statistics, Quantec's modelled estimates were utilised by the Western Cape Provincial Government to compile the MERO 2025, which offers more recent and regularly updated figures. The information on indigent households was obtained from the Western Cape Department of Local Government.



Housing and household services

In 2024, in the Stellenbosch municipal area, which comprises 57 520 households, 72.4 per cent had access to formal housing, lower than the Cape Winelands District average of 73.7 per cent. The remaining households were spread across other housing types: 10.0 per cent lived in informal dwellings (i.e. informal dwellings or shacks not located in a backyard), 0.8 per cent occupied traditional dwellings, and 0.2 per cent resided in other or unspecified housing types.

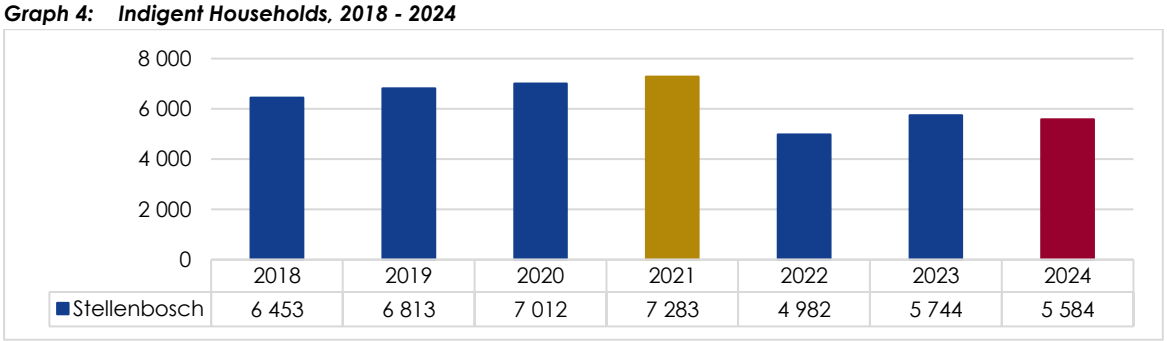
It should be noted that the proportion of households in Stellenbosch residing in informal dwellings was substantially higher than the district average (6.8 per cent). This category, which includes structures in densely populated informal settlements, reflects persistent housing shortages, ongoing urban in-migration pressure, and income inequality.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (98.5 per cent), flush or chemical toilet access (96.7 per cent), electricity access (including generators) for lighting (97.1 per cent), and the removal of refuse at least weekly by the local authority at 87.4 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 1: Service delivery access levels (HH)

Source: Western Cape Government, MERO 2025

Free Basic Services



The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R7 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy, 2025.

Stellenbosch had a decline in the number of households that were registered for indigent support from 2021 to 2022. In 2021, 7 283 households were recorded, followed by a 32.0 per cent drop to 4 982 in 2022. The lowest recorded number of indigent households was in 2024/25 at 5 584, which is well below pre – pandemic (COVID -19) counts.

The table below indicates the number of households receiving free basic services.

Graph 4: Indigent Households, 2018 - 2024

Source: Western Cape Government, MERO 2025

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2024. Target local initiatives have successfully lifted a major portion of households out of poverty, as evidenced by the divergence from 2022 to 2024. Such interventions include municipal indigent support programmes and expanded access to basic services.

Safety and Security

All the data below are sourced from the Local Government MERO 2025 for the Stellenbosch Municipal area.

The 2024 crime statistics indicate that the Stellenbosch municipal area is facing a deeply dualistic socio-economic crisis, in which the crime profile is both a cause and a consequence of deep – seated structural inequalities.

The statistics in the table below reflect that Stellenbosch's rate of crime per 100 000 population far surpasses CWD averages in almost every category of crime. Significant disparities are seen in the incidence of driving under the influence (DUI) and the prevalence of commercial crime. The 61.0 per cent rate of DUI recorded in Stellenbosch in 2024 signals a public safety risk and deeper substance abuse issues. The persistence of these trends in 2024 indicates that current approaches to curbing DUI are merely containing, not resolving, the underlying matters.

Table: Number of cases per crime category, crime per 100 000 people, 2022 - 2024

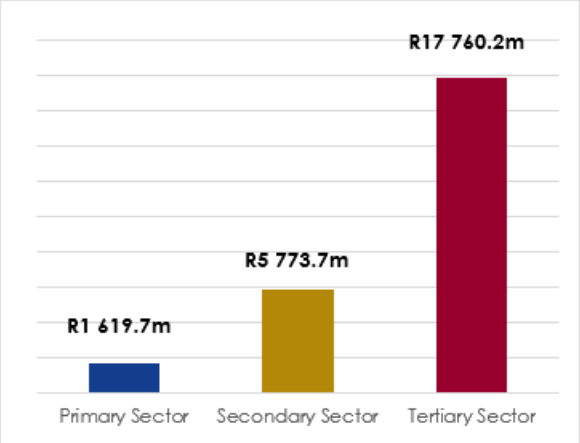
Crime Category	Actual Numbers			Trend	Crime per 100 000 Population	
	2022	2023	2024		Stellenbosch	Cape Winelands District
Murder	90	80	79	↔	38	43
Sexual Offences (also see SDS)	248	209	254	↑	123	103
Common assault	1041	1119	1116	↔	539	634
Malicious damage to property	818	839	806	↓	389	416
Burglary at residential premises	941	877	996	↑	481	471
Commercial crime	876	1064	1229	↑	594	268
Drug-related crime	1233	1474	1464	↓	707	735
Driving under the influence of alcohol or drugs	264	254	251	↔	121	75

Economy and Labour Market Performance

Sectoral Overview

In 2024, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at the regional level (GDPR) of R25.2 billion, equivalent to the 24.0 per cent of the CWDM and 2.7 per cent of the Western Cape economy. Economic activity in 2024 was broadly stagnant, with GDPR growth of only 0.1 per cent and total employment declining by 1.3 per cent to 77 504 jobs. Labour market indicators weakened correspondingly: the unemployment rate rose to 13.8 per cent in 2024, while the labour-force participation rate fell to 66.2 per cent and the labour-absorption rate to 57.0 per cent.

Employment is predominantly focused in Stellenbosch town, which accounts for the majority of formal jobs dominated by higher education, financial and business services, retail activities associated with Stellenbosch University, commercial offices, and tourism. The Franschhoek town is a secondary employment node, with its main sectors in hospitality, accommodation, and restaurants, while Lanquedoc is defined by agri – processing and support activities for crop production. Elsenburg, by contrast, drives public sector and agricultural research employment through Provincial and academic institutions. This geographic distribution shows a dual economy, one being an urban, service-driven core centred in Stellenbosch town, and a productive agricultural periphery extending through the valley settlements and wine estates.



The municipality's economy thrives on a dominant tertiary sector, led by finance, trade and personal services. The finance and business sector provided the only positive growth momentum in 2024, contributing 0.8 per cent points to the overall GDPR.

Graph 5: Sectoral contribution to GDPR 2024

Primary Sector	
Sector	**2024**
Agriculture	R1 584.5m

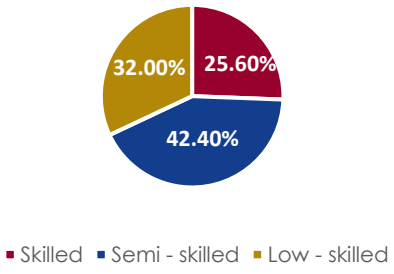
Personal Services	R2 866.6m
Total	**R17 760.2m**



Source: Western Cape Government, MERO 2025 (Quantec, 2025)

Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 25.6 per cent classified as skilled workers and 42.4 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 23.1 per cent of the workforce in 2024. However, a notable challenge exists for low-skilled workers, constituting 32.0 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic

Graph 6: Skills Level Contribution, 2024

	2024	Change from 2023
Skilled	25,60%	-0,20%
Semi - skilled	42,40%	-0,60%
Low - skilled	32,00%	-0,40%

Source: Western Cape Government, MERO 2025

Job Gains and Unemployment

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

An analysis of the formal sector indicates that, although there was a net gain of 3 293 formal jobs, this was overshadowed by losses elsewhere. The most notable increases in informal employment occurred in management consultancy (1 693 jobs) and short-term accommodation (358 jobs). However, these gains were countered by significant job losses in sectors such as other telecommunications activities (617 jobs), private security activities (322 jobs), and notably the manufacture of wines (221 jobs), the latter reflecting the broader downturn experienced in the agriculture sector.

B: LEGISLATIVE ENVIRONMENT

Legal Requirements

The medium term revenue and expenditure framework for 2026/2027, 2027/2028 and 2028/2029 was compiled in accordance with the requirements the relevant legislation, of which the following are the most important:

i) the Constitution, Act 108 of 1996
ii) the Local Government Transition Act, Act 209 of 1993
iii) the Municipal Structures Act, Act 117 of 1998
iv) the Municipal Systems Act, Act 32 of 2000
iv) the Municipal Finance Management Act, Act 56 of 2003

In addition to the above, the Municipal Budget and Reporting Framework as approved on 17 April 2009 gave a clear directive on the prescribed reporting framework and structure to be used.

Guidelines issued by National Treasury

National Treasury issued the following circulars regarding the budget for 2026/2027:
MFMA Circular No. 132 Municipal Budget Circular for the 2026/27 MTREF- 05 December 2025
MFMA Circular No. 134 Municipal Budget Circular for the 2026/2027 MTREF- 20 March 2026

Other budget and mSCOA related circulars were also used during the compilation of the budget for guidance as published by Provincial and National Treasury.

The following are discussion points that are highlighted in the above:

- National outcomes/priorities
- Economy and Headline inflation forecasts
- Division of Revenue outlook
- Local Government Conditional Grants & additional allocations and Changes to structure of conditional grant allocations
- Unfunded budgets in Local Government
- Municipal Standard Chart of Accounts (mSCOA)
- IDP Consultation and Transitional processes post 2026 Local Government Elections
- Development of Integrated Development Plan (IDP)
- Revising rates, tariffs and other charges
- Cost Reflective Tariffs
- Eskom Bulk Tariff Increases
- Funding choices and budgeting issues
- Transfers to Municipalities
- Conditional transfers to municipalities

- Unconditional transfers to municipalities
- Borrowing for capital infrastructure
- Revenue Budget
- Cost Containment Measures
- Municipal Budget and Reporting Regulations
- Preparation of Municipal Budgets for 2026/2027 MTREF
- Budget process and submissions for the 2026/27 MTREF and
- Submission of Budget Documentation

The guidelines provided in the above-mentioned circulars, annexures and other economic factors were taken into consideration and informed budget preparation and compilation.

C: OVERVIEW OF ANNUAL BUDGET PROCESS

In terms of Section 24 of the MFMA, Council must, at least 30 days before the start of the financial year, consider the annual budget for approval. Section 53 requires the Mayor of a municipality to provide general political guidance over the budget process and the priorities that must guide the preparation of the budget. In addition, Chapter 2 of the Municipal Budget and Reporting Regulations, gazetted on 17 April 2009, states that the Mayor of a municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging with the responsibilities set out in section 53 of the Act.

A time schedule outlining important dates and deadlines as prescribed for the IDP/Budget process was approved on **25 August 2025**. The budget process for the 2026/2027 MTREF period proceeded/will proceed according to the following timeline

Activity	**Time frame**
Formulation of budget assumptions	September 2025
Detailed programmes and projects to further define budget	November 2025 – March 2026
IDP and Budget considered by Council	31 March 2026
IDP and Budget - public participation	April 2026
Final approval of IDP and the Budget	27 May 2026

D: OVERVIEW OF ALIGNMENT OF ANNUAL BUDGET WITH THE INTEGRATED DEVELOPMENT PLAN (IDP)

The intent of the Strategic goals for the Fourth Generation IDP will remain the same as the goals of the Third Generation IDP, although a slight change for 3 of the goals namely: “Preferred Investment Destination” has been amended to “Valley of Possibility” to have a clearer indication that it needs to include possibilities for all and not just investors; “Greenest Municipality” has been amended to “A Green and Sustainable Valley” to incorporate all facets of sustainability; ” Safest Valley” has been amended to “A Safe Valley”, whilst “Dignified Living” and “Good Governance and Compliance”, remain unchanged.

Horizontal Alignment Matrix

Table 3: Horizontal Alignment Matrix

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
Valley of Possibility	Ensuring decent employment through inclusive economic growth (4) Ensuring decent employment through inclusive economic growth (4)	Creating jobs (1)	Create opportunities for growth and jobs (1)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
Green and Sustainable Valley	Ensuring that the environmental assets and natural resources are well protected and continually enhanced (10)	Transitioning to a low carbon economy (3) Transforming urban and rural spaces (4)	Enable resilient, sustainable, quality and inclusive living environment (4)	To create an environment and forge partnerships that ensures the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental and social infrastructure investment.

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
	Ensuring vibrant, equitable and sustainable rural communities with food security for all (7) Promoting sustainable human settlements and improved quality of household life (8)	Transitioning to a low carbon economy (3) Transforming urban and rural spaces (4)	Increase wellness, safety and tackle social ills (3) Enable resilient, sustainable, quality and inclusive living environment (4)	Environmental and social infrastructure investment.
Safe Valley	Ensuring all people in South Africa are and feel safe (3)		Increase wellness, safety and tackle social ills (3).	To create an environment and forging partnerships that ensures the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District.
Dignified Living	Providing improved quality of basic education (1) Enabling a long, healthy life for all South Africans (2)	Providing quality health care (6)	Improve education outcomes and opportunities for growth and jobs (2) Increase wellness, safety and tackle social ills (3)	To create an environment and forging partnerships that ensures the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
	Setting up an efficient, competitive and responsive economic infrastructure network (6)	Expanding infrastructure (2)	Create opportunities for growth and jobs (1) Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
Good Governance and Compliance	Achieving an accountable, effective and efficient local government system (9) Creating a better South Africa and a better and safer Africa and world (11) Building an efficient, effective and development oriented public service and an empowered fair and inclusive citizenship (12)	Improving education and training (5) Building a capable state (7) Fighting corruption (8)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
	Achieving a responsive, accountable, effective and efficient local government system (9)	Building a capable state (7)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities.

Performance management at Stellenbosch municipality is evaluated to embody the following;

Consistency: Objectives, performance indicators and targets are consistent between planning and reporting documents.

Measurability: Performance indicators are well defined and verifiable, and targets are specific, measurable and time bound.

Relevance: Performance indicators relate logically and directly to an aspect of the municipality's mandate and the realisation of its strategic goals and objectives.

Reliability: Recording, measuring, collating, preparing and presenting information on actual performance / target achievements is valid, accurate and complete.

Stellenbosch municipality targets, monitors, assess and reviews organisational performance which in turn is directly linked to individual employees' performance. The performance of the municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations.

The Five-Year Top-Level Service Delivery and Budget Implementation is part of the Integrated Development Plan and the financial performance objectives are captured in supporting table SA7.

E: OVERVIEW OF MUNICIPAL BY-LAWS AND BUDGET RELATED POLICIES

The following policies is new

No new policies

The following existing policies were reviewed and amended

Insurance Policy

The objective of this policy is to ensure that Stellenbosch Municipality's assets, councillors and employees are insured, adequately and economically, at all times. Detailed procedures, to ensure that management and employees within the municipality understand their respective responsibilities and duties, are provided in the standard operating procedures. This document indicates the policy of Stellenbosch Municipality for insuring municipal assets, and for insuring the municipality, its employees and Councillors against public liability claims and other losses. In general, the object of this policy is to ensure sound and sustainable financial management within Stellenbosch Municipality. Refer to Appendix 5.

Rates Policy

The revised Rates Policy as required by the Municipal Property Rates Act (Act no 6 of 2004) is attached as Appendix 6.

Indigent Policy

Due to the level of unemployment and subsequent poverty in the municipal area, there are households which are unable to pay for basic municipal services. The provision of free basic services ensures that registered indigent consumers have access to basic services. This policy provides the framework for the administration of free basic services to indigent consumers. Refer to Appendix 7.

Credit Control and Debt Collection Policy

This policy provides a framework to enable Council to proactively manage and collect all money due for services rendered and outstanding property taxes, subject to the provisions of the Municipal Systems Act of 2000 and any other applicable legislation and internal policies of Council. Refer to Appendix 8.

Irrecoverable Debt Policy

This policy enables Council and the CFO to write off irrecoverable debt of indigent consumers, debt which cannot be recovered due to consumers not being registered as indigent or not traceable or due to prescription of debt. Refer to Appendix 9.

Wayleave Policy

In terms of S151 of the Constitution of the Republic of South Africa, 108 of 1996, a municipality has the right to govern on its own initiative, the local government affairs of its community, subject to national and provincial legislation. S156 of the Constitution grants the municipalities the right to administer the local government matters listed in Schedule 5B, which include municipal roads. A municipality may make by-laws for the effective administration of municipal roads. This Policy will be converted into municipal by-laws to give it legal effect. Refer to Appendix 11.

Cash Management and Investment Policy

To regulate and provide directives in respect of the investment of funds and to maximize returns from authorized investments, consistent with the primary objective of minimizing risk. Refer to Appendix 12.

Accounting Policy

This policy provides the accounting framework applicable to the finances of the municipality and is informed by the Municipal Finance Management Act (Act no 56 of 2003). Refer to Appendix 13.

Asset Management Policy

The Municipal Finance Management Act Number 56 of 2003 will be the legislative framework for the Asset Management Policy whilst Generally Recognised Accounting Practice (GRAP) will be the accounting framework.

The Municipal Council of Stellenbosch is in terms of the MFMA and GRAP obliged to adopt an Asset Management Policy to regulate the effective management of all council's assets.

- **And whereas** the municipal manager as accounting officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.
- **And whereas** these assets must be protected over their useful life and may be used in the production or supply of goods and services or for administrative purposes in meeting the municipality's operational requirements.
- **Now therefore** the municipal council of the Stellenbosch Municipality adopts this asset management policy. Refer to Appendix 14.

Pool Vehicle Policy

The purpose of this policy is to ensure the proper procedure of booking and utilization of a pool vehicle. The policy clearly stipulates that no person, other than a municipal official in possession of a valid driver's licence may drive a Pool Vehicle and no person other than an official may be transported in a Pool Vehicle, provided that the CFO, Municipal Manager or a director may in exceptional circumstances authorise that other passenger may be transported in such Pool Vehicle. Municipal officials that receive car allowance are NOT allowed to use any pool vehicle. Refer to Appendix 15.

Supply Chain Management Policy

Section 111 of the MFMA requires each Municipality and municipal entity to adopt and implement a supply chain management policy, which gives effect to the requirements of the Act. The Preferential Procurement Policy Framework Act, no 5 of 2000 and its accompanying regulations influences and dictates process around the evaluation and awarding of points. In this regard, the Minister of Finance acting in terms of section 5 of the Procurement Policy Framework Act, revised the Regulations accompanying this Act on the 20th January 2017 for implementation by all affected public entities by the 1 April 2017. The Supply Chain Management Policy was therefore amended and adopted at Council during February 2017. Refer to Appendix 16.

Grant-in-aid Policy

This policy provides the framework for grants-in-aid to non-governmental organisations (NGO's), community-based organisations (CBO's) or non-profit organisations (NPO's) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12 and 67 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003). Refer Appendix 17.

Ward Allocation Policy

The objective of the Ward Allocations Policy is to create opportunities for Councillors to identify ward projects in line with the identified IDP needs, with the support of their Ward Committees, which would improve the quality of living in all wards. These projects would need to fit into the basket of services of the relevant User Department and must comply with the following, namely, Local Government's mandate; council policies; support the pillars and objectives of the IDP and directly benefit the community.

The Policy shall be governed by the underlying principle of ensuring that ward allocation projects meet the requirements of the Integrated Development Plan, including specific reference to, valley of

opportunity, green and sustainable valley, safe valley, valley with dignified living and valley of good governance and compliance. Refer to Appendix 18.

Ward Committee Policy

This policy is compiled in terms of the Local Government: Municipal Structures Act, 117 of 1998; Local Government: Municipal Systems Act, 32 of 2000 and 2005 DPLG Guidelines.

Preamble of Policy:

WHEREAS the Municipality is committed to encouraging the involvement of communities and community organisations in its affairs.

WHEREAS the Municipality is a municipality with an executive mayoral system combined with a ward participatory system as set out in section 9(d) of the Act.

WHEREAS the Council has resolved in terms of section 72(2) of the Act to adopt the ward participatory system.

IT IS THEREFORE RESOLVED by the Council as follows. Refer to Appendix 19.

Petty Cash Policy

All purchases below R 2 000 are regulated by this policy. Clear processes and procedures are stipulated to ensure that all transactions are processed effectively and efficiently in a bid to ensure prudent financial control. Refer to Appendix 20.

Virement Policy

The policy sets out the Virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year. The policy shall give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the Approved budget, and it will be applicable to all municipal staff and councillors involved in budget implementation. Refer to Appendix 21.

Preferential Procurement Policy

Section 217(1) of the Constitution, 1996 (Act 108 of 1996) provides that when contracting for goods and services, organs of state must do so in accordance with a system that is fair, equitable, transparent, competitive and cost effective. Section 217(2) and (3) of the Constitution allows organs of state to grant preferences when procuring for goods and services within a Framework prescribed by National legislation.

The preferential procurement policy is founded on the following principles, namely, value for money, open and effective competition, ethics and fair dealing, accountability and reporting and equity. This policy will be applicable to all active industry sectors within the Stellenbosch Municipal area and must be read with the supply chain management policy of the municipality. Refer to Appendix 22.

Travel and Subsistence Policy

This policy sets out the basis for the payment of subsistence, travel allowance, hourly rate when applicable for the purpose of official travelling. Refer to Appendix 23.

Cost Containment Policy

The purpose of the policy is to regulate spending and to implement cost containment measures at Stellenbosch Local Municipality. The objectives of this policy are to ensure that the resources of the municipality are used effectively, efficiently and economically and to implement cost containment measures. The cost containment policy will apply to council and all municipal employees. Refer to Appendix 24.

The following existing budget-related policies and by-laws were amended based on comments and inputs after the IDP and Budget public participation process:

Development Charges Policy

The Municipality derives its authority to impose a development charge in terms of Section 75A. General power to levy and recover fees, charges and tariffs of the Local Government: Municipal Systems Act, 2000, Act 32 of 2000. The Municipality approved its new Land Use Planning Bylaw in terms of the Spatial Planning and Land Use Planning Act, 2013 (Act 16 of 2013) in October 2015 and it was officially promulgated and became effective in December 2015. Since then, the Municipality faces significant changes in the planning environment, amongst others the need for and manner of generating development charges. Refer to Appendix 10.

Tariff Policy

This policy serves as the implementing tool which guides the levying of tariffs for municipal services in accordance with the provisions of the Municipal Systems Act and any other applicable legislation. Tariffs represent the charges levied by Council on consumers for the utilization of services provided by the Municipality and rates on properties. Tariffs will be calculated in various ways, dependent upon the nature of the service being provided. Refer to Appendix 25.

Tariff By-Law

In terms of section 75(1) of the Systems Act, a municipal council must adopt by-laws to give effect to the implementation and enforcement of its tariff policy. In terms of section 75(2) of the Systems Act, by-laws adopted in terms of section 75(1) of the Systems Act may differentiate between different categories of users, debtors, service providers, services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination. Refer to Appendix 26.

The following existing budget-related policies and by-laws were reviewed but no amendments were necessary:

Rates By-Law

In terms of Section 3 of the Property Rates Act, a municipal council must adopt a policy consistent with the property rates act on levying of rates on rateable properties in the municipality. Refer to Appendix 27.

Credit Control and Debt Collection By-law

This by-law give effect to the implementation and enforcement of Municipality's Credit Control and Debt Collection Policy and/or to regulate its implementation and enforcement in the Stellenbosch Municipal Area (WC024) in terms of section 156(2) of the Constitution of the Republic of South Africa (Act 108 of 1996) and sections 96 and 98 of the Municipal Systems Act (Act 32 of 2000);to provide for the collection of all monies due and payable to the Municipality; and to provide for matters incidental thereto. All debt owing to the Municipality must be collected in accordance with this By-law and the Credit Control and Debt Collection Policy. Refer to Appendix 28.

Special Ratings Area Policy

The aim of the policy is to provide the framework to strike an appropriate balance between facilitating self-funded community initiatives that aim to improve and/or upgrade neighbourhoods. Refer to Appendix 29.

Special Ratings Area By-Law

A "special rating area" refers to a special rating area approved by the Council in accordance with the provisions of section 22 of the Property Rates Act. This By-law aims to provide for the establishment of special ratings areas, to provide for additional rates and to provide for matter incidental thereto. Refer to Appendix 30.

Infrastructure Asset Unbundling Policy

This policy is intended to provide a framework for the unbundling of completed infrastructure services capital projects and financial asset year-end processes within the requirements of sections 60, 62, 63, 78, and 79 of the Municipal Finance Management Act, 2003 (Act 56 of 2003) (MFMA), and the South African Standards of Generally Recognised Accounting Practices (GRAP) as well as to promote good financial management practices. This policy applies to all officials within the Stellenbosch Local Municipality who utilise and/or manage any type of infrastructure assets. The Municipal Council of Stellenbosch have adopted an Asset Management Policy to regulate the effective management of all council's assets and wants to lay down broad guidelines for consistent, effective and efficient asset management principles of Stellenbosch Municipality. The Municipality of Stellenbosch have agreed to adopt an Infrastructure Unbundling Policy that will guide the Municipality with the effective, complete, and accurate capitalisation of their assets and complying with year-end processes relating to assets. Refer to Appendix 31.

Borrowing, Funds and Reserves

This policy strives to establish a borrowing framework policy for the Municipality and set out the objectives, policies, statutory requirements and guidelines for the borrowing of funds. The policy provides a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year noncash backed liabilities. The policy aims to give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework. Refer to Appendix 32.

Budget Implementation and Monitoring Policy

The policy aims to give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets. The framework for virements is also explained and regulated in this policy as well as monitoring roles and responsibilities. Refer to Appendix 33.

Liquidity Policy

The documented Liquidity Policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to in order to ensure that its current and future liquidity position is managed in a prudent manner. This policy will be implemented to provide guidance on the minimum liquidity level that Stellenbosch Municipality has to maintain in order to comply with required legislative and / or National Treasury directives and within the overall financial management objectives as approved/reviewed by the Council from time to time. Refer to Appendix 34.

Inventory Management Policy

In terms of the MFMA, the Accounting Officer for a municipality must:

(a) be responsible for the effective, efficient, economical and transparent use of the resources of the municipality as per section 62 (1)(a);

(b) take all reasonable steps to prevent unauthorised, irregular and fruitless and wasteful expenditure and other losses as per section 62(1)(d); and

(c) be responsible for the management, including the safeguarding and the maintenance of the assets, and for the management of the liabilities, of the municipality as per section 63 (1)(a) and (b).

The policy aims to achieve the following objectives which are to provide guidelines that employees of the Municipality must follow in the management and control of inventory, including safeguarding and disposal of inventory, procure inventory in line with the established procurement principles contained in the Municipality's Supply Chain Management Policy and eliminate any potential misuse of inventory and possible theft. Refer to Appendix 35.

Financing of External Bodies performing municipal functions Policy

The purpose of this Policy is to provide a framework for financial assistance by Stellenbosch Municipality ("the Municipality") to external organisations/bodies conducting local government functions to the extent as set out in section 155(6)(a) and (7) of the Constitution as listed in Part B of Schedule 4 and 5. Refer to Appendix 36.

F: OVERVIEW OF KEY BUDGET ASSUMPTIONS

Municipalities' long-term financial viability depends largely on the extent to which improved and sustainable revenue capacity on the one hand and sound financial management of its resources on the other hand can be achieved. These imperatives necessitate proper multi-year financial planning. Future impacts of revenue streams, expenditure requirements and the financial implications for the community at large (i.e. the potential influence on rates, tariffs and service charges) must be identified and assessed to determine the sustainability of planned interventions, programs, projects and sundry service delivery actions.

Taking these principals into consideration, the following assumptions **(ceteris paribus)** were made and relates to the parameters within which the budget was compiled for the next three years

	2026/2027	2027/2028	2028/2029
Percentage Increase:			
Water	5.00%	5.00%	5.00%
Electricity	10.71%	10.71%	10.71%
Sanitation	6.00%	6.00%	6.00%
Refuse	6.00%	6.00%	6.00%
Property Rates	6.00%	6.00%	6.00%
Collection Rates			
Water	95%	95%	95%
Electricity (Post Paid Meters)	97%	97%	97%
Sanitation	96%	96%	96%
Refuse	96%	96%	96%
Rates	96%	96%	96%
Employee Related Costs			
Salaries and Wages and related costs	4.75%	4.75%	4.75%
Notch Increment	2.40%	2.40%	2.40%
Other Assumptions			
Bulk Purchases - Electricity	10.00%	10.00%	10.00%

Budgetary constraints and economic challenges meant that the municipality had to apply a combination of cost-saving interventions and higher than headline CPI revenue increases to ensure a sustainable budget over the medium term.

Municipalities should also pay particular attention to managing all revenue and cash streams effectively and carefully evaluate all spending decisions."

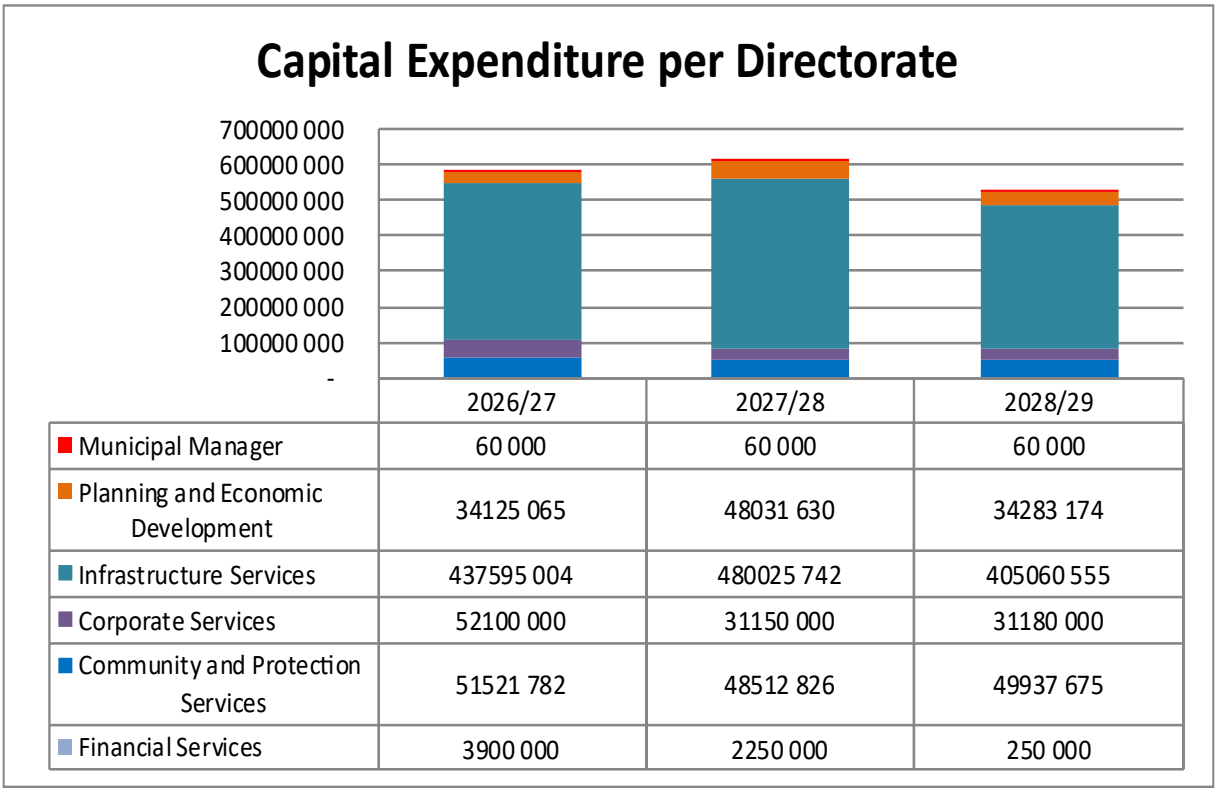
G: HIGH LEVEL BUDGET OVERVIEW

Capital Budget for 2026/2027, 2027/2028 and 2028/2029

Although the capital budget is infrastructure orientated and addresses the very urgent need for the upgrading of infrastructure as addressed by the different infrastructure master plans, it does however speak to the IDP (Integrated Development Plan) and the needs of the community. It's also aligned to the strategic priority in the State of the Nation Address of Infrastructure investment and the "back to basics" approach. The responsiveness of the budget can be measured against what was identified as priorities by the community and the actual amount allocated, bearing in mind that resources are limited, to address or at least alleviate the most critical needs identified.

In this regard it is important to note that the need for infrastructure upgrades, inclusive of electricity infrastructure were key to ensure the delivery of sustainable services.

The capital budgets as proposed, amounts to:



2026/2027	**2027/2028**	**2028/2029**
R	**R**	**R**
579 301 851	610 030 198	520 771 404

Compilation of the Capital Budget

The capital budgets depicted per Directorate are as follows:

	2026/2027		**2027/2028**		**2028/2029**	
	R	**%**	**R**	**%**	**R**	**%**
Municipal Manager	60 000	0,01%	60 000	0.01%	60 000	0.01%
Planning and Development Services	34 125 065	5,89%	48 031 630	7.87%	34 283 174	6,58%
Infrastructure Services	437 595 004	75.54%	480 025 742	78.69%	405 060 555	77.78%
Corporate Services	52 100 000	8,99%	31 150 000	5,11%	31 180 000	5,99%
Community and Protection Services	51 521 782	8.89%	48 512 826	7,95%	49 937 675	9.59%
Financial Services	3 900 000	0,67%	2 250 000	0,37%	250 000	0,05%
	579 301 851	**100.00%**	**610 030 198**	**100.0%**	**520 771 404**	**100.0%**

Investment in infrastructure for the next three years' equals:

	2026/27	2027/28	2028/29
Municipal Manager	60 000	60 000	60 000
Planning and Economic Development	34125 065	48031 630	34283 174
Infrastructure Services	437595 004	480025 742	405060 555
Corporate Services	52100 000	31150 000	31180 000
Community and Protection Services	51521 782	48512 826	49937 675
Financial Services	3900 000	2250 000	250 000

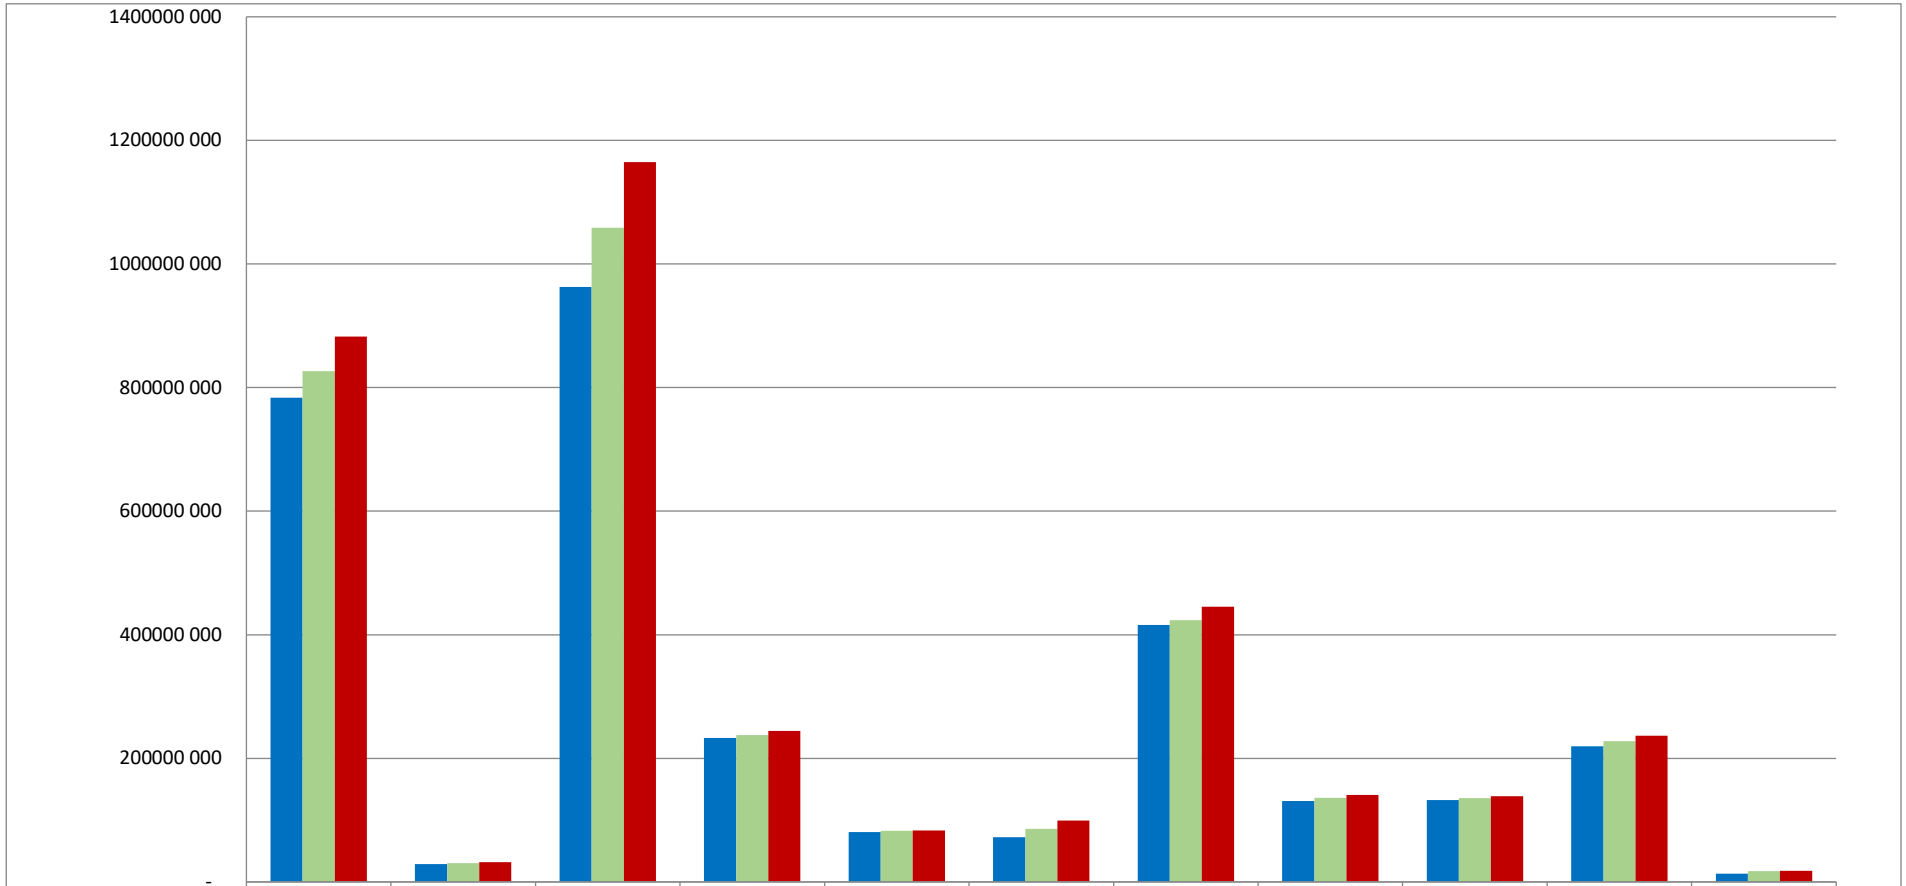
Financing of the Capital Budget

The proposed financing sources of the capital budget for the next three years are as follows:

	2026/2027		**2027/2028**		**2028/2029**	
	R		**R**		**R**	
Own Funding						
Capital Replacement Reserve	302 984 439	52.30%	288 213 863	47.25%	303 876 458	58.35%
Development Contribution	20 000 000	3.45%	35 752 976	5.86%	2 700 000	0.52%
External Funding						
Grants National Government	53 793 826	9.29%	49 349 131	8.09%	50 445 217	9.69%
Grants Provincial Government	15 557 565	2.69%	37 335 652	6.12%	30 275 652	5.81%
External Loans	186 966 021	32.27%	199 422 606	32.68%	133 474 077	25.63%
	579 301 851	**100.00%**	**610 030 198**	**100.00%**	**520 771 404**	**100.00%**

As alluded to in the before-mentioned text and in the Council item; substantial investment in infrastructure is crucial in order to maintain sustainable levels of service delivery. For the detailed capital projects please refer to **Appendix 1 – Part 2 – Section N**.

Operating Budget for 2026/2027, 2027/2028 and 2028/2029



Expenditure

The operating expenditure budget per Vote (Directorate) is as follows:

	2026/2027 R	**2027/2028** R	**2028/2029** R
Municipal Manager	23 095 608	24 591 327	26 059 245
Planning and Economic Development	157 986 236	156 105 187	167 843 022

H: OVERVIEW OF THE BUDGET FUNDING

Financing of the Capital Budget

The proposed financing sources of the capital budget for the next three years are as follows:

	2026/2027	2027/2028	2028/2029
	R	R	R
Capital Replacement Reserve	302 984 439	288 213 863	303 876 458
Grants National Government	53 793 826	49 349 131	50 445 217
Grants Provincial Government	15 557 565	37 335 652	30 275 652
External Loans	186 966 021	199 378 576	133 474 077
Development Contribution	20 000 000	35 752 976	2 700 000
	579 301 851	**610 030 198**	**520 771 404**

Grant funding from National Government includes the following:

- Integrated National Electrification Programme (Municipal) Grant (INEP)
- Integrated Urban Development Grant

Grant funding from Provincial Government includes the following:

- Human Settlement Development Grant
- Informal Settlements Upgrading Partnership Grant: Provinces (Beneficiaries)
- Integrated Transport Planning
- Resource Funding for Establishment and Support of A K9 Unit (Department of Community Safety)

Financing of the Operational Budget

The operational budget is financed from the tariff increases as displayed above. In addition to these, the following grant allocations are expected, and expenditure was adjusted accordingly:

- Equitable Share Allocation
- Community Library Services Grant
- Cape Winelands Community Safety Grant
- Local Government Financial Management Grant
- Financial assistance to municipalities for maintenance and Construction of Transport Infrastructure
- Community Development Workers Operational Support Grant
- Expanded Public Works Program Incentive Grant
- Human Settlement Development Grant
- Title Deeds Restoration Grant

References

1. Monthly household income threshold. Should include all sources of income.

2. Show the poverty analysis the municipality uses to determine its indigents policy and the provision of services

3. Include total of all housing units within the municipality

4. Number of subsidised dwellings to be constructed by the municipality under agency agreement with province

5. Provide estimate based on building approval information. Include any non-subsidised dwellings constructed by the municipality

6. Insert actual or estimated % increases assumed as a basis for budget calculations

7. Insert actual or estimated % collection rate assumed as a basis for budget calculations for each revenue group

8. Stand distance <= 200m from dwelling

9. Stand distance > 200m from dwelling

10. Borehole, spring, rain-water tank etc.

11. Must agree to total number of households in municipal area

12. Household income categories assume an average 4 person household. Stats SA - Census 2011 Questionnaire

13. Based on National poverty line of R515 per capita per month (2008 prices), assuming an average household size of 4 persons

References

1. Positive cash balances indicative of minimum compliance - subject to 2

2. Deduct cash and investment applications (defined) from cash balances

3. Indicative of sufficient liquidity to meet average monthly operating payments

4. Indicative of funded operational requirements

5. Indicative of adherence to macro-economic targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)

6. Realistic average cash collection forecasts as % of annual billed revenue

7. Realistic average increase in debt impairment (doubtful debt) provision

8. Indicative of planned capital expenditure level & cash payment timing

9. Indicative of compliance with borrowing 'only' for the capital budget - should not exceed 100% unless refinancing

10. Substantiation of National/Province allocations included in budget

11. Indicative of realistic current arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)

12. Indicative of realistic long term arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)

13. Indicative of a credible allowance for repairs & maintenance of assets - functioning assets revenue protection

14. Indicative of a credible allowance for asset renewal (requires analysis of asset renewal projects as % of total capital projects - detailed capital plan) - functioning assets revenue protection

References

1. All numbers to be expressed as whole numbers except FTEs and Rates in the Rand

2. To give effect to rates policy

3. Full Time Equivalent (FTE) should be expressed to one decimal place and takes into account full time and part time staff

4. Required to implement new system (FTE)

5. Provide relevant information for historical comparisons. Must reconcile to the total of Table SA12

6. Current and budget year must reconcile to Table A4 Budgeted Financial Performance (revenue and expenditure)

7. Included in rate revenue budget

8. In favour of the rate-payer

References

1. Pension and medical aid

2. Total package must equal the total cost to the municipality

3. List each political office bearer by designation. Provide a total for all other councillors

4. Political office bearer is defined in MFMA s 1: speaker, executive mayor, deputy executive mayor, member of executive committee, mayor, deputy mayor, member of mayoral committee, the councillor designated to exercise powers and duties of mayor (MSA s 57)

5. Also list each senior manager reporting to MM by designation and each official with package >= senior manager by designation

6. List each entity where municipality has an interest and state percentage ownership and control

7. List each senior manager reporting to the CEO of an Entity by designation

8. Must reconcile to relevant section of Table SA24

9. Must reconcile to totals shown for the budget year of Table SA22

10. Correct as at 30 June

CITI Residential	R 0.000909	R 0.001011

Relief measures for Special Rating Areas may be granted according to the approved Special Rating Area Policy.

RELIEF MEASURES:

Relief Measures are generally described in paragraph 8 of approved Rates Policy, and may be granted according to the approved Rates Policy. This includes the specific undermentioned relief measures: (Please consult the Property Rates Policy for the complete information regarding rebates granted by Council)

1. Gross Monthly Household Income (Qualifying Senior Citizens & Disabled Persons)

A rebate as per the table below may be granted as per paragraph 8.3 of the approved Rates Policy

Gross Monthly Household Income (Income bands)				% Rebate
Up to			R 8 000	100%
From	R 8 001	To	R 11 000	75%
From	R 11 001	To	R 13 000	50%
From	R 13 001	To	R 17 000	25%

2. Municipal Valuation Threshold

On qualifying residential properties, a reduction up to a maximum valuation of R 250 000, will be granted, which amount includes the R15 000 as per Section 17(1)(h) of the MPRA and the R 235 000 Reduction granted as per paragraph 8.2.1(ii) of the approved Rates Policy. To further assist Indigent owners, an additional reduction of up to R 100 000 on the property valuation will be granted on qualifying and registered Indigent Owners as per paragraph 8.2.1(iii) of the approved Property Rates Policy.

3. Stellenbosch Special Rebates

A rebate of 20% may be granted as per paragraph 8.6 of the approved Rates Policy.

STELLENBOSCH MUNICIPALITY

ELECTRICITY TARIFFS

	Approved 2025/26	Application 2026/2027
1. Domestic		
Domestic: Life Line PP - 0 to 60amp single phase only (For qualifying indigent customers and receiving the first 100 units free per month) (DOM1)		
Fixed Charge per month	R -	**R -**
Domestic PP Lifeline DOM1 (c/kWh) (<= 50 kWh)	190.72	**210.10**
Domestic PP Lifeline DOM1 (c/kWh) (51 – 300 kWh)	238.66	**262.90**
Domestic PP Lifeline DOM1 (c/kWh) (300 – 600 kWh)	355.70	**393.80**
Domestic PP Lifeline DOM1 (c/kWh) (> 600 kWh)	409.20	**449.90**
Domestic PP Lifeline DOM1 BSST (Free Basic Units)	100 units	
Domestic: Regular PP meters- (0 to 60amp single and three phase AND Less than 600kWh per month average consumption during the previous financial year and for generation for own use) (DOM2)		
Fixed Charge per month	R -	**R -**
Energy Rate (c/kWh) (<= 50kWh)	191.04	**210.10**
Energy Rate (c/kWh) (51 - 300kWh)	245.73	**269.50**
Energy Rate (c/kWh) (301 - 600kWh)	345.58	**379.50**
Energy Rate (c/kWh) (> 600kWh)	406.38	**449.90**
Domestic: Regular PP meters- (0 to 60 Amp single and three phase using more than 600 kWh per month average consumption during the previous financial year and for generation for own use) (DOM3)		
Fixed Charge per month	R 261.54	**R 287.69**
Energy Rate (c/kWh) (<= 50kWh)	190.72	**206.64**
Energy Rate (c/kWh) (51 - 300kWh)	244.64	**265.07**
Energy Rate (c/kWh) (301 - 600kWh)	345.13	**373.94**
Energy Rate (c/kWh) (> 600kWh)	406.40	**440.35**
Domestic: Regular (Using Credit Meters 60 Ampere single and three phase maximum and for generation for own use) (DOM4)		
Fixed Charge per month	R 322.62	**R 354.88**
Energy Rate (c/kWh) (<= 50kWh)	190.72	**206.64**
Energy Rate (c/kWh) (51 - 300kWh)	244.64	**265.07**
Energy Rate (c/kWh) (301 - 600kWh)	345.13	**373.94**
Energy Rate (c/kWh) (> 600kWh)	406.40	**440.35**
Domestic: Renewable Energy (DOM5) Generation for own use and export		
Reading cost R/pm	R 146.01	**R 158.20**
Basic Charge	R 322.62	**R 354.88**

ELECTRICITY TARIFFS

	Approved 2025/26	Application 2026/2027
9. External Wheeling		
Customer received power at low voltage (<400V) in c/kWh	39.33	**45.98**
Customer received power at medium voltage (>400V) in c/kWh	34.07	**39.84**

10. Generation for Own Use

Customers that want to connect an Own Generation for Own Use only system to the municipal electrical grid without being compensated for reverse power flow can remain on their current tariff and continue to use their current meter.

11. Generation for Own Use and Export

Customers that want to connect an Own Generation for Own Use and Export system to the municipal electrical grid and who want to be reimbursed will have to do the following:

1 The Municipality shall provide and install the requisite meters at the customer's cost.
2 The customer will stay on the existing purchase tariff.
3 For reimbursement the basic charge will be increased to include the automated meter reading cost.
4 The reimbursement will only be for the export energy.
5 Customer not allowed to generate more than his total consumption per financial year.

12.Availability Fees (Per Annum)

BEGRAAFPLAASDIENSTE / CEMETERY SERVICES: WC024 Waar 'n familie as behoeftige geregistreer is by die Munisipaliteit, kan die familie (slegs naaste familie) kwalifiseer vir 50% afslag, na goedkeuring van die relevante Direkteur, op die tarief vir 'n grafperseel. Die familie of delegasie moet skriftelik aansoek doen en rig aan die betrokke Direkteur. Hierdie vergunning is slegs van toepassing Maandae tot Saterdae-Vakansiedae uitgesluit. Plaaswerkers: brief ter bevestiging van plaaseienaar. When a family has been registered as an indigent beneficiary at the Municipality, the members of the family (not including extended members) qualifies for 50% discount, after approval by the relevant Director, on the tariff of a gravesite. The family or a delegate must apply in writing to the relevant Director. This concession is only applicable Mondays to Saturdays, excluding Public Holidays. Farm workers: must provide written confirmation from the farm owner.

The following groups have been identified for the discounted tariffs:

(i) Schools located within the WC024 for an official school function: discounted tariff of 30% on the rental of a hall for the function to a maximum of one (1) function per financial year. Deposit fees must be paid in full.

(ii) Churches located within WC024 for an official church function: discounted tariff of 30% on the rental of a hall for the function to a maximum of one (1) function per financial year. Deposit fees must be paid in full. Proof of location/residence will be required.

(iii) Churches using a hall on a regular basis:

a Sermons are limited to 2 (two) hours per Sunday to accommodate other denominations/religious groups at the venue.

b The two Town Halls (Stellenbosch and Franschhoek), are excluded.

c The approval is subject to availability of the hall.

d A formal agreement will be entered into between the parties.

e A once-off deposit fee per financial year applies as per the approved tariffs. If forfeited due to damage, etc, this will have to be repaid before access for the next event/ service will be granted. In addition, a rental fee equivalent to the tariff for 1 day (weekday tariff) applies as a monthly fee. The fee specific to the specific hall will apply.

f Furniture will be free of charge, but must be arranged and put back after the sermon by the hirer.

g Due to the constraints on municipal overtime, no municipal officials will be available on weekdays or weekends to perform any supervisory functions or assistance.

(iv) Non-Governmental Organisations: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge. Proof of NGO registration must be produced.

(v) Government Departments in other spheres of Government: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge.

(vi) The six recognised vulnerable groups namely Aged, Disabled, Children, Youth, Women and People living on the Streets: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge. This discount is not available to individuals but is focused on interest groups representing the vulnerable groups.

(vii) Individual families registered as indigent at the Municipality will be entitled to a 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full): Furniture, kitchen and utensils are free of charge. This rebate is for a maximum of one (1) booking per financial year per indigient family and the two Town Halls (Stellenbosch and Franschhoek) are excluded.

(viii) Organisations promoting the Greater Stellenbosch: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge. The following are examples of rebates that will be approved:

Van Der Stel Festival
Wine Festival (Previously Food and Wine Festival)
Flower Show (Stellenbosch and Pniel)
Stellenbosch Festival
Bastille Festival
CANSA sub-organizations within the WC024.

(ix) Free access to municipal halls for Community Police Forums and Neighbourhood Watches situated within WC024, limited to one meeting per month. Such requests should be electronically sent to the Law Enforcement- Community Safety Liaison Officer who will liaise with the Halls Bookings Office to verify availability. This rebate will only be considered for weekdays.

(x) Non-Governmental Organisations using a hall on a regular basis (once a week). A formal agreement will be entered into between the parties. The Stellenbosch and Franschhoek Town Halls are excluded.A once-off deposit fee per financial year applies as per the approved tariffs. In addition, a rental fee equivalent to the tariff for 1 day (weekday tariff) applies as a monthly fee. Furniture, kitchen and utensils are free of charge. The grant is subject to availability of the hall. Proof of NGO registration must be produced.

(xi) Free access to municipal halls for Ward Councillors for purposes of ward related meetings and workshops. The access will only be granted a maximum of 2 (two) events per month. This is not transerferable for any other festivals, parties, dances, fund raisers, memorial or funeral services etc.

(xii) The rebates mentioned in paragraphs i), ii), iv), v), vi) and ix) will only be considered for weekdays. All applications must be in writing and submitted to the Director: Community and Protection Services.

(xiii) The Director: Community and Protection Services may consider motivated applications for discount in line with the abovementioned and approve rebates.

FORMULA FOR THE CALCULATION OF EFFLUENT DISCHARGE CHARGES (Schedule C of Bylaws)

Discharge Cost = Basic Tariff + COD Surcharge + Substance Limit Surcharge

Discharge Cost = (Vw) (SVC) + (Vie) (T) ((COD - 1000)/1000) + (Vie) (T) (SF)

SVC = Sewerage Volumetric Charge (T + C) in terms of above tariffs (Conveyancy and Treatment)

Surcharge Factor (SF) = ((X - L) / L)

X = Concentration in discharge of one or more of parameters listed in Schedule A of Bylaws

L = Limit of applicable parameter as listed in Schedule A of Bylaws

* Special agreements to be approved by council

DIRECTORATE: INFRASTRUCTURE SERVICES

ASSET MANAGEMENT AND SYSTEMS SECTION WAYLEAVE ADMINISTRATION TARIFFS	Unit	Tariff 2025/26 (Incl. VAT)	Tariff 2026/27 (Excl. VAT)	2026/27 VAT 15%	Tariff 2026/27 (Incl. VAT)
1.1 Administration fee for a miscellaneous wayleave to use the road reserve for a period of one month or less other than to install an underground service	per application	R 579.30	R 519.86	R 77.98	R 597.84
PLUS: Inspection Fee (once-off) For the temporary use of the road reserve for less than one month other than for the installation of an underground service, including for: the placement or storage of an item such as a chemical toilet, container, ladder, scaffolding, mobile crane or materials, pumping of concrete, excavation of trial holes. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.	per application	R 1 209.59	R 1 085.48	R 162.82	R 1 248.30
1.2 Administration fee for a wayleave or permit to use the road reserve to install an underground service (total construction duration is less than ten working days)	per application	R 1 158.61	R 1 039.73	R 155.96	R 1 195.69
PLUS: Inspection Fee (once-off) For the use of the road reserve to install a pipe, tunnel, cable or duct for water, electricity, communication, or any other service – where the total construction duration is less than ten working days. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.	per application	R 2 419.18	R 2 170.95	R 325.64	R 2 496.59
1.3 Administration fee for a wayleave or permit to use the road reserve to install an underground service	per application	R 3 475.83	R 3 119.18	R 467.88	R 3 587.06
PLUS: Inspection Fee (per month, based on the total construction duration) For the use of the road reserve to install a pipe, tunnel, cable or duct for water, electricity, communication, or any other service. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.	per month of construction, per application	R 2 419.18	R 2 170.95	R 325.64	R 2 496.59
1.4 Tariff for authorised trenching across a municipal roadway (per metre of trenching) For using an open trench to cross a roadway to install a pipe, cable or duct for water, electricity, communication or any other service. This tariff applies if the municipality grants written authorisation for a roadway trench before digging of the trench commences. The applicant may not begin roadway trenching before paying the roadway open trench fee and the Municipality issues written authorisation. The fee is payable when the written authorisation is issued. The roadway open trench fee is for the increased maintenance and reconstruction costs and inherent degradation of the roadway caused by roadway trenching. It applies even if the trench is reinstated in compliance with the Municipality's requirements and standards.	Per m measured from 0.5m behind the kerb or road edge	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
1.5 Tariff for unauthorised use of the road reserve for a period of more than one month other than to install an underground service (100% of admin & inspection fee under tariff 1.1) For the use of the road reserve beyond the one month allowed by the miscellaneous wayleave application. This is for holders of an approved miscellaneous wayleave that has expired and has not been renewed.	per month	R 1 814.38	R 1 628.21	R 244.23	R 1 872.44
1.6 Tariff for unauthorised commencement of use of the road reserve For the commencement of use of the road reserve (i.e. encroachment) without an approved wayleave or before Stellenbosch Municipality issues a wayleave.	per month	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
1.7 Tariff for unauthorised use of the road reserve to install an underground service Where construction period was 10 working days or less (200% of admin & inspection fee under tariff 1.2) Where construction period was more than 10 working days (200% of admin & inspection fee under tariff 1.3) For the commencement of an installation of an underground service without an approved wayleave or before Stellenbosch Municipality issues a wayleave. Includes a 100% surcharge which applies regardless of whether Stellenbosch Municipality issues a wayleave.	per application per application	R 7 257.53 R 12 095.89	R 6 512.85 R 10 854.75	R 976.93 R 1 628.21	R 7 489.78 R 12 482.96

1.8 Tariff for unauthorised trenching across a municipal roadway (per metre of trenching) (200% of tariff 1.6) For commencement of a roadway trench without written authorisation or before the Municipality issues written authorisation for the roadway trench. Includes a 100% surcharge. The surcharge applies regardless of whether the Municipality issues a written authorisation, and regardless of whether the roadway trench is necessary.	Per m measured from 0.5m behind the kerb or road edge	R 12 095.89	R 10 854.75	R 1 628.21	R 12 482.96
1.9 Tariff for unauthorised after-hours use of the road reserve for the installation of an underground service For the commencement of use of the road reserve to install an underground service outside of business hours. Work performed under an approved wayleave can only be performed in regular working hours (Mondays – Thursdays 08:00-17:00 and Fridays 08:00-15h00). Working after hours, on public holidays or the weekend is not permitted.	per occasion	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
1.10 Tariff for excavations being left open for longer than ten working days On completion of the Work, all trenches and excavations in the public road reserves must be backfilled and reinstated as soon as possible in accordance with the technical specifications. Failure to do so represents an unacceptable safety hazard.	per occasion	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
1.11 Tariff for unauthorised site abandonment for a period exceeding 14 days The wayleave holder may not leave the site for more than fourteen days without permanently reinstating the site.	per occasion	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
1.12 Tariff for not cleaning or reinstating the road reserve within 14 days of completion The construction site's cleaning up, and the reinstatement to its previous condition is considered part of the Work. It must be completed within 14 days after the construction work has been completed.	per occasion	R 6 047.95	R 5 427.37	R 814.11	R 6 241.48
WAYLEAVE ADMINISTRATION REFUNDABLE DEPOSITS					
2.1 Services Deposit A services deposit is required where there is a risk of damage to municipal services. It is determined by the service co-ordinator and is based on the replacement value of the services in close proximity to the Works e.g. Cost of cable repairs: LV – R 40 000, MV – R 240,000, HV – R 1,250,000, 66 KV R – R 2,500,000, etc. This deposit is paid into the recoverable cost account of Stellenbosch Municipality. After completion, damages will be assessed, the site will be inspected, and all additional costs will be communicated to the applicant. Stellenbosch Municipality will refund the balance of the deposit once all works are complete, and upon final inspection where the Municipality's engineers are satisfied that the reinstatement meets the Municipality's standard and requirements.	per application				
2.2 Bank Guarantee / Appropriate Business Insurance Another acceptable form of partial deposit is a bank guarantee as surety in favour of Stellenbosch Municipality or appropriate business insurance. NB: The first R25,000 of the Services Deposit must be paid into the recoverable cost account of Stellenbosch Municipality. A Bank Guarantee or appropriate business insurance can cover the balance of the required Services Deposit.	per application				
WAYLEAVE ADMINISTRATION TARIFF NOTES					
3.1 Unless the context indicates otherwise, 'road reserve 'includes a roadway, sidewalk footway and verge. 3.2 Suppose Stellenbosch Municipality incurs any costs resulting from Work in or use of the road reserve including remedying substandard or non-compliant reinstatement repairing damage, 3rd party claims, or cleaning of the site. In that case, the actual costs will be offset against the deposit (plus 10% administration fee, including VAT). The Municipality will refund the balance if any. 3.3 All internal Departments or State Funded Projects (National or Provincial), where Stellenbosch Municipality will take over the infrastructure, will be exempted from paying the Administrative Fee, Refundable Deposits Non-Refundable Payments and/or Penalties. 3.4 No micro trenching is allowed in the WC024.
