1.	**OPENING AND WELCOME**

The Speaker welcomed all present at the 40th Council meeting which was held in the Council Chamber.

2.	MAYORAL ADDRESS

NONE

3.	COMMUNICATIONS BY THE SPEAKER

- "Deadline for the completion of Disclosure of Interest Forms is end of business on 22 April 2026.

- Deadline for the submission of the nomination of panel members for the Advisory Committee – Civic Honours is 15 May 2026.

- Deadline for inputs of Ward allocation/Ward Committee Policy is 28 April 2026.

- Only Councillors who attended the Council In-Committee meeting held on 14 October 2025 will be permitted to attend this In-Committee session (item 23.2).

AMENDMENTS

There are amendments on the following items:

Items 10.3.1; 10.5.1 and 12.1 and 23.2.

ITEMS FOR NOTING

The following items are for noting:

Items 8.1; 8.3; 9.1.1; 9.1.2; 9.2.1 and 9.3.1.

CONSENSUS ITEMS

The following are consensus items:

Items 8.1; 8.2; 9.2.1 and 9.3.1.

The following Councillors celebrated their birthdays during April:

Councillor R Pheiffer – 4 April
Councillor E Groenewald – 18 April
Councillor P Crawley – 19 April
Councillor N Mcombring – 24 April
Councillor M Danana – 30 April

In-Committee Item 23.2

Speaker informed Council that the In-Committee Item 23.2 (including the external legal opinion) has been unlawfully circulated on a social media platform. Speaker indicated awareness of the origin and distribution of the report, noting that it was shared by an individual without authorization. It was further noted that even members of this Council have since posted comments in relation to the circulated material. Speaker placed it on record that, upon the close of the meeting, an immediate investigation will be initiated by his Office to identify all individuals involved in the distribution and discussion of the confidential report, including Ward Committee members and Councillors. The investigation will address the unauthorized disclosure of confidential information into the public domain.

He further stated that, subject to the outcome of the investigation, appropriate disciplinary action will be instituted against those found responsible, in accordance with applicable legislation.

The Speaker highlighted that the unauthorized disclosure constitutes a serious infringement on the Municipal Manager's rights to fairness and due process, including her right to respond to the contents of the report. It was noted that, should the Municipal Manager elect to pursue legal action in her personal capacity, she will receive the full support of the Speaker's Office.

Councillors were cautioned once again about the responsible use of social media and the potential consequences of misconduct in this regard. The Speaker expressed concern that certain comments made by Councillors on the social media platform were inappropriate and detrimental to the reputation of this Council. These Councillors will also be included in the investigation and may be subject to disciplinary action.

Speaker requested that this matter be noted for the record.

4.	COMMUNICATIONS BY THE MUNICIPAL MANAGER

The Municipal Manager, Ms G Mettler, informed the meeting that a By-election will be held in Ward 16 on 29 April 2026. Political parties were urged to adhere to the rules of the Independent Electoral Commission (IEC) to ensure a free and fair electoral process. It was noted that the Municipal Party Liaison Committee (MPLC) met earlier in the day in preparation for the by-election.

The Municipal Manager further indicated that party agent training will be conducted and encouraged all political parties to ensure their agents attend, as this will assist in managing any challenges that may arise on voting day. Appreciation was extended to political parties that consistently attend MPLC meetings, noting their contribution to the smooth functioning of the electoral process.

Concerns relating to safety were acknowledged. The IEC and the municipality have engaged with the South African Police Service (SAPS), as the primary authority responsible for safety, and law enforcement support will be provided where necessary. Planning engagements have already taken place in this regard.

The Municipal Manager noted that a number of applications for special votes have been received. Special voting will take place on the day prior to the election, commencing at 08:30. Voters who applied for home visits were requested to ensure their availability, as the IEC will not return to a residence if the voter is absent, and such individuals will be required to vote on the official voting day. A briefing session will be held on the morning of the special vote with political parties and agents, after which IEC teams will be deployed.

The Municipal Manager further informed Council that the municipality is currently assessing storm damage sustained over the past weekend within the affected areas of WC024. Recent rainfall has significantly increased dam levels due to the volume of water received over a short period. The Municipal Manager requested that Directors convey appreciation to municipal staff who responded to emergencies, including those on standby and those who worked under adverse weather conditions. Acknowledgement was also given to the Mayor, Portfolio Councillor, and Ward Councillors for their support, noting this as an example of effective governance.

In closing, the Municipal Manager reminded members that Freedom Day will be commemorated on 27 April and emphasized the importance of reflecting on the sacrifices made in achieving democracy. Members were encouraged to uphold accountability in their roles, recognizing it as fundamental to sustaining democracy and freedom.

Thank you very much.

5.	DISCLOSURE OF INTERESTS

NONE

6.	APPLICATION FOR LEAVE OF ABSENCE

6.1 The following applications for leave of absence were approved in terms of the Rules of Order By-Law of Council:-

Cllr M Slabbert	-	22 April 2026
Cllr RB Hendrikse	-	22 April 2026

Cllr WC Petersen	-	22 April 2026
Cllr MG Rataza	-	22 April 2026
Cllr M van Stade	-	22 April 2026
Cllr J Williams	-	22 April 2026

7.	CONFIRMATION OF THE MINUTES OF PREVIOUS MEETING/S

7.1	39TH COUNCIL MEETING: 2026-03-31

The minutes of the 39th Council meeting: 2026-03-31 **were confirmed as correct without any changes.**

8.	STATUTORY MATTERS

8.1	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR 11 MARCH 2026 TO 09 APRIL 2026

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 15 April 2026 and 22 April 2026

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR 11 MARCH 2026 TO 09 APRIL 2026

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2025/2026 to report the deviations to the Council.

3. DELEGATED AUTHORITY

Council

For noting.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2025/2026) stipulate that SCM deviations be reported to the Council. In compliance thereto, this report presents to the Council the SCM deviations that occurred during 11 March 2026 to 09 April 2026.

40TH COUNCIL MEETING: 2026-04-22: ITEM 8.1

NOTED

that there were no deviations approved for the month of 11 March 2026 to 09 April 2026.

8.2	**OVERSIGHT ROLE OF COUNCIL: SUPPLY CHAIN MANAGEMENT POLICY-REPORT ON THE IMPLEMENTATION OF THE SUPPLY CHAIN MANAGEMENT POLICY OF STELLENBOSCH MUNICIPALITY: QUARTER 3 (01 JANUARY 2026 – 31 MARCH 2026)**

Collaborator No:
IDP KPA Ref No: Financial Sustainability
Meeting Date: 15 April 2026 and 22 April 2026

1. SUBJECT: OVERSIGHT ROLE OF COUNCIL: SUPPLY CHAIN MANAGEMENT POLICY-REPORT ON THE IMPLEMENTATION OF THE SUPPLY CHAIN MANAGEMENT POLICY OF STELLENBOSCH MUNICIPALITY: QUARTER 3 (01 JANUARY 2026 – 31 MARCH 2026)

2. PURPOSE

To submit to Management a report for the period 01 January 2026 – 31 March 2026 on the implementation of Council's Supply Chain Management Policy. The report covers the performance of the various delegated functions and the implementation thereof.

3. FOR DECISION BY MUNICIPAL COUNCIL

Section 6 (3) & 4 of the SCM Policy 2025/2026 determines that the Accounting Officer must within 10 days at the end of each quarter; submit a report on the implementation of the SCM Policy to the Executive Mayor. This report must be made public in accordance with Section 21A of the Municipal Systems Act (32 of 2000).

4. EXECUTIVE SUMMARY

On a quarterly basis the Accounting Officer must submit a report on the implementation of the Supply Chain Management Policy to the Executive Mayor. In terms of the SCM Regulations and Council's SCM Policy the SCM unit has been delegated to perform powers and functions that related to the procurement of goods and services, disposal of goods no longer needed, the selection of contractors to aid in the provision of municipal services.

40TH COUNCIL MEETING: 2026-04-22: ITEM 8.2

RESOLVED (nem con)

(a) that Council approves this report and **ANNEXURE A** attached to the report, and

(b) that the report be made public in accordance with Section 21A of the Municipal Systems Act.

8.3	MFMA SECTION 52 REPORTING UP TO THE QUARTER ENDING MARCH 2026

Collaborator No:
IDP KPA Ref No: Financial Sustainability
Meeting Date: 22 April 2026

1. SUBJECT: MFMA SECTION 52 REPORTING UP TO THE QUARTER ENDING MARCH 2026

2. PURPOSE

To comply with Section 52(d) of the Municipal Finance Management Act and report to Council on the implementation of the budget; and service delivery budget plan of the Municipality for the 3rd Quarter of the 2025/2026 financial year.

3. DELEGATED AUTHORITY

THE EXECUTIVE MAYOR TO SUBMIT TO COUNCIL

In terms of section 52 (d) of the Municipal Finance Management Act:

"The mayor of a municipality—

(d) must, within 30 days of the end of each quarter; submit a report to the council

4. EXECUTIVE SUMMARY

The Executive Mayor must provide general political guidance over the fiscal and financial affairs of the Municipality and is required by Section 52(d) of the Municipal Finance Management Act to submit a report on the implementation of the budget and the financial and non-financial performance of the Municipality, to the Council within 30 days after end of each quarter.

The Section 52 report is a summary of the budget performance. It compares the implementation of the budget to the commitments made and contained in the Service Delivery and Budget Implementation Plan (SDBIP), and is intended to enable Council to give effect to their oversight responsibility.

This report provides the overall performance of the Municipality for the period 1 January 2026 to 31 March 2026.

40TH COUNCIL MEETING: 2026-04-22: ITEM 8.3

NOTED

the Section 52 Report (including quarterly performance report) – Third Quarter.

Collaborator No:
IDP KPA Ref No: Good Governance
Meeting Date: 22 April 2026

1. SUBJECT: QUARTERLY REPORT – WARD COMMITTEE FUNCTIONING 3RD QUARTER OF 2025/2026 FINANCIAL YEAR

2. PURPOSE

For Council to take note of the Functioning of Ward Committees within the Stellenbosch municipal areas.

3. DELEGATED AUTHORITY

For notification by Municipal Council.

4. EXECUTIVE SUMMARY

In terms of Section 73 of the Local Government: Municipal Structures Act, no 117 of 1998 and Regulations, Ward Committees must be established for each ward within the municipal area within 120 days after the election.

The System of Delegations of the Stellenbosch Municipality (S6 and S7) designates the Speaker of Stellenbosch Municipality to facilitate the establishment of Ward Committees in line with the provisions and stipulations of the Municipal Structures Act and Council's policy for the establishment of Ward Committees.

At the Council meeting of 30 March 2022, Council noted the establishment of Ward Committees for all 23 wards within the Stellenbosch Municipality.

Wards who did not have the full complement of Ward Committees members were allowed to co-opt members in line with Council Policy and Procedures for Ward Committees. All ward committees are fully functional and are performing all duties as set out in the Policy and Procedures for Ward Committees.

Attached herewith as ANNEXURE A is a table outlining the functioning of all Ward Committees for the period January - March 2026, including dates and number of Ward Committee meetings held to date.

40TH COUNCIL MEETING: 2026-04-22: ITEM 9.2.1

NOTED

(a) that Council notes the functioning of Ward Committees in all 23 wards;

(b) that Council takes note of the number of Ward Committee and Sector meetings held to date in all 23 wards from January - March 2026.

9.3	REPORT/S BY THE MUNICIPAL MANAGER [MS G METTLER]

9.3.1	DECISIONS TAKEN BY DIRECTORATES IN TERMS OF DELEGATED AUTHORITY FROM 1 JANUARY 2026 UNTIL 31 MARCH 2026

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 22 April 2026

1. SUBJECT: DECISIONS TAKEN BY DIRECTORATES IN TERMS OF DELEGATED AUTHORITY FROM 1 JANUARY 2026 UNTIL 31 MARCH 2026

2. PURPOSE

To submit a report to Council on decisions taken by the Municipal Manager and Directors in accordance with Council's System of Delegations for the period 1 January 2026 to 31 March 2026, in compliance with Section 63 of the Local Government: Municipal Systems Act, read together with the System of Delegations approved by Council.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

In view of the applicable legislative stipulations, attached hereto as **Annexure 1** is a consolidated summary of the decisions taken by each Directorate during the reporting period.

Furthermore, it should be noted that this summary reflects only those delegations exercised by Senior Managers, as duly authorised by Council in terms of the approved System of Delegations.

40TH COUNCIL MEETING: 2026-04-22: ITEM 9.3.1

NOTED

the decisions taken for the period 1 January 2026 until 31 March 2026, by the following Section 56 Managers:

- Municipal Manager and Acting Director Corporate Services - Ms G Mettler (1 January 2026 – 31 March 2026);
- Chief Financial Officer – Mr Kevin Carolus (1 January 2026 – 31 March 2026);
- Director Infrastructure Services – Mr S Chandaka (1 January 2026 – 31 March 2026);
- Director Planning and Economic Development – Mr A Barnes (1 January 2026 – 31 March 2026);
- Director Community and Protection Services – Mr G Boshoff (1 January 2026 – 31 March 2026).

Collaborator No:
IDP KPA Ref No: Good Governance
Meeting Date: 25 March 2026 and 22 April 2026

1. SUBJECT: RETURN ITEM: FEEDBACK ON PUBLIC PARTICIPATION PROCESS AFTER THE PUBLICATION OF THE INFORMATION STATEMENT OF THE INTENTION TO DISPOSE OF A PORTION OF FARM 528 AND A PORTION OF FARM 529C STELLENBOSCH, ALSO FORMERLY KNOWN AS MOUNTAIN BREEZE CARAVAN PARK

2. PURPOSE

To provide feedback to Council after a Public Participation Process was followed to advertise the intention of Council to dispose of portions of Farm 528 and 529C Stellenbosch, also known as Mountain Breeze Caravan Park.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Mountain Breeze was a very successful caravan park which sometimes had up to 70 camping sites occupied over the weekend or school holidays. The previous tenant terminated her lease agreement in 2021 and the property has since then been mostly vacant and had no lease agreement in place since then. An item was prepared for Council to consider a way forward with the property in July 2021. At the Council meeting held on 28 July 2021, Council decided to provide an opportunity for the public to submit written inputs on the future use of portions of Farm 528 and 529 Stellenbosch, before deciding on a way forward. The public notice requested inputs on/before 3 September 2021. Various written submissions were received. After taking the comments received into consideration Council resolved on 30 March 2022 as follows:

(a) that Council takes note of all the proposals received;

(b) that Council identifies Portions 528 and 529C, Stellenbosch as not currently needed for minimum municipal services;

(c) that a call for proposal for development of the facilities for Cycling, hiking groups, an Eco-education and Adventure centre for school groups along with overnight facilities be advertised;

(d) that the existing buildings and infrastructure be use for the above purpose;

(e) that the facility to be leased for a period of 5 years; and

(f) that successful lessee enters into a rental agreement with the municipality and be responsible for the security, maintenance and the payment of all services of the facility.

40TH COUNCIL MEETING: 2026-04-22: ITEM 10.3.1

RESOLVED (majority vote with 1 abstention)

Amended recommendations

(a) that the previous Council resolution to sell the Mountain Breeze property be rescinded by Council, and

(b) that the property is not needed for minimum level of basic service delivery in terms of section 14(2)(a) of the Municipal Finance Management Act;

(c) that the Council approves the leasing of the property for a period of 20 years via a tender to a private or non-government organisation to run the caravan park and campsite in line with its historic use and zoning.

(d) that a valuator be appointed to determine market-related lease price; and

(e) that an information statement be prepared for approval by Council to indicate Council's intention to lease the property.

10.5.1	EVICTIONS STATUS QUO AND PROPOSED TEMPORARY RELOCATION TO IDENTIFIED AREAS WITHIN THE STELLENBOSCH MUNICIPAL AREA (WC024)

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 22 April 2026

1. SUBJECT: EVICTIONS STATUS QUO AND PROPOSED TEMPORARY RELOCATION TO IDENTIFIED AREAS WITHIN THE STELLENBOSCH MUNICIPAL AREA (WC 024)

2. PURPOSE:

2.1.1. To provide Council of progressive case law with respect to evictions in terms of PIE and ESTA.

2.1.2. To provide an overview of Stellenbosch Municipality's attempts over several years to address Court ordered evictions.

2.1.3. To provide Council with an overview of vacant land studies that were undertaken overtime.

2.1.4. To provide a way forward in addressing emergency housing at various locations throughout the Municipality.

2.1.5. To obtain a formal resolution and guidance on the placement strategy for households currently under, or pending, judicial eviction orders.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality is currently grappling with a severe emergency housing shortage while under a Constitutional mandate to prevent homelessness following court-ordered evictions. Central to resolving this crisis is meaningful engagement, a legal requirement for early negotiation between the Municipality and evictees to investigate feasible outcomes and mitigate the trauma of displacement.

Furthermore, the *Bromwell* judgment necessitates providing alternative accommodation in a meaningful location, ensuring proximity to original livelihoods, schools, and social networks. Prioritising these locations is essential for achieving spatial and social justice, as it counteracts the historical trend of pushing the poor to the urban periphery. However, relocating families to distant areas often severs their sense of place and community connection, resulting in educational interruptions and increased financial strain.

40TH COUNCIL MEETING: 2026-04-22: ITEM 10.5.1

RESOLVED (majority vote)

Amended recommendations (recommendation (g) was added)

(a) that Council takes note that 90 eviction matters were received since August 2025;

(b) that Council takes note that 16 households have been evicted since 15 January 2026;

(c) that Council takes note that the current relocation sites are at capacity;

(d) that Council takes note of the previous vacant land studies that were undertaken;

(e) that Council takes note of the two (2) ways in which emergency housing sites are identified;

(f) that Council notes the following sites as dedicated emergency housing sites; and

	Vacant Site	Area (Settlement)	Previous / Current Use	Ownership	Strategy (S#)
1	Erf 2,	La Motte	Decommissioned sewerage works	Stellenbosch Municipality	S2
2	Farm 736/5 & 737/8,	Klapmuts	Invaded by small farmers	Stellenbosch Municipality	S2/S1
3	Portion of Farm 1024/3,	Wemmershoek	Riemvasmaak informal settlement	Stellenbosch Municipality	S2
4	Erf RE/6846,	Cloetesville	Vacant erf	Stellenbosch Municipality	S2
5	Farm RE 527,	Jamestown	Mountainview (TRA)	Stellenbosch Municipality	S1
6	Erf 11452 – 11463,	Idas Valley	Vacant erven	Stellenbosch Municipality	S3

(g) that Council identify the precinct 10/Adam Tas Corridor as the primary TRA development, and that a workshop be given to the Council.

Collaborator No: 803524
IDP KPA Ref No: Valley of Opportunity
Meeting Date: 15 April 2026

1. SUBJECT: ADAM TAS CORRIDOR (ATC): APPROVAL OF THE TERMS OF REFERENCES FOR THE ADAM TAS CORRIDOR STEERING COMMITTEE AND THE DEVELOPMENT FACILITATION UNIT (DFU)

2. PURPOSE

To request Council to approve the Terms of References (ToRs) for the Adam Tas Corridor Steering Committee and the Adam Tas Corridor Development Facilitation Unit (DFU) as part of the institutional arrangements required to support the implementation of the Adam Tas Corridor Local Spatial Development Framework (LSDF) and the ATC Overlay Zone.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Adam Tas Corridor (ATC) is one of the most significant catalytic spatial transformation projects within Stellenbosch Municipality. The project area covers approximately 375 hectares of largely underutilised industrial and agricultural land along Adam Tas Road, connecting Kayamandi, Cloetesville, and the Stellenbosch town centre.

To realise the vision of transforming this corridor into a mixed-use, inclusive, and integrated urban development area, Council approved the ATC Local Spatial Development Framework (LSDF) and associated development guidelines in October 2022. To enable implementation, Council subsequently approved the ATC Overlay Zone (promulgated in November 2023), which allocates development rights and conditions to facilitate coordinated development.

40TH COUNCIL MEETING: 2026-04-22: ITEM 10.8.1

RESOLVED (majority vote with 1 abstention)

(a) that Council approves the Terms of Reference for the Adam Tas Corridor Steering Committee, attached as **APPENDIX 1**;

(b) that Council approves the Terms of Reference for the Adam Tas Corridor Development Facilitation Unit (DFU), attached as **APPENDIX 2**; and

(c) that Council supports the implementation of the institutional arrangements required to advance the implementation of the Adam Tas Corridor Local Spatial Development Framework and Development Guideline.

10.8.2	RENAMING OF THE NPK BUILDING

Collaborator No:
IDP KPA Ref No: Valley of Opportunity
Meeting Date: 15 April 2026

1. SUBJECT: RENAMING OF THE NPK BUILDING

2. PURPOSE

To obtain approval from Council to rename the NPK Building in terms of clause 12 of the Stellenbosch Municipality Policy for the Naming and Renaming of Streets, Public places, Natural areas, Artefacts and Council-owned building and Facilities, 2022 (**ANNEXURE A**).

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Municipality, following the acquisition of the NPK building as a new municipal office facility and client service walk-in centre, initiated a collaborative public participation process to invite residents to submit name suggestions for the building. All submissions received were collated with a full list of proposed names **(ANNEXURE C)**. This necessitated the Municipal Manager to establish a Municipal Renaming Committee to assess all the proposals received, against the criteria and rules as set out in the Policy in order to make recommendations to Council.

40TH COUNCIL MEETING: 2026-04-22: ITEM 10.8.2

RESOLVED (majority vote with 1 abstention)

(a) that the renaming of the NPK building be re-advertised for proposals for new names in line with the Renaming Policy of Council, clear guidelines to be included in the advert; and

(b) that the re-advertisement be in the form of a competition and the Administration be task with seeking sponsored prices.

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: Council: 22 April 2026

---

1. RECRUITMENT OF AN ADDITIONAL APAC MEMBER WITH ICT EXPERTISE

2. PURPOSE

To obtain Council's approval to initiate the recruitment of an additional APAC member with expertise in Information and Communication Technology (ICT).

3. DELEGATED AUTHORITY

The delegated authority for the appointment of APAC members is Council.

4. EXECUTIVE SUMMARY

In terms of Section 166 of the Municipal Finance Act (MFMA), Act No 56 of 2003, each municipality must have an Audit Committee. The Audit Committee is an independent advisory body which must advise Council, the political office bearers, the accounting officer, the management and staff of the municipality. The Act requires the Council to appoint the Audit Committee members and the Chairperson.

Stellenbosch Municipality (SBM) currently has an established APAC composed of four (4) independent external members appointed by the Council. However, none of the current members is an expert in ICT governance.

40TH COUNCIL MEETING: 2026-04-22: ITEM 12.1

RESOLVED (majority vote)

Amended recommendations

(a) that Council approves the Municipal Manager (MM) to initiate the recruitment and appointment processes for one (1) additional APAC member with expertise in ICT; and

b) that Council appoints the Executive Mayor (Mr. Ald JS Fasser), APAC Chairperson (Mr. L Nene) and MM (Ms. G Mettler) to serve on the Nominations and Selection Committee responsible for overseeing the recruitment of APAC member and making recommendations to Council for appointment.

12.2	SUBMISSION OF ADJUSTED AND REVISED HUMAN RESOURCE MANAGEMENT POLICIES TO COUNCIL FOR APPROVAL – TASK JOB EVALUATION AND EMPLOYEE ASSISTANCE PROGRAMME

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 22 April 2026

1. SUBJECT: SUBMISSION OF ADJUSTED AND REVISED HUMAN RESOURCE MANAGEMENT POLICIES TO COUNCIL FOR APPROVAL – TASK JOB EVALUATION AND EMPLOYEE ASSISTANCE PROGRAMME

2 PURPOSE

To formally submit the following adjusted and/or revised Human Resource Management policies to Council for consideration and approval, following the completion of the prescribed collective consultation processes:

2.1 Task Job Evaluation Policy; and

2.2 Employee Assistance Programme (EAP) Policy.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Municipality is legally obliged to ensure that its Human Resource Management policies remain current, legally compliant, operationally effective and aligned with applicable labour legislation, collective agreements and good governance principles. In pursuit of this obligation, the aforementioned policies were reviewed and/or adjusted to address operational requirements, legislative developments, organisational alignment and best practice within local government.

In compliance with section 23 of the Constitution of the Republic of South Africa, 1996, the Labour Relations Act 66 of 1995, the applicable collective agreements of the South African Local Government Bargaining Council (SALGBC), and the Municipality's consultative framework, the draft policies were referred to the Local Labour Forum (LLF) for consultation.

The LLF, exercising its consultative mandate, in turn referred the policies to the Human Resources Development Sub-Committee for detailed engagement and consultation. The Human Resources Development Sub-Committee convened on various dates since August 2025, during which the policies were substantively considered, debated and refined. The consultative process in respect of the aforementioned policies was finalised on 28 January 2026, whereafter the policies were confirmed as consultatively concluded and suitable for submission to Council for approval.

Council is accordingly requested to consider and approve the policies as consultatively finalised.

40TH COUNCIL MEETING: 2026-04-22: ITEM 12.2

RESOLVED (majority vote with 1 abstention)

that Council approves

(a) the Task Job Evaluation Policy; and

(b) the Employee Assistance Programme (EAP) Policy

as consulted and finalised through the Local Labour Forum and the Human Resources Development Sub-Committee on 28 January 2026 and 12 March 2026 respectively.

8.1	**ADOPTION OF THE 4TH REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027**

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 20 May 2026 and 27 May 2026

1. SUBJECT: ADOPTION OF THE 4TH REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027

2. PURPOSE

To submit the following to the Council for adoption:

(a) The 4th review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027, attached as **ANNEXURE A;** and

(b) The community input and comments, written submissions, and the Provincial Government SIME Assessment Report on the draft 4th review of the 5th Generation IDP 2022 - 2027, attached as **ANNEXURE B.**

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

In terms of Section 34(a)(i)(ii) and Section 41 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), Stellenbosch Municipality undertook its annual review on the 5th Generation IDP 2022 – 2027. Following this process, the draft 4th review of the 5th Generation IDP 2022 – 2027 was approved by the Council on 31 March 2026, which informs the municipality's budget, a performance assessment of the IDP deliverables, and specifies the municipality's intended plans to realise the vision, mission, strategic objectives, and needs of the community.

The public participation period on the approved draft 4th review of the 5th Generation IDP 2022 – 2027 and draft Budget 2026/27 – 2028/29 commenced from **07 - 28 April 2026** for a period of not less than 21 days in terms of Chapter 4, Section 15(3) of the Local Government: Municipal Planning and Performance Management Regulations, 2001. This public participation period was intended to offer community members and stakeholders ample opportunity to submit verbal and written input / comments on the draft IDP, draft Budget and related budget policies.

In addition, area-based open days were held from **08 – 15 April 2026** in the respective areas, with transport made available to the venues. The IDP and Budget open days were a platform for community members to engage in one–on–one discussion with departmental representatives and submit verbal input. A stakeholder engagement was held on 21 April 2026, attended by councillors, senior management, stakeholders, and other role-players in the Stellenbosch municipal area. Furthermore, other public participation platforms were made available, as listed below:

- A link to an electronic submission form was activated from 07 – 28 April 2026 on the municipal website: www.stellenbosch.gov.za;

- '*IDP Submission Form'* boxes and hard copy forms were placed at ward offices and libraries; and

- Electronic written submissions were received and accepted via email: idp@stellenbosch.gov.za; and WhatsApp: 067 427 1556.

It is important to notify the Council that a provision was included in the public notice published in the local newspaper and municipal website, stating that the public participation period commences on **07 April 2026** and the closing date for comments is **28 April 2026 at 16:30**, and that **NO** late submissions will unfortunately be accepted after 28 April 2026. However, four late submissions forming part of Annexure B were received after the closing date and time. Council is therefore requested to consider the transfer of these late submissions to the September 2026 IDP process.

5. RECOMMENDATIONS

(a) that the Stellenbosch Municipality's 4th review of the 5th Generation IDP 2022 – 2027 be adopted in terms of Section 34 of the MSA, attached as **ANNEXURE A**;

(b) that the community input and written submissions on the draft 4th review of the 5th Generation IDP 2022 – 2027 and the Provincial Government SIME Assessment Report, attached as **ANNEXURE B**, be noted;

(c) that the four late submissions are noted as late submissions and that the submissions be transferred to the September 2026 IDP process;

(d) that a notice be placed on the municipal website of the municipality and in the local newspaper notifying the public that the 4th review of the 5th Generation IDP 2022 – 2027 has been adopted by the Council; and

(e) that the adopted 4th review of the 5th Generation IDP 2022 – 2027 be submitted to the MEC for Local Government, Environmental Affairs and Development Planning, Western Cape: Department of Local Government, Western Cape: Provincial Treasury, National Treasury, the Cape Winelands District Municipality, and the Office of the Provincial Speaker.

6. DISCUSSION

6.1 Background

In terms of the provisions of MSA, each council must review its Integrated Development Plan in accordance with an assessment of its performance measurements in terms of Section 41 of the MSA and to the extent the changing circumstances so demand.

The key dates for the IDP review process form part of the integrated SDF / IDP / Budget Time Schedule approved by the Council in August 2025 to guide the planning, development, approval and adoption of the 4th review of the 5th Generation IDP 2022 – 2027.

The following processes were followed in accordance with the Time Schedule:

Dates	Action(s)
August 2025	• The SDF/IDP/Budget Time Schedule / Process Plan for 2026/27 were approved by the Council on **25 August 2025**, and duly submitted to the relevant role-players as per the MSA.
September 2025 – October 2025	• IDP public participation for the drafting of the 4th review of the 5th Generation IDP 2022 – 2027 commenced on **08 September 2025**. • The IDP public participation period was open for the public and stakeholders to submit community needs to be considered by the departments during the project planning phase of the IDP cycle, as well as for the reprioritisation of ward priorities by the ward councillors and ward committees. • The physical area–based IDP public participation open days were held from **08 - 15 September 2025.** • An IDP stakeholder engagement was held on **18 September 2025**, attended by various stakeholders and role-players. • On the municipal website, an electronic submission form was created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, X, and WhatsApp. • Hard copies of the "IDP Submission Form' were also made available at all libraries and ward offices.
November 2025 - December 2025	• The consolidated community input and comments of September 2025 were tabled to Council on 26 November 2025 for consideration in preparation for the draft IDP and draft Budget. • The community input and comments captured during the IDP public participation process in September 2025 were sent to the ward councillors on 21 October 2025, before the ward prioritisation sessions to discuss with their ward committees in preparation for the reprioritisation of the 2022 – 2027 ward priorities. • On 13 – 14 November 2025, all-ward councillor sessions were held for the reprioritisation of the 2022 – 2027 ward priorities for the draft 4th review of the 5th Generation IDP 2022 – 2027. • Refinement of the revised ward priorities into specific, measurable, achievable, relevant and time–bound ward priorities. • Internal IDP review sessions with the different departments were facilitated by the Department: IDP, PMS and Public Participation from **01 to 03 December 2025**, considering the revised ward priorities as discussed with the ward councillors in November 2025, all the community input, existing projects / programmes, and sector plans. • These discussions with departments entailed the details of possible key deliverables to determine what resources are needed in terms of budget, timing, identification of different role players and responsible project owners.
January 2026 - February 2026	• The key activity during this period involved review sessions with the different directorates to review the 2022 – 2027 IDP deliverables and implementation progress. • The review sessions were held from **19 – 30 January 2026**.
March 2026 - May 2026	• MayCo and Council considered the draft 4th review of the 5th Generation IDP 2022 – 2027 and approved it on 31 March 2026 to obtain public input and comments. • A notice for public comment was published in the local newspaper and the municipal website. • The approved draft 4th review of the 5th Generation IDP 2022 – 2027 was submitted to the MEC, Department of Local Government, Western Cape Provincial Treasury, National Treasury, Office of the Provincial Speaker of Parliament, Cape Winelands District Municipality for their input. • The IDP and Budget public participation period was open from 07 – 28 April 2026**.** • IDP and Budget open days were held from 08 – 15 April 2026. A total of 8 area–based open days were held. • Consultation and refinement of the IDP and Budget documents. • Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2026**. • Submit the adopted IDP to the Provincial Government and other role-players.

6.2 Financial Implications

The IDP and the Budget have been aligned, taking into account ward priorities and public needs identified through the public participation engagements outlined above.

6.3 Legal Implications

The recommendations in this report comply with the Council's policies and all applicable legislation.

Section 25(1):

The municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality, which—

(a) links, integrates and coordinates plans and takes into account proposals for the development of the municipality;

(b) aligns the resources and capacity of the municipality with the implementation of the plan;

(c) forms the policy framework and general basis on which annual budgets must be based;

(d) complies with the provisions of this Chapter; and

(e) is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

Section 26:

An integrated development plan must reflect -

(a) the municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;

(b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;

(c) the council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;

(d) the council's development strategies, which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;

(e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;

(f) the council's operational strategies;

(g) applicable disaster management plans;

(h) a financial plan, which must include a budget projection for at least the next three years; and

(i) the key performance indicators and performance targets determined in terms of section 41.

Section 34:

"**Annual review and amendment of the integrated development plan**

A municipal council-

(a) must review its integrated development plan-

(i) annually in accordance with an assessment of its performance

measurements in terms of Section 41; and

(ii) to the extent that changing circumstances so demand; and

(a) may amend its integrated development plan in accordance with a prescribed process."

Section 35(1):

An integrated development plan adopted by the council of a municipality—

(a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;

(b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and

(c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

Section 36:

A municipality must give effect to its integrated development plan and conduct its affairs in a manner that is consistent with its integrated development plan.

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

This report has no direct risk implications for the municipality.

6.6 Previous / Relevant Council Resolutions:

- Item 8.2 of the 5th Council Meeting held on 25 May 2022. "*Adoption of the 5th Generation Integrated Development Plan (IDP) 2022 - 2027"*; and
- Item 8.2 of the 12th Council Meeting held on 29 March 2023. "*Approval of the Draft 1st Review of the 5th Generation IDP 2022 - 2027"*.
- Item 8.1 of the 14th Council Meeting held on 24 May 2023. "*Adoption of the 1st Review of the 5th Generation IDP 2022 - 2027"*.
- Item 8.2 of the 16th Council Meeting held on 23 August 2023. "*Draft 1st Amendment of the 5th Generation IDP 2022 – 2027"*.
- Item 8.1 of the 17th Council Meeting held on 25 October 2023. "*Adoption of 1st Amendment of the 5th Generation IDP 2022 – 2027*".
- Item 8.3 of the 21st Council Meeting held on 27 March 2024. "*Approval of the Draft 2nd Review of the 5th Generation IDP 2022 - 2027"*.
- Item 7.1 of the Special Council Meeting held on 31 May 2025. *"Adoption of the 2nd review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027*".
- Item 8.2 of the 30th Council Meeting held on 31 March 2025*. "Draft 3rd Review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027".*
- Item 8.2 of the 39th Council Meeting held on 31 March 2026. *"Draft 4th Review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027"*.

RECOMMENDATION FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2026-05-20: ITEM 6.1

(a) that the Stellenbosch Municipality's 4th review of the 5th Generation IDP 2022 – 2027 be adopted in terms of Section 34 of the MSA, attached as ANNEXURE A;

(b) that the community input and written submissions on the draft 4th review of the 5th Generation IDP 2022 – 2027 and the Provincial Government SIME Assessment Report, attached as ANNEXURE B, be noted;

(c) that the four late submissions are noted as late submissions and that the submissions be transferred to the September 2026 IDP process;

(d) that a notice be placed on the municipal website of the municipality and in the local newspaper notifying the public that the 4th review of the 5th Generation IDP 2022 – 2027 has been adopted by the Council; and

(e) that the adopted 4th review of the 5th Generation IDP 2022 – 2027 be submitted to the MEC for Local Government, Environmental Affairs and Development Planning, Western Cape: Department of Local Government, Western Cape: Provincial Treasury, National Treasury, the Cape Winelands District Municipality, and the Office of the Provincial Speaker.

8.3.9 Portfolio: Parks, Open Spaces and Environment 297

Chapter 9: Public Interest and Expression of Needs 300

9.1 Community Participation 300
9.2 Public Participation in the drafting of the 4th review of the 5th Generation IDP 2022 – 2027 301
9.3 Public Participation Statistics: September 2025 and April 2026 304
9.4 Summary of Needs and Priorities 306
9.5 Ward Priorities 316
9.5.1 Ward Priorities: Ward 1 316
9.5.2 Ward Priorities: Ward 2 335
9.5.3 Ward Priorities: Ward 3 341
9.5.4 Ward Priorities: Ward 4 348
9.5.5 Ward Priorities: Ward 5 361
9.5.6 Ward Priorities: Ward 6 381
9.5.7 Ward Priorities: Ward 7 394
9.5.8 Ward Priorities: Ward 8 414
9.5.9 Ward Priorities: Ward 9 418
9.5.10 Ward Priorities: Ward 10 422
9.5.11 Ward Priorities: Ward 11 427
9.5.12 Ward Priorities: Ward 12 437
9.5.13 Ward Priorities: Ward 13 444
9.5.14 Ward Priorities: Ward 14 449
9.5.15 Ward Priorities: Ward 15 451
9.5.16 Ward Priorities: Ward 16 456
9.5.17 Ward Priorities: Ward 17 463
9.5.18 Ward Priorities: Ward 18 467
9.5.19 Ward Priorities: Ward 19 473
9.5.20 Ward Priorities: Ward 20 480
9.5.21 Ward Priorities: Ward 21 487
9.5.22 Ward Priorities: Ward 22 491
9.5.23 Ward Priorities: Ward 23 497

Chapter 10: Financial Plan 503

10.1 Introduction 503
10.2 Capital and Operating Budget Estimates 503
10.2.1 Budget Assumptions 503
10.2.2 Operating Budget Estimates 503
10.3 Financial Management Arrangements 505
10.4 Financial Strategies and Programmes 506
10.5 Medium – Term Capital Expenditure per Strategic Focus Area 507
10.6 Medium – Term Operational Expenditure 508

10.7 Medium–Term Operational Revenue per Strategic Focus Area 508
10.8 Capital Budget 2026/27 – 2028/29 per Directorate 509
10.8.1 Capital Budget 2026/27 – 2028/29: Office of the Municipal Manager 509
10.8.2 Capital Budget 2026/27 – 2028/29- Directorate: Planning and Economic Development 509
10.8.3 Capital Budget 2026/27 – 2028/29- Directorate: Community and Protection Services 510
10.8.4 Capital Budget 2026/27 – 2028/29- Directorate: Corporate Services 513
10.8.5 Capital Budget 2026/27 – 2028/29- Directorate: Infrastructure Services 514
10.8.6 Capital Budget 2026/27 – 2028/29- Directorate: Financial Services 521
10.9 National and Provincial Investment 522

Chapter 11: Organisational Scorecard (5 – years) 524

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP) 524
11.2 SFA 1 – Valley of Possibility 525
11.3 SFA 2 – Green and Sustainable Valley 528
11.4 SFA 3 – Safe Valley 532
11.5 SFA 4 – Dignified Living 533
11.6 SFA 5 – Good Governance and Compliance 537

Chapter 12: Implementation, Monitoring and Review (1-year) 543

12.1 SFA 1 – Valley of Possibility 544
12.2 SFA 2 – Green and Sustainable Valley 545
12.3 SFA 3 – Safe Valley 546
12.4 SFA 4 – Dignified Living 547
12.5 SFA 5 – Good Governance and Compliance 550

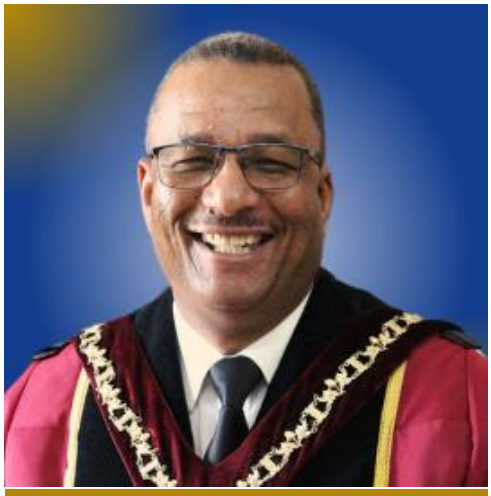
Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan –



- is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- guides and informs all planning and development, and all decisions concerning planning, management, and development;
- forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets, and performance management system; and
- seeks to promote integration by balancing the economic, ecological, and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission, and Values

FOREWORD BY THE EXECUTIVE MAYOR

Cllr Jeremy Fasser
Executive Mayor

It is a privilege to present the draft 4th Review of the 5th Generation Integrated Development Plan (IDP) for the 2022–2027 term. Stellenbosch Municipality remains a place of remarkable potential - defined not only by its natural beauty and economic strength, but also by the active, diverse and engaged communities who call it home. This review reflects our shared commitment to shaping a municipality that is inclusive, responsive and resilient in the face of a changing environment.

The IDP continues to serve as our principal strategic framework, guiding decision-making, prioritisation and the allocation of resources. Through this annual review process, we take stock of our progress, respond to emerging challenges and refine our focus to ensure that our plans remain relevant and impactful. Central to this process is meaningful community participation. The voices of residents, businesses, civil society organisations, traditional leaders and other stakeholders play a critical role in strengthening our planning and ensuring that our development agenda is grounded in lived realities.

Over the past year, Stellenbosch Municipality has continued to demonstrate stability and purpose despite ongoing economic pressures, infrastructure demands and broader socio-economic challenges. We remain steadfast in our commitment to sound governance, financial sustainability and service excellence. Transparency, accountability and ethical leadership underpin our efforts as we work to deliver value to our communiies and safeguard the long-term well-being of the municipality.

Key focus areas such as housing delivery, infrastructure investment, economic development, climate resilience and energy security remain central to this IDP review. Through strategic partnerships and innovative approaches—including energy co-generation initiatives, targeted infrastructure upgrades and support for local enterprise—we are working to create an enabling environment where opportunity can grow, and prosperity can be shared more broadly.

This IDP review is more than a statutory requirement; it is a collective endeavour that reflects our ambitions as a municipality and our responsibility to future generations. I would like to extend my sincere appreciation to the Deputy Mayor, the Mayoral Committee, all Councillors, the Municipal Manager, municipal officials and our many internal and external partners for their contributions and commitment throughout this process.

I encourage every resident and stakeholder to engage with this draft IDP review and to participate actively in shaping the path ahead. Whether you are a long-established resident, a small business owner, a farmer, a student or an emerging entrepreneur, your insights matter. Together, through constructive engagement and shared purpose, we can continue to build a Stellenbosch that works for all.

CLLR JEREMY FASSER
EXECUTIVE MAYOR

OVERVIEW BY THE MUNICIPAL MANAGER

Geraldine Mettler
Municipal Manager

Over the past year, Stellenbosch Municipality has continued to demonstrate resilience, sound governance and strategic leadership, creating a stable and enabling environment in which communities, businesses and investors can thrive. Strong and consistent leadership structures, prudent financial management and a healthy financial position have underpinned service delivery continuity, investor confidence and sustained economic activity across the municipal area. These foundations have contributed to increased investment inflows, business growth and employment opportunities, reinforcing Stellenbosch's position as a leading municipal economy in the Western Cape.

Building on these successes, the draft 4th review of the 5th Generation Integrated Development Plan (IDP) reflects the municipality's continued commitment to responsive, participatory and outcomes-driven planning. In line with legislative requirements, this review assesses progress made to date, evaluates current priorities and incorporates new information, community inputs and stakeholder feedback to ensure alignment with evolving needs and circumstances.

The review process has been informed by extensive engagement with communities, sector departments, organised business, civil society and other key stakeholders. Inputs received through public participation processes, intergovernmental engagements and internal municipal assessments have been carefully considered and integrated where appropriate. These engagements enhance the credibility of the IDP and reaffirm its role as a shared development blueprint for the municipal area.

The IDP remains aligned with national and provincial policy frameworks, including the National Development Plan, the Medium-Term Strategic Framework and the Western Cape Government's strategic priorities. At a municipal level, the review ensures ongoing alignment between the IDP, the Municipal Spatial Development Framework, the Service Delivery and Budget Implementation Plan (SDBIP) and the Medium-Term Revenue and Expenditure Framework.

The draft 4th review maintains a strong focus on sustainable service delivery, inclusive economic growth, social development, environmental sustainability and institutional capability. It responds to emerging risks and opportunities such as energy constraints, climate change impacts, urbanisation pressures and fiscal realities, while reinforcing long-term strategic objectives and development outcomes.

This draft is presented for public consideration and comment, reaffirming Stellenbosch Municipality's commitment to transparent governance, accountability and collaborative planning. The final IDP will reflect the collective contributions of residents, stakeholders and partners, and will guide implementation for the remainder of the 2022–2027 term.

Through this review, Stellenbosch Municipality reaffirms its resolve to work in partnership with its communities and stakeholders to advance development that is sustainable, inclusive and future-focused.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:

Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to develop a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area, as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking, and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented, and monitored in a controlled environment. These issues may be overarching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which the community and stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments, as well as the district municipality.

At the heart of the IDP lies improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development, and, crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

(a) An IDP is adopted by the council of a municipality:
(b) is the principal strategic planning instrument that guides and informs all planning and development and all decisions with regard to planning, management, and development in the municipality;
(c) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
(d) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-
(a) The municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;
(b) An assessment of the existing level of development in the municipality, which must include an identification of communities that do not have access to basic municipal services;
(c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
(d) The council's development strategies, which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
(e) A spatial development framework that must include the provision of basic guidelines for a land-use management system for the municipality;
(f) The council's operational strategies;
(g) Applicable disaster management plans;
(h) A financial plan, which must include a budget projection for at least the next three years; and
(i) The key performance indicators and performance targets are determined in terms of Section 41.

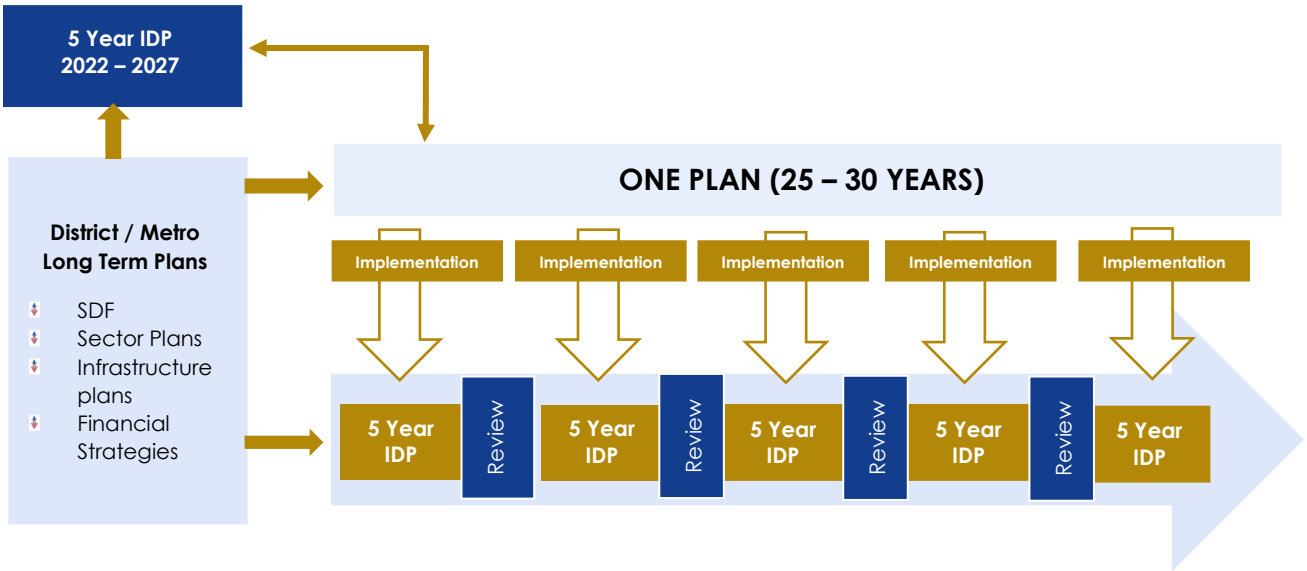
The IDP is informed by a leadership agenda, as contained in national and provincial policy documents, as well as the needs of local residents and public, private, and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 4th review of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1-year).

1.3 Relationship between the IDP, Budget, Performance Management and Risk Management

The IDP process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs, and performance management fulfils the implementation, monitoring, and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.



The role of the budget is to attach funds to the objectives that are contained in the IDP, and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk management is one of management's core responsibilities according to Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate, and address risks continuously before such risks can negatively impact the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

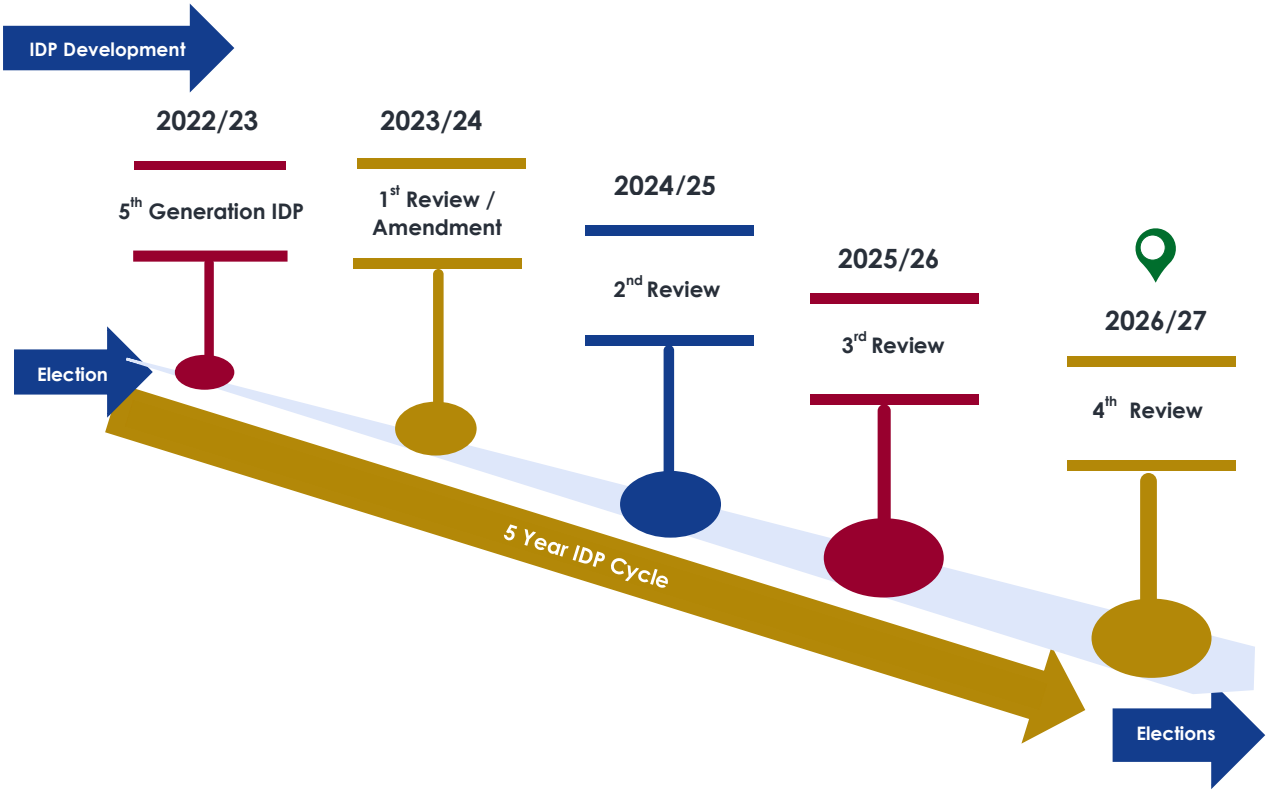
The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive, and strategic plan for the development of the municipality." It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be guided by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which the implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans include the following:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards to scrutinise.



Ward plans assist in ensuring that the IDP is more targeted and relevant to the needs of the communities and all groups, including the most vulnerable. These plans provide ward committees a way to plan and carry out their roles and responsibilities in a systematic way. They are the basis for conversations between the municipality and ward committees about setting priorities and making budget requests. Ward committees will also use them to keep track of and evaluate progress throughout the year. The information is, however, on a detailed level and forms part of the IDP, but a detailed ward plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections has to prepare an IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP, which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP), and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects, and progress reports made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five–Year IDP Development and Review Cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

a) must review its integrated development plan –
   (i) annually following an assessment of its performance measurement in terms of section 41; and
   (ii) to the extent that changing circumstances so demand.

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, is informed of the varying needs of residents and is up-to-date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September and October 2025, must now review its IDP.

This is the **fourth review** to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality's strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality's budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates, inter alia, that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the municipal manager must be defined.

Table 1: Roles and Responsibilities

Executive Mayor and Municipal Council	Councillors and Ward Committee Members	Municipal Manager and Management Team
Executive Mayor must: • Manage the drafting of the IDP; • Assign responsibilities in this regard to the Municipal Manager; • Submit the draft plan to the municipal council for adoption; and • Coordinate the annual revision of the IDP and determine how the IDP is taken into account or revised for the purposes of the budget. **The Municipal Council** • The Council is the ultimate decision-making authority. • Decisions to approve or amend the municipality's IDP may not be delegated and have to be taken by the full Council.	• Assist with the public participation process. • Assist the ward councillor (who is the chairperson) in identifying challenges and needs of residents. • Provide a mechanism for discussion and negotiation between different stakeholders in the ward; • Interact with other forums and organisations on matters affecting the ward; • Draw up a ward plan that offers suggestions on how to improve service delivery in the particular ward; • Disseminate information in the ward; and • Monitor the implementation process concerning its areas	• Provide technical / sector expertise and information; • Provide inputs related to the various planning steps; • Summarise / digest / process inputs from the participation process; • Discuss and comment on inputs from specialists; and • Address inputs from and give feedback to the community.

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 2: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	**28**
African National Congress (ANC)	**8**
GOOD	**3**
Economic Freedom Fighters (EFF)	**2**
African Christian Democratic Party (ACDP)	**1**
People's Democratic Movement (PDM)	**1**
Patriotic Alliance (PA)	**1**
Vryheidsfront Plus (VF)	**1**
Total	**45**

Below is a table that categorises the councillors within their respective political parties and wards.

Table 3: Ward Councillors and Proportional Councillors

No.	Name of Councillor	Capacity	Political Party	Ward Councillor and Proportional (PR)
1.	Ald JS Fasser (Mr)	Executive Mayor	DA	Ward Councillor: Ward 17

44.	J Andrews (Mr)	Part-time	PA	PR
45.	JC McFarlane (Mr)	Part-time	VF Plus	PR

1.10 Executive Mayor and Mayoral Committee (MayCo)

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the Executive Mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition to delegated powers assigned by the Council. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 4: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Ald J Fasser	Executive Mayor
Cllr M Slabbert	Deputy Executive Mayor
Cllr R Pheiffer	MayCo member: Infrastructure Services
Cllr N Olayi	MayCo member: Sport, Youth and Culture
Cllr J Williams	MayCo member: Parks, Open Spaces and Environment
Cllr L Nkamisa	MayCo member: Corporate Services
Cllr JC Anthony	MayCo member: Financial Services
Cllr S Heneke	MayCo member: Community Development and Protection Services
Cllr R du Toit	MayCo member: Human Settlements
Cllr C Manuel	MayCo member: Rural Management
Cllr T Kumm	MayCo member: Planning, LED and Tourism

Figure 3: Executive Mayoral Committee

1.11 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily must serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 4: Municipal Management Team

Geraldine Mettler
Municipal Manager
Strategic Management; Internal Audit; Corporate Governance; Risk Management; Intergovernmental Relations; International Relations; Integrated Development Planning; Organisational Performance Management; Communications; and Knowledge Management.

Dr Lungelwa Kaywood
(Acting) Director: Corporate Services
Administrative Services; Legal and Compliance; Human Resources Management; Individual Performance Management; Information and Communication Technology; Councillor's Support; Committee Services; Municipal Court; and Properties Management and Municipal Building Maintenance.

Anthony Barnes
Director: Planning and Economic Development
Development Management; Development Planning; Integrated Human Settlements; Building Management; Heritage Resource Management; Spatial Planning and Land Use Management; Local Economic Development and Tourism, Housing Development; Informal Settlements; and Housing

Kevin Carolus
Chief Financial Officer
Revenue Management; Expenditure Management; Budget Preparation and Management; Management of Financial Statements; Supply Chain Management; Financial Systems; and Asset Management.

Shane Chandaka
Director: Infrastructure Services
Roads, Transport and Storm Water; Water and Wastewater Services; Electrical Services; Waste Management; and Infrastructure Planning, Development, and Implementation.

Gary Boshoff
Director: Community and Protection Services
Community Development; Protection Services; Disaster Management and Fire Services, Traffic and Law Enforcement Services; Library Services; Parks and Cemeteries; Recreation, Sport, and Halls; and Environmental Management.

1.12 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 5: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	• Approval of the *m*SDF / IDP / Budget Process Plan / Time Schedule. • Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	• With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore, an amended *m*SDF / IDP / Budget Process Plan / Time Schedule was submitted to the Council on 23 November 2021 for consideration and approval. • The IDP public participation period started on **29 November 2021** and ended on **12 January 2022**. • A link to access IDP pre-recorded videos was published on the municipal YouTube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 - February 2022	• An Online Sector Engagement was held on **11 January 2022** to determine the sector needs and collectively devise plans to address the needs. • MayCo and management had a strategic session from **13 – 14 January 2022** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). • Departmental sessions were held with all departments to set their 5–year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	• The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on **30 March 2022**, for public comment for 21 days. • A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on **30 March 2022** for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. • The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality were submitted to the Council on **30 March 2022** for consideration and approval to be released for public comments. • The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on **04 – 28 April 2022.** • Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	• Adoption of the final IDP and Budget, Tariffs and Budget-related policies. • Submit the adopted IDP to the Cape Winelands District Municipality, Provincial Government and National Treasury. • Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.13 Second-Year Process Followed

The table below reflects the preparation for the 1st review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

Table 6: Preparation for the second year for the 1st review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2022	• Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	• The IDP public participation period was open from 07 **– 28 September 2022**. • The hybrid public participation meetings were held from **19 – 22 September 2022**. • The online stakeholder engagement was held on **27 September 2022.** • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. • An all-ward councillor session was held on **7 October 2022**, for the reprioritisation of ward priorities for the 2023/24 financial year, taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 - February 2023	• Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. • An Indaba 2 Engagement was attended on **7 February 2023** to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. • Management strategic session on **15 and 16 February 2023** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2023	• MayCo and Council considered the draft 1st Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. • The IDP and Budget public participation period has commenced on **03 April – 25 April 2023.** • A virtual stakeholder engagement was held on **20 April 2023** to provide feedback on major projects / programmes / initiatives. • The closing date for the IDP and Budget submission was **25 April 2023**. • Consultation and refinement of SDF, IDP and Budget documents. • Adoption of final IDP, Budget, Tariffs, and budget-related policies. • Submission of the adopted IDP to the Provincial Government and other role-players.

1.14 First Amendment Process Followed

The table below stipulates the key activities in preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027:

Table 7: Preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2023 - September 2023	• Submit the draft proposed amendments to the IDP to MayCo, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to recommend to the Council. • Submit the proposed draft IDP amendments, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to the Council for approval to obtain public comment (21 days). • The proposed draft IDP amendments were advertised for a period of 21 days to allow for public comment on the municipal website and local newspaper. • The period for public comment on the proposed draft IDP amendments was 21 days. • Submit the proposed draft IDP Amendments to the MEC, Provincial Treasury, National Treasury, and other affected organs of state within 10 working days after the Council approval. • Submit the draft IDP Amendment to the District Municipality for input within 10 working days after the Council approval.
October 2023	• Submit the final amended IDP to the Council for adoption together with the memorandum in terms of Regulation 3. • The adopted IDP Amendment was published on the municipal website. • An electronic and hard copy of the adopted IDP Amendment was submitted to the MEC for local government as well as Provincial Treasury, National Treasury, and District Municipality within 10 days of the adoption or amendment of the plan. • A notice was published in the local newspaper to inform the public of the adoption of the amended IDP (within 14 days of the adoption of the plan) and to place hard copies in libraries and ward offices.

1.15 Third-Year Process Followed

The table below reflects the preparation for the 2nd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2024/25 financial year.

Table 8: Preparation of the third year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2023	▪ Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	▪ The IDP public participation period was open from 04 September to 04 October 2023. ▪ The area–based IDP public participation open days were held from 12 September – 02 October 2023. ▪ The IDP stakeholder engagement was held on 04 October 2023. ▪ An electronic submission form was created on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. ▪ Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. ▪ All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities, taking into account community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 - February 2024	▪ Departmental sessions were held to review the IDP deliverables and targets for the 2nd Review of the 5th Generation IDP 2022 – 2027. ▪ MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	▪ MayCo and Council to consider the draft 2nd Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. ▪ The IDP and Budget public participation period was conducted from **02 April – 23 April 2024**. ▪ A Stakeholder Engagement was held on **16 April 2024**. ▪ The Provincial SIME Engagement took place on **03 May 2024**. ▪ Consultation and refinement of the IDP and Budget documents. ▪ Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2024**. ▪ Submission of the adopted IDP to the provincial government and other role-players.

1.16 Fourth-Year Process Followed

The table below reflects the preparation for the draft 3rd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2025/26 financial year.

Table 9: Preparation of the fourth year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2024	▪ The Executive Mayor and Mayoral Committee recommend that the SDF/IDP/Budget Time Schedule / Process Plan (at least 10 months before the start of the budget year) be approved by the Council. ▪ The SDF / IDP / Budget Time Schedule were adopted by the Council on 23 August 2024.
September 2024 – December 2024	▪ The IDP public participation period was open from **09 - 30 September 2024**. ▪ The area–based IDP public participation open days were held from 10 – 16 September 2024. ▪ The IDP stakeholder engagement was held on **25 September 2024**, attended by various stakeholders and role-players. ▪ On the municipal website, an electronic submission form has been created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, *X*, WhatsApp, and through the Stellenbosch Citizen App. ▪ Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. ▪ On **22 November and 02 December 2024**, all-ward councillor sessions were held to reprioritise the ward priorities for 2022 - 2027, with the community input as baseline information.

Date	Action(s)
January 2025 - February 2025	▪ Departmental sessions were held to review the IDP deliverables and targets for the 3rd review of the 5th Generation IDP 2022 – 2027. ▪ MayCo and Management had a strategic session on 17 January 2025 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March 2025 - May 2025	▪ MayCo and Council approved the draft 3rd review of the 5th Generation IDP 2022 – 2027 on **31 March 2025** to obtain public input and comments. ▪ The IDP and Budget public participation period was open from **07 – 29 April 2025** for public input and comments. ▪ Area - based IDP and Budget public participation open days were held from **08 – 14 April 2025** which offered an opportunity for community members to engage in one–on–one discussions with departmental representatives and submit verbal input. ▪ An IDP and Budget stakeholder engagement was held on **23 April 2025**, attended by councillors, senior management, stakeholders, and role-players in the Stellenbosch municipal area. ▪ Consultation and refinement of the IDP and Budget documents. ▪ Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2025**. ▪ Submit the adopted IDP to the Provincial Government and other role-players.

1.17 Fifth – Year Process Followed

The table below reflects the preparation for the draft 4th review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2026/27 financial year.

Table 10: Preparation of the fifth year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2025	▪ The SDF/IDP/Budget Time Schedule / Process Plan for 2026/27 were approved by the Council on **25 August 2025**, and duly submitted to the relevant role-players as per the MSA.
September 2025 – October 2025	▪ IDP public participation for the drafting of the 4th review of the 5th Generation IDP 2022 – 2027 commenced on **08 September 2025**. ▪ The IDP public participation period was open for the public and stakeholders to submit community needs to be considered by the departments during the project planning phase of the IDP cycle, as well as for the reprioritisation of ward priorities by the ward councillors and ward committees. ▪ The physical area–based IDP public participation open days were held from **08 - 15 September 2025.** ▪ An IDP stakeholder engagement was held on **18 September 2025**, attended by various stakeholders and role-players. ▪ On the municipal website, an electronic submission form was created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, X, and WhatsApp. ▪ Hard copies of the "IDP Submission Form' were also made available at all libraries and ward offices.
November 2025 - December 2025	▪ The consolidated community input and comments of September 2025 were tabled to Council on 26 November 2025 for consideration in preparation for the draft IDP and draft Budget. ▪ The community input and comments captured during the IDP public participation process in September 2025 were sent to the ward councillors on 21 October 2025, before the ward prioritisation sessions to discuss with their ward committees in preparation for the reprioritisation of the 2022 – 2027 ward priorities. ▪ On 13 – 14 November 2025, all-ward councillor sessions were held for the reprioritisation of the 2022 – 2027 ward priorities for the draft 4th review of the 5th Generation IDP 2022 – 2027. ▪ Refinement of the revised ward priorities into specific, measurable, achievable, relevant and time–bound ward priorities. ▪ Internal IDP review sessions with the different departments were facilitated by the Department: IDP, PMS and Public Participation from **01 to 03 December 2025**, considering the revised ward priorities as discussed with the ward councillors in November 2025, all the community input, existing projects / programmes, and sector plans. ▪ These discussions with departments entailed the details of possible key deliverables to determine what resources are needed in terms of budget, timing, identification of different role players and responsible project owners.

Date	Action(s)
January 2026 - February 2026	• The key activity during this period involved review sessions with the different directorates to review the 2022 – 2027 IDP deliverables and implementation progress. • The review sessions were held from **19 – 30 January 2026**.
March 2026 - May 2026	• MayCo and Council considered the draft 4th review of the 5th Generation IDP 2022 – 2027 and approved it on 31 March 2026 to obtain public input and comments. • A notice for public comment was published in the local newspaper and on the municipal website. • The approved draft 4th review of the 5th Generation IDP 2022 – 2027 was submitted to the MEC, Department of Local Government, Western Cape Provincial Treasury, National Treasury, Office of the Provincial Speaker of Parliament, and Cape Winelands District Municipality for their input. • The IDP and Budget public participation period was open from 07 – 28 April 2026. • IDP and Budget open days were held from 08 – 15 April 2026. A total of 8 area–based open days were held. • Consultation and refinement of the IDP and Budget documents. • Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2026**. • Submit the adopted IDP to the Provincial Government and other role-players within 10 days of the adoption of the IDP.

1.18 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.19 Risk Management

Section 62 of the MFMA states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient, and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient, and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery, taking into account changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of the Ukraine-Russia war on global commodities, particularly fuel.

The top **5 strategic** risks identified include:

R **01** Climate change and infrastructure disasters

I **02** Loss of life of activists, leaders and their immediate family members

S **03** Increased risk of land invasions

K **04** Economic downturn due to civil unrest and crime

S **05** Cyber attacks

The municipal risks have been aligned with the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 11: Risk and IDP Alignment

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
1	Climate Change and Infrastructure Disasters	Changing weather patterns, unpredictable rainfall/flash floods, drought and natural disasters, fires, seasonal and other	Green and Sustainable Valley	**10**	**10**	All Directorates
2	Loss of life of activists, leaders and their immediate family members	Loss of life of activists, leaders and their immediate family members	Safe Valley Dignified Living	**10**	**10**	Directorate: Community and Protection Services
3	Increased risk of land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Safe Valley Dignified Living Good Governance and Compliance	**9**	**10**	All Directorates
4	Economic downturn due to civil unrest, crime, and continuous load-shedding	Increase in criminal activities, civil unrest, and reputational risk due to perceived increase in the said activities	Dignified Living Safe Valley	**9**	**8**	Directorate: Community and Protection Services
5	Cyber attacks	Cyber-attacks and cyber safety / security have become essential in municipalities. Investigate security gaps. Users opening unsafe / infected attachments	Good Governance and Compliance	**8**	**8**	Directorate: Infrastructure Services
Operational Risks						
1	Timeous Capital Spending	Steady increase in budget allocation, growing population and demand for services, demand management, unforeseen storms and weather events, suppliers and contractors going into financial distress	Good Governance and Compliance	**10**	**8**	Directorate: Financial Services
2	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	**10**	**8**	Directorate: Community and Protection Services
3	Lack of integrated Information and Communication Technology	Lack of integrated Information and Communication Technology	Dignified Living	**7**	**7**	Directorate: Corporate Services
4	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery needs to be provided by all departments	Good Governance and Compliance	**8**	**4**	Directorate: Corporate Services
5	Material misstatements in the AFS that constitute	Material misstatements in the AFS that constitute noncompliance with Section 122 of the MFMA. System errors,	Good Governance and Compliance	**6**	**4**	Office of the Municipal Manager

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
	noncompliance with Section 122 of the MFMA. System errors, transactions, and events not recognised as they occur and accordingly nor recorded in the financial period it	transactions, and events are not recognised as they occur and accordingly are not recorded in the financial period they occurred.				

1.20 Anti–Corruption and Anti–Fraud

SECTION 83(C) OF THE MSA

Refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption.

SECTION 115(1) OF THE MFMA

States that the accounting officer must take reasonable steps to ensure that mechanisms and separation of duties in a supply chain management system are in place to minimise the likelihood of corruption and fraud.

SECTION 62(1) OF THE MFMA

States the following: "The accounting officer of a municipality is responsible for managing the financial administration of the municipality and must, for this purpose, take all reasonable steps to ensure: –

(a) That the resources of the municipality are used effectively, efficiently, and economically;
(b) That the full and proper records of the financial affairs are kept in accordance with any prescribed norms and standards;
(c) That the municipality has and maintains effective, efficient, and transparent systems—
(d) Of financial and risk management and internal control;
(e) Of internal audit operating in accordance with any prescribed norms and standards;
(f) That unauthorised, irregular of fruitless and wasteful expenditure and other losses are prevented; and
(g) That disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial or an offence in terms of Chapter 15."

1.21 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to the table below for members of the Audit Committee), appointed in terms of Section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

(a) advise the municipal council, the political office-bearers, the accounting officer, and the management staff of the municipality on matters relating to: –

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability, and accuracy of financial reporting information;

- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013), and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

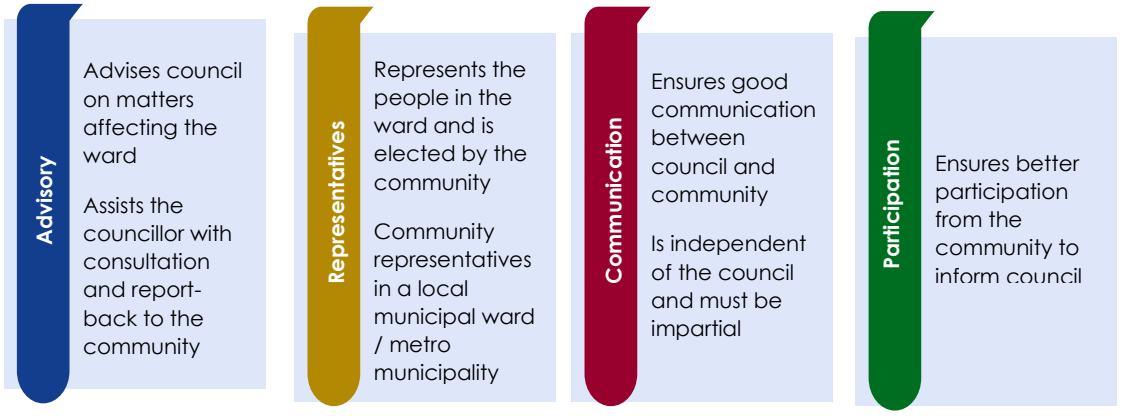

Table 12: Members of the Audit Committee

Name of representative	Capacity
Linda C Nene (Mr)	Chairperson
Len Mortimer (Mr)	Member
Reyhana Gani (Ms)	Member
Mervyn Burton (Mr)	Member

1.22 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 5: Main duties of the Ward Committee

1.23 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective intergovernmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of all spheres of government in the setting of priorities, resource allocation, and development planning.

The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 13: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement: - platforms to share knowledge; - disaster risk reduction initiatives;

Name of Partner	Purpose of MOU / MOA
	▪ community safety programmes; and ▪ campaigns to promote safe, resilient, sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation, and education.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues, as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television is in the interest of the security of the town and the campus, with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay-at-the-night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and the University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss land transport-related matters that affect transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.

Name of Partner	Purpose of MOU / MOA
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learner's license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues, as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternative electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: relief aid (clothing, food); placement of students to assist during incidents/disasters; and awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads, and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:
State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town, but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch, and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-added chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements. Franschhoek, known as the "French Corner", is celebrated for its exceptional culinary scene, offering a delectable fusion of French and South African flavours. It is a favourite among local and international tourists. Due to recent developments, Klapmuts is considered a regional growth node thanks to its regional connectivity.

Stellenbosch is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), and Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

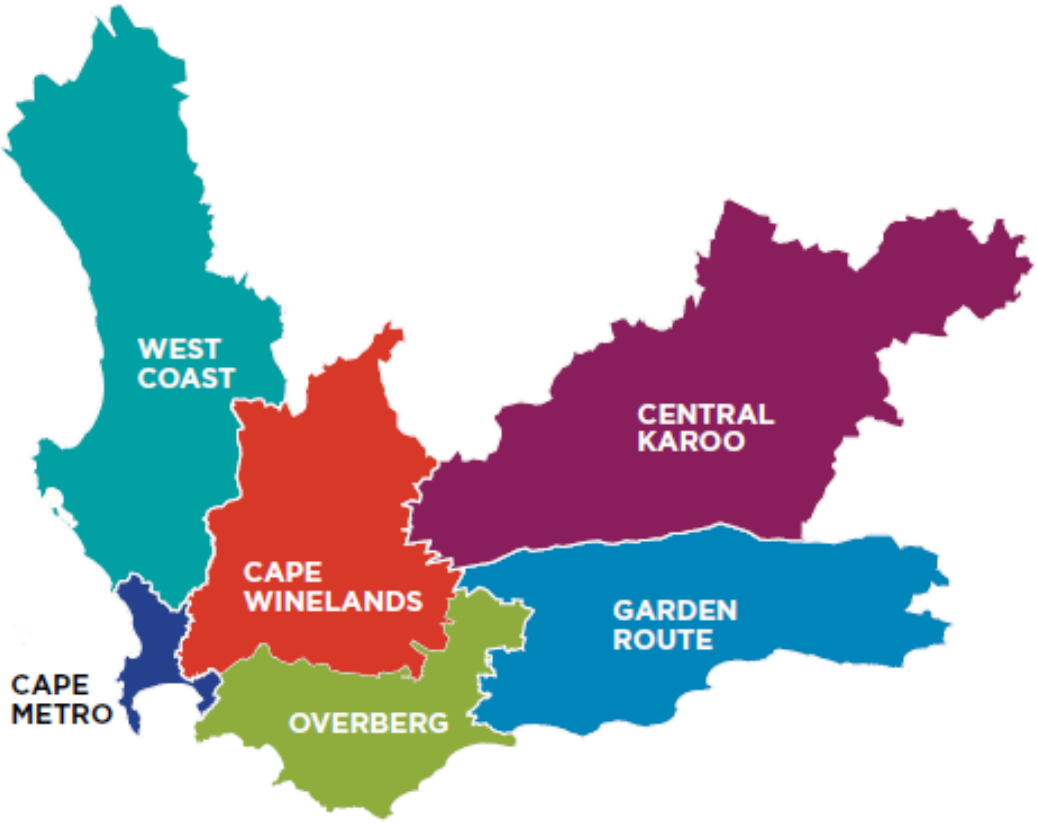

Table 14: Municipal ward demarcation

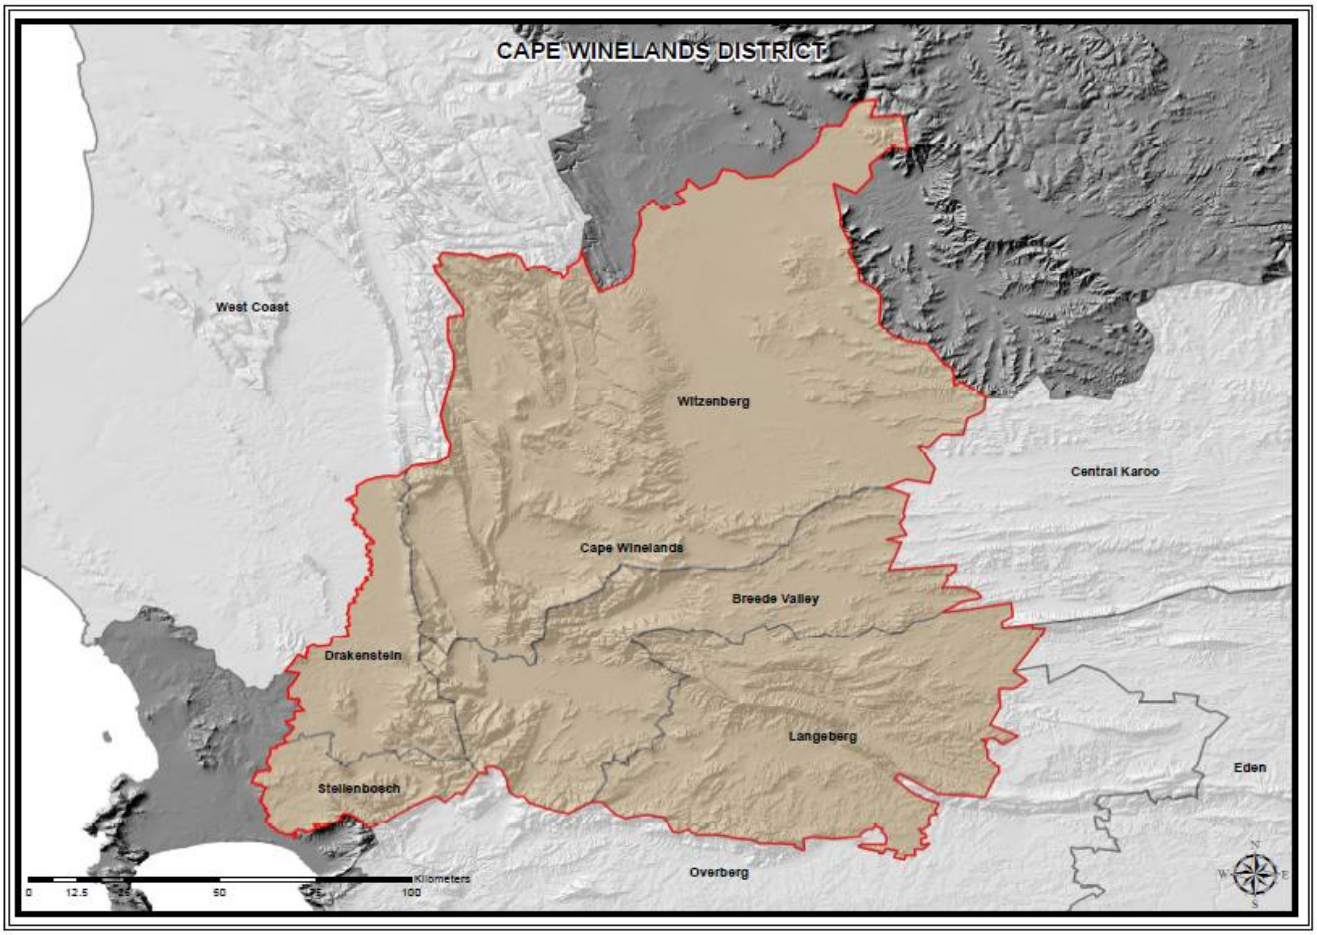
Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	On the corner of Moffat Street to the end of Lelie Street, the Corner of Moffat Street to Rustenburg Road, Desch Street to Rustenburg Road, Moffat Street, Hahn Street, Weber Street, Tindell Street, Juffernbruch Street, Kahler Street, Luckhoff Street, Erasmussmith Street, Baker Street, Desch Street, Lelie Street, Protea Street to Erasmusmith Street, Botmanskop Way, Dahlia Street, Speler Street, Rustenburg road of the corner of Helshoogte Road to Lelie Street; Glenelly Estate in Lelie Street; Helderfontein in Helshoogte Road; Nietvoorbij on R44; Blue Jay / Timberlea Trust Farm on R44; Kloofbosch on R44; Babin Farm on R44; Morgenhoff Wine Estate on R44; Remhoogte on R44; Groenhof on R44; Muratie Wine Estate on R44; Delheim Wine Estate on R44; Kanonkop on R44; Uitkyk on R44; Warrick on R44; Lievland on R44
7	Mostertsdrift, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan, and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street, onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A George Blake Street, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone A Masithandane Street, Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang TRA 1, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4th and 5th Avenue, 10th, 12th and 14th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)

Ward	Areas
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultrey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

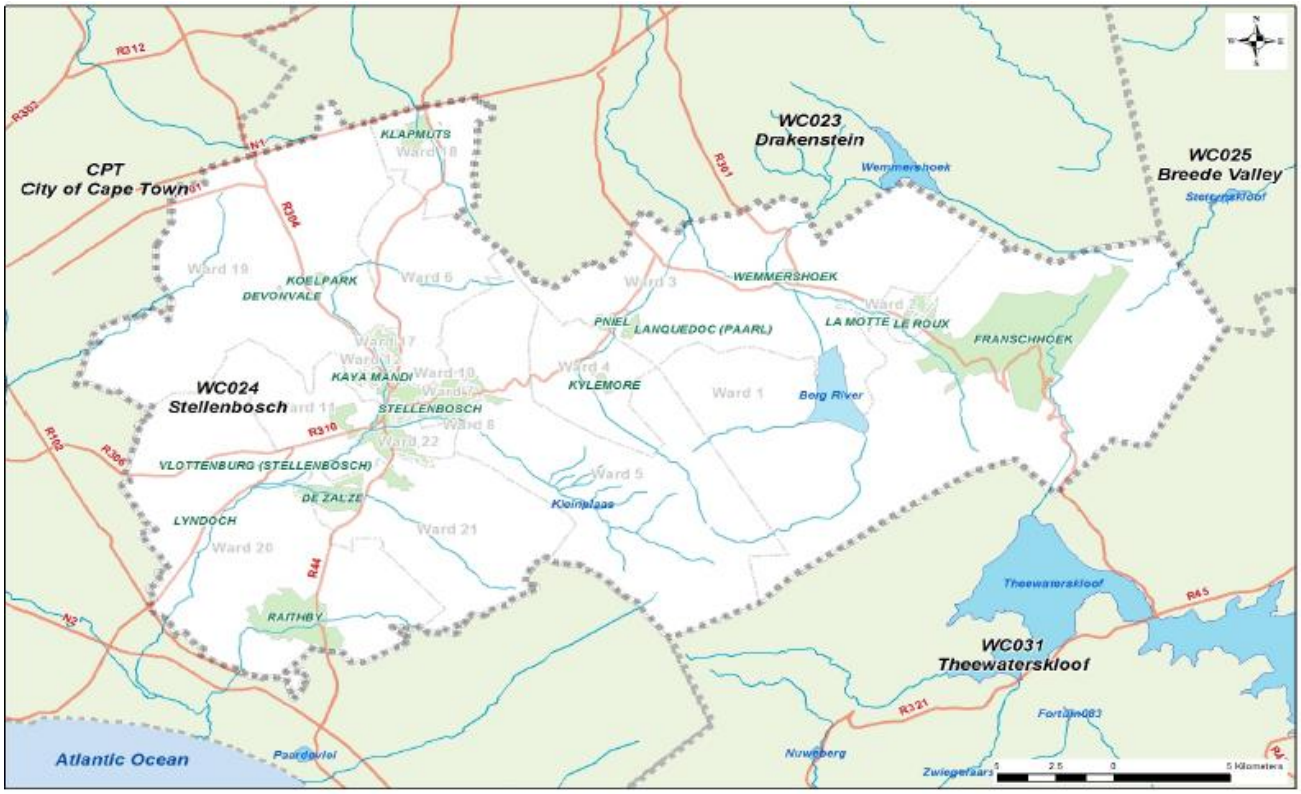
Below is a map of the Cape Winelands District concerning the provincial district boundaries:



Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km2. The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:



Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klapmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlottenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlottenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 15: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2025		Actual households, 2025	
Population	210 962	Households	58 912
			(Source: MYPE)

Education, 2025		Poverty, 2025	
Learner Retention Rate	7.6%	Gini-Coefficient	0.59
Learner-Teacher Ratio	26.7	Poverty Head Count Ratio (UBPL)	71.4%

Health, 2025			
Primary Health Care Facilities	Immunisation Rate	Maternal Mortality Ratio (per 100 000 live births)	Teenage Pregnancies – Delivery rate to women U/19
8 (excl. mobile / satellite)	58.4%	58.0%	12.7%

Safety and Security				The annual number of reported cases in 2024/25
Residential Burglaries	DUI	Drug-related Crimes	Murder	Sexual Offences
996	251	1464	79	254

Access to Basic Service Delivery				Percentage of households with access to basic services, 2024/25
Water 98.5%	Refuse removal 87.4%	Electricity 97.1%	Sanitation 96.7%	Formal Housing 72.4%

Labour, 2024	Socio-economic Risks	
Unemployment Rate (narrow definition) 13.8%	Risk 1	Job Losses
	Risk 2	Low Learner retention
	Risk 3	Low skills base (Labour)

Largest 3 sectors			Contribution to GDP, 2024
Finance, insurance, real estate and business services	Wholesale and retail trade, catering and accommodation	Manufacturing	
29.2%	15.8%	15.7%

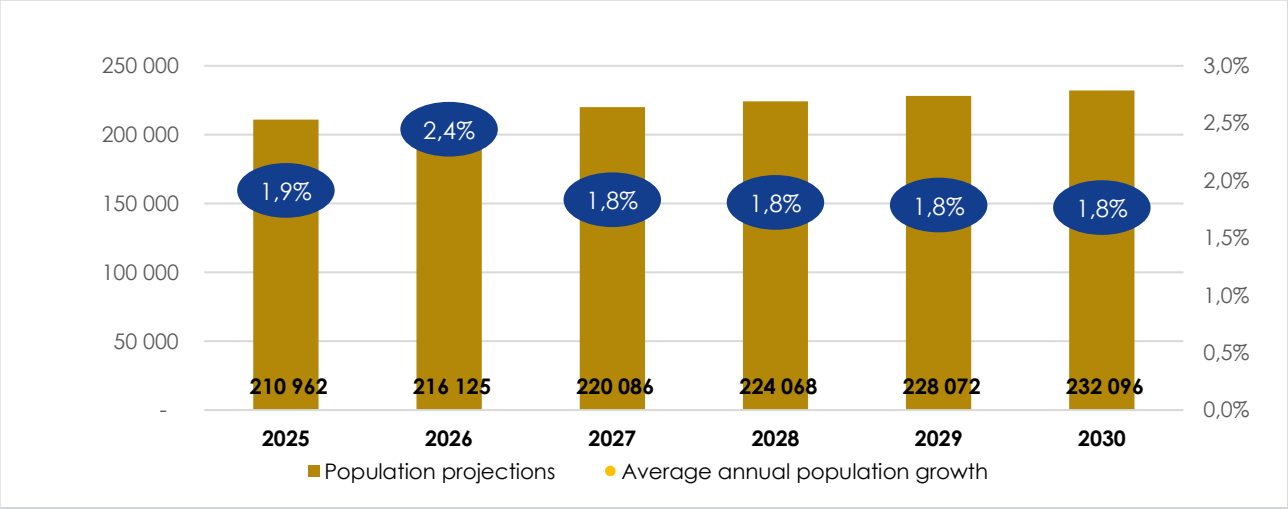
2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government 2025 – 2026 Municipal Economic Review and Outlook (MERO). The report provides a snapshot of the safety and well-being of our communities, and economic growth. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The population growth and socioeconomic data are essential for effective municipal planning and the equitable distribution of public services. Population size, household growth, age structure and migration patterns all have a direct impact on the demand for infrastructure, housing, education, healthcare and social services. In rapidly expanding economic hubs such as the Stellenbosch municipal area, monitoring these trends enables policymakers to better anticipate future service demands, allocate resources efficiently, and design targeted interventions that enhance social well-being while also strengthening economic resilience.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government MERO 2025 for the Stellenbosch municipal area.



2.4.1 Population Growth

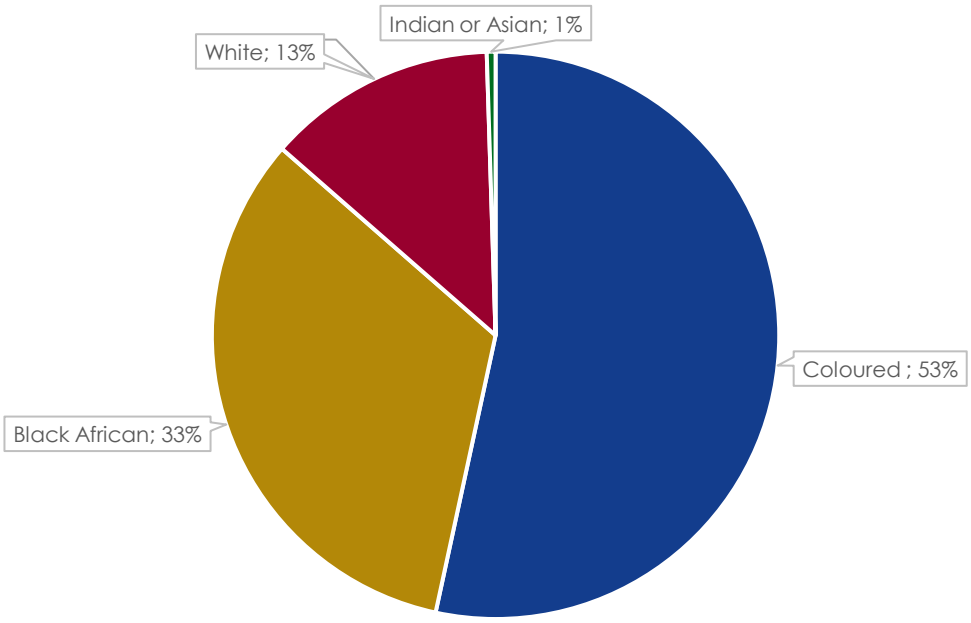
In 2025, the Stellenbosch municipal area was home to **210 962** individuals, reflecting an annual population growth rate of **1.9 per cent** during 2025. This significant increase illustrates Stellenbosch's appeal, particularly due to migration with the educational institutions and vibrant community atmosphere. This growth necessitates strategic planning for infrastructure and local services to support the needs of a larger population.

The household growth reflects the demographic expansion within Stellenbosch. In terms of households, Stellenbosch exhibits an annual growth from 57 520 in 2024 to **58 912 in 2025,** with an annual growth rate of approximately **3.6 persons**. This increase highlights a growing demand for municipal services and housing that aligns with the growing population. Addressing this growth in households will require proactive planning and resource allocation for maintaining service quality and community engagement.

The figure below depicts the estimated population growth from 2025 - 2030:

Table 16: Estimated Population Growth, 2025 – 2030

Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit (PPU), 2025



2.4.2 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. The population comprises Black African individuals, accounting for 33.1 per cent of the total, followed closely by the Coloured community, constituting 53.5 per cent. White residents make up 13.1 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 1 per cent.

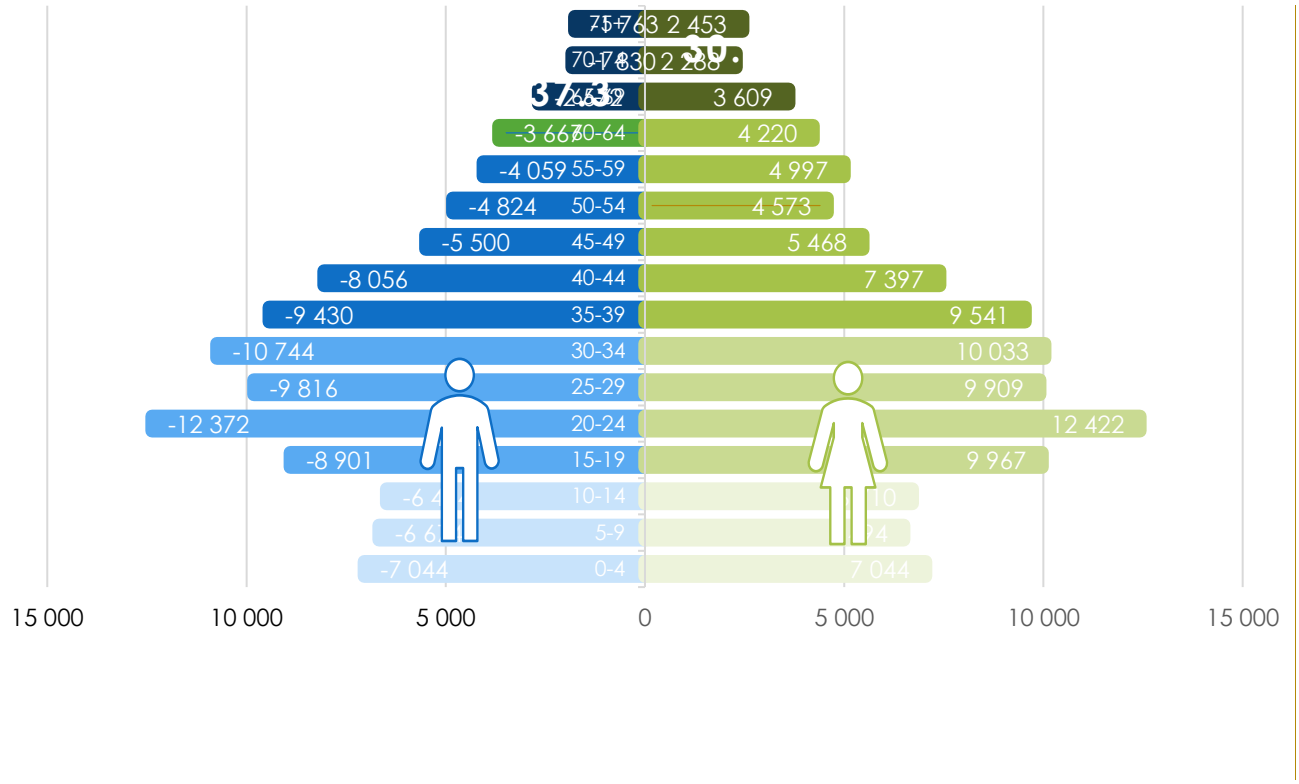
This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The figure below indicates the ratio split within the Stellenbosch Municipality:

Figure 6: Racial Split for the WCO24

Source: Western Cape Local Government MERO 2025

2.4.3 Gender Ratio



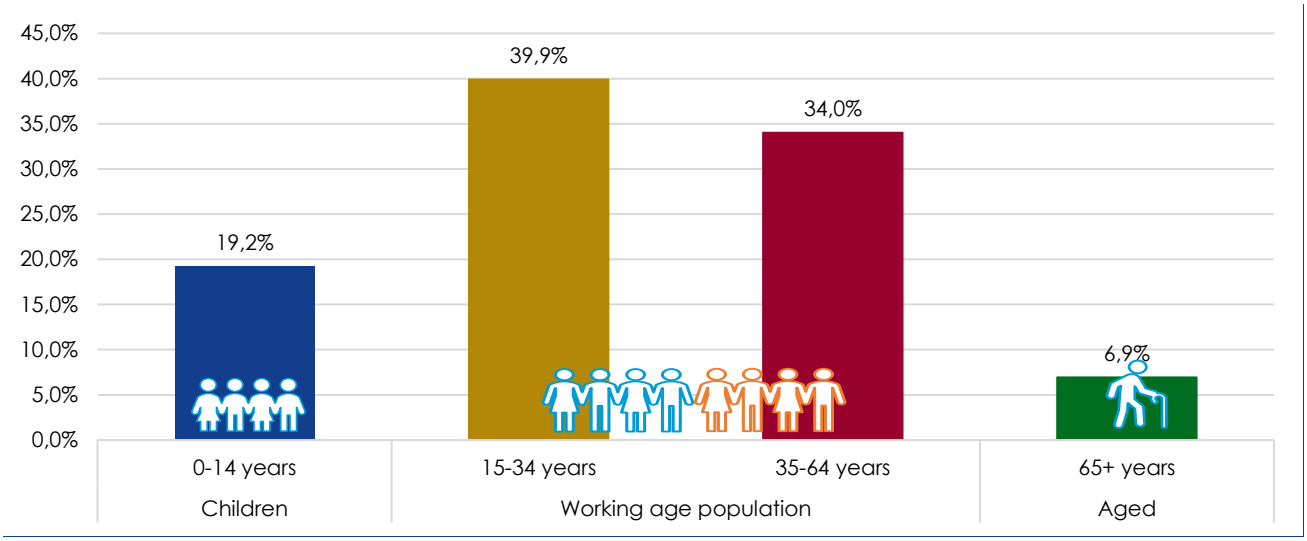
The 2025 population pyramid of the Stellenbosch municipal area indicates a noticeable gender imbalance within the 20 - 24 and 25 - 29 age cohorts, with 12 372 males compared to 12 422 females in the 20-24 age group. This pattern reflects the underlying demographic and socio – economic dynamics of the area. The gender imbalances could be a nexus of labour migration patterns, the substantial student population (which often influences age–specific demographic distribution) and potential out–migration of males seeking employment opportunities elsewhere. These factors contribute toward shaping the structure of the local labour force and demographic profile of the Stellenbosch municipal area.

This demographic imbalance may contribute to a growing dependency burden. The relatively large base of children (0 to 14 years) and the rapidly expanding elderly population (especially females aged 60 and above) will place increasing pressure on a potentially constrained work – age population to sustain public expenditure on social services, healthcare and pensions. In addition, it will in the future strain public resources and shift housing demands and settlement patterns. To sustain economic

growth and social stability, policy responses will need to focus on strategies that retain young male professionals or facilitate adaptation to a workforce with a higher female participation rate.

The table below depicts the gender ratio within the Stellenbosch municipal area.

Figure 7: Ratio of % females and males



Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit, 2025

2.4.4 Age Cohorts

The age distribution of the Stellenbosch population has significant socioeconomic implications, particularly for future housing and service delivery. With a substantial **39.9 per cent** of the population **aged 15 to 34**, the Municipality is under increasing demand to facilitate job creation and supply affordable housing for young working-age persons. This demographic projection, combined with a sizeable child population (19.2 per cent), indicates continued high demand for basic services and infrastructure, placing a strain on municipal resources. The relatively small population of elderly residents (6.9 per cent) suggests a lower immediate burden on care systems for the aged. In addition, the overall youth-heavy structure points to sustained, long-term demand for indigent support as these young adults form households in a challenging economic environment.

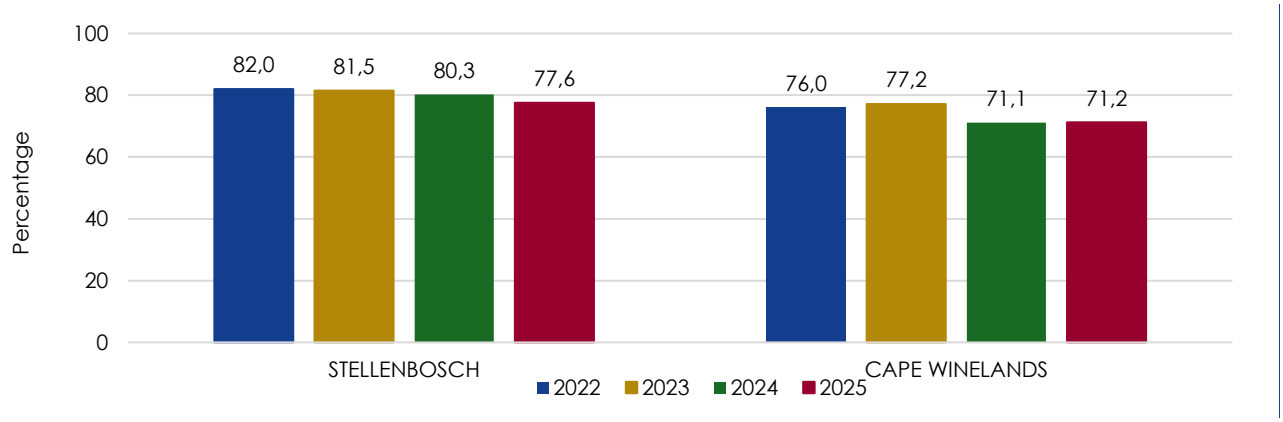
Figure 8: Population by Age Group, 2025

Source: Western Cape Local Government MERO 2025 and Department of Social Development, Western Cape Provincial Population Unit, 2025

2.5 Education

The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Empowering the population will have a significant impact on the local economy's development and human resource capacity. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty. Learners in the Stellenbosch municipal area have access to education through the availability of 50 schools. Three-quarters of these education facilities **(74.0 per cent)** operate as no – fee schools.

The growing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in education capacity, as reflected in the learner – teacher ratio below. The ratio of the Stellenbosch municipal area has remained unchanged, rising marginally from **26.2 in 2024** to a projected **26.7 in 2025.**



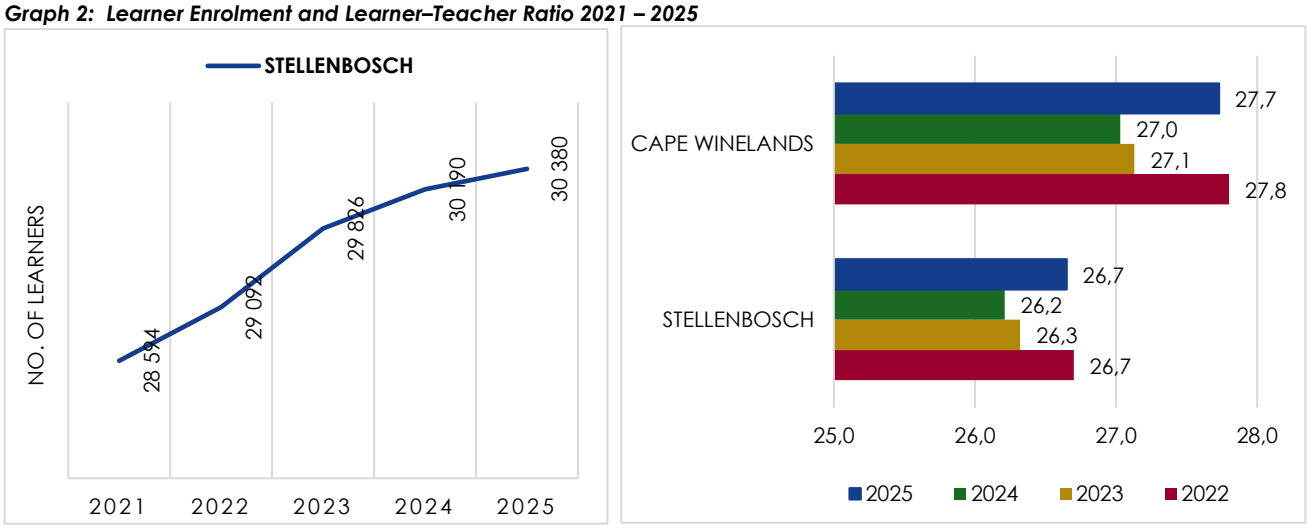
The combination of increasing learner enrolment and relatively unchanged learner–teacher ratio in Stellenbosch implies that the education system is struggling to keep pace with the population growth. Consequently, expanding larger class sizes and strained public resources threaten educational quality. These risks exacerbate long-term inequality, undermining the very human capital development needed for sustainable economic inclusion.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner retention in Stellenbosch experienced a notable decline from **82.0 per cent in 2022** to a concerning **77.6 per cent in 2025**. It is evident that the educational decline depicts a deteriorating socio-economic challenge within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities. Stellenbosch is a hub for both education and agriculture, luring families to the area.

The graphs below depict the learner retention from 2022 – 2025.

Graph 1: Learner Enrolment 2022- 2025

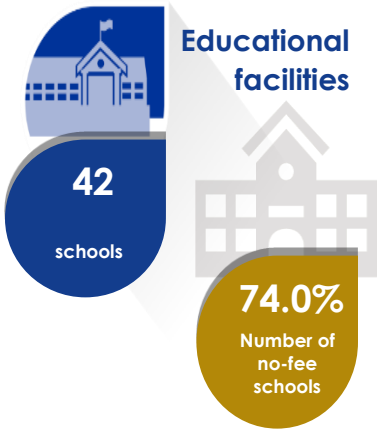


Source: Western Cape Local Government MERO 2025

Learner enrolment in the Stellenbosch municipal area has steadily increased, rising from 28 594 in 2021 to a projected 30 380 in 2025. This trend reflects a pronounced in-migration dynamics to Stellenbosch, likely motivated by the area's superior economic opportunities and its reputation for high-quality educational institutions.

The increasing demand for schooling in the Stellenbosch municipal area has been met with a concerning stagnation in educational capacity, as reflected in the learner – teacher ratio. This ratio has remained largely static, increasing slightly from 26.2 in 2024 to a projected 26.7 in 2025. This highlights the persistent challenges in scaling educational resources to match population growth.

Graph 2: Learner Enrolment and Learner–Teacher Ratio 2021 – 2025



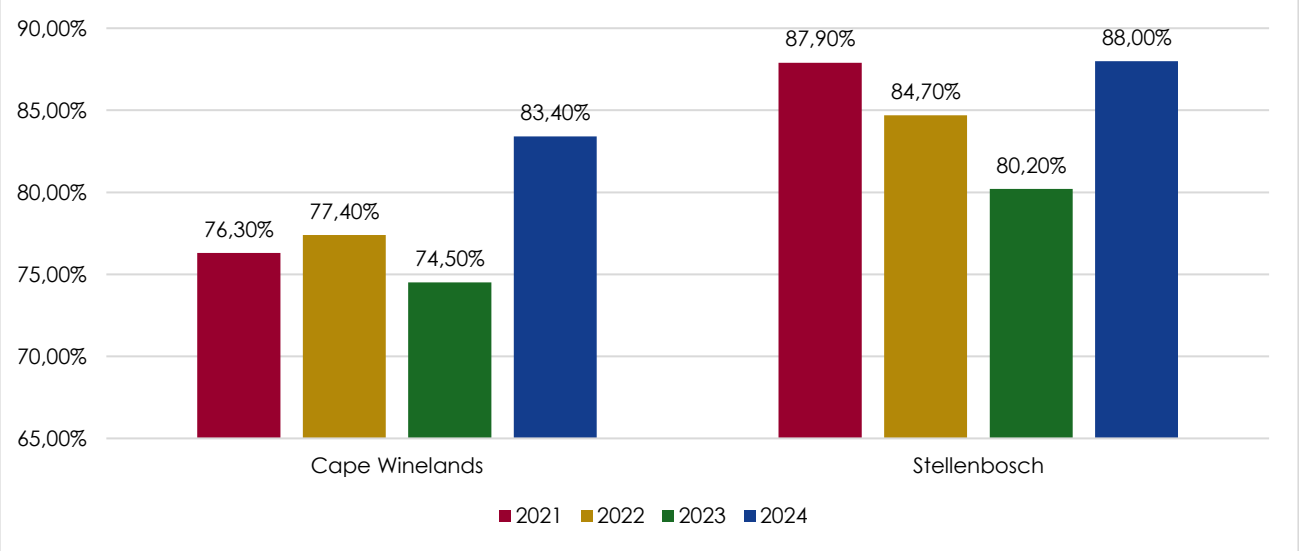
Source: Western Cape Local Government MERO 2025

2.5.2 Number of schools and no-fee schools

Figure 9: Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area was recorded at 50 in 2025.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 70 per cent in 2025, whereby 71.4 per cent are equipped with libraries.



Source: Western Cape Local Government MERO 2025

2.5.3 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. The matric pass rate of the Stellenbosch municipal area has shown a strong recovery, rising to 88.0 per cent in 2024 after a concerning three-year decline to a low of 80.2 per cent. This high pass rate indicates that a significant proportion of learners in Stellenbosch are completing their schooling and performing well in the matric exams.

The graph below depicts the Matric pass rates from 2021 to 2024.

Graph 3: Education outcomes (matric pass rate) 2021 – 2024

Source: Western Cape Local Government MERO 2025

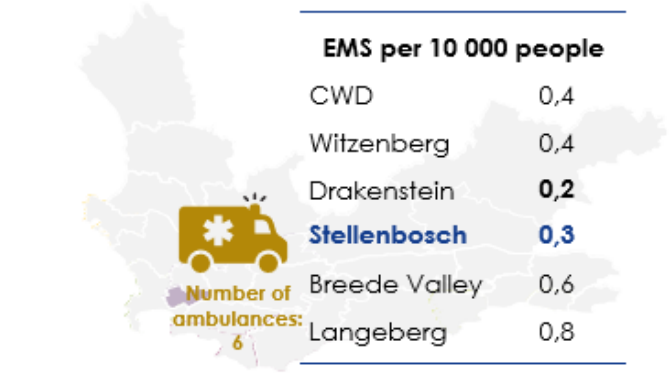
2.6 Health

2.6.1 Health Facilities

According to the MERO 2025, the Stellenbosch municipal area has 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites, and 14 TB clinics.

The table depicts the total healthcare facilities.

Table 17: Health facilities



Source: Western Cape Local Government MERO 2025

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 10: Emergency Medical Services

2.6.3 Tuberculosis and HIV/ AIDS

The number of TB patients in the Cape Winelands District (CWD) plateaued at a persistently high rate, increasing from **7 990 in 2022/23** to **8 038 in 2023/24**. The stagnation remains at levels considerably higher than those recorded before 2022, suggesting that the population continue to face heightened vulnerability due to overcrowded living conditions, inadequate nutrition, and persistent barriers to accessing healthcare services.

In contrast to the CWD statistics, Stellenbosch has demonstrated a more effective public health response. The TB patient count of the Stellenbosch municipal area remained stable, as indicated in the table below, with a slight improvement compared to the low record statistics in 2021/22.

The divergence suggests that targeted localised interventions in Stellenbosch may be exerting a mitigating effect.

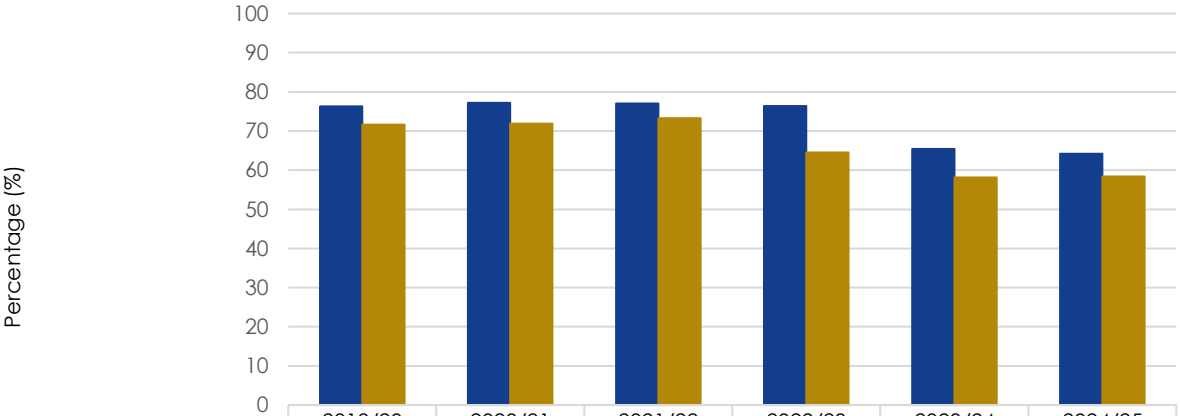
Table 18: Total Registered TB Patients, 2019/20 – 2023/24

Municipality	Number of TB patients registered on Treatment				
	2019/20	2020/21	2021/22	2022/23	2023/24
Cape Winelands	7 000	7 285	7 235	7 990	8 038
Stellenbosch	1 175	1 176	1 062	1 230	1 229

Source: Western Cape, MERO 2025

The District – wide number of patients receiving antiretroviral therapy (ART) has shown a trend of stabilisation coupled with continued, though gradually slowing, growth, reaching 38 361 in 2024/25. This reflects a sustained and effective public health effort to ensure ongoing access to treatment. However, the Stellenbosch municipal area witnessed a significant and unprecedented 12.4 per cent year-on-year decline from 2023/24 to 2024/25, with the patient total decreasing sharply from 7 327 to 6 422. This decrease might suggest a potential crisis in healthcare access or retention, potentially driven by socioeconomic pressures such as patient migration due to rising living costs and service delivery disruption

Table 19: Number of registered patients on ART, 2019/20 – 2024-25



Municipality	Total registered patients receiving ART					
	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Cape Winelands District	**32 366**	**32 949**	**32 719**	**36 681**	**38 247**	**38 361**
Stellenbosch	6 960	6 914	6 915	7 066	7 327	6 422

Source: Western Cape Local Government MERO 2025

2.6.4 Child Health

Following relatively stable rates ranging from approximately 71.6 per cent to 77.0 per cent between 2019/20 and 2021/22, both jurisdictions experienced a dramatic and sustained decline at the beginning of 2022/23. The immunisation rate decreased in Stellenbosch to 58.1 per cent in 2023/24, with a slight recovery to 58.4 per cent in 2024/25. This sharp decline signals pressure on the primary healthcare system and is potentially driven by post – pandemic resource limitations, growing vaccine hesitancy or logistical challenges in reaching vulnerable communities.

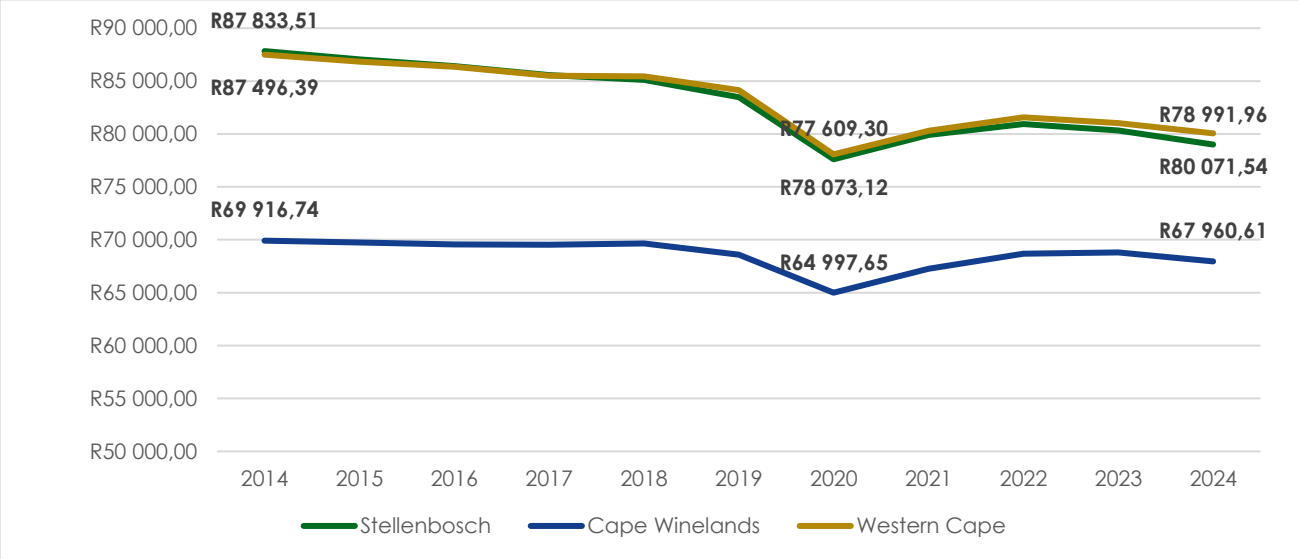
Graph 4: Child Health

	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Cape Winelands District	76,3	77,21	77,0	76,4	65,5	64,2
Stellenbosch	71,6	71,85	73,3	64,5	58,1	58,4

Source: Western Cape Local Government MERO 2025

Based on the malnutrition data for the CWD and Stellenbosch Municipality from 2019/20 to 2024/25, both CWD and Stellenbosch show a significant overall improvement from their 2019/20 rates. For two consecutive reporting periods, the rate in Stellenbosch has remained constant at 1.3 per cent.

Graph 5: Malnutrition, 2019/20 – 2024/25

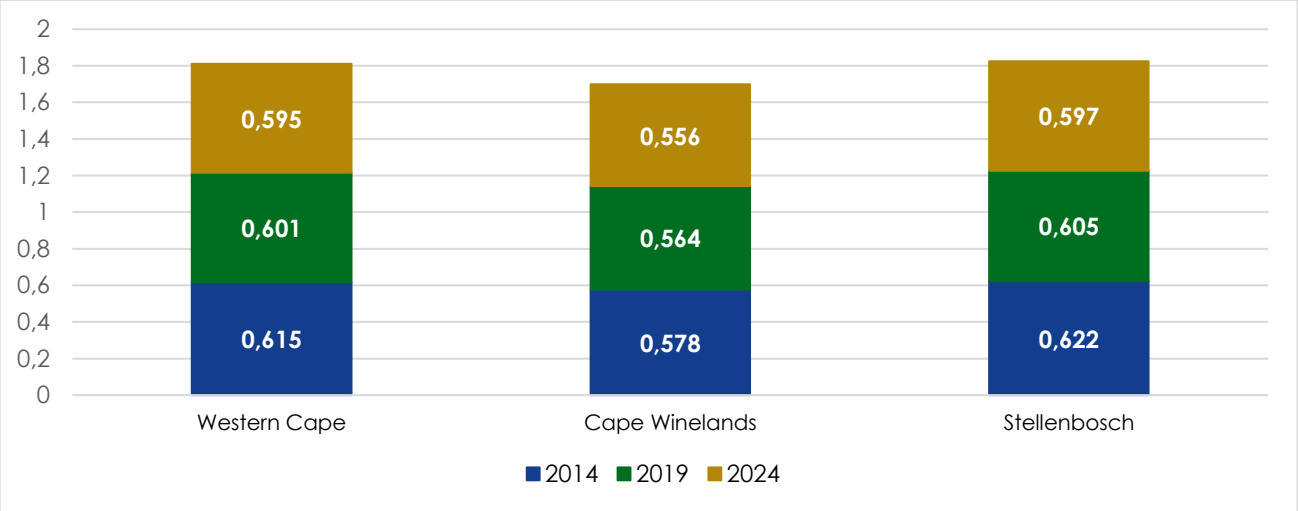


2.7 Poverty

2.7.1 GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the MERO 2025, Stellenbosch's GDP per capita consistently exceeds the Cape Winelands region and Provincial averages, indicating its economic growth. In 2020, per capita GDPR in Stellenbosch contracted sharply (declining to R77 609), then peaked in 2022 (R80 943). It has declined for two consecutive years to R78 992 in 2024. This indicates that Stellenbosch's high – value economy, underpinned by viticulture, tourism and academia, is confronting structural headwinds, including inflationary pressures or slower export growth, which are limiting gains in per capita economic wellbeing.

Graph 6: GDP Per Capita



Source: Western Cape Local Government MERO 2025

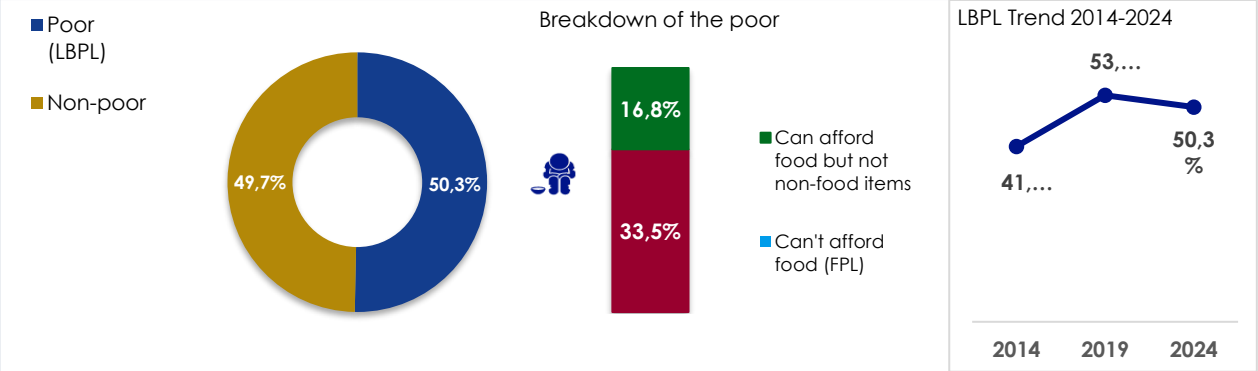
2.7.2 Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. The Gini coefficient of the Stellenbosch municipal area decreased from 0.605 in 2019 to 0.597 in 2024. However, the improvement was negligible, and the figure remains close to 0.600 – a ratio indicative of severe social strain. The Stellenbosch coefficient exceeds the average for the Western Cape and far surpasses that of the CWD.

Graph 7: Income Inequality

Source: Western Cape Local Government MERO 2025



2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2024, 50.3 per cent of Stellenbosch's population fell below the lower – bound poverty line (LBPL). Of this population, 33.5 per cent fell below the Food Poverty Line (FPL), indicating an inability to afford basic nutritional requirements, while 16.8 per cent were able to meet food needs but remained unable to cover essential non – food needs. Although an improvement has been shown from 2019 of 53.0 per cent, poverty levels remain substantially higher than those recorded in 2014 (41.0 per cent).

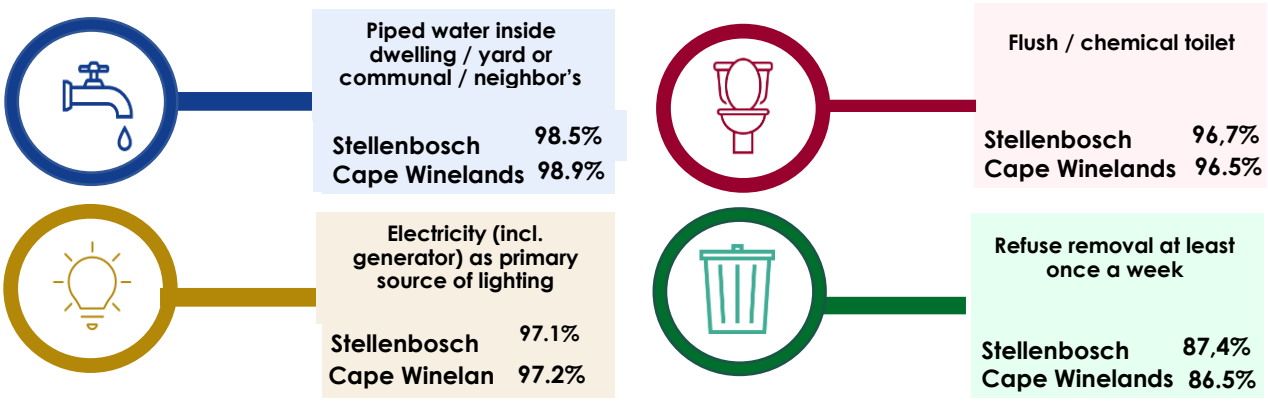
Graph 8: Poverty Headcount Rate, 2014 – 2024

Source: Western Cape Local Government MERO 2025

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.

This section reflects on the latest available information from the MERO 2025 and Quantec Research for 2025. The latest official statistics were collected by Statistics South Africa in the 2022 Census, but for the purpose of these statistics, Quantec's modelled estimates were utilised by the Western Cape Provincial Government to compile the MERO 2025, which offers more recent and regularly updated figures. The information on indigent households was obtained from the Western Cape Department of Local Government.



2.8.1 Housing and Household Services

In 2024, in the Stellenbosch municipal area, which comprises 57 520 households, 72.4 per cent had access to formal housing, lower than the Cape Winelands District average of 73.7 per cent. The remaining households were spread across other housing types: 10.0 per cent lived in informal dwellings (i.e. informal dwellings or shacks not located in a backyard), 0.8 per cent occupied traditional dwellings, and 0.2 per cent resided in other or unspecified housing types.

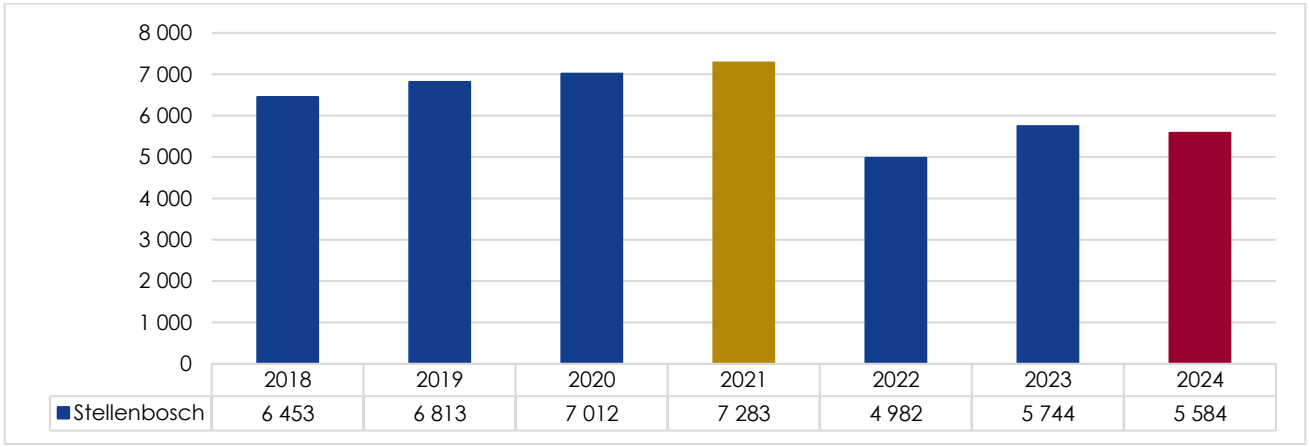
It should be noted that the proportion of households in Stellenbosch residing in informal dwellings was substantially higher than the district average (6.8 per cent). This category, which includes structures in densely populated informal settlements, reflects persistent housing shortages, ongoing urban in-migration pressure, and income inequality.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (98.5 per cent), flush or chemical toilet access (96.7 per cent), electricity access (including generators) for lighting (97.1 per cent), and the removal of refuse at least weekly by the local authority at 87.4 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 11: Service delivery access levels (HH)

Source: Western Cape Local Government MERO 2025

2.8.2 Free Basic Services



The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R7 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy, 2025.

Stellenbosch had a decline in the number of households that were registered for indigent support from 2021 to 2022. In 2021, 7 283 households were recorded, followed by a 32.0 per cent drop to 4 982 in 2022. The lowest recorded number of indigent households was in 2024/25 at 5 584, which is well below pre – pandemic (COVID -19) counts.

The table below indicates the number of households receiving free basic services.

Graph 9: Indigent Households, 2018 - 2024

Source: Western Cape Local Government MERO 2025

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2024. Target local initiatives have successfully lifted a major portion of households out of poverty, as evidenced by the divergence from 2022 to 2024. Such interventions include municipal indigent support programmes and expanded access to basic services.

2.9 Safety and Security

All the data below are sourced from the Local Government MERO 2025 for the Stellenbosch Municipal area.

The 2024 crime statistics indicate that the Stellenbosch municipal area is facing a deeply dualistic socio-economic crisis, in which the crime profile is both a cause and a consequence of deep – seated structural inequalities.

The statistics in the table below reflect that Stellenbosch's rate of crime per 100 000 population far surpasses CWD averages in almost every category of crime. Significant disparities are seen in the incidence of driving under the influence (DUI) and the prevalence of commercial crime. The 61.0 per cent rate of DUI recorded in Stellenbosch in 2024 signals a public safety risk and deeper substance abuse issues. The persistence of these trends in 2024 indicates that current approaches to curbing DUI are merely containing, not resolving, the underlying matters.

Table 20: Number of cases per crime category, crime per 100 000 people, 2022 – 2024

Crime Category	Actual Numbers			Trend	Crime per 100 000 Population	
	2022	2023	2024		Stellenbosch	Cape Winelands District
Murder	90	80	79	↔	38	43
Sexual Offences (also see SDS)	248	209	254	↑	123	103
Common assault	1 041	1 119	1 116	↔	539	634
Malicious damage to property	818	839	806	↓	389	416

Source: Western Cape Local Government MERO 2025

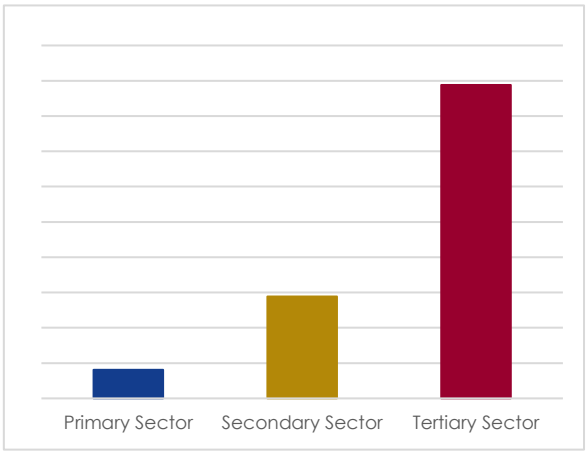
2.10 Economy and Labour Market Performance

2.10.1 Sectoral Overview

In 2024, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at the regional level (GDPR) of R25.2 billion, equivalent to 24.0 per cent of the CWDM and 2.7 per cent of the Western Cape economy. Economic activity in 2024 was broadly stagnant, with GDPR growth of only 0.1 per cent and total employment declining by 1.3 per cent to 77 504 jobs. Labour market indicators weakened correspondingly: the unemployment rate rose to 13.8 per cent in 2024, while the labour-force participation rate fell to 66.2 per cent and the labour-absorption rate to 57.0 per cent.

Employment is predominantly focused in Stellenbosch town, which accounts for the majority of formal jobs dominated by higher education, financial and business services, retail activities associated with Stellenbosch University, commercial offices, and tourism. The Franschhoek town is a secondary employment node, with its main sectors in hospitality, accommodation, and restaurants, while Lanquedoc is defined by agri – processing and support activities for crop production. Elsenburg, by

contrast, drives public sector and agricultural research employment through Provincial and academic institutions. This geographic distribution shows a dual economy, one being an urban, service-driven core centred in Stellenbosch town, and a productive agricultural periphery extending through the valley settlements and wine estates.



The municipality's economy thrives on a dominant tertiary sector, led by finance, trade and personal services. The finance and business sector provided the only positive growth momentum in 2024, contributing 0.8 percentage points to the overall GDPR.

Graph 10: Sectoral contribution to GDPR 2024

Primary Sector	
Sector	**2024**
Agriculture	R1 584.5m
Mining	R35.2m
Total	**R1 619.7m**

Secondary Sector	
Sector	**2024**

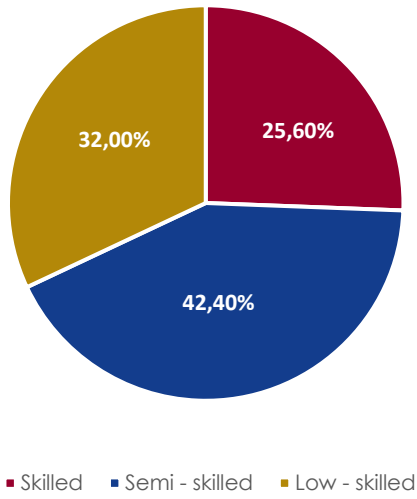
Personal Services	R2 866.6m
Total	**R17 760.2m**



Source: Western Cape Local Government MERO 2025

2.10.2 Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 25.6 per cent classified as skilled workers and 42.4 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 23.1 per cent of the workforce in 2024. However, a notable challenge exists for low-skilled workers, constituting 32.0 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

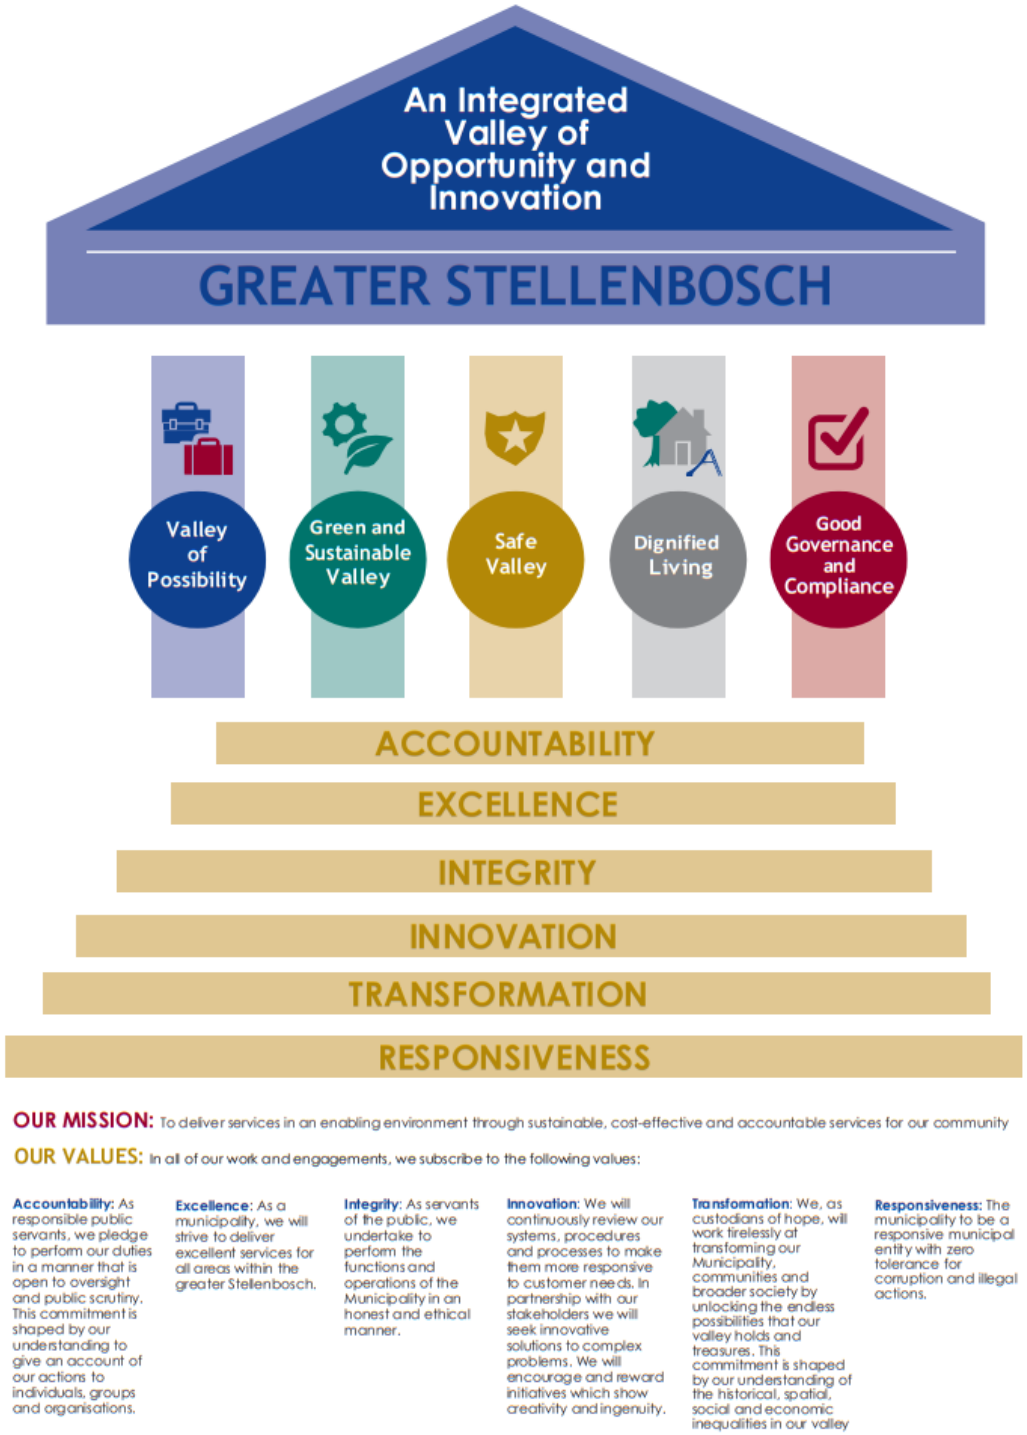
Graph 11: Skills Level Contribution, 2024

	2024	Change from 2023
Skilled	25,60%	-0,20%
Semi - skilled	42,40%	-0,60%
Low - skilled	32,00%	-0,40%

Source: Western Cape Local Government MERO 2025

2.10.3 Job Gains and Losses

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for the affected demographic areas.



Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

An analysis of the formal sector indicates that, although there was a net gain of 3 293 formal jobs, this was overshadowed by losses elsewhere. The most notable increases in informal employment occurred in management consultancy (1 693 jobs) and short-term accommodation (358 jobs). However, these gains were countered by significant job losses in sectors such as other telecommunications activities (617 jobs), private security activities (322 jobs), and notably the manufacture of wines (221 jobs), the latter reflecting the broader downturn experienced in the agriculture sector.

Chapter 3:
Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 12: Municipal Vision and Strategy

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **"An Integrated Valley of Opportunity and Innovation"**

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding of the need to give an account of our actions to individuals, groups, and organisations.

Transformation: We, as custodians of hope, will work tirelessly to transform our municipality, communities, and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social, and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures, and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services in all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunities for enterprise, creativity and business development in our cities, towns and villages is an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens and how these services can assist them in facilitating development and job creation. The second relates to the internal workings of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third-dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work, and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpin its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural

environment and its processes provide the setting in which and the basic resources with which human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economies. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, people's activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and the food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity, and transport infrastructure provision. Secondly, the municipal strategy has, over the last decade, taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has helped to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities, and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas, and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure Greater Stellenbosch area is thus not only a functional necessity but also underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women, and elderly, is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and to whose benefit it is, however, is a difficult task. The range of services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also

ensure synergy between the work of the political and administrative spheres of the municipality, their work, and that of other spheres of government, civil society, and the business sector. Municipalities should communicate well and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, both external and internal to the organisation, be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available, and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership, and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To meet the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensuring the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 13: Strategic Focus Areas and Predetermined Objectives

SFA 1: Valley of Possibility

Predetermined Objectives

1.1 Create an environment conducive to business development and job creation.
1.2 To facilitate and coordinate support for emerging entrepreneurs by utilising internal SCM processes and linking SMMEs with opportunities in the market.
1.3 To provide, upgrade, and maintain an effective engineering infrastructure to support effective service delivery.
1.4 To ensure the provision of non-motorised transport routes as a functional mode of transport.

SFA 2: Green and Sustainable Valley

Predetermined Objectives

2.1 Managing human use of the biosphere and its resources.
2.2 Enhancing the integrity of the environment is imperative for long-term sustainability.
2.3 Incorporating biodiversity into the environment is an imperative for long-term sustainability.
2.4 Ensuring spatial sustainability.
2.5 Facilitate the efficient use of all forms of capital available to Stellenbosch.
2.6 Building human capacity and ability.
2.7 Efficient information management.

SFA 3: Safe Valley

Predetermined Objectives

3.1 To implement an integrated safety strategy that incorporates multi-stakeholder engagement and social crime preventions.
3.2 To develop and implement institutional crime prevention strategies, with a focus on improved law enforcement and neighbourhood watches.

SFA 4: Dignified Living

Predetermined Objectives

4.1 To develop and maintain sustainable human settlements that will meet the diverse range of housing needs.
4.2 To develop and implement a social infrastructure masterplan for the upgrading and maintenance of social facilities in all wards.
4.3 To involve and build the capacity of stakeholders in the planning and management (governance) of the areas where they live. (Promote participatory planning and integrated implementation).
4.4 To provide access to basic services for households in the WC024 area.

SFA 5: Good Governance and Compliance

Predetermined Objectives

5.1 To develop, align, and implement effective management Information systems.
5.2 An effective asset management system to optimise the use of municipal assets.
5.3 To manage integrated development planning and the efficient measurement of predetermined objectives as per the regulatory framework.
5.4 To involve the community in the planning and management of programmes and projects impacting their ward(s),
5.5 To review municipal governance processes as per the Risk-Based Audit Plan.
5.6 A skilled and capable workforce that supports the growth objectives of the municipal area.
5.7 A responsive, accountable, effective, and efficient local government system.
5.8 To implement an effective revenue management system.
5.9 To provide accurate and relevant financial information for decision-making.
5.10 To develop and implement a responsive, accountable, effective, and efficient customer care structure and system.

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups, and organisations (public, community-based and private).

For sustainable municipal management, political leadership, and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the "now" – the need to guide decisions today. For municipalities, the "now" has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is "under preparation" is used as an excuse for inaction or even poor decision-making. The arm's-length approach also appears to neglect local experiential knowledge – what people know through working with service issues daily. With this in mind, we have provided for regular, informal, but structured engagements between the MayCo and the Director's Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining, and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges, and taxes for services as a means for raising government revenue and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that the government takes on issues, "positive" and "negative." This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur in a vacuum. Various key policy directives are being employed, ranging from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 4th review of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

Figure 14: Sustainable Development Goals (SDGs)

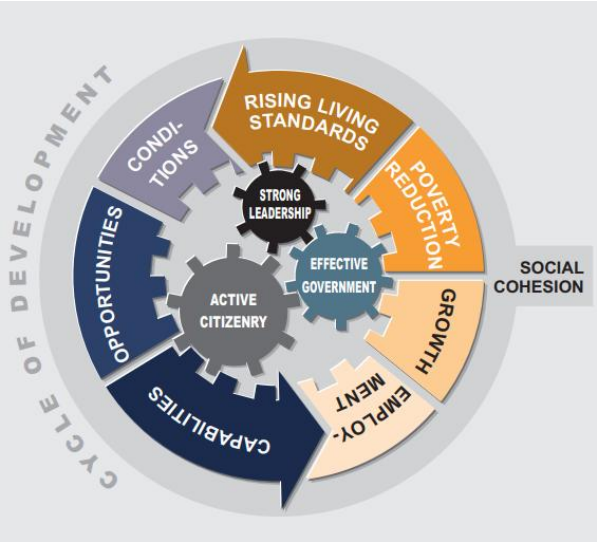
The Sustainable Development Goals (SDGs), officially known as *Transforming Our World: The 2030 Agenda for Sustainable Development*, are a set of seventeen aspirational "Global Goals" with 169 targets between them. The agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic, social,** and **environmental**. The goals are the following:

Sustainable Development Goals (SDGs) 2030

- Goal 1: End poverty in all its forms everywhere.
- Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- Goal 3: Ensure healthy lives and promote well-being for all ages.
- Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- Goal 5: Achieve gender equality and empower all women and girls.
- Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- Goal 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- Goal 10: Reduce inequality within and among countries.
- Goal 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.
- Goal 12: Ensure sustainable consumption and production patterns.
- Goal 13: Take urgent action to combat climate change and its impacts.
- Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- Goal 15: Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
- Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

3.6 National Policy Direction

3.6.1 National Development Plan (NDP) – 2030



The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by the Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities, and employment on social and living conditions. It shows how leadership, active citizenry and effective government can help drive development in a socially cohesive environment.

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues on its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Figure 15: National Development Plan – An approach to change

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- Uniting all South Africans around a common programme to achieve prosperity and equity.
- Promoting active citizenry to strengthen development, democracy, and accountability;
- Bringing about faster economic growth, higher investment, and greater labour absorption;
- Focusing on key capabilities of people and the state;
- Building a capable and developmental state; and
- Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- Increase employment from 13 million in 2010 to 24 million in 2030.
- Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- Increase the share of national income in the bottom 40% from 6% to 10%.
- Establish a competitive base of infrastructure, human resources, and regulatory frameworks.
- Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender, and disability makeup.
- Broaden ownership of assets to historically disadvantaged groups.
- Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- Provide affordable access to quality health care while promoting health and well-being.
- Establish effective, safe, and affordable public transport.
- Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- Ensure that all South Africans have access to clean running water in their homes.
- Make high-speed broadband internet universally available at competitive prices.

- Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- Ensure household food and nutrition security.
- Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- Realise a developmental, capable, and ethical state that treats citizens with dignity.
- Ensure that all people live safely, with an independent and fair criminal justice system.
- Broaden social cohesion and unity while redressing the inequities of the past.
- Play a leading role in continental development, economic integration, and human rights.

3.6.2 Medium-Term Development Plan (MTDP) 2024 – 2029

The MTDP is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. The MTDP replaces the Medium-Term Strategic Framework (MTSF) and is designed to focus on fewer, high-impact interventions to drive measurable results. It sets targets for the implementation of the priorities and interventions for the next five years and states the outcomes and indicators to be monitored.

The MTDP was approved by the Cabinet Lekgotla on 29 January 2025 and is structured around three core strategic priorities:

The MTDP 2024 – 2029 will guide the work of the Government of National Unity for the next five years in pursuit of three strategic national priorities: **driving inclusive growth and job creation, reducing poverty and tackling the high cost of living,** and **building a capable, ethical and developmental state** through the three pillars of the NDP.

Figure 16: Three NDP Pillars

The Government of National Unity has set five goals for the next five years, which are:
Goal 1: A dynamic, growing economy;
Goal 2: A more equal society, where no person lives in poverty;
Goal 3: A capable state delivering basic services to all citizens;
Goal 4: A safe and secure environment; and
Goal 5: A cohesive and united nation.

The table below encapsulates the MTDP goals, strategic priorities and outcomes identified to achieve the goals and objectives:

Table 21: MTDP 2024 – 2029: Goals, Strategic Priorities and Outcomes

MTDP Strategic Priority 1: Drive inclusive growth and job

- Increased employment and work opportunities;
- Accelerated growth of strategic industrial and labour-intensive sectors;
- Enabling environment for investment and improved competitiveness through structural reforms;
- Increased infrastructure investment, access and efficiency;
- Improved energy security and a just energy transition;
- Increased trade and investment;
- A dynamic science, technology and innovation ecosystem for growth;
- Supportive and sustainable economic policy environment; and
- Economic transformation and equitable inclusion of women, youth and persons with disabilities for a just society.

MTDP Strategic Priority 2: Reduce poverty and tackle the high cost of living

- Reduced poverty and improved livelihoods;
- Improved coverage of social protection;
- Improved access to affordable and quality healthcare;
- Improved education outcomes and skills;
- Skills for the economy; and
- Social cohesion and nation-building.

MTDP Strategic Priority 3: Build a capable, ethical and developmental state

- Improved service delivery in the local government sphere;
- Improved governance and performance of public entities;
- An ethical, capable and professional public service;
- Digital transformation across the state;
- Mainstreaming of gender, empowerment of youth and persons with disabilities;
- A reformed, integrated and modernised Criminal Justice System;
- Effective border security;
- Secured cyberspace;
- Increased feelings of safety of women and children in communities;
- Combat priority offences (economic, organised crime and corruption);
- Advance South African foreign policy for a better world; and

3.6.3 National District Development Model and One Plan

The Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- solve the silos at a horizontal and vertical level;
- maximise impact and align plans and resources at our disposal through the development of "One District, One Plan, and One Budget";
- narrow the distance between people and government by strengthening the coordination role and capacities at the district level;

- ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- build government capacity to support municipalities;
- strengthen monitoring and evaluation at district and local levels;
- implement a balanced approach towards development between urban and rural areas;
- ensure sustainable development while accelerating initiatives to promote poverty eradication, employment, and equality; and
- exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25–30-year long-term strategic framework (consisting of short-, medium-, and long-term actions) to guide investment and delivery in each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.

3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NDP) indicated that by 2030, South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced, and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive**, **resilient**, and **liveable urban settlements** while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 17: UIDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The IUDF strategic goals listed above create nine policy levers. These policy levers can only be used if they are added to tools for planning municipal development, like the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction

3.7.1 The Western Cape Government Provincial Strategic Plan 2025 - 2030

The Western Cape Provincial Government (WCG), Provincial Strategic Plan (PSP) 2024 - 2030, outlines the strategic goals and priorities for the period 2025 - 2030.

The overarching strategic direction for the provincial government features below:

Strategic:

The PSP outlines high-level priorities and goals for the provincial government to enhance residents' quality of life. PSP 2025-2030 focuses on shared, resident-centred outcomes which inform departmental and portfolio plans.

Resident-centric:

The PSP focuses on achieving meaningful changes for residents, applying the life course approach and systems theory to define impact, and theories of change to track progress.

Transversal:

The PSP promotes integration and collaboration across provincial departments, and a whole-of-society approach, to address complex challenges through transversal responses.

The PSP 2025 – 2023 builds on proven approaches from previous cycles, incorporating lessons and established strategies that guide government action. The Western Cape's key priorities for 2025 – 2030 are:

WCG Key Priority 1: Growth for Jobs
- Driving growth opportunities through investment
- Stimulating market growth through exports and domestic markets
- Energy resilience and transition to net-zero carbon.
- Water security and resilience
- Technology and innovation

WCG Key Priority 2: Safety
- Integrated Violence Prevention
- Safe and Secure Communities and Infrastructure
- An effective and responsive law enforcement

WCG Key Priority 3: Educated, Healthy and Caring Society
- Human Capital Development:
- Infrastructure and Spatial Transformation; and
- Resilience and Sustainability

WCG Key Priority 4: Innovation, Culture and Governance
- Supporting economic growth for job creation
  - Greater confidence and trust in the WCG;
  - Reliable, high-quality essential public goods
- Service delivery enablers;
  - Innovation;
  - Integration and collaboration;
  - Culture and people-centric delivery;
  - Futures thinking and informed decision making; and
  - Ease of doing government

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for its district:

Table 22: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the strategic goals for the 3rd review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas (SFAs) are aligned with national, provincial, and district plans.

Table 23: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1 Valley of Possibility	Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all (8)	Drive inclusive growth and job creation (1)	Growth for Jobs (1)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2 Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3) Innovation, Culture and Governance (4)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District through economic, environmental, and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient, and sustainable (11)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 3 Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Safety (2)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SFA 4 Dignified Living	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4) Ensure healthy lives and promote well-being for all at all ages (3)	Reduce poverty and tackle the high cost of living (2)	Educated, Healthy and Caring Society (3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
	Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)	Drive inclusive growth and job creation (1)	Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 5 Good Governance and Compliance	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Growth for Jobs (1) Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
			Innovation, Culture and Governance (4)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

The CEF was adopted by the Council in June 2023. The draft revised CEF was published for public input and comment for a period of 21 days in April 2026. The final document will be submitted to the Council on 27 May 2026 for adoption.

3.11 Climate Change Adaptation

Climate change refers to long-term changes in weather patterns, including shifts in temperature, rainfall, and the frequency and intensity of extreme weather events. While the Earth's climate has always exhibited natural variability, current climate change is directly or indirectly driven by human activities that increase greenhouse gas concentrations in the atmosphere, particularly through the burning of fossil fuels, land-use change, and industrial processes. This anthropogenic climate change is occurring at a rate and scale that exceeds historical natural variability, resulting in more frequent and severe climate-related hazards.

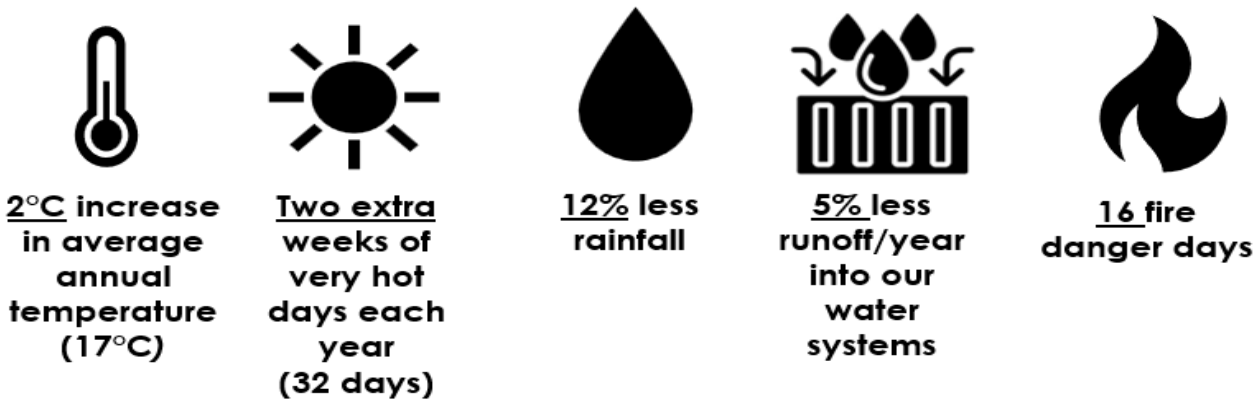
South Africa is particularly vulnerable to these changes due to its existing exposure to climate variability, socio-economic inequality, and reliance on climate-sensitive sectors such as water resources, agriculture, biodiversity, and infrastructure. Increasing temperatures, changing rainfall patterns, and more extreme events — such as floods, droughts, heatwaves, wildfires, and severe storms — pose significant risks to livelihoods, economic development, ecosystem services, and municipalities' ability to deliver basic services (Figure 19). As a result, climate change constitutes a critical development challenge of the 21st century for South Africa, requiring integrated responses at the local level. In this context, climate change adaptation refers to the process of adjusting natural, social, and built systems in response to actual or expected climate impacts, to reduce vulnerability, minimise harm, and enhance resilience. For Stellenbosch Municipality, this involves integrating climate risk considerations into municipal planning, infrastructure investment, service delivery, and decision-making to support sustainable and resilient development.

Figure 18: ***Climate as a driver of instability***

Source: https://www.envirosecurity.org/publications/climate-change-implications-for-defenceH

Baseline Climate of WC024[1]

Stellenbosch Municipality is characterised by a Mediterranean-type climate, with warm, dry summers and cool, wet winters. Based on historical climate data (1961–1990), average temperatures across the municipal area are approximately 15°C, with some spatial variation influenced by topography. Summers are generally warm to hot, with an average of ~18 very hot days per year (maximum temperatures exceeding 35°C), while short heatwave events also occur. While rainfall varies spatially across WC024, average annual rainfall is approximately 790 mm, of which most (~80%) falls during the winter months as cyclonic rain from cold fronts. Under baseline conditions, Stellenbosch has historically



[1]CSIR. 2023. GreenBook Risk Profile Tool. CSIR: Pretoria. Online available at: https://riskprofiles.greenbook.co.za/

experienced normal to moderately dry conditions, with periodic droughts, a general exposure to wildfire risk across all settlements, and spatially variable flood risk, with central, western, and southern areas more prone to flooding than eastern areas.

Projected Climate Change for WC024 (2021–2050) [2]

Climate projections for WC024 for the period 2021–2050 under both moderate (RCP 4.5) and high (RCP 8.5) emissions scenarios, indicate a clear and consistent warming and drying trend across the municipal area (Figure 20). Average annual temperatures are projected to increase by approximately 2°C by mid-century, substantially shifting from historical baseline conditions to average temperatures of ~17°C. The number of very hot days (maximum temperatures exceeding 35°C) is projected to increase by approximately 12 to 14 additional days per year by 2050, resulting in an average of more than 30 very hot days annually. While most settlements are projected to experience a low increase in exposure to extreme heat, areas such as Groendal in Franschhoek and surrounding settlements may face a medium increase in heat exposure, increasing vulnerability to heat-related stress.

Figure 19: Key projected climate change trends for WCO24 mid – century (2021- 2025)

Annual rainfall across the municipality is projected to decline by approximately 90–100 mm per year (~12% decrease) under both climate scenarios. At the same time, annual evaporation is projected to increase by approximately 7.5%, resulting in an estimated 5% reduction in average annual runoff. This reduction directly affects the volume of water available for rivers, dams, and groundwater systems. Projections also indicate a decrease in the number of extreme rainfall days (greater than 20 mm in 24 hours), with spatial variation across the municipal area. The largest decreases in extreme rainfall events are projected in the eastern and southern areas, which correspond with areas experiencing the greatest declines in overall annual rainfall.

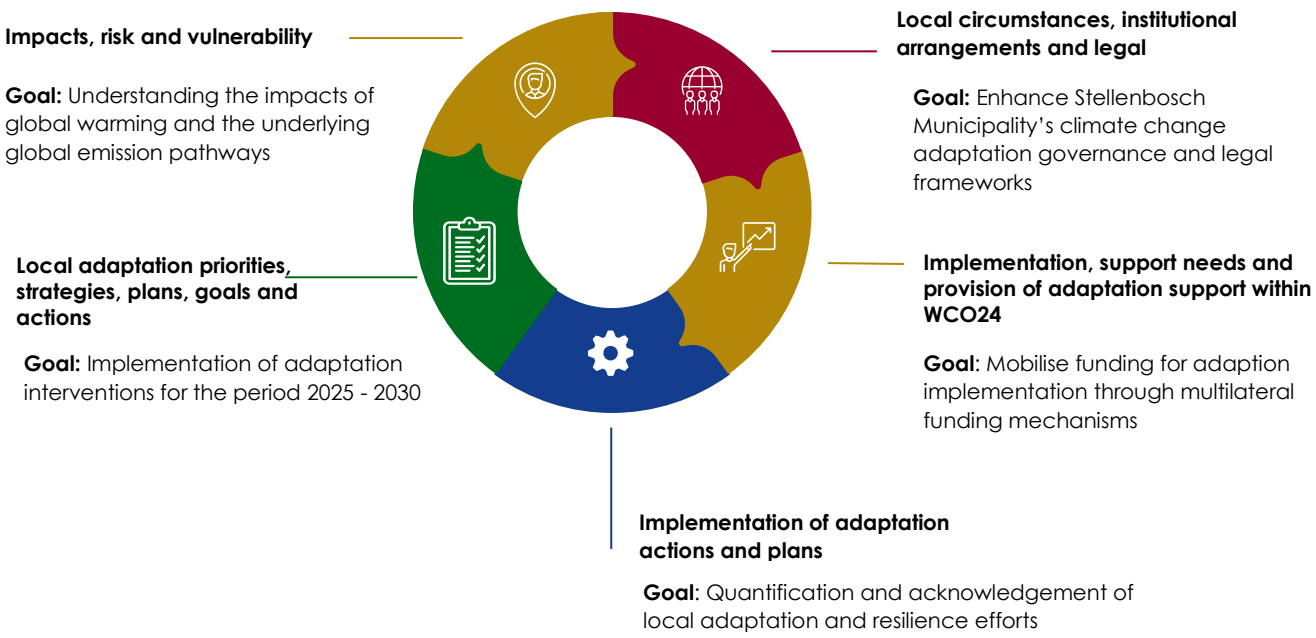
Fire risk is projected to increase across the municipality by mid-century. Under the high emissions scenario, WC024 could experience an average of approximately 16 fire danger days per year, with the northern and western parts of the municipal area most affected. When combined with changes in fire likelihood, overall fire risk is expected to increase, with most settlements —particularly around central Stellenbosch — experiencing a moderate increase in fire risk. Drought projections indicate increasing drought tendency across the municipal area, with most settlements expected to experience a moderate increase in drought risk by 2050, despite uncertainty in the precise magnitude of change. In line with projections of decreased extreme rainfall events, most settlements in WC024 are expected to experience a low increase in flood exposure, with some areas showing very low change in flood risk.

[2]CSIR. 2023. GreenBook Risk Profile Tool. CSIR: Pretoria. Online available at: https://riskprofiles.greenbook.co.za/

Collectively, these projections indicate that Stellenbosch Municipality will face a hotter and drier climate by mid-century, with increased heat stress, higher wildfire risk, greater water scarcity, and ongoing flood exposure in certain areas. These changes have significant implications for municipal infrastructure planning, particularly for water supply systems, stormwater management, roads, electricity networks, and fire management services. Climate change will place increasing pressure on service delivery and operational budgets, as assets are exposed to higher levels of stress and maintenance demands. From a planning and governance perspective, these projected changes highlight the need to integrate climate risk considerations into spatial planning, infrastructure investment decisions, disaster risk management, and long-term financial planning. Climate change also poses risks to local economic development, particularly in climate-sensitive sectors such as agriculture and tourism, while increasing vulnerability for communities exposed to heat, water insecurity, and environmental hazards. Strengthening climate change adaptation within municipal planning and decision-making is therefore essential to protect development gains, manage risk, and support resilient and inclusive growth within Stellenbosch Municipality. High priority is thus given to the formulation of a framework and plan concerning climate change adaptation and to provide support to citizens and key stakeholders in adapting to the current and future impacts of climate change (climate resilience) in the municipal area.

Legislative Framework of Climate Change

The Climate Change Act, 2024 (Act No. 22 of 2024) is a pivotal legislative measure aimed at addressing the urgent global challenge of climate change through comprehensive and impactful strategies. Its overarching goal is to support South Africa's transition to a low-carbon, climate-resilient economy and society while promoting sustainable development.



The objectives of the Climate Change Act 22 of 2024 are described as:

- Promotes the formalisation of adaptation processes through policy interventions;
- Mandates clear adaptation road maps based on scenarios to assist with planning and resourcing;
- Promotes coordination through different tiers of government;
- Allows for sectoral-specific interventions that focus on interventions, particularly for vulnerable sectors;
- Encourages mainstreaming of climate adaptation through policy and planning tools;
- Aims to facilitate effective resourcing through the establishment of financial mechanisms to support the response;
- Encourages stakeholder engagement in planning to tap into local knowledge and create buy-in;
- Support South Africa's international obligations under the Paris Agreement, ensuring that national adaptation efforts contribute to global climate goals;
- It establishes mechanisms for tracking progress on adaptation actions; and
- To provide a feedback mechanism for future planning and decision–making.

Municipal Response to Climate Change

In response to the increasing risks posed by climate change and the requirements of the Climate Change Act, Stellenbosch Municipality has identified climate change as a strategic priority for the 2025/26–2026/27 period. The key focus areas guiding the municipality's climate response during this period are illustrated in Figure 21 and reflect an integrated approach to strengthening climate resilience across planning, infrastructure, governance, and community engagement.

Figure 20: Climate Change Adaptation Focus Areas and Goals

To support the implementation of these priorities and to give effect to the objectives set out in the Climate Change Act, Stellenbosch Municipality appointed a dedicated Climate Change Expert, effective 1 June 2025. This appointment represents a significant step forward in strengthening the municipality's institutional capacity to respond proactively to climate change. At present, only a limited number of local municipalities in South Africa have a dedicated position focused exclusively on climate change adaptation and resilience, placing Stellenbosch Municipality at the forefront of local climate governance.

The Climate Change Expert position is funded through the GIZ/SKEW Expert Fund for Municipal Partnerships Worldwide, as part of the municipal partnership between Stellenbosch Municipality and Karlsruhe Municipality (Germany). This international cooperation mechanism enables South African municipalities to access specialist technical expertise to address complex development challenges, including climate change. The Climate Change Expert position is funded for a fixed term until 31 December 2026 and is embedded within the Office of the Municipal Manager, reporting directly to the Municipal Manager. This strategic placement supports cross-directorate coordination and facilitates the transfer of skills and systems needed to institutionalise climate change functions within the municipality.

The role of the Climate Change Expert is structured around five interrelated working areas that together support the strengthening of climate change adaptation and resilience within Stellenbosch Municipality.

Strategy and Capacity Development

This working area focuses on strengthening the municipality's strategic and institutional response to climate change. Key activities include assessing existing climate change adaptation measures; developing a municipal Climate Change Adaptation Plan aligned with national and provincial climate change legislation and policy; strengthening coordination mechanisms among municipal departments and external stakeholders; and undertaking a capacity needs assessment to inform the design and implementation of targeted capacity-building programmes and workshops.

Climate-Resilient Services and Local Interventions

This working area supports the implementation of climate-resilient measures at a local level, with a particular focus on the Franschhoek area. Activities include facilitating flood-resilience advisory programmes for homeowners and property owners; supporting the implementation of flood-resilient interventions; and contributing to local climate adaptation and resilience initiatives. This includes the development and promotion of innovative approaches such as ecosystem-based adaptation, nature-based solutions, and green infrastructure to reduce vulnerability to climate-related risks.

Awareness Raising and Community Engagement

This working area focuses on increasing awareness and understanding of climate change adaptation among residents and stakeholders. Activities include the design and rollout of public awareness initiatives; the development and dissemination of information and communication materials related to climate change adaptation; the implementation of stakeholder engagement processes; and the establishment of partnerships with local institutions to support outreach and community-based resilience activities.

Resource Mobilisation and Fundraising

This working area supports the identification and mobilisation of financial resources for climate change adaptation. Activities include exploring funding opportunities for climate adaptation projects, identifying potential national and international funding sources, and supporting the development of concepts and proposals for climate-resilient programmes and interventions.

Partnerships and Knowledge Exchange

This working area focuses on strengthening partnerships and facilitating knowledge exchange to support climate adaptation efforts. Activities include organising regular technical exchanges with the partner municipality; planning and supporting study visits and learning exchanges; and contributing to the preparation of project proposals in collaboration with partners when applying for external funding.

Since 1 June 2025, Stellenbosch Municipality has made measurable progress in advancing its resilience to climate change. Key activities undertaken to date include the consolidation and analysis of local climate risk information, including CSIR Green Book data, to inform municipal planning, decision-making and risk management processes, as well as the initiation of the development of a municipal Climate Change Adaptation Framework and Plan. A significant focus during this period has been the implementation of climate change adaptation activities in the Franschhoek area, where flood risk has been identified as a priority concern. This has included the facilitation of structured stakeholder engagement processes with residents, businesses, and local organisations, combining workshop-based discussions with on-site river walks and field engagements. These processes have played a critical role in building shared understanding of flood risks, proposed interventions, and responsibilities, and have contributed to strong local buy-in for the flood resilience programme currently being undertaken in the area.

In parallel, the municipality has strengthened public awareness and communication around climate change through the rollout of targeted social media campaigns aimed at the broader Stellenbosch community. These campaigns focus on increasing awareness of climate risks, promoting climate-resilient behaviour, and improving understanding of municipal adaptation initiatives, thereby supporting broader community engagement beyond formal planning processes. Additional progress includes the delivery of internal capacity-building engagements within the municipality, support to the integration of climate change considerations into selected planning, reporting, and risk

management processes, and active participation in international learning and exchange activities through the Karlsruhe–Stellenbosch partnership supported by the GIZ/SKEW Expert Fund.

Through the establishment of dedicated climate change capacity, supported by international cooperation and aligned with national legislation, Stellenbosch Municipality is strengthening its ability to anticipate, manage, and respond to climate risks. This institutional response provides a strong foundation for enhancing climate resilience, safeguarding service delivery, protecting development gains, and supporting sustainable and inclusive growth within the municipal area.

The success of climate change adaptation in the Stellenbosch municipal area will be evaluated based on the key IDP deliverables outlined in the table below for the period 2022 – 2027.

Table 26: Summary Results: Municipal Manager Priority IDP Deliverables 2022 - 2027

CHAPTER 4:
Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP) and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over the short-term (5 years) as well as over the strategically longer term (10 – 20 years) to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda for its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts. It should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 21: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- Enable a long-term spatial vision for the future of regions and places to be best developed over

time that is based on evidence, local distinctiveness, and community-derived objectives;
- Translate this vision into a set of strategic municipal planning, policies, priorities, programmes, and land allocations, together with the public-sector resources (budget) to deliver them;
- Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being for a specific region or area, i.e., the Adam Tas Corridor, The Bridge (referred to as the Klapmuts Innovation Precinct / Smart City); and
- Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place? Where will it take place? And who will be responsible for what aspect of the development?"

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- Spatial Development Frameworks; and
- The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions that apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- Be informed by a long-term spatial development vision;
- Represent the integration and trade-off of all relevant sector policies and plans;
- Guide planning and development decisions across all sectors of government;
- Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- Contribute to a coherent, planned approach to spatial development in the national, provincial, and municipal spheres;
- Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums, and land holdings of state-owned enterprises and government agencies, and address their inclusion and integration into the spatial, economic, social, and environmental objectives of the relevant sphere;
- Address historical spatial imbalances in development;
- Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- Provide direction for strategic developments, and infrastructure investment;
- Promote efficient, sustainable, and planned investments by all sectors;
- Indicate priority areas for investment in land development;
- Promote a rational and predictable land development environment to create trust and stimulate investment;
- Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- Give effect to national legislation and policies on mineral resources and sustainable utilisation

and protection of agricultural resources; and

- Consider and, where necessary, incorporate the outcomes of substantial public engagement, including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media, and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption, and implementation of any SDF, policy, or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 28: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	• Past spatial and other development imbalances must be redressed through improved access to and use of land. • SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements and areas characterised by widespread poverty and deprivation. • Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. • Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. • Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. • In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	• Promote land development that is within the fiscal, institutional, and administrative means of government. • Give special consideration to the protection of prime and unique agricultural land. • Uphold the consistency of land use measures under environmental management instruments. • Promote and stimulate the effective and equitable functioning of land markets. • Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. • Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	• Land development must optimise the use of existing resources and infrastructure. • Decision-making procedures must be designed to minimise negative financial, social, economic, or environmental impacts. • Development application procedures must be efficient and streamlined, and timeframes must be adhered to by all parties.
Spatial resilience	• The flexibility of spatial plans, policies, and land use management systems is necessary to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	• All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. • All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. • The requirements of any law relating to land development and land use must be met timeously. • Transparent processes of public participation are incorporated into the preparation and amendment of spatial plans, policies, land use schemes, and development applications to allow all parties to provide input on matters affecting them. • Policies, legislation, and procedures must be set up to inform and empower members of the public.

At the municipal sphere of government, aligned with the SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 9 June 2023) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content entitled "Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans." The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which are subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF, Annual Reviews as part of the IDP review process

Background on the 1st Annual Review, Amendment, and Adoption of the Stellenbosch IDP / MSDF / CEF, 2023, as part of the IDP Process Plans 2023/24 and 2024/25.

The need for all municipalities (metropolitan, local, and district) to have Spatial Development Frameworks (MSDFs) as core components of their Integrated Development Plans (IDPs) has been a legislative requirement for the past 24 years, since the implementation of the Municipal Systems Act, Act 32 of 2000 (MSA). Over the past 24 years, our understanding of the importance of MSDFs has improved. In this period, three further pieces of legislation have been introduced, namely the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), and the Stellenbosch Municipality Land Use Planning By-law (2023), which have further clarified the role and importance of MSDFs. Specifically, these legislations have provided further needed detail on the content of MSDFs and the administrative processes to be followed for review, amendment, and adoption of MSDFs.

Given that the MSA makes it clear that an MSDF (including the Capital Expenditure Framework (CEF)) is a core component of an IDP, it follows that the process requirements prescribed by the MSA in respect of an IDP, must apply to an MSDF. In the Stellenbosch Municipality context, the Council approved the commencement of the **proposed review and amendment process** of the Municipal Spatial Development Framework, 2019 (MSDF), and Capital Expenditure Framework, 2021 (CEF), to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. In doing so, an integrative strategic, spatial and financial planning approach was followed to avoid the duplication of efforts and to ensure maximum positive impact from the investment of resources with specific consideration to the adoption of the catalytic projects as approved in the Adam Tas Corridor Local Area Spatial Development Framework, 2022 (ATC LASDF). This resulted in a reviewed and amended MSDF and CEF, which were supported and adopted at a Council Meeting held on 27 June 2023.

The final adopted IDP / MSDF / CEF were incorporated and adopted within the 2022-2027 IDP on 30 October 2023, with confirmation from the Western Cape Provincial MEC for Local Government, Environmental Affairs and Development Planning on compliance with the relevant legislative requirements received on 28 November 2023.

Legislative requirements and process for the Annual Review of the Amended IDP / MSDF / CEF (2023), as part of the IDP Process Plan

Section 34(a)(i) and (ii) of the MSA speaks directly to the need to "review" an MSDF annually in terms of the performance of the municipality concerning the guidance provided in its MSDF, as well as at any time deemed necessary in response to changing circumstances. The annual review allows for proactive monitoring of the implementation of the MSDF while highlighting the need for actions that need to be taken to support the MSDF implementation on a sustained basis. It is also important to note that an **annual review of the MSDF does not necessarily lead to or require an amendment of the MSDF.**

Section 34(b) of the MSA goes on to say that this review of the Amended IDP/MSDF/CEF may result in there needing to be an amendment to the MSDF. If an amendment is required, the process prescribed in Regulation 3 of the Local Government: Municipal Planning and Performance Management Regulation, 2001, must be followed. In addition, the requirements of section 20(3) in SPLUMA, and sections 10, 11, 12, or 13, and 14 of LUPA, and sections 3, 4, or 5 and 10 of Stellenbosch Municipality Land Use Planning By-law (2023) must also be satisfied. It is important to note that when an amendment process is required due to recommendations from the review, or a decision by the Council, this process should be planned for and included in the IDP process plan developed in terms

of sections 28 and 29 of the MSA. Furthermore, it should be noted that the timeframe normally associated with an amendment process for the IDP / SDF / CEF ranges between 24 to 36 months, and upon conclusion, it **does not give any development rights,** and the necessary land development applications should still be submitted to the Division: Development Management for assessment and decision.

To support municipalities with unpacking the legislative requirements and administrative processes, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) and the National Department of Cooperative Governance have issued a practice note and revised IDP guidelines. For the annual review of the Amended IDP/MSDF/CEF (2023), this internal review formed part of the 2024/2025 IDP process plan and was undertaken based on the mentioned practice note and guidelines. Accordingly, and concerning this internal desktop review of the MSDF, the following factors have been considered regarding the performance of a municipality concerning its MSDF, namely:

- Are the goals and objectives of the MSDF being reached by the municipality?
- Is the direction provided by the MSDF being brought into the compilation or amendments of relevant sector plans, e.g., the Integrated Transport Plan (ITP), Water Services Development Plan, Integrated Waste Management Plan, Air Quality Management Plan, Engineering Services masterplans, the Human Settlements plan, etc.?
- Is the municipal budget spent in line with the priority development areas identified in the MSDF?
- What substantive development permissions (rezoning and subdivisions) has the municipality given in the past financial year?
- Are these development permissions aligned with the objectives, principles, and policies set out in the MSDF?
- What site-specific deviations did the Municipal Planning Tribunal (MPT) permit? What is the impact of these on the Municipal IDP/Budget/MSDF?
- Are implementation actions identified by the MSDF (including the CEF) being brought forward into the IDP, and SDBIPs and where relevant, budgeted for?
- Are implementation actions identified by the MSDF (including the Capital Investment Framework) included in the Strategic Plans and / or Annual Performance Plans and Budgets of relevant provincial and national government departments and state-owned entities?
- Do prior amendments suggest the municipality needs to commence with a compilation of a new MSDF?

The purpose of an annual review report is to start highlighting and building up a list of what should inform the review of the amended IDP in years 4 and 5, and what should be addressed in the next generation IDP (and MSDF/CEF) to be adopted for the next 5-year term of office. Hence, the review will compile a list of issues to be dealt with when compiling the MSDF for the period 2028-2032.

Methodology and Performance Measurement Assessment for the Annual Reviews of the Amended IDP / MSDF / CEF (2023)

One of the contributing factors to the lack of spatial transformation is that strategic policy seldom leads the implementation agenda of municipalities. Ideally, the infrastructure and built environment programmes of municipalities should align with the spatial objectives of the MSDF, which is the 20-year plan for the management of the physical growth and development of the municipality. The MSDF, as the strategic and integrative spatial planning policy, outlines the municipality's spatial agenda to its service directorates, ensuring that their sector plans, programmes, and projects are grounded in a sound common spatial logic, while the CEF, the municipality's capital expenditure framework over the 10-year planning horizon, enables specific arrangements for prioritisation, mobilisation, sequencing and implementation of public and private infrastructural and land development investment, ensuring

maximum positive impact from the investment of scarce resources as agreed to by all stakeholders, while ensuring financial sustainability.

The Stellenbosch Municipality has, over the last few years, made deliberate efforts to improve municipal policy coherence and the vertical alignment in its intra-municipal planning sphere through a collaborative approach using the Capital Planning Forum (CPF) and the MSDF/CEF mechanisms. This approach enables the municipality's long-term strategic development vision to direct infrastructure implementation in the functional areas and priority development areas of the municipality (i.e., Stellenbosch, Klapmuts, and Franschhoek), whilst remaining conscious of the municipality's financial position and infrastructure planning needs.

The second annual review for the 2025/2026 cycle of the MSDF dealt with the performance monitoring of the implementation programme of the MSDF around specific spatial imperatives and associated development themes, i.e., planning, environment, local economic development, housing, mobility, infrastructure, and community development. The successful implementation of the seven (7) spatial imperatives (also referred to as principles) and guidelines is dependent on related spatial and non-spatial supportive policies, which have specific implications on intra-municipal sector planning. This implies policy alignment across municipal functional areas and services.

Each of the spatial imperatives highlights the supportive intra-municipal directorates and their implications on sector planning across the MSDF implementation programme. For this second annual review process of the implementation programme of the MSDF, which is coordinated by the Directorate: Planning and Economic Development (D: P&ED), Council resolutions adopted by the municipality from 27 September 2023 to date (05/2024) were also analysed. The MSDF 2nd Annual Review Report also evaluated inputs received during the 2023/24 IDP public participation process. One of the inputs received from a consultant requested the inclusion of the Libertas Development Proposal within the urban edge. The report from the consultant further explains the site-specific reasons for the deviation from the Council's spatial policy and the reasons for considering a very specific type of development that the amended IDP/MSDF/CEF did not consider, and which hasn't been catered for within Stellenbosch town. The comments received by the consultant require an assessment of performance measurements (sections 34(a)(i) and 41 of the MSA), and the extent to which changing circumstances demand an amendment (section 34(a)(ii)) to the Municipal Council. It is important to note that **changing circumstances generally refers to circumstances that are out of the control of the municipality that have a substantive impact on the MSDF policies and proposals,** and could include e.g., changes in legislation, policy, norms or standards, disasters, trigger points being reached in terms of certain parameters, significant proposal for development in the municipal area that will result in significantly changed human settlement needs, socio-economic needs or altered natural environments, change in population growth, change in political leadership and new information etc.

In addition, the consultant has submitted the required land development applications, however, it is important to state that the motivation for the site-specific deviation forms part of the land development application, which is currently being processed by the Division: Development Management. Accordingly, the comments and recommendations expressed in the MSDF review report focus on the assessment of performance measurements as stipulated in sections 34(a)(i) and (ii) of the MSA, and they do **not** deal with the merits of the site-specific deviation application. The submissions from the consultants were assessed in terms of the performance measurements as detailed in the Implementation Programme (refer to Chapter 6) of the Amended MSDF/CEF, 2023.

The second annual review report of the Amended IDP/MSDF/CEF, 2023, was served before the Council on 30 October 2024. The Council was requested to consider, support and adopt the report, and to adopt the recommendation to not commence with the amendment process in terms of Section 34(b) of the MSA to amend the MSDF/CEF (2023). The Council resolved to **adopt the second annual review report** and to **not commence** with the administrative process to amend the MSDF/CEF (2023) in terms

of Section 34(b) of the MSA. It is also imperative to note that, subsequent to the outcomes of the review report, the site-specific deviation and other related land development applications for the Libertas Development Proposal have been **withdrawn** by the applicant.

The **third annual review report for the 2026/27** cycle of the Amended IDP/MSDF/CEF, 2023, will be informed by key spatial planning initiatives identified and scheduled in the MSDF implementation programme for the financial year 2025/26. These key spatial planning initiatives include the **development of Local Spatial Development Frameworks** (LSDFs) and the review and update of the Capital Expenditure Framework (CEF).

Ideally, each of the settlements in the municipal area should have a Local Spatial Development Framework (LSDF), with the priority determined by the position and role of the settlements in the SM settlement hierarchy. These localised spatial planning initiatives require public, and private landowners in key areas to plan and coordinate collectively (beyond individual property boundaries and interests) and to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on. Considering the MSDF settlement hierarchy, and based on intra-departmental and public consultations, including the number of land use applications being submitted, the current **top priority LSDFs** were identified as **Koelenhof** (new priority development node) and the **Dwarsrivier Valley** (including the small towns of Kylemore, Lanquedoc, Johannesdal, Groot Drakenstein - Meerlust, and surrounding rural areas). The prioritisation was presented and supported by Council in the second annual MSDF review report, and the subsequent supply chain processes were followed, with service providers being appointed to undertake the development of these LSDFs over the next 5 – 10 months. The Koelenhof LSDF is a private-public-partnership initiative driven by the private landowners within the priority development node and envisaged to be completed within this financial year (2025/26).

The third annual review report will also evaluate inputs received during the 2025/26 IDP public participation processes for the expansion of the urban edge to allow further developments. The comments received by the consultants require an assessment of performance measurements (sections 34(a)(i) and 41 of the MSA), and the extent to which changing circumstances demand an amendment (section 34(a)(ii)) to the Municipal Council. The comments received will be assessed based on the performance measurements as detailed in the Implementation Programme (refer to Chapter 6) of the Amended MSDF/CEF, 2023. The consolidated report on the MSDF/CEF public participation input and comments received will be presented to the Council as per the IDP Process Plan 2026/27 after the public participation process has been concluded for the CEF.

The purpose of the third annual review report will be to further ensure and report on the implementation programme roll-out of the Amended IDP/MSDF/CEF, 2023, and continue with the list of what should inform the review of the amended IDP in years 4 and 5 and what should be addressed in the next generation IDP (and MSDF/CEF) to be adopted for the next 5-year term of office. Hence, the review will compile a list of issues to be dealt with when compiling the MSDF for the period 2028-2032.

The sections below provide an overview of the spatial challenges, opportunities, spatial proposals, strategic focus, spatial principles, implementation framework, policy frameworks, catalytic initiatives, etc. as reflected in the SDF over the longer term.

The Spatial Challenges and Opportunities identified in the SDF

The Stellenbosch Municipality's SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development—primarily land use activities and associated structures, both new and existing—shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and

maintenance of the unique sense of place of the settlements and surrounding lands that constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without restating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 29: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	↓ The degradation of key ecological assets and the loss of productive agricultural land have been ongoing. ↓ The condition of the river systems within the municipality has deteriorated. ↓ Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This, in turn, will impact agricultural production, scenic landscapes, the liveability of urban areas, and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	↓ The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. ↓ The ability of the economy to absorb growth, particularly concerning job creation, is concerning. ↓ The informal sector will continue to provide livelihoods to a significant proportion of residents. ↓ The growing youthful population, large student population, and seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. ↓ Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant, and current development patterns are not addressing the issue. ↓ Crime rates remain high, and the market response, i.e., private security provision for those who can afford it, is likely to exacerbate inequality. ↓ Upgrading and providing basic services and housing will remain the focus of the municipality, including other government agencies, for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved placemaking. ↓ The municipality's inability to provide basic services (e.g., refuse removal) leads to dumping, environmental degradation, and resulting health-related problems.
Built environment context	↓ Infrastructure backlogs—especially in poor areas—and essential municipal infrastructure require significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management, and solid waste disposal). ↓ The need for housing and shelter—both for the lower-income groups and those with employment—has not been adequately met. The existing housing pipeline will not meet the needs of those requiring state assistance, and little is built that is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as the daily inward commuting of ordinary workers and students, is likely to continue. ↓ Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen. ↓ Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, among other inefficiencies. ↓ The new high-density development mostly focuses on the student market and target groups using private vehicles. ↓ Numerous heritage resources located within the settlements are assets of immense value. Many of these are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy. ↓ The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement. ↓ The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klapmuts presents very significant opportunities for the future development of Stellenbosch, Klapmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality

Theme	Spatial Challenges
	should focus maximum effort on utilising the opportunity presented to address the needs of the town. Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low-occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns. This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary for most of the population. The regional focus on private vehicle growth has an adverse consequence for managing transport at the localised level, where trips are generated. The provision of public transport, non-motorised modes, and travel demand management programmes is generally considered a local municipal function and not a core responsibility or competency of the provincial government. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions. The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.
Institutional context	The limited capital budget of the municipality, given the extent and depth of community needs. Limited funds to address critical issues, especially those related to infrastructure augmentation and maintenance, place the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs. Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area. The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments. The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects. Sector planning remains fragmented, and most developments follow a business-as-usual pattern.

4.5 The Spatial Proposals of the SDF

4.5.1 Spatial development 20 - year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people.

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.5.2 The Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

Table 30: IDP Strategic Focus Areas and the SDF

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature, and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development and overcome inequity and exclusion.	▪ Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement. ▪ A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunities.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, in institutions, and in play.	Denser settlements with diverse activities to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities, and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, who experience limited access to opportunity because of restricted material resources.
SFA5: Good Governance and Compliance	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices, in a manner that assists its internalisation by all.

4.5.3 The Spatial Principles / Imperatives of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch Municipality's natural environment and farming areas

- The spatial policies that relate to this principle focus on protective actions, also called urban management.
- The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
- Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy) and rural guidelines.
- Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.

Respect, preserve, and grow our cultural heritage

- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., scenic landscapes, scenic routes, and special places of arrival, while also focusing on improving the landscape and public amenities associated with these cultural assets.
- The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.

- As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development.

Direct growth to areas of lesser natural and cultural significance, as well as movement opportunity

- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy.
- In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include informal settlement upgrading, residential densification and infill development, mixed land use and improved economic opportunity, improved access and mobility, improved access to community facilities, and improved landscaping and public amenities.

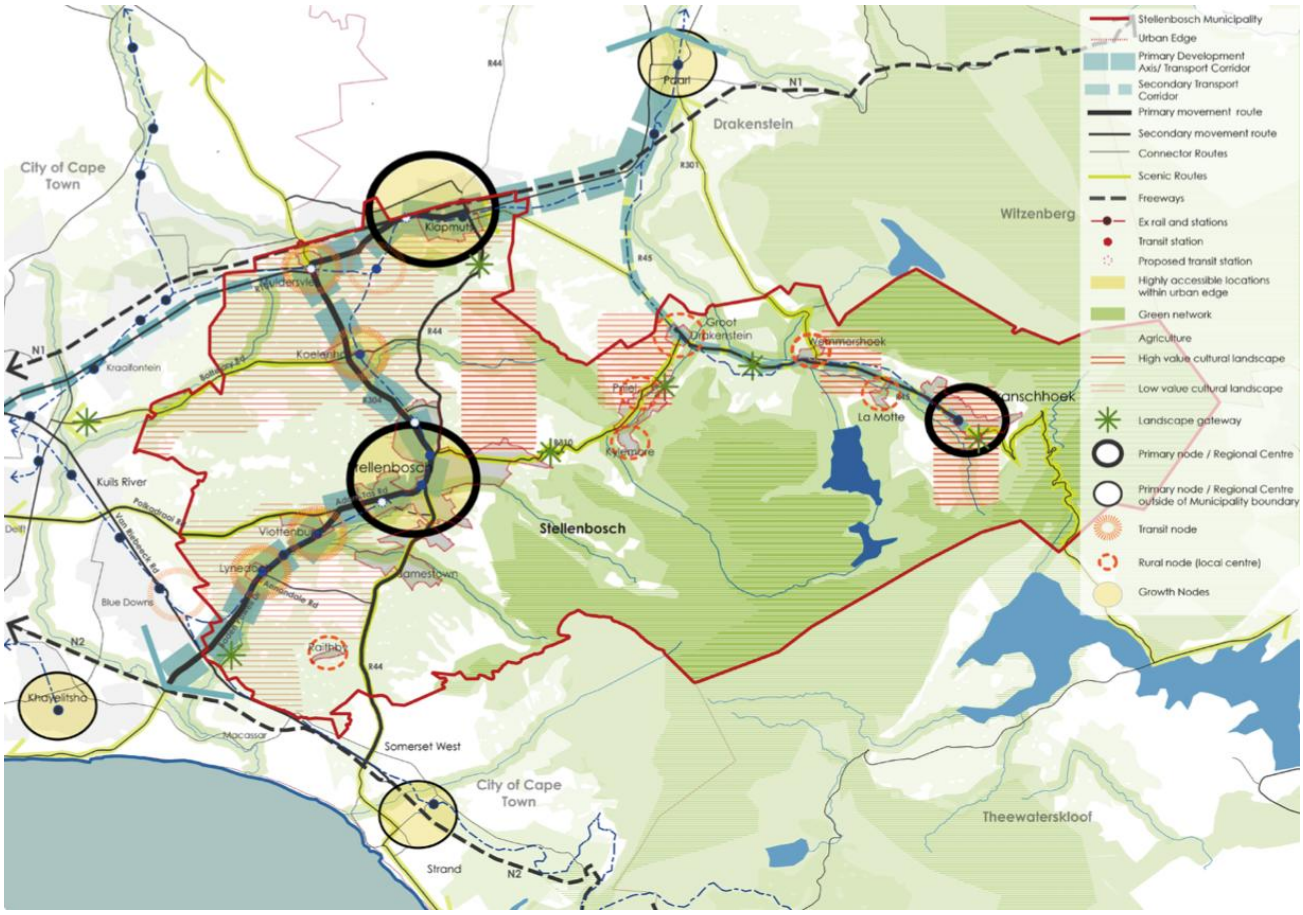
The spatial policies are spatially targeted in priority development areas and include Baden Powell and the Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts

- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected while ensuring that the capacity of existing infrastructure can accommodate change and growth.
- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above) to:
  a) Minimise associated impacts on the environment, agricultural land, and natural resources.
  b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the availability of existing public facilities and commercial opportunities.
  c) Maximise the sustainability of new facilities and commercial opportunities.
  d) Enable the provision of infrastructure most efficiently and cost-effectively.
  e) Minimise the need for inter-settlement movement.
  f) Maximise opportunity for and use of non-motorised and public transport.
  g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
  h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality that appropriately serves regional mobility needs and local-level accessibility improvements.
- The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.

Ensure balanced, sustainable communities



- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge) work towards and maintain, for each settlement, a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- Adopting a conservative view towards the extension of existing urban edges over the SDF period.

- Actively support infill development and adaptive reuse of existing structures.
- Support increased densities in new, infill, and redevelopment projects.
- Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.
- Support the general upgrading and transformation of existing informal settlements.
- Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, ensuring walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunities and address present risk

- The spatial policies focus on major development efforts concerning new mixed-use, industrial, and residential developments, and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 22: Consolidated Concept for the Municipal Area (Approved November 2019 and 27 June 2023)

4.6 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the SDF, a high-level implementation framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital investment and budgeting processes moving forward. The SDF and CEF Implementation Framework comprise the following sections:

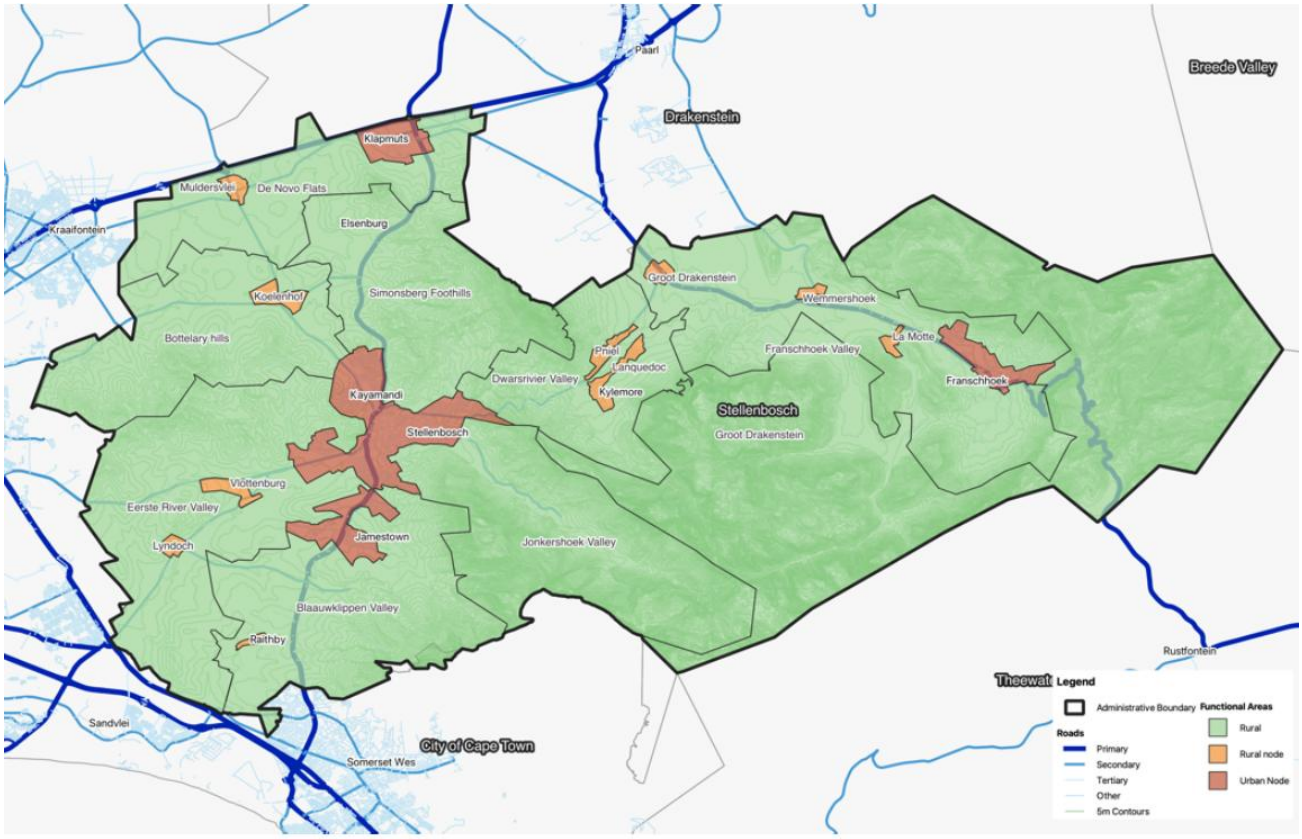
- A proposed settlement hierarchy to inform and guide the investment rationale (linked to plans and settlement proposals);
- Priority development areas and themes;
- A policy framework (linked to strategies);
- Guidelines, studies, and information supporting the policies;
- Implications for sector planning and specific development themes, including:
  - Environmental and rural area management
  - Movement;
  - Housing; and
  - Local economic development;
- Land use management guidelines and regulations;
- Implications for inter-municipal planning;
- Catalytic initiatives;
- Further planning work;
- Institutional arrangements;
- Checklists in support of decision-making;
- A municipal leadership and advocacy agenda related to spatial development and management;
- Capital Expenditure Framework; and

- Monitoring and review.

4.6.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development—at a broad level—is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in the figure below, with the detailed description provided in the table:



The spatial areas for priority development over the *SDF* planning period are:

- Stellenbosch Town;
- Klapmuts;
- Koelenhof (new priority development area); and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g., through clustering, framing them with infill development to improve edges and surveillance, prioritising landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 23: Functional and priority development areas (CEF, June 2023)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement, is a significant centre comprising extensive education, commercial, and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities outlined in the table below.

Table 31: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	▪ Broadening of residential opportunities for lower-income groups, students, and the lower to middle housing market segments. ▪ Upgrade of informal settlements. ▪ Retention of university functions in the town. ▪ Enablement of the Adam Tas Corridor. ▪ Sensitive residential infill and compaction. ▪ Drive to establish "balanced" precincts. ▪ Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts	Focus on economic development (using a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities.	▪ Support for the development of RE / Farm 736 as a lever to economic development, utilising a favourable location for manufacturing, logistics, and warehousing enterprises. ▪ Balanced housing provision in Klapmuts South is focused on those who can benefit from employment provision through unlocking Klapmuts North. ▪ Establishing the Klapmuts town centre. ▪ NMT improvements.
Franschhoek	Secondary service centre, significant tourist destination, and place of residence.	▪ Upgrade of informal settlements. ▪ NMT improvements. ▪ Sensitive infill within the urban edge provides inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). ▪ Retention of historic character.
Secondary urban settlements		
La Motte	Contained rural settlement.	▪ Diversification of existing activities to curtail the need for movement. ▪ Sensitive location of diversified uses closer to the R45. ▪ Limited further housing development.
Wemmershoek	Contained rural settlement.	▪ Possible extension of residential opportunity linked to re-use of the sawmill site and local employment opportunity.
Groot Drakenstein	Contained rural settlement.	▪ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley	Contained historic rural settlements.	▪ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek	Contained, but a dispersed collection of institutional, recreational, and residential uses.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei	Contained rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof	Contained rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg	Contained rural settlement.	▪ Gradual expansion of a unique development model based on sustainable living and education.
Lynedoch	Contained village and institutional clusters.	▪ Containment and limited expansion of existing offerings.
Spier	Contained tourism and cultural centre.	▪ Protection of unique historic settlement structure and form.
Raithby	Contained historic rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail/ bus.
New Priority Urban Settlements		

Settlement	Role	Development and Land Use Management Focus
Koelenhof	Emerging node (priority development area)	• Potential future consolidated, inclusive settlement linked to rail / bus.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden-Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements offering a range of opportunities. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for significant development over the SDF period. Koelenhof has shown significant growth and opportunities for development within the SDF over the medium term.

The focus on Stellenbosch town and Klapmuts does not exclude all development efforts in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth, as the preconditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klapmuts.

What should be emphasised in Franschhoek, and smaller settlements, is improving conditions for existing residents and natural growth within the context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.6.2 Policy Framework

The table below sets out specific spatial policies to support the SDF concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each "frames" the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policies and guidelines is often dependent on related, supportive, non-spatial policies. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines that begin to frame the work to be undertaken or continued in support of proposed policies.

Table 32: Specific work guidelines

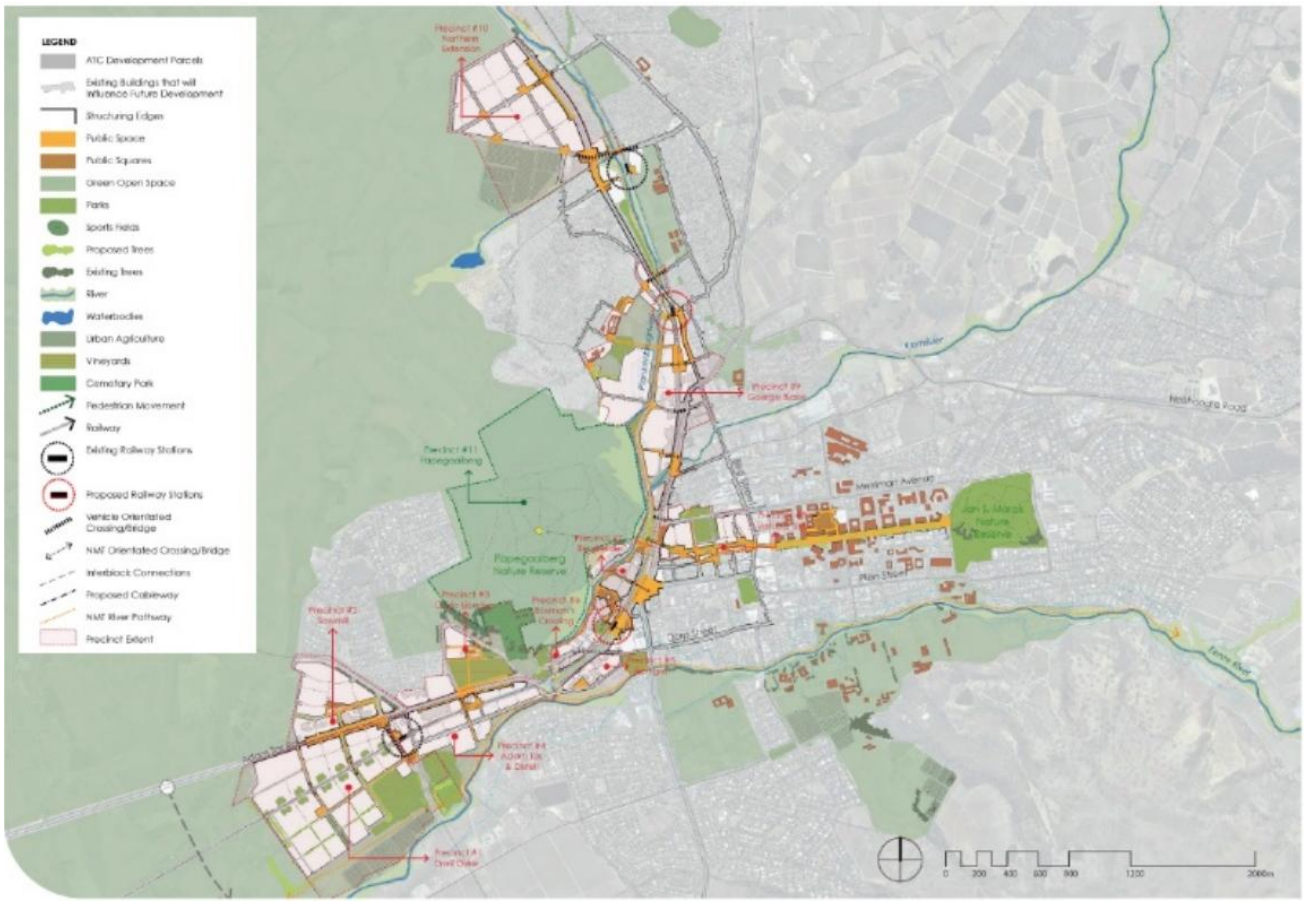
No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	• As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. • Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the "urban" component of existing forestry settlements (for example, Jonkershoek and La Motte). • Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.	• Proactively maintain and upgrade municipal infrastructure services to limit / mitigate the risk to ecological services. • Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. • Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. • Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. • Support initiatives by the private sector to extend environmental stewardship. • Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically located land for land reform purposes. • Support initiatives to utilise municipal-owned agricultural land for small-scale agriculture, forge partnerships with non-governmental or public benefit organisations to assume management responsibilities for commonages and provide basic agricultural services to commonages.	• Prepare and implement management plans for municipal nature reserves and other ecological assets. • Prepare and implement invasive species control plans for municipal properties. • Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. • Develop resource-efficient strategies for all municipal services and land and building development (e.g., compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). • Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of ecological integrity, secure natural resources, and protect agricultural land of high value. • Delineate and manage urban edges and watercourse setbacks in a manner that diverts urban growth pressures away from important natural and agricultural assets. • Apply biodiversity offsets in cases where development in areas of endangered and irreplaceable biodiversity cannot be avoided. • Actively engage with adjoining municipalities and provincial governments to ensure that the integrity of SM's natural environment is maintained (specifically regarding land use management in adjoining municipal areas).

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
2.	Respect, preserve and grow the cultural heritage of SM.	• Preserve significant cultural and historic assets within the municipality and grow the opportunity for new or emerging forms of cultural expression through expanding the use of existing cultural assets or supporting new uses for areas or structures of historic value. • As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development. • Support alternative uses for historic structures and places that will enable their preservation (subject to adherence to the general SDF strategy and policies).	• Support the transfer of municipal assets of cultural and historic value to organisations geared to manage these assets sustainably in the interest of the broader community. • Manage heritage places and structures in terms of the recommendations of municipal heritage studies.	• Maintain and utilise municipal and intergovernmental evaluation and mapping initiatives to inform land-use decision-making supportive of cultural integrity and secure historic places and structures. • Actively engage—continuously—with adjoining municipalities and the provincial government to ensure that the integrity of SM's heritage is maintained (specifically regarding land use management in adjoining municipal areas).
3.	Direct significant growth or new development in SM to areas: • Not identified as having the most critical natural or cultural significance. • Where the most opportunity exists in existing infrastructure investment, whether reconfigured, augmented, or expanded.	• Prioritise the targeted settlements on the Baden-Powell-Adam Tas-R304 corridor for growth / new development. • Over the SDF period, focus on Stellenbosch town and Klapmuts to accommodate significant new growth.	• Align the policy and planning of all municipal services to support accommodating significant growth and new development as proposed in specific areas. • Progressively utilise the municipality's significant asset of land as a resource to direct major growth or new development to areas not identified as of the most critical natural or cultural significance. • Allocate municipal funds for land acquisition in areas identified as most suitable for growth or new development (specifically for development as lower-income housing).	• Together with the WCG, undertake inter-service investigations to determine the exact location, size, nature, and form of new settlement areas to accommodate new growth. • Develop specific framework planning, land use management, infrastructure, financial, and urban design provisions, and directives to ensure the optimal development of identified settlement areas to accommodate new growth.
4.	Clarify and respect the different roles and potentials of settlements in SM and maintain the identity of each.	• Ensure that each settlement – large and small – remains a distinct entity, surrounded by natural open space and agricultural land. • Maintain a clear hierarchy of settlements that (in general terms) focuses on new growth and development in larger settlements to: – Minimise associated impacts on the environment, agricultural land, and natural resources. – Maximise livelihood opportunities by building on the	• Align the policy and planning of all municipal services to support the proposed settlement hierarchy and development / management approach. • Reinforce the role of Stellenbosch town as a regional service and tourism centre focused on higher-order educational, health, government, and commercial uses, as well as unique historic assets. • Reinforce the role of Klapmuts as a potential regional logistics / warehousing / manufacturing hub – with associated residential opportunity—based on its location at the intersection of	• Support the re-location of land extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town to Klapmuts. • Maintain the nature and form of small rural settlements while enabling small changes towards improving livelihood opportunities.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		availability of existing public facilities and commercial opportunities. – Maximise the sustainability of new facilities and commercial opportunities. – Enable the provision of infrastructure most efficiently and cost-effectively. – Minimise the need for inter-settlement movement. – Maximise the opportunity for and use of non-motorised and public transport. • Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily). • Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.	the N1 and regional north / south movement routes. • Maintain Franschhoek as a centre for tourism and culture with limited growth potential.	
5.	Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.	• Actively promote compact, dense, mixed-use development that reduces car dependence and enables and promotes the use of public and NMT.	• Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel and public transport solutions. • Establish measures to ensure that there is an inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and the development / management approach to be followed concerning different sections of the municipal movement network. • Work with the provincial and national governments to affirm the proposed categorisation of movement forms and associated infrastructure and management needs in Stellenbosch. • Proactively seek management of travel demand among key stakeholders in SM in such a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. • Proactively allocate resources to improve NMT in the municipal area. • Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klapmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor.	• Assess future transport development / improvements concerning the impact on the complete settlement system. • Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	• Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. • Adopt a conservative view towards the extension of existing urban edges over the SDF period. • Actively support infill development and the adaptive reuse of existing structures. • Support increased densities in new, infill, and redevelopment projects. • Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.	• Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. • Shift more transport resources to the development and operation of effective public transport services and the comprehensive provision of NMT.	• Review the delineation of restructuring zones to support the mSDF objectives. • Support development that emphasises public transport / NMT as opposed to private vehicular use. • Integrate spatial planning, transport planning (emphasis on public and NMT), and social facility planning. • Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. • Actively engage – continuously – with adjoining municipalities and provincial government to ensure that the integrity of SM's settlements as contained, and balanced communities is maintained (specifically about land use management in adjoining municipal areas).
		Support the general upgrading and transformation of existing informal settlements.	• Prioritise basic residential services for poor households, specifically in informal settlements and backyard dwellings, and a minimum level of basic services for marginalised rural settlements. • Resist existing informal settlements as the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practices are followed to maintain existing infrastructure investments and prevent greater replacement costs in the future. • Reinforce basic service delivery with good-quality urban management to support household and economic asset development.	• Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner that secures tenure).
		Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.	• The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies.	• Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
				housing in Stellenbosch town.
		Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.	• Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. • Focus on fewer but better social facilities.	• Cluster social facilities. • Locate facilities in association with public space and public and NMT routes.
		Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g., river corridors).	• Prioritise open / public space development in poor and denser neighbourhoods of the municipality. • Reinforce open / public space with good quality urban management to ensure use and safety.	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
		Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.		• Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access, which detract from the viability of established commercial and work areas and lock out small entrepreneurs.
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the SDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentive package to support private and community sector partnerships in achieving the SDF principles and proposals.	• Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communique and guidelines. • Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: • Unlocking development in Klapmuts North. • The Adam Tas Corridor (in Stellenbosch Town).	• Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. • Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. • Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. • Align municipal infrastructure and social services planning to support development in catalytic areas. • Use municipal and government-owned land assets to support development in catalytic areas.	• Ensure that catalytic areas are developed as inclusive, appropriately serviced communities, negotiable through NMT, and exhibit a positive relationship with surrounding nature and agricultural land. • Prepare land use management measures to enable development in catalytic areas. • Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.



4.7 Catalytic Initiatives

Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone (20 October 2024)

Large industrial spaces, including land that was formerly home to Cape Sawmills and Distell facilities, make up the most strategically located land in Stellenbosch town. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces, at scale, can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor, which includes the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the disused Cape Sawmills site to the west of Kayamandi and Cloetesville along the northern part of this corridor.

Figure 24: Adam Tas Corridor Local Areas SDF (October 2022)

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier / severance effect of the R44 and the railway line. Much of the area was historically used for light industrial and manufacturing purposes. It includes the disused Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, the Bergkelder complex, the Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis and high density and should favour non-motorised ("NMT") access to

the centre of Stellenbosch Town. It is estimated that the Adam Tas Corridor, through a preliminary development conceptual framework, will produce approximately 3 million square metres of bulk within a 293-hectare area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement), as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling, and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogeneous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift the new development focus to the west of town, with the Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- Investigating options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on NMT;
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, while also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character, and activity (as repurpose offers the opportunity for a great variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment, in terms of the concept, offers the opportunity to:

- Re-imagine the future use of the land encompassed in the ATC;
- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift new development focus to the west of town, with Die Braak and Rhenish complexes forming the centre and seam between the new west and east of Stellenbosch town;
- Investigate options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on non-motorised transport; and
- Accommodate uses that meet urgent needs, specifically higher-density housing and university expansion, as well as assist in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing businesses can gradually relocate to the north, closer to the N1 logistics corridor (as Distell has planned for their operations).

A Local Spatial Development Framework ("LSDF") for the Adam Tas Corridor, as well as comprehensive development guidelines, was formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3–20 years. This LSDF includes an implementation framework that will guide the following:

- Most appropriate land-use strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling interventions.

Following the implementation framework, the overlay zone for the Adam Tas Corridor has been approved and gazetted (2024) and has been included as a local area overlay zone in the Stellenbosch Municipality Zoning Scheme Bylaw, 2024 (04 October 2024). The purpose of the overlay zone is to award the zoning rights envisaged by the Adam Tas Corridor LASDF to the individual land portions, together with the conditions applicable to each property, for the landowner to take up these rights. This initiative was awarded the WCG Service Excellence Awards 2024 in the category "Ease of Doing Business" on the 19th of April 2024.

Institutional arrangements are critical, which include all spheres of government, private stakeholder involvement, and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts. The landowners collectively and the municipality entered into a Memorandum of Understanding (MOU) confirming the spatial vision and implementation of the ATC LASDF. The Council approved the MOU in August 2022.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LASDF and development guidelines, a project facilitation unit (PFU) needs to be established. The purpose of the PFU is to coordinate, plan, and assist with the implementation of development along the Adam Tas Corridor. The purpose of the PFU is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas Corridor. The establishment of the unit is currently being investigated and was earmarked to be set up by 30 June 2024, however, challenges arose, and the set-up of the PFU is still ongoing. The Western Cape Economic Development Partnership (EDP) was appointed by the Council to assist the municipality in setting up the PFU and Steering Committee.

Considering the capital infrastructure investment requirements for the ATC, the municipality and the landowners collectively agreed on the phasing of the ATC over the next 10 years. Over the short term (1-5 years), the first phase of the ATC was agreed to be precincts 2–6, including a portion of precinct 10, whilst the planning and infrastructure demand quantification for the rest of the precincts (including the remaining extent of precinct 10) are considered in the CEF's capital expenditure programme (2023) and the capital infrastructure investment portfolio. The amendment of the CEF as part of the MSDF, 2023, and the reviews enable the municipality to strategically plan based on an understanding of the catalytic projects that are necessary to meet the needs of the municipality, including ensuring the allocation of resources is financially sustainable, whilst also achieving the goals of the municipality.

4.7.1 Development of Klapmuts

The Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF) contains very specific policy directives related to Klapmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

- Using infrastructure assets (e.g., key movement routes) as "drivers" of economic development and job creation;

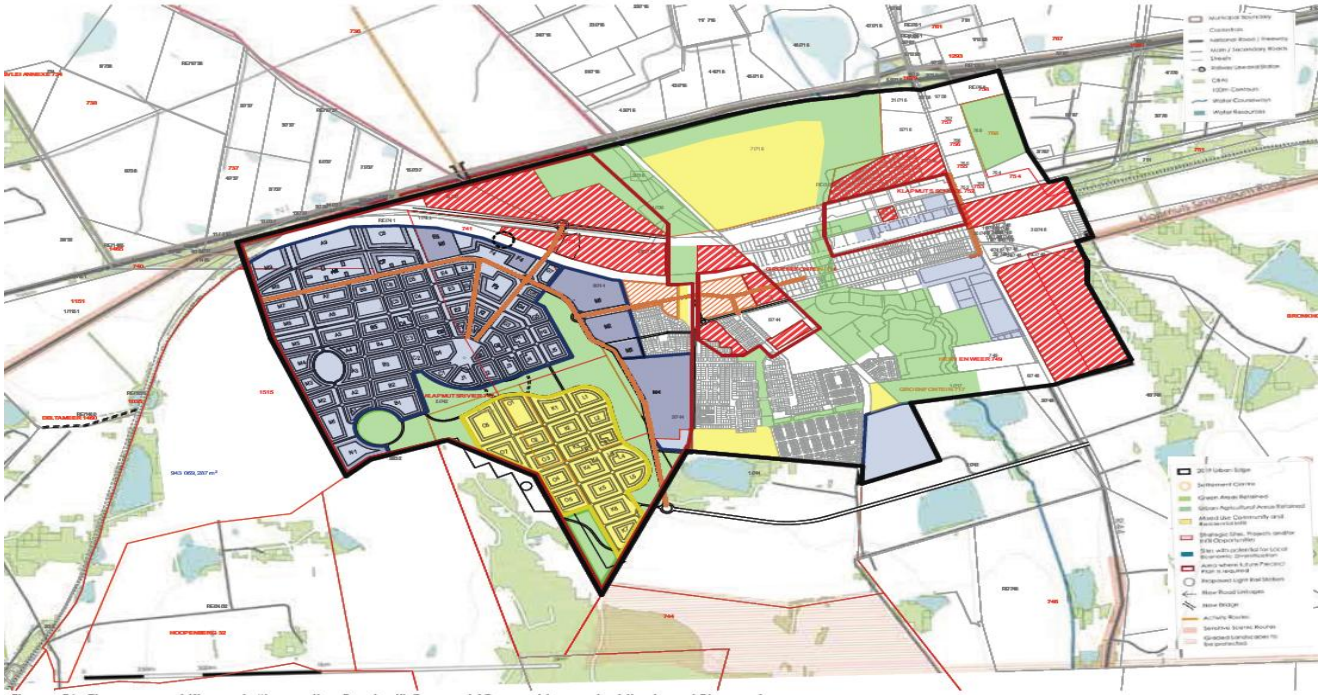
- Recognition that existing infrastructure in the area (i.e., N1, R101, R44, and the Paarl-Bellville railway line and station) dictates the location of certain transport, modal change, or break-of-bulk land uses;
- Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a "consolidated platform for the export of processed agri-food products (e.g., inland packaging and containerisation port)" and "an inter-municipal growth management priority";
- The consolidation of and support for existing and emerging regional economic nodes, as they offer the best prospects to generate jobs and stimulate innovation;
- The clustering of economic infrastructure and facilities along public transport routes;
- Maintaining valuable agricultural and natural assets; and
- Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM, as it is located on the N1 transport corridor, which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

The MSDF targets significant new mixed-use development, new residential development, and the associated access and mobility infrastructure provisions to reinforce the significant new regional economic role of Klapmuts as identified by the Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF). The GCMRSIF and the MSDF reinforce Klapmuts, as a potential regional logistics/warehousing / manufacturing hub—with associated residential opportunities – based on its location at the intersection of the N1 and regional north/south movement routes. From a contextual perspective, it is also important to note that to unlock the development potential of the ATC, the municipality must actively support the relocation of land for extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town towards Klapmuts.

One of the catalytic initiatives identified and supported by the MSDF is the "Innovation Precinct" or "Smart City" in Klapmuts South. The proposed urban development concept by Osmond Lange Architects and Planners has been incorporated into the MSDF since 2019, and significant progress has been made in the MSDF review process.

Figure 25: Concept Development Framework



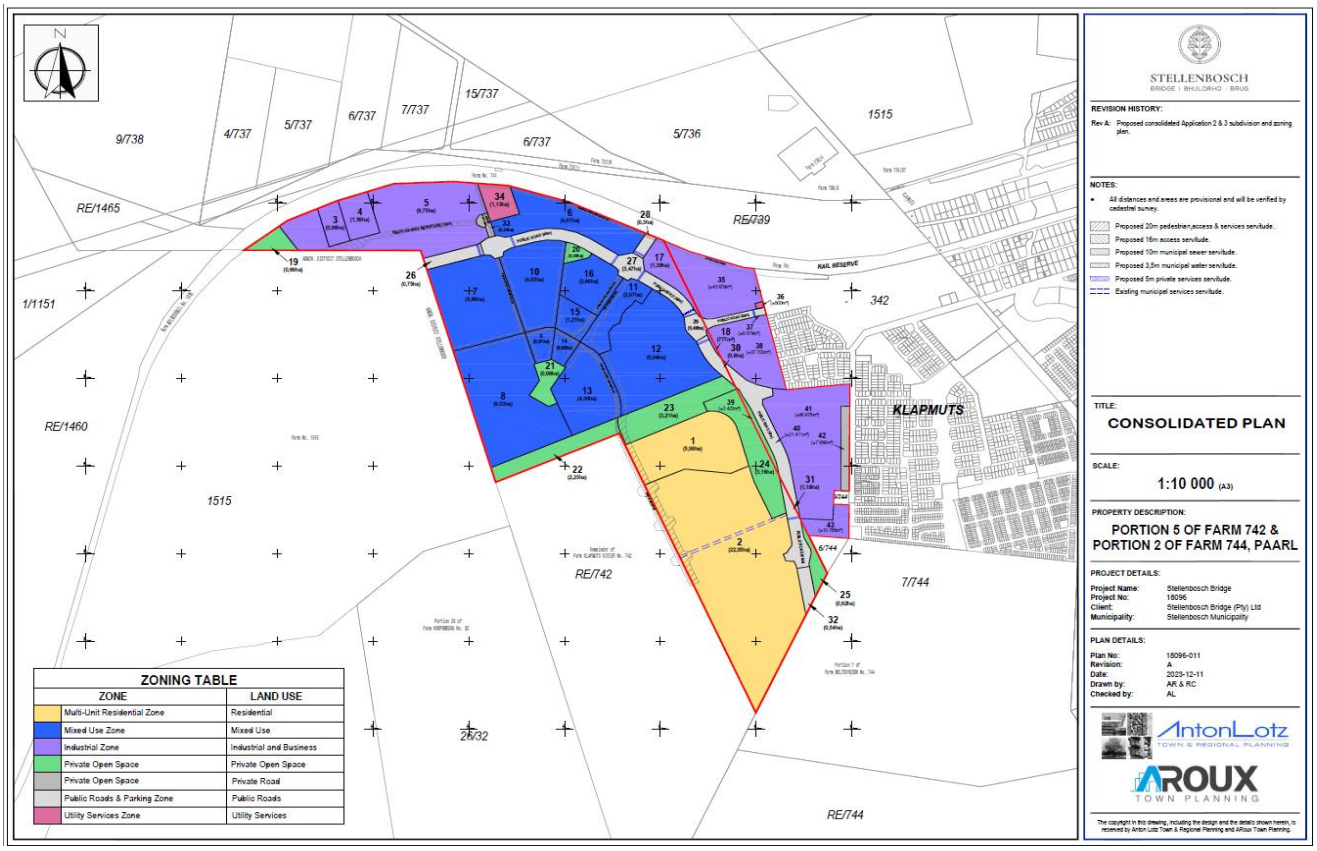


Figure 56. The proposed Klapmuts "Innovation Precinct" Concept (Osmond Lange Architects and Planners)

Based on the development framework, the following development management applications have been considered by the Directorate: Planning and Economic Development over the review period as part of the planning and implementation of the smart city catalytic initiative – now known as "The Bridge". The development rights approved by the municipality are reflected in the figure below:

Figure 26: Portion of Farm 742 and Portion of Farm 744

Phase 1 of the development has commenced, with the establishment of the industrial park, located next to the N1.

Through the land use planning process, it was highlighted that the urban edge does not fully align with the final approved development. The amendment of the urban edge is minor, as it only encompasses the inclusion of Portion 19 (0.69 ha) as indicated on the approved consolidated plan. The phasing of the development provides for sufficient time to incorporate this as part of the future amendment MSDF process.

Several inter-municipal and inter-governmental issues require specific care in managing the development of Klapmuts over the short to medium term.

- Various supporting functions across the intergovernmental spheres are required to reinforce the significant new regional economic role of Klapmuts. A critical issue related to Klapmuts is the split administration between Drakenstein Municipality (DM) and Stellenbosch Municipality (SM). One of the supporting actions considered and identified by the MSDF includes the application to the Municipal Demarcation Board (MDB) for the redetermination of the municipal boundaries in a manner where Klapmuts North (DM administration) and Klapmuts South (SM administration) fall within one municipal demarcation. In this regard, Klapmuts is functionally more related to SM; extensive investments have been made in infrastructure and social services for the community in Klapmuts by SM. Accordingly, when the municipal redetermination process commenced in 2023, the Council considered and made representations to the MDB for the inclusion of Klapmuts North into the Stellenbosch municipal area. One of the outcomes that the municipality tried to achieve with the municipal redetermination process was to ensure

integrated and coordinated planning and infrastructure delivery by all relevant stakeholders. Unfortunately, the process was unsuccessful, and accordingly, other appropriate remedies to resolve the critical intergovernmental cross-boundary issues and conflicts need to be investigated. It is also critically important to note that the DM, through the amendment of the MSDF (Drakenstein MSDF 2024/25), has further extended its urban edge adjacent to Klapmuts with 1600 ha of greenfield development for the purpose of extensive new developments. Substantial infrastructure investments will be required as the area currently lacks bulk infrastructure services;

- The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road, and a possible NMT crossing over the N1, linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunities enabled north of the N1; and
- The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

In addition to the municipal cross-boundary development planning earmarked for Klapmuts, it is important to note that various intergovernmental joint planning is currently being undertaken through the Intergovernmental Steering Committee (ISC) of the GCMRSIF. Due to the increased urban development demand for the N1 from the City of Cape Town, Stellenbosch Municipality, and Drakenstein Municipality, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP)—custodian of the regional spatial implementation framework—has, in collaboration with the National Department of Agriculture, Land Reform and Rural Development (DALR&RD), initiated discussions on funding a regional spatial development framework in line with one of the key actions contained in the Greater Cape Town Region National Spatial Action Area (GCTR NSAA). The parties concerned have agreed that, due to the existence of the GCMRSIF, the funding allocated should further involve technical work around an infrastructure analysis, including localised inter-municipal scenario planning exercises for the N1 corridor. The completion of this study is extremely important, as the urgent need to coordinate an agreed long-term strategic vision, including the coordination, prioritisation, and sequencing of investments, will unlock the development potential of Klapmuts and the Cape Functional Region. The study has commenced, with participation from the municipality, and the due date for completion is planned for December 2026.

4.7.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor, to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock—possibly in the form of a "tram" system—has been suggested, offering the advantage of safe at-grade crossing of the rail line and other modes of transport, in turn, enabling "lighter" infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus of significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form, while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden-Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and

integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups and will, in all probability, reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.8 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management, organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Directorate: Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, annual reports, annual IDP reviews, future municipal IDPs, and so on;
- The annual review of the SDF is part of the IDP review process;
- The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- The extent to which the main argument and strategies of the SDF inform land use management decision-making;
- Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- The mutual responsiveness of the SDF and national, provincial, and regional plans, programmes, and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above the institutional arrangements in place, it appears that two aspects require specific focus in support of the SDF.

4.8.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the SDF, SM (and other adjoining municipalities) appear to be experiencing increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for "both sides" of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

4.8.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- The municipal human and financial resource base is simply too small to achieve the vision of the SDF or implement associated strategies and plans;
- Many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives;
- It is increasingly evident that individual landowners are finding it difficult to develop—to make the most of what they have—individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- The municipality's focus is often – and understandably so – on the "immediate", or shorter-term challenges. Much of what is needed to implement the SDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

4.8.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden-Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical preconditions for significant development include:

- The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- Understanding to what extent settlements can provide local employment and, in this way, minimise the need for transport to other settlements.

4.8.4 Other Local Planning Initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the SDF in more detail. The position and function of settlements in the SM settlement hierarchy should determine the priority for LSDFs. The municipality aims to procure the services of a service provider to compile a series of local spatial development frameworks over the next three years for ten of the priority nodes (both urban and rural). The aim is to compile localised planning and development outcomes that need to address the following:

- Spatial and design frameworks, plans, and strategies;
- Social service delivery plans and interventions; and
- Innovative and interactive engagement and public participation processes.

These localised spatial planning initiatives require public and private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on. Based on consultations with the Division: Development Management and upon review of the land use application being submitted, the current top priority LSDF is identified for Koelenhof, followed by the Dwars River area.

In addition to the aforementioned, a number of precinct plans for specific areas as identified in the MSDF have been completed and are in the process of being finalised by initiatives driven by the municipality and private property owners. The Rhenish Complex and Surroundings Precinct Plan was initiated by the municipality and adopted by the Council on 29 November 2023. The precinct plan includes an urban design framework that aims to guide the future utilisation, preservation, and development of the study area with a specific view to unlocking the potential of the area, which plays an important role as a key site of cultural and heritage significance.

The Franschhoek Development Framework, contained in the MSDF, further identified an area in Groendal for "strategic sites, projects, and / or infill opportunities", and the development of a precinct plan. A spatial and urban design framework for a specific area within the strategic site has been commissioned by the landowners of Klein La Provence. In the drafting of the proposed spatial and urban design framework, the municipality required that the precinct plan consider the relationship of the site to its broader context and setting while also being replicable across similar contexts. The precinct plan is currently being finalised and will be made public in due course.

4.8.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning—public and private—with the SDF, it is proposed that a "checklist" of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared "culture" could be established where key tenets of the SDF are considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist be followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues are addressed and discussed to enable decision-making in line with the SDF and broader provincial and national planning policies. If, in assessing a proposal or project, posing a question results in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the SDF review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key SDF strategies and policies, be packaged in an easy-to-use and accessible form to facilitate wide usage.

4.8.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the SDFs or implement associated strategies and plans. Also, many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives.

Even if the municipal budget were increased tenfold, or its staff resources were significantly enhanced, it would still not have the control to do what is needed to drive critical projects. The municipality's focus is often—and understandably so—on the "immediate," or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed-upon objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop and make the most of what they have, individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources—and is overburdened with varied demands in different locations—to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses on the side of the municipality to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record of achieving urban development / management objectives (e.g., Historiese Huise). Their work can be expanded to assist in meeting new challenges, in partnership with the municipality.

A formal Memorandum of Agreement exists between Stellenbosch Municipality and the Stellenbosch Heritage Foundation to host the Heritage Inventory on the GIS system and to give free public access to the system until such time as the municipality can do so. The Heritage Inventory is also being updated through a phased approach by the Department: Development Planning.

To strengthen the ability of the Directorate: Planning and Economic Development to manage development taking place within the Franschhoek and Stellenbosch historical cores and along the scenic routes in the rural landscape, the Council appointed a Conservation Advisory Committee to evaluate, consider, and make recommendations to the Directorate with respect to new developments and alterations to the existing built environment. This committee consists of registered architects and experts in the field of cultural and historic environments.

The municipality owns several significant historical properties in Stellenbosch that require proper maintenance and appropriate uses that should support and enhance the tourism sector. To assist the municipality in managing these assets, the Council is in the process of outsourcing the responsibility to maintain, manage, and lease some of the buildings to Historiese Huise of South Africa. This partnership will ensure the proper maintenance of historical landmarks and appropriate use that will ensure public access, and support for the tourism sector will be obtained.

CHAPTER 5:

Performance Summary of the 5th Generation IDP 2022 – 2027

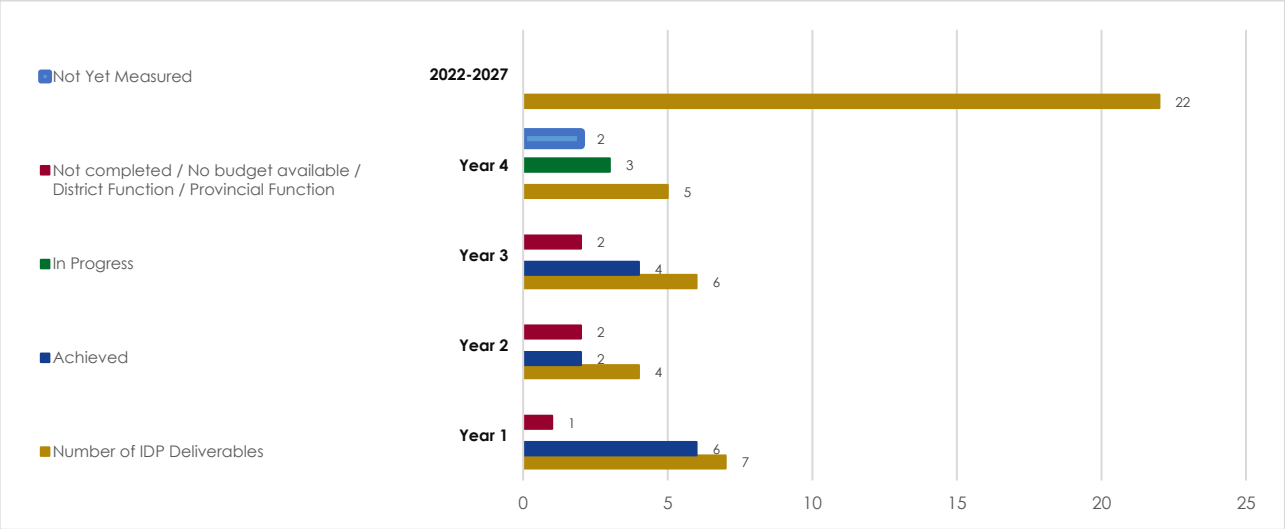
5.1 Introduction

The performance reporting on the IDP deliverables for the period 2022 – 2027 of the 5th Generation IDP 2022 – 2027 encompasses the cycle of 01 July 2022 to 30 June 2027.

The reporting focuses on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio, and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were reviewed in January 2026 in consultation with all internal departments to ensure effective planning and implementation for the 2026/27 and the outer financial years, as well as reflecting on the performance for the 2024/25 and 2025/26 financial years.

The overall assessment of actual performance against targets set for the IDP deliverables, as documented in the various sections of the IDP document, is illustrated below:

5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027



Twenty - two (22) IDP deliverables are linked to the Municipal Manager's Priorities across directorates and are measured for the period 2022 – 2027. In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, while 1 (14.29 per cent) was not achieved. In Year 2 (2023/24), 2 (50 per cent) of the four IDP deliverables were completed, and 2 (50 per cent) were not achieved.

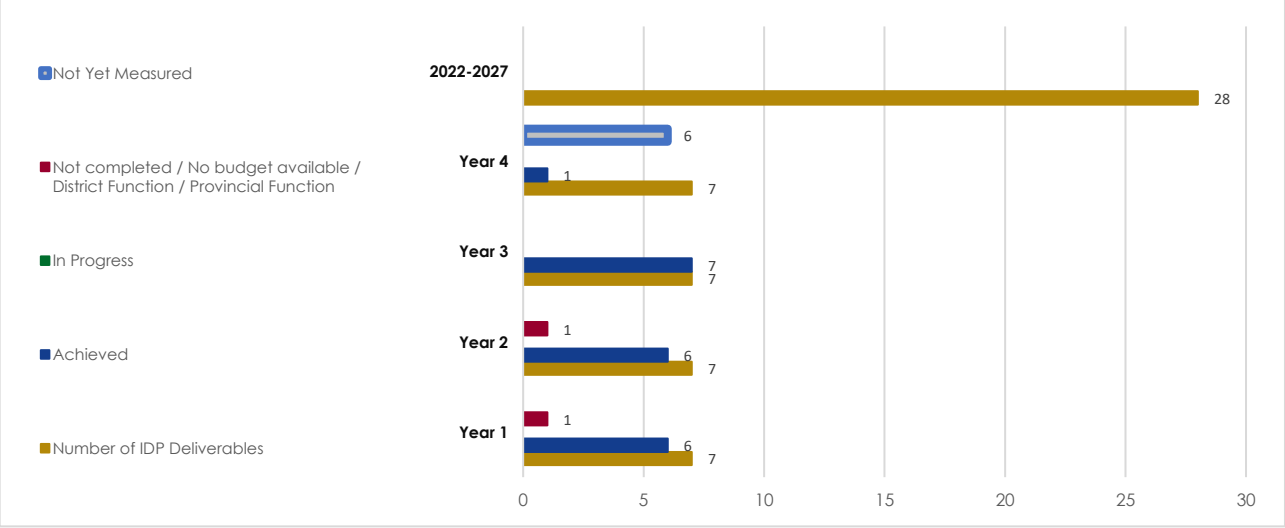
In Year 3 (2024/25), a total of six (6) IDP deliverables were recorded, of which 4 (66.67 per cent) were achieved, and 2 (33.33 per cent) were not achieved.

In addition, for Year 4 (2025/26), five (5) IDP deliverables were planned for the 2025/26 financial year. To date, 3 (60 per cent) are in progress for implementation to be reported by 30 June 2026, and 2 (40 per cent) have not yet been measured.

The overall performance against the 22 IDP deliverables linked to the Municipal Manager's Priorities reflects steady implementation progress over the five – year cycle, with the majority of targets achieved each financial year, subject to the implementation of IDP deliverables for Year 4 for the current reporting timeframe of 2025/26.

Graph 12: Number of Municipal Manager Priorities achieved for 2022 – 2027

5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027



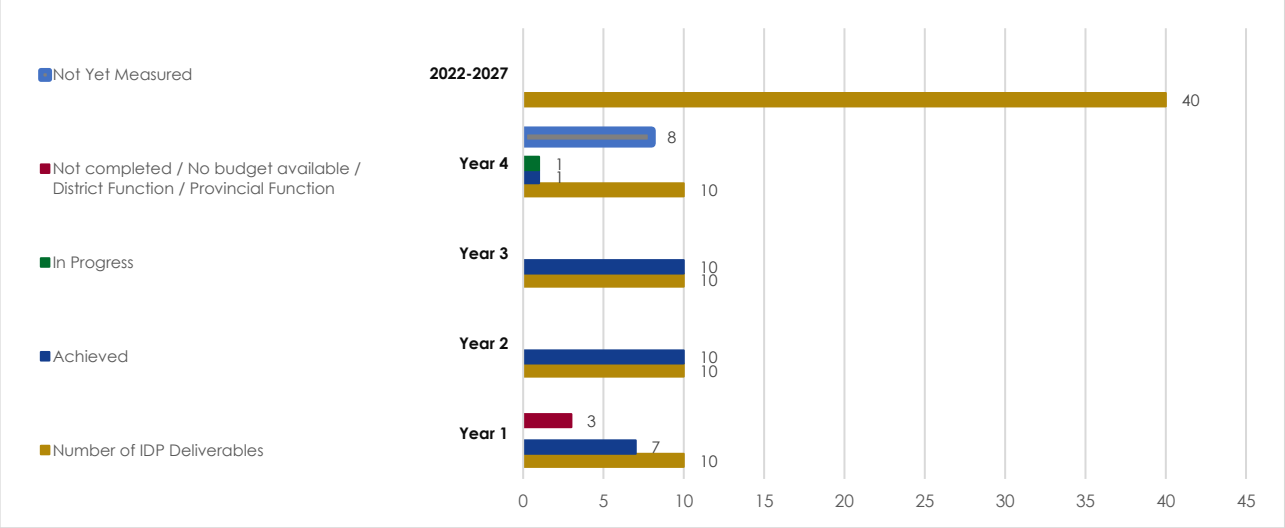
Executive Mayoral Outcome 1: Clean, accountable, and responsive local government has a total of 28 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not met. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not achieved.

In Year 3 (2024/25), all 7 (100%) of the IDP deliverables have been met. In Year 4, seven (7) IDP deliverables have been set for the 2025/26 financial year, with 1 (14.29 per cent) achieved and 6 (85.71 per cent) to be reported on by 30 June 2026.

A consistently high level of implementation performance is reflected over the reporting period, with 85.71 per cent of targets met in Year 1 and Year 2 and 100 per cent achievement in Year 3.

Graph 13: Executive Mayoral Outcome 1: Implementation Progress 2022 – 2027

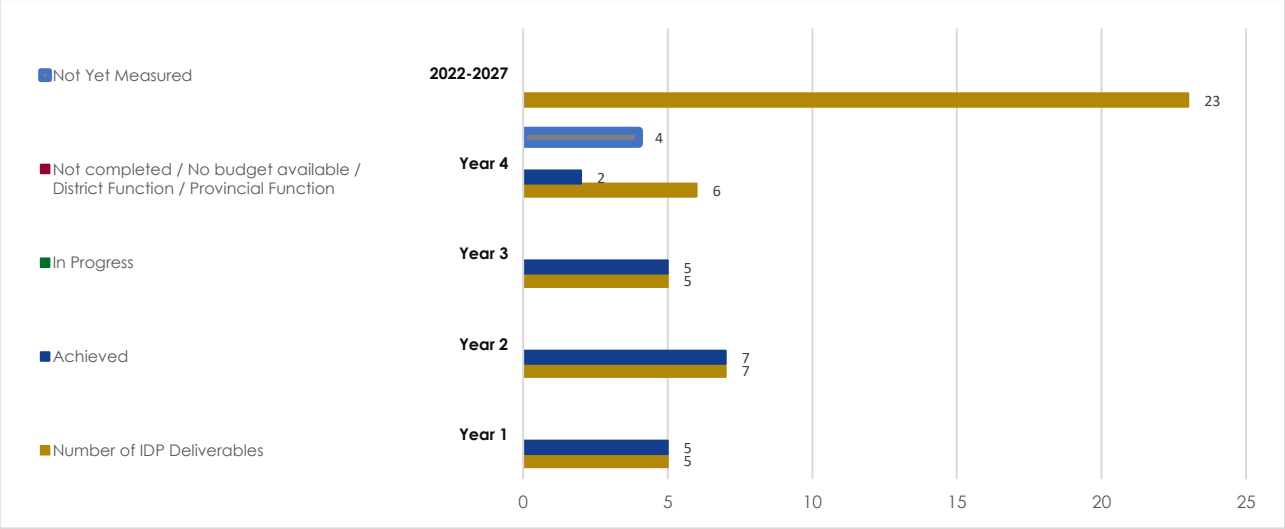


Executive Mayoral Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area has a total of 40 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (70 per cent) of the ten (10) IDP deliverables were achieved, and 3 (30 per cent) were not met. In Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the ten (10) IDP deliverables

were achieved. A total of 10 IDP deliverables were set for Year 4 (2025/26), with 1 (10 per cent) achieved, 1 (10 per cent) in progress and 8 (80 per cent) not yet measured.

The implementation of the IDP deliverables for the Mayoral Outcome 2 indicates significant improvement after Year 1, reflecting positive progress and effective implementation during the period 2022 – 2027.

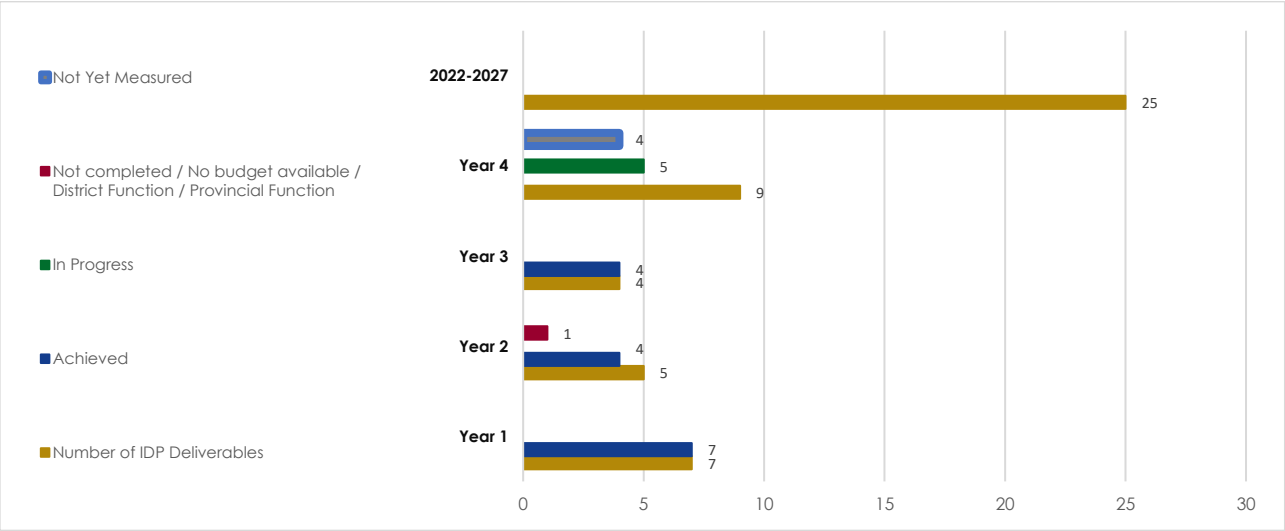


Graph 14: Executive Mayoral Outcome 2: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers, has a total of 23 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. The performance for Year 4 (2025/26) reflects that 2 (33.34 per cent) of the six (6) IDP deliverables were achieved, and 4 (66.67 per cent) have not yet been measured.

Graph 15: Executive Mayoral Outcome 3: Implementation Progress 2022 – 2027

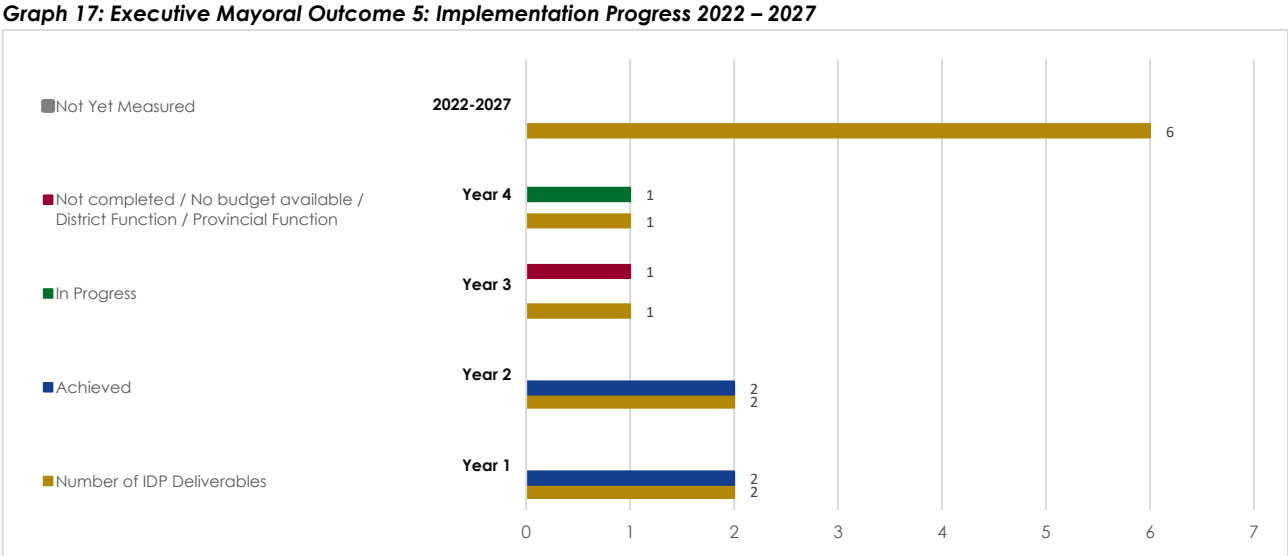


Executive Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements, and mixed-use developments) has a total of 25 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. However, in Year 2 (2023/24), 4 (80 per cent) of the five (5) IDP deliverables were achieved, and 1 (20 per cent) has not been met.

In Year 4, nine (9) IDP deliverables were recorded, with 5 (55.56 per cent) being in the implementation phase and in progress, and 4 (44.44 per cent) not measured to be reported by 30 June 2026.

Graph 16: Executive Mayoral Outcome 4: Implementation Progress 2022 – 2027

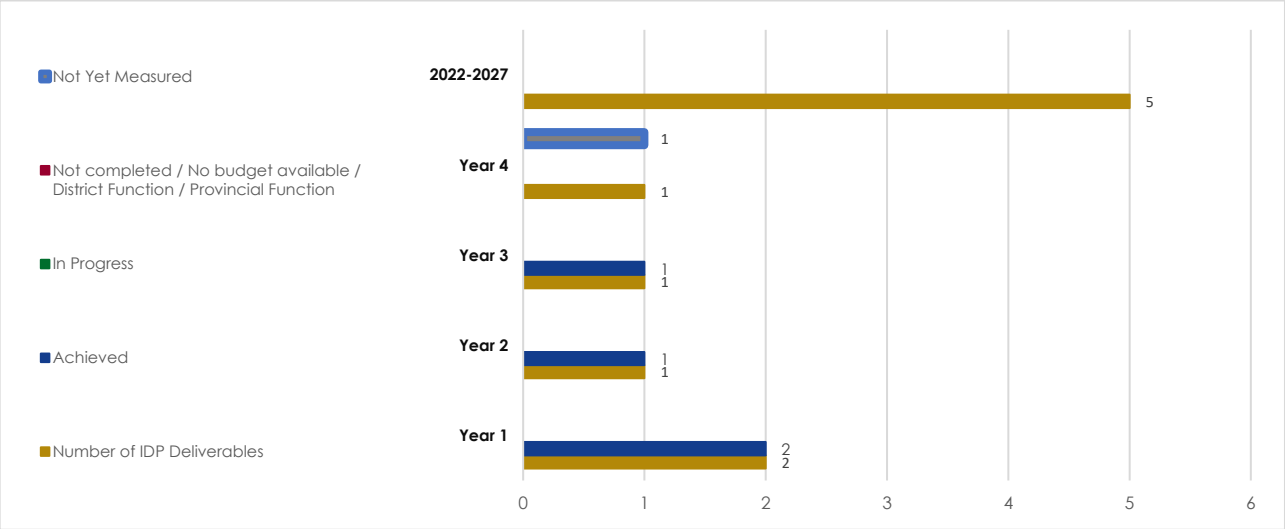


Executive Mayoral Outcome 5: The development of the Adam Tas Corridor and the town establishment of all ten dorpies across the municipality area has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved.

In Year 3 (2024/25), the one (1) IDP deliverable was not achieved. The one (1) IDP deliverable planned for Year 4 (2025/26) is in progress to be reported on by 30 June 2026.

Graph 17: Executive Mayoral Outcome 5: Implementation Progress 2022 – 2027

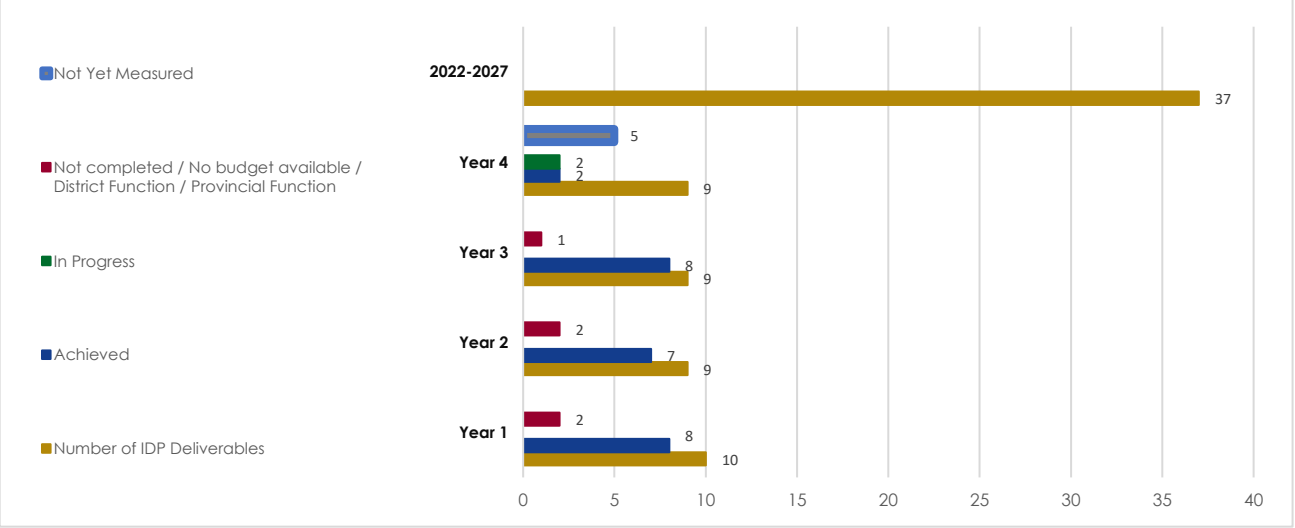


Executive Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth has a total of 5 IDP deliverables for the period 2022 – 2027.

Performance on the IDP deliverables for Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), indicates sustained achievement of 100 per cent for three consecutive financial years.

The IDP deliverable set for Year 4 (2025/26) is in progress and is to be reported on by 30 June 2026.

Graph 18: Executive Mayoral Outcome 6: Implementation Progress 2022 – 2027



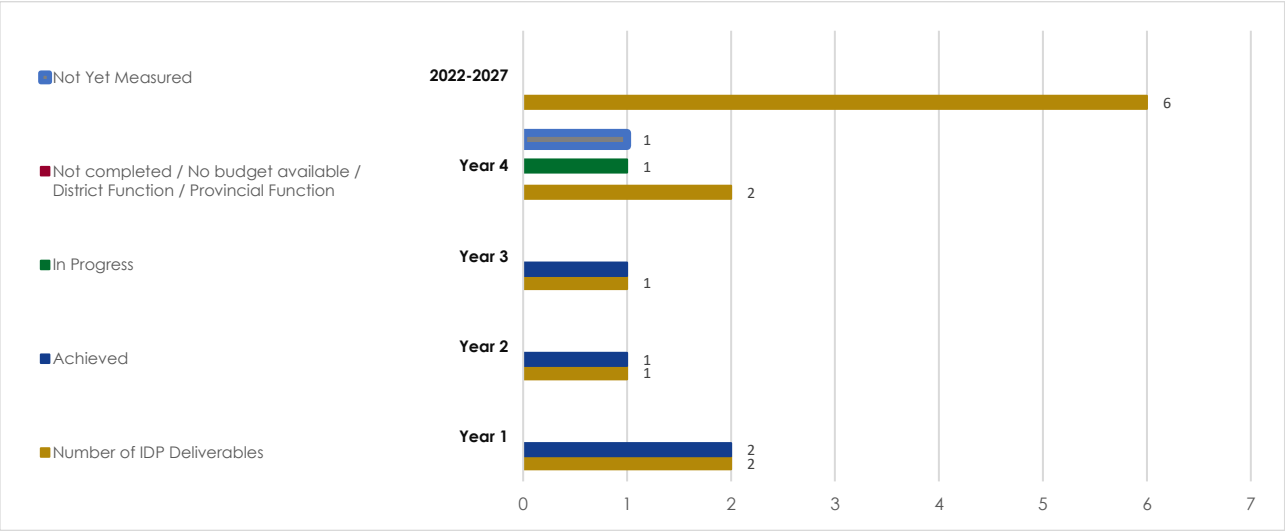
Executive Mayoral Outcome 7: To create safer environments in our communities, there are a total of 37 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 8 (80 per cent) of the ten (10) IDP deliverables were achieved, and 2 (20 per cent) were not met. In Year 2 (2023/24), 7 (77.78 per cent) of the nine (9) IDP deliverables were achieved, and 2 (22.22 per cent) were not met.

In Year 3 (2024/25), 8 (88.89 per cent) of the nine (9) IDP deliverables were achieved, and 1 (11.11 per cent) was not met. In Year 4 (2025/26), nine (9) IDP deliverables were planned for implementation, with 2 (22.22 per cent) achieved, 2 (22.22 per cent) in progress, and 5(55.56 per cent) to be reported on by 30 June 2026.

The overall performance on Mayoral Outcome 7 reflects a positive achievement of an average of 82 per cent. Although a minimum proportion of the IDP deliverables was not achieved in the first three financial years, the overall performance remained consistently high.

Graph 19: Executive Mayoral Outcome 7: Implementation Progress 2022 – 2027



Executive Mayoral Outcome 8: The expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation, has a total of 6 IDP deliverables for the period 2022 – 2027.

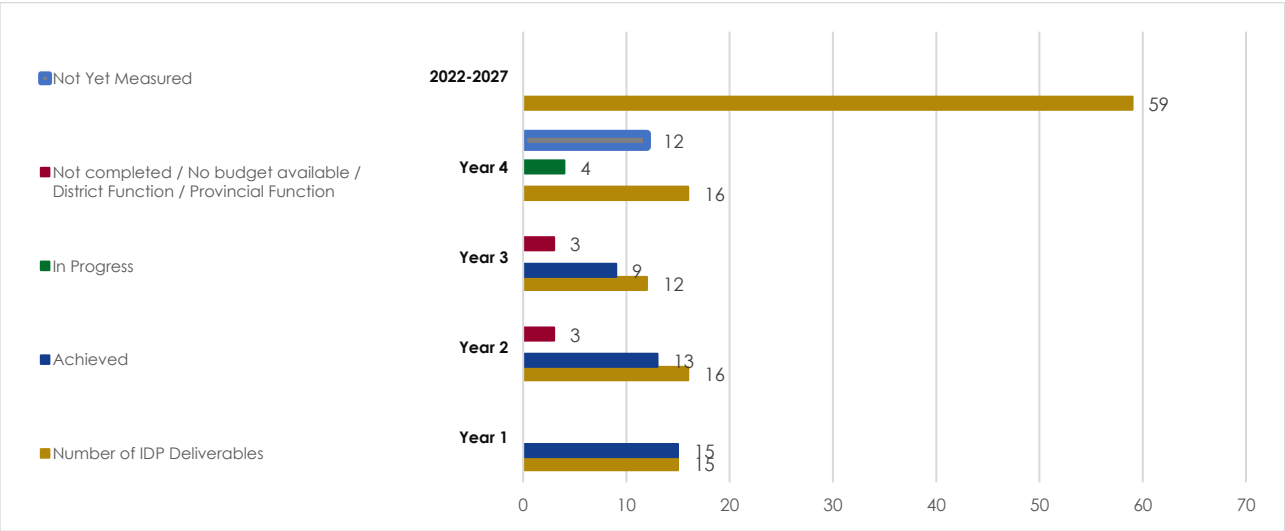
In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2024/25), 1 (50 per cent) IDP deliverable is in progress, and 1 (50 per cent) is to be reported on by 30 June 2026.

Graph 20: Executive Mayoral Outcome 8: Implementation Progress 2022 – 2027

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027

The nine (9) Mayoral Portfolios each have a 5-year plan with specific IDP deliverables and targets applicable for the period 2022 - 2027.



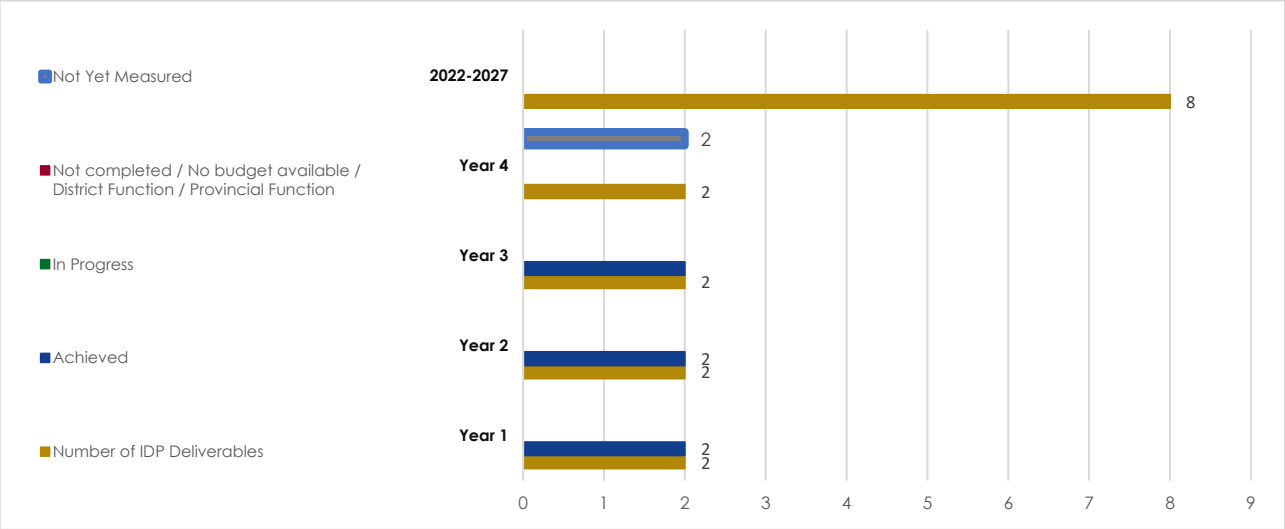
The **Mayoral Portfolio Human Settlements** has a total of 59 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 15 (100 per cent) of the deliverables were achieved. In Year 2 (2023/24), 13 (81.25 per cent) of the sixteen (16) IDP deliverables were met, and 3 (18.75 per cent) were not achieved.

In Year 3 (2024/25), 9 (75 per cent) of the 12 IDP deliverables were achieved, with 3 (25 per cent) remaining not achieved. In Year 4 (2025/26), 16 IDP deliverables are planned for the 2025/26 financial year, with 4 (25 per cent) in the implementation phase and 12 (75 per cent) not yet measured.

The overall performance against the IDP deliverables for the period 2022 – 2027, reflects a positive achievement over the period from Year 1 to Year 3, with a slight decline in Year 2. The IDP deliverables not yet measured in Year 4 will be reported on by 30 June 2026.

Graph 21: Mayoral Portfolio – Human Settlements 2022 – 2027

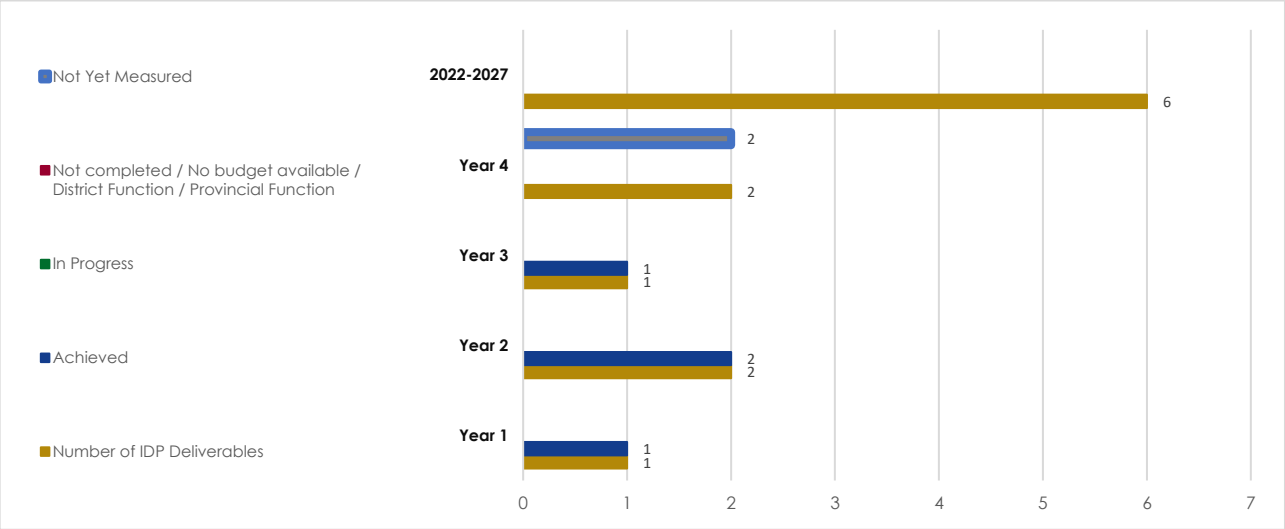


The Mayoral Portfolio Rural Management has a total of 8 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (100 per cent) of the IDP deliverables have not yet been measured and are to be reported on by 30 June 2026.

Graph 22: Mayoral Portfolio – Rural and Environmental Management

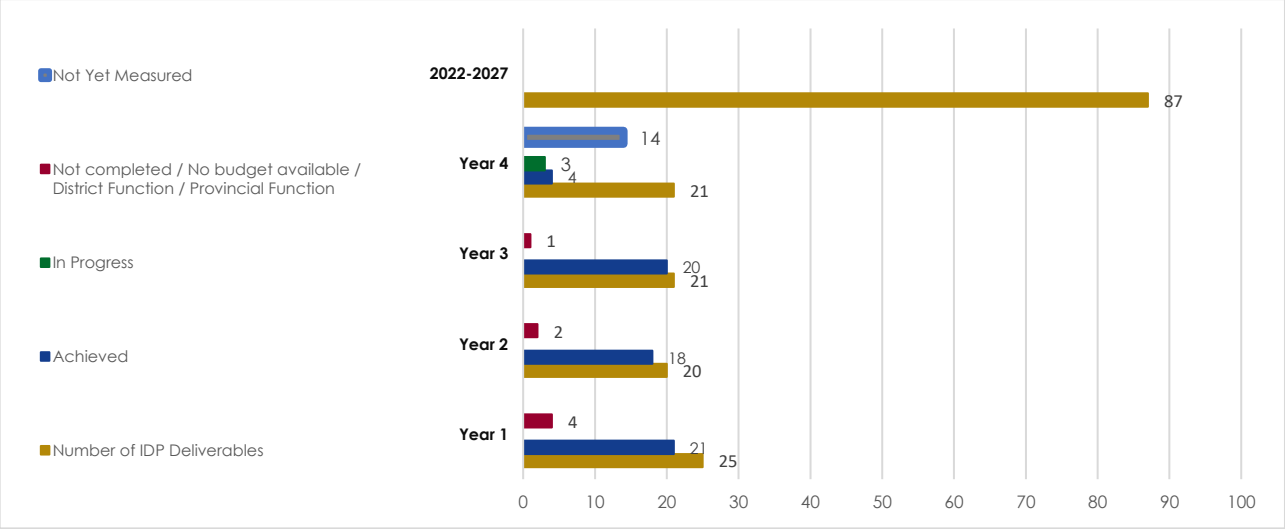


The Mayoral Portfolio Sport, Youth, and Culture has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (100 per cent) of the IDP deliverables have not yet been measured.

Graph 23: Mayoral Portfolio – Sport, Youth and Culture



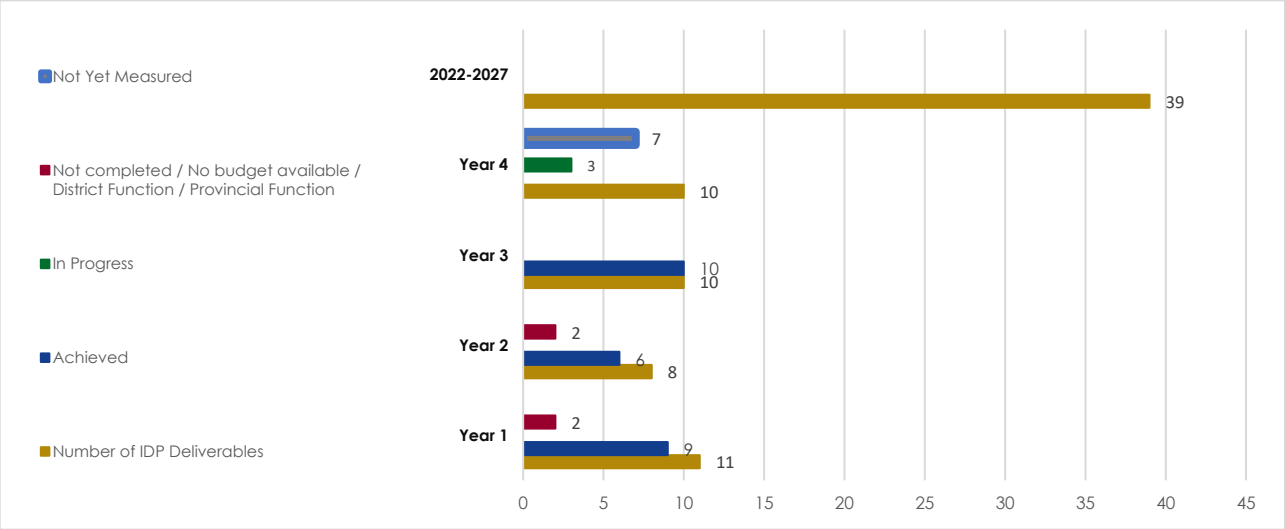
The Mayoral Portfolio Planning, LED and Tourism has a total of 87 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 21 (84 per cent) of the 25 IDP deliverables were achieved, and 4 (16 per cent) were not met. In Year 2 (2023/24), 18 (90 per cent) of the 20 IDP deliverables were achieved, and 2 (10 per cent) have not been met.

In Year 3 (2024/25), 1 (4.76 per cent) of the 21 IDP deliverables were not met, and 20 (95.24 per cent) have been achieved. Of the 21 IDP deliverables planned for Year 4 (2025/26), 4 (19.05 per cent) have been achieved, 3 (14.29 per cent) are in progress, and 14 (66.66 per cent) are not yet measured.

The overall performance indicates consistent improvement in the implementation and achievement of the IDP deliverables for the period 2022 – 2027.

Graph 24: Mayoral Portfolio – Planning, LED and Tourism



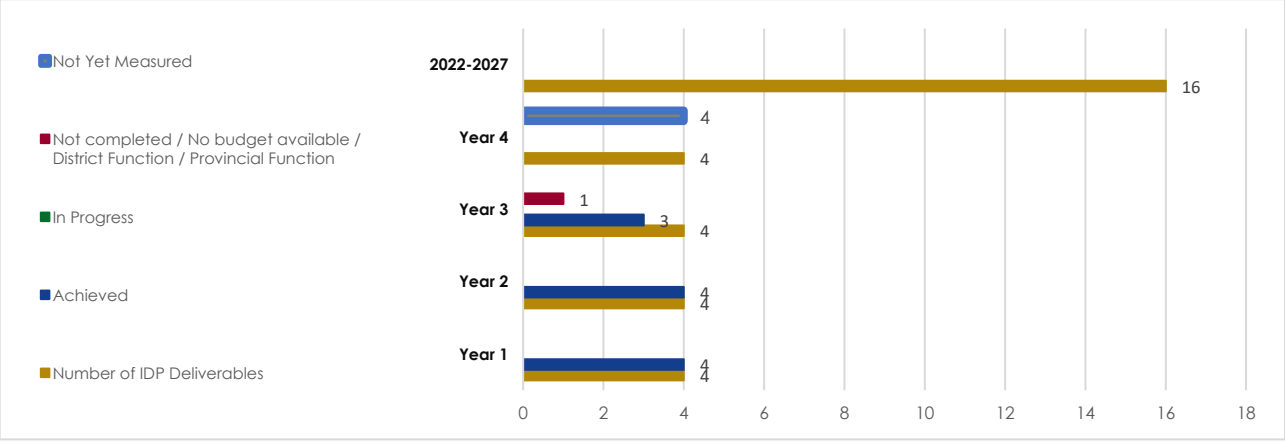
The Mayoral Portfolio Community Development and Protection Services has a total of 39 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 9 (81.82 per cent) of the 11 IDP deliverables were achieved, and 2 (18.18 per cent) were not met. In Year 2 (2023/24), 8 IDP deliverables were planned, of which 6 (75 per cent) were achieved, and 2 (25 per cent) were not met.

In Year 3 (2024/25), 10 (100 per cent) of the IDP deliverables were achieved. In Year 4 (2025/26), 10 IDP deliverables are planned for implementation, of which 3 (30 per cent) are in progress, and 7 (70 per cent) are to be reported on by 30 June 2026.

The overall performance indicates an improvement from Year 1 to Year 3, culminating in a 100 per cent achievement in Year 3.

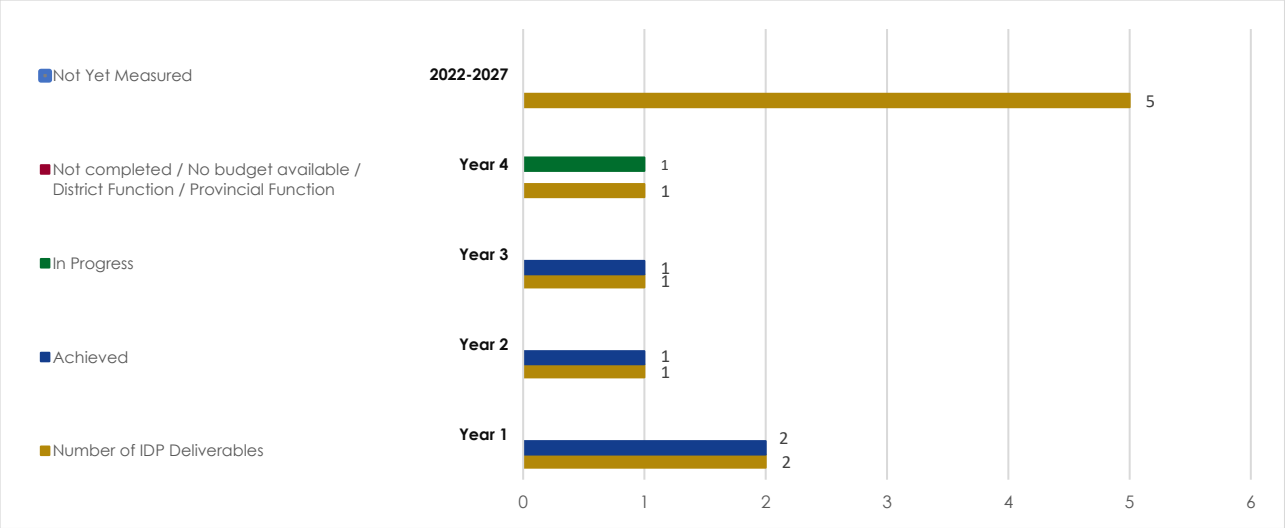
Graph 25: Mayoral Portfolio – Community Development and Protection Services



The Mayoral Portfolio Financial Services has a total of 16 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the four (4) IDP deliverables were achieved.

In Year 3 (2024/25), 3 (75 per cent) of the 4 IDP deliverables were achieved, and 1 (25 per cent) has not been met. The 4 IDP deliverables planned for the 2025/26 financial year are in progress and are to be reported on by 30 June 2026.

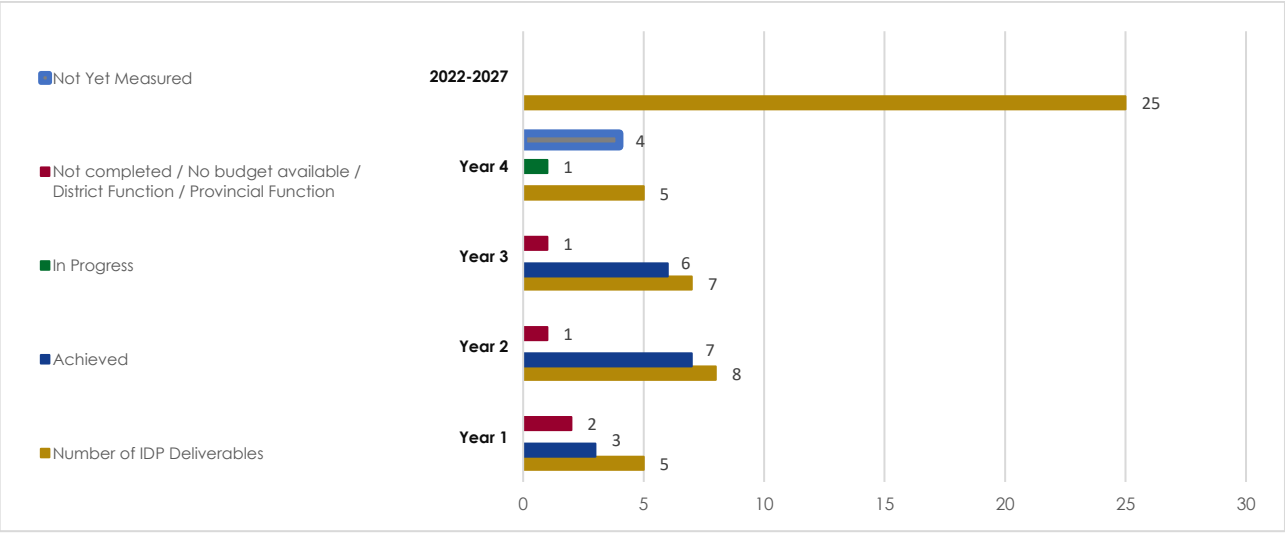


Graph 26: Mayoral Portfolio – Financial Services

The Mayoral Portfolio Corporate Services has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved. In Year 4, 100 per cent of the IDP deliverables have yet to be measured.

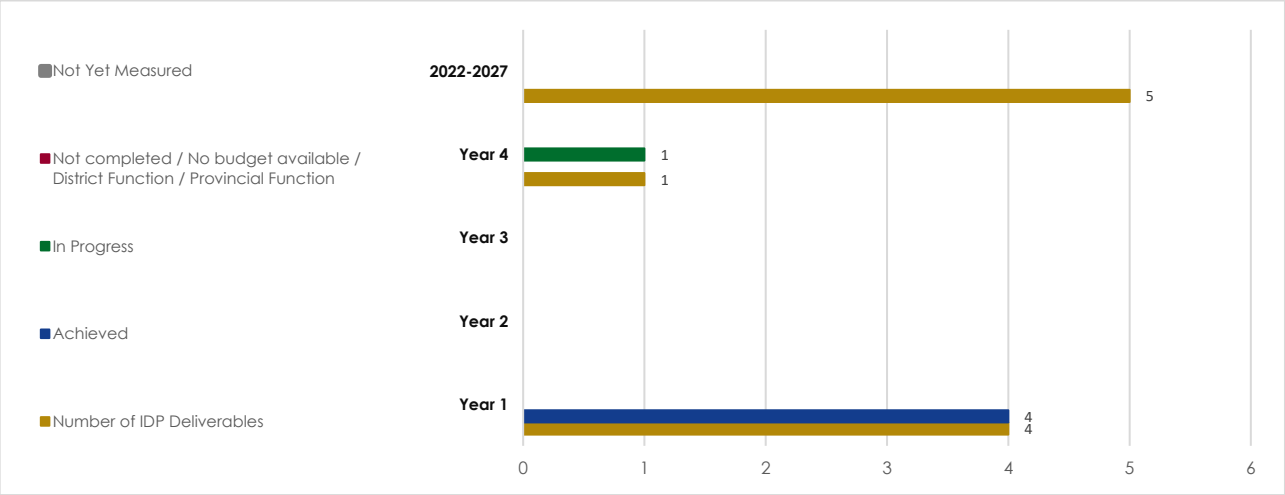
Graph 27: Mayoral Portfolio – Corporate Services



The Mayoral Portfolio Infrastructure Services has a total of 25 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 3 (60 per cent) of the five (5) IDP deliverables were achieved, and 2 (40 per cent) were not met. In Year 2 (2023/24), 7 (87.5 per cent) of the eight (8) IDP deliverables were achieved, and 1 (12.5 per cent) was not achieved.

In Year 3 (2024/25), 6 (14.29 per cent) of the 7 IDP objectives were achieved, while one (85.71) was not. The 5 IDP deliverables planned for Year 4 (2025/26) show that one (20 per cent) is in progress and 4 (80 per cent) will be reported on by June 30, 2026.

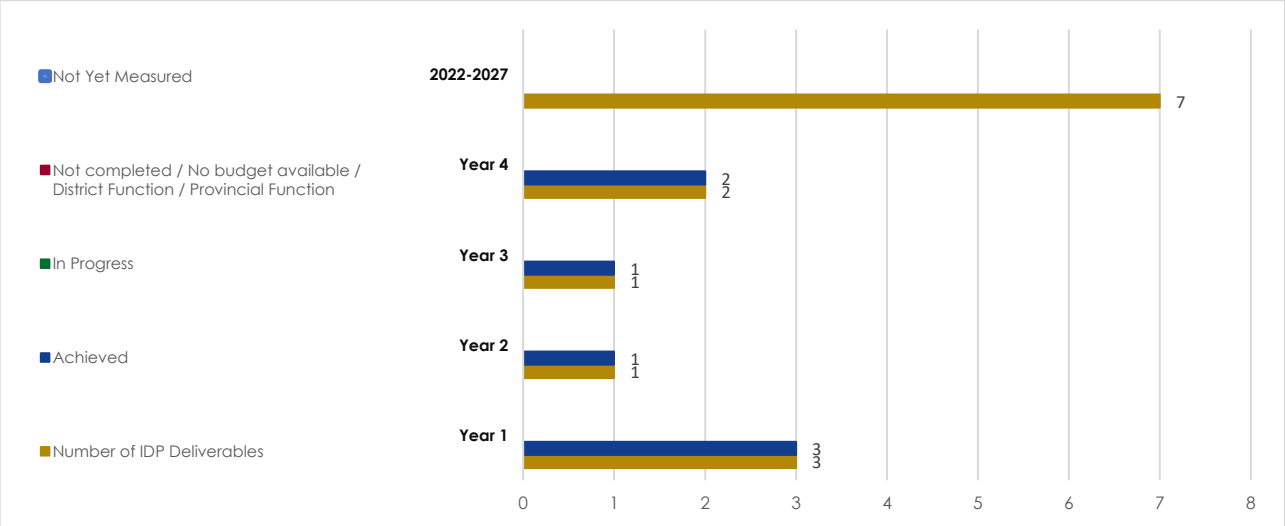


Graph 28: Mayoral Portfolio – Infrastructure Services

The Mayoral Portfolio Parks, Open Spaces and Environment has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 100 per cent of the four (4) IDP deliverables were achieved, and in Year 2 (2023/24) and Year 3 (2024/25), no IDP deliverables had to be accounted for. In Year 4 (2024/25), 1 (100 per cent) IDP deliverable is in progress.

Graph 29: Parks, Open Spaces and Environment



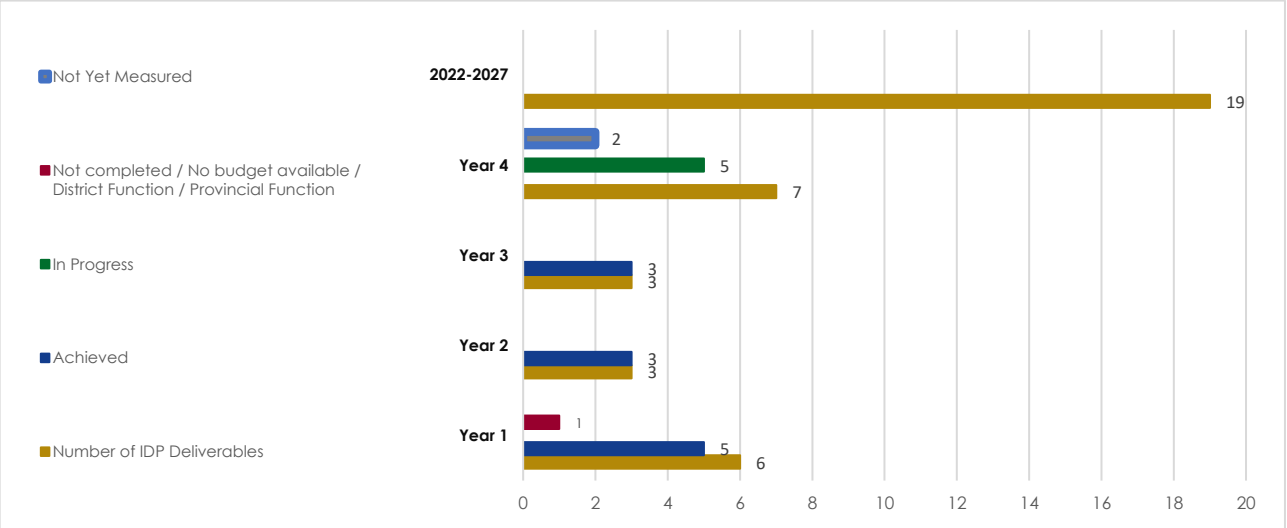
5.5 IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027

The seven (7) sector plans below each have a 5–year implementation plan with specific IDP deliverables and targets for the period 2022 - 2027.

The **Environmental Management Plan** has a total of 5 IDP deliverables for the period 2022 – 2027.

In the period 2022 – 2025, 100 per cent of the IDP deliverables were achieved.

Graph 30: Environmental Management Plan – Implementation Plan Progress 2022 – 2027

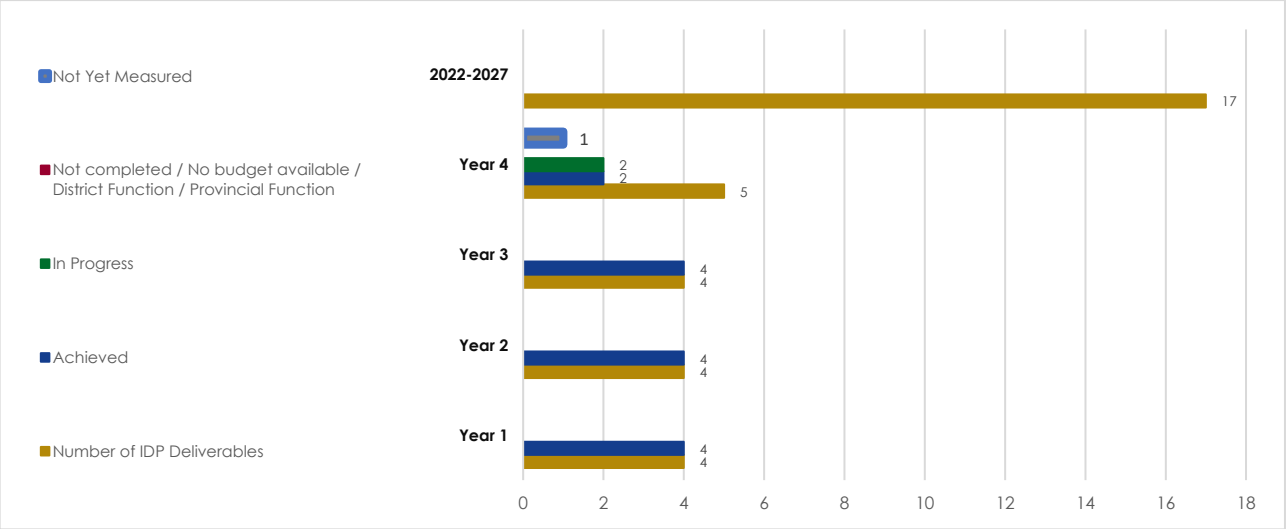


The section on **Integrated Human Settlements** that highlights priority housing projects and upgrading of informal settlements has a total of 19 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 5 (83.33 per cent) of the six (6) IDP deliverables were achieved, and 1 (16.67 per cent) was not achieved. In Year 2 (2023/24) and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 5 (71.43 per cent) of the seven (7) IDP deliverables are in progress, and 2 (28.57 per cent) will be reported on by 30 June 2026.

Graph 31: Integrated Human Settlements – Implementation Plan Progress 2022 – 2027

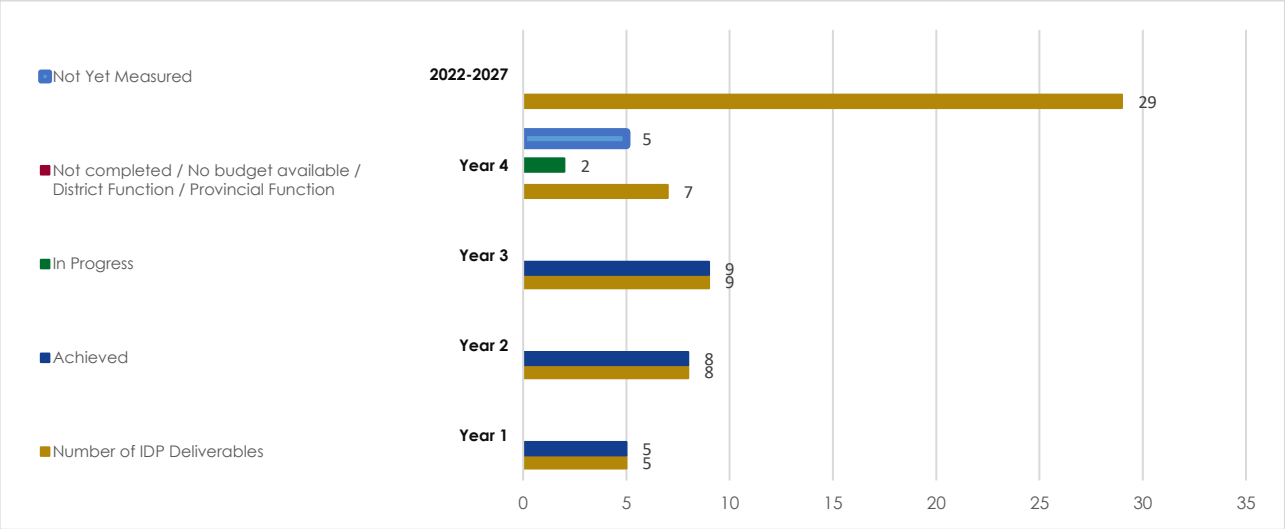


The **Comprehensive Integrated Transport Plan** has a total of 17 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/2025), 100 per cent of the IDP deliverables were achieved.

In Year 4 (2025/26), 2 (40 per cent) of the 5 IDP deliverables have been achieved, 2 (40 per cent) are in progress, and 1 (20 per cent) is to be reported on by 30 June 2026.

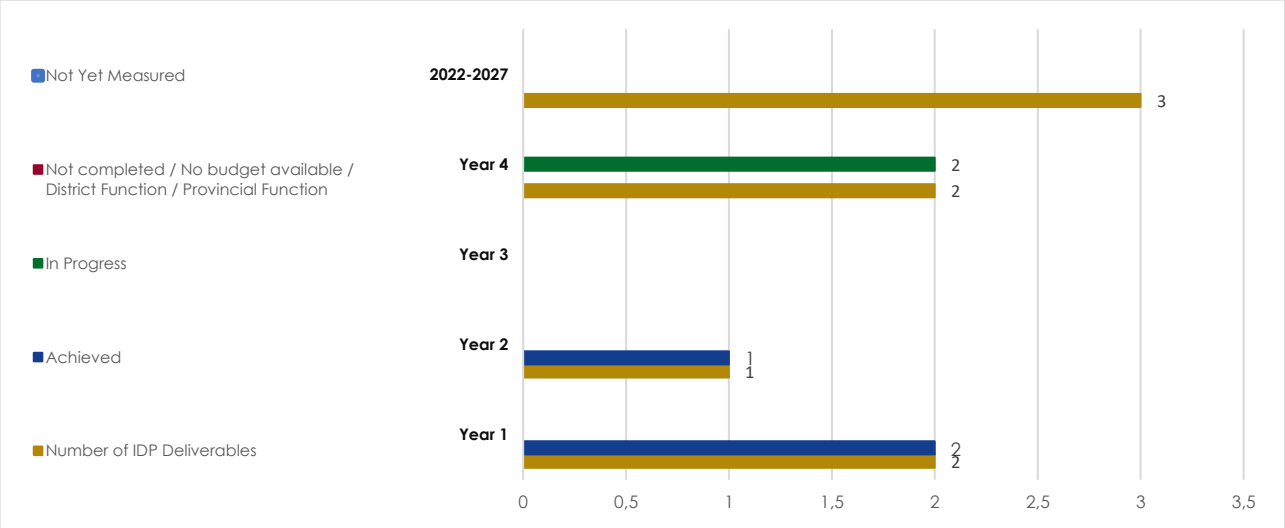
Graph 32: Comprehensive Integrated Transport Plan – Implementation Plan Progress 2022 - 2027



The **Integrated Waste Management Plan (IWMP)** has a total of 29 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

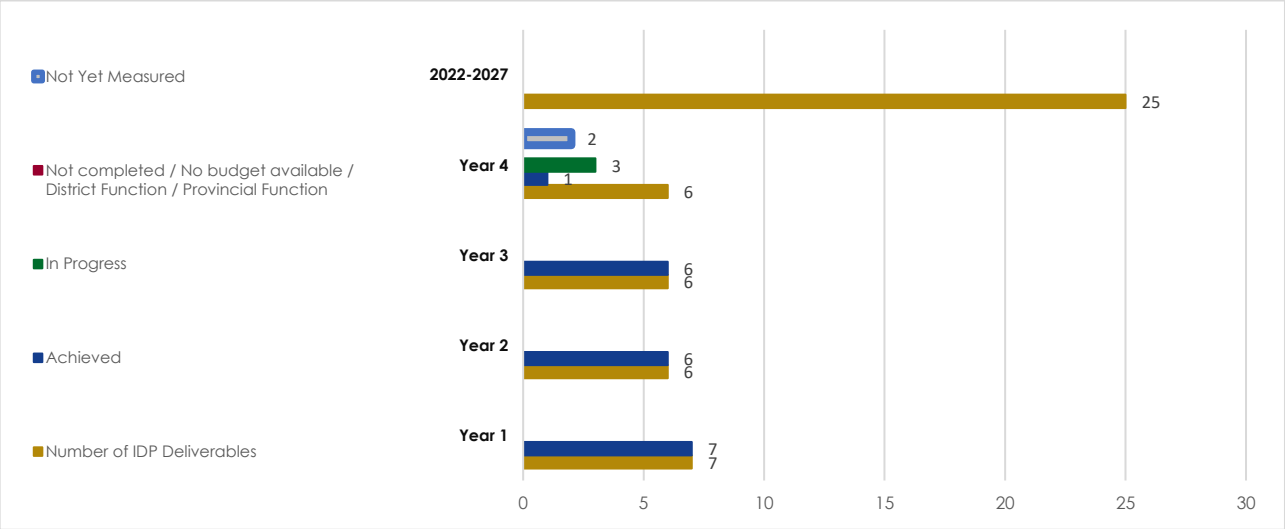
In Year 4 (2025/26), 2 (28.57 per cent) of the seven (7) IDP deliverables are in progress, and 5 (71.43 per cent) are not yet measured.



Graph 33: Integrated Waste Management Plan – Implementation Plan Progress 2022 – 2027

The **Water Services Development Plan (IWMP)** has a total of 3 IDP deliverables for the period 2022 – 2027.

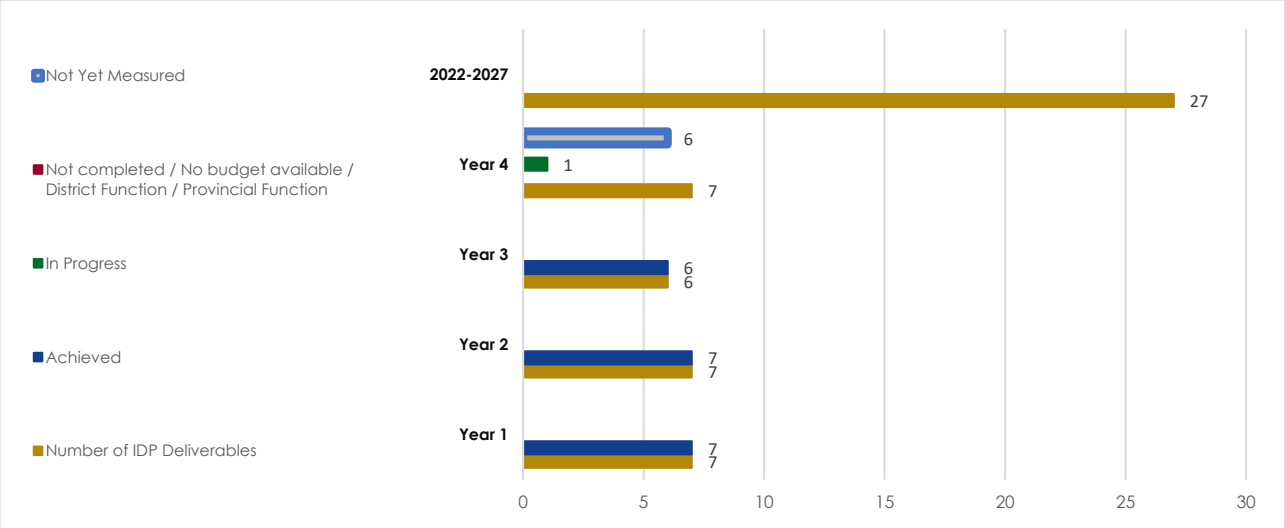
In Year 1 (2022/23) and Year 2, 100 per cent of the IDP deliverables were achieved. In Year 3 (2024/25), no IDP deliverables were planned for the IWMP. In Year 4 (2025/26), the 2 IDP deliverables planned are in progress to be completed by 30 June 2026.



Graph 34: Water Services Development Plan – Implementation Plan Progress 2022 – 2027

The **Disaster Management Plan (DMP)** has a total of 25 IDP deliverables for the period 2022 – 2027.

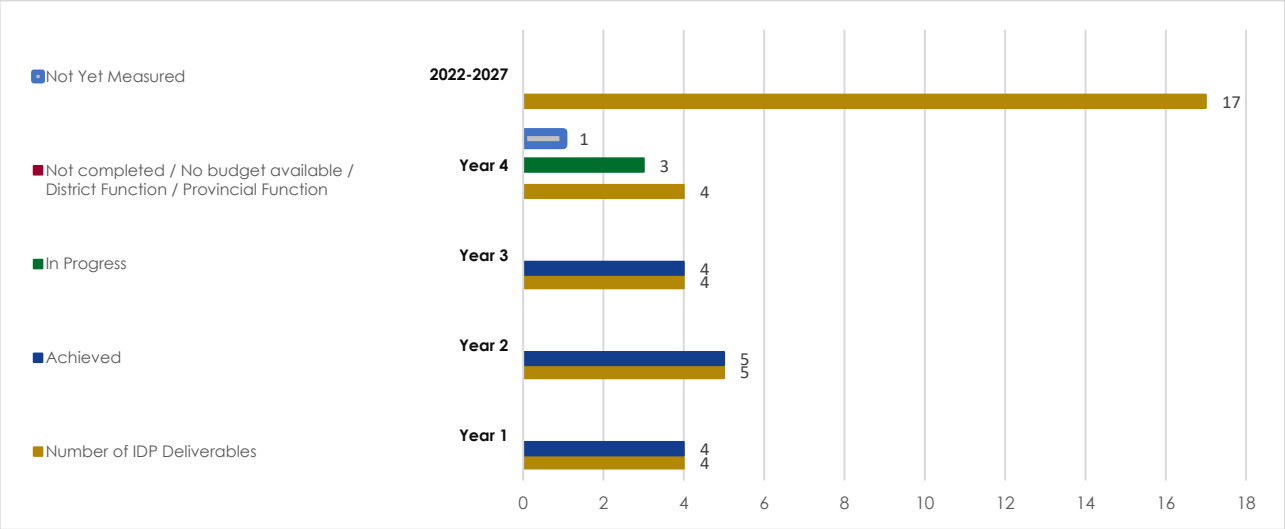
In Year 1 (2022/23), Year 2 (2023/24) and Year 3 (20245/25), 100 per cent of the IDP deliverables were achieved. In Year 4 (2024/25), 1 (16.67 per cent) of the six (6) IDP deliverables were achieved, 3 (50 per cent) are in progress, and 2 (33.33 per cent) have not yet been measured.



Graph 35: Disaster Management Plan – Implementation Plan 2022 – 2027

The **Local Economic Development Strategy** has a total of 21 IDP deliverables for the period 2022 – 2027.

The IDP deliverables planned for the period 2022 – 2025 were 100 per cent achieved. In Year 4 (2025/26), 1 (14.29 per cent) of the seven (7) IDP deliverables are currently in progress, and 6 (85.71 per cent) will be reported on by 30 June 2026.



Graph 36: Local Economic Development – Implementation Plan 2022 – 2027

The **Community Development Strategy** has a total of 17 IDP deliverables for the period 2022 – 2027.

During the period 2022 - 2025, all IDP deliverables were completed, representing a 100 per cent achievement rate. In Year 4 (2025/26), 3 (75 per cent) of the 4 IDP deliverables are in progress, and 1 (25 per cent) has not yet been measured.

Graph 37: Community Development – Implementation Plan 2022 – 2027

CHAPTER 6:

One Plan: Service delivery, budget, programmes, and projects

6.1 Introduction

The Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

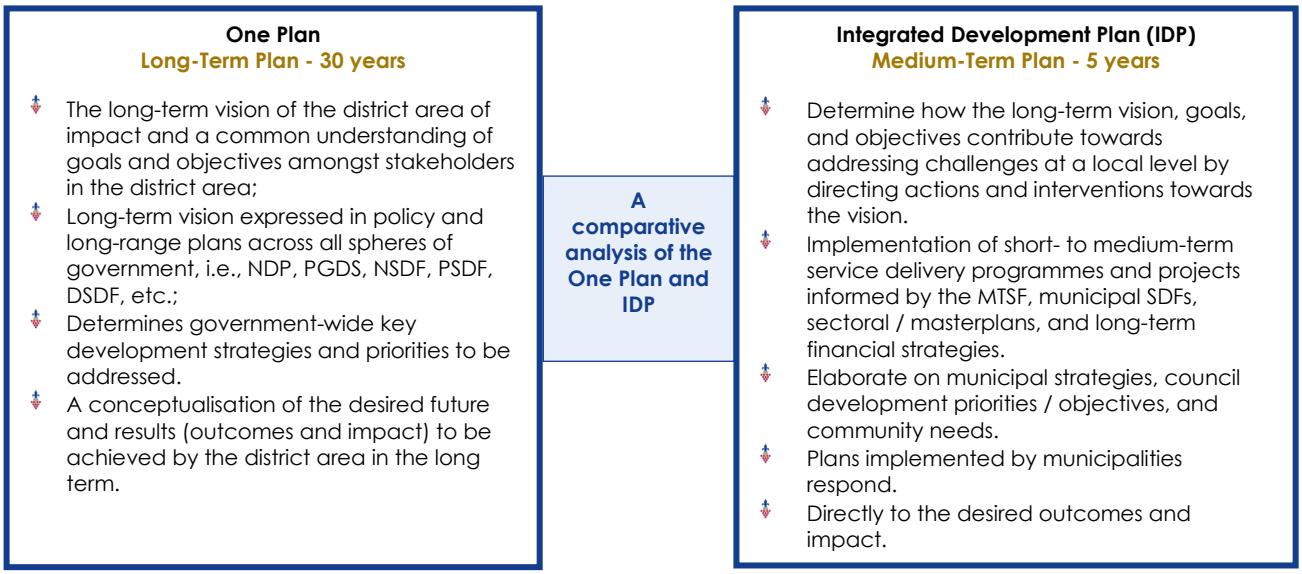
It is acknowledged that the DDM introduced a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic, and annual performance plans that each sphere, department, and state entity is responsible for or required to develop. The One Plan is rather informed by these plans, and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development, and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- is a geographical (district), team-based, and citizen-focused approach;
- has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery, and capacity building;
- has the desired outcome of improving the living conditions (lives) of citizens;
- has a horizontal interface (between provincial departments) and a vertical interface (national, provincial, and local government spheres);
- does not exclude local municipalities;
- is not a functions and power debate; and
- promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.



6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

The One Plan does not replace the Integrated Development Plans of municipalities as the "single, inclusive, and strategic plan for the development of the municipality," but is meant to strengthen and

enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 27: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2026

President Cyril Ramaphosa presented the State of the Nation Address (SoNA) on 12 February 2026. The address marks an important milestone, providing clarity on the country's political, social, and economic landscape.

The following are key highlights from the SoNA 2026:

Positive economic growth and investment:

- Government is committing more than R1 trillion in public investment to build and maintain infrastructure. This is the largest allocation of its kind in South Africa's history.

Critical minerals and industrial development:

- R300 million in funding for the Frontier Rare Earths Project in the Northern Cape. potential to become one of the world's highest and lowest cost new producers of minerals that are needed for smartphones, lithium batteries and other products.
- G20 countries support South Africa's proposal to expand local beneficiation of critical minerals and the export of finished products.

Creating employment:

- Introduction of regulatory changes that will make it much easier for businesses to participate in the Youth Employment Service programme and create jobs for young people. This will include the expansion of the public employment programmes, including the Community Workers Programme, Expanded Public Works Programme, and the Presidential Employment Stimulus.

- To promote inclusion, the government will increase employment equity targets of persons with disabilities in the public service to 7% by 2030, and mandate a 7% preferential procurement target across all government and public entities.

Expanding affordable housing:

- Introducing a new model that shifts from building housing to giving subsidies for ownership and rental in areas that are suitable. Subsidies will support people to build, buy or rent their own housing.

Economic reform:

- Continues investment in roads, bridges, rail lines, ports, dams, wind and solar farms to promote long – term growth.

Trade, industrialisation and international partnerships:

- Supporting established industries by reviving the ferrochrome industry, closing loopholes in tariff structures and developing additional measures to protect and grow the manufacturing base.

Investing in small and medium businesses:

- Ensure that the final Business Licensing Bill makes it easier to start and run a small business in South Africa.

Addressing the foot-and-mouth disease crisis:

- The government has classified the foot-and-mouth disease as a national disaster and will mobilise all necessary capabilities within the state to deal with the outbreak.

Intensifying the fight against crime:

- Prioritising the fight against organised crime and criminal syndicates using technology, consolidating intelligence at the national level, identifying priority syndicates and deploying handpicked, multi-disciplinary intervention teams focused on dismantling criminal networks.

Dealing with the water crisis:

- Building of new dams and upgrading existing infrastructure; committing to more than R156 billion in public funding for water and sanitation infrastructure over the next three years. The Water Services Amendment Bill will enable the government to hold water service providers accountable for their performance and withdraw their licences if they fail to deliver.

Deployment of the SANDF to crime hotspots:

- Support the police to deal with gang violence and illegal mining.

GBVF Classified as a National Disaster:

- This classification will enable the government to better coordinate responses and direct efforts towards the most impactful interventions.

Early childhood development:

- Expanding access to early childhood development (ECD) through the Bana Pele mass registration of ECD facilities and an increase in subsidies for ECD learners, as well as making Grade R compulsory.

Health:

- Substantial investment in health infrastructure, prioritising the construction and revitalisation of academic hospitals as part of preparations for the National Health Insurance.

Higher education and training opportunities:

- Expand opportunities for young people to enter institutions of higher learning, draft a proposal to build more universities and Technical and Vocational Education and Training Colleges with specialised areas of focus.

Centralised model for managing SOEs:

- To improve the governance and performance of state-owned enterprises, the government will implement clear standards for appointments.

Illegal immigration:

- Labour inspectors to crack down on violations of existing immigration, labour and other laws.

Leveraging digital transformation for growth:

- Harness digital transformation as a driver of growth, inclusion and effective service delivery.

National Dialogue:

- This process will continue across South Africa in 2026, providing citizens with the opportunity to raise their concerns, aspirations and plans for the future.

International cooperation:

- Forge strong partnerships with like-minded countries to increase shared resilience to global disruptions, continue to champion multilateralism and strengthen humanitarian diplomacy.

6.3.2 State of the Province Address (SOPA) 2026

Premier Alan Winde presented the State of the Province Address (SOPA) on 25 February 2026.

The following are key highlights from the SOPA 2026:

- **G4J:** Growth and jobs are the cornerstone of the vision for the Western Cape. The Western Cape Government supports business growth by cutting red tape and providing tailored business support to reduce unemployment.
- **Tourism:** Tourism is another powerful economic driver. Growth sectors highlighted included trade and hospitality, agriculture, construction and manufacturing, and support for small businesses.
- **Infrastructure:** Infrastructure development and, importantly, the maintenance thereof is the backbone of the Western Cape's economy and a foundation for sustainable growth. Invest in roads, ports, energy, water, and digital networks, and the Western Cape Government will unlock opportunities for businesses to grow, trade to flow, and jobs to be created.
- **Housing:** The Western Cape Government emphasises that housing is about restoring dignity and creating opportunity. Since 2009, over 213,000 housing opportunities have been created, benefiting around 850,000 people.
- **Roads:** Road infrastructure investment continues to drive job creation in the province. Last year, road projects created 4,645 work opportunities, and further investment will see over 2.27 m2 of road maintained this year, generating thousands more jobs.

- **Agriculture:** Concerns were raised about Foot-and-Mouth Disease, a threat to livestock and agricultural jobs, and indicated provincial strategies to manage outbreaks.
- **Climate change and Environmental Affairs**: Emphasise that the crisis of climate change is undeniable as it impacts and reaches far and wide, across our province and economy, touching lives and livelihoods.
- **Water:** The province is facing serious water security challenges. To conserve this precious resource, the Western Provincial Government has invested over R250 million, which has enabled local government investment into water infrastructure amounting to billions.
- **Energy:** Western Provincial Government is driving energy security for its residents. Through our provincial Energy Resilience Programme, 819 MW has been added to the provincial grid in the 2024/25 financial year, with another 1 000 MW anticipated in this year.
- **Safety:** Everything within our mandate to address crime, both in terms of prevention and reduction.
- **Local Policing and Provincial Law Enforcement:** Support is being provided with the K9 units fully operational in Mossel Bay, Overstrand and Swartland, with plans to expand into Stellenbosch in 2026.
- **Education:** Key to independence, economic inclusion and employment. Nine new schools have opened in the last year, with two more opening in a phased approach in due course. The Western Cape Education Department will invest R1.5 billion in new schools and classrooms this year, with 15 new schools under construction.
- **Gender Based Violence:** GBV has been declared a national disaster, with women and girls deeply impacted by this scourge. The Western Cape Provincial Government are actively working to address this and provide the necessary support through the implementation of the GBV Ambassador Programme.
- **Cultural Affairs and Sports:** The MOD Programme, our Mass participation, Opportunity and access, Development and Growth programme, has been strengthened and expanded, so that more young people have access to safe, structured after-school spaces guided by caring adults and positive role models.
- **Health:** R2.4 billion is being invested in new and improved health facilities over three years.

6.4 Investments

This section reflects on investment priorities within the Stellenbosch area for 2024/25.

6.4.1 Public Sector Investment

The 2024/25 capital expenditure budget in the CWD's municipalities saw a notable growth to R127.1 billion compared to the R107.0 billion in 2023/24. The increase in expenditure is directed towards higher expenditure in the trading and services sector, particularly in Drakenstein, which has the highest expenditure for trading services, equal to R590.8 million.

Furthermore, significant funds are directed towards wastewater management, driven by a major upgrade project at the Paarl Wastewater Treatment Works (WWTW). This project aims to improve wastewater treatment processes and protect the Berg River, a vital regional water source. Additionally, the initiative seeks to enable future green energy generation through biogas production at the facility. The National Treasury has provided a significant grant to support these wastewater and sanitation upgrades in the Paarl / Wellington area.

Following suit is Stellenbosch, which has a total capital expenditure of R599.4 million in 2024/25. Of this, the most substantial expenditure was directed towards trading services, with a budget of R351.8 million. Water management constitutes the largest portion of this trading services expenditure, with a spend of R156.9 million. This significant investment is driven by the increasing water demand within the municipality amidst diminishing natural water sources. Projections indicate that the District will be at

high risk of drought by 2040. In response to these challenges, municipal authorities have been exploring alternative water sources, including urban wastewater recycling (UWWR), as part of an integrated urban water management (IUWM) approach.

While the overall total expenditure for municipalities in the CWD has increased due to several factors, key contributors include rising costs associated with infrastructure investments, particularly in response to the need for improved service delivery and maintenance. Additionally, the increase in the import costs of essential resources, such as crude petroleum, has significantly impacted municipal budgets. Municipalities are investing heavily in infrastructure to support economic growth and improve service delivery, encompassing projects related to transportation, water supply, and sanitation.

6.5 Environmental Risk and Vulnerability for the Cape Winelands District (CWD)

The CSIR developed a vulnerability index for all 25 municipalities in the Western Cape that assesses their vulnerability in four areas—socio-economic, economic, physical, and environmental. The analysis reveals that the municipal areas in the CWD are particularly vulnerable to physical and environmental risks. These are as follows:

- Drakenstein stands out with the lowest socio-economic vulnerability but faces significant environmental challenges;
- Stellenbosch has a high environmental vulnerability, which could be a critical area for intervention;
- Breede Valley and Witzenberg have higher physical vulnerabilities, indicating potential challenges in infrastructure and connectivity; and
- Langeberg, while moderate in socio-economic and economic vulnerabilities, has a relatively lower environmental vulnerability, suggesting the need to balance development and environmental preservation.

To better understand the province's environmental vulnerabilities, the Department of Environmental Affairs and Development Planning (DEADP) initiated a project aimed at tracking the environmental vulnerabilities and risks in the Western Cape, with a particular focus on water security and the impacts of climate change.

The project is aimed at developing an environmental risk map that highlights areas in the Western Cape where compound risks threaten people, their livelihoods, and / or infrastructure. The risk maps can then be leveraged to provide insights that can support decision-making, planning, and budgeting related to sustainable economic growth and enhance human well-being.

The thematic areas contributing to the final combined environmental risk and vulnerability maps include:

- Ecosystem Deterioration;
- Coastal Erosion and Flooding;
- Terrestrial Flooding;
- Water Security;
- Air Quality and Health;
- Solid Waste Management; and
- Wildfires.

The analysis by the provincial government indicates that the CWD is vulnerable to several environmental risks. Ecosystem deterioration is due to the sensitivity of the remaining natural areas and the complexity of managing these sensitivities along with diverse human activities such as waste management, air pollutants, and increased wildfires.

Water scarcity is a concern given that future drying adds to the water security risk in the Western part of the province, especially in areas like Cederberg, where the vulnerability is generally high. The CWD region may also face water security challenges due to climate change projections.

Lastly, the CWD faces increased wildfire hazards, particularly in the mountainous areas. The higher population density in these areas may lead to more fire ignition events, increasing the risk of wildfires. Air quality and health are impacted by pollutants and increased wildfires. The CWD, particularly the mountainous areas, may face challenges related to air quality due to these factors.

The environmental vulnerabilities in the CWD can have far-reaching implications for both the people and the economy. These vulnerabilities can lead to health and safety risks, property damage, economic losses, and increased socio-economic disparities. Effective governance, disaster management, and targeted interventions are essential to mitigate these impacts and support the resilience of the CWD.

6.6 Intergovernmental Budgetary Allocation

The infrastructure projects and related capital projects listed below are in various stages of implementation, with certain projects being in the planning phases, others in implementation with construction in progress, and some in the close-up phase of the project.

Table 33: Provincial Infrastructure Projects and Programmes MTEF period 2026/27 – 2028/29

6.7 Cape Winelands District (CWD) JDMA Implementation Plan

A **CWDM JDMA profile** was developed in 2020 and updated in September 2023. The Cape Winelands District Profile—2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- Provide an information source that, at a glance, highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e., sets the context and provides the government with an intergovernmental understanding of key development trends and patterns within the District); and
- Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated, and integrated.

Given the above, the following strategic priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- Waste minimisation and management solutions
  - Regional Landfill
  - Waste Minimisation Strategies
  - Integrated Waste Management Plan
  - Waste Workshop
- Resource Resilience
  - Climate Change, Water Management and Wildfire Urban Interphase Risks
  - Municipal Energy Resilience Programme
- Infrastructure management and development
  - N1 Eastern by-pass
  - ESKOM Infrastructure delays (Witzenberg)
- Economic Recovery and Unemployment
  - Economic Recovery Plan - Implementation
- Urbanisation
  - Develop a guide to inform future developments
  - Monitor mega human settlement projects to inform the Guide
  - Address land invasions
  - Provision of Basic Services for Prioritised Informal Settlements
- Community Safety
  - District Plan
  - Area-based Plan (Witzenberg)
  - SANTAM (fire and IT equipment, PPE, and smoke alarms)
- Municipal Business Sustainability
  - Financial Sustainability
  - Revenue Collection: ESKOM
  - Shared Services: Development of 4 Models
- External Stakeholder involvement
- Communication and IGR
- Data governance and profile update

- The development of a dynamic profile to inform the JDMA Implementation Plan developmental priorities and projects.

- Digital Transformation Strategy.

6.7.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure, and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility-scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid-tied and feed in any excess electricity generated. Registering a feed-in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.7.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 28: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Progress**
Provincial Priority– Growth and Jobs					
Waste minimisation and management solutions (priority project)	Waste Minimisation Strategies	All municipalities	Review of Integrated Waste Management Plan	CWDM and DEADP	All local municipalities have approved waste minimisation plans. Continued further awareness to be created.
	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations		Eastern side: The contractor is on site. Western side: The planning / discussions is in progress.
Resource Resilience	Climate Change, Biodiversity and Water Management Framework Wildfire Urban Interface: Mitigation of Risks WCG Energy Programme	All municipalities	Municipal Energy Resilience Programme	DLG, DEDAT, Stellenbosch Municipality and Drakenstein Municipality	In progress: Conversation to be set up to consolidate the resource resilience aspect, including climate change, disaster management, water, and energy. Completed: Municipalities received funds to procure generators.
Economic Recovery, long-term unemployment and its consequences	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM and all local municipalities; with WESGRO and DEDAT	LED Maturity Assessment has been finalised. Ongoing collaboration with stakeholders is necessary.
Municipal Business Sustainability	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM and all local municipalities, DLG and IGNITE	Shared Services Models has been developed. Currently exploring further additions to the shared service project.
			Digital Transformation Strategy	CWDM and all local municipalities, DLG	This project is in progress.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Compilation of overall data governance strategy	DLG, CWDM and all local municipalities, DEADP, DotP, DSD	Municipal interface structures are being finalised. Data sharing MoUs are being drafted, with consultations underway. The CWDM Data Management Plan was developed. Gaps in the 2020 profile were identified. The project is in progress.

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Progress**
Provincial Priority– Growth and Jobs					
Community Safety, Risk Reduction and improved Disaster Response	Compilation of a disaster plan	All municipalities	District Plan Area-based Plan (Witzenberg)	CWDM	To be reviewed, annually.
Urbanisation	Towards a regional human settlement strategy	All municipalities	Develop a guide to inform future development	DoI, CWDM and DEA&DP	Recommended: Closing out the urbanisation guide with available data and focusing on a regional human settlement strategy.
			Monitor mega Human Settlement projects (TRANSHEX, Vlakkeland and Vredebes)		This project is ongoing. Challenges: Bulk electricity and long-term planning for phase 2 of Transhex.
Infrastructure management and development	N1 Eastern bypass	Breede valley	N1 Eastern bypass	DoI and CWDM	This project is in the detailed design phase.
Agriculture	Brandvlei Storage Dam	Breede valley	Brandvlei Storage Dam: Licensing	DoA and DWS	Project is in progress.
Communications and IGR	JDAM	All municipalities	Institutionalising the JDMA	CWDM and DLG	Ongoing awareness campaigns.
Operational Support	Compilation of Operational Support Plans	All municipalities	Operational Support Plans	CWDM	Support plans for Breede Valley and Langeberg are in progress. Support plan for Stellenbosch, Witzenberg and Drakenstein has been completed Specific projects have been elevated to the JDMA level. Ongoing projects: Maintenance of infrastructure, high mass lighting and rooftop solar projects.

6.8 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 35: Agricultural Interventions for 2022 – 2027

Project Rating					
☺	Project completed.	😐	Project in progress.	☹	Not completed / No budget available / District Function / Provincial Function

Table 36: Agricultural Interventions / Projects

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	**Desired Municipal Deliverable**	**Status Quo within Municipality**	**Proposed Local Intervention (appropriate municipal action)**	**Timeframe to deliver (Short / medium / long term or ongoing)**	**2022/23**	**2023/24**	**2024/25**	**2025/26**	**2026/27**	
Farmer Support	Lease agreement for use of commonage land (e.g., terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	4	3	2	2	In 2023/24, an item was prepared for the Council, and the four (4) portions of land were approved and allocated to the successful applicants. In 2024/25, an item was prepared for the Council, and the (3) three portions of land were approved and allocated to the successful applicants. In 2024/25 and 2025/26, the Section: Economic Development and Tourism obtained approval in terms of Regulation 29 (1) (a) of the Municipal SCM Regulation and paragraph 5(2)(b)(i) of Stellenbosch Municipality Supply Chain Policy for the supply and installation of an agricultural irrigation network system (mainline & sub-mainline) on farm 502 BH (WC024).
					☺	☺	☺	n/a	n/a	
Market Access	Infrastructural development that supports the agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	2	2	2	2	
					☺	☺	☺	☺	n/a	

6.9 Stellenbosch Municipality Operational Support Plan

The projects listed in the table below were identified as projects / programmes / initiatives that would require assistance and funding from other spheres of government:

Table 37: Stellenbosch Municipality Operational Support Plan

Responsible Internal Department / Agency	Project / Programme / Initiative	Action(s)	Progress
Department Community Service	Climate Change Adaptation Strategy (Alien Clearing, River Management and Wildfire Management	Implementation of Alien Clearing, River Management and Wildfire Management Plans.	The municipality has appointed a Climate Change Expert to draft a Climate Change Adaptation Strategy, focusing on adaptation plans that the municipality could potentially implement.
Department: Housing Development	Mega-human settlement project monitoring	▪ Adam Tas Corridor Precinct 10 (Northern Extension): In an implementation phase. ▪ Funds required: R50 million ▪ Jamestown: Housing (Phases 2, 3 & 4): To obtain development rights/township establishment. ▪ Funds required: R26 million ▪ Erf 7001 Cloetesville: To obtain development rights/township establishment. ▪ Funds required: R15 million	▪ The Adam Tas Corridor Precinct 10 (Northern Extension): Development rights were awarded on 24 April 2026. ▪ Currently in the appeal period, and if the development is finally approved, a professional team will be appointed for the implementation phase of the project. ▪ Jamestown: Housing (Phases 2, 3 and 4): The implementing agent was appointed on 28 April 2026 to install infrastructure services and build top structures. Phase 4 LUPA is in its final format to be submitted. ▪ Erf 7001, Cloetesville: As a result of the first tender that was cancelled, a service provider was appointed on 19 March 2026 to prepare concept designs for the five different erf sizes. The concept plans will form the basis for the new tender. Once all relevant information has been finalised, the tender will be readvertised.
Municipality / DLG / Water Services	Stellenbosch Municipality:	Financial support is required for the development of pico hydropower units.	The municipality, under its Alternative Energy Programme, has opted to roll out backup generators, inverters, solar PV and batteries at critical infrastructure sites where possible and is busy with this installation where possible.
Stellenbosch Municipality and DLG	Resource Resilience: Municipal Energy Resilience	Financial support is required for the development of real-time management control centres.	The municipality is currently busy with a tender for Supervisory Control and Data Acquisition (SCADA) telemetry to assist with real-time management control.
Department: Roads, Stormwater and Transport	Stellenbosch Municipality:	Upgrading and implementing new taxi and bus stops in rural and semi-rural areas within the Stellenbosch municipal area.	New bus and taxi shelters were installed in Klapmuts, Wemmershoek and Pniël.
Department: Roads, Stormwater and Transport	Resource Management Resilience: Water Management Resilience	Construction of sidewalks and NMT facilities in rural and semi-rural residential settlements	New sidewalks were constructed at Groendal, Raithby, Klapmuts, Pniël, Kylemore, and Lanquedoc.

Responsible Internal Department / Agency	Project / Programme / Initiative	Action(s)	Progress
		located within the Stellenbosch Municipal area.	
Department: Development Planning (Spatial Planning)	Improvements to public transport facilities in rural and semi-rural areas within the Stellenbosch Municipal area	Compilation of a Local SDF for the Adam Tas Corridor Study Area. The compilation of a Land Use Framework to develop a Development Incentive Overlay Zone (Urban Development Zone).	▪ The Council approved the Adam Tas Corridor (ATC) Local Spatial Development Framework (LSDF) in October 2022. ▪ The ATC Incentive Overlay Zone was approved by the Council in May 2023 and incorporated in the Stellenbosch Municipality: Zoning Scheme Bylaw. The bylaw is currently being reviewed and amended.
Department: Development Planning (Spatial Planning)	Improvements to the NMT network in rural and semi-rural residential settlements located within the Stellenbosch Municipal area	Inclusion of Klapmuts within the Cape Metro Regional Spatial Implementation Framework ("RSIF") in partnership with WCG, CoCT, Cape Winelands District, and Drakenstein Municipality, which focuses on the following themes: ▪ Smart City Concept; ▪ Economic Development and Job Creation; and ▪ Cost-effective Services	Stellenbosch Municipality applied to the Municipal Boundary Demarcation Board to incorporate Klapmuts North. However, both the application and subsequent appeal were declined. In 2025, a joint initiative by the national and provincial governments, known as the Greater Cape Town Regional Study (GCTRS), was launched. This study—scheduled for completion by December 2026 for the Klapmuts N1 corridor—will inform the preparation of a Local Spatial Development Framework (LSDF).
Department: Development Planning (Spatial Planning)	Compilation of the Adam Tas Corridor Local Spatial Development Framework	Draft Economic Development Strategy (an Approach to Stimulate Economic Growth). ▪ Inclusionary Housing Policy. ▪ Jamestown Housing Project. ▪ De Novo. ▪ Vaaldraai. ▪ Jonkershoek. ▪ Erf 7001, Stellenbosch (Soekmekaar).	▪ The Inclusionary Housing Policy was approved by the Council on 27 June 2023 and is currently being implemented. ▪ All the projects are included in the housing pipeline, except Vaal Draai and De Novo, which belong to the Provincial Department of Public Works.

6.10 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation, monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and the District Development Model (DDM) objectives. The SDG (Goal 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs

and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to insufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix is in alignment with the principles of gender mainstreaming as stipulated below:

- Gender-sensitive language;
- Gender-specific data collection and analysis;
- Equal access to and utilisation of services;
- Women and men are equally involved in decision–making; and
- Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- Positive impact on individuals, organisations, and at a societal level;
- Acceleration of the implementation of Sustainable Development Goals (SDGs);
- Higher rate of growth and development;
- Improved resource management;
- Improved productivity; and
- By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.10.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the Provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

Table 38: Gender-Based Interventions

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The GBV Forum has been established by the Department of Social Development (DSD) in the 2023/24 financial year.
Hosting of the 16 Days of Activism event	Number of 16 days of activism events hosted by 30 November	The 16 Days of Activism event will be hosted each financial year for the period 2022 – 2027. This programme is linked to the Mayoral Outcome to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.

6.10.2 Gender Disaggregated Matrix[3]

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality in determining whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 39: Gender Disaggregated Matrix

Directorate	Department	Indicator Description		5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27	
				M	F	M	F	M	F	M	F	M	F	M	F

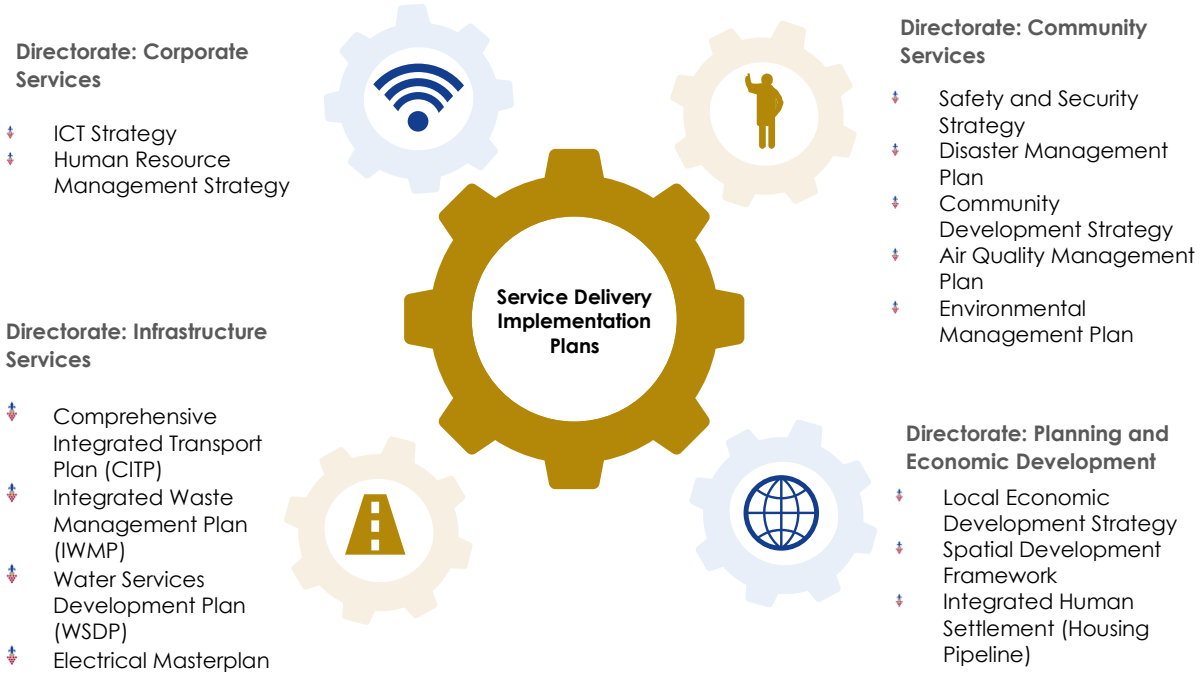
***Note**: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.*

CHAPTER 7:

Sector Plans and Implementation



7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the mSDF has a 20-year horizon, the IDP has a 5-year horizon, and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 29: **Service Delivery Implementation Plans**

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 40: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Masterplans
Municipal Spatial Development Framework (*m*SDF)		• Identifies areas for the satisfaction of human settlement needs. • Designates areas for developmental needs. • Indicates areas desirable for a specific nature and form of urban development. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Integrates settlement patterns with infrastructure plans.	• Identifies areas for the satisfaction of human settlement needs. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Indicates areas desirable for densification / specific land use / integrated networks. • Spatially, it reflects the Council's approved nature and form of urban development.	• Identifies municipal growth direction. • Identifies areas to be protected from development (e.g. heritage, agriculture and natural). • Identifies priority development areas. • Identifies infrastructure priority areas.
Human Settlements Plan	• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.		• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.	• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement infrastructure needs. • Quantifies the extent of demand for services according to various housing typologies.
Integrated Transport Plan	• Determines the most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges. • Identifies the need for services not provided by the municipality, e.g.,	• Identifies transport and road priority areas. • Determines development parameters, e.g., parking ratios, access, and standards • Shapes settlement planning according to the most appropriate modal changes and challenges.		• Determines most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges.

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Masterplans
	SANRAL, Provincial Roads, PRASA, and Transnet.			
Infrastructure Masterplans	• Identifies existing infrastructure capacity / constraints. • Identifies interventions required to support growth / infill. • Designates priority infrastructure development areas / corridors. • Provides for services not provided by the municipality, e.g., Telkom, Eskom, and raw water supply.	• Identifies existing infrastructure capacity or / constraints. • Identifies interventions required to support growth / infill. • Provides for services not provided by the municipality, e.g. Telkom, Eskom, and raw water supply.	• Identifies existing infrastructure capacity or / constraints. • Identifies interventions required to support growth / infill. • Provides for services not provided by the municipality, e.g., SANRAL, provincial roads, PRASA, and Transnet.	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

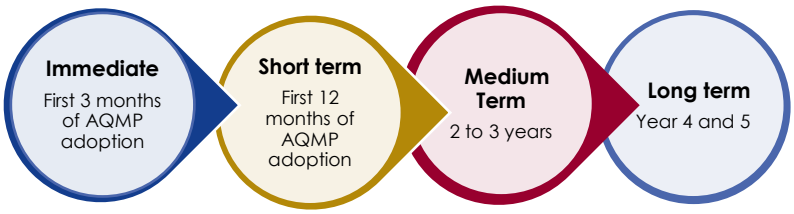
Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) was approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is cooperatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.



The goals to achieve the mission of the AQMP are listed below, and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework, and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'effective air quality management;
- **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDMAQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management.
- **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact.

7.3.1.2 Time frames

The timeframes defined for the implementation of the AQMP are:

Figure 30: **AQMP Time frames**

The following immediate items were included in the AQMP:

Table 41: Items in AQMP

Nr.	Objective	Activity	Responsibility
1.	Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
2.	The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
3.	A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law	Air Quality Officer, Council
4.	Emissions from waste burning are reduced.	Enforcement of the by-law	Air Quality Officer
5.	An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
6.	Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g., EIA, SDF, SEMF).	Air Quality Officer
7.	Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
8.	Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality developed an Air Quality by-law in 2018, which, together with the above AQMP, is implemented and enforced by the local Air Quality Control Officer.

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development

Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document was reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (a nature reserve), and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- Mont Rochelle Nature Reserve: approved by the Council in 2022;
- Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review;
- Jan Marais Nature Reserve: Final draft EMP prepared;
- Paradyskloof Nature Area: approved by the Council in 2019 and reviewed in 2024; and
- Ida's Valley / Botmaskop Nature Area: Approved by the Council in 2023, to be reviewed in 2027.

In 2024, Stellenbosch Municipality also drafted a Nature Reserve and Nature Area By-Law. This by-law was made public before a final draft was presented to the Council in 2025.

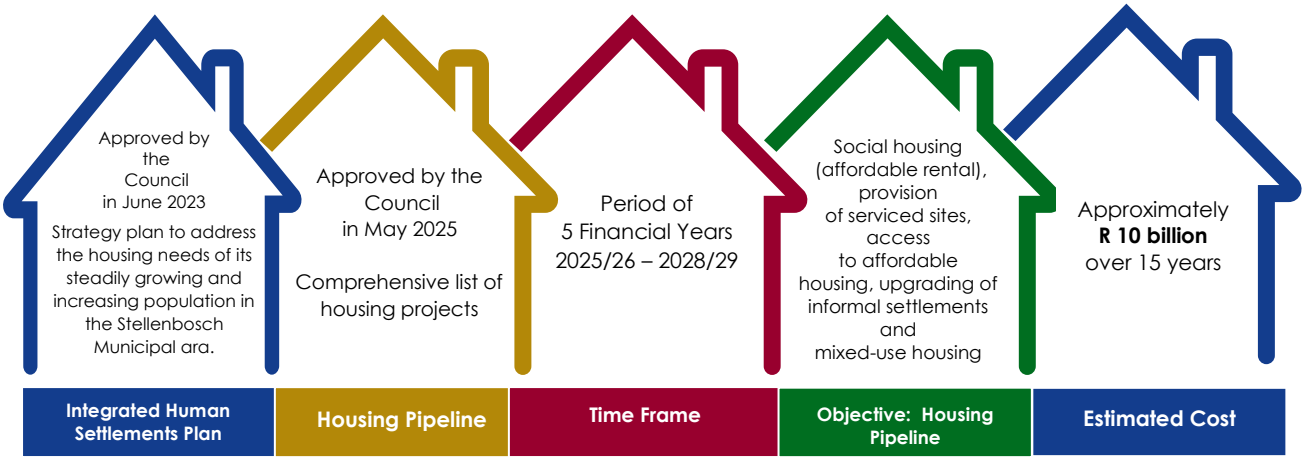
7.3.3 Integrated Human Settlement

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

The aim of the Integrated Human Settlements Plan (IHSP) is therefore to:

- To outline the municipality's implementation plan for providing for the housing needs of its steadily growing and increasing population.
- To enable the municipality to prepare funding applications for submission to the Provincial Department of Infrastructure (branch Human Settlements) (PDoI) that are consistent with funding conditions and included in the municipal IDP and Housing Pipeline as per Provincial Department of Infrastructure guidelines is a requirement; and
- To inform the municipal Housing Pipeline spanning over ten years, reflected in five-year periods, the funding required in the Provincial Department of Infrastructure's Business Plan.



The IHSP will therefore not only comply with the requirements of the National Housing Act, whereby the municipality is obliged to facilitate the delivery of housing opportunities as part of their municipal function, but will also develop a credible Housing Pipeline and operational models for human settlement development within the WC024.

7.3.3.2 Housing Pipeline

The PDoI requires that every municipality have a Housing Pipeline. The Housing Pipeline is premised on a **five-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements Business Plan.

It is required that the Housing Pipeline be reviewed annually. The latest review of the Housing Pipeline was approved by the Council in May 2025. This revision includes the following:

Figure 31: Housing Pipeline Time Frame, Objective and Estimated Cost

The objective of the Housing Pipeline is to place more emphasis on the following housing types or programmes:

- Social housing (Affordable Rental);
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Upgrading of informal settlements; and
- Mixed-use housing (which includes formalised homeownership, especially employer housing).

The estimated cost of this programme will be approximately **R10 billion** over **15 years**.

- Upgrading of informal settlements (La Rochelle, Klapmuts, Langrug, and Franschhoek);
- Access to basic services (ABS);
- Jamestown, Farm 527 (Phases 2, 3, and 4);
- Upgrading of Zone O, Kayamandi;
- Enumeration of people on farms and backyarders;
- Erf 64, Kylemore;
- Erf 7001, Cloetesville (known as "Soek-mekaar");
- Upgrade of the Kayamandi CBD;
- Adam Tas Corridor Precinct 10 (Northern Extension);
- Social Housing (Farms 81/2 and 81/9); and
- Formalisation of Forestry Villages (La Motte, Meerlust, Jonkershoek and Maasdorp Villages)

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements through the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

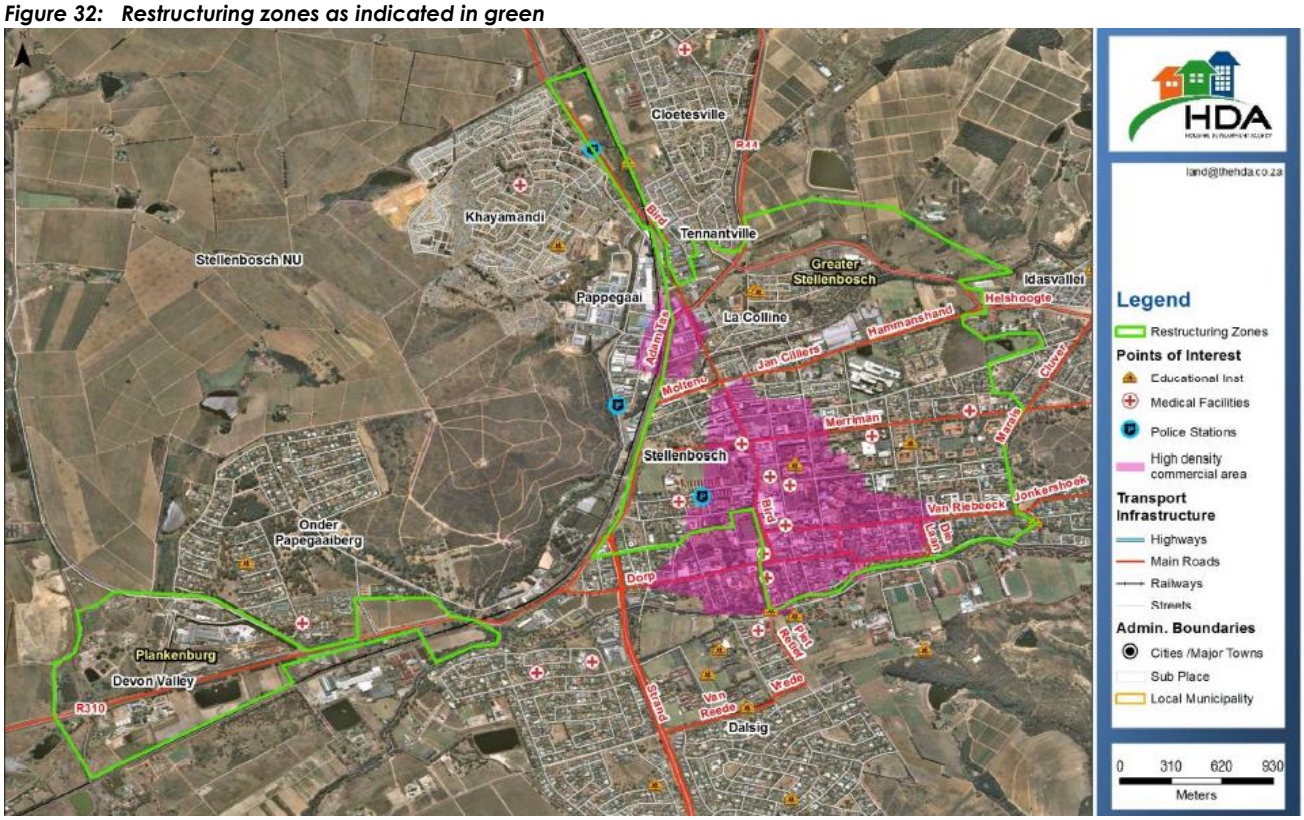
7.3.3.4 Informal Backyard Dwellings

The municipality, through the Housing Pipeline, is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database, and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious, and the chance of actually obtaining a formal house is not guaranteed. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes, especially Social Housing (affordable rental).

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017 by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality, and the latter culminated in a Council decision instructing the

administration to attract social housing institutions (SHIs) and / or other development agencies (ODAs) to effect the municipality's social housing programme.



This programme aims to ensure improved quality of life for communities through a rental housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock, etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational, and health facilities, etc.; and
- Ecological sustainability: conservation of scarce resources.

The aim and objective of Social Housing is to offer safe and affordable rental units for families with monthly incomes ranging from R1 850 to R22 000.

The figure below depicts areas that have been declared **restructuring zones** for the Stellenbosch Municipality.

Figure 32: Restructuring zones as indicated in green

7.3.3.6 Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements gazetted the declaration of Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households, and overcome apartheid spatial patterns by fostering integrated urban forms.

The current status of the PHSHDA for Stellenbosch Municipality is, namely:

- The "Stellenbosch Urban Core" Priority Human Settlements and Housing Development Area (PHSHDA) were formally gazetted on **15 May 2020** (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi, and Central Stellenbosch;
- To date, the Housing Development Agency (HDA), with assistance from the Provincial Department of Infrastructure (PDoI), have undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PHSHDA Development Plan. The Status Quo Analysis has been completed and will inform the Development Plan drafting going forward;
- The HDA appointed Plan Associates Development Planners to prepare a Development Plan for Stellenbosch Urban Core PHSHDA (Priority Human Settlement and Housing Development Area) located within the jurisdiction of the Stellenbosch Municipality. The first inception meeting (Phase 1) took place on **15 April 2024**;
- As a first step in Phase 2 (Situational Analysis and Vision Directives), the project team conducted a literature study and multi-sectoral situational analysis of the study area, looking at the current situation within the study area. This included the following components:
  - An assessment of the current regional development context of the study area and focus areas.
  - An assessment of historic and contextual documentation consisting of the following:
    - National Development Plan (NDP);
    - Western Cape Provincial Spatial Development Plan;
    - Spatial Planning and Land Use Management Act (SPLUMA);
    - Western Cape Multi-Year Housing Development Plan and Business Plan;
    - Municipal Housing Sector Plan;
    - Precinct Plans;
    - Strategic Integrated Projects (SIPS);
    - Key legislative requirements;
    - Approved development rights; and
    - Identified properties falling within the Priority Housing Development Area (PHSHDA) and immediate surrounds.

It should be noted that phases 1 and 2 were completed by 30 June 2024.

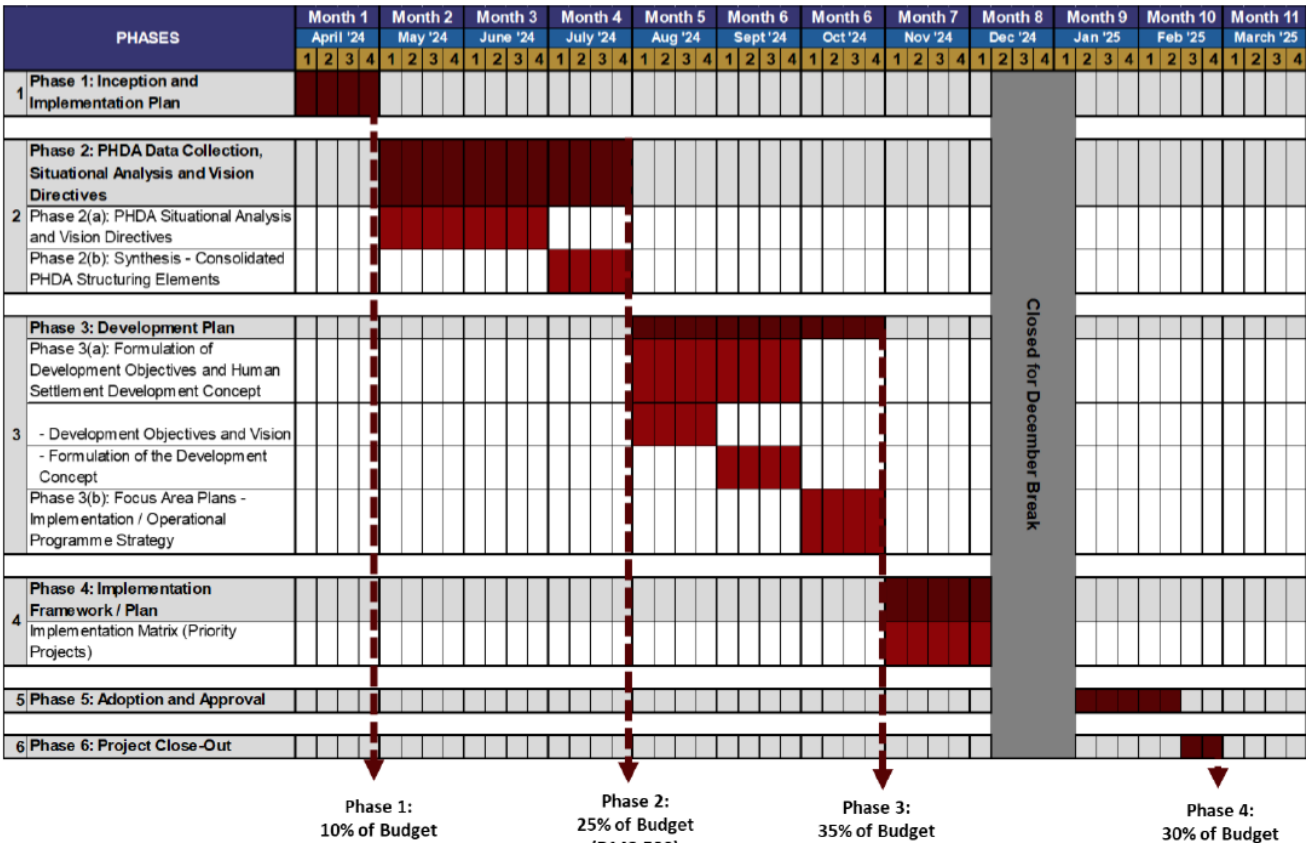
Phase 2(b) of the project involves formulating a synthesis based on the information collected as part of the situational analysis. As part of the synthesis, the project team will formulate the identified development opportunities and constraints about the study area, highlight the factors that attract business or investments to the area, and identify the factors that drive investment away from the area.

This information will be based on the technical information collected in Phase 2 and on the input received from the public during the public liaison programme. It is anticipated that Phase 2(b) would take about four weeks to complete.

The draft vision formulated in Phase 3(a) will be refined, informed by the previous phases. The objectives will strongly link to the outcome of the situational analysis and synthesis and will specifically focus on the development issues, opportunities, and challenges identified to ensure that the final plan incorporates all the form-giving elements identified.

Based on the philosophy and the objectives referred to above, the project team will then design the Development Concept and the detailed Development Plan for the study area.

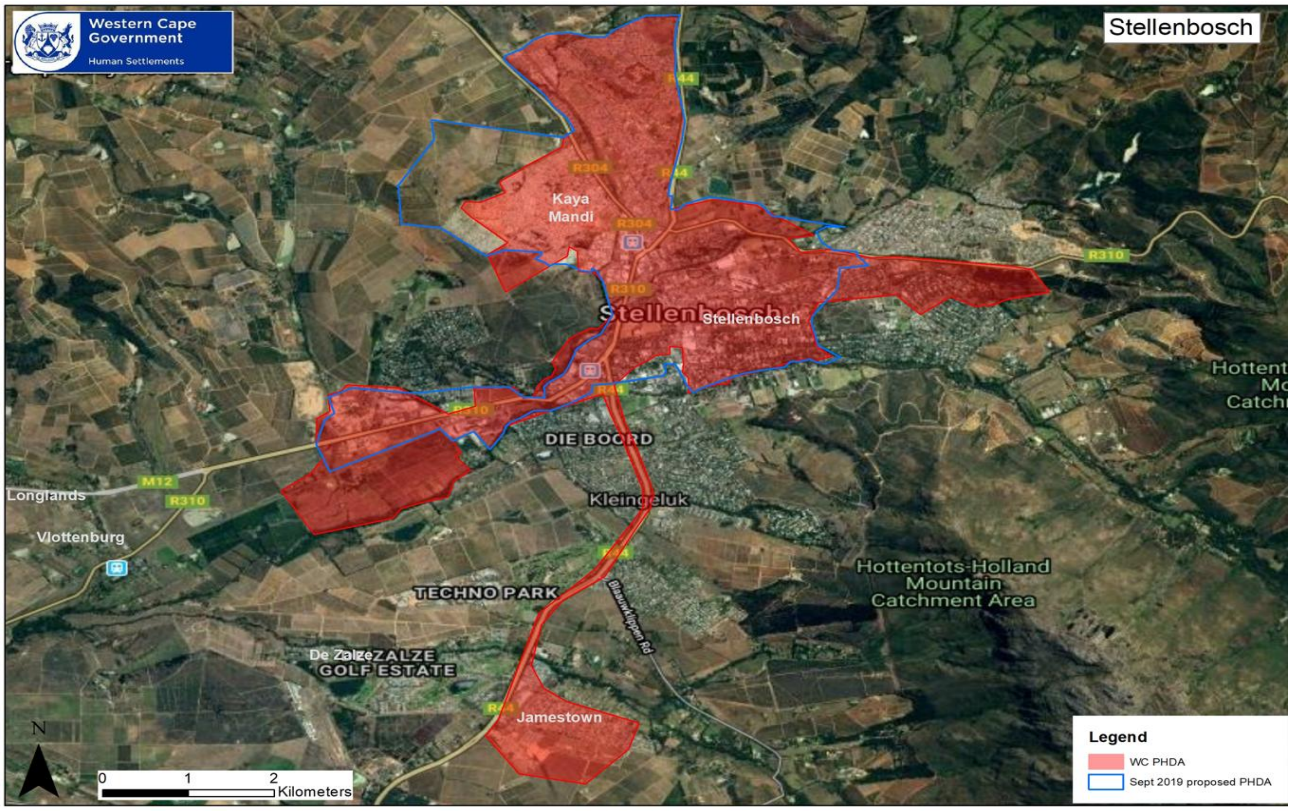
The Focus Area Plans (Phase 3b) will provide more detail on the specific areas within the overall PHSHDA Development Plan.



The implementation programme (Phase 4) will provide clear, separate phases that can allow for multi-year phased implementation. A priority matrix will be included in the implementation plan to provide a guide to which projects need to be implemented in the short, medium, and long-term. It must be noted that phases 3 and 4 have been completed.

The final Development Plan (Phase 5) will be presented to the various decision-making bodies in preparation for the adoption of the plan by the Council. The PHSHDA Plan will be advertised for public input once the Council has adopted the Plan. The Stellenbosch Municipality will drive the formal public participation with the assistance of Plan Associates.

Phase 6 will consist of the submission of the close-out report.



It was agreed upon with all stakeholders that the development plan be rolled out in different phases. The project programme below illustrates the different phases in which the project will be executed and the time frames linked to each milestone.

Figure 33: Project Programme

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 34: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8758 or via email at: lester.vanstavel@stellenbosch.gov.za.

7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA) requires "Type 1" planning authorities (the country's major cities and towns (including Stellenbosch Municipality)) to prepare a Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate, and provide for all modes of transport in their areas of jurisdiction.

The Stellenbosch Municipal Council as well as the Provincial Department of Mobility, has approved the municipality's 2023-2028 CITP. The vision for the municipality's 2023–2028 CITP is as follows: Stellenbosch Municipality has an integrated, effective, and sustainable transport system that unlocks economic opportunities and is accessible, safe, reliable, and affordable to all communities serviced by the municipality.

Pursuant to achieving the vision and addressing user needs, issues, and gaps, the objectives for the transport system for Stellenbosch Municipality over the next 5 years and beyond are as follows (Chapters 2.3 and 2.4 of the CITP):

Figure 35: Objectives for the Stellenbosch Municipality Comprehensive Integrated Transport Plan (CITP)

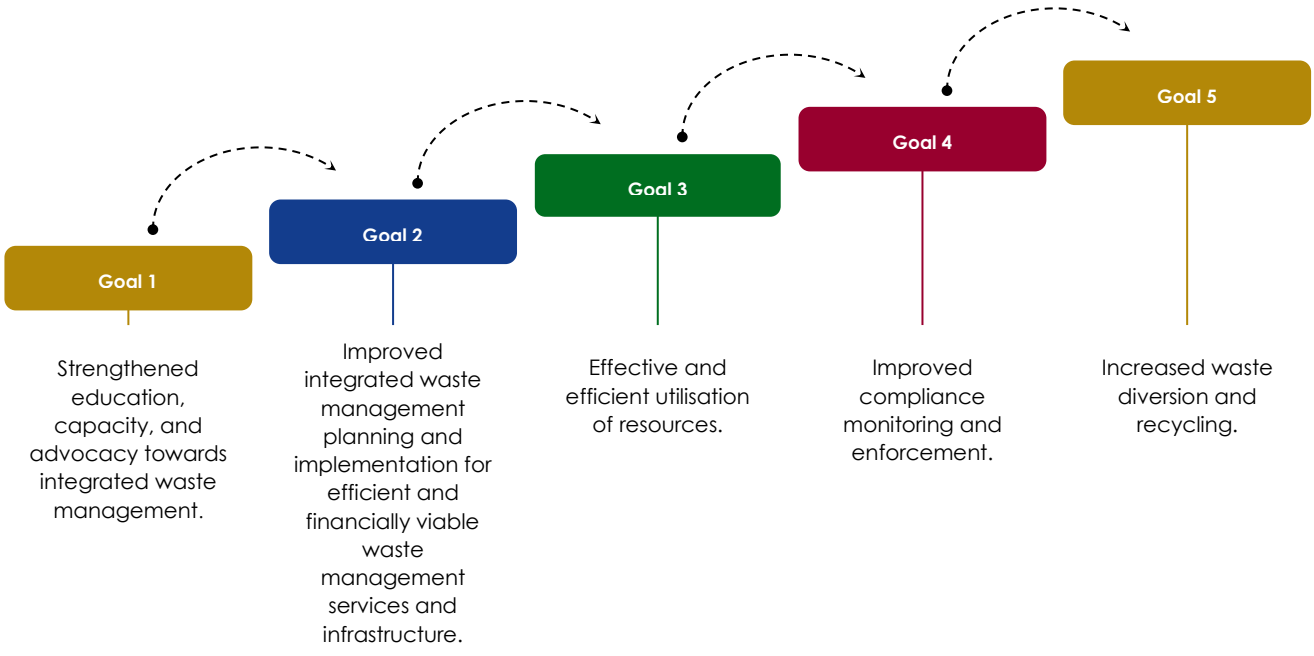
The target moved to the 2025/26 financial year. A consultant has been appointed.

7.3.5 Integrated Waste Management Plan (IWMP)

The third-generation IWMP, developed in 2020, was replaced with the 4th Generation Integrated Waste Management Plan (IWMP) as approved by the Council in 2024.

The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. The IWMP must be incorporated as part of each municipality's Integrated Development Plan (IDP), although it is submitted as a separate document. The IWMP also indicates the alignment of its goals with the Western Cape IWMP, the District Municipality IWMP and the National Waste Management Strategy, 2020 (NWMS).

Stellenbosch Municipality's 4th Generation IWMP includes a status quo analysis of the solid waste management system of the Stellenbosch Municipality and provides an overview of the strengths, weaknesses, and risks of the service provided. This overview includes the various aspects of, and the factors impacting, the solid waste management system. These range from relevant legislation, the socioeconomic context of the Stellenbosch Municipality, waste types and quantities generated, waste management systems and infrastructure, education and awareness initiatives, and financing.



The analysis of the status quo assessment is utilised to identify the gaps and needs of Stellenbosch Municipality's waste management system. The scope also includes the formulation of goals and objectives required to address the gaps and needs. The goals and objectives are limited to implementation at the local authority level. The implementation plan to improve the waste management system and to achieve the identified goals is coupled with a monitoring and review programme to ensure the successful implementation of the IWMP. The IWMP will be implemented over the period 2024 - 2029 and will be reviewed annually.

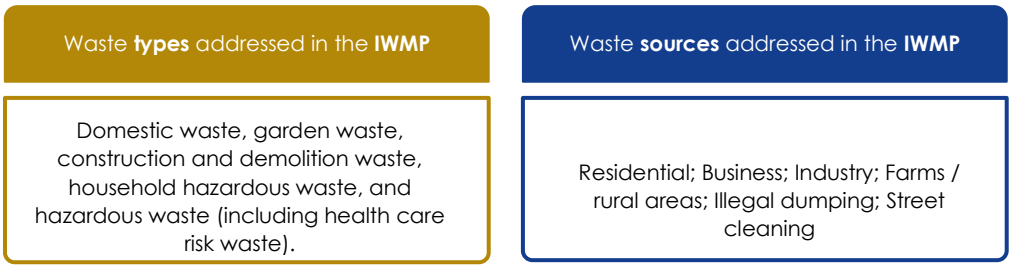
With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

7.3.5.1 Goals and Objectives

Five goals were identified for the Stellenbosch Municipality. The development of these goals has been informed by the previous IWMP, situational analysis, and gap and needs assessment, as follows:

Figure 36: Goals and objectives of the IWMP

7.3.5.2 Waste Management Systems and Infrastructure



The waste management division within the municipality provides the following services: collections, recycling, disposal to landfill site, wheelie bins (240 L), hiring of wheelie bins (for special events), emptying of skips, and drop-offs.

The Stellenbosch Municipality serves approximately 38 500 households with solid waste management services. The 28 751 collection points are spread across the WCO24. The refuse collection breakdown is approximately 20 000 wheelie bins and 4 000 standard refuse bags as of 2019. The most recent survey showed that approximately 106 000 wheelie bins are serviced monthly. The refuse bins are used to collect from formal areas, while the refuse bags are used to collect from informal settlements. The municipality utilises 11 refuse collection trucks that are operated by more than 60 crew members.

The municipality renders an area cleaning service seven (7) days a week. The area cleaning covers all urban areas within the Stellenbosch Municipal area. The area cleaning service entails street sweeping, litter collection and removal within the road servitudes and clearing of illegal dumping on municipal properties.

The municipality provides a two-refuse collection system in formal areas where wheelie bins for non-recyclable waste and clear bags for recyclable waste are collected once a week. Households are required to separate and sort waste at source into two streams, namely non-recyclable waste for landfill (Wheelie bin)) and recyclable waste for recycling (clear bags).)

Figure 37: Waste types and waste sources addressed in the IWMP

7.3.5.3 Monitoring and Review of the IWMP

To ensure corrective action is taken where necessary, and that long-term strategic goals are met, it is imperative that the monitoring focuses on the short-term objectives of the IWMP. The monitoring of the IWMP also makes provision for the adjustment of the IWMP.

The effectiveness of the Stellenbosch Municipality's 4th Generation IWMP will be reviewed 5 years after its implementation date. Within 3 months of the end of the 5-year IWMP implementation period, a review report of the IWMP must be documented for formal submission to the Stellenbosch Municipal Council and to the DEA&DP.

7.3.5.4 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.6 Electrical Masterplan

With the approval of the SDF in November 2019, which was almost within the time that the masterplan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have had major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire masterplan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and conducted by the Council for Scientific and Industrial Research (CSIR), which forms the basis for how electricity is likely to be generated or purchased. The Energy Masterplan was finalised in December 2022 and approved by the Council in March 2023, and the Electricity Masterplan was completed in June 2023 and approved by the Council in February 2024.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Masterplan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium, and long term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Masterplan is updated every five years and is used in medium-term project planning, prioritisation, and budgeting.
- The current Electrical Masterplan is valid until June 2028. The Department: Electrical Services will timeously initiate the necessary processes to have a new masterplan in place, following the expiry of the current plan.

7.3.7 Water Services Development Plan

As per the Constitution Section 156(1), Stellenbosch is authorised and required to provide services as per Schedule 4B & 5B. Schedule 4B indicates: The following local government matters to the extent

set out in section 155(6)(a) and (7): Water and sanitation services limited to potable water supply systems and domestic wastewater and sewage disposal systems

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997), to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019, each valid for a period of five years. A revision and updating of the WSDP was conducted in the 2022/23 financial year and completed in the 2025/26 financial year, but has not been approved by Council.

The total population supplied with water in the Stellenbosch municipal area amounts to more than 200 000 residents. Water is also supplied to a fairly extensive industrial area. Emergency water is supplied to farm communities that do not get water from the farms on which they reside.

The Department of Water and Sanitation is responsible for providing for South Africa's scarce water resources and the health thereof. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of municipal by-laws, policies, and procedures related to the provision of this service.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Masterplans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Masterplan, Sanitation Masterplan, Bulk Water Resources / Drought Intervention Plan, Asset Register, and Pipe Replacement Prioritised Programme were updated in 2019, after the previous major drought.

A new masterplan has commenced and will be completed in the **2025/26** financial year. Since the water management function has drastically changed with the aforementioned previous drought, the use of greywater and the increasing cleansing of rivers have been prioritised. The municipality, together with Stellenbosch University and IMESA (Institute of Municipal Engineers of South Africa), was instrumental in the creation of a new South African Grey Water Policy. These updates were taken up into the Water Masterplan with the latest changes to the SDF.

The **Water Conservation** and **Water Demand Management** (WC and WDM) strategy is a comprehensive study that includes a 10-year financial plan. The strategy has two goals:

- Prioritising the implementation of WC and WDM, and
- Ensuring ongoing planning, management, monitoring, and an enabling environment.

The WC and WDM initiatives include:

- A water pipe replacement programme,
- An indigent domestic leak repair and meter replacement programme,
- A Stellenbosch water meter audit, and
- An in-house water services operation and maintenance programme.

Poverty reduction and improved water management are closely linked.

Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced in the late 2010's and the very low drought-causing rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in the early 2020's. The Western Cape has been fortunate with above-average rainfall in the last two years, and thus, no water restrictions have needed to be implemented since the previous drought ended.

Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

Table 50: Stellenbosch Municipal water supply systems

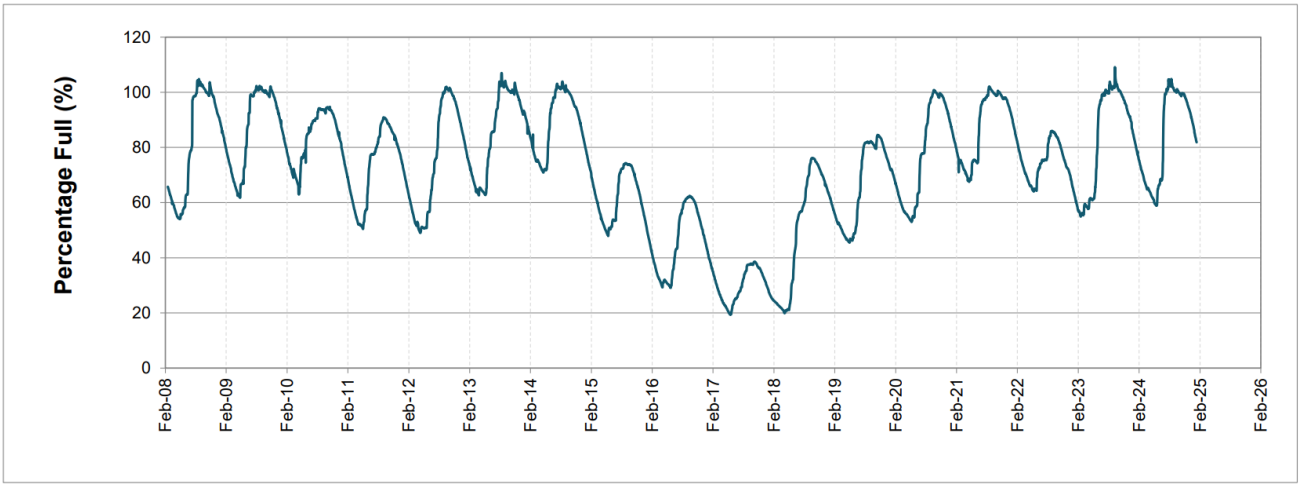
Other sources (boreholes)</td></tr>
</table>

Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek. The potable water supply from these works amounts to 28 Ml/d on average, and a further 12 Ml/d was obtained from the City of Cape Town during the 2024/25 financial year, ensuring a supply of approximately 40 Ml/d to the municipal area.



Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier, and Vlottenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact on water quality and quantity needs to be monitored and considered by the Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 48 reservoirs / holding tanks, and water towers, 36 water pump stations, 44 pressure-reducing valve installations, 734 kilometers of pipeline, and 84 water supply zones. The network is fully controlled and operated by a telemetry system. The telemetry system is outdated and is currently planned for an upgrade in the following three financial years.

The bulk water input into the water network for 2024/25 was 12 623 309 kl, with an annual average daily demand of 34.584 kl/day. About 34.3% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of

Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 38: WCWSS Storage Record (2008 – present)

Subject to a revised graph with the approval of a new WSDP

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. The maintenance of equipment is performed in-house and by specialist contractors.

7.3.7.1 Basic Services and Level of Services

- There is no backlog of basic water and sanitation services in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- The clinics, hospitals, and schools in the municipal area have adequate and safe water supply and sanitation services.
- All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.
- All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current service backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.7.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition, and the condition backlog is

more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. The update to the Pipe Replacement Prioritisation study will indicate what percentage of sanitation infrastructure is in poor or very poor condition and what the condition backlog is. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life, and the necessary capital funds must be allocated for this purpose. Maintenance activities have historically been focused on reactive maintenance as opposed to preventative maintenance. The Stellenbosch Municipality has, in recent years, increased its focus on preventative maintenance, and there are early signs of a positive effect on the failure rate of equipment on treatment works.

7.3.8 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme, which includes repairs to private leaks and the installation of water demand management devices. These devices restrict users to 400 litres of water per day. More than 1 753 devices have been installed, saving over 493 084 litres of water per day.

7.3.8.1 Climate Change

In terms of adapting to climate change, water systems will need to be more robust, and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers, and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind, could have an impact on water sources, particularly surface waters. It is, therefore, advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- Establish assurance of the supply levels of all water sources;
- Increase assurance of the supply of water resources by ensuring that there is at least 10% additional capacity (headroom) when considering the maximum 24-hour demand in the peak month of the year;
- Do not undertake new developments unless a proper investigation of the implications for water sources and sustainability in the long term has been undertaken.
- Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- The IRIS monitoring system, including the Blue Drop Awards system, is active in the municipality. The municipality did not receive a Blue Drop Award for the recent Blue Drop assessment period. The municipality received a No Drop score of 57% in the most recent No Drop audit per by DWS in 2023.

7.3.8.2 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over their land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and a 1:2-year storm in the urban areas, as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past, but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschhoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.8.3 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of all natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Due to the threat of reoccurring droughts and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality

implemented water restrictions to lower water consumption. No water restrictions are currently implemented by the Stellenbosch Municipality, and there is no indication that restrictions are needed prior to December 2025. A determination on future restrictions is normally made at the end of the rainy season.

The success of this initiative is largely dependent on the consumer's cooperation in taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received positive reaction from the community.

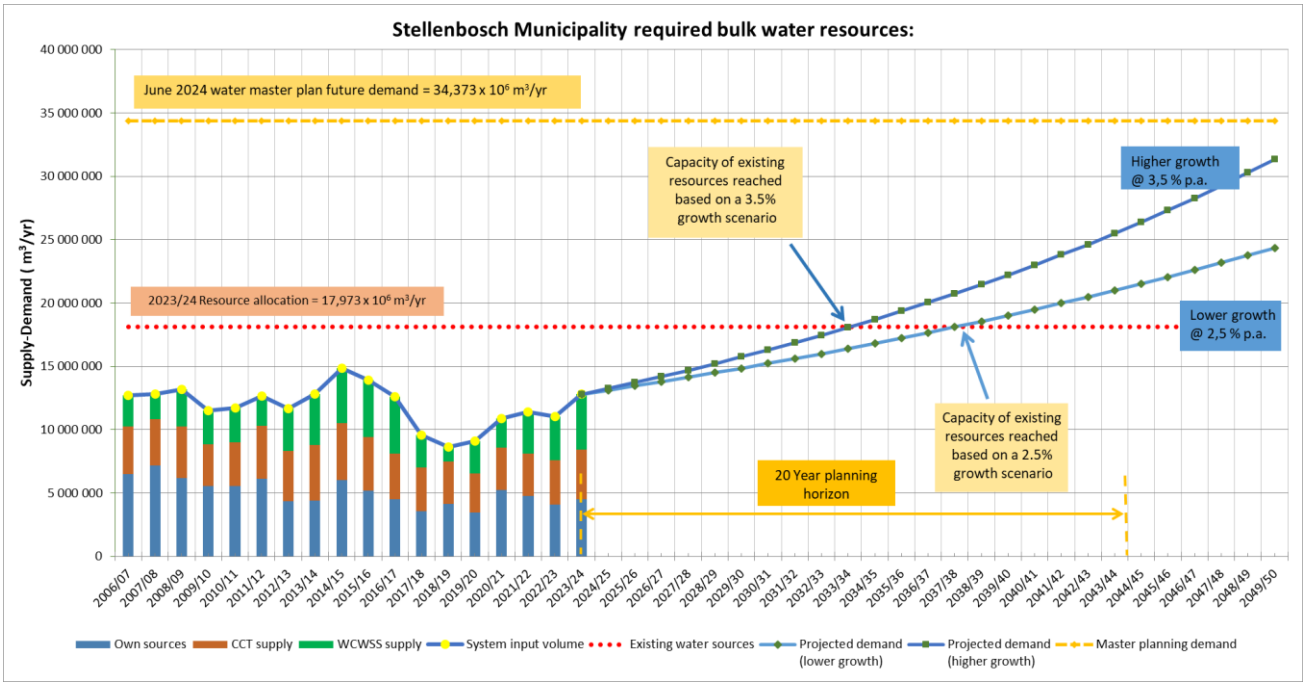
An update to the Water Services By-Laws will be undertaken in the 2024/25 financial year to be approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

The following planning documents are continuously updated to include the latest planning: the Water Masterplan, the Water Services Audit Report, and the Pipe Replacement Study and Model, and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.8.4 Backlogs in Water and Sanitation Services

A municipality, as a Water Services Authority (WSA), has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical, and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this, it is important that the backlogs within the water and sanitation infrastructure be addressed. Backlogs could be defined in three broad categories:

- Backlogs regarding access to basic water and sanitation services (basic water and sanitation services in terms of national norms and standards);
- Conditional backlogs (lack of maintenance); and
- Capacity backlogs (increase in consumers).



7.3.8.5 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first six (6) kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting private landowners as far as possible in addressing the current service backlog on farms.

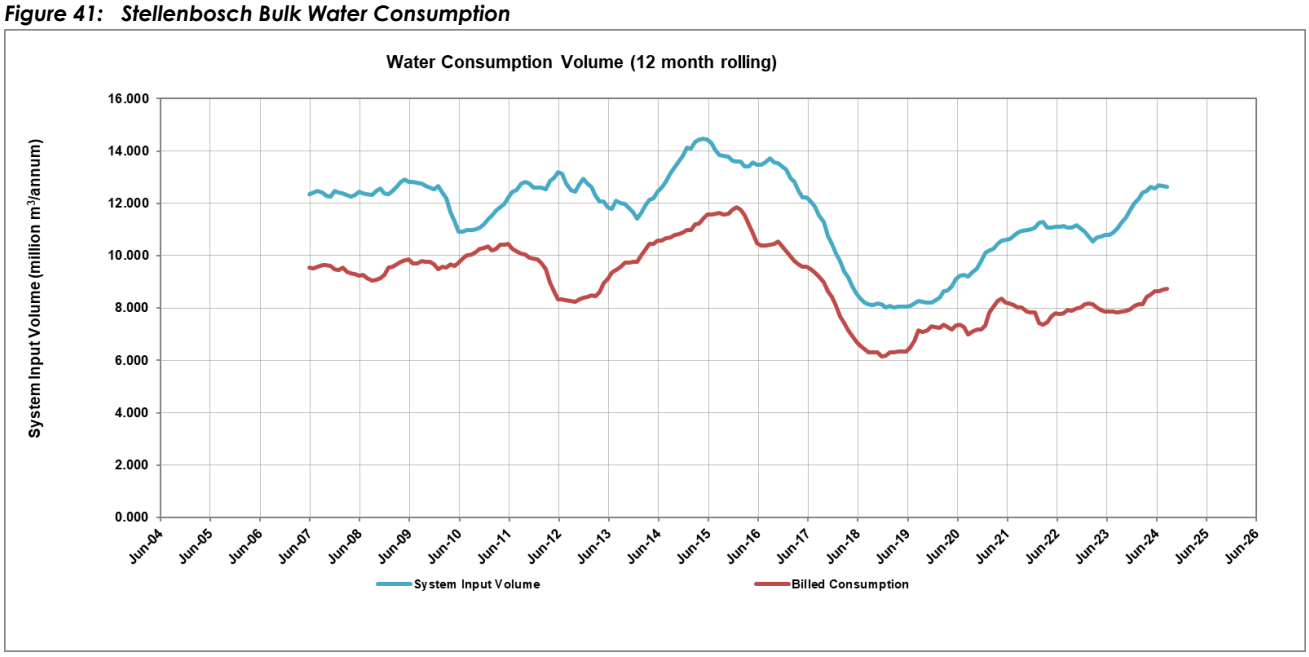
Figure 39: Water supply and accommodating growth (Total for WCO24)

Updated growth in demand: 20-year planning horizon (subject to a revised graph with the approval of a new WSDP)

Detailed water balance and future water demand projection models were developed as part of the WSDP process to adequately plan for the augmentation of the existing water sources. Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance Sheet for the 2023/24 financial year, the municipality recorded 31.2% for "non-revenue" water, which is an increase of 3.0% from the previous financial year, and 17.1% for real network losses. The non-revenue water for the 2023/24 financial year is 31.2%, which is above the target set of 25%. The real physical network losses are 17.1%, which is above the best practice value of 15%.

Figure 40: Water Losses from July 2022 to June 2023



System input volume (SIV): Jul 2023 to Jun 2024 ; kL (water demand in reticulation system)				**12 554 132**	**100%**
Potable water	Authorised consumption 79.4%	Revenue water 68.8%	Billed metered	8 631 963	68.8%
			Billed unmetered	0	0.0%
		Non-revenue water 31.2%	Unbilled metered	0	0.0%
			Unbilled unmetered	1 334 032	10.6%
	Water losses 20.6%		Apparent losses	439 983	3.5%
			Real network losses	2 148 154	17.1%

Non-revenue water (NRW) ; kL	**3 922 170**	**31.2%**
Real network losses ; kL	**2 148 154**	**17.1%**

7.3.8.6 Borehole Drilling in the Stellenbosch Municipal Area

Part of the drought mitigation plan was to manufacture and install water purification plants in the Stellenbosch Municipality water networks at strategic positions. The containerised water purification plants treat water up to SANS 241 standards before it is included in the water supply networks. This water is, however, more expensive compared to our Ida's Valley WTP supply and is not used unless necessary.

Figure 41: Stellenbosch Bulk Water Consumption

Subject to a revised graph with the approval of a new WSDP

7.3.9 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy, which includes a 10-year financial plan, has been developed. The strategy has two goals. The municipality will:

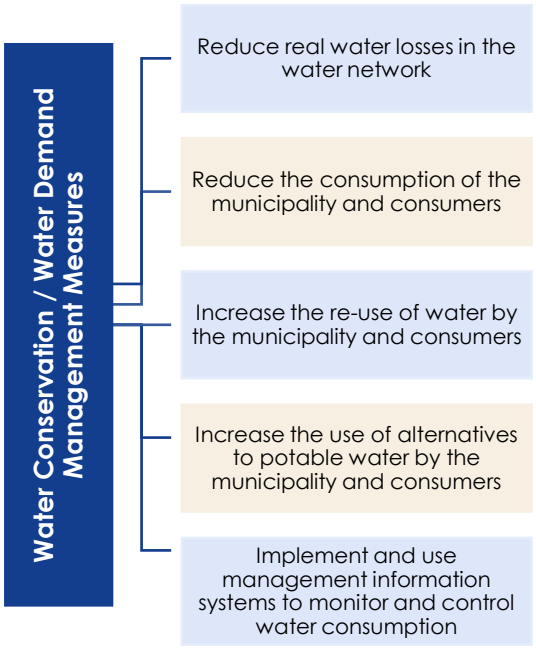
- Prioritise the implementation of the WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring, and an enabling environment.

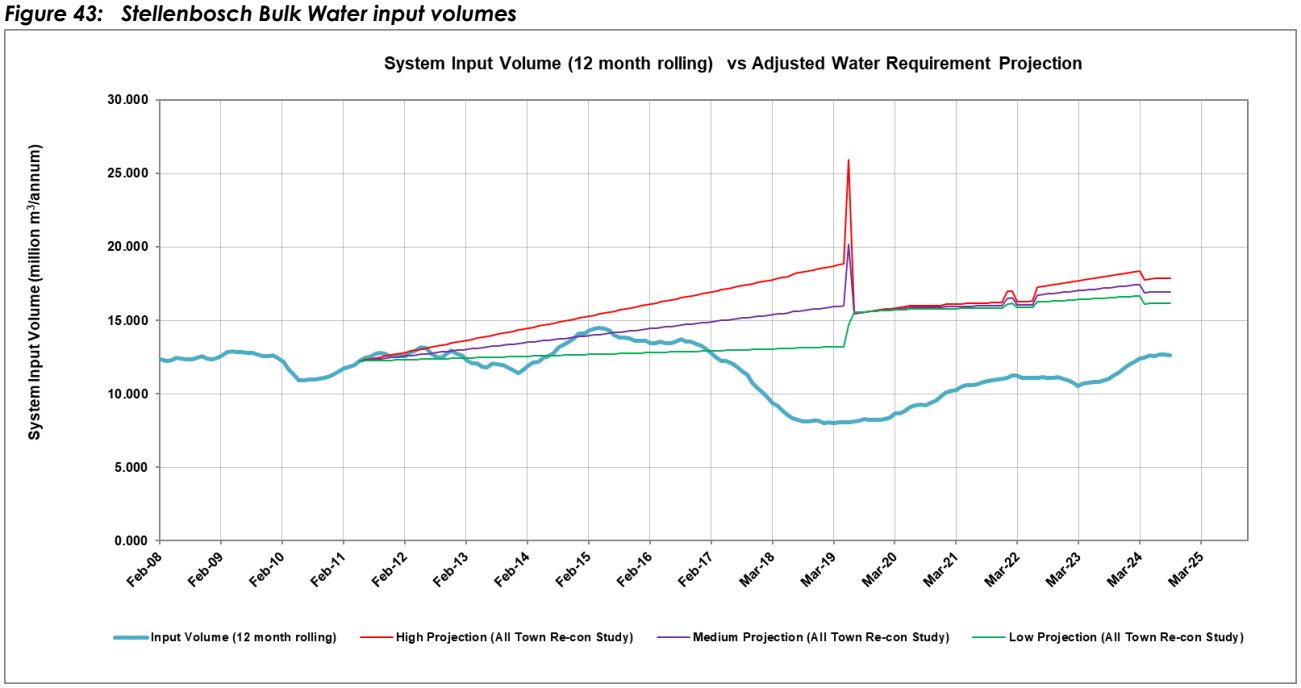
This long-term WC and WDM Strategy was approved by the Council on Tuesday, 25 February 2014, and has since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a lower environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years, which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident, with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Programme, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and non-revenue water losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 42: WC / WDM Measures





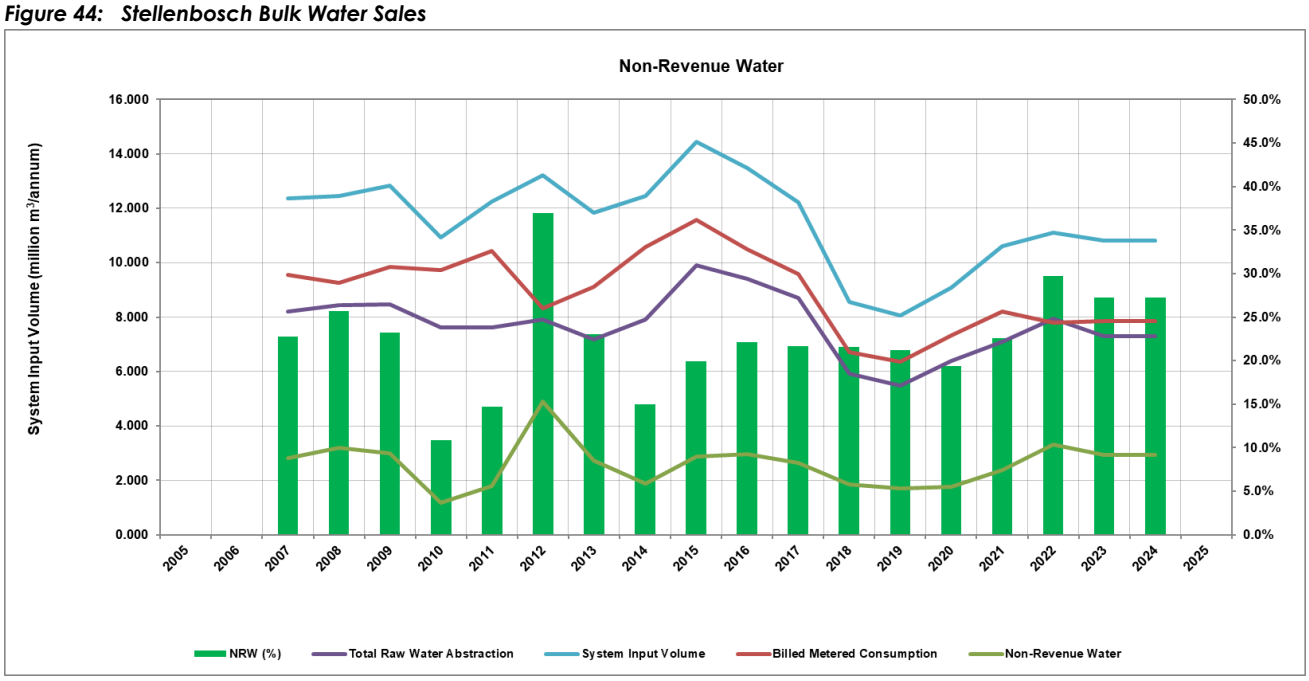


Figure 43: Stellenbosch Bulk Water input volumes

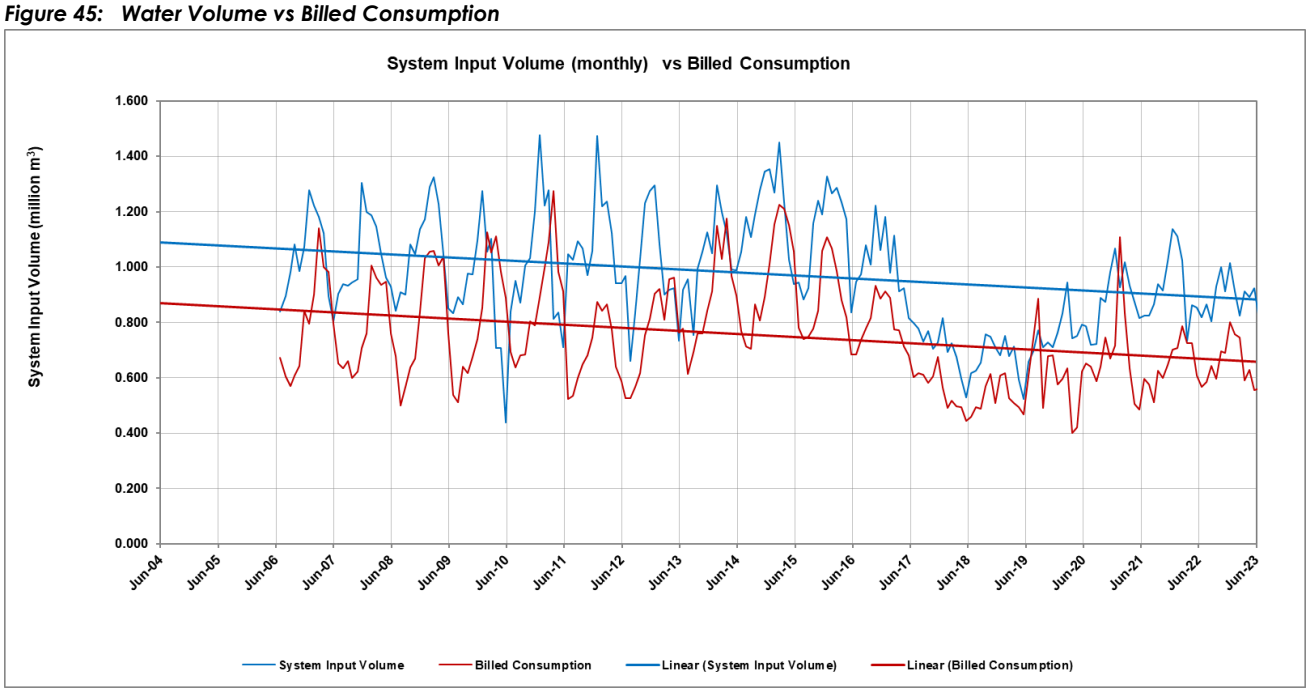

Subject to a revised graph with the approval of a new WSDP

Figure 44: Stellenbosch Bulk Water Sales

Subject to a revised graph with the approval of a new WSDP

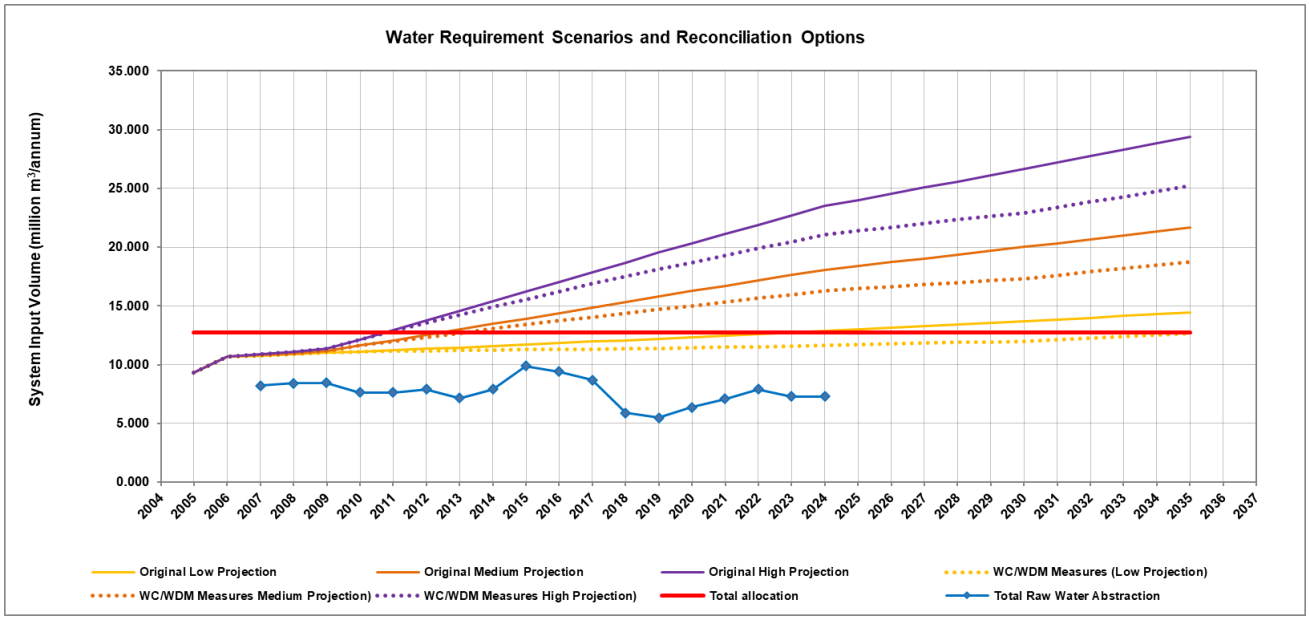

Figure 45: Water Volume vs Billed Consumption

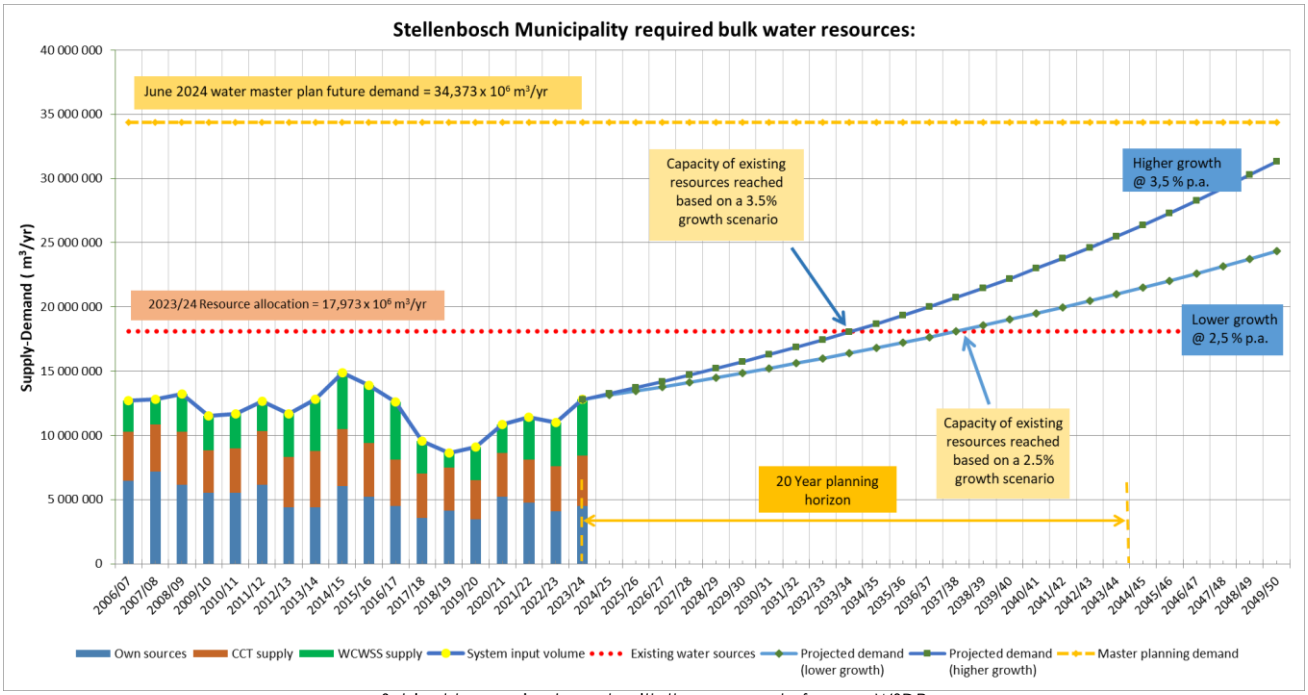
Subject to a revised graph with the approval of a new WSDP

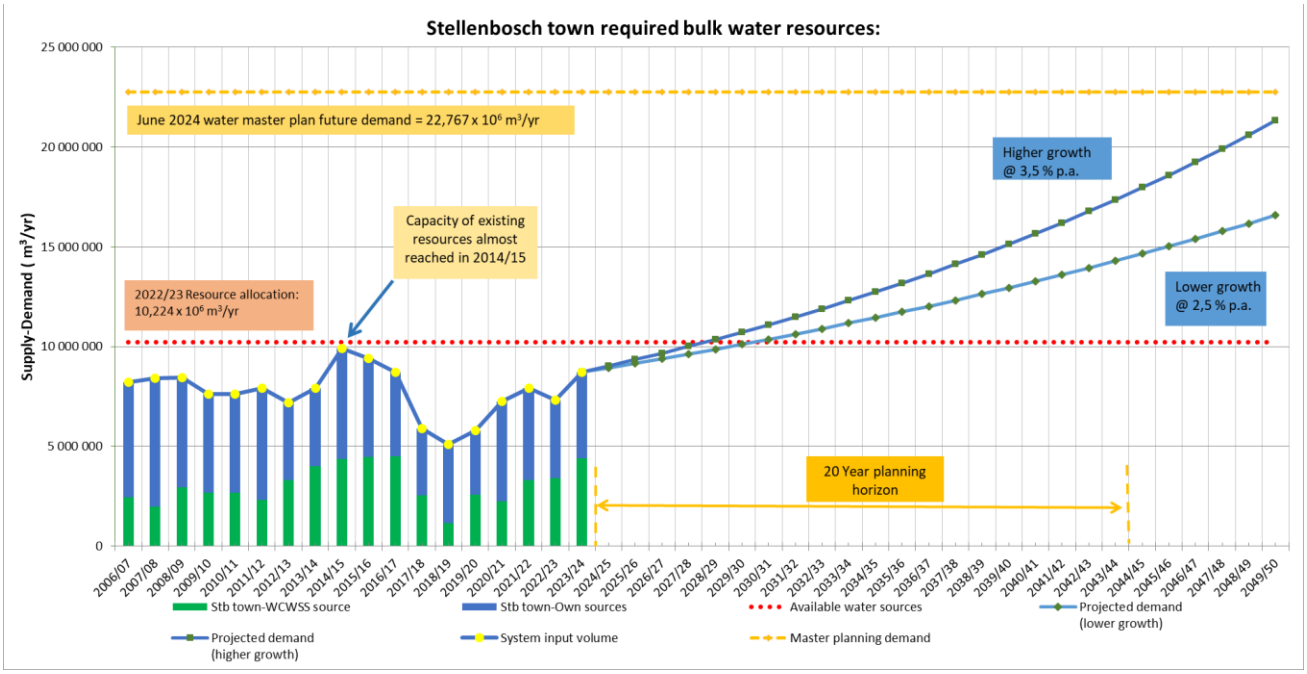
The unrestricted growth in water demand versus the growth in water demand, assuming WC and WDM are implemented as shown in the figure below.

Figure 46: Unrestricted versus WDM growth in demand



Subject to a revised graph with the approval of a new WSDP

Note that each town in the municipality have water supplies independent of each other. When implementing WC / WDM in the municipality, it is critical to implement it in those towns where the existing supply will become inadequate for the demand as soon as possible. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.



The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 47: Updated growth in demand 20-year planning horizon

Subject to a revised graph with the approval of a new WSDP

Figure 48: Bulk Water Resources

7.3.10 Safety and Security Strategy

The purpose of the Safety and Security Strategy is thus to reduce crime and increase safety through an integrated, multi-pronged approach. The strategy is revised annually to ensure that it remains relevant to the real challenges of the day. To this end, the municipality partners with a range of stakeholders, ranging from the Western Cape Government, the Cape Winelands District Municipality, SAPS, and Stellenbosch University, as well as various private, public, and community-based safety and security organisations and institutions.

The Stellenbosch Safety Partnership (SSP) serves as an operational platform for safety and security entities to plan and operationalise enforcement plans. It's very important to break down barriers between departments and private organisations that have similar goals. Without an integrated, multidisciplinary approach that includes everyone, no strategy will work. This method has been shown to work in reducing crime. The SSP is open to any registered entity that contributes towards safety and security initiatives in the Stellenbosch Municipality.

The Stellenbosch Municipality has and continues to invest in and support neighbourhood watches (NHWs) and mobilise communities to support them. This includes direct assistance to NHWs to formalise their registration with the Department of Police Oversight and Community Safety (POCS) so that they can qualify for financial support and participate in sanctioned safety projects. The NHWs form a critical part of the community-based safety focus of the municipality in that they are located in the communities and understand the particular challenges faced by those communities. In addition to the support received from POCS, the municipality continues to provide training for under-resourced neighbourhood watches and provides them with radios for swift and effective communication with the municipal control room as and when required. To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services (SAPS);
- Department of Police Oversight and Community Safety (POCS);
- Cape Winelands District Municipality (CWDM);
- Neighbourhood watches and farm watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Winelands Safety Initiative (WSI);
- Department of Correctional Services (DCS);
- Department of Justice (DoJ);
- University of Stellenbosch (Campus Security); and
- Stellenbosch Municipality
  - Law Enforcement
  - Traffic Services
  - Fire and Rescue
  - Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting the Council's commitment to maintaining strong partnerships with primary law enforcement agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

The control room is fully functional and situated at the Stellenbosch Fire Department. The municipality still strives and will continue to, as part of the strategy, to provide a space where all safety and security stakeholders can jointly monitor and communicate with each other on safety and security matters. This includes the monitoring of municipal bylaw transgressions, criminal activity, emergency response in case of disasters, emergencies, and a range of other safety and security-related incidents.

One dedicated emergency number is available to residents within the municipal boundaries, which will mobilise all relevant units in response to alerts received on this number: **021 808 8999.** Additionally, the control room also monitors a dedicated WhatsApp number for general and safety complaints within the municipal boundaries of Stellenbosch. The WhatsApp number is **079 622 4722.**

All registered NHWs and security companies registered with the SSP have been and are in the process of being allocated space in the control centre.

Awareness initiatives have been and will continue to be launched, as they contribute to making communities aware of crime prevention tips and other preventative tips, for example, fire safety and what to do in case of disasters. This will be a joint approach between role-players, supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives, for example, road safety (crossing of roads).

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024 area. The purpose of the CSF is to promote the development of communities in a safe environment and provide access to high-quality services at the local government level through multi-agency collaboration between the different spheres of government and communities. The CSF, as a multi-sectoral structure, would champion the coordination, integration, and implementation of crime and violence prevention and community safety initiatives. The CSF has three clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Urban Design.

7.3.10.1 Fire Services

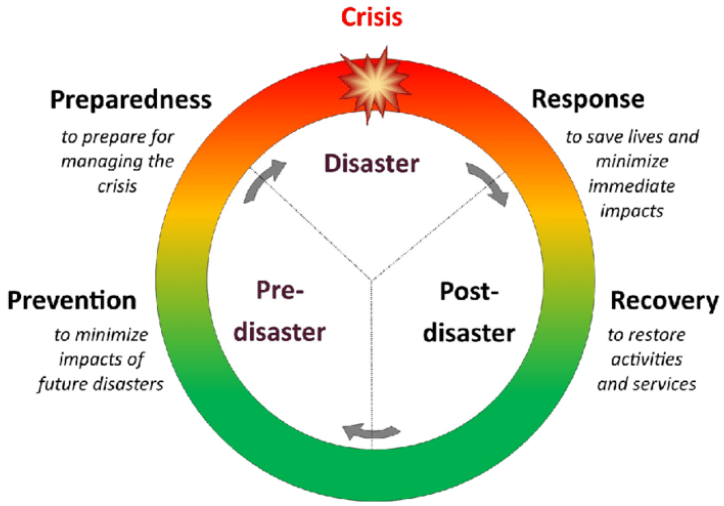
The Section: Fire and Rescue is dedicated to the provision of services that seek to safeguard the public against fires, other natural and man-made disasters, and emergencies. Stellenbosch Municipality currently has three fire stations located in Ida's Valley, Klapmuts and Franschhoek. The new Jamestown fire station is currently in its planning phase.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- Integrated development planning towards uniform services;
- Coordination and regulation of local authority fire services, designated fire authorities, and volunteer fire associations;
- Development of specialised fire services capacity to deal with specialised fire risks prevalent in the area, such as veldfires, chemical fires, informal settlement fires, etc.;
- Development of specialised dangerous goods incident response capacity to perform incident stabilisation and perform oversight of cleaning operations;
- Development of specialised rescue services capacity focusing on the rescue disciplines prevalent in the area of jurisdiction as a priority;
- Coordination of the standardisation of infrastructure, vehicles, equipment, and operational procedures;
- Facilitation and coordination of the training and development of practitioners;
- Development and facilitation of the implementation of standardised municipal by-laws;
- Coordinate planning for the provision of fire safety and prevention;
- Development, implementation, and maintenance of mutual aid agreements amongst the local fire services, designated fire authorities, Fire Protection Associations, and volunteer fire associations;
- Development, support and implementation of community-based fire safety and prevention programmes;
- Establishment and maintenance of a District Fire Service Coordination Forum;
- Preventing the outbreak and or spread of a fire, by making arrangements amongst others for: -

- the provision of information, publicity, training, education, and encouragement in respect of the steps to be taken to prevent fires and death, or injury by fire.
- the giving of advice, on request, about – how to prevent fires and restrict their spread in buildings and other property; the means of escape from buildings and other property in case of fire;
- conducting regular and random fire safety inspections at any premises where the Chief Fire Officer or his or her designate deems necessary.
- providing advice on the means of escape from buildings and other property in case of fire;

- Fighting and extinguishing a fire; by making arrangements amongst others for: -
  - having sufficient staff, equipment, and vehicles at its disposal to deal with the fire risks in its area of jurisdiction – a risk-based approach.
  - the development and implementation of standard operating procedures for use during firefighting operations; and
  - call taking and dispatching facilities training for dealing with incoming calls to report fires and summoning personnel, amongst others.
- Protection of life and or property against fire or other related danger.
- Rescue of life and or property from fire or another form of entrapment.
- Rendering of emergency medical care.
- Performance of fire safety activities.
- Participation in special events planning.
- Provision of fire resilience training to fire practitioners and civil society at large.
- Maintenance of fire service equipment, infrastructure and or materials.
- Conducting fire risk assessments.
- Provision of training to fire services practitioners.
- Procurement of equipment, materials and other supplies required to perform the functions optimally.
- Provision of support in the implementation of the Disaster Management Act, 2002 (Act No. 57 of 2002.
- Performance of any other function connected with any of the matters contemplated in paragraphs (m) to (v).



7.3.10.2 Disaster Management

This unit primarily performs a coordinating function and implements measures aimed at:

- Preventing or reducing the risk of disasters;
- Mitigating the severity or consequences of disasters;
- Emergency preparedness;
- A rapid and effective response to disasters; and
- Post-disaster recovery and rehabilitation.

The figure below is an illustration of the disaster cycle:

Figure 49: Disaster Cycle

7.3.10.3 Traffic Services

Stellenbosch Municipality has a legislative mandate to provide traffic services to the general public and its community and to ensure safe road usage in the municipal area. Traffic Services is committed to managing, controlling, and improving road safety in the municipal area by providing effective Traffic Administration and Traffic Law Enforcement services.

This will be achieved through the implementation of specific operational activities throughout the year, which focus on enforcement and education. The enforcement of public transport violations, speed violations, and sustained education at schools will be a specific focus for this year.

Another focus is also to improve the smart policing concept by optimally utilising technology for our officers, fine devices, and other policing techniques to provide effective and efficient services at our Motor Vehicle Registration and Licensing, Driver License Testing Centre, and the Vehicle Testing Centre.

The Traffic Management Plan contains the full spectrum of road safety programmes and projects across all functions, stakeholders, and users in WC024. The plan describes the various challenges to road safety and presents a range of action plans to address or mitigate these challenges.

Traffic Services is committed to:

- Ensure the road safety of all members of the community by providing quality traffic services in all its divisions (Traffic Administration, Traffic Law Enforcement, Licensing, Education, and Accident Statistics);
- Reducing the accident rate, which will result in fewer fatalities and injuries;
- Increase the voluntary compliance of road users with respect to the rules, legislation, and regulations of the road;
- Improve management practices throughout all traffic services divisions; and
- Provide a safe environment by integrating best practices with internal and external agencies and role players.

Traffic Services will focus on:

- Ensure the constant free flow of traffic;
- Enforcement of the National Road Traffic Act and the National Land Transport Act;

- To achieve a measurable improvement in road user behaviour, including the skill level of drivers, safer decision-making, and better regard for other road users;
- To reduce the incidence of traffic offences, including speeding, dangerous driving, drunk driving, driving under the influence of a narcotic substance, dangerous overtaking, moving violations, etc.;
- Parking enforcement / management;
- To ensure that un-roadworthy (including overloaded) vehicles are removed from the road;
- Point duty during the morning, midday, and evening peak at critical locations, during loadshedding, as well as school points;
- Special operations team to focus on driving under the influence of alcohol or drugs, illegal racing, and transportation of illegal substances;
- Road safety training and education are provided for crèches, nurseries, schools, primary / high schools, colleges, and universities, as well as for pedestrians, cyclists, farm workers, rehabilitation centres and youth groups. Training also includes learner's license programmes for youth and scholar patrol and level-crossing awareness;
- Events (road closures, escort duties);
- Public transport activities and checking of the roadworthy status of buses and minibuses;
- ANPR (automatic number-plate recognition) focusing on offenders with outstanding fines;
- Conducting driving and learner's license testing;
- Conducting driver's license conversions / renewals;
- Accepting and processing Professional Driving Permit (PrDP) applications;
- Vehicle registration and licensing;
- Ensure effective court section functioning with the assistance of the appointed external service provider to process all notices; and
- Sound financial management of the court section.

7.3.10.4 Law Enforcement

With the review of the Safety Strategy, the municipality has had to adapt to the changing environment of crime in its area and actively pursue closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities, which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all three phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas, which make it possible to track the direction of suspect vehicles linked to crimes picked up by these. The municipality continuously invests in CCTV to enhance safety. The municipality also has a CCTV Masterplan, which is a ''living'' document and is frequently updated based on needs identified concerning safety.

The use of neighbourhood watches to enhance public safety within the CBDs under the auspice of the "eyes and ears" project has assisted with crime prevention and is deemed to be a successful project.

To strengthen municipal law enforcement, the department recruits Peace Officers through the Expanded Public Works Programme (EPWP), in collaboration with the Department of Police Oversight and Community Safety (POCS). This initiative enhances enforcement capacity, increases visibility, supports by-law compliance, and contributes to crime deterrence.

7.3.10.5 The focus of Law Enforcement

- Effective monitoring and surveillance of CCTV cameras with reaction units to respond immediately;
- Establishment and implementation of the CBD Safety Project—a zero-tolerance approach;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Deployment of a 24/7 Tactical Response Unit (TRU);
- Strengthening coordination of communication strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of the Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compile a Security and Safety Camera Masterplan for the Stellenbosch Municipal area;
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to neighbourhood watches.
- Deployment of Peace Officers to enhance law enforcement capacity and increase visibility
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) Policy

7.3.11 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines, developed in terms of Section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and Section 3.6 of the National Disaster Management Framework, 2005 (NDMF), that provide a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)
a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area; b) Coordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and c) Regularly review and update its plan, and through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

7.3.11.1 The Key Outcome of the Disaster Management Plan

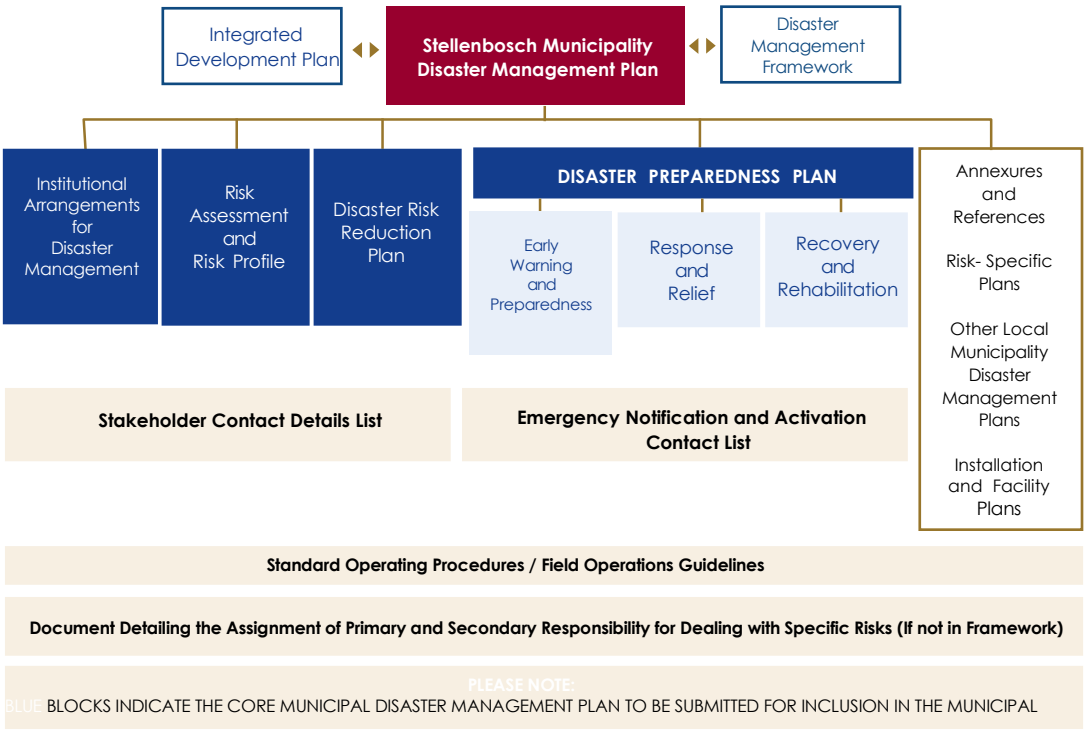
The Disaster Management Plan (DMP) is reviewed annually and:

- anticipates the types of disasters that are likely to occur in its area of jurisdiction and their possible effect;
- places emphasis on measures that reduce the vulnerability of disaster-prone areas, communities, and households at risk;
- promotes disaster management research;
- identifies and addresses weaknesses in capacity to deal with disasters;
- provides for appropriate prevention and mitigation strategies;

- facilitates a rapid and effective response to disaster; and
- Post-disaster recovery and rehabilitation.

7.3.11.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.



7.3.11.3 Linkage to the Disaster Management Framework of the CWDM

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial, and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.11.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 50: Structure of Disaster Management Plan

7.3.11.5 The key responsibilities of the Stellenbosch Municipality Disaster Management

The Municipal Disaster Centre must:

- Establish and maintain institutional arrangements that will enable the implementation of the Act;
- Implement measures to develop progressive risk profiles to inform municipalities' IDP processes for disaster risk reduction and to determine the effectiveness of specific disaster risk reduction programmes and projects undertaken;

- Facilitate and regularly update disaster risk assessments within the municipal area;
- Supply the relevant Provincial Disaster Centre with risk assessment results;
- Facilitate the development, implementation and maintenance of disaster risk reduction strategies that will result in resilient areas, communities, households and individuals;
- Monitor the integration of disaster risk reduction initiatives with development plans;
- Facilitate the development of response and recovery plans to ensure a rapid and effective response to disasters that are occurring or are threatening to occur, and to mitigate the effects of those disasters that could not have been prevented or predicted;
- Leading coordination of disaster response actions;
- Facilitate and coordinate the development of integrated contingency plans for disaster response and recovery;
- Submit copies of its disaster risk management plans to the National Disaster Centre, the Provincial Disaster Centre, neighbouring disaster management centres and, where applicable, disaster risk management entities in neighbouring countries;
- Develop and implement mechanisms for creating public awareness to inculcate a culture of risk avoidance;
- Facilitate and promote disaster risk management education, training and research in the municipality;
- Implement and maintain dynamic disaster risk management monitoring, evaluation and improvement programmes;
- Measure performance to evaluate the effectiveness of disaster risk management and risk reduction initiatives and submit copies of evaluation reports to the National Disaster Centre and the Provincial Disaster Centre;
- Monitor compliance in the municipal area with the key performance indicators outlined in the disaster management framework; and
- Make recommendations regarding funding disaster risk management in the municipal area and the initiation and facilitation of efforts to make such funding available.

Two (2) disaster assessments have been completed. One assessment has been completed to date for the 2025/26 financial year.

7.3.12 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. However, Sections 152 and 153 of the Constitution outline the objectives of local government, which include promoting social and economic development within a municipality's financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning. Local economic development involves the identification, development and utilisation of economic opportunities to benefit local businesses and to create opportunities to improve the lives of residents.

The economic growth metrics, like the GDP, differ from LED outcomes such as better life expectancy, lower infant mortality, literacy, and poverty levels.

Formal and Informal Economy

The economy blends formal and informal sectors across areas like manufacturing, tourism, services, and construction. Both ends form a continuum. Therefore, municipalities must create jobs along this continuum while ensuring health, safety, planning, and management. High unemployment links to crime, so all work must be valued. As the formal economy struggles globally, more people rely on informal work.

Multi–Stakeholder Role

In creating economic opportunities, multi–stakeholder efforts are required from the municipality, the private sector and local communities.

7.3.12.1 Strategic approach

The strategic approach to LED in general is to create economic opportunities for all citizens residing in the Stellenbosch Municipal area. It is imperative that the municipality, in partnership with role players in society, review its strategy going forward to ensure better resilience in its economy to deal with future challenges and contribute towards better livelihoods for all.

Technology changes, especially connectivity, have become more important for businesses and the government to do business. This was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following are the key priorities:

- Boost competitiveness through networking, responsive services, and business – focused structures;
- Promote new investment and business growth via spatial planning, zoning, infrastructure, and financial tools;
- Support informal economy expansion with zoning, infrastructure, and finance;
- Build an enabling environment with policies, services, and conditions for businesses to thrive in; and
- Link formal and informal sectors through dedicated networking projects.

7.3.12.2 Implementation Plan: Local Economic Development (LED)

7.3.13 Community Development Strategy

Moreover, Schedules 4b and 5b list the functions of local government to include the following, which have relevance to community development functions:

- Childcare facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure, inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sports fields (regarding their contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA, which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation, and realisation of national policies. Because these services are primarily provided by the national and provincial spheres of government but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in Chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23–26) identifies four interrelated characteristics of the role and function of local government related to community development:

- Maximising social development and economic growth: The role and function of the local government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves the regulation of service delivery. This means that the local government is not directly responsible for services but rather takes steps (i.e., strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided, and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups, and private sector institutions. "Developmental local government must provide a vision and leadership for all those who have a role to play in achieving local prosperity." An IDP could contribute to proper coordination. To this extent, a Community Safety Forum includes a Social Cohesion committee to promote community safety.
- Democratising Development: Local government practices should be aimed at the involvement of "…citizens and community groups in the design and delivery of municipal programmes".

Coordination should lead to democratic "…leadership, encouragement, practical support, and resources for community action." Another key aspect is that democratic development should aim to involve all community groups; and

- Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.
- It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at improving service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and non-profit organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups, and social issues are also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

- The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development, forging relations with national, provincial, and local stakeholders, and the generation of current social data; and
- The development of six vulnerable groups (youth, gender, children, elderly, people who are homeless, and people living with disabilities) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

To date, 7 network meetings have been facilitated for the 2025/26 financial year.

7.3.14 Human Resource Strategy

A high-quality and responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability, and social mobility, is essential if the municipality is to realise its IDP ambitions. As such, Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 59: Clarifying the role of HRM&D vis-à-vis the manager and employees

HRM	Line Managers	Employees
• Develop HRM&D strategies, principles, policies, and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure the application of appropriate best practice HRM&D service. • Partners with line management in effective people practices • Enables change and transition. • Facilitates the assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback.	• Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies, and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building their own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas.	• Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for your own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor, and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. Therefore, the Council, management, staff, and trade unions must "own" this framework, making it not just an HR document. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality's environment.

Table 60: Key HR Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and service planning and resourcing occur sustainably over the long term and draw on the expertise of other service delivery agencies, the private sector, and the university.	Strategic HR Management.
SFA 2: Green and Sustainable Valley	Focusing more strongly on the environmental planning and management function, including appropriate resourcing.	Strategic HR Management. Talent Management. Learning and Development.
SFA3: Safe Valley	Securing adequate permanently employed HR, facilities, and equipment (specifically fleet) to undertake the specialist functions of traffic management, fire and rescue services, and disaster and event management on a 24/7 basis and to comply with legal standards. Establishing adequate, integrated law enforcement capacity is present in every ward of the municipality.	Strategic HR Management. Learning and Development.
SFA 4: Dignified Living	Ensuring the delivery of a comprehensive range of services to vulnerable groups and the coordinated cooperation of service providers at all levels in the delivery and management of services to these groups.	Learning and Development.
SFA 5: Good Governance and Compliance	Ensuring that functional areas have the capacity and readiness to deliver services in terms of short-, medium-, and long-term objectives and targets. Ensuring that all staff have the opportunity for leadership development within their functional areas and municipal management generally. Ensuring regular performance management of staff at all levels within the organisation. Undertaking strategic planning for the longer and shorter terms, the municipality, and local areas Implementing regular auditing of processes. Celebrating excellence in service delivery, both external and internal to the municipality. Renewing intergovernmental efforts to establish a municipal court in Stellenbosch.	Strategic HR Management. Talent Management. Learning and Development. Performance Management / Reward and Recognition. Strategic HR Management. HR Risk Management. Reward and Recognition. Talent Management.

7.3.15 ICT Strategy

7.3.15.1 Background

Information and Communication Technology (ICT) systems and services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government, imposes major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view of ensuring alignment with the municipality's strategy. The emphasis is placed on identifying the municipality's new requirements and opportunities for information and communication technology to move towards meeting the ICT-related requirements of the municipality and management. The revised ICT Strategy was submitted to the ICT Steering Committee on 14 March 2024.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources, and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- Provisioning of municipal financial management and payroll management software applications;
- Hosting of the municipal website;
- E-mail and internet services;
- Data storage;
- Data recovery;
- ICT planning;
- Provisioning of the network, wireless networks, and telephony services;
- End-user support for the ICT environment;
- Disaster Recovery Management;
- Business Continuity;
- ICT Risk Management;
- ICT contract management; and
- Public Wi-Fi.

7.3.15.2 The Mission and Vision of ICT

ICT's mission is to deliver cost-effective ICT infrastructure and ICT business solution services that will provide the most enabling environment to assist the Stellenbosch Municipality in delivering sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities, which include:

- Cost-effective solutions;
- Quality Service Delivery;
- Ongoing performance monitoring; and
- Aligned to business processes.

The vision of the ICT Department is to become a trusted and reliable information and communication technology partner to enable Stellenbosch Municipality's management and end-users to build a better town using cutting-edge ICT solutions.

7.3.15.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive to achieve its goals of closing the gap between the municipality and the community by improving services and engagement. These goals include:

- Understanding the needs of the community;
- Always deliver a consistent and quality service; and
- Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:
Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent in efficient cities with fewer red-tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth and, in response, applies information and communication technologies to enhance performance and urban services to respond to demand while reducing consumption, waste, and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information, support more efficient delivery of goods and services, and contribute to the greater vibrancy of cities.

A smart city is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public, and improve both the quality of government services and citizen welfare.

8.1.1 Guiding Principles to Create Inclusive Smart Cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions must be made regarding the identification, planning, and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by and respond to the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership, and collaboration; and
6. It should be sustainable, resilient, and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

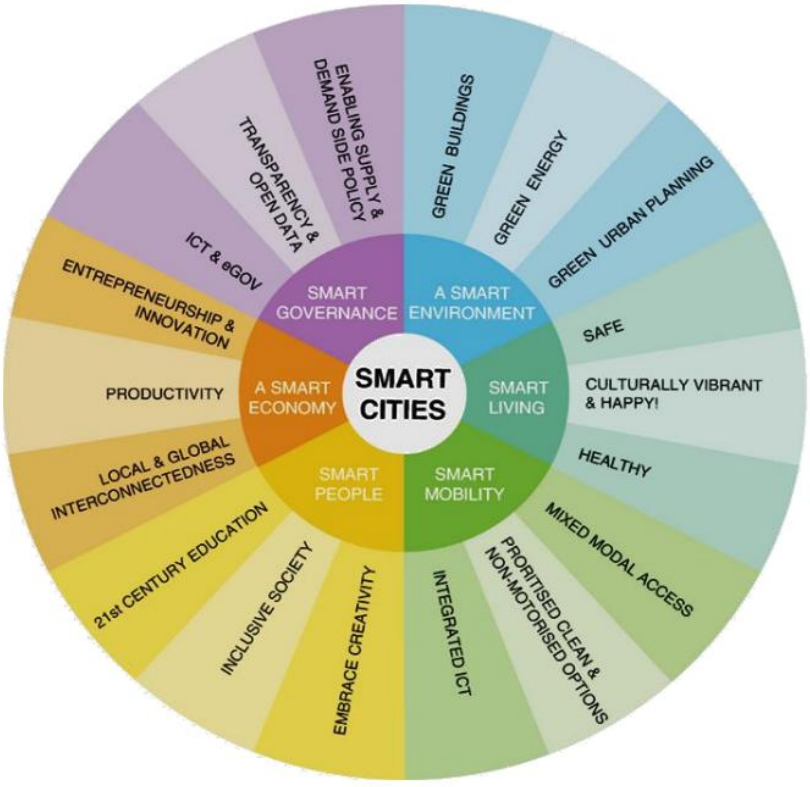
Smart Governance

Transform the institutional systems, processes, and organisational structure into a high-performance organisation to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy



Grow and diversify the local economy through the attraction of new investment, skills development, and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The Nature and Purpose of a Proposed Smart City Initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 51: Smart City Components and Initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will require the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027), Stellenbosch Municipality will emphasise smart governance with a focus on e-governance.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning, and implementing smart city initiatives that are appropriate to the theme of smart governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and the respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five–Year Plans

8.2.1 Executive Mayor

In developing the draft 4th review of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans to respond to the needs of the community, but also ensure that development is sustainable, spatially integrated and that service delivery follows a clear long – term vision.

As this review of the IDP, constitutes the fourth review of the 5th Generation IDP 2022 – 2027, the municipality's five – year strategic roadmap reflects measurable progress and notable impact in the implementation of the identified projects, programmes, and initiatives since the first adoption of the 5th Generation IDP by Council in 2022. In making greater Stellenbosch an integrated valley of opportunity and innovation, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable, and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpies across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation; and

Mayoral Outcome 9: Alternative Energy.

8.2.1.1 Mayoral Outcome 1: Clean, accountable and responsive local government

8.3 Mayoral Portfolios

The mayoral portfolios serve as a strategic instrument that enables the Executive Mayor to advance and achieve the mayoral priorities set for the period 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes.

The performance-based strategic priorities for the 4th review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management;
3. Portfolio: Sport, Youth, and Culture;
4. Portfolio: Planning, LED, and Tourism;
5. Portfolio: Financial Services;
6. Portfolio: Community Development and Protection Services;
7. Portfolio: Corporate Services;
8. Portfolio: Infrastructure Services; and
9. Portfolio: Parks, Open Spaces and Environment.

CHAPTER 9:
Public Interest and Expression of Needs

9.1 Community Participation

Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) requires municipalities to create a culture of community participation. According to Section 16(1)(a)(i) of the MSA, "A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance and must, for this purpose, encourage and create conditions for the local community to participate in the affairs of the municipality, including in the preparation, implementation, and review of its integrated development plan in terms of Chapter 5." It is therefore essential to have effective public participation structures in place.

The SDF, IDP, Budget, and sector plans, as well as major municipal policies, bylaws, and decisions, should be engaged to ensure that they are designed and implemented for and with the community. This also adds to the credibility of the needs reflected in the IDP, the Budget calculated to address these needs, and the SDBIP drafted to implement programmes and projects that reflect the communities' needs.

The growing trend of mature and constructive discussions from the public, the level of complexity, and the investment made in understanding the municipality's business are encouraging. The direct participation and involvement of the ward councillors, communities, and stakeholders in the identification of ward-based priorities and their involvement in the public participation process have added great value to the maturity and quality of the discussions between the public and the municipality. Ward councillors are a critical link in connecting the municipality with the public. As members of the Council and recipients of all the decisions taken by the Council, it positions Councillors strategically to ensure that the municipality not only understands the needs of the community better but also provides the public with honest and accurate feedback on the municipality's initiatives. These endeavours are supported by well-functioning ward committees. Councillors are, however, encouraged to always adhere to the code of ethics for councillors and to always act with the utmost integrity and accountability towards their constituents and the municipality, as this is the only way in which to form a responsible local government.

Public participation takes place through various means and platforms and is often tailored to suit a specific audience or community. Importantly, communities from different socio-economic backgrounds use different platforms to communicate. It is important to cater to all scenarios and to utilise all available platforms to their optimum potential, given that a certain degree of apathy exists in certain communities.

Further feedback will be provided on the comments captured in written submissions made via the various platforms created for public participation. To ensure that the public participation process is a two-way process, all comments have been carefully considered and discussed with internal departments.

9.2 Public Participation in the drafting of the 4th review of the 5th Generation IDP 2022 – 2027

Stellenbosch Municipality implemented the IDP public participation process from **08 - 30 September 2025**, with physical IDP open days from **08 – 15 September 2025**. This public participation process was carried out during the analysis phase of the IDP review cycle to identify the community's needs for developing the draft 4th review of the 5th Generation IDP 2022 – 2027 and draft Budget (MTREF). Following Council's approval of the draft IDP and Budget on 31 March 2026, the documents were published for public scrutiny and input for a period of no less than 21 days. In addition, a series of municipal IDP and Budget open days was hosted from **07 - 28 April 2026** for the community and stakeholders to submit their verbal and written input.

As official communication platforms, Stellenbosch Municipality, utilises the communication tools in accordance with the approved Public Participation Policy. At the outset of each public participation period, a link to an electronic submission form is posted on the municipal website and shared via WhatsApp, Facebook, and email. Hard copies of the 'IDP and Budget Comment' forms are distributed to ward offices, municipal libraries, and satellite offices for community members to have access to electronic platforms to fill out the forms by hand.

Community members, as well as other interested and affected parties, are encouraged to attend and actively participate in the physical IDP and Budget open days being hosted within their respective wards or areas. The open days function as a comprehensive municipal service desk for the community to get information on municipal services and engage in direct dialogue with municipal departments to express concerns and pose enquiries. The community can participate in any of the open days at the specified venues as published on the different communication platforms. The open days are more of a decentralised meeting at the many service desks established by each directorate. While services including indigent registration, housing demand registration, and unemployment database registration are not provided during the open day, information regarding these services is accessible to communities at the service desk.

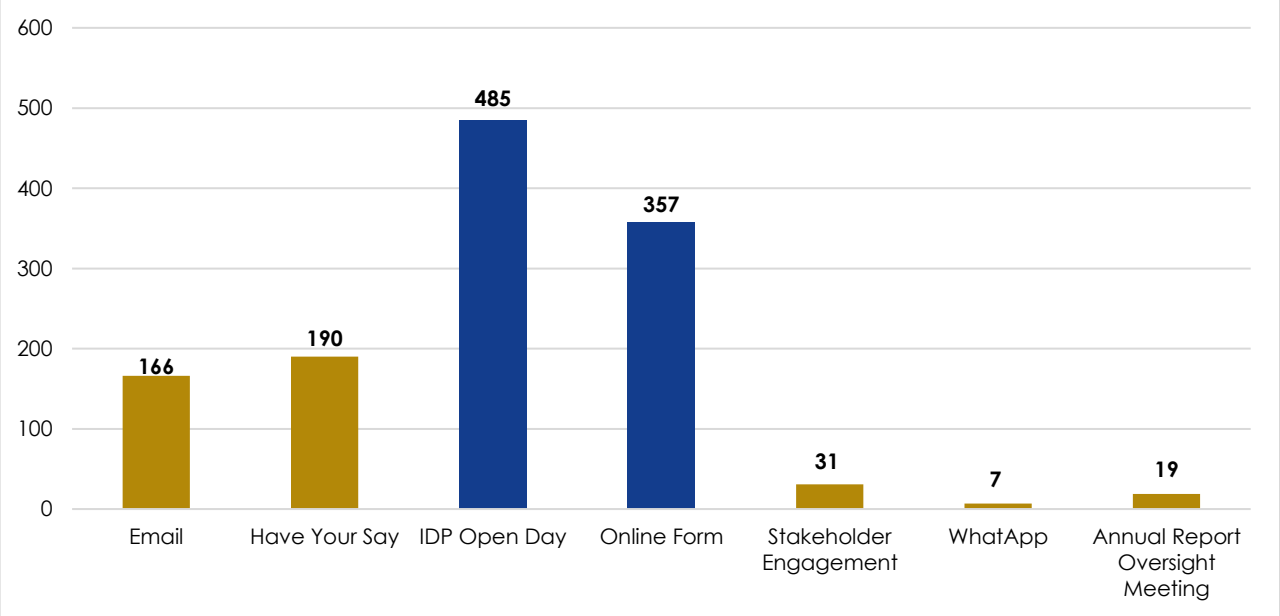
The electronic and verbal submissions made available on the various platforms created for public participation followed the process.

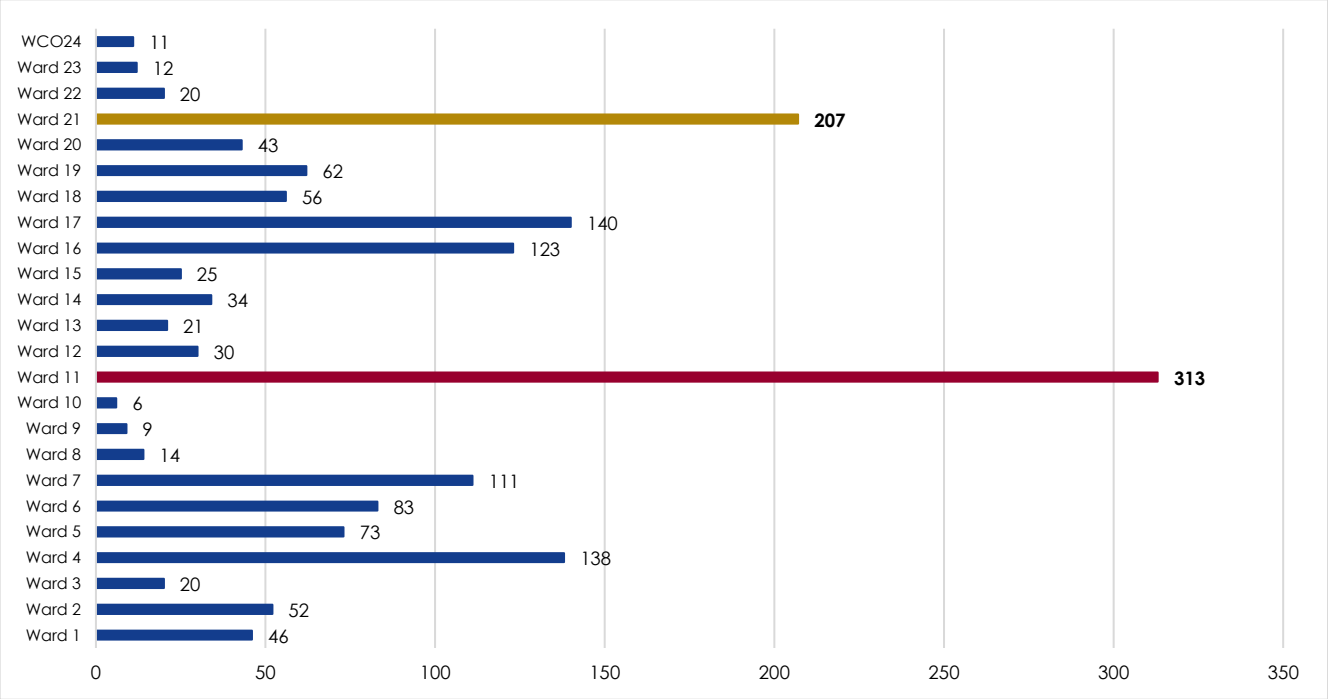


9.3 Public Participation Statistics: September 2025 and April 2026

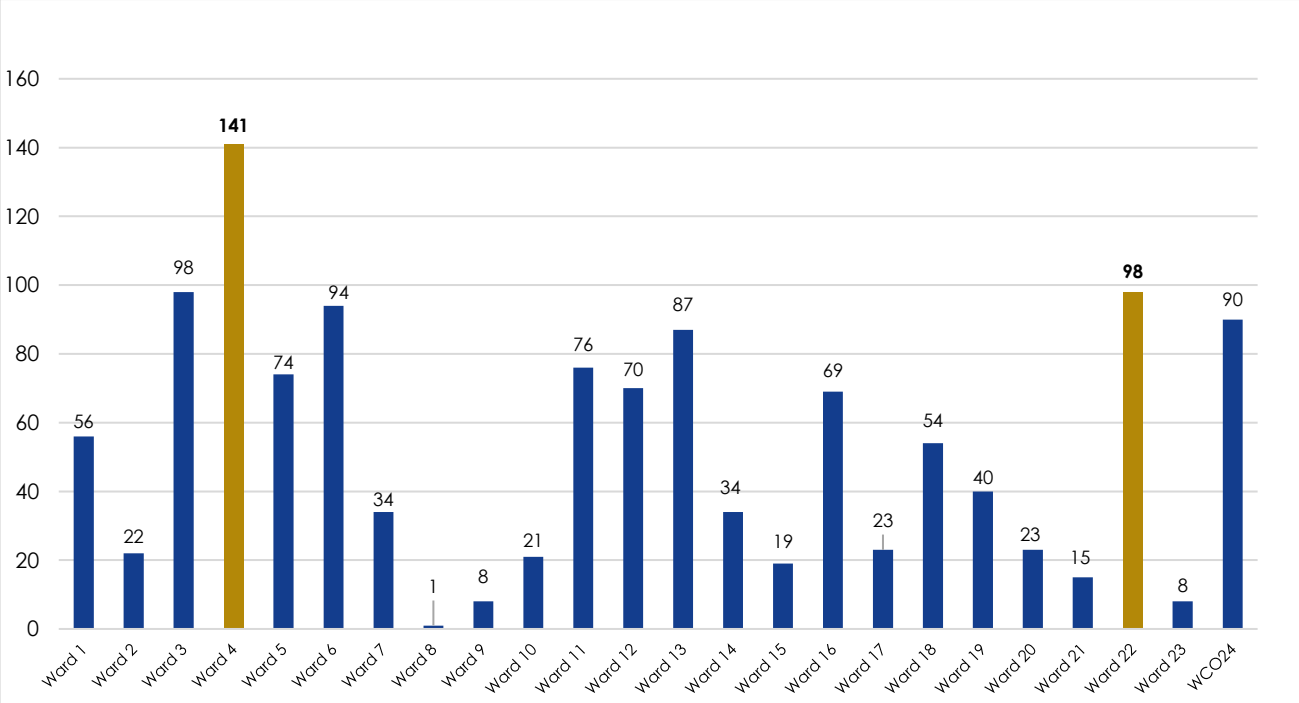
The graphs below indicate the number of individual line-item submissions received on the various communication platforms.

Graph 38: Total number of individual submissions per platform September 2025

Graph 39: Total number of individual submissions per platform April 2026



As displayed in the graph above, the online electronic form on the municipal website and the input recorded at the IDP Open Days were the most popular platforms used by the community and stakeholders to submit their needs and priorities in September 2025 and April 2026. The online electronic form on the municipal website in September 2025 recorded a total of **670** individual line items. Input through the physical IDP Open Days is the second most popular platform, with **522** individual line-item submissions recorded in September 2025. Input through the physical IDP Open Days recorded the highest, with **485** individual line-item submissions recorded in April 2026. The online

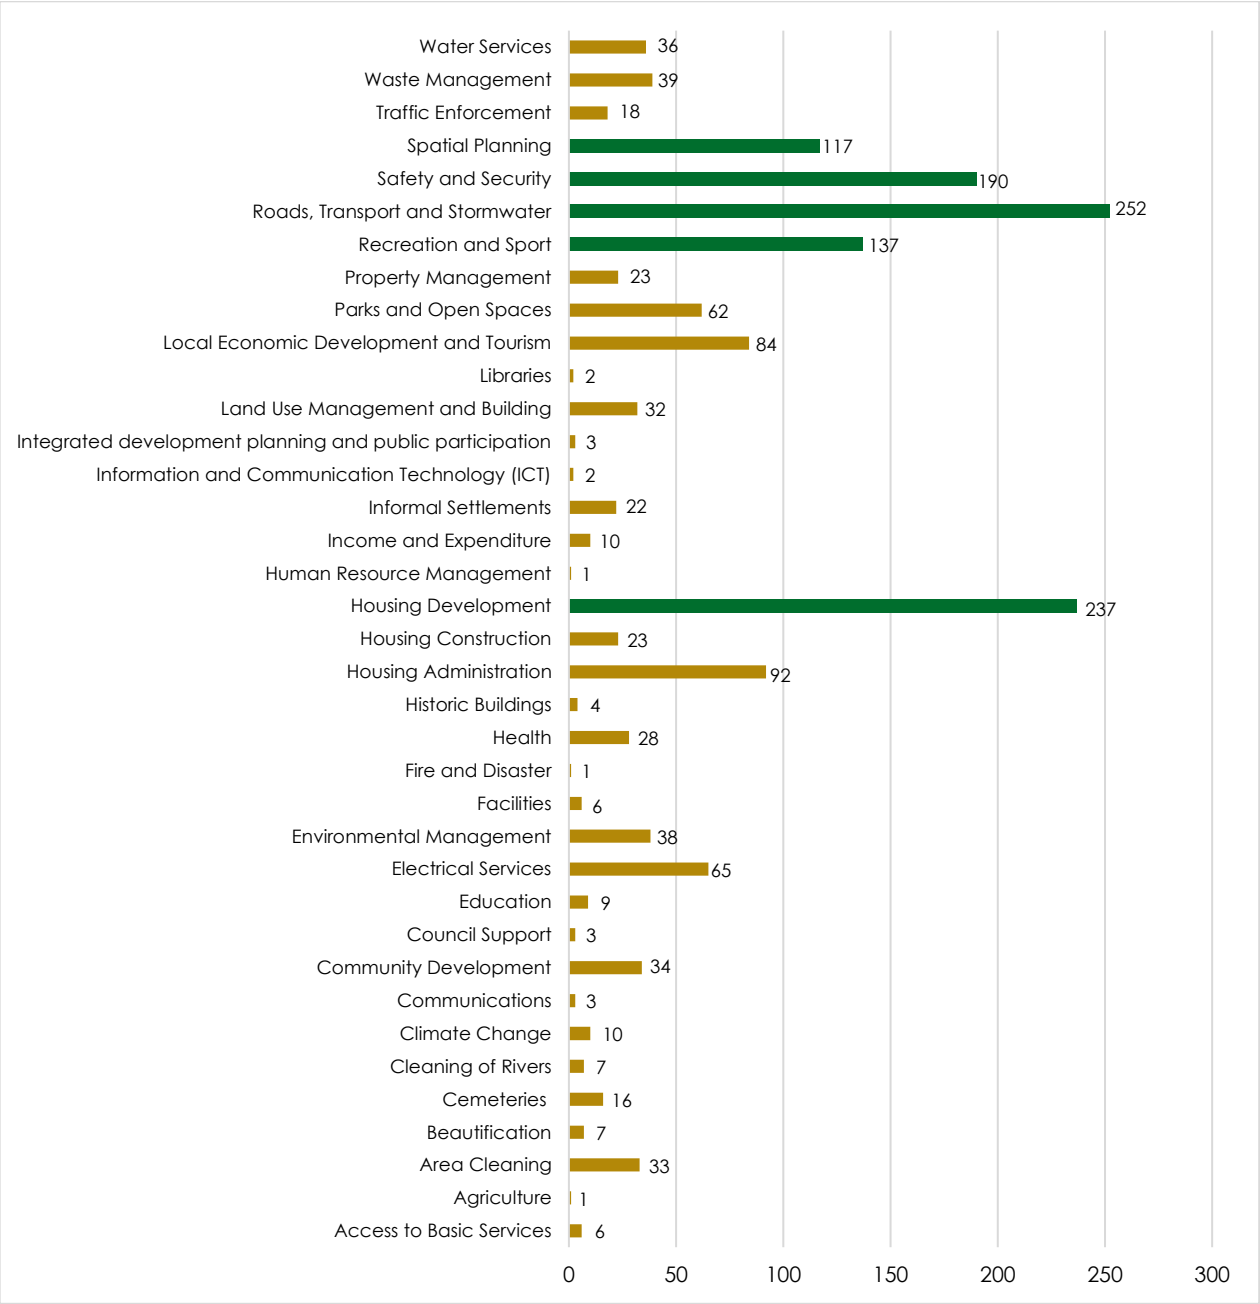


electronic form on the municipal website in April 2026 recorded the second most used platform with a total of **357** individual line items.

The graph below illustrates that **Ward 11** and **Ward 21** recorded the highest number of line items/input per ward during the public participation period in September 2025. **Ward 4** and **Ward 22** recorded the highest number of line items / input per ward during the public participation period in April 2026.

Graph 40: Total number of Ward input per ward September 2025

Graph 41: Total number of Ward input per ward April 2026



9.4 Summary of Needs and Priorities

The table below summarises the **five (5)** key priorities and needs raised by communities during the public participation periods in September 2025, April 2025 and September 2025. The priorities, Roads, Transport and Stormwater, Housing Development, and Safety and Security have consistently ranked among the top **three (3)** priorities for the WCO24 during the period from September 2024 to September 2025.

Table 101: Top 5 priorities identified in September 2024 – April 2026

Number	Top 5 priorities identified for the Stellenbosch Municipal area by community members			
	September 2024	**April 2025**	**September 2025**	**April 2026**

9.5 Ward Priorities

Emanating from the community needs analysis, the following **ward priorities** were identified by the ward councillor for the period 2022 – 2027. During the annual IDP review, these key priorities may be reviewed and reprioritised.

Ward 1: Cllr. Reginald Pheiffer

9.5.1 Ward Priorities: Ward 1

Table 104: Ward 1 – Ward Priorities

Project Rating					
☺	Project completed.	😐	Project in progress.	☹	Not completed / No budget available / District Function / Provincial Function

							2022/23	2023/24	2024/25	2025/26	2026/27	2022/23	2023/24	2024/25	2025/26	2026/27	
	Housing block Approach system in Kayamandi	The Council has adopted a block approach in Zone O, and a Temporary Relocation Area (TRA) has been established to implement it	Not Applicable	Infrastructure Services	PMU	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The tender had to be cancelled due to no bidders meeting the requirements. This is the second time the municipality went out on tender, and no one met the requirements. It seems housing contractors are not tendering for work in Kayamandi, with many expressing safety concerns, high security costs, and extortion. Another challenge is that the tender prices are about 70% higher than what the provincial government will provide the municipality for subsidised housing. Unfortunately, the municipality cannot finance the shortfall, as this forms part of the provincial government's function to provide adequate subsidies. This is, however, not an isolated incident, as the municipality is experiencing this on a majority of housing projects. The municipality is in consultation with the provincial government. If additional funds are not provided, then the project will not be effectively implementable.

Priority 1: Access to Housing and basic services	Investigation of social housing at farms 739 and 737 Klapmuts	Klapmuts is currently not registered as a Restructuring Zone for Social Housing	Not Applicable	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	Klapmuts is currently not registered as a restructuring zone for social housing. Social housing can only be implemented if the national minister of human settlements approves a restructuring zone (RZ). Currently, the technical consultants are in the process of identifying the best-suited location, taking into consideration the community's request for social housing on Farms 737 and 739, Klapmuts, as well as ascertaining if those portions of land fall within the criteria of a social housing development. Once this is finalised, the findings will be presented to the Council for consideration and recommendation to the PDoI. When the Provincial Minister supports the recommendation of the Council, it will then be submitted to the National Minister of Human Settlements for approval.
	Installation and upgrading of ablution facilities within the La Rochelle and	The Department: Informal Settlements monitors and reports	Not Applicable	Infrastructure Services	Water and Sanitation Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	☺	n/a	n/a	n/a	**La Rochelle:** This informal settlement will be fully upgraded with all the

The appointment of an implementing agent has not been concluded, pending the financial requirements to award a tender as raised by the Department: Financial Services. After the appointment of a successful bidder, an agenda item with regard to the Section 33 process in terms of the MFMA, due to the project duration exceeding three years, must serve to obtain Council approval and be advertised accordingly. The appointed contract is expected to be appointed by 30 May 2026. The expected time period to install the services is between six (6) to eight (8) months. It should be noted that the identification of beneficiaries is ongoing, and, therefore, regular meetings will be held with potential beneficiaries. No development rights have been obtained for Phase 4 of the project. It is anticipated

Priority 3: Ward-Based Planning	Ward 23 Comprehensive Development Plan. To develop a ward-based development plan that will include all major developments the municipality plans. Private development that the municipality will approve with the ward for the next 5 years	A Comprehensive Development Plan will be discussed with Development Planning in terms of the ATC	Not Applicable	Planning and Economic Development	Development management	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The usual way in which we will illustrate this on a plan is through showing a general area, for example, "mixed-use development" or "infill development", and it is up to landowners and/or developers to react to the market and submit proposals for development and ultimately rezoning applications. When Council has a specific developmental agenda for a particular area in which it wants to make provision for a different development approach that is deviating from the existing context, like, for example, the Adam Tass Corridor, we may prepare a local spatial development plan that can investigate what interventions may fulfil that need, such as, for instance, increased residential densities or employment opportunities. The decision on deciding if there are areas which are possibly in need of an LSDF with development guidelines is taken by the Council, which then includes such projects in the IDP and MSDF and provides the budget required to do that. Only once such a project is included in the IDP and budget provided for it will it be registered as a Key Performance Indicator on the Department's SDBIB and receive the attention required.

CHAPTER 10:

Financial Plan

The Stellenbosch Municipality's medium-term financial planning and the extent to which it is possible to align the budget to all the priorities of the wards, given our financial constraints and the need to concentrate on basic service delivery.

10.1 Introduction

The long-term financial viability of municipalities depends largely on:

- the extent to which improved and sustainable revenue capacity can be achieved; and
- the sound **financial management of its resources.**

These imperatives necessitate proper multi-year financial planning. Future impacts of revenue and expenditure streams and the financial implications for the community (i.e., the potential influence on rates, tariffs, and service charges) must be identified and assessed to determine the sustainability of planned interventions, programmes, projects, and sundry service delivery actions.

10.2 Capital and Operating Budget Estimates

10.2.1 Budget Assumptions

The selected key assumptions relating to this budget are as follows:

- Government grants for the years 2026/27 to 2028/29 are as per the Division of Revenue Act and Provincial Gazette (capital and operational); and
- The inflation rate has been estimated at **3.4% for 2026/27**.

10.2.2 Operating Budget Estimates

A municipality is a non-profit organisation, and it should break even after contributing to the different funds and reserves and meeting normal operating expenses. With the structuring of rates and tariffs, both the user-pay principle and the full cost recovery principle are applied. It should be noted that the surplus is calculated in terms of the accrual principle and therefore is not 100% cash-backed.

Table 127: Operating Budget Estimates

	(Current) 2025/26 Budget	Year 1 2026/27 Budget	Year 2 2027/28 Budget	Year 3 2028/29 Budget

10.3 Financial Management Arrangements

For the effective and efficient financial management of the municipality, all role-players, including the municipal councillors, must provide an environment conducive to good management. Local government legislation and National Treasury circulars articulate and provide a regulatory structure. The Council and officials define this environment by developing and accepting policy guidelines to govern financial decision-making and fiscal discipline.

The management arrangements of Stellenbosch Municipality are reflected in the policy documents listed in the table below:

Table 129: Management Arrangements

Document	Purpose	Status
Delegation Register	To provide for administrative, managerial, and institutional arrangements in respect of the delegation of responsibilities.	In place
Credit Control and Debt Collection Policy	▪ To establish consolidated, sound, and practically executable credit control measures to be applied in respect to all property owners and consumers. ▪ To regulate the actions regarding arrear accounts, including extensions granted, written arrangements to pay off arrears, the monitoring thereof, and legal actions associated with unpaid accounts.	In place
Indigent Policy	To subsidise indigent households with a specified level of income. enabling them to pay for a basic package of municipal services.	In place
Irrecoverable Debt Policy	To provide a framework for the writing off of irrecoverable debt, to ensure that Council is in a position where it is not carrying debt that has been prescribed, or which is irrecoverable on its books.	In place
Tariff Policy	To provide a framework to determine rates and tariffs to finance expenditure.	In place
Rates Policy	To ensure that all the stipulations of the Municipal Property Rates Act are affected administratively, and also lay out and stipulate all the requirements for rebates for all qualifying property owners.	In place
Special Rating Areas Policy	To strike an appropriate balance between facilitating self / funded community initiatives that aim to improve and/or upgrade neighbourhoods.	In place
Supply Chain Management Policy	To provide a system of procurement that gives effect to the principles of: ▪ Fairness; ▪ Equity; ▪ Transparency; ▪ Competitiveness; and ▪ Cost-effectiveness.	In place
Budget Implementation and Monitoring Policy	▪ Set out the budgeting principles Stellenbosch Municipality will follow in preparing each annual budget. ▪ To give effect to the requirements and stipulations of the Municipal Finance Management Act (MFMA) and Municipal Budget and Reporting Framework in terms of the planning, preparation, and approval of the annual and adjustments budgets.	In place
Borrowing, Funding and Reserves Policy	To provide a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year non-cash-backed liabilities.	In place
Cash Management and Investment Policy	To regulate and provide directives in respect of the investment of funds and to maximise returns from authorised investments, consistent with the primary objective of minimising risk.	In place
Travel and Subsistence Policy	To set out the basis for the payment of subsistence, travel allowance, and hourly rate when applying for official travelling.	In place
Accounting Policy	To provide the accounting framework applicable to the finances of the municipality, which is informed by the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003).	In place

Document	Purpose	Status
Grant-in-aid Policy	To provide the framework for grants-in-aid to NGOs, CBOs or NPOs and bodies that are used by the government as an agency to serve the poor, marginalised or otherwise vulnerable, as envisaged by Sections 12 and 67 of the MFMA.	In place
Development Contributions for Bulk Engineering Services	▪ Local government has the discretionary power when granting development approvals to impose conditions about the provision of engineering services and the payment of money that is directly related to requirements resulting from those approvals in respect of the provision of the necessary services to the land to be developed. ▪ To provide the framework for the calculation of these contributions.	In place
Petty Cash Policy	To stipulate clear processes and procedures to ensure that all transactions are processed effectively and efficiently in a bid to ensure prudent financial control. All purchases below R2 000 are regulated by this policy.	In place
Asset Management Policy	The Municipal Manager as Accounting Officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy, which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.	In place
Liquidity Policy	The documented policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to ensure that its current and future liquidity position is managed prudently.	In place
Virement Policy	The policy sets out the virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.	In place
Cost Containment Policy	The purpose of the policy is to regulate spending and to implement cost containment measures at Stellenbosch Local Municipality to ensure that the resources of the Municipality are used effectively, efficiently and economically.	In place

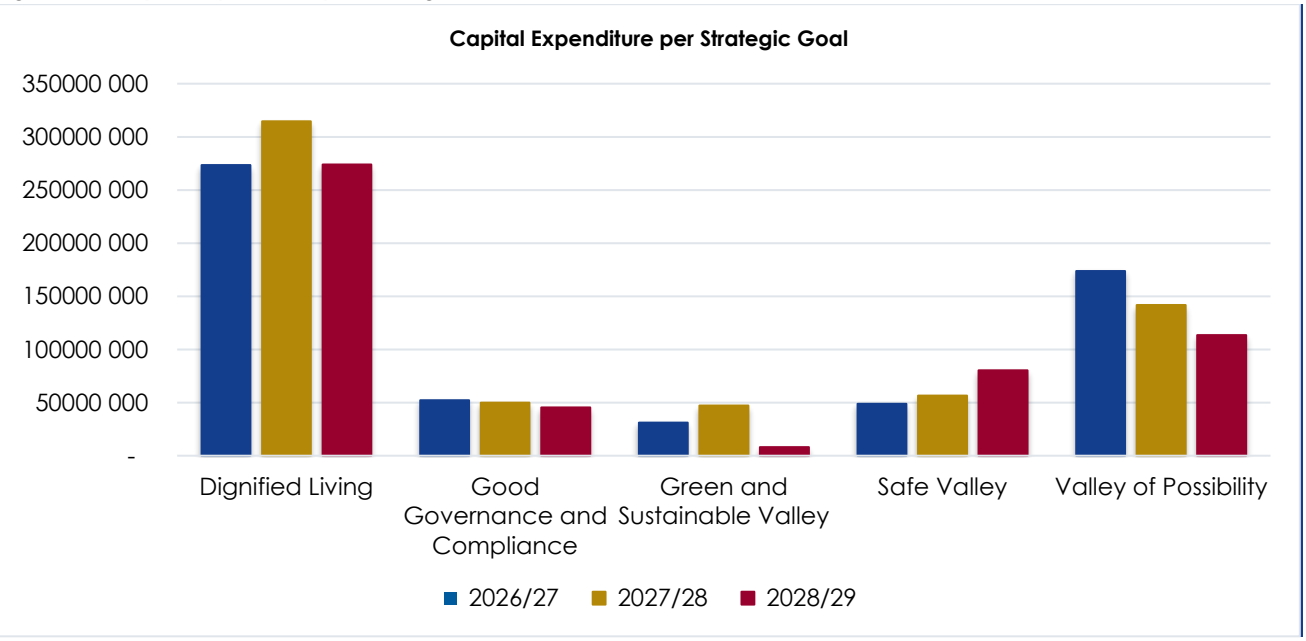
10.4 Financial Strategies and Programmes

The optimal use of available resources, the maximum raising of revenue, and the sustainable delivery of services are the key elements of a successful financial strategy. The municipality has developed and implemented various strategies in this regard. The table below summarises the key strategies:

Table 130: Key Financial Strategies

Strategy	Currently in Place
Financial viability and sustainability through long-term financial planning	▪ Long-term financial planning tool for effective implementation and monitoring.
Clean Audit	▪ Audit Action Plan ▪ Annual Financial Statement compilation standard operating procedure ▪ Monthly Reconciliations ▪ Training Sessions ▪ Participation in Forums
Staffing	▪ Revised Organogram ▪ Fill critical vacancies
Capital expenditure	▪ Implementation of Project Management System, including in-year reporting
Revenue Enhancement Strategy	▪ Implementation of Revenue Enhancement Strategy ▪ Roll-out of WMD and Pre-payment Water Meters ▪ Data cleansing ▪ Validity of registered indigent households

Strategy	Currently in Place
Billing system enhancement	Web-based billing system Review of Municipal Account Layout Investigate payment methods
Debt management	Debt Review Committee Quarterly Report on Debt and Possible Debt to be written off



10.5 Medium – Term Capital Expenditure per Strategic Focus Area

The proposed capital expenditure per strategic focus area over the medium term is illustrated in the table below:

Table 131: Capital Expenditure per Strategic Focus Area

Strategic Goal	2026/27	2027/28	2028/29
SFA 1 - Valley of Possibility	173,734,484	141,781,884	113,309,474
SFA 2 - Green and Sustainable Valley	31,123,943	47,051,965	7,938,268

SFA 4 - Dignified Living	273,434,599	314,731,829	273,857,451
SFA 5 - Good Governance and Compliance	52,181,848	49,944,869	45,417,944

Figure 53: Capital Expenditure per Strategic Focus Area

Source: Capital Budget 2026/27

The most capital-intensive strategic focus area is Dignified Living, with an allocation of R273,4 million in the upcoming financial year, totalling R862,023 million excluding VAT over the MTREF. Electrical Services projects dominate this strategic objective, receiving an investment of R89.3 million in 2026/27, with the outer financial years dominated by Water and Wastewater Services: Water and Water and Wastewater Services: Sanitation receiving an investment of R79.7 million and R102.5 million respectively.

The second most capital-intensive strategic focus area is the Valley of Possibility, with a total allocation of R429 million for the duration of the MTREF period. Project highlights include:

- Bien Don 66/11kV substation new;
- Cable replacement 66kV;
- Electrification INEP;
- Switchgear Substation University;
- Adhoc Reconstruction of Roads (WC024);
- Bulk Water Supply Pipe and Reservoir: Stellenbosch; and
- Bulk Water Supply Pipe: Cloetesville / Ida's Valley.

The Safe Valley strategic focus area receives the 3rd highest capital investment, with the total MTREF budget amounting to R185,6 million. Projects highlighted include:

- Fire Station – Jamestown;
- Adam Tas - Technopark Link Road;
- Ad Hoc Provision of Streetlighting;
- Non-Motorised Transport Implementation; and
- Park and Ride (Transport Interchange).

The municipality is also making a concerted effort to improve ICT infrastructure platforms, allocating R35,3 million for this purpose over the multi-year budget period.

10.6 Medium – Term Operational Expenditure

The proposed Operational Expenditure per Strategic Focus Area over the medium term is illustrated in the table below.

Table 132: Operational Expenditure per Strategic Focus Area

Operational Expenditure	2026/27	2027/28	2028/29
SFA 1 - Valley of Possibility	122,039,273	126,561,520	131,204,309
SFA 2 - Green and Sustainable Valley	5,533,676	7,210,249	5,921,863
SFA 3 - Safe Valley	220,010,221	232,898,808	247,462,085
SFA 4 - Dignified Living	408,269,232	409,269,021	432,971,980

10.9 National and Provincial Investment

The following tables depict the National and Provincial allocations to the municipality over the MTREF period. It should be noted that the information is subject to change depending on fiscal constraints and the availability of resources.

The table below sets out the allocations by the national government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below, the total National allocation for Stellenbosch amounts to **R315,048 million** for the 2026/27 financial year.

Table 140: National and Provincial Investment

National Allocations / Provincial	2026/27	2027/28	2028/29
Stellenbosch Municipality			
Equitable Share	246,336,000	260,662,000	264,323,000
Integrated Urban Development Grant	64,181,000	48,193,000	49 691,000
Integrated National Electrification Programme (Municipal) Grant (Schedule 5)	-	10,392,000	10,862,000
Energy Efficiency and Demand Side Management Grant	-	-	-
Local Government Financial Management Grant	1,800,000	1,900,000	2,000,000
EPWP Integrated Grant for Municipalities	2,731,000	-	-
Total	**315,048,000**	**321,147,000**	**326,876,000**

The table below sets out the allocations by the provincial government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below, the total Provincial allocation for Stellenbosch Municipality amounts to **R53 426** million for the 2026/27 financial year.

Table 141: Provincial allocation to the Stellenbosch Municipality

WCG Departments and funding	2026/27	2027/28	2028/29

CHAPTER 11:

Organisational Scorecard (5 – years)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between the Council, administration, and the community. It gives effect to the IDP and the budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly, and annual performance reports must also be submitted to the Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one-year detailed implementation plan that gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council, and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis for measuring the performance in service delivery against end-year targets and implementing the budget.

Indicators developed for the Stellenbosch Municipality address the Strategic Focus Areas (SFAs) of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The five necessary components are:

1. Monthly projections of revenue to be collected for each month;
2. Monthly projections of expenditure (operating and capital) and revenue for each vote;
3. Quarterly projections of service delivery targets and performance indicators;
4. Ward information for expenditure and service delivery; and
5. Detailed capital works plan broken down by ward over three years

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP)

The SDBIP gives effect to the Integrated Development Plan (IDP) and is essentially the management and implementation tool setting out the quarterly service delivery targets.

The Top Layer SDBIP includes the main service delivery indicators of the municipality. The following table reflects the 5-year Implementation Plan of the Integrated Development Plan:

Note: The Five-year Municipal Scorecard will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP). The TL SDBIP must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget, to be tabled in the Council during May.

CHAPTER 12:

Implementation, Monitoring and Review (1 – year)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between the Council, the administration, and the community. It gives effect to the IDP and the budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly, and annual performance reports must also be submitted to the Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one–year detailed implementation plan which gives effect to the IDP and the Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis for measuring the performance in service delivery against end-of-year targets and implementing budget.

Indicators developed for the Stellenbosch Municipality address the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers on its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The **five** necessary components are:

- Monthly projections of revenue to be collected for each month;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

***Note** This chapter, the one-year Municipal Scorecard, will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2026/27 during June 2026 and, therefore, it is subject to change. The TL SDBIP 2026/27 must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget to be tabled in the Council in May 2026.*

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
31	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Sally	Burningham	Housing Development	Provision of housing development opportunities in Franschhoek. What budget is being used?	Explained the process regarding the waiting list. Informed the client that there are currently no projects in Franschhoek, due to the shortage of municipal-owned land; most of the land is owned by the government. It was also explained to the client that funding is provided by the National Government.	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
32	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Jakobus Johannes	Marais	Housing Administration	Provision of clarity on how to qualify for a Wendy house for backyarders	Explained that the client must be on the housing waiting list. Mr Marais is a property owner. He was contacted by Housing Admin Officials on 09.04.2026 to inform him of this. Also, he is now divorced and was advised that he should read what the final divorce decree said about the property.	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
33	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Susan	Huxter	Water Services	Installation of a new borehole sign at No. 1 and 2 Wilhelmina Street, Franschhoek	New borehole signs to be purchased on PNQ in the 2026/27 financial year.	Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
34	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Water Services	Provision of the plan of the sewer mains for erf 3413 (No.8) and 2895 (No.7), Faire Donne Estate in Reservoir Street	Plan to be forwarded to the client via email.	Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
35	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Water Services	Maintenance of the public ablution facility behind the Franschhoek Town Hall is constantly smelling		Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
36	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	PG	Mihalopoulos	Income and Expenditure	Provision of clarity about the second prepaid meter (04232770133) on the property, which received FBE previously, but it was stopped	Explained the Indigent Policy and the client understood his position. Informed the client that the main household was not registered as an Indigent client, hence the cancellation of the FBE.	Director: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	Not Applicable
37	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer			Income and Expenditure	An unknown client enquired about the Indigent Policy and Free Basic services. He does not agree with the installation of the Water Management Devices. He will visit the Municipal Offices to discuss his Indigent application for 2026.	The pensioner is to visit the Indigent Office to update Indigent Status.	Director: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	Not Applicable
38	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Susan	Huxter	Roads, Transport and Stormwater	Removal of the 1 AA sign at Wilhelmina Street, Franschhoek Dorp		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
39	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Electrical Services	Moving of the solar lights at Faire Donne Estate, Franschhoek	The department: Electrical Services will follow up on the moving of streetlights	Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
40	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Burningham	Burningham	Electrical Services	Registration of SSEG for the guard house in Franschhoek		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
41	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Leaticia	Juries	Electrical Services	Installation of spotlights around the playpark in Protea Street, Mooiwater	The inspection will be conducted for lights	Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
42	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Susan	Huxter	Electrical Services	Inclusion of the solar inverter on the approved list in the Franschhoek area		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
43	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Ernest	Morgan	Parks and Open Spaces	Provision of more detail and information for Franschhoek to take part in the Mayoral Garden competition	Harold Daniels will contact the complainant to discuss and explain the process	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable

Reginald Pheiffer	Leaticia	Juries	Parks and Open Spaces	Installation of fencing at Rosie playpark, in Protea Street, Mooiwater	Superintendent Hannetjie du Plessis indicated that ward Cllr is against a fence however they will discuss the request with the complainant	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
45	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Leaticia	Juries	Electrical Services	Installation of lighting at Rosie Playpark, in Protea Street, Mooiwater		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
46	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Parks and Open Spaces	Planting of trees in the open area in Faire Donne, Franschhoek	Superintendent Hannetjie du Plessis was already in contact with complainant to discuss way forward	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
47	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Roads, Transport and Stormwater	Requested information on the Franschhoek Flood Resilience Programme. Indicated that he has attended previous stakeholder consultations and is aware of the broader study undertaken on the La Cotte River, but wanted more specific clarity on the proposed interventions for Plot 3440, particularly in relation to the long-term stabilisation of the river. He asked whether the proposed flood protection measures would include interventions such as gabions.	Mr Kannemeyer was referred to the Infrastructure Services Directorate, specifically the Senior Manager for Roads, Transport and Stormwater, Mr Johahn Fullard, to obtain more detailed information on the planned interventions for Plot 3440 under the Franschhoek Flood Resilience Programme.	Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
48	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Environmental Management	Noted that neighbouring properties, including Franschhoek Estate, have undertaken river-related interventions, but that these works stopped at property boundaries. He emphasised that neighbouring landowners need to work together, as the river does not respect cadastral boundaries and water will flow naturally across properties	The Environmental Management and / or Horticulture sections are requested to provide guidance on appropriate indigenous riparian species that may be used by Mr Kannemeyer to assist with riverbank stabilisation on Plot 3440.	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
49	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Environmental Management	In the interim, he asked whether there were any actions he could take on his own property to help stabilise the riverbank. Guidance was provided that clearing alien vegetation and re-vegetating with appropriate indigenous riparian species would be beneficial. Mr Kannemeyer subsequently asked whether the municipality could provide more specific advice on suitable indigenous species for riverbank stabilisation on Plot 3440	The Environmental Management and / or Horticulture sections are requested to provide guidance on appropriate indigenous riparian species that may be used by Mr Kannemeyer to assist with riverbank stabilisation on Plot 3440.	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
50	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Johann	Kannemeyer	Environmental Management	Requested that he be kept informed of any river clean-up projects or initiatives planned for the area and be notified when such activities take place.	The Environmental Management section and / or Solid Waste Management department are requested to ensure that Mr Kannemeyer is informed of any planned river clean-up projects or related initiatives in the area. IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
92	IDP Open Day	Ward 3	Cllr. Charles Manuel	Wilhelmina	Jacobs	Safety and Security	Lanquedoc neighbourhood watch seems to be inactive and is not visible in the Lanquedoc area	Accreditation and oversight of Neighbourhood Watches (NHW) reside with POCS. However, Law Enforcement has a neighbourhood watch coordinator who facilitates between POCS and neighbourhood watches. Enquiry will be made regarding the status of Lanquedoc NHW, and if still active, the matter will be addressed with the NHW chairperson and POCS.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
93	IDP Open Day	Ward 3	Cllr. Charles Manuel	Wilhelmina	Jacobs	Safety and Security	Increase visibility of law enforcement and police at Rooipad, between Pniël and Lanquedoc	Criminal matters to be reported to the local SAPS station. Weekly operational planning meetings with Stellenbosch Safety Partners (SSP) are held weekly and will be discussed with SAPS to conduct operations to address the robberies.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
94	IDP Open Day	Ward 3	Cllr. Charles Manuel	Wilhelmina	Jacobs	Safety and Security	Learners smoking dagga on their way to the bus stop to and from school. Need visibility to address these learners	Learners smoking dagga while in uniform should be addressed with the school management and the SAPS. Law Enforcement can do sporadic visible patrols and awareness education to deter this practice among learners.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
95	IDP Open Day	Ward 3	Cllr. Charles Manuel	Esmund	Gesse	Waste Management	Relocation of the skip placed next to 68 Hoof Street, Lanquedoc	Area to be assessed and possibly position skip in another location. More frequent collection of the skip.	Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
96	IDP Open Day	Ward 3	Cllr. Charles Manuel	Vilamina	Jacobs	Area Cleaning	When Area Cleaning cleans the area, waste gets thrown into the stormwater drain, causing blockages in Lanquedoc	Area cleaning to investigate and monitor the area.	Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
97	IDP Open Day	Ward 3	Cllr. Charles Manuel	Vilamina	Jacobs	Area Cleaning	Supervision of EPWP teams in Lanquedoc	Area cleaning to perform inspections more frequently	Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
98	IDP Open Day	Ward 3	Cllr. Charles Manuel	Vilamina	Jacobs	Area Cleaning	Lanquedoc requires more frequent cleaning	Area cleaning to perform inspections more frequently	Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
99	IDP Open Day	Ward 3	Cllr. Charles Manuel	Jacobus	Hendricks	Safety and Security	Close illegal shebeens in the Lanquedoc area are problematic and contribute to the rise in crime in Lanquedoc. The SAPS is aware of the problem, but there is limited intervention	The SAPS is to address illegal shebeens. Law Enforcement will assist with operations. Matter will be discussed at Stellenbosch Safety Partners' weekly operational planning meeting for SAPS to action.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
100	IDP Open Day	Ward 3	Cllr. Charles Manuel	Daniel	Jonkers	Safety and Security	Provision of a container / vacant office space for the Wemmershoek NHW to use as a base to operate from when conducting patrol activities	Law Enforcement have safety kiosks that are shared by the various NHW's, which they can make available to use as a base for a temporary specified period (e.g., a weekend). For a more permanent solution, POCS should be approached.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
101	IDP Open Day	Ward 3	Cllr. Charles Manuel	Georgina	Claassen	Safety and Security	Address the noise nuisance from the illegal shebeen at 391 Botterblom Street, Lanquedoc	Noise complaints should be logged with the Law Enforcement 24/7 control room to activate Law Enforcement to enforce the Public Nuisance bylaw	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
102	IDP Open Day	Ward 3	Cllr. Charles Manuel	Maria	Malgas	Safety and Security	Conduct road safety education at Pniël Primary School due to learners walking on the roadway and crossing roads irresponsibly on R310 when crossing the new bridge to Lanquedoc	Traffic regularly conducts road safety education at schools and other educational institutions to educate learners on safe road usage and safe places to cross. 245	Have Your Say	Ward 4	Cllr. Ralphton Adams	Elizabeth	Florence	Housing Administration	Removal of asbestos roofing in Kylemore. This is a huge health concern for our people, who feel that the municipality should make a work of this		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
246	Have Your Say	Ward 4	Cllr. Ralphton Adams	Elizabeth	Florence	Housing Administration	Upgrading of the RDP houses in Kylemore		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
247	Have Your Say	Ward 4	Cllr. Ralphton Adams	Elizabeth	Florence	Parks and Open Spaces	Regularly clean the erf opposite the Sondela Store between Dawie and the crèche, which belongs to the municipality in Kylemore		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
248	Have Your Say	Ward 4	Cllr. Ralphton Adams	Elizabeth	Florence	Property Management	What are the municipality's plans for the erf opposite the Sondela store between Dawie and the crèche in Kylemore		Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
249	Have Your Say	Ward 4	Cllr. Ralphton Adams	Yovanna	Cornelissen	Local Economic Development and Tourism	Residents have been struggling for some time to see the health inspector for spaza shops in Kylemore. The illegal Spaza store and the person who gave the approval. Here is a store that doesn't even have a parking space. The correct steps were never followed, but no one has come to check yet.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
250	Have Your Say	Ward 4	Cllr. Ralphton Adams	Yovanna	Cornelissen	Local Economic Development and Tourism	Increase EPWP employment intake in Kylemore		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
251	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Parks and Open Spaces	Installation of warning signs on the open land opposite the Kylemore High School: "No Dumping, No Fire, No alcohol and drugs, No Loud Music, No weapons, no parking"		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
252	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Property Management	Ward Priority 2: Fencing around Pniël Offices. Secure Offices and prevent them from becoming a hotspot for crime at night Comment: This is within the municipal function to do fencing and should not come from ward budgets		Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
253	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Roads, Transport and Stormwater	Ward Priority 2: Speedbumps at Kylemore Sports Ground Comment: This is very important to prevent drivers from driving recklessly when they are under the influence of alcohol. The gate also needs to be closed to prevent unauthorised entry to the sportsground when no activities are taking place		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

Ralphton Adams	Wade	Thys	Safety and Security	Ward Priority 2: Assistance of neighbourhood watches in Pniël, Kylemore and Johannes Dal Comment: Regular training for neighbourhood watches with direct access to SAPS and law enforcement must be available 24/7		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
255	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Recreation and Sport	Ward Priority 3: Maintenance of floodlights in Kylemore and Pniël Sportsgrounds Comment: To ensure the continued, uninterrupted practice of sport		Director: Community and Protection Services	Department: Community Services	Sport, Youth and Culture	Local	Not Applicable
256	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Community Development	Ward Priority 4: More effective skills development programmes for youth in Ward 4 Comment: The current situation is a cause for great concern. No programmes are available, yet many opportunities exist		Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
257	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Local Economic Development and Tourism	Ward Priority 5: Request the regulation of spaza shops in Pniël, Johannes Dal, and Kylemore to improve safety and service quality in the community. Comment: Spaza shops owned by foreigners are charging bank fees on transactions. All spaza shops in Kylemore have at least three cats living in the shops and sleeping on food products.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
258	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Local Economic Development and Tourism	Ward Priority 5: Request help for small businesses and tourism in Pniël, Kylemore, and Johannes Dal to boost economic growth Comment: More can be done to support small businesses to facilitate their growth		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
259	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Land Use Management and Building	Ward Priority 5: Assist the residents struggling with development services subdivisions for family-owned properties in Johanes Dal, Pniël and Kylemore Comment: This process should be made easier for locals		Director: Planning and Economic Development	Department: Development Management	Planning, LED and Tourism	Local	Not Applicable
260	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Safety and Security	Closure of the road after the last house in School Street to prevent cars from parking, partying, spinning and revving at night. Closure from 20:00 pm to 05:00 AM		Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
261	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Recreation and Sport	Locking of Kylemore Sportsfield gate to prevent unauthorised access, parking, drinking and playing loud music on the field		Director: Community and Protection Services	Department: Community Services	Sport, Youth and Culture	Local	Not Applicable
262	Online Form	Ward 4	Cllr. Ralphton Adams	Wade	Thys	Parks and Open Spaces	Clearing of open spaces in the upper part of Skool Street		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
263	Online Form	Ward 4	Cllr. Ralphton Adams	Ethel	Fredericks	Roads, Transport and Stormwater	Ward Priority 1: Drains overflowing in winter / rainy days in the areas of Kylemore, Johannesdal: Pniël Comment: Kylemore does not receive attention regarding its problems		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
264	Online Form	Ward 4	Cllr. Ralphton Adams	Ethel	Fredericks	Roads, Transport and Stormwater	Ward Priority 1: Upkeep and maintenance of roads in Pniël, Joannes Dal and Kylemore Comment: No maintenance of sidewalks		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
265	Online Form	Ward 4	Cllr. Ralphton Adams	Ethel	Fredericks	Safety and Security	Ward Priority 2: Installation of security cameras at hotspots in the entrance of Kylemore, Johannesdal, and Pniël (Giff) Comment: Yes - Crime is overwhelming in Kylemore		Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
266	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Drains overflowing in winter / rainy days in the areas of Kylemore; Johannesdal: Pniël. Comment: Drainage affects the condition of the roads in Pniël, roads fill with gravel and stones, which looks untidy and is not tidied up timeously.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
267	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Regular fumigation of drains for pests. Comment: Cockroaches a problem		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
268	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Regular removal (spuit) of weed / grass on sidewalks and against curbs in Kylemore, Johannesdal, Pniël Comment: Municipal workers state that removal of weeds and grass on sidewalks is not part of their duty - needs proper supervision, and borders for cleaning are pointed out. This also ties into the beautification of the Dwars River Valley if tourism to the area is a priority. Open areas can be beautified by adding trees / plants.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
269	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Electrical Services	Ward Priority 1: Reliable electricity network needed in ward 4 areas Johannesdal; Kylemore, and Pniël Comment: It was promised years ago that it would take 3 years for the electricity network to be upgraded, but we still have the same old problems. Lots of power outs in winter, cable theft - mostly in the same areas - Hollandse Molen - can this not be monitored or investigated better?		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
270	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Electrical Services	Ward Priority 1: Increase the number of streetlights in the streets of Johannesdal; Kylemore, and Pniël Comment: The lights need to be inspected. Some lights shine in one direction, dark behind them.		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
271	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Sidewalks in all streets of Kylemore; Pniël and Johannesdal Comment: This request has been on the IDP for many years. Most roads in Pniël were only paved on one side. It has now broken up, the other side has never been paved. If tourism to the Dwars River Valley is a priority for Stellenbosch Municipality and Visit Stellenbosch, the Valley needs to be cleaned and beautified, given the same attention as tourism areas in central Stellenbosch. Cant take tourists on walking tours in dirty streets		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
272	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Upkeep and maintenance of roads in Pniël, Johannes Dal and Kylemore Comment: For obvious reasons, mostly sidewalks that need attention, then roads will stay tidy		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
273	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Request the installation of traffic calming measures in Pniël, Joannes Dal, and Kylemore. The initiative includes the implementation of robots and four-way stops to enhance road safety and improve traffic flow Comment: There are no stops on the R310 between the traffic light at the Ida's Valley / Helshoogte crossing and through the Dwars River Valley. The only stop is at the T-junction with the R45, Franschhoek Road, where the new traffic lights are. The traffic calming bumps through Pniël on the R310 do not slow traffic down at all. Motorists become impatient if you stick to the speed limit through the town. Many side roads link to the R310, making it difficult to enter. The R310 has become a very busy road and was not designed for the volume of traffic it currently carries.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
274	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 1: Designated parking for trucks in Pniël Comment: Some truck owners still park their trucks on their residential properties because they have the space, while others park in the streets. Streets cannot bear the weight of the heavy long trucks, houses crack, noise is very disturbing, trucks drive up the roads at all hours, day and night.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
275	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Safety and Security	Ward Priority 2: Installation of security cameras at hotspots in the entrance of Kylemore, Johannesdal, and Pniël (Giff) Comment: This has been on the IDP for many years, since the previous ward councillor's term. As far as I can remember, these were budgeted for. Not sure what the current status is. I was a ward committee member back then, and we were promised apps where we would be able to monitor the cameras from, but this never happened		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
276	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Safety and Security	Ward Priority 2: Visibility of law enforcement officers in Kylemore, Pniël, and Johannesdal area Comment: Definitely needed visibility of law enforcement, especially at night		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
277	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Safety and Security	Ward Priority 2: Stop after-hours speeding cars in the Kylemore, Pniël, and Johannesdal area Comment: Cameras would help identify these culprits and enable authorities to charge them. This situation is very disturbing.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
278	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Safety and Security	Ward Priority 2: Traffic officers must be more visible in Kylemore; Pniël; and Johannesdal for longer times of the day Comment: Alternatively, a permanent traffic camera should be installed to catch speeding drivers, both day and night.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
279	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 2: Need for more speed bumps in Kylemore, Johannesdal and Pniël Comment: The speedhumps do not always slow down traffic; some cause more irritation. Cars are damaged, and drivers swerve or drive sideways to avoid them.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
280	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Fire and Disaster	Ward Priority 2: Annual maintenance of fire breaks along the slopes of the Simonsberg mountains above Johannes Dal and Pniël Comment: We have been fortunate so far that fires have been contained and have not caused damage to houses. However, many homes are located close to the forested areas.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
281	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Safety and Security	Ward Priority 2: Assistance of neighbourhood watches in Pniël, Kylemore and Johannes Dal Comment: More visible law enforcement and cameras will assist		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
282	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Cemeteries	Ward Priority 3: Extension of boundaries of existing cemeteries in Pniël Comment: The people of Pniël would like to be buried in Pniël, as this is a long-standing tradition. There is land available next to the cemetery, but ownership needs to be resolved.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
283	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Cemeteries	Ward Priority 3: Cleaning and maintenance of Pniël cemetery Comment: The shoulder between the R310 and the cemetery boundary needs to be filled, as it is used as a parking area for funerals. Marked parking bays could also be provided.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
284	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Fire and Disaster	Ward Priority 3: Force private owners to clean vacant plots in Ward 4 Comment: This is definitely a high priority. Vacant plots in between occupied houses are an eyesore. On some plots, the trees and grass grow higher than the adjacent houses, particularly in Protea Street and River Street in Pniël.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
285	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Roads, Transport and Stormwater	Ward Priority 3: Propose a beautification project for the Main Road in Pniël to enhance aesthetics. Comment: This is definitely important for this beautiful road, which is frequently used by visitors and tourists. It serves as a key link between Stellenbosch, Franschhoek, and Paarl.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
286	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Local Economic Development and Tourism	Ward Priority 5: Request help for small businesses and tourism in Pniël, Kylemore, and Johannes Dal to boost growth to boost economic growth Comment: Definitely a priority. The small businesses needs a lot of assistance to register with professional bodies, i.e. CSD database, help with strategic planning, financial planning, mentors to support them.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
287	Online Form	Ward 4	Cllr. Ralphton Adams	Janine	Myburgh	Land Use Management and Building	Ward Priority 5: Assist the residents struggling with development services subdivisions for family-owned properties in Johanes Dal, Pniël and Kylemore Comment: It really has become a very expensive exercise.		Director: Planning and Economic Development	Department: Development Management	Planning, LED and Tourism	Local	Not Applicable
288	Online Form	Ward 4	Cllr. Ralphton Adams	Burthrim	Mentoor	Electrical Services	Ward Priority 1: Reliable electricity network needed in Ward 4 areas, Johannesdal, Kylemore and Pniël Comment: Rating 5		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
289	Online Form	Ward 4	Cllr. Ralphton Adams	Burthrim	Mentoor	Electrical Services	Ward Priority 1: Increase the number of streetlights in the streets of Johannesdal, Kylemore, and Pniël Comment: Rating 5		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable

297	Online Form	Ward 4	Cllr. Ralphton Adams	Burthrim	Mentoor	Environmental Management	Ward Priority 2: Trimming of trees laying over the main road in Pniël and powerlines Comment: Johannesdal should also be added		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
298	Online Form	Ward 4	Cllr. Ralphton Adams	Burthrim	Mentoor	Roads, Transport and Stormwater	Ward Priority 3: Cleaning of all streets and removal of weeds on pavements not taking place in Johannesdal, Kylemore, and Pniël Comment: 5		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
299	Online Form	Ward 4	Cllr. Ralphton Adams	Burthrim	Mentoor	Fire and Disaster	Ward Priority 3: Force private owners to clean vacant plots in Ward 4 Comment: This is a high priority for private owners and Stellenbosch Municipality		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
300	Email	Ward 4	Cllr. Ralphton Adams	Andrew	Cyster	Water Services	Sewer overflow in East End: For more than 20 years, raw sewage has been flowing into our streets. This is not only unhealthy but also unsightly and messy. It is cleaned by spraying weekly, sometimes daily, and then a white powder is spread over it, but the real problem is not being addressed. According to officials, the project was placed on the budget over two years ago, yet no work has been done. We request that the pump station be removed from the community.		Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
301	Email	Ward 4	Cllr. Ralphton Adams	Andrew	Cyster	Roads, Transport and Stormwater	Flooding of properties (erf): It has now happened twice that stormwater has flowed through my house. The complaint dates back to 2016. The relevant officials have been informed and have visited several times. According to what I have heard, the project has already been budgeted for; environmental officials have been here, and I regularly send messages. Yet nothing has been done. My insurance no longer wants to cover the damage due to the repeated occurrence of the same issue.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

302	Email	Ward 4	Cllr. Ralphton Adams	Andrew	Cyster	Informal Settlements	Unwelcome squatters: A permanent solution must be found for this. The squatters make people feel unsafe, and break-ins are increasing.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
303	Email	Ward 4	Cllr. Ralphton Adams	Dudley (D.P)	Lackay	Recreation and Sport	The establishment of a multifunctional sports hub for all sporting codes in Pniël	All requests for sport facility upgrades must be submitted to the Sport Office from the sport council, not stakeholders or users of the facility. The Sport Council of Pniël has a User Agreement with the municipality, and dealing directly without the Sport Council's knowledge undermines this agreement. The requests received were submitted before, but priority was given to the upgrades and installation of floodlights at Pniël sport facility, which was completed in January 2026. There is currently no budget available for the requests, as other priority projects need to be addressed first at other sport facilities.	Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
304	Email	Ward 4	Cllr. Ralphton Adams	Dudley (D.P)	Lackay	Recreation and Sport	Upgrading of the entrance road, as well as the provision of a ticket office for shelter against wind and weather	All requests for sport facility upgrades must be submitted to the Sport Office from the sport council, not stakeholders or users of the facility. The Sport Council of Pniël has a User Agreement with the municipality, and dealing directly without the Sport Council's knowledge undermines this agreement. The requests received were submitted before, but priority was given to the upgrades and installation of floodlights at Pniël sport facility, which was completed in January 2026. There is currently no budget available for the requests as other priority projects need to be addressed first at other sport facilities.	Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
305	Email	Ward 4	Cllr. Ralphton Adams	Matthew	Cyster	Roads, Transport and Stormwater	Construct a basic road into the area to enable landowners to access their properties. Access to and into the 8-mangronde, Johannesdal has become increasingly urgent, and therefore the request is for the provision of basic infrastructure, specifically an access road.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
306	Email	Ward 4	Cllr. Ralphton Adams	Matthew	Cyster	Safety and Security	Construct a basic road into the area to enable landowners to access their properties. Access to and into the 8-mangronde, Johannesdal has become increasingly urgent, and therefore the request is for the provision of basic infrastructure, specifically an access road. - the absence of access and occupation has led to an increase in unauthorised occupation (squatters) on the land with an increase in burglaries in Pniël and Johannesdal.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
307	Email	Ward 4	Cllr. Ralphton Adams	Matthew	Cyster	Land Use Management and Building	Construct a basic road into the area to enable landowners to access their properties. Access to and into the 8-mangronde, Johannesdal has become increasingly urgent, and therefore the request is for the provision of basic infrastructure, specifically an access road. Financial burden and gentrification risk: municipal property rates on the properties have increased steadily over the past years, despite people being unable to utilise their land due to a lack of access. This financial burden has already forced four families to sell their land to eager developers. The continued inaccessibility contributes directly to the loss of heritage and accelerates the unwanted spiral of gentrification in the valley. 417	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Safety and Security	Start legal process against the owner of the delepated house, 30 Hahn Street, Ida's Valley, as the abandoned house attracts criminal elements. Property needs to be fenced in and secured as per the relevant bylaw for abandoned properties. Legal action needs to be taken against the owner to force compliance with the law.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
418	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Safety and Security	CCTV Camera installation at the corner of Bloekom Avenue and Hahn Street, as this is a crime hot spot where criminal elements gather and operate from (Broken Palace and the Spaza Shop at 35 Bloekom Avenue).		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
419	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Roads, Transport and Stormwater	Installing a raised intersection in Bloekom Avenue between the two entrances of Ida's Valley Sportsgrounds, as this section is used by drivers to accelerate at high speed up Bloekom Avenue, causing huge noise from accelerating, braking and spinning of wheels. I recommend Hahn Street and Bloekom Avenue.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
420	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Roads, Transport and Stormwater	Social assistance from the municipality to occupiers at 33 Hahn Street, as they have no power or water, and it is creating a sanitation problem for the surrounding neighbours, as the property has 9 adults and 4 children in 3 backyard dwellings, not being able to use the one toilet on the property, which is broken. The sewer line is also blocked, and the people can't afford repairs, creating a serious health hazard as the property is overflowing with sewage, causing a huge stench and cockroach infestation. Due to the huge stench and health risk, the municipality must undertake to open the blocked sewage line and restore partial water to this toilet. Added steps could include sanitation of the property to alleviate the stench.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
421	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Roads, Transport and Stormwater	Installation of a mini circle at Bloekom Avenue and Rustenburg Road and the integration or upgrade of Lelie Street and Rustenberg Rd to eliminate the blind spot as you turn right into Lelie Street, caused by the brick wall of the property on the corner of the two streets intersecting.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
422	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Roads, Transport and Stormwater	Upgrade the Rustenberg Road behind Ida's Valley Primary School with parking bays to allow an alternative pick up and drop off point and better access to the school from Rustenberg Rd.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
423	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Recreation and Sport	Construction of a swimming pool on Ida's Valley Sportsgrounds or next to Ida's Valley Library.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
424	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Information and Communication Technology (ICT)	Additional points for free WIFI in more areas of Ida's Valley.		Director: Corporate Services	Department: Information Communications Technology (ICT)	Corporate Services	Local	Not Applicable
425	Online Form	Ward 6	Cllr. Nateshia Mcombring	Kelvin A	Kelvin A	Safety and Security	The establishment of a dedicated noise abatement and disturbing noise enforcement unit on a 24-hour basis. The TRU unit is not an effective noise enforcement unit and is not dedicated to addressing the noise coming from private residences. They are a stop-and-go method that does not resolve the disturbing noise nuisances.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

524	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Roads, Transport and Stormwater	Transport Proposals: Park-and-Ride, Buses, and Pedestrian Zones - Proposal: Park-and-ride lots at each town entrance: Establish secure parking lots at the main access roads into Stellenbosch (for example, Groeneweide Road, Papegaaiberg/R44, Brandwacht, etc.) and provide shuttle services for commuters or students to the CBD. This "parking-in-a-circle" concept was already recommended in local planning (a heritage workshop noted ideas for parking around the town, with buses connecting to the centre, see centrestellenboschheritage.co.za). Implementing these peripheral lots will intercept cars before they enter the historic core		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
525	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Roads, Transport and Stormwater	Dedicated bus parking on the Braak (court side): Coach buses, taxis and shuttles should not wind through narrow Dorp Street. Instead, a staging area can exist on the Braak's side near the Magistrate's Court. Tourist buses could park there, and people can walk into town. (In fact, a local study observed that "buses driving around the Braak are not seen as a good idea" (See stellenboschheritage.co.za), underscoring the need to keep big vehicles at the perimeter.) By routing buses to the Braak area, we free up space in the CBD and reduce congestion.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
526	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Roads, Transport and Stormwater	Pedestrianise the town centre: Gradually restrict private car access on Andringa and Church Street, and on adjoining core roads, to turn the centre into a pedestrian-friendly zone. This plan aligns with the SDF's "car-free living" goal, which aims to have at least half of urban activities within a short walk of homes. With safer sidewalks, widened crossings and more trees, people will be encouraged to walk or cycle for errands. Enhancing bicycle paths (for example, along Park and Plein Streets) will also improve townwide connectivity without adding cars.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
527	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Spatial Planning	Urge the Municipality to honour the Adam Tas Corridor (ATC) vision as it finalises the new IDP. The official ATC planning documents describe the Corridor as "an integrated urban development corridor that is liveable, safe, resource-efficient, socially integrated, and economically inclusive". In practice, this means focusing on mixed-use, higher-density neighbourhoods served by efficient transit. Indeed, the ATC spans 375 hectares of currently under-used land with plans for roughly 13,500 new homes for students, workers and lower-income households, coupled with "enhanced public transport" (see stias.ac.za). In short, the ATC embodies best-practice urbanism for Stellenbosch. Respectfully request that these principles guide all IDP decisions – equitable, transit-oriented growth – rather than by short-term gain from sprawl.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
528	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Spatial Planning	Development Outside the Urban Edge and Congestion: Citizens are alarmed that new housing developments are being approved far beyond the designated urban edge, in low-density layouts with no nearby bus or rail service. As the Stellenbosch Spatial Development Framework (SDF) warns, "distant suburbs are almost entirely reliant on private motor vehicles" and their expansion "has an important role to play in increasing tra□ic congestion" (see Stellenbosch Municipality Spatial Development Framework). This congestion rings true in Ward 9, where far-flung estates force residents into cars for every trip. The SDF explicitly advises the opposite approach: "allow higher density developments within town limits" and "enforce a strict urban edge" to stop wasteful sprawl. We must heed that advice. Keeping new growth compact, oriented to existing towns and transit routes, will relieve pressure on roads, water, and other infrastructure.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
529	Email	Ward 9	Cllr. Isabelle De Taillefer	Teddy	Hall	Roads, Transport and Stormwater	Development Outside the Urban Edge and Congestion: Traffic congestion is already our biggest problem. The SDF notes that congestion has risen sharply in recent years and calls for a significant modal shift: "a combination of non-motorised transport and public transport facilities is suggested… ensuring at least 50% of activities are found in an urban area within 1 km of residential areas". In other words, daily needs (work, school, shopping) should be accessible on foot, by bike, or by bus. Yet today the CBD of Stellenbosch is gridlocked for hours each weekday, especially when university terms are in session. This situation is unsustainable. The IDP must integrate the transport components of the ATC plan – including new bus routes and bike lanes – so that people can live here without relying on driving. Building sidewalks, cycle paths, and a good bus network is not an optional luxury but a necessity to restore mobility and quality of life.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

Rozette Du Toit	Nick	Furness	Spatial Planning	New road widening: Koelenhof Road (MR174) (R304) / Welgevonden Road to Adam Tas Road (MR27) (R44) / Bird Street Intersection - Stellenbosch Plan Description Final Conceptual Layout Phase 1: Objection to the proposed widening of the various sections of Bird Street and adjacent road		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
548	Annual Report Oversight Meeting	Ward 10	Cllr. Rozette Du Toit	Esmerelda	van der Ross	Access to Basic Services	The biggest problem is the collaboration between the municipality and the municipality when there are complaints. If there is a complaint, it is never addressed, or it never takes place. It is a result of the residents, their geysers, the residents, their tiles, their crates that rot in their places, cranes that are broken, pipes that leak (Lapland / Lavanda / Arora Municipal Flats)		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
549	Annual Report Oversight Meeting	Ward 10	Cllr. Rozette Du Toit	Esmerelda	van der Ross	Access to Basic Services	And the biggest problem is behind Aurora, where there is a plague of cats, there is a plague of mosquitoes, and rats. And it is behind the river. And on the corner at 101, there is a hole. No maintenance is being attended to.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
550	Annual Report Oversight Meeting	Ward 10	Cllr. Rozette Du Toit	Esmerelda	van der Ross	Safety and Security	High Crime – Community safety needs to patrol more at the municipal flats and no efficient turn around time		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

568	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Safety and Security	Ward Priority 1: Redeployment of working cameras to Papegaaiberg in Papegaaiberg Reserve Comment: 1		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
569	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Environmental Management	Ward Priority 1: Papegaaiberg Reserve Fencing Comment: 1		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
570	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Environmental Management	Ward Priority 1: Extension of fence around the Papegaaiberg cemetery in Papegaaiberg Reserve Comment: While a fence is important for residents' safety concerns, the cemetery could benefit from increased foot traffic if it were transformed into a public park that connects to the Papegaaiberg Reserve.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
571	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Environmental Management	Ward Priority 1: A better quality of panels to be used to replace vandalised panels in Papegaaiberg Reserve Comment: Rating 1		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
572	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Environmental Management	Ward Priority 1: Establish and maintain an active group, "The Friends of Reserves" Taking care of the total set environmental requirements for a declared reserve in ward 11 Comment: In light of the neglect and complete lack of management of the proclaimed nature reserve by Stellenbosch Municipality, this private sector/civil society entity is vital.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
573	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Environmental Management	Ward Priority 2: Updating of the Papegaaiberg Nature Reserve Management Plan, and to be submitted to Council for adoption Comment: In light of the neglect and complete lack of management of the proclaimed nature reserve by Stellenbosch Municipality, an updated management plan needs to be adopted by Council and – most importantly – implemented.		Director: Community and Protection Services	Department: Community Services	Community Development and Protection Services	Local	Not Applicable
574	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Electrical Services	Ward Priority 2: Overall lighting of ward will be an on-going priority at Patrys Street (below Fisant Hammerkop, Flamingo, Jan Frederick, Tarentaal) Comment: There are faulty street lights across Ward 11. Adam Tas Road (supposed to be prioritised as a major entrance to Stellenbosch) and Distillery Road have many dark sections.		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
575	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Safeguarding the area of Adam Tas bridge and NMT network from the CBD to Remgro Comment: The area of Ward 11 between Onder-Papegaaiberg neighbourhood and Lower Dorp Street/CBD is extremely unsafe for pedestrians and cyclists in two ways: 1) security (muggings, stabbings, robbery, murder), and 2) safe NMT infrastructure.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information

576	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Tarring of the residential area's roads Comment: Rating 1		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
577	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Removal of the illegal taxi rank by the Stellenbosch Station Comment: This parking area has great potential to provide very necessary public parking for visitors to the Stellenbosch Station and visitors to the commercial and residential properties in the Lower Dorp Street area (especially in light of the future dualling/widening of Lower Dorp Street).		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
578	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Completion of tarring of pathways in Kwikstert Street down to Devon Valley Road Comment: The area of Ward 11 between Devon Valley and Lower Dorp Street/CBD has great potential to be an important NMT corridor. NMT infrastructure for pedestrians and cyclists is very necessary.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
579	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Erect a sign/wall at the entrance of Onderpapegaaiberg identifying the area Comment: The area lacks proper signage. Clear signage in identifying and providing wayfinding for all geographical areas, including Onder-Papegaaiberg, Bosman's Crossing, Devon Valley, and Woodmill/Sawmills it is needed at all major entrances to the area, including Oude Libertas Road, Devon Valley Road, and Vredenburg Road.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
580	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Urgency to identify alternative parking space for taxis at Stellenbosch Station that has taken complete control of the current parking area Comment: This parking area has great potential to provide very necessary public parking for visitors to the Stellenbosch Station and visitors to the commercial and residential properties in the Lower Dorp Street area (especially in light of the future dualling/widening of Lower Dorp Street).		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
581	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: No facilities for example toilets available at the Taxi rank at Stellenbosch Station. Alternative arrangements to be investigated Comment: This parking area has great potential to provide very necessary public parking for visitors to the Stellenbosch Station and visitors to the commercial and residential properties in the Lower Dorp Street area (especially in light of the future dualling/widening of Lower Dorp Street).		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
582	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: No input was asked from the public about the Taxi rank at Stellenbosch Station Comment: This parking area has great potential to provide very necessary public parking for visitors to the Stellenbosch Station and visitors to the commercial and residential properties in the Lower Dorp Street area (especially in light of the future dualling/widening of Lower Dorp Street).		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

583	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Sidewalk intersection Adam Tas to Devon Valley Road in front of the businesses Comment: The area of Ward 11 between Devon Valley and Lower Dorp Street/CBD has great potential to be an important NMT corridor. NMT infrastructure for pedestrians and cyclists is very necessary.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
584	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: The request for sideways must make provision for pedestrians and cyclists in the area of Woodmill and Adam Tas R310 Comment: The area of Ward 11 between Devon Valley and Lower Dorp Street / CBD has great potential to be an important NMT corridor. NMT infrastructure for pedestrians and cyclists is very necessary.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
585	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Ward 11 strives to comply with the NMT requirements of Stellenbosch Municipality Comment: The area of Ward 11 between Devon Valley and Lower Dorp Street / CBD has great potential to be an important NMT corridor. NMT infrastructure for pedestrians and cyclists is very necessary. The area between Onder-Papegaaiberg neighbourhood and Lower Dorp Street / CBD (Distillery Road and Adam Tas Bridge) is extremely unsafe for pedestrians and cyclists in two ways: 1) security (muggings, stabbings, robbery, murder), and 2) safe NMT infrastructure.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
586	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: Closure of Nagtegaal Street Comment: This project is completed.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
587	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: There is a growing concern around the impact on traffic from development in Oude Molen Comment: Traffic calming is needed in Distillery Road to address the increased traffic to and from Bosman's Crossing – and the Oude Molen property in particular.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
588	Online Form	Ward 11	Alderman Johannie Serdyn	Liebrecht	Liebrecht	Roads, Transport and Stormwater	Ward Priority 2: NMT facilities are a prerequisite in Oude Molen Comment: NMT infrastructure is vital to reduce increased traffic to and from Bosman's Crossing – and the Oude Molen property in particular. A pedestrian bridge over the railway and a safe pedestrian crossing between Adam Tas Road and Lower Dorp Street are needed. NMT infrastructure would not only link Bosman's Crossing / Oude Molen / Distillery Road to Lower Dorp Street and the Eersteriver NMT infrastructure, but it would also provide safe NMT routes for residents of Onder-Papegaaiberg and Devon Valley.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

632	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Housing Development	Ward Priority 1: RDP Housing and plots for low- and medium-income earners in Kayamandi. Comment: Zone O is still awaiting houses, for a very long time. We have been living without electricity for so long and are still struggling to maintain a proper road.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
633	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Local Economic Development and Tourism	Ward Priority 1: Provide space for 106 Local Business stalls to operate in Kayamandi Comment: No space has been provided		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
634	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Property Management	Ward Priority 1: Identification of land for a New Primary School in Kayamandi Comment: We disagree, as we have never been informed about the identification of the land.		Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
635	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Electrical Services	Ward Priority 2: Installation of electricity in Nkanini and Azania Comment: Enkanini has some access to electricity, but not all residents are connected, while Azania has no access to electricity across the entire settlement.		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
636	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Informal Settlements	Ward Priority 2: Maintaining the existing toilets in Nkanini and Azania Comment: The toilets in both areas have not yet been maintained, and we request that they be repaired or replaced, as they are currently in poor condition		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
637	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Roads, Transport and Stormwater	Ward Priority 2: Construction of tar roads in Nkanini and Azania to make it accessible for trucks to enter the areas Comment: Both settlements have no access roads for trucks to enter the areas.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
638	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Community Development	Ward Priority 3: Space for a Food Garden that can provide vegetables for child-headed families to help disadvantaged families. Identified spaces: Nkanini, G Section and TRA Comment: We have no available space, but we are in need of a garden		Director: Planning and Economic Development	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
639	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Waste Management	Ward Priority 4: Distribution of waste bags and skips in Nkanini and Azania Comment: We only received 10 bags once a year, and when we are in need of bags, we buy it by the EPWP for 5 cents.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
640	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Local Economic Development and Tourism	Ward Priority 4: Employ additional EPWP workers to clean the Nkanini River and streets of Nkanini, Azania and the rest of Ward 12. Comment: Only one person is currently coordinating the database, which makes it difficult to get work. We therefore need more people to help capture data for the Stellenbosch database		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
641	Online Form	Ward 12	Cllr. Ayanda Tomose	Simbonile	Simbonile	Waste Management	Ward Priority 4: Collect refuse in all areas of Ward 12 Comment: There is no door-to-door collection, they only collect it via skip bin.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
642	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Housing Development	Ward Priority 1: RDP Housing and plots for low- and medium-income earners in Kayamandi. Comment: We understand that housing is a long-term priority. Although we need it now, we recognise that it may take time.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
643	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Local Economic Development and Tourism	Ward Priority 1: Provide space for 106 Local Business stalls to operate in Kayamandi Comment: This is not a priority for the community. It will benefit a few individuals.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
644	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Education	Ward Priority 1: Identification of land for a new primary school in Kayamandi Comment: Kayamandi need more schools. We have children who are not enrolled because there are too few schools in our ward.		Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Provincial	Western Cape Education Department
645	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Electrical Services	Ward Priority 2: Installation of electricity in Nkanini and Azania Comment: Due to the high crime rate at night, we urgently need electricity. It improves safety and makes daily life easier. Children also struggle to study at night because there is no power.		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
646	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Informal Settlements	Ward Priority 2: Maintaining the existing toilets in Nkanini and Azania Comment: We often get sick because the toilets are not regularly maintained or cleaned. Over 1 000 people use these toilets, and there is no hygiene.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
647	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Roads, Transport and Stormwater	Ward Priority 2: Construction of tar roads in Nkanini and Azania to make it accessible for trucks to enter the areas Comment: Ambulances and fire engines cannot access our community, and we struggle a lot in Azania.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
648	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Roads, Transport and Stormwater	Ward Priority 2: The streets of Watergang require speed humps Comment: This will benefit the entire community		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
649	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Roads, Transport and Stormwater	Ward Priority 2: Construction of a raised intersection (speedhump) in front of Kayamandi Primary School Comment: This will assist learners in crossing the street		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
650	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Informal Settlements	Ward Priority 2: Additional ablution facilities in Nkanini and Azania Comment: We need more ablution facilities in Azania, as we are a large community with too few operating toilets. Please install more.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
651	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Informal Settlements	Ward Priority 2: Provision of accessible communal ablution facilities for persons with disabilities in Ward 12 Comment: Please install toilets that can accommodate families living with disabilities.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
652	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Waste Management	Ward Priority 4: Distribution of waste bags and skips in Nkanini and Azania Comment: Please provide waste bags every day. We struggle to dispose of our waste because the municipality does not provide enough bags, they only distribute them twice a year.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
653	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Waste Management	Ward Priority 4: Collect refuse in all areas of Ward 12 Comment: Regular waste collection is needed		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
654	Online Form	Ward 12	Cllr. Ayanda Tomose	Phindile	Phindile	Fire and Disaster	Ward Priority 5: Smoke detectors and fire extinguishers at Churches and ECD centres in Kayamandi Comment: Please install them in all households, as this helps reduce the number of fires		Director: Community and Protection Services	Directorate: Community and Protection Services	Community Development and Protection Services	Local	Not Applicable
655	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Housing Development	Ward Priority 1: RDP Housing and plots for low- and medium-income earners in Kayamandi. Comment: Because housing is a long-term issue, we are requesting UISP for Azania through our community leaders.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
656	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Local Economic Development and Tourism	Ward Priority 1: Provide space for 106 Local Business stalls to operate in Kayamandi Comment: This is not a primary basic service		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
657	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Education	Ward Priority 1: Identification of land for a New Primary School in Kayamandi Comment: Children are attending school in Pniël, more than 5km away from Kayamandi		Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
658	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Informal Settlements	Ward Priority 2: Installation of electricity in Nkanini and Azania Comment: Azania informal settlement does not have access to electricity. Crime is high due to the lack of streetlights, and there are frequent fire outbreaks because of unsafe electricity practices. There is also no access to Wi-Fi, and children are unable to do their schoolwork at night because there is no lighting inside the houses.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
659	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Electrical Services	Ward Priority 2: Fix Street Lights in the Decanting sites and Watergang area Comment: We are not part of Watergang, as we have no electricity in Azania. We also urgently need streetlights, as it is unsafe for residents		Director: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	Not Applicable
660	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Informal Settlements	Ward Priority 2: Maintaining the existing toilets in Nkanini and Azania Comment: There are too few toilets in Azania compared to the population and number of households. More than 100 people share a single toilet.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
661	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Roads, Transport and Stormwater	Ward Priority 2: Construction of tar roads in Nkanini and Azania to make it accessible for trucks to enter the areas Comment: Tarred roads are needed for emergencies, as mud becomes a major problem when it rains. It is also difficult to bring in furniture, as delivery vehicles cannot enter the area.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
662	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Roads, Transport and Stormwater	Ward Priority 2: Installation of channels along the existing gravel roads to prevent potholes, and make it accessible for trucks to enter the areas Comment: Gravel roads become muddy and create more potholes. We would like properly graded tar roads, as previously requested in the 2024/25 IDP.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
663	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Roads, Transport and Stormwater	Ward Priority 2: Rename or name the unnamed streets in the Watergang area Comment: Azania need roads		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
664	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Informal Settlements	Ward Priority 2: Additional ablution facilities in Nkanini and Azania Comment: There are too few toilets in Azania for the number of households.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
665	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Community Development	Ward Priority 3: Space for a Food Garden that can provide vegetables for child-headed families to help disadvantaged families. Identified spaces: Nkanini, G Section and TRA Comment: We need food gardens, as most people in our settlement are poor and cannot afford food.		Director: Planning and Economic Development	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
666	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Education	Ward Priority 3: Assist with the registration of the ECDs (to comply with the norms and standards of social development) Comment: Affordable ECD centres near our settlements are a necessity.		Director: Planning and Economic Development	Section: Community Development	Community Development and Protection Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026

667	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Waste Management	Ward Priority 4: Distribution of waste bags and skips in Nkanini and Azania Comment: At Azania, we do not receive waste bags regularly. They are only distributed once a year		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
668	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Local Economic Development and Tourism	Ward Priority 4: Employ additional EPWP workers to clean the Nkanini River and streets of Nkanini, Azania and the rest of Ward 12. Comment: Add more EPWP staff to continuously clean Ward 12, and appoint supervisors to verify that cleaning and the distribution of plastic bags have been carried out.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
669	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Waste Management	Ward Priority 4: Collect refuse in all areas of Ward 12 Comment: Refuse is collected only once a week, and the skips are not being emptied regularly. As a result, the community resolves the challenge by burning the waste which causes toxic fumes.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
670	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Waste Management	Ward Priority 4: Informal Settlement door-to-door refuse collection programme in all informal Settlements in Kayamandi Comment: We have never experienced door-to-door waste collection. We would like to support the government as a community in implementing this service.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
671	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Fire and Disaster	Ward Priority 5: Smoke detectors and fire extinguishers at Churches and ECD centres in Kayamandi Comment: The municipality is to install smoke detectors in all structures		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
672	Online Form	Ward 12	Cllr. Ayanda Tomose	Nthuseng	Nthuseng	Informal Settlements	Request for the installation of services at Khwezi Informal settlements. Khwezi is also known as Watergang, informally, as they are located next to a Dam		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
673	Online Form	Ward 12	Cllr. Ayanda Tomose	Yamkela	Yamkela	Housing Development	Ward Priority 1: RDP Housing and plots for low- and medium-income earners in Kayamandi. Comment: This is a long priority		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
674	Online Form	Ward 12	Cllr. Ayanda Tomose	Yamkela	Yamkela	Local Economic Development and Tourism	Ward Priority 1: Provide space for 106 Local Business stalls to operate in Kayamandi Comment: This is not to the benefit of the community		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
675	Online Form	Ward 12	Cllr. Ayanda Tomose	Yamkela	Yamkela	Education	Ward Priority 1: Identification of land for a new primary school in Kayamandi Comment: Our children are struggling to attend Nondzamme Primary School.		Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
676	Online Form	Ward 12	Cllr. Ayanda Tomose	Yamkela	Yamkela	Informal Settlements	Ward Priority 2: Installation of electricity in Nkanini and Azania Comment: Azania informal settlement does not have access to electricity. Crime is high due to the lack of streetlights, and there are frequent fire outbreaks because of unsafe electricity practices. There is also no access to Wi-Fi, and children are unable to do their schoolwork at night because there is no lighting inside the houses. 873	IDP Open Day	Ward 16	Cllr. Elsabe Vermeulen	John	Smith	Land Use Management and Building	The owner of 36 Hoek Street has an approved building plan for the construction of a boundary wall and an extension. According to the owner, the boundary wall has been completed; however, the extension cannot be finalised due to an illegal Wendy house erected on the neighbouring property at 42 Hoek Street. The structure is reportedly positioned in such a way that it encroaches on the area where the approved extension is intended to be built, thereby preventing further progress on the development.	According to the building inspector of the area, he indicated that a notice will be served.	Director: Planning and Economic Development	Department: Development Management	Planning, LED and Tourism	Local	Not Applicable

963	Online Form	Ward 18	Alderman JC Anthony	Paul	de Villiers	Spatial Planning	Ward Priority 2: Job creation projects in Klapmuts. EPWP workers / learnership should be made available to young people to be trained as firefighters in Klapmuts to sustain the need Comment: Job creation in Klapmuts is critical to address multiple issues. Impactful projects are required that will create jobs, learning and skills development through formal and informal training. Firefighting is but one of a large area of expertise and job opportunities that will be unlocked when new projects are allowed to develop in the Klapmuts area. Klapmuts is a critical business hub within the winelands districts of Cape Town / Stellenbosch / Paarl areas, and there is a huge need for business development in this critical area. The urban edge has to be enlarged to include the above-mentioned projects to address this priority 2		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
964	Online Form	Ward 18	Alderman JC Anthony	Paul	de Villiers	Local Economic Development and Tourism	Ward Priority 2: Job creation projects in Klapmuts. EPWP workers / learnership should be made available to young people to be trained as firefighters in Klapmuts to sustain the need Comment: Job creation in Klapmuts is critical to address multiple issues. Impactful projects are required that will create jobs, learning and skills development through formal and informal training. Fire Fighting is but one of a large area of expertise and job opportunities that will be unlocked when new projects are allowed to develop in the Klapmuts area. Klapmuts is a critical business hub within the winelands districts of Cape Town/Stellenbosch/Paarl areas and there is a huge need for business development in this critical area. 965	Online Form	Ward 18	Alderman JC Anthony	Paul	de Villiers	Spatial Planning	Ward Priority 2: Creation of jobs for the Klapmuts Community. A structured method should be done to secure Klapmuts Community with permanent jobs as security workers at the sports field and EPWP to clean Mandela City and La Rochelle Comment: Job creation in Klapmuts is a top priority! Security and EPWP are important, but more so are large and impactful projects that will create a large number of jobs. Klapmuts is strategically very well placed for growth as it is centrally located between Paarl/Stellenbosch and Cape Town. There are numerous businesses that are keen to start here, but limited developable land with easy access to the main roads. The Business Park that is planned at Uitsig farm (27 hectares) is in-between the N1 and R101 and within 450m from Klapmuts centre, should be included in the revised urban edge!		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable

974	Online Form	Ward 18	Alderman JC Anthony	Paul	de Villiers	Recreation and Sport	Ward Priority 4: Upgrading of existing play parks in Klapmuts upgrade Comment: This is needed		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
975	Online Form	Ward 18	Alderman JC Anthony	Paul	de Villiers	Spatial Planning	Ward Priority 5: The spatial development plan for Klapmuts needs to be updated for the town to be united – as the boundaries of the town are divided into two municipalities - Drakenstein and Stellenbosch. Ward-based planning needs to be a continuous function in this area – as apartheid planning is still on in Klapmuts Comment: The Urban Edge of Klapmuts needs to be expanded to include a few critical projects that are awaiting municipal support and approval. Uitsig Farm is 450m from the Klapmuts town centre. It is situated between the N1 and the R101, spans 27 hectares, and is adjacent to the current urban edge. The farm has requested that the Stellenbosch Municipality include it within the urban edge to allow for the development of a business park. This project will be key to job creation and sustainable development, which are critically needed in Klapmuts.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
976	Have Your Say	Ward 18	Alderman JC Anthony	Gordon	Wentzel	Roads, Transport and Stormwater	Upgrading of the roads in Klapmuts		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1069	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Simon	Wilson	Traffic Enforcement	Reduce traffic fines amount on illegal parking are too high	Traffic Fines are not prescribed by the municipality but are uniform around the province	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1070	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Ross	Koch	Waste Management	More visual media awareness must be done regarding recycling, and must include infographics. Recycling contractor leaves broken glass on the street after collection		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
1071	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Simon	Wilson	Waste Management	Implementation of a municipality strategy on waste pickers causes panic on refuse collection day		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
1072	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Peter	Maritz	Water Services	Reported incident from 4 January 2025- Pipe burst on sidewalk due to municipal digger loader. Reported, received numerous reference numbers, yet nothing has been done. The resident would like to know the process of submitting an insurance claim, or if he is allowed to fix it himself. Will the municipality reimburse / pay the invoice? Latest Reference Number: WN-000052124		Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
1073	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Peter	Maritz	Income and Expenditure	Reported incident from 4 January 2025- Pipe burst on sidewalk due to municipal digger loader. Reported, received numerous reference numbers, yet nothing has been done. The resident would like to know the process of submitting an insurance claim or if he is allowed to fix it himself. Will the municipality reimburse/ pay the invoice. Latest Reference Number: WN-000052125		Director: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	Not Applicable
1074	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Pienaar	Spies	Income and Expenditure	Customer made reference to the increase in municipal accounts and indicated that according to his calculations from 2005/06 until the current year, the municipal accounts have increased by 460%. 2005/06 paid +-R17 000 annually Currently paying R90 000 annually Resident situated in Die Boord and indicated that about 65% of owners are above the age of 50 years old		Director: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	Not Applicable
1075	IDP Open Day	Ward 22	Cllr. Esther Groenewald	Pienaar	Spies	Income and Expenditure	Recommendation: The municipality should source alternative revenue sources. Look at taxing tourists, for example, more than local customers. Municipality to look at best practices from other countries.		Director: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	Not Applicable
1076	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Safety and Security	Ward Priority 1: Safety in Ward 22 and alongside the Eerste Riviera Comment: Safety is the primary issue for the local community groups. It is the main thing we want from our municipality.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1077	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Safety and Security	Ward Priority 1: Request for a 1-hour meeting every six months dedicated to the feedback of safety operations in Ward 22 Comment: The ward councillor is on the local community safety Telegram group and provides more regular feedback than holding meetings only every six months (which are generally poorly attended).		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1078	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Safety and Security	Ward Priority 1: All safety requests previously mentioned are top priority. Together with that is the priority that all the cameras in Ward 22 should be linked to the internal system with sustainable and reliable internet, and be monitored by the control room Comment: The municipality has a shocking record when it comes to maintaining cameras and sharing information. I was involved about 10 years ago, when footage was shared with Stellenbosch Watch and private security companies. That was then stopped, and later the cameras went offline for months and, from what I understand, are still not fully back online. I also had a bicycle stolen from in front of a camera about 5–8 years ago. Could I get the municipality to share the footage with me or the police? No		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1079	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Sealing of roads was put on the list as well, but it has somehow disappeared. The internal roads in the suburb of Ward 22 need serious attention (2022/23 financial year) Comment: Wait until they break, and allow water under the surface and your cost of repair quadruples. The municipality has a good response time, but a poor record of preventative maintenance.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1080	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Maintenance of all pedestrian and cycle paths in Ward 22 Comment: I am a regular cyclist and do not have any issues with the paths		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1081	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Construction of a raised intersection at the corner of Doornbosch and Van Rheede Road Comment: The request is probably a good way to slow down traffic around the schools		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1082	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Cleaning of vegetation on the Rokewood sidewalk at the corner of Rokewood / Elbertha Streets Comment: I understand clearing vegetation as a means of reducing the risk of 'criminals hiding in the bushes', but I don't like the overkill response of the municipality, where they come with a scorched earth mentality, or simply a broken telephone outcome of what is expected. One of my neighbours asked for foliage to be cleared at the end of Robbertsz Street. The supervisor then left his team at work whilst he went off, and they cut down 50-year-old wild olive trees before I could stop them. That is not a favourable outcome.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1083	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Collection of traffic data in Stellenbosch utilising cameras Comment: If you Google, you'll find an article on an experiment conducted by Stellenbosch University with the Municipality, where they installed software on the traffic lights along the R44, allowing a computer to synchronise the lights to maximise the flow of traffic, depending on what was being registered on a series of cameras / traffic counters. The system worked for a few months and was then discontinued because the software provider required a contract to move beyond the pilot, and the Municipality's SCM process didn't allow for the procurement. In my view, the Municipal Manager should have found a way.		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1084	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 2: Taxi's driving in the yellow lanes Comment: It has been noticed, but should be managed through ad hoc checks		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1085	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Parks and Open Spaces	Ward Priority 3: The play parks have not all been upgraded and / or painted in Ward 22 Comment: My biggest issue with the Sering Park. We have an outdoor gym. Then, a few months back, we suddenly saw a second one. This speaks to the big problem with public sector procurement - it's easier to tender for a new asset, rather than maintaining the existing one. Both gyms, as it happens, are also frustrating because there was no quality control when they were installed, so equipment has been installed on a slope, making it difficult to use some of the equipment.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1086	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Parks and Open Spaces	Ward Priority 3: Play equipment in the parks to be painted and / or replaced in Ward 22 Comment: Please prioritise maintaining equipment before simply replacing or duplicating.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1087	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Roads, Transport and Stormwater	Ward Priority 3: Construct / install a pedestrian gate/thoroughfare wide enough for only pedestrians and bicycle users at the wood bridge by the Eerste River that connects it with Krige Street (similar to the gate / thoroughfare in Ward 7 at Hangbrug) Comment: There is already one here? Agree that it is very useful		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1088	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Environmental Management	Ward Priority 4: Fixing of the two gates that give entry to the Brandwacht mountain area, one of which goes from Nooitgedacht Street and the other one from Brandwacht Street Comment: I wasn't aware that the gates need fixing. But I access the mountain area almost every day through these 2 points, and so as long as I can access (on foot or bicycle).		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1089	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Environmental Management	Ward Priority 4: Fencing the bush area at Brandwacht Mountain, or implementation of restrictive access control measures in nature areas to keep arsonists out Comment: I see the new fence going up, and I don't agree that it is a sufficient deterrent (to anyone), and I would hate to have 'access control' such as locking the gate after hours, since I often use the gate to walk my dogs early morning, or late evening. The old fence was rustic and gave the feeling of an old Karoo farm. The new fence makes me feel more like I'm in an urban setting.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1090	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Waste Management	Ward Priority 4: Removal of bin pickers from the streets to the hub or an alternative location Comment: It is a big issue in our community group. I don't know the answer. I guess in theory, they could be relocated to a hub. But then it would be more difficult for them to try to extract value from our trash (one person's trash is someone else's treasure). And we know there is such a wealth inequality in this country, and we throw away a lot of stuff that could still be valuable to others.		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable

No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1091	Online Form	Ward 22	Cllr. Esther Groenewald	Peter	Koch	Water Services	Our water reticulation system is clearly beyond useful life, with a pipe burst every few days. No sooner than one burst is fixed, it creates a pressure point somewhere else, leading to another failure. Every engineer will tell you that it is far cheaper to replace the whole system at this point, than to pay the premium rates for the repair team (often outside normal working hours) to fix it piece by piece. Please budget for the full replacement!		Director: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	Not Applicable
1092	Online Form	Ward 22	Cllr. Esther Groenewald	Gustav	Louw	Safety and Security	Ward Priority 1: Safety in Ward 22 and alongside the Eerste Riviera Comment: Rating 5		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

1170	Email	Whole Municipal Area: All		S	Kirsten	Integrated development planning and public participation	Over recent decades, voting by all citizens has produced a more unjust and unequal society than before, as stated by some articles. According to statistics, this led to a larger portion of the citizenship that does not pay taxes due to unemployment. Although voting during the IDP and Budget public participation process by citizens who do pay taxes and fund the whole process, seems to be the just way to go, it will be viewed as discriminatory and excluding certain groups of people. Some articles on this topic even go as far as insulting "people of colour and other marginalised communities" by stating that they would be negatively affected. Therefore, would it then be non-discriminatory and more inclusive if only citizens that does not pay property tax should be allowed to vote? Non-taxpayers can then enjoy the sole privilege of contributing to society by taking responsibility for and dealing with the outcome.		Office of the Municipal Manager	Section: IDP/PMS/PP	Executive Mayor	Local	Not Applicable
1171	Email	Whole Municipal Area: All		Philip	Redelinghuys	Safety and Security	Present a working agreement between the Stellenbosch Municipality and themselves, to address and solve a vast number of critical issues in certain key sectors of Stellenbosch as a town and community - Community safety at the Gateways and transport corridors of town		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

1202	Email	Whole Municipal Area: All		Emile	van der Merwe	Budget	Comments on tariff and rates policy: The Stellenbosch Agricultural Society, in association with The Stellenbosch Farmworker Forum hereby requests and proposes that the Stellenbosch Municipality adopt the same financial model as currently being implemented by the Bergriver Local Municipality as part of their budget and rates policy framework. The proposed tax rebate policy will apply to bona fide agricultural owners belonging to agricultural societies affiliated to Agri Western Cape and subsequently also to the SA Agricultural Union, situated in Stellenbosch Municipality municipal area (proposal forms part of the email)		Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1203	Email	Whole Municipal Area: All		Emile	van der Merwe	Budget	Comments on the 2025/26 Revised Infrastructure Services Development Charges Policy (see full document submission part of written submissions)		Director: Infrastructure Services	Department: Development Services, Asset Management and Systems & Project Management Unit (PMU)	Infrastructure Services	Local	Not Applicable
1204	Email	Whole Municipal Area: All		Emile	van der Merwe	Spatial Planning	Chapter 4: Spatial Development Framework - The formulation, preparation and approval of local spatial development frameworks for the rural nodes have been outstanding for a long period of time. It is noted that the Koelenhof Local Spatial Development Framework has been prepared and advertised for public comment, and that the Dwarsriver Valley Local Spatial Development Framework is in process. The Society welcomes the above planning initiatives and hereby requests that priority be given to the Vlottenburg, Spier and Lyndoch Local Spatial Development Frameworks that are located alongside Baden Powell Drive and Polkadraai Roads, respectively.		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1205	Email	Whole Municipal Area: All		Emile	van der Merwe	Spatial Planning	Apart from the identified mixed-use developments, it is proposed that the Spatial Development Framework be amended to include the areas of De Novo and Vaaldraai as potential areas for farmworker housing		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1206	Email	Whole Municipal Area: All		Emile	van der Merwe	Housing Development	Integrated Human Settlements - Housing Projects (Farmworker Housing): Mixed-use housing (formalised homeownership - especially employer housing) - It is our understanding that employer housing includes farm worker housing and that it should be catered for in mixed-use developments. The Stellenbosch Agricultural Society, through its affiliated membership structure, can leverage private partnerships and initiatives to ensure appropriate infrastructure arrangements, public facilities and areas earmarked to accommodate farm worker housing. Apart from the identified mixed-use developments, it is proposed that the Spatial Development Framework be amended to include the areas of De Novo and Vaaldraai as potential areas for farmworker housing		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable

No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1207	Email	Whole Municipal Area: All		Emile	van der Merwe	Housing Development	Kayamandi Northern Extension: The Stellenbosch Agricultural Society supports the northern extension of Kayamandi. The area indicated in green on the proposed rezoning and subdivision plan (map on the submission letter) however, must be retained and protected for agricultural purposes. The said area is located on the eastern boundary of commercial farms, and our concern is that further residential development on this portion could infringe on property rights and operational management and agricultural activities of the farms.		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1208	Email	Whole Municipal Area: All		Emile	van der Merwe	Housing Development	Social Housing Proposed on FARM 81/2 AND FARM 81/9: The proposed development of approximately 250 social housing units on the properties will not complement the social functionality of the neighbourhood since it cannot be integrated with other minimum ancillary and complementary uses. The properties are wedged between the railway line to the east and the R304 to the west, which does not allow for holistic and integrated neighbourhoods. Urban development in the form of social housing units on the said properties furthermore, will compromise the objectives of the Scenic Overlay Zone as set out in the approved Stellenbosch Zoning Scheme By-Law (2023).		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1209	Email	Whole Municipal Area: All		Emile	van der Merwe	Local Economic Development and Tourism	Local Economic Development Strategy: The Stellenbosch Agricultural Society, in dealing with the rural community and organised agriculture hereby proposed the following interventions: red tape reduction in the planning department, building plan approvals, streamlined process that conforms to by-laws stipulations, tax rebates in relation to heritage protection of farms, new vineyard plantations, provision of institutional/community facilities on farms (creches, pre-schools, public transport, housing, sportsfields etc), Alien clearing and river management practises, partnering / engaging with the Society and the Farm worker Forum in relation to land availability and allocation to emerging farmers, liquor and trade licences, issuing of zoning certificates, streamline / prioritise applications aimed and agri-processing and related tourist facilities		Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1210	Email	Whole Municipal Area: All		Thomas	Lawrie	Roads, Transport and Stormwater	Concern about the road infrastructure items included in the capital infrastructure budget: First concern relates to the proposed construction of the Wildebosch – Trumali link road, referred to in the IDP as the following projects: "Wilderbosch Extension to Trumali" and "Wilderbosch Extension to Technopark". As you must be aware, there have been numerous objections by a variety of interest groups about the costs and benefits of this road link. Considering all the available information, the proposed construction of this road link appears to be irrational as no transportation benefits will be realised by its construction. SIG accordingly requests that funding for these projects be removed from the budget and that the funds should be allocated to a more worthy cause, such as projects in support of public transport		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

1211	Email	Whole Municipal Area: All		Thomas	Lawrie	Roads, Transport and Stormwater	Concern about the road infrastructure items included in the capital infrastructure budget: The second issue of concern relates to the proposed "upgrade: Lower Dorp Street". The approval of the project is subject to the outcome of appeals addressed to the Western Cape Minister of Cultural Affairs and Sport. Implementation of the project is accordingly subject to the outcome of the appeals		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1212	Email	Whole Municipal Area: All		Gordon	Laing	Roads, Transport and Stormwater	This submission primarily focuses on the Comprehensive Integrated Transport Plan (CITP) and its treatment of active and public transport investment, travel demand management, road safety, and — most fundamentally — the municipality's sustained planning for, and investment bias toward road infrastructure for private vehicles over walking, cycling, and public transport		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1213	Stakeholder Engagement	Whole Municipal Area: All		Melissa	Hollenbach (NPC)	Local Economic Development and Tourism	EPWP Employment and Long-Term Opportunities: •As an EPWP worker with 2 years in the cycle and law enforcement experience, I asked how development leads to permanent positions. Feels there has been no benefit and questioned possible discrimination. •Requested the department to explain how the EPWP programme benefits unemployed individuals. •How is it benefiting permanent positions at the municipality? •As a previously employed EPWP worker, Ms Melissa was also invited to an event where success stories were shared about the EPWP programme, but declined the invitation. •Ms Melissa mentioned that she is currently unemployed.	In terms of the EPWP programme, Stellenbosch Municipality has the second-highest number of workers employed after the City of Cape Town. With regard to permanent employment, a few EPWP workers have been permanently employed. To become permanently employed, a fair and transparent process needs to be followed. An EPWP event was held last week to showcase success stories of the programme.	Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1214	Stakeholder Engagement	Whole Municipal Area: All		Bonita	Daniels	Budget	Sustainability Goals (SDGs) Prioritisation •Referenced a previous March presentation on sustainability goals. •Questioned why SDG 4 (Quality Education) was not prioritised. •Argued that education is foundational and interconnected with multiple other goals: • Poverty reduction (SDG 1) • Health and well-being (SDG 3) • Gender equality (SDG 5) • Economic growth (SDG 8) • Climate action (SDG 13) • Emphasised the importance of early childhood development and lifelong learning. • Expressed concern that public input was invited but not reflected in the current direction. • Requested reconsideration of the municipality's SDG focus.	• Clarified that education is not a primary municipal mandate; it falls under provincial / national government. • Noted that SDGs are interlinked, but the municipality selected six focus areas for the current reporting cycle. Indicated: •Progress on selected SDGs was shared in prior engagements. •Data related to education requires validation from relevant authorities. •Confirmed future reviews may incorporate additional SDGs, including those raised by the public.	Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1215	Stakeholder Engagement	Whole Municipal Area: All		Chalmane	Kruger	Safety and Security	Pedestrian Safety Near Schools: Raised safety concerns about children crossing a busy road near schools. Reported inconsistent assistance from EPWP workers assigned to help. Requested installation of a pedestrian crossing.	Confirmed the road is a provincial road where crossings are typically limited to intersections. Committed to assessing the request and submitting a proposal to the provincial department if feasible.	Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1216	Stakeholder Engagement	Whole Municipal Area: All		Charl	de Bois	Safety and Security	CCTV Camera Functionality: Requested clarity on operational status and repair timelines for CCTV cameras. Ask for information on CCTV cameras: current number operational, timeline for restoring non-functional cameras, and status of the project launched last year.	The municipality transitioned to a new service provider in the past six months. Significant investment made in: •Camera system migration •Licensing renewals •Current status: 50% of all CCTV cameras are operational, 80% of LPR (License Plate Recognition) cameras are operational •Some cameras remain offline due to: •Damage (e.g., vehicle collisions) Insurance claim delays •CCTV Master Plan: New camera installations added based on requests and budget availability. •Specific locations not disclosed publicly for security reasons	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1217	Stakeholder Engagement	Whole Municipal Area: All		Melissa	Hollenbach (NPC)	Budget	Homelessness in Stellenbosch: Raised concern about the visible increase in homelessness, particularly in town areas. Asked what actions the municipality is taking to assist homeless individuals.	•Highlighted that the municipality has: •Partnered with the Stellenbosch Night Shelter •Implemented initiatives such as token systems. •Stated that homelessness interventions and statistics are documented in the current municipal report. •Encouraged the public to review the report and submit feedback.	Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1218	Stakeholder Engagement	Whole Municipal Area: All		Flip	Liebenberg	Safety and Security	Safety at Adam Tas Bridge: Raised concerns about ongoing attacks and criminal activity near Adam Tas Bridge.	•Area divided between municipality, PRASA, and Heineken. •Enforcement actions ongoing, including searches. •Legal processes prevent immediate removal of individuals. •SAPS engaged for support.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1219	Stakeholder Engagement	Whole Municipal Area: All		Flip	Liebenberg	Cemeteries	Calcutta Memorial Park Naming: Request about the origin of the "Calcutta" name.	Uncertain of origin; committed to follow up. Chairperson. Confirmed name will be changed to Stellenbosch Memorial Park.	Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1220	Stakeholder Engagement	Whole Municipal Area: All		Yusuf	Hassen	Community Development	Universal Access Project: Requested clarification about the universal access project.	•Originated from disability access initiatives. •Expanded to include elderly and temporarily impaired individuals. •Covers physical access and information accessibility (fonts, colours, digital access). •Aim: Ensure inclusive municipal services for all citizens.	Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
1221	Stakeholder Engagement	Whole Municipal Area: All		Irma	Faul	Safety and Security	Tactical Response Unit (TRU) and Community Safety: Request about TRU presence in Plankenbrug and Lynedoch, and highlighted challenges faced by neighbourhood watches.	•TRU patrols hotspot areas. •The municipality is exploring 24-hour law enforcement services. •Encouraged direct coordination with officials and neighbourhood watch coordinators.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1222	Stakeholder Engagement	Whole Municipal Area: All		Irma	Faul	Safety and Security	CCTV Monitoring and Response: Request about the monitoring and response	•Cameras monitored 24/7 from the municipal control room (Ida's Valley Fire Station). •Supported by EPWP staff. •SAPS and partners invited but not consistently present. •Incidents handled by municipal teams, SAPS, and security partners via shared communication platforms	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1223	Stakeholder Engagement	Whole Municipal Area: All		Heidi (Spier)	Unknown	Safety and Security	Community and Business Collaboration on CCTV: Proposed leveraging private business control rooms to monitor cameras. Identified opportunity for stronger collaboration.	Confirmed infrastructure exists to stream feeds to external partners. No neighbourhood watch has yet adopted the offer.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026												
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information				
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1224	Stakeholder Engagement	Whole Municipal Area: All		Betty	Nieuwoudt	Safety and Security	Broader Safety Concerns (Multiple Areas): •Under-resourcing in Klapmuts and slow emergency response. •Fire risks and illegal dumping near informal settlements. •Gang activity and robberies. •Homelessness (Oak Tree Village) and relocation challenges. •Infrastructure issues (bridges, fencing, traffic signage)	•Acknowledged concerns. •Encouraged continued engagement with officials. •Confirmed some issues already under discussion.	Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1225	Stakeholder Engagement	Whole Municipal Area: All		Fuad	Davis	Safety and Security	Provincial Perspective on Safety: •Emphasised the link between crime and poverty, inequality, and unemployment. •Supported municipality's holistic approach (urban upgrading, homelessness interventions). •Requested sharing of project rollout plans for monitoring and support.		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1226	Stakeholder Engagement	Whole Municipal Area: All		Bonita	Daniels	Education	Early Childhood Development (ECD) Facilities: •Questioned allocation of funds to certain ECDs. •Raised concerns about: Misclassification of facilities, Zoning barriers preventing registration, Large number of unregistered ECDs (163 vs 58 registered)	•Clarified funding distribution (majority not in affluent areas). •Highlighted infrastructure challenges (e.g., asbestos removal, heritage compliance). •Zoning must be addressed during planning stages. •Rezoning possible upon application.	Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
1227	Stakeholder Engagement	Whole Municipal Area: All		Bonita	Daniels	Education	Criticised delays and inefficiencies in zoning processes. Emphasised municipality's responsibility in enabling ECD registration.		Director: Community and Protection Services	Section: Community Development	Community Development and Protection Services	Local	Not Applicable
1228	Stakeholder Engagement	Whole Municipal Area: All		Flip	Liebenberg	Access to Basic Services	Infrastructure and Development Planning: Raised concerns about whether water, road, and service infrastructure planning aligns with ongoing developments. Warned of risks if the infrastructure is not implemented beforehand.	•Integrated planning frameworks are in place (spatial, transport, infrastructure, and budgeting). •Infrastructure demand and capacity are assessed both strategically (IDP) and per development application. •Public participation is part of the planning process.	Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1229	Stakeholder Engagement	Whole Municipal Area: All		Flip	Liebenberg	Property Management	Caravan Park Status: Questioned why the caravan park remains unused and costly to maintain.	Future use under council consideration. The proposal includes leasing the site (potentially 20 years) for caravan / day camping use via tender.	Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
1230	Stakeholder Engagement	Whole Municipal Area: All		Charmane	Kruger	Housing Development	Klapmuts Housing Plans and Building Issues •Highlighted missing or incomplete building plans for older homes (dating back to 1968, transferred in 2015). •Residents face financial barriers when needing approved plans for renovations.	•Houses were transferred without complete documentation from the Department of Human Settlements. •The municipality cannot intervene directly on privately owned properties. •Commitment to investigate the issue.	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1231	Stakeholder Engagement	Whole Municipal Area: All		Charl	de Bois	Spatial Planning	Adam Tas Corridor (ATC) Development: Raised concerns about traffic management and the lack of visible plans. Mentioned proposals such as lowering the R44.	•ATC is a priority, integrated development. •Multiple studies completed: Open Space Master Plan, Non-Motorised Transport Plan, Public Transport Plan •Transport planning is coordinated with infrastructure teams.	Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1232	Stakeholder Engagement	Whole Municipal Area: All		Eric	Loubser	Spatial Planning	Technopark Development Concerns •Submitted a vision plan (April, previous year) for Technopark redevelopment (live-work-play concept). •No visible municipal feedback or inclusion in planning discussions.	•Acknowledged the submission. •Will be addressed in the Municipal Spatial Development Framework (MSDF) review. •Requires council approval to amend current policies before implementation	Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1233	Stakeholder Engagement	Whole Municipal Area: All		Emile	van der Merwe	Housing Development	Farm Worker Housing •Noted absence of previously agreed 20% allocation for farm worker housing. •Concern about the lack of representation in IDP and the housing pipeline.	•Housing allocations now follow national / provincial databases and policies. •Municipality is encouraging farm workers to register on the housing database. •Exploring future farm housing projects in collaboration with agricultural stakeholders.	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1234	Stakeholder Engagement	Whole Municipal Area: All		Eric	Loubser	Spatial Planning	Plankenbrug Industrial Area •Highlighted job losses due to transport challenges. •Requested plans to support and sustain the economic hub. •Highlighted Plankenbrug industrial area decline affecting employment.	Area included in broader development planning (Adam Tas Corridor). Zoning adjustments and precinct planning underway.	Director: Planning and Economic Development	Department: Development Planning	Planning, LED and Tourism	Local	Not Applicable
1235	Stakeholder Engagement	Whole Municipal Area: All		Betty	Nieuwoudt	Housing Development	Overcrowding and Housing Inequality •Raised issues of backyard dwellers, overcrowding, and social challenges. • Criticised prioritisation of student housing over local residents. •Highlighted unfair burden of missing building plans (also affecting ECD centers).	•Acknowledged challenges. • Emphasised need for mixed housing models (not only free housing). •Social housing planned for income groups between R1 800 and R22 000/month .	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1236	Stakeholder Engagement	Whole Municipal Area: All		Bonita	Daniels	Education	ECD (Early Childhood Development) Facilities: Requested inclusion of ECD facilities in housing developments.	Confirmed zoning provisions allow for ECD facilities in developments.	Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1237	Stakeholder Engagement	Whole Municipal Area: All		Piet	van Blerk	Roads, Transport and Stormwater	Traffic Congestion and Infrastructure Challenges •Advocated for expanded infrastructure, including: •Additional roads •Public Transport Plan: Noted it is due by the end of June 2026, but questioned who is doing it, as there is "no one in the public transport section" in Stellenbosch. •Transport solutions: Stated park-and-ride, NMT, roads alone won't solve traffic. Requires a combined approach. •Lack of progress: No action on public transport in the last 10 years. No new roads have been built since Helshoogte Road. •Roads: Western Bypass should be a provincial road, not municipal. Eastern Link Road is proclaimed a provincial road – the province should provide input. Both roads would alleviate Stellenbosch traffic. •Electric scooters and delivery scooters: Using roads, sidewalks, Eerste River NMT route. No bylaw, no driver's licenses. Asked if the municipality is addressing this. •Quick wins: Suggested starting with small interventions – correct traffic signal timing – to improve traffic flow.	Acknowledged congestion concerns and outlined ongoing and planned projects: •Western Bypass Road •Dualling of the R304 •Upgrades to the R310 (provincial project) •Intersection upgrades: •Alexander Street •Merriman Street •Dorp Street •Confirmed that some projects (e.g., Dorp Street) may begin construction soon.	Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1238	Stakeholder Engagement	Whole Municipal Area: All		Erik	Loubser	Roads, Transport and Stormwater	•Concern: Believes there is "resistance to doing what's right" due to a vocal minority. Time to listen to the "silent majority" to get roads built, public transport fixed, park-and-ride and NMT implemented. •Congestion: Cannot move between 4:00–5:30 PM due to congestion in Ward 8/9. •Specific issue: The single bridge over the Eerste River Dorp Street is a major cause of congestion. Proposed building an identical bridge next to it as a simple solution.	Public Transport and Mobility Planning •Recruitment process underway for a Public Transport Planner (interviews scheduled for the end of May). •Emphasis on integrated, multi-modal transport planning rather than focusing solely on NMT. •Traffic signal synchronisation project: •Successfully piloted along the R44. •Planned for expansion across additional areas in collaboration with Stellenbosch University. Bridge Infrastructure (Dorp Street / Cecil Bridge) •Progress in appointing a consultant for bridge development. •Awaiting final adjudication committee approval. •Next steps include the design phase and public participation.	Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1239	Stakeholder Engagement	Whole Municipal Area: All		Flip	Liebenberg	Roads, Transport and Stormwater	Taxi Rank at R304 / Bird Street (Kayamandi) Raised concerns: •Bird Street bridge near Kayamandi: Taxi rank built in the road reserve. Road is due for upgrade / dualling. •Impact: Taxi rank, presumably illegal, will affect businesses on the left-hand side coming into town by restricting property entrances once road is dualled. •Question: Is there a way around it? How can the municipality justify the taxi rank location vs harm to businesses? Any alternative plan?	•Road design—not the taxi rank alone—is the determining factor. •Design process largely complete but still under review. •Ongoing consultations with affected landowners may influence final design. Regulation of E-Scooters •Current legislation does not adequately cover e-scooters. •The municipality is conducting a legal review. •Indication that municipality may proceed under existing by-laws despite legislative gaps.	Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1240	Stakeholder Engagement	Whole Municipal Area: All		Betty	Nieuwoudt	Waste Management	Waste Management and Community Collaboration Made a plea for community cooperation: •Comment: Requested the community to work with the department. The shared goal is the same. •Noted - 700 people employed in Cloetesville, Ida's Valley, Kayamandi for clean-up operations. •Collaboration could assist with the unemployment program. Acknowledged municipality cannot do it alone and appreciates community support		Director: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	Not Applicable
1241	Stakeholder Engagement	Whole Municipal Area: All		Piet	van Blerk	Human Resource Management	Staffing and Capacity Concerns Raised concerns about: •Understaffing in the engineering department. •Importance of hiring qualified and experienced personnel.		Director: Corporate Services	Department: Human Resources Management	Corporate Services	Local	Not Applicable
1242	Stakeholder Engagement	Whole Municipal Area: All		Chalmane	Kruger	Property Management	Municipal Lease Agreements and Compliance •Raised concerns regarding facilities operating on Municipal properties without formal lease agreements. •Highlighted cases in Klapmuts and Franschhoek where facilities have operated for 30–40 years without agreements. •Questioned: •The required process for obtaining agreements •Expected waiting periods for approval •Noted inconsistency: facilities continue operating and paying fees despite lacking formal agreements.	Responded with clarification on the process: Lease agreements require: •A formal council resolution approving the lease •Drafting of the contract by the legal / contract department •Internal compliance checks to ensure alignment with legislation •Final sign-off after agreement on terms and conditions •Timeline: No fixed duration due to variability in negotiations •If terms are agreed upon quickly, contracts can be finalised within a few weeks •Reinforced that the council resolution is a key prerequisite in the leasing process.	Director: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	Not Applicable
1243	Stakeholder Engagement	Whole Municipal Area: All		Heidi		Budget	Capital Expenditure Presentation Improvement Proposal •Proposed enhancements to how capital expenditure information is presented: •Suggested including: High-level priorities at the beginning of presentations, Budget allocation percentages (capital vs operational), Rationale: Current documentation (500–600 pages) is complex and difficult for stakeholders to digest A summarised overview would: •Improve clarity. •Help stakeholders understand budget constraints. •Focus discussions on key priorities	CFO acknowledged and noted the suggestion for future implementation	Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026													
Community and Stakeholder Comments / Input								Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Name	Surname	Priority	Community / Stakeholder Comments / Input	Departmental Feedback or Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
1244	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Budget	Budget: to inquire about the financial allocations specifically attributed to our wards for the 2024/25 financial year. Could you please provide details on the amount allocated and a brief explanation of what these funds will be used for?		Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1245	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Access to Basic Services	Unresolved complaints. The annual report reflects the service standards. But residents have always had outstanding service complaints. How many complaints from our wards remain unresolved? And what is the average turnover?		Director: Infrastructure Services	Office of the Director: Infrastructure Services	Infrastructure Services	Local	Not Applicable
1246	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Human Resource Management	Consequences for non-performance. What steps have been taken against irresponsible officials?		Director: Corporate Services	Department: Human Resources Management	Corporate Services	Local	Not Applicable
1247	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Budget	Corrective plan. What is the clear time-bound corrective measures for the underperformance identified in our wards?		Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1248	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Budget	What are the measures for underperformance in wards?		Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1249	Annual Report Oversight Meeting	Whole Municipal Area: All		Councillor John	Andrews	Safety and Security	Safety intervention. What kind of safety action has the municipality implemented in its wards to prevent crime?		Director: Community and Protection Services	Department: Protection Services	Community Development and Protection Services	Local	Not Applicable
1250	Annual Report Oversight Meeting	Whole Municipal Area: All		Amanda	Visser	Informal Settlements	Evictions on farms – Malan Farm, where people were evicted, but does not have emergency houses for evictees in Ward 21		Director: Planning and Economic Development	Department: Integrated Human Settlements	Human Settlements	Local	Not Applicable
1251	Annual Report Oversight Meeting	Whole Municipal Area: All		Amanda	Visser	Environmental Management	If we enter Mountain View, at the cemetery, there is a big tree, but the path that is there is very narrow. Fortunately, there have been no accidents yet, but if the municipality can look at and fix the path for the entrance of our community.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1252	Annual Report Oversight Meeting	Whole Municipal Area: All		Amanda	Visser	Roads, Transport and Stormwater	There is a dam between the Wendys and the houses. And that dam, especially when it is warm, then it stinks a lot. Can the municipality do something about that dam?		Director: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	Not Applicable
1253	Annual Report Oversight Meeting	Whole Municipal Area: All		Amanda	Visser	Parks and Open Spaces	Our children in Mountain View have a park that has just been patched up. There is no fencing. The municipality does nothing about it to make our park beautiful for our children. And apart from the playground, we are still looking for more space for our children in Ward 21.		Director: Community and Protection Services	Department: Community Services	Parks, Open Spaces, Environment	Local	Not Applicable
1254	Annual Report Oversight Meeting	Whole Municipal Area: All		Pastor Jeffery	May	Budget	Farms are barely visible during elections. Can the municipality make use of the service delivery projects implemented specifically in the rural areas in 2024/25, and how does that compare with urban areas such as Cloetesville and Franschhoek? Outline the service delivery projects per ward in 2024/25 and how they compare to urban wards.		Director: Financial Services	Department: Financial Management Services	Financial Services	Local	Not Applicable
1255	Annual Report Oversight Meeting	Whole Municipal Area: All		Pastor Jeffery	May	Access to Basic Services	I would like to know the municipality's structured involvement with rural residents outside of the election period, particularly regarding infrastructure inequality. In Cloetesville, it is crucial to engage with Franschhoek and Vlottenburg to assess what affordable infrastructure upgrades are planned for this financial year. Establishing clear priorities will help ensure accountability and transparency in these developments.		Director: Infrastructure Services	Office of the Director: Infrastructure Services	Infrastructure Services	Local	Not Applicable

IDP and Budget Public Participation Input - April 2026

Subject: VERSOEK VANAF WYK 19.- KOELENHOF ONTWIKKELING- PUBLIC DRAFT KOELENHOF LSDF- CALL FOR PUBLIC COMMENT AND IDP INPUTS FROM WARD.

Goeie middag Raadslid Kumm.

- Met al die ontwikkelling wat in Wyk 19 plaasvind, vind ons as gemeenskap dat geen onwikkelling vir plaaswerkers plaasvind nie.
- Geen of min basiese dienste en moet dringend verskaf word.
- Ontneem van basiese regte van inwoners tot basiese regte geskend word.
- Beskikbaarstelling van grond vir plaaswerker behuising.
- Bou van Plaswerker behuising.
- Behuising vir Koelenhof en Muldersvlei behuising. -(PRASA).
- Assist the communities of Kromme Rhee, Vaaldraai/Elsenburg and De Novo (Provincial Department of Infrastructure) with Title deeds- Awaiting almost 28 years.
- Aanbring van sport en rekreasie fasiliteite.-(Speelparke, Tennisbane, rugby, netball en sokker velde en klubhuise ingesluit).
- Bou van swembaddens.
- Versoek soos per IDP wyks prioriteite.
- Dat grond beskikbaar gestel word vir behuising vir plaaswerkers soos in Ward Committee Operational Plan 2026/2027.
- Beskikbare gesondheidsorg fasiliteite.
- Dat sportfasiliteite gebou word.
- Woonbuurte wat ”buite die Urban edge” woonagtig is, ingesluit word en ontwikkelling moet geskied.
- Voldoende publieke vervoer beskikbaar gestel word.
- Woonbuurte wat buite Urban Edge val, ingesluit word.
- Oue tehuis vir afgetrede en bejaarde persone te bou.
- Hoêrskole gebou word.
- Clinic/hospital.
- Hospise.

- Land availability for Initiation school.
- Sufficient lightning on roads 304, Kromme Rhee, Elsenburg, Muldersvlei, De Novo roads.- WCOP.
- Cameras and lightning at Koelenhof Robot.- WCOP.
- Speed cameras on De Novo, Muldersvlei, Frankies Corner.- WCOP.
- Community safety structures in Koelenf, Bottelary areas.- WCOP.
- Community recreation hall to be built.- WCOP
- Indoor recreation Facilities.
- Police station for surrounding areas.- WCOP.
- Guard house for NHW in area.- WCOP.
- CCTV Cameras to be installed.- WCOP.
- Sufficient Public Transport.
- Sufficient housing for each and every one.

As discussed by our Ward Committee members..

Thanks in advance.

Kind regards,

James Williams

Morning

Please explain the “comments” process referred to on page 5,what is the process?

We have already sent an objection letter to the dept regarding the “Adam Tas/Kayamandi” dual.

See objection letter attached, does this suffice?

Morning Piet

Trust all is well?

Please find attached our letter addressed to the Municipality,please forward on our behalf to the relevant people (please cc me in on the email so we can see who the relevant people are).

We suggest that going forward a formal public meeting is held before any alterations begin so as to give all the public affected an opportunity to offer input.

We trust this letter will be seen in the light it is intended & that any further developments will be communicated in a meaningful manner.

Regards

Urgent

Dear Sir

NEW ROAD WIDENING: KOELENHOF ROAD (MR174) (R304) / WELGEVONDEN ROAD TO ADAM TAS ROAD (MR27) (R44) / BIRD STREET INTERSECTION – STELLENBOSCH
PLAN DISCRIPTION FINAL CONCEPTUAL LAYOUT: PHASE 1

1.

INTRODUCTION

1.1 This letter serves to record the objections of the owners of immovable properties ("the Properties") in Stellenbosch ("the Owners"), referred to hereunder in paragraph 2.1, who strongly object and are opposed to the proposed widening of the various sections of Bird Street and adjacent roads, Stellenbosch ("the Project"), referred to above.

1.2 It is not the intention of the Owners to waive any of their legal rights that any act or ordonnance may accord the Owners, in respect of listing and filing any formal objections which may accrue the owners in future, in respect of the Project.

1.3 All rights of the Owners to act in future and exercise any rights they may have in law, to object to the Project, remain strictly reserved.

1.4 The purpose hereof is as follows:

1.4.1 register with Stellenbosch Municipality ("the Municipality"), the concerns and objections which the Owners, as a group have in respect of the Project;
1.4.2 engage with the Municipality, and *vice versa* in respect of any information which may be required to be exchanged between it and the Owners, prior to any formal legal steps which may be required to be followed in future;
1.4.3 make aware to the Municipality and any other interested parties, the negative impact which the Owners perceive, the Project, if executed as planned, may have on the Properties and the particular business interests of the Owners or occupants thereof;

1.4.4 communicate to the Municipality, the contact details of the respective representatives of the Owners of the Properties and thereby facilitating meaningful communication;

1.4.5 to enable, at this point in time, the Municipality to consider alternatives and options to implement in respect of the Project, than what are presently proposed;

1.4.6 to create an informal forum between the Municipality and the Owners to interact in respect of the Project, before reaching any stage of formal interaction in respect of any legal requirements to be followed, by either the Municipality or the Owners, in addressing and lodging formal objections to the Project;

1.5 By studying this letter, it is trusted that the Municipality will urgently engage into meaningful and transparent discussions with the Owners in respect of the Project.

2.

OWNERS OF THE PROPERTIES

2.1 The Properties, Owners and contact details, are listed hereunder as follows:

PROPERTIES	OWNERS	CONTACT DETAILS
Erf6135	Meyer Lamprecht	meyer@summerstorm.co.za
Erf8904	Dayle Richards	dayle@richbuild.co.za
Erf15897	Roan Malherbe	roan_malherbe@yahoo.co.uk
Erf Komn 6094	Richard Michael	Richard.Michael@supergrp.com
Erf Tvill 8905	Nick Furness	nick@wmg.co.za
Erf16435	Abu Osmon	abu@topit.co.za
248 Bird Street, Stellenbosch	Asmat Mehmood	asmatmehmood935@gmail.com

2.2 You are requested to in future, address any communication in respect of the Project, whether formally or informally, to all the respective Owners of the Properties.

2.3 Should any of the contact details of the Owners change in future, such amendments thereto, will be communicated to the Municipality by the Owner(s) affected thereby.

2.4 Should ownership of the Properties change, in the period which may be relevant to interaction, called for by the Owners to the Municipality in respect of the Project, for the interim period before official objections to the Project to be raised in future, such successor in title will notify the Municipality.

3.

THE PROJECT AT A GLANCE

3.1 Interaction in the recent past between the Owners and the Municipality, *inter alia* entailed meetings held, when representatives of the Municipality introduced the Project to some of the Owners.

3.2 The aforesaid meetings focused on a brief introduction by the Municipality, to the Owners who attended, the purpose of the Project and the steps intended to facilitate the Project.

3.3 The aforesaid meetings were informal and not attended by a spectrum of experts, who might be involved in the Project.

3.4 The information gleaned from the drawing number UDS599/OPT/C/01, compiled by UDS Africa Engineering Consultants, confirms that the rights and interests of the Owners were totally disregarded.

3.5 It is abundantly clear that the Project as is presently presented, if executed by the Municipality, will have a devastating impact on the rights and interests of the Owners and occupants of the Properties.

3.6 The Project further reflects a complete disregard for any input thereto reserved for the Owners by the Municipality.

3.7 Urgent attention to interaction and opportunity for the Owners to engage with the Municipality in respect of the Project, must urgently be accorded by the Municipality.

4.

CONCERNS BY OWNERS

4.1 The initial impression reflected by the project, is the lack of opportunity for vehicle users to turn to the Properties, situated at the left hand side of Bird Street, when entering Stellenbosch from the bridge near Kayamandi ("Kayamandi Bridge").

4.2 Conversely, a similar problem will be experienced by motorists, traversing Bird Street in the direction of Kayamandi Bridge, who wish to turn right to the Properties, situated on the right hand side of Bird Street.

4.3 The problems for motorists, perceived in terms of the content of paragraphs 4.1 and 4.2 are also relevant to motorists entering Bird Street from the R44 (direction from Somerset West) and R44 (direction from Klapmuts).

4.4 The aforesaid perceived problem for motorists, relevant to turning either to the left or right in the intersections of Bird Street between Porter Street / Bell Street and the R44, will also be relevant to the section of Bird Street, between the aforesaid intersections, where the median island, is earmarked to be constructed.

4.5 All of the businesses of the owners and the occupants of the Properties is dependant on clients or customers require easy access to the respective Properties.

4.6 It is submitted that the Project will frustrate easy access to the Properties, which may lead to existing and future clients and customers, to rather search for alternative, due to being subject to the aforesaid frustrations.

4.7 Most of the business activities coupled to the Properties, are extremely reliant on walk in clients or customers and the aforesaid frustrations, will have a devastating effect on these proprietors.

4.8 Motorists who intend traveling from the R44 (from Klapmuts) and R44 from Somerset West, turning into Bird Street in the direction of Kayamandi Bridge, will have to anticipate whether the lane that they are traveling in, will give access to their intended destination.

4.9 When intending and wishing to change lanes, the motorists wishing to travel past Kayamandi Bridge, will eventually have to anticipate whether they should change lanes, if such lanes will give access to the single lane across Kayamandi Bridge.

4.10 If traversing a lane in Bird Street, which will not give access to Kayamandi Bridge, such motorists will have to turn into the lane leading to Kayamandi Bridge.

4.11 Similarly, the motorists who are traveling in any lane in Bird Street, who intend following the lane which leads to the planned section of Bird Street underneath Kayamandi Bridge, will have to change lanes if not traveling in the aforesaid dedicated lane.

4.12 The changing of lanes, necessitated for the reasons as ventilated in paragraphs 4.8 to 4.11, will bring about a bottleneck which which originates well before Kayamandi Bridge, and even closer to the R44 and Bird Street intersection.

4.13 A bottleneck for motorists perceived in Bird Street, will also develop before the intersection of Bird Street, Porter Street and Bell Street, in both directions, to and from Kayamandi Bride.

4.14 When the anticipated flow of traffic entering Stellenbosch from Kayamandi Bridge, in terms of the Project, enters the single lane over Kayamandi Bridge it merges with the single lane in which traffic is accommodated underneath Kayamandi Bridge.

4.15 It is submitted that a traffic bottleneck will also develop at the area where the roads referred to in paragraph 4.14, merge, as some motorists would want to turn to the right hand lane or left hand lane at Bird Street, where the aforesaid singe lanes, merge into two lanes.

4.16 The development of bottlenecks in Bird Street, as discussed above, will be substantial, especially during early morning and late afternoon rush hours.

4.17 It is also contended that the full length of Bird Street, from and to Kayamandi Bridge and included to and from the R44 intersection, will be prone to bottlenecks developing due to motorists wishing to change lanes traveling in a double lane road to be constructed in Bird Street.

4.18 The intended widening of Bird Street as per the Project, entails an additional problem, namely parking space which is essential for the businesses attached to the Properties.

4.19 Presently, parking space for businesses attached to the Properties, is demarcated on the sides of Bird Street, past and before Kayamandi Bridge.

4.20 The Project *inter alia* reflects demarcated parking areas on the shoulders of Bird Street, past and before Kayamandi Bridge.

4.21 The Project, when studied, reflects less parking space on the sides of Bird Street than what the present position is, being an extremely busy road and forming an arterial section to and out of Stellenbosch.

4.22 Some businesses attached to the Properties, presently accommodate their clients/customers on the demarcated parking bays, referred to in paragraph 4.20.

4.23 Any change over from the present demarcated parking areas in Bird Street to the demarcated parking areas as per the Project, will frustrate motorists wishing to enter directly into the business premisses of most of the Properties.

4.24 The construction of a road near Kayamandi Bridge, giving access to traffic underneath Kayamandi Bridge, as per the Project will on its own, create substantial problems for motorists being forced to travel thereon.

4.25 It is abundantly clear that the aforesaid section of Bird Street, referred to in paragraph 4.25, will be viewed to be dangerous for motorists and their passengers intending to traverse the aforesaid section of the Project.

4.26 The aforesaid danger may include *inter alia* the following aspects namely:

4.26.1 it is proximate to a taxi rank, which is known to be volatile in terms of potential unrest flowing from taxi violence;

4.26.2 it is proximate to an existing squatter's camp, which is known as a crime hotspot;

4.26.3 it will include areas under the Kayamandi Bridge, leaving motorists prone and subjected to crime spots, as it will lure opportunistic criminals to pray on motorists in that area, especially at night time;

4.27 It has been alluded to by representatives of the Municipality during the meetings referred to above, that the widening of Bird Street as per the Projects, and specifically the construction of a median island, is perceived and earmarked to accommodate pedestrians walking to and thro to Kayamandi Bridge.

4.28 Should the median island referred to in paragraph 4.27, accommodate a large volume of pedestrians, as is presently the case walking to and from Kayamandi Bridge, such pedestrians will *per se* cause an additional substantial problem in terms of the flow of traffic in Bird Street.

4.29 It is contended a large volume of pedestrians using the median island, will bring about it being used as a walkway, alternatively a pedestrian crossing from the one side of Bird Street to the other and *vice versa*.

4.30 The problem of emerging bottlenecks and slow moving traffic in Bird Street, as ventilated above, will be exacerbated by pedestrians crisscrossing Bird Street and using any opportunity to pass slow moving traffic, continuing to do so whilst slow moving.

5.

ALTERNATIVES

5.1 Although the Owners do not perceive their rights and objections, listed in this letter to provide for an obligation to produce alternatives to the Project, some alternatives suggested hereunder, may be considered by the Municipality:

5.1.1 it is suggested that the Adam Tass Road which affords motorists access to Kayamandi Bridge and the R304 road, could be improved, safeguarded and clearly marked as an alternative to the area encompassed by the Project;

5.1.2 it is further suggested that the turnoff into Cloetesville, which gives access to the R304, also be improved by the Municipality, similar to the suggested raised in paragraph 5.1.1;

5.1.3 the turnoff to Cloetesville, at the intersection R304, leading to Lang Street Cloetesville, is another possibility to alleviate the burden of a large volumes of traffic, which the Project seemingly wishes to achieve;

5.1.4 the suggestions highlighted in paragraph 5.1.3, are also subject to the Municipality actively promoting and encouraging traffic to follow the suggested route;

5.1.5 present access for pedestrians coming from and going to Kayamandi Bridge, affords easy access to Bird Street and the centre of Stellenbosch, which the pathway from Kayamandi to Du Toits Station, allows to pedestrians;

5.1.6 the Du Toits railway station extends an opportunity to pedestrians wishing to commute to Stellenbosch railway station, which closely links to the centre of Stellenbosch;

5.1.7 other more extensive projects which may alleviate the congestion in Stellenbosch and specifically to which the Project relates, are well known to the Municipality;

6.

REQUIREMENTS

6.1 This letter serves to urge Stellenbosch Municipality to interact with the Owners of the Properties in a constructive and meaningful way, before any official process is followed in terms of the formal processes in law, which may follow in future.

6.2 By interacting as suggested in paragraph 6.1, unnecessary litigation may be avoided, and a suitable outcome be achieved.

7.

Kindly acknowledge receipt of this letter, as soon as possible.

8.

All the rights of the Owners remain strictly reserved.

Kind regards

Meyer Lamprecht _____

Dayle Richards _____

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Beste Johannie,

Herlei asb. Epos na die relevante afdeling,

Groot !!, Baie Groot !! versoek om die sypaadjie op te gradeer na 'n gemaklike voetgangers paadjie

Baie dankie aan die Munisipaliteit se aanplant van bome 38 jaar gelede op die sypaadjie maar die wortels van die bome maak dit nou onmootlik vir voetgangers om te gebruik.

Tans is voetgangers genoodsaak om die teerstraat van Van Reede te gebruik, wat onveilg is 😟 , omdat motoriste nie voetgangers respekteer nie.

Dit sal ook help om die spoed van motoriste te reguleer , deur die twee rigting Stopstraat by Van Reede en Formosa te verander na drie rigting stopstraat.

Ek let op dat die sypaadjie vanaf Strandweg tot Rokewood drie keer alreeds opgegradeer is . Dit is nou tyd dat die res van die sypaadjie aandag moet geniet.

Ek herinner die munisipaliteit dat hierdie dringende versoek deur belasting betalers van die omgewing versoek word.

By voorbaat dank

Jou Gelukkige Boord bewoner

Kind regards / Vriendelike groete

Subject: [EX] IDP and Budget public participation process

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good day

Over recent decades, voting by all citizens produced a more unjust and unequal society than before, as stated by some articles. According to statistics, this led to a larger portion of the citizenship that does not pay tax due to unemployment.

Although voting during the IDP and Budget public participation process by citizens that do pay taxes and fund the whole process, seems to be the just way to go, it will be viewed as discriminatory and excluding certain groups of people. Some articles on this topic even go as far as insulting “people of colour and other marginalized communities” by stating that they would be negatively affected.

Therefore, would it then be non-discriminatory and more inclusive if only citizens that does not pay property tax should be allowed to vote? Non-taxpayers can then enjoy the sole privilege of contributing to society by taking responsibility for and dealing with the outcome.

Regards

S Kirsten

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I was advised by Councilor De Taillefer to submit a proposal for the utmost urgent discussion at the upcoming IDP event in April.

The WESGRO funds directors as well as the Student Council, the Stellenbosch Taxi Association and the informal vendors are all aware and in support of this proposal and campaign.

Please advise me what other documents you need in order to prioritise this issue before another child is shot and killed at the taxi rank or a student murdered or a commuter and visitors are violated in Stellenbosch.

No one, not even myself, wil be able to claim there is no blood on our hands or shame in our hearts. if we do not pay attention to this issue and keep reaching for the obvious solutions at hand.

The Mayors office are still to schedule a meeting they proposed to us, during which we will present an elaborate version of the attached synopsis.

You may confirm with Shannon and the Mayors office.

We were advised to utilise this platform in advance.

The youth of town and students are ready to March if not listened to or protected or given the opportunities embeded in the solutions in front of us.

I would like to assure the people of Stellenbosch that there is enough money and investors available to not have this campaign be subject to the current 2026 municiple Budget allocations.

I am eagerly awaiting your response and reply.

Kind regards.

Philip Redelinghuys.

GATEWAY ZONES

An NGO/PBO registered as a SKILLS DEVELOPMENT ACADEMY providing education, professional services and paid internships in a wide range of industries and sectors including:

- Construction
- Agriculture
- Security
- Social Services
- Commercial & Trade
- I.T. & Media
- Tourism & Hospitality
- Transport
- Education

Interactive with the community its sponsors, trade partners, and local authorities through outcome based projects, driven by high technology and strategies, with a cutting edge online presence.

Achieving sustainability through continues research, to be a dynamic centre of innovation, towards a safer and more productive society

GATEWAY ZONES

(NPO / PBO)

The Proposed NPO/PBO would like to present a working agreement between the Stellenbosch Municipality and them-self, to address and solve a vast number of critical issues in certain key sectors of Stellenbosch as a town and community.

This proposed strategy will include solutions to:

- Community safety at the Gateways and transport corridors of town.
- Greater safety on the urban edge of town.
- Reducing drug trade and growing gangster activity all over town.
- Addressing the issues with homeless people, unattended to and exposed to further crime and violence.
- Employment through paid internships to the homeless and volunteering, researching students.
- Improved traffic flow and more parking in key sectors of town.
- Regulation and safety of all the taxi routes and ranks in town.
- Stimulating growth of upcoming small business.

GATEWAY ZONES aim to lease at least **4 to 8 properties** for a minimum of **15 years**, in three phases of 5 years each, from the municipality.

Some properties will be developed with new constructions, while others will be upgraded to specifications, that will suit the various functions and objectives of the GATEWAY ZONES NPO/PBO.

The NPO will engage with the municipality together with its own preferred consultants and partners in the development, construction and management phases of all the proposed properties.

GATEWAY ZONES and **ZONE 8 VISION** will be consulting and advising all the relevant .development teams during the design phases, construction phases and management phase of each facility built and upgraded, according to its mandate and objectives

The facilities leased will then be sub-leased, maintained and managed by the GATEWAY ZONES NPO/PBO and its subsidiary RPO’s and Trusts.

PROPERTIES LEASED

- **DORP STREET OFFICES (Corner of Piet Retief and Dorp Str.)**
  These offices will be renovated with the specifications required by law and upgraded to be the **OPERATIONAL HQ of the GATEWAY ZONES NPO**. They will to be leased by the NPO and Sub-Leased as operational offices to strategic partners and as **STUDENT ACCOMMODATION** to students and exchange students, volunteering at the NPO's various projects.

- **BERGZICHT MARKET**
  The Bergzicht Market will be upgraded, and in some areas reconstructed, to accommodate twice as many vending-stalls. The upgrades will include metered solar, electricity, water connection and far greater access control and security. Vending space will accommodate small informal entrepreneurs and more formal small businesses. A **GATEWAY CORNER** farm stall will be present at this market.

  The Market will be upgraded and re built together with the Taxi rank, to perfectly integrate the traffic pedestrian traffic and functions of the two facilities, but the Taxi rank will be managed and leased by the Stellenbosch Taxi Association.

  It will have a fully interactive online presence and a software application (app) for vendors and clients. Additionally, the app will grant access to all of GATEWAY ZONES's services as well and the other markets and services managed by GATEWAY ZONES.

  This Market will be leased, sub leased to vendors as well as managed and maintained by the GATEWAY ZONES NPO/PBO. This will provide the paid internships to the residents/clients of **GATEWAY ZONE CREW**

- **STELLENBOSCH STATION MARKET**

  The Stellenbosch Station Market will be a construction adjacent to the station. It will be similar in its look and feel, to the Bergzicht market, but with a distinct **TRAIN THEME**. It will accommodate both franchised vendors and the smaller informal vendors. a **GATEWAY CORNER**, Farm Stall will also be present here.

  It will also have a fully interactive online presence of its own and a software application (app) for vendors and clients. Additionally, the app will grant access to all of GATEWAY ZONES's services as well and the other markets and services managed by GATEWAY ZONES.

  This Market to, will be leased, sub leased to vendors as well as managed and maintained by the GATEWAY ZONES NPO/PBO. This will provide the paid internships to the residents/clients of **GATEWAY ZONE CREW**

- **STELLENBOSCH STATION PARKING**

  Constructed over the existing Railway lines to conveniently join with the facilities at the STATION MARKET
  The Station Parking will be a high-tech, 5 storey parking garage for at least **600 to 800 vehicles**
  This Parking Facility, will be leased, managed and maintained by the GATEWAY ZONES NPO/PBO. Providing aditional paid internships to the residents/clients of **GATEWAY ZONE CREW**

- **GATEWAY FARM**

  This will be a 40 to 60 hectare farm approximately 8 to 10kms outside of the Stellenbosch CBD will have to be aquired and developed, upgraded and developed with new structures to accommodate all of the core functions of the GATEWAY ZONES NPO/PBO.

  Approximately 80% of the farm land will remain self-sustainable agricultural land, which will fulfil the most important objectives and functions of the GATEWAY ZONES NPO/PBO.

  This farm will serve as a hub for research and curriculum development and accommodation for the **GATEWAY ZONE CREW**

GATEWAY ZONES

NPO/PBO DIVISIONS & STRUCTURE

- **GATEWAY ZONES**

- **GATEWAY FARM**
- **GATEWAY S.O.S.**
- **GATEWAY CREW**
- **GATEWAY PATROL**
- **GATEWAY ACADEMY**
- **GATEWAY CENTRE**
- **GATEWAY CORNER**
- **GATEWAY DRIVE**
- **GATEWAY X - PERIENCE**
- **GATEWAY X - CHANGE**
- **GATEWAY GROWTH (Study & Incubation fund)**
- **GATEWAY Channel**

GATEWAY FARM

A 40-60 Hectare farm approximately 8-10kms outside of Stellenbosch, of which 80% will remain self-sustainable agricultural land and will be designed and developed to be ideal for agricultural research. The remaining 20%of the land will be developed with structures to serve the purposes of the NGO/PBO. The farm will accommodate and include the structures of GATEWAY PATROL and the **S**afe **O**vernight **S**pace (S.O.S).

GATEWAY S.O.S

An open Dorm style facility, built on the **GATEWAY FARM,** where homeless people, who were found vulnerable and inebriated on the streets of Stellenbosch, can be accommodated for 48 hours, with self-help ablution and washing facilities, recycling facilities, a sick-bay, vegetable gardens and a communal and self-help kitchen facility.

GATEWAY PATROL

A K-9 security service and security training facility, housed near the **S.O.S** structures on the **GATEWAY FARM.** Homeless people from the shelter and people living on the farm will be trained in basic security services, to patrol the farm and provide additional security patrol services at the other properties and facilities managed by the GATEWAY ZONES NPO

The dogs used will be rescue dogs from the local **SPCA** and other animal welfare organisations.

A sub contracted security company will operate this exercise with the NPO/PBO in co-operation with the local policing and security services of the Municipality.

GATEWAY CREW

A phase two shelter that will accommodate at least 150 people (male and female) who are classified as homeless. People from other shelters who stayed “clean” and displayed commendable conduct will receive preference. The aim is tto train and develop these clients and utilise them as the workforce at the newly developed properties managed by **GATEWAY CENTRE** The accommodation structures on this site will house and feed between 6 to 12 people each.

All clients will have a one year contract to be housed at the GATEWAY FARM receive skills development training, and to be employed directly thereafter on a paid internship basis, at the **GATEWAY CENTRES**

GATEWAY ACADEMY

A main lecture facility and library on the **GATEWAY FARM** where, the people living at the **GATEWAY CREW** facility and the S.O.S facility, can receive daily skills development training. These skills will be developed on the farm and through the internships jobs at the GATEWAY CENTRES

Lecturers Students and professionals volunteering at the NPO will assist in running workshops here. The skills to be developed will range from security, gardening, carpentry, plumbing, driving, I.T., arts, media, first aid, haberdashery, culinary arts driving etc.

GATEWAY CENTRE

This will be the division responsible for the managing and maintaining the facilities leased from the Stellenbosch municipality. Services such as car guards, cleaners, security, shop fitting, electrical and plumbing, maintenance and marketing will be provided by GATEWAY CENTRE. It will act as the Centre management and crew agency of GATEWAY ZONES NPO/NGO

GATEWAY CORNER

Will be the NPO's own "farm stall" at each development. The flagship farm stall will be at the farm. This farm stall will sell food as well as arts and crafts produced on the farm by the GATEWAY CREW (shelter clients). Each GATEWAY CORNER will also have the ability to seat at least 30 people in a coffee shop environment with its own kitchen area.

These GATEWAY CORNERS will also be the venues at which a Breakfast Show will be recorded and or streamed with a lounge area and stage.

GATEWAY DRIVE

Will be an electrical Shuttle service operated between the developed GATEWAY CENTRES and operated by the NPO's own staff and drivers from the clients living at GATEWAY CREW.

A Passenger Transport Partner will be on the board of trustees to help operate the routes.

This service will commute between the developed facilities in town and connect certain areas of the **CBD and CAMPUS** to the Taxi rank and the Station.

An additional route will connect the Taxi Rank and Station to the GATEWAY FARM for use by employees, the public and tourists. GATEWAY DRIVE will also be a driving skills exercise with its own accredited driving school and drivers training terrain.

GATEWAY X - CHANGE

An exchange student Accommodation apartment on the farm, with a back packers look and feel for students from outside Stellenbosch who are volunteering or researching on the farm. It will accommodate at least 50 Students.

The Student accommodation at the Dorp Street operational office will fall under this division of **GATEWAY ZONES** as well.

GATEWAY X - PERIENCE

This is a paid Internship program/fund for students from any academic institution volunteering at and/or researching at the GATEWAY ZONES NPO / PBO

This Student Internship program will be available to approximately 50 students on a regular basis of approximately 2-4 times a week for a maximum of 4-8 hours a day.

GATEWAY GROWTH

This is a fund that will be utilised as a savings-account, to save additional income earned by the GATEWAY CREW and paid to them at the end of their contracted stay. The client may decide to use these funds towards their exit strategy or as start-up capital, should they decide to incubate a new business at a GATEWAY centre or elsewhere.

GATEWAY CHANNEL

This channel will produce content in-house, with crew from the media industry and the local shelter. Later on the GATEWAY CREW clients will also assists and be involved as soon as the accommodation structures are constructed and operational.

At first, the channel will only host a **Breakfast Show** every two weeks and a unique **Reality Construction Show,** to monitor progress from the development, construction and initiation phases of the project.

The shows will document the projects as it develops, from the architectural design phase, to the laying of the foundations and the laying of the first bricks. Every upgrade to the facilities or further development will be documented to form an archive and audio visual curriculum.

.

Advertisements of the facilities and the activities of the NPO / PBO will be streamed and distributed on this channel. These advertisements will also assist in marketing the vendor's goods and services who operate at the GATEWAY CENTRE facilities.

The channel will be app driven as well and linked to the websites of the various GATEWAY CENTRE markets operated by GATEWAY ZONES

It is imperative that the Channel and the Application for the new markets will be completed before the construction phases at each location in order to market and promote the exercise from its very beginning as an interactive community exercise.

GATEWAY ZONES

PROPOSED TRUSTEES

- **ZONE 8 VISION**
- **FUNDING PARTNER**
- **SPONSOR / STRATEGIC PARTNER**
- **REPRESENTATIVE of MUNICIPALITY**
- **CONSTRUCTION FIRM**
- **PROPERTY MANAGEMENT FIRM**
- **PASSENGER TRANSPORT / LOGISTICS FIRM**
- **SECURITY COMPANY**
- **ANIMAL WELFARE**
- **STELLENBOSCH UNIVERSITY, SRC and/or ALUMNI**
- **AUDITING FIRM**
- **LAW FIRM**
- **PUBLIC SHARE HOLDERS**

STELLENBOSCH TAXI ASSOCIATION

(INTERESTS & SUPPORT)

- **Expansion and increased capacity of the rank.**
- **Dedicated driver facilities (locker room, toilets, relaxation area).**
- **Reorientation of the rank.**
- **Additional access and lanes, into and from existing roads.**
- **Dedicated Controlled pedestrian crossing and connections.**
- **Emergency intervention with the Infringement of other Taxis on their route especially Bellville .**
- **One Year Lease Agreement to be extended to 15 plus.**

STELLENBOSCH UNIVERSITY

STUDENT COUNCIL

(INTERESTS & SUPPORT)

- **Safety of the corridor between THE ONE residence and Campus via the taxi rank and Bergzicht Market.**
- **Interactive use and safety of a dedicated shuttle between the new university residences and the Stellenbosch station via the Taxi rank to campus.**
- **Interactive use of the transport facilities and Markets proposed.**
- **Online interactivity and delivery of goods and products to students.**
- **Paid Internships at the proposed NPO and the facilities managed by them, in collaboration with the university as a part of their studies and research.**
- **As many faculties as possible must be included.**

(Agriculture, Medicine, Food Sciences, Social Work, Logistics, Business Studies, Law, Arts and Media, Etc)

BERGZICHT MARKET VENDORS

(INTERESTS & SUPPORT)

- **Safety of the corridor between THE ONE residence and Campus via the Taxi rank and Bergzicht Market that will increase traffic and business.**
- **Interactive use of the transport facilities and markets proposed.**
- **Online interactivity and delivery of goods and products to students.**
- **Water and Electricity services (Solar Solution) included.**
- **Cleaning and Maintenance services included.**
- **Increased internal security with increased pedestrian traffic.**
- **Branding and advertising**
- **Increased trading space and safe lock-up facilities overnight.**

1.community sport grounds
2. There are 17 sport codes not 5
3. There is no illegal sport, if there is then Municipality is at fault for 50 years
4. Van der Stel Gymnastic with Chaiman of VDS Koos Basson (lawyer) signed the lease for a sub club together with Dr Andre Myburg in 1975
5. The deficit due to the gym that was there has been paid off, finances positive.
6. From the beginning there was no transparency from Municipality, goal posts always shifted till tender was accepted and then the outcome totally different. Remgro not at fault only municipality. Municipality has not spoken to one ILLEGAL sub club. WHY???
Regards

IDP & Budget 2026/27 — Public Participation Submission

To: The Municipal Manager and Council of Stellenbosch Municipality
Date: 9 April 2026
Submitted by: Cornelis Schriek
Ward: 7 (also property in Ward 10)
Email: corne@schriek.co.za
Contact: 0722490717

I am a Stellenbosch ratepayer and the Chairman of the Stellenbosch Judo Club, a registered NPO (322-168) that has operated at the Van der Stel Sport Complex since the 1970s. I am submitting this comment personally, as someone whose club and community have been directly affected by the municipality's decision to lease the Van der Stel Sport Complex to Stellenbosch Football Club for 30 years.

Beyond the procedural concerns I set out below, I want to state clearly what this decision means to me and to my community. The Van der Stel Sport Complex is Stellenbosch's prime community sporting location — a multi-code, publicly accessible facility that has served residents across all backgrounds for generations. I acknowledge that the facility has become run-down and would benefit enormously from the kind of professional management, maintenance and investment that SFC can provide — and I welcome that prospect. What I cannot accept is that this upgrade comes at the cost of community access entirely. Under this lease, the complex will become the private home ground of a for-profit professional football club. According to revision 4 of the 2026/27 budget, the municipality will continue spending approximately R23–27 million of ratepayer money per year maintaining and developing the facility, while receiving R395,000 in total over 30 years (about R1097.22 per month). The asset's commercial value will grow because of the development — but that growth benefits SFC, not the community. What the community gets in return is unclear. What we lose is this: 95 years of community sport centre where each member need pay only R300 per year for access, replaced by a stadium and a private school on an already congested R44 corridor that cannot absorb the traffic a 5,000-15,000-seat venue and residential school will generate. This is not progress for Stellenbosch. **It is the privatisation of a public asset at the community's expense.**

I want to put four things on the record.

First: We have been given notice to leave a facility we have used for fifty years, with nowhere to go.

The municipality issued formal notice in November 2025 requiring all sporting codes except tennis and bowls to vacate by 31 March 2026. A reminder letter followed on 24 March 2026, which was retracted the same day — but the intention is clear. My club has received no alternative venue and no relocation plan. Tender BSM 02/25 (Clause 3.4.3) required a relocation plan to be submitted within six months of the award, AND that the sports codes needed to agree with the plan. That deadline has passed. As of 24 March 2026 the municipality's own correspondence acknowledges that most codes, including squash, still have no plan. Judo is not even mentioned.

Second: The eviction is happening before a lease has even been signed.

The Municipal Manager's letter of 24 March 2026 (Ref 17/6/3/1 - see attached to this email) states explicitly that the municipality is "still in the process of finalizing the official lease agreement" with Stellenbosch Football Club. SFC has no signed agreement. The municipality has no legal basis to evict existing users to make way for a tenant that has no executed contract.

Third: No building plans exist, yet we are already being displaced.

The announced redevelopment requires formal building plan approval, zoning consent, environmental and traffic assessments, and public participation in the planning process. None of this appears to have happened. We are being asked to leave before anyone knows what will be built, whether plans will be approved, or whether a properly designed facility could accommodate our club alongside SFC's football operations. A well-designed development could include a community sports hall for indoor codes like Judo, Gymnastics and Squash, and retained outdoor space for cricket, rugby and hockey. That question has never been asked, because the public has been excluded from the planning process entirely. I believe the development plans should be required to include facilities for all current sporting codes where possible, and that this should be a condition of the lease — not an afterthought.

Fourth: The public was misled during the participation process.

The municipality itself acknowledged at the 32nd Council Meeting (30 May 2025) that the original Information Statement — the document on which the public was asked to comment — contained a material "language discrepancy" relative to the tender specifications, and rescinded the original approval on that basis. The corrected document produced only two public comments (according to minutes of the 33rd council meeting). Neither the original nor the corrected document disclosed what the Municipal Manager's letter of 24 March 2026 has now confirmed: that the practical result of this lease is the permanent removal of all public sport from Van der Stel, except tennis and bowls.

A community that understood this to be the outcome would have responded very differently. The community was never told the full picture. We were led to believe the facility would be upgraded for the community's benefit, yet the community is clearly being displaced.

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community.
3. It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return. I
4. t should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

I reserve my right to bring a formal review application under PAJA if it is established that the MFMA Section 14 disposal process was not lawfully complied with.

Yours faithfully,

Corne Schriek

Contact no.: 021 808 8165
Our Ref. No.: 17/6/3/1
Date: 2026-03-27

Attention: Mr Pieter Lotz
Chairperson of Van der Stel Sports Council
Van der Stel
Stellenbosch
7600

By email: pieter@m3online.co.za

Dear Mr Lotz

REMINDER: VACATION OF PREMISES BY 31 MARCH 2026

*Please be reminded that all sporting codes, tenants, staff, service providers, and any other parties currently utilising the Van der Stel Sport Complex (excluding the Tennis Club and Stellenbosch Bowls Club) are required to vacate the premises no later than **31 March 2026**. This serves as a reminder of the formal notice issued earlier (19 November 2025), to allow all affected parties sufficient time to make the necessary arrangements and preparations for relocation.*

At the relocation meeting of Monday 16 March 2026, the following decision was taken: It was agreed that the Rugby Club continues with their league fixtures at the Van der Stel Sport Facility and will be relocated at the end of August 2026. The Rugby Club accepted the offer of an extension and agreed upon the planned relocation to Jamestown on 1 October 2026; quality of the 2 fields will be "upgraded".

Due to the above decision, the rugby club is therefore excluded from the decision that all codes must vacate the premises by 31 March 2026.

NOTIFICATION TO ALL SPORTING CODES - VAN DER STEL SPORT COMPLEX

RE: STELLENBOSCH FOOTBALL CLUB TAKE-OVER OF MANAGEMENT AND DEVELOPMENT OF VAN DER STEL SPORT COMPLEX

We refer to the above-mentioned matter.

We confirm that the Stellenbosch Municipality went out on tender for the Management and Development of the Van der Stel Sport Complex, in which a tender has been awarded to the Stellenbosch Football Club. We further confirm that on 30 July 2025 Council approved a 30-year lease agreement with the facility to Stellenbosch Football Club.

STELLENBOSCH
STELLENBOSCH • PNIEL • FRANSCHHOEK
MUNISIPALITEIT • UMASIPALA • MUNICIPALITY

Due to the transformative nature of the redevelopment plans, the facility will no longer be available to host the Van der Stel Sports Club or any tenants currently at the facility, except for the existing Tennis Club and the Stellenbosch Bowls Club, which will remain in their current location.

As per the tender requirements, a relocation plan for five of the existing sport codes (cricket, football, hockey, rugby and squash) is currently being discussed and will be presented to the van der Stel Executive Committee in due course. Whilst we are still in the process of finalising the official lease agreement between Stellenbosch Municipality and the Stellenbosch Football Club, we are acutely aware that your club members need to plan their future.

We therefore write this letter to you to inform you that all existing sport clubs (excluding the Bowls club, Squash club and Tennis club), tenants, staff, service providers, or any other parties making use of the property must evacuate the facility by no later than close of business on 31 March 2026. The main reason for this date is to provide the cricket club with the opportunity to complete their current season at the van der Stel Sport Complex and to allow Stellenbosch Football Club to start the redevelopment process.

Although all relocation elements might not be in place by 31 March 2026, Stellenbosch Municipality remains committed to ensure that training and match fields at alternative venues in Stellenbosch will be allocated to the above listed outdoor sport codes so that they can be fully prepared to compete during 2026. A plan for the way forward for the squash is still under discussion and will be communicated once a formal plan has been reached.

We trust you find this to be in order and please do not hesitate to contact our Senior Manager: Community Services, Mr. Albert van der Merwe on 021 808 8165 or at albert.vandermerwe@stellenbosch.gov.za should you have any queries.

Yours faithfully,

Geraldine Mettler
Municipal Manager

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I note that the budget figure of R395,000 I referenced should be read as R395 million in line with the R thousand convention used in Table SA33. The amount the municipality will 'receive' is in terms of capital value of the planned development, not cashflow. My substantive concerns remain unchanged.

Best regards

Corne Schriek

I am a Stellenbosch ratepayer and the Chairman of the Stellenbosch Judo Club, a registered NPO (322-168) that has operated at the Van der Stel Sport Complex since the 1970s. I am submitting this comment personally, as someone whose club and community have been directly affected by the municipality's decision to lease the Van der Stel Sport Complex to Stellenbosch Football Club for 30 years.

Beyond the procedural concerns I set out below, I want to state clearly what this decision means to me and to my community. The Van der Stel Sport Complex is Stellenbosch's prime community sporting location — a multi-code, publicly accessible facility that has served residents across all backgrounds for generations. I acknowledge that the facility has become run-down and would

benefit enormously from the kind of professional management, maintenance and investment that SFC can provide — and I welcome that prospect. What I cannot accept is that this upgrade comes at the cost of community access entirely. Under this lease, the complex will become the private home ground of a for-profit professional football club. According to revision 4 of the 2026/27 budget, the municipality will continue spending approximately R23–27 million of ratepayer money per year maintaining and developing the facility, while receiving R395,000 in total over 30 years (about R1097.22 per month). The asset's commercial value will grow because of the development — but that growth benefits SFC, not the community. What the community gets in return is unclear. What we lose is this: 95 years of community sport centre where each member need pay only R300 per year for access, replaced by a stadium and a private school on an already congested R44 corridor that cannot absorb the traffic a 5,000-15,000-seat venue and residential school will generate. This is not progress for Stellenbosch. **It is the privatisation of a public asset at the community's expense.**

I want to put four things on the record.

First: We have been given notice to leave a facility we have used for fifty years, with nowhere to go.

The municipality issued formal notice in November 2025 requiring all sporting codes except tennis and bowls to vacate by 31 March 2026. A reminder letter followed on 24 March 2026, which was retracted the same day — but the intention is clear. My club has received no alternative venue and no relocation plan. Tender BSM 02/25 (Clause 3.4.3) required a relocation plan to be submitted within six months of the award, AND that the sports codes needed to agree with the plan. That deadline has passed. As of 24 March 2026 the municipality's own correspondence acknowledges that most codes, including squash, still have no plan. Judo is not even mentioned.

Second: The eviction is happening before a lease has even been signed.

The Municipal Manager's letter of 24 March 2026 (Ref 17/6/3/1 - see attached to this email) states explicitly that the municipality is "still in the process of finalizing the official lease agreement" with Stellenbosch Football Club. SFC has no signed agreement. The municipality has no legal basis to evict existing users to make way for a tenant that has no executed contract.

Third: No building plans exist, yet we are already being displaced.

The announced redevelopment requires formal building plan approval, zoning consent, environmental and traffic assessments, and public participation in the planning process. None of this appears to have happened. We are being asked to leave before anyone knows what will be built, whether plans will be approved, or whether a properly designed facility could accommodate our club alongside SFC's football operations. A well-designed development could include a community sports hall for indoor codes like Judo, Gymnastics and Squash, and retained outdoor space for cricket, rugby and hockey. That question has never been asked, because the public has been excluded from the planning process entirely. I believe the development plans should be required to include facilities for all current sporting codes where possible, and that this should be a condition of the lease — not an afterthought.

Fourth: The public was misled during the participation process.

The municipality itself acknowledged at the 32nd Council Meeting (30 May 2025) that the original Information Statement — the document on which the public was asked to comment — contained a material "language discrepancy" relative to the tender specifications, and rescinded the original approval on that basis. The corrected document produced only two public comments (according to minutes of the 33rd council meeting). Neither the original nor the corrected document disclosed what the Municipal Manager's letter of 24 March 2026 has now confirmed: that the practical result of this lease is the permanent removal of all public sport from Van der Stel, except tennis and bowls.

A community that understood this to be the outcome would have responded very differently. The community was never told the full picture. We were led to believe the facility would be upgraded for the community's benefit, yet the community is clearly being displaced.

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community.
3. It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return. I
4. t should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

I reserve my right to bring a formal review application under PAJA if it is established that the MFMA Section 14 disposal process was not lawfully complied with.

Yours faithfully,

Corne Schriek

Good day mr Schriek

We acknowledge receipt of your email, the content which is noted.

In our discussions last evening at the IDP meeting you were under the impression that that is the amount the municipality is going to spend on vd Stel sports facility. As you rightfully indicate in your email below it is not an expenditure. This is the amount the tenderer is going to invest in the vd Stel Sports facility, according to their tender.

I take note of your concerns that is still the same, as you explain last evening.

Kind Regards / Vriendelike Groete

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning Mr van der Merwe,

Thank you for acknowledging my concerns. I really appreciate that you took the time discuss this matter with me!

Regarding the 23-27 million expense items on the budget I mentioned, please review PDF page 41 (marked page 38) on the document "WC024_2026_Appendix-1-MTREF-Budget-2026-2027-March-2026-Council.pdf", "Table A3 Budgeted Financial Performance (revenue and expenditure by municipal vote)A" on expenditures.

You said last night that you think these amounts I mention might be for all sports grounds, not just Van der Stel. Since I see no line items for all the other facilities, you may be correct that 4.7 - 3340 is the consolidated code. If this is the case , I believe a significant portion of that aggregate is attributed to VDS. If the grounds are leased, I would expect those expenditures to drop significantly.

I paste a screenshot here and highlighted the particular line item for your attention:

Whatever the correct budget figure turns out to be, it does not change my fundamental objection:

A public asset is being handed to a private club, which will upgrade it at its own expense, good for the municipality on paper. But the municipality is the aggregate of its ratepayers, and we will lose access to the facility entirely, never physically able to enjoy the benefits of that upgrade. That loss is the issue no budget clarification will resolve.

Best regards

Corne Schriek

Good day mr Schriek

We acknowledge receipt of your email, the content which is noted.

In our discussions last evening at the IDP meeting you were under the impression that that is the amount the municipality is going to spend on vd Stel sports facility. As you rightfully indicate in your email below it is not an expenditure. This is the amount the tenderer is going to invest in the vd Stel Sports facility, according to their tender.

I take note of your concerns that is still the same, as you explain last evening.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I note that the budget figure of R395,000 I referenced should be read as R395 million in line with the R thousand convention used in Table SA33. The amount the municipality will 'receive' is in terms of capital value of the planned development, not cashflow. My substantive concerns remain unchanged.

Best regards

I am a Stellenbosch ratepayer and the Chairman of the Stellenbosch Judo Club, a registered NPO (322-168) that has operated at the Van der Stel Sport Complex since the 1970s. I am submitting this comment personally, as someone whose club and community have been directly affected by the municipality's decision to lease the Van der Stel Sport Complex to Stellenbosch Football Club for 30 years.

Beyond the procedural concerns I set out below, I want to state clearly what this decision means to me and to my community. The Van der Stel Sport Complex is Stellenbosch's prime community sporting location — a multi-code, publicly accessible facility that has served residents across all backgrounds for generations. I acknowledge that the facility has become run-down and would benefit enormously from the kind of professional management, maintenance and investment that SFC can provide — and I welcome that prospect. What I cannot accept is that this upgrade comes at the cost of community access entirely. Under this lease, the complex will become the private home ground of a for-profit professional football club. According to revision 4 of the 2026/27 budget, the municipality will continue spending approximately R23–27 million of ratepayer money per year maintaining and developing the facility, while receiving R395,000 in total over 30 years (about R1097.22 per month). The asset's commercial value will grow because of the development — but that growth benefits SFC, not the community. What the community gets in return is unclear. What we lose is this: 95 years of community sport centre where each member need pay only R300

per year for access, replaced by a stadium and a private school on an already congested R44 corridor that cannot absorb the traffic a 5,000-15,000-seat venue and residential school will generate. This is not progress for Stellenbosch. **It is the privatisation of a public asset at the community's expense.**

I want to put four things on the record.

First: We have been given notice to leave a facility we have used for fifty years, with nowhere to go.

The municipality issued formal notice in November 2025 requiring all sporting codes except tennis and bowls to vacate by 31 March 2026. A reminder letter followed on 24 March 2026, which was retracted the same day — but the intention is clear. My club has received no alternative venue and no relocation plan. Tender BSM 02/25 (Clause 3.4.3) required a relocation plan to be submitted within six months of the award, AND that the sports codes needed to agree with the plan. That deadline has passed. As of 24 March 2026 the municipality's own correspondence acknowledges that most codes, including squash, still have no plan. Judo is not even mentioned.

Second: The eviction is happening before a lease has even been signed.

The Municipal Manager's letter of 24 March 2026 (Ref 17/6/3/1 - see attached to this email) states explicitly that the municipality is "still in the process of finalizing the official lease agreement" with Stellenbosch Football Club. SFC has no signed agreement. The municipality has no legal basis to evict existing users to make way for a tenant that has no executed contract.

Third: No building plans exist, yet we are already being displaced.

The announced redevelopment requires formal building plan approval, zoning consent, environmental and traffic assessments, and public participation in the planning process. None of this appears to have happened. We are being asked to leave before anyone knows what will be built, whether plans will be approved, or whether a properly designed facility could accommodate our club alongside SFC's football operations. A well-designed development could include a community sports hall for indoor codes like Judo, Gymnastics and Squash, and retained outdoor space for cricket, rugby and hockey. That question has never been asked, because the public has been excluded from the planning process entirely. I believe the development plans should be required to include facilities for all current sporting codes where possible, and that this should be a condition of the lease — not an afterthought.

Fourth: The public was misled during the participation process.

The municipality itself acknowledged at the 32nd Council Meeting (30 May 2025) that the original Information Statement — the document on which the public was asked to comment — contained a material "language discrepancy" relative to the tender specifications, and rescinded the original approval on that basis. The corrected document produced only two public comments (according to

minutes of the 33rd council meeting). Neither the original nor the corrected document disclosed what the Municipal Manager's letter of 24 March 2026 has now confirmed: that the practical result of this lease is the permanent removal of all public sport from Van der Stel, except tennis and bowls.

A community that understood this to be the outcome would have responded very differently. The community was never told the full picture. We were led to believe the facility would be upgraded for the community's benefit, yet the community is clearly being displaced.

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community.
3. It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return. I
4. t should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

I reserve my right to bring a formal review application under PAJA if it is established that the MFMA Section 14 disposal process was not lawfully complied with.

Yours faithfully,

Corne Schriek

Subject: RE: [EX] Re: IDP & Budget 2026/27 — Personal Submission — Van der Stel Sport Complex

Dear Mr Schriek

I confirm what the line item is for all our sport facilities. You are correct that a significant portion of that aggregate is attributed to VDS. However, it is important to note that our sporting needs at our other 14 sporting facilities require attention. There will therefore not necessarily be a decrease in the budget, but more of a reprioritisation of our outstanding needs. For example, we are currently upgrading the floodlights at our other facilities at a cost of millions of rands. There are other needs that also require attention. We also have a shortage of staff capacity at some of our sporting facilities. The staff currently serving at vd Stel will fill the gaps at other facilities.

I hope my explanation is acceptable. If you have any more questions I will try and answer them.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning Mr van der Merwe,

Thank you for acknowledging my concerns. I really appreciate that you took the time discuss this matter with me!

Regarding the 23-27 million expense items on the budget I mentioned, please review PDF page 41 (marked page 38) on the document "WC024_2026_Appendix-1-MTREF-Budget-2026-2027-March-2026-Council.pdf", "Table A3 Budgeted Financial Performance (revenue and expenditure by municipal vote)A" on expenditures.

You said last night that you think these amounts I mention might be for all sports grounds, not just Van der Stel. Since I see no line items for all the other facilities, you may be correct that 4.7 - 3340 is the consolidated code. If this is the case , I believe a significant portion of that aggregate is attributed to VDS. If the grounds are leased, I would expect those expenditures to drop significantly.

I paste a screenshot here and highlighted the particular line item for your attention:

In our discussions last evening at the IDP meeting you were under the impression that that is the amount the municipality is going to spend on vd Stel sports facility. As you rightfully indicate in your email below it is not an expenditure. This is the amount the tenderer is going to invest in the vd Stel Sports facility, according to their tender.

I take note of your concerns that is still the same, as you explain last evening.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I note that the budget figure of R395,000 I referenced should be read as R395 million in line with the R thousand convention used in Table SA33. The amount the municipality will 'receive' is in terms of capital value of the planned development, not cashflow. My substantive concerns remain unchanged.

Best regards

Corne Schriek

I am a Stellenbosch ratepayer and the Chairman of the Stellenbosch Judo Club, a registered NPO (322-168) that has operated at the Van der Stel Sport Complex since the 1970s. I am submitting this comment personally, as someone whose club and community have been directly affected by the municipality's decision to lease the Van der Stel Sport Complex to Stellenbosch Football Club for 30 years.

Beyond the procedural concerns I set out below, I want to state clearly what this decision means to me and to my community. The Van der Stel Sport Complex is Stellenbosch's prime community sporting location — a multi-code, publicly accessible facility that has served residents across all backgrounds for generations. I acknowledge that the facility has become run-down and would benefit enormously from the kind of professional management, maintenance and investment that SFC can provide — and I welcome that prospect. What I cannot accept is that this upgrade comes at the cost of community access entirely. Under this lease, the complex will become the private home ground of a for-profit professional football club. According to revision 4 of the 2026/27 budget, the municipality will continue spending approximately R23–27 million of ratepayer money per year maintaining and developing the facility, while receiving R395,000 in total over 30 years (about R1097.22 per month). The asset's commercial value will grow because of the development — but that growth benefits SFC, not the community. What the community gets in return is unclear. What we lose is this: 95 years of community sport centre where each member need pay only R300

per year for access, replaced by a stadium and a private school on an already congested R44 corridor that cannot absorb the traffic a 5,000-15,000-seat venue and residential school will generate. This is not progress for Stellenbosch. **It is the privatisation of a public asset at the community's expense.**

I want to put four things on the record.

First: We have been given notice to leave a facility we have used for fifty years, with nowhere to go.

The municipality issued formal notice in November 2025 requiring all sporting codes except tennis and bowls to vacate by 31 March 2026. A reminder letter followed on 24 March 2026, which was retracted the same day — but the intention is clear. My club has received no alternative venue and no relocation plan. Tender BSM 02/25 (Clause 3.4.3) required a relocation plan to be submitted within six months of the award, AND that the sports codes needed to agree with the plan. That deadline has passed. As of 24 March 2026 the municipality's own correspondence acknowledges that most codes, including squash, still have no plan. Judo is not even mentioned.

Second: The eviction is happening before a lease has even been signed.

The Municipal Manager's letter of 24 March 2026 (Ref 17/6/3/1 - see attached to this email) states explicitly that the municipality is "still in the process of finalizing the official lease agreement" with Stellenbosch Football Club. SFC has no signed agreement. The municipality has no legal basis to evict existing users to make way for a tenant that has no executed contract.

Third: No building plans exist, yet we are already being displaced.

The announced redevelopment requires formal building plan approval, zoning consent, environmental and traffic assessments, and public participation in the planning process. None of this appears to have happened. We are being asked to leave before anyone knows what will be built, whether plans will be approved, or whether a properly designed facility could accommodate our club alongside SFC's football operations. A well-designed development could include a community sports hall for indoor codes like Judo, Gymnastics and Squash, and retained outdoor space for cricket, rugby and hockey. That question has never been asked, because the public has been excluded from the planning process entirely. I believe the development plans should be required to include facilities for all current sporting codes where possible, and that this should be a condition of the lease — not an afterthought.

Fourth: The public was misled during the participation process.

The municipality itself acknowledged at the 32nd Council Meeting (30 May 2025) that the original Information Statement — the document on which the public was asked to comment — contained a material "language discrepancy" relative to the tender specifications, and rescinded the original approval on that basis. The corrected document produced only two public comments (according to

minutes of the 33rd council meeting). Neither the original nor the corrected document disclosed what the Municipal Manager's letter of 24 March 2026 has now confirmed: that the practical result of this lease is the permanent removal of all public sport from Van der Stel, except tennis and bowls.

A community that understood this to be the outcome would have responded very differently. The community was never told the full picture. We were led to believe the facility would be upgraded for the community's benefit, yet the community is clearly being displaced.

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community.
3. It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return. I
4. t should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

I reserve my right to bring a formal review application under PAJA if it is established that the MFMA Section 14 disposal process was not lawfully complied with.

Yours faithfully,

Corne Schriek

Thank you Mr. van der Merwe,

Yes, my questions about the budget have been answered, thank you!

My remaining 4 questions have yet to be answered.

(From my initial message:)

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community. (*as it is considered a key asset in the Adam Tas Corridor's (ATC) local spatial development framework (LSDF)).*
3. ~~It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return.~~ *Answered: R23-27 is expense budget for **all** sports grounds. Income is R395 000 000, noted as the planned amount SFC will spend on physical improvements.*
4. It should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

Thank you

Dear Mr Schriek

I confirm what the line item is for all our sport facilities. You are correct that a significant portion of that aggregate is attributed to VDS. However, it is important to note that our sporting needs at our other 14 sporting facilities require attention. There will therefore not necessarily be a decrease in the budget, but more of a reprioritisation of our outstanding needs. For example, we are currently upgrading the floodlights at our other facilities at a cost of millions of rands. There are other needs that also require attention. We also have a shortage of staff capacity at some of our sporting facilities. The staff currently serving at vd Stel will fill the gaps at other facilities.

I hope my explanation is acceptable. If you have any more questions I will try and answer them.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning Mr van der Merwe,

Thank you for acknowledging my concerns. I really appreciate that you took the time discuss this matter with me!

Regarding the 23-27 million expense items on the budget I mentioned, please review PDF page 41 (marked page 38) on the document "WC024_2026_Appendix-1-MTREF-Budget-2026-2027-March-2026-Council.pdf", "Table A3 Budgeted Financial Performance (revenue and expenditure by municipal vote)A" on expenditures.

You said last night that you think these amounts I mention might be for all sports grounds, not just Van der Stel. Since I see no line items for all the other facilities, you may be correct that 4.7 - 3340 is the consolidated code. If this is the case , I believe a significant portion of that aggregate is attributed to VDS. If the grounds are leased, I would expect those expenditures to drop significantly.

I paste a screenshot here and highlighted the particular line item for your attention:

Whatever the correct budget figure turns out to be, it does not change my fundamental objection:

A public asset is being handed to a private club, which will upgrade it at its own expense, good for the municipality on paper. But the municipality is the aggregate of its ratepayers, and we will lose access to the facility entirely, never physically able to enjoy the benefits of that upgrade. That loss is the issue no budget clarification will resolve.

Best regards

Corne Schriek

Good day mr Schriek

We acknowledge receipt of your email, the content which is noted.

In our discussions last evening at the IDP meeting you were under the impression that that is the amount the municipality is going to spend on vd Stel sports facility. As you rightfully indicate in your email below it is not an expenditure. This is the amount the tenderer is going to invest in the vd Stel Sports facility, according to their tender.

I take note of your concerns that is still the same, as you explain last evening.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I note that the budget figure of R395,000 I referenced should be read as R395 million in line with the R thousand convention used in Table SA33. The amount the municipality will 'receive' is in terms of capital value of the planned development, not cashflow. My substantive concerns remain unchanged.

Best regards

IDP & Budget 2026/27 — Public Participation Submission

To: The Municipal Manager and Council of Stellenbosch Municipality
Date: 9 April 2026
Submitted by: Cornelis Schriek
Ward: 7 (also property in Ward 10)
Email: corne@schriek.co.za
Contact: 0722490717

I am a Stellenbosch ratepayer and the Chairman of the Stellenbosch Judo Club, a registered NPO (322-168) that has operated at the Van der Stel Sport Complex since the 1970s. I am submitting this comment personally, as someone whose club and community have been directly affected by the municipality's decision to lease the Van der Stel Sport Complex to Stellenbosch Football Club for 30 years.

Beyond the procedural concerns I set out below, I want to state clearly what this decision means to me and to my community. The Van der Stel Sport Complex is Stellenbosch's prime community sporting location — a multi-code, publicly accessible facility that has served residents across all backgrounds for generations. I acknowledge that the facility has become run-down and would benefit enormously from the kind of professional management, maintenance and investment that SFC can provide — and I welcome that prospect. What I cannot accept is that this upgrade comes at the cost of community access entirely. Under this lease, the complex will become the private home ground of a for-profit professional football club. According to revision 4 of the 2026/27 budget, the municipality will continue spending approximately R23–27 million of ratepayer money per year maintaining and developing the facility, while receiving R395,000 in total over 30 years (about R1097.22 per month). The asset's commercial value will grow because of the development — but that growth benefits SFC, not the community. What the community gets in return is unclear. What we lose is this: 95 years of community sport centre where each member need pay only R300 per year for access, replaced by a stadium and a private school on an already congested R44 corridor that cannot absorb the traffic a 5,000-15,000-seat venue and residential school will generate. This is not progress for Stellenbosch. **It is the privatisation of a public asset at the community's expense.**

I want to put four things on the record.

First: We have been given notice to leave a facility we have used for fifty years, with nowhere to go.

The municipality issued formal notice in November 2025 requiring all sporting codes except tennis and bowls to vacate by 31 March 2026. A reminder letter followed on 24 March 2026, which was retracted the same day — but the intention is clear. My club has received no alternative venue and no relocation plan. Tender BSM 02/25 (Clause 3.4.3) required a relocation plan to be submitted within six months of the award, AND that the sports codes needed to agree with the plan. That deadline has passed. As of 24 March 2026 the municipality's own correspondence acknowledges that most codes, including squash, still have no plan. Judo is not even mentioned.

Second: The eviction is happening before a lease has even been signed.

The Municipal Manager's letter of 24 March 2026 (Ref 17/6/3/1 - see attached to this email) states explicitly that the municipality is "still in the process of finalizing the official lease agreement" with Stellenbosch Football Club. SFC has no signed agreement. The municipality has no legal basis to evict existing users to make way for a tenant that has no executed contract.

Third: No building plans exist, yet we are already being displaced.

The announced redevelopment requires formal building plan approval, zoning consent, environmental and traffic assessments, and public participation in the planning process. None of this appears to have happened. We are being asked to leave before anyone knows what will be built, whether plans will be approved, or whether a properly designed facility could accommodate our club alongside SFC's football operations. A well-designed development could include a community sports hall for indoor codes like Judo, Gymnastics and Squash, and retained outdoor space for cricket, rugby and hockey. That question has never been asked, because the public has been excluded from the planning process entirely. I believe the development plans should be required to include facilities for all current sporting codes where possible, and that this should be a condition of the lease — not an afterthought.

Fourth: The public was misled during the participation process.

The municipality itself acknowledged at the 32nd Council Meeting (30 May 2025) that the original Information Statement — the document on which the public was asked to comment — contained a material "language discrepancy" relative to the tender specifications, and rescinded the original approval on that basis. The corrected document produced only two public comments (according to minutes of the 33rd council meeting). Neither the original nor the corrected document disclosed what the Municipal Manager's letter of 24 March 2026 has now confirmed: that the practical result of this lease is the permanent removal of all public sport from Van der Stel, except tennis and bowls.

A community that understood this to be the outcome would have responded very differently. The community was never told the full picture. We were led to believe the facility would be upgraded for the community's benefit, yet the community is clearly being displaced.

What I am asking for in the IDP:

1. The IDP should address how the municipality intends to provide for the 19 sporting codes and their members displaced from the Van der Stel Sport Complex.
2. It should clarify how losing our prime sporting location best serves the community.
3. It should explain how it justifies spending approximately R23–27 million per year of ratepayer money on a facility that has been handed to a private football club for R395,000 over 30 years with no guaranteed public access in return. I
4. t should require SFC to include provision for community sporting use — accommodating all current codes where possible — in its development plans, and those plans should be publicly advertised and open to objection before they are approved.
5. And it should commission an independent traffic impact assessment for the R44 corridor before any development proceeds, given that a 5,000-seat stadium and a 200-learner residential school will generate significant additional traffic in an area that is already under pressure.

I reserve my right to bring a formal review application under PAJA if it is established that the MFMA Section 14 disposal process was not lawfully complied with.

Yours faithfully,

Corne Schriek

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Municipality

Transport Proposals: Park-and-Ride, Buses, and Pedestrian Zones
Stellenbosch's own plans and residents' voices have long called for **park-and-ride** and other alternatives. Our Comprehensive Integrated Transport Plan and SDF emphasise sustainable mobility over adding downtown parking. In line with this, I propose the following strategies as part of the IDP:

- **Park-and-ride lots at each town entrance:** Establish secure parking lots at the main access roads into Stellenbosch (for example, Groeneweide Road, Papegaaiberg/R44, Brandwacht, etc.) and provide shuttle services for commuters or students to the CBD. This "parking-in-a-circle" concept was already recommended in local planning (a heritage workshop noted ideas for parking around the town, with buses connecting to the centre, see centrestellenboschheritage.co.za). Implementing these peripheral lots will intercept cars before they enter the historic core.
- **Dedicated bus parking on the Braak (court side):** Coach buses, taxis and shuttles should not wind through narrow Dorp Street. Instead, a staging area can exist on the Braak's side near the Magistrate's Court. Tourist buses could park there, and people can walk into town. (In fact, a local study observed that *"buses driving around the Braak are not seen as a good idea" (See* stellenboschheritage.co.za), underscoring the need to keep big vehicles at the perimeter.) By routing buses to the Braak area, we free up space in the CBD and reduce congestion.
- **Pedestrianise the town centre:** Gradually restrict private car access on Andringa and Church Street, and on adjoining core roads, to turn the centre into a pedestrian-friendly zone. This plan aligns with the SDF's "car-free living" goal, which aims to have at least half of urban activities within a short walk of homes. With safer sidewalks, widened crossings and more trees, people will be encouraged to walk or cycle for errands. Enhancing bicycle paths (for example, along Park and Plein Streets) will also improve townwide connectivity without adding cars.

Each of these measures is feasible and consistent with the adopted policy. For example, the ATC framework and transport plans explicitly call for investments in park-and-ride facilities and non-motorised transport. We need bold action now: build the lots, run the shuttles, and give pedestrians priority.

I urge the Municipality to honour the **Adam Tas Corridor (ATC)** vision as it finalises the new IDP. The official ATC planning documents describe the Corridor as "an integrated urban development corridor that is liveable, safe, resource-efficient, socially integrated, and economically inclusive". In practice, this means focusing on mixed-use, higher-

density neighbourhoods served by efficient transit. Indeed, the ATC spans 375 hectares of currently under-used land with plans for roughly *13,500* new homes for students, workers and lower-income households, coupled with "enhanced public transport" (see stias.ac.za). In short, the ATC embodies best-practice urbanism for Stellenbosch. I respectfully request that these principles guide all IDP decisions – equitable, transit-oriented growth – rather than by short-term gain from sprawl.

Development Outside the Urban Edge and Congestion

Citizens are alarmed that new housing developments are being approved far beyond the designated urban edge, in low-density layouts with no nearby bus or rail service. As the Stellenbosch Spatial Development Framework (SDF) warns, *"distant suburbs are almost entirely reliant on private motor vehicles"* and their expansion "has an important role to play in increasing traffic congestion" (see Stellenbosch Municipality Spatial Development Framework). This congestion rings true in Ward 9, where far-flung estates force residents into cars for every trip. The SDF explicitly advises the opposite approach: *"allow higher density developments within town limits"* and *"enforce a strict urban edge"* to stop wasteful sprawl. We must heed that advice. Keeping new growth compact, oriented to existing towns and transit routes, will relieve pressure on roads, water, and other infrastructure.

Traffic congestion is already our biggest problem. The SDF notes that congestion has risen sharply in recent years and calls for a significant modal shift: *"a combination of non-motorised transport and public transport facilities is suggested... ensuring at least 50% of activities are found in an urban area within 1 km of residential areas"*. In other words, daily needs (work, school, shopping) should be accessible on foot, by bike, or by bus. Yet today the CBD of Stellenbosch is gridlocked for hours each weekday, especially when university terms are in session. This situation is unsustainable. The IDP must integrate the transport components of the ATC plan – including new bus routes and bike lanes – so that people can live here without relying on driving. Building sidewalks, cycle paths, and a good bus network is not an optional luxury but a necessity to restore mobility and quality of life.

Conclusion: A Sustainable Path Forward

Stellenbosch's future depends on honest, integrated planning. The ATC vision and the Municipality's own transport plans all point toward the same solution: stop approving isolated sprawl and instead densify along transit corridors, with public transport and walking as defaults. Implementing park-and-ride facilities at our entrances, rerouting buses to the Braak edge, and fully pedestrianising the historic CBD will go a long way toward curing our congestion woes. The time to act is now. I respectfully request that the IDP incorporate these strategies under the Adam Tas Corridor principles. Thank you for the opportunity to submit these comments and for considering a more liveable, pedestrian-friendly Stellenbosch.

Onderwerp.

1.Riool East End Singel
2.Oorstromimg van waterkanaal in East End Singel
3.Skoonhou van strate.

Geagte Mnr/Me.
Hiermee wil ek deurmiddel van die IDP proses my insette lewer.
Ek doen ñ dringende beroep op die munisipaliteit om aandag te skenk aan die volgende.
1.Riooloorloop in East End.
Dit is nou al vir 20jr plus dat rou riool in ons strate uitloop.Dit is nie alleen ongesond nie maar onooglik en morsig.Daar word weekliks soms daagliks net skoon gespuit en dan word daar ñ wit stof oorgooi,maar die werklike probleem word nie aangespreek Nie.Volgens die amptenary is die projek al 2jr verlede op die begroting geplaas maar geen stuk werk word gedoen nie.Ons verlang dat die pompstasie uit die gemeenskap verwyder moet word.
2.Oorstromings van erwe.
Dit het nou 2 keer gebeur dat stormwater deur my huis geloop het.Die klagte kom al van 2016 .Die nodige amptenary soos Mnr Gaza Goodman was in kennis gestel en het al telkemale kom besoek aflê.Volgens wat verneem word is die projek voor begroot ,omgewingsamptenary was hier en ek stuur gereeld boodskappe.Nog niks is gedoen nie.My assuransie wil nie meer die skade dek nie agv van herhaling van dieselfde wise.
3.Onwelkome plakkers.
Hiervoor moet ñ permanente oplossings gevind word.Die plakkers laat mense onveilig voel en inbrake vermeerder.
Ek vertrou dat bogenoemde die nodige aandag sal geniet.
Vriendelike Groete.
A.J Cyster.

Subject: FW: IDP REQUESTS FROM RAITHBY RATEPAYERS ASSOC

Dear Catherine
As discussed yesterday evening, I conflrm herewith the IDP requests from the Raithby Ratepayers Association for their input into the IDP for Ward 20.

Herewith also my additional input as PR Councillor for Ward 20 .

1: Street Lights: Need to be extended along Raithby Road from Winery Road at both entrances as the areas are very dark at night and early mornings creating hotspots for criminal activities.
Also, the bus shelter in Raithby Road outside Raithby Vines requires a street light as high school children waiting for their transport are in the dark in the early mornings.
2: Park Beautification: Trees in the Park bordering Watson Way and Hendrickse Street need to be cut as they are interfering with the Power Cables causing high number of electricity outages. Waterwise flowering shrubs/ fruit trees would be a better alternative. Regular clearing of thorny weeks and long grass growing up the fences.
The park behind the Raithby Vines needs urgent intervention/ clearing of aliens and beautification/ equipment for children.
3: Sidewalks: from Winery Road along Raithby Road are desperately needed as pedestrians-(numbers of which are increasing due to job opportunities in Raithby) have to walk in the road. This is not only a danger to them but to occupants in vehicles in particular in the dark, rainy Winter mornings.
4: All Road Markings: on ALL roads in Raithby and along Winery Road need to be completed. This includes clear markings on the pedestrian crossings in the village.

NOTE BELOW REQUESTS FROM RAITHBY RATEPAYERS ASSOCIATION.
Kindly confirm receipt of both inputs and that they have been captured.
Your support and efficiency is appreciated.

Kind regards / Vriendelike groete

Patricia Crawley

Subject: IDP REQUESTS FROM RAITHBY RATEPAYERS ASSOC

Good morning madame, hope you are feeling good today. My list for the IDP meeting:
1. The narrow road from the corner of Watsonway to beyond the river bridge, needs widening and/or road signs.
2. The security cameras at the entrance, again.
3. The cleaning of vacant plot, corner Wagner and Watsonway streets.
4. Part of the Moddergat river behind Hendricks street reeds not removed.
5. The storm water overflow of the Newlands complex storm water dam will flow directly onto Watsonway and will cause serious flooding of the road.
6. On lower Watsonway and lower Raithby rd there is a constant spilling of sand during rainfall events.
7. Speed bumps required on lower Raithby rd as people use the road as a race track.
8. Greater visibility of law enforcement in Raithby to deter possible criminals. Also raids on possible drug houses.

Thank you

Good day Nwabisa

On behalf of Cllr Serdyn and ward 11, the items below are inputs for the IDP for ward 11.

1. Development of Onderpapegaaiberg
2. Fence at the Adam Tas Bridge
3. Fence put around the graveyard
4. Cameras in ward 11 that include the streets in town i.e. Stasie Street and Onder Dorp Street
5. Signage for Onderpapegaaiberg
6. Beautification of entrances
7. Maintenance of the entrance at the circle of Devonvalley Road
8. Street surfaces in neigbourhood of Onderpapegaaiberg upgraded where necessary
9. Repainting of stop streets and speed bumps where necessary
10. Pavement of parking area behind municipal court needs to be upgraded
11. Restoration of ramp/driveway in Heroldstreet number 13
12. Trash cans in the following streets Dorp Street, Stasie Street, Market Street, and in Onderpapegaaiberg in Santhagen Street and Devonalley Road.
13. Upgrading of Papplaas Sport grounds:
    a. Soccer goalposts and raising the fence towards the SPCA's side
    b. Netball posts and the upgrade of the netball court
    c. Cement or concrete seating for spectators
    d. Upgrading of area as well as parking for vehicles
    e. Drying out of soccer fields
    f. Maintenance of sport grounds on a regular basis
14. Walking route and benches for elderly across from Geluksoord

Importance: High

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Deon & Leandro, @Leandro Hendricks @deon.louw@stellenbosch.gov.za @idp@stellenbosch.gov.za

We trust that you are well.

We hereby formally submit a request for the inclusion of water and sewer network infrastructure upgrades in the Stellenbosch Municipality's Integrated Development Plan (IDP) 2026/2027. This is important for the planned Stellenbosch School of Skills at Erf 16455/Re.

The existing infrastructure serving the area is operating under significant capacity constraints. These constraints have been identified as a key risk to sustainable service delivery within the broader community. As such, the proposed upgrades are considered essential to ensure system reliability, accommodate growth, and maintain acceptable levels of service, especially with the planned school of skills on Erf 16455/Re.

It is important to note that the required upgrades extend beyond the scope and financial capability of a single development and are more appropriately classified as municipal infrastructure with capacity constraints, and in urgent need of upgrading to ensure sustainable service delivery to the broader community.

We therefore request that these works be prioritised and included in the Municipality's IDP process, rather than being attributed to individual development contributions.

A summary of the proposed water & sewer upgrades is provided below:

Water:
Item 1: 335 m x 200 mm Ø upgrade existing 160 mm Ø HDPE pipe
Item 2: 205 m x 250 mm Ø replace existing 150 mm Ø AC pipe
Item 3: 205 m x 160 mm Ø link pipe
Item 4: 310 m x 250 mm Ø replace existing 150 mm Ø AC pipe

Sewer:
SSS1.9: 426 m x 315 mm Ø uPVC upgrade collector pipe
SSS1.10: 326 m x 315 mm Ø uPVC upgrade collector pipe

A cost summary follows below:

WATER						
	Existing Infrastructure	Upgrade	Length (m)	Amount	VAT (15%)	TOTAL (Incl VAT)
Item 1	160 mm Ø HDPE pipe	200 mm Ø	335	R794 000.00 *	R119 100.00	R913 100.00
Item 2	150 mm Ø AC pipe	250 mm Ø	205	R1 411 000.00 *	R211 650.00	R1 622 650.00
Item 3		160 mm Ø link pipe	205	R388 000.00 *	R58 200.00	R446 200.00
Item 4	150 mm Ø AC pipe	250 mm Ø	310	R1 008 000.00 *	R151 200.00	R1 159 200.00
				R3 601 000.00 *		**R4 141 150.00**

(Including P & G, Contingencies and Fees, but excluding VAT - Year 2025/26 Rand Value. This is a rough estimate, which does not include major unforeseen costs).*
The routes of the proposed pipelines are schematically shown in Figure 1, but must be finalised after a detailed pipeline route investigation.

SEWER

	Existing Infrastructure	Upgrade	Length (m)		VAT (15%)	TOTAL (Incl VAT)
SSS1.9	250 mm Ø pipe	315 mm Ø	426	R1 925 000.00 *	R288 750.00	R2 213 750.00
SSS1.10	250 mm Ø pipe	315 mm Ø	326	R1 516 000.00 *	R227 400.00	R1 743 400.00
				R3 441 000.00 *		**R3 957 150.00**

(Including P & G, Contingencies and Fees, but excluding VAT - Year 2025/26 Rand Value. This is a rough estimate, which does not include major unforeseen costs).*
The routes of the proposed pipelines are schematically shown in Figure 2, but must be finalised after detailed pipeline route investigations.

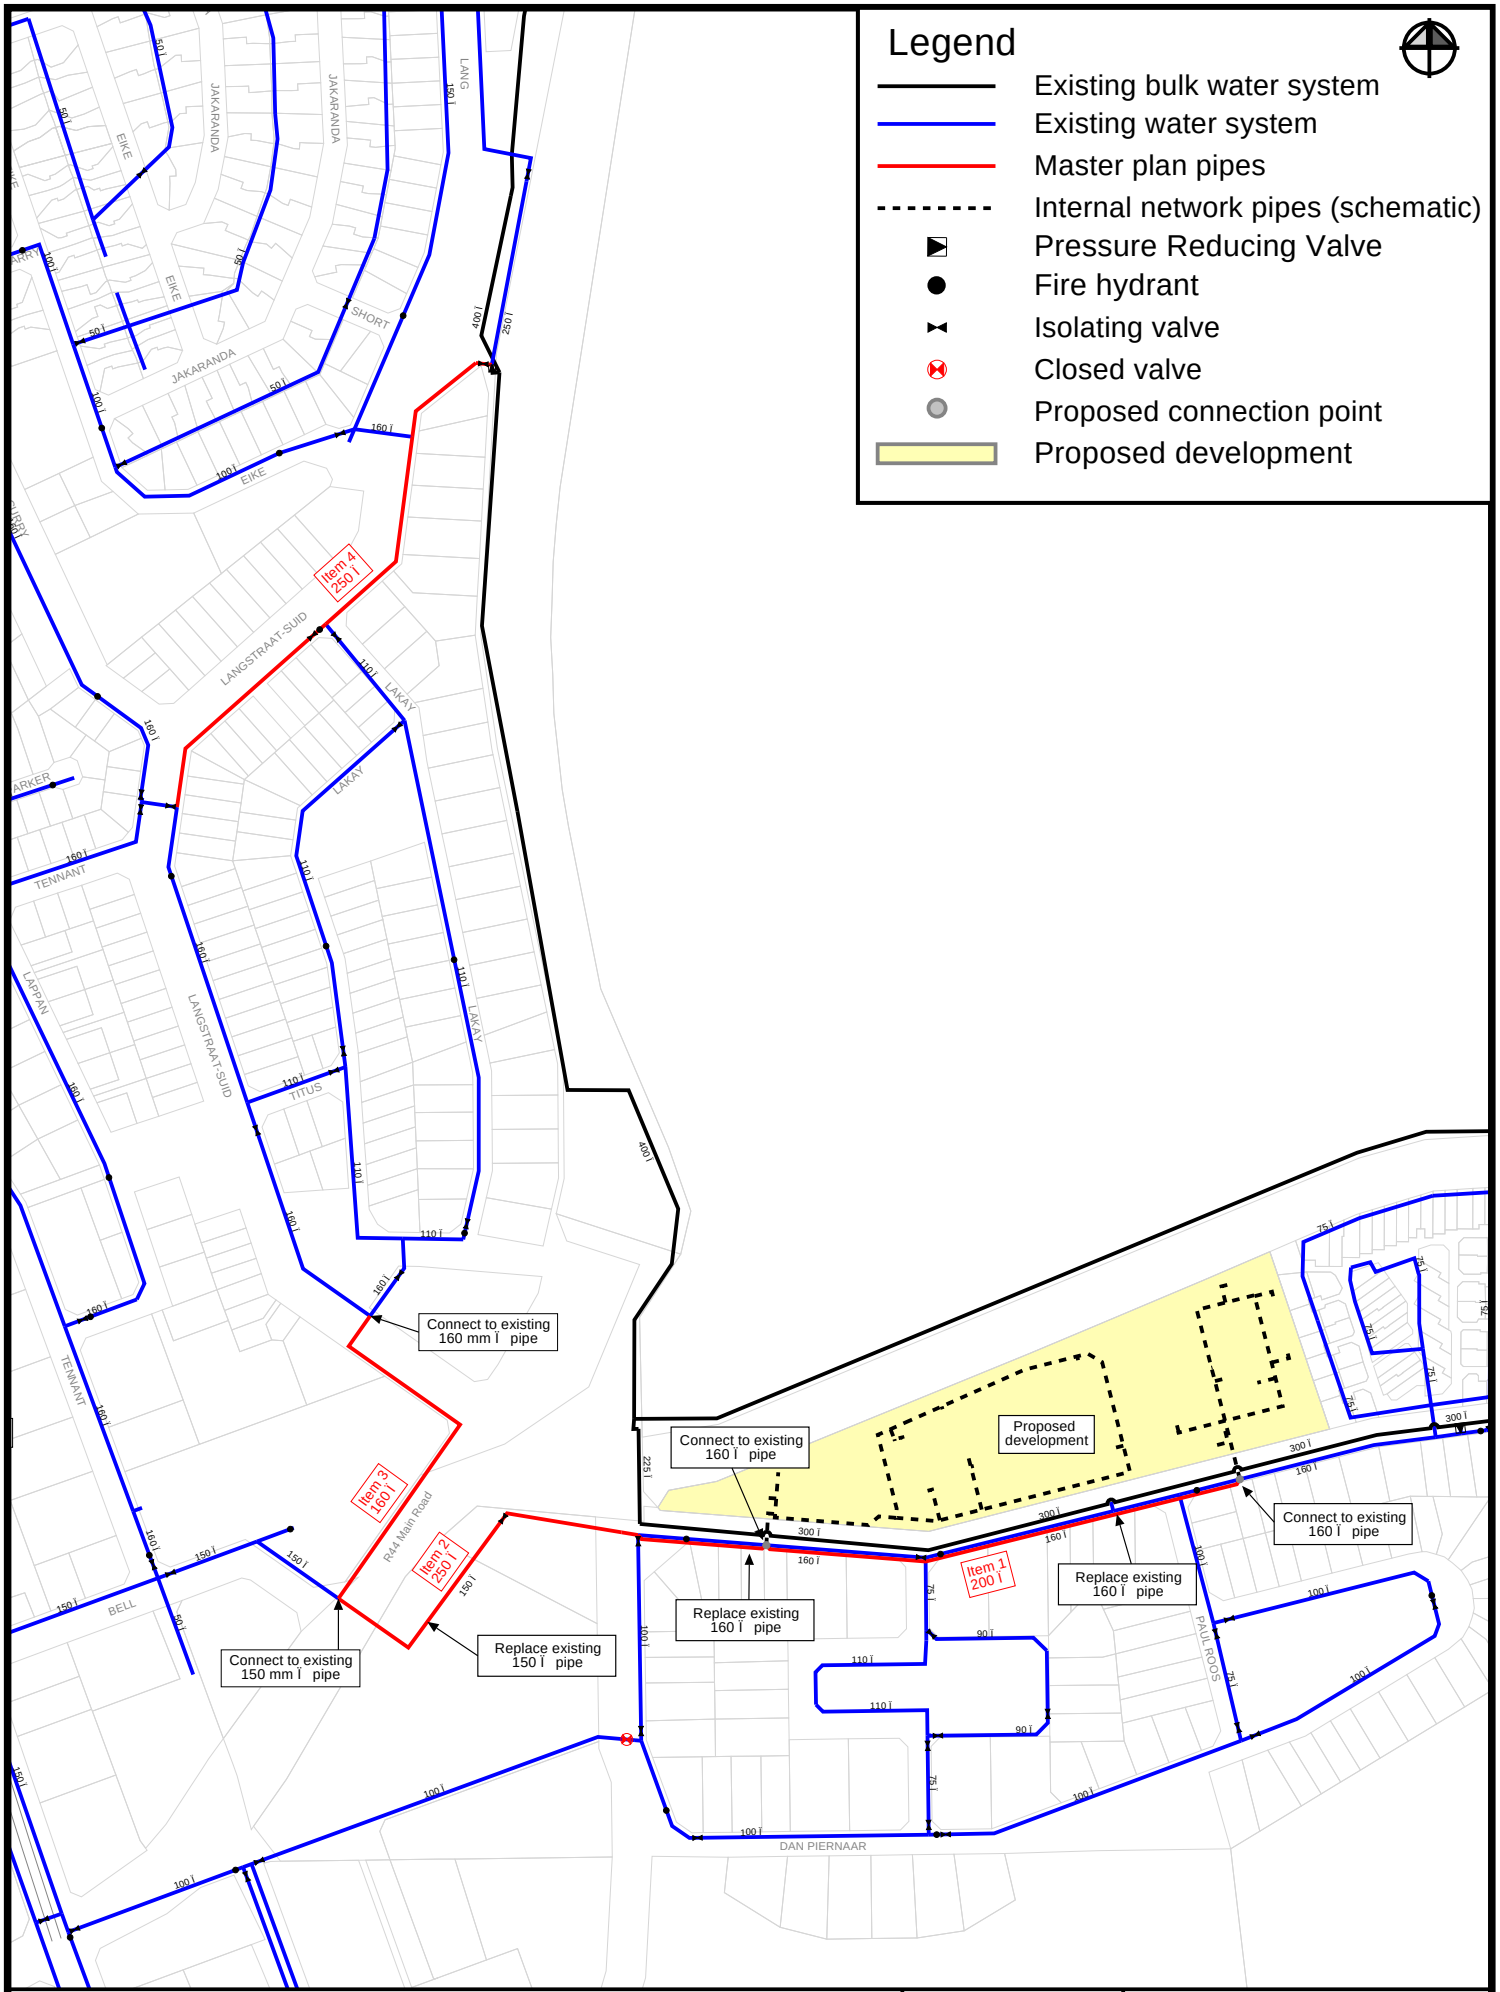
The proposed pipeline routes are indicated schematically in the attached Figure 1 and Figure 2.

Given the urgency and importance of these upgrades for the broader community, we kindly request that the Municipality consider these projects for prioritisation in the upcoming IDP cycle (2026/2027).

We would appreciate the opportunity to engage further with the relevant officials at the Stellenbosch Municipality to discuss the proposals in more detail, should this be required.

Thank you in advance.

Regards,



Jacques van Niekerk (PrTechEng)

23 APRIL 2026

Dear Municipal manager,

Re: Grant-in-aid application

We trust that this e-mail finds you well.

We hereby wish to appeal against the outcome of our grant-in-aid application.

According to our constitution, our management team consists of 11 members.

Our financial report was accidentally not signed off by the board members, due to laptop problems. We do apologize for this errors in our previous documentations.

We would like to request that you reconsider our application. About 90% of our players come from gang violence areas and we would like to create a safe haven for them by involving them in sports.

Attached are the correct and signed documents.

Thank you in advance for your consideration!

Kindest Regards,

Ms. Bonita Robyn (Secretary Newtons AFC)

Glen Daniels (Chairperson), Jubileen Loggenberg (Vice-Chairperson), Bonita Robyn (Secretary), Lynn Jansen (Vice-Secretary), Herschel Achilles (Treasurer), Rhudi Adams (Vice-Treasurer), Julian September (Junior Coordinator): Additional members: Jacques Bantam, Devon Daniels, Lynn.

L	**REQUIREMENTS CATEGORY B APPLICATIONS** (Please note that Category B applications **MUST** adhere to the following requirements **and** those listed under section K, except where indicated otherwise.)	
1	**AUDITED FINANCIAL STATEMENTS** A copy of the latest audited financial statements must be included in the application. Category B applications **MUST** submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	
2	**THREE YEAR BUSINESS PLAN** See the requirements for the business plan as listed under section K as guideline. NOTE: Category B applications MUST provide a clear proposal for a period of three years. Each year must be indicated separately and be costed per annum indicating all expenditure against the projected measurable outcomes. Outcomes must be listed ito how they will be reported on and measured on a monthly basis.	
M	**FORMAT FOR FEEDBACK REPORT**	
1	Narrative report on the project including numbers reached, outcomes reached, evaluation of the project indicating successes and failures/lessons learned.	
2	Pictures of the project/program.	
3	Financial report on expenditure regarding previous donation separate from the annual financial statements. (Attach proof of expenditure).	
N	**THE FOLLOWING SHALL APPLY:**	
1	The allocation of Grant-In-Aid will only be considered if the application document has been **fully completed** and signed and is accompanied by the required and supporting documentation referred to therein.	
2	An applicant who has been registered as a NPC, NGO, NPO or PBO with the necessary proof thereof, submitted together with this application.	
3	Applicants must in their submission clearly indicate/specify and motivate what the funds will be utilized for.	
4	The Grant-In-Aid must be exclusively utilized for the purpose defined and the successful applicant must submit the necessary undertaking to this effect.	
5	Applicants must in their submission satisfy the Council of their ability to execute the project successfully.	
6	Organisations who have already received financial or other assistance from the Council during the previous financial year MUST specify same in their application.	
7	No funding will be considered for political groupings, ratepayers organisations or for religious purposes..	
8	No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain.	
9	Projects outside the boundaries of the Council will not be considered.	
10	Expenditure that will not be funded includes: travel costs (unless it is for the transport of beneficiaries), subsistence, accommodation, food (unless intended for the beneficiaries) or entertainment expenses of any kind, staff salaries including bonuses, bursaries and payments in lieu of rates or other municipal charges.	
11	Subsequent requests from the applicants to cover overspending on projects will not be considered.	
12	Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance management Act no. 56 of 2003 which inter alia stipulates that the organization or body has to:-	
	❖ Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting financial management and auditing requirements as may be contained in such an agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programs of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion.	
	❖ Report at least once a year on the actual expenditure of the amount allocated to it. Should monthly allocations be made, monthly reports will be required.	
13	The Council reserves the right not to give a Grant-In-Aid to any organization applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.	
14	Funding will not be considered where a project or organization is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified.	
15	Funding will not be considered where in Council's opinion, an organization received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year.	
16	Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attach to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of Section 17 of the Non-profit Organisation Act, 1997 and Section 67(1) of the Municipal Finance Management Act, 2003 (MFMA).	
17	Funding will not be considered where expenses have already been incurred on a project by the applicant. (The Council's Grant-In-Aid Policy must be consulted for the sake of completeness).	

O	DECLARATION OF INTEREST:

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations:

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

MEMORANDUM OF AGREEMENT

Entered into and between

STELLENBOSCH MUNICIPALITY

(hereafter called the "***MUNICIPALITY***")

Herein represented by **Geraldine Mettler**, in her capacity as **Municipal Manager**, being duly authorised

and

NEWTONS AFC

(hereafter called the "***BENEFICIARY***")

Herein represented by MS B ROBYN in his/her capacity as SECRETARY, being duly authorised.

WHEREAS Section 67(1) of the Local Government: Municipal Finance Management Act, Act 56 of 2003 (MFMA) oblige the Accounting Officer of a **MUNICIPALITY** to satisfy himself that, before transferring funds of the **MUNICIPALITY** to an organisation or body outside any sphere of government otherwise than in compliance with a commercial or other business transaction, that such organisation or body:-

(a) has the capacity and has agreed-

(i) to comply with any agreement with the **MUNICIPALITY**;

(ii) for the period of the agreement to comply with all reporting, financial management and auditing requirements as may be stipulated in the agreement;

(iii) to report at least monthly (Cat B) to the Accounting Officer on actual expenditure against such transfer (where transfers are done on a monthly basis); and

(b) implements effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement; and

(c) has in respect of previous similar transfers complied with all the requirements as set out above; and

(d) give permission to site visits done by the **MUNICIPALITY.**

WHEREAS the **MUNICIPALITY** has approved a Grants-in-Aid Policy, in terms whereof applications are considered;

WHEREAS the **BENEFICIARY** has applied for a grant-in-aid as per the official grant-in-aid application form; and

WHEREAS the **MUNICIPALITY** has approved such application, subject to certain conditions;

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

1. TRANSFER OF FUNDS

1.1 The **MUNICIPALITY** hereby undertakes to transfer an all-inclusive amount of

R40 000.00…… (…….), being a donation for the period **01 July 2026...** to **30 June 2027** to the **BENEFICIARY**.

1.2 Bank Account details: (The following are confirmed through a correctly completed Creditors Control Form.)

Account number	:	2016309296
Name of financial institution	:	NEDBANK
Name of account holder	:	NEWTONS AFC
Branch code	:	198765
Type of account	:	SAVINGS ACCOUNT

1.3 The all-inclusive amount will be transferred in equal amounts on the following dates (if applicable):

2. OBLIGATIONS OF BENEFICIARY

2.1 The **BENEFICIARY** must acknowledge in writing to the Municipal Manager that the amount(s) was(were) received in its bank account.

2.2 The **BENEFICIARY** hereby certifies that the money will be utilised in accordance with the role of the organisation or society, to the benefit of the community and in accordance with the project(s) / programme(s) as indicated in the application form.

2.3 The **BENEFICIARY** undertakes to regularly report on a monthly basis (Cat B) to the Municipal Manager regarding the activities conducted, actual expenditure against such transferred funds, as well as the number of people benefiting from the activities should monthly payments be made. If not, an annual report compliant with the reporting requirements will be submitted.

3. SPECIFIC CONDITIONS

3.1 The parties specifically agree on the following:

That the organization will commit to active involvement in any programme run by the municipality in the area of operation of the organization when such a programme is active in the community.

Other conditions:

_____

_____

4. DECLERATION OF INTEREST

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations: (Name and designation)

_____

_____

5. ACQUISITION OF ASSETS

5.1 Should the **BENEFICIARY** wish to acquire any moveable or immovable assets with the money donated in terms of this Agreement, the **BENEFICIARY** hereby undertakes to:-

5.1.1 adhere to the principles as per the **MUNICIPALITY'S** Supply Chain Management Policy, and

5.1.2 take all reasonable steps to ensure that such assets are maintained and that a system of internal control of such assets is in place.

6. RIGHTS OF THE MUNICIPALITY

6.1 The **MUNICIPALITY** shall be entitled, from time to time, to verify the existence and to inspect the activities of the **BENEFICIARY**, having regards for its right to privacy as entrenched in terms of the Constitution of the Republic of South Africa.

6.2 The **MUNICIPALITY** shall further be entitled to peruse the budgets and any progress reports related to the project / programme as per this Agreement.

7. FAILURE TO COMPLY

7.1 Failure by the **BENEFICIARY** to comply with the obligations as set out in Clause 2 of this Agreement, may lead to the cancellation of this Agreement, in which case the **MUNICIPALITY** may demand that the organisation pays back any unspent funds as per this Agreement. The **MUNICIPALITY** may even, depending on the circumstances leading to the non-compliance by the **BENEFICIARY**, demand that the organisation pays back the full amount paid to the **BENEFICIARY**. Failure to comply may result in not considering applications for grants from the **BENEFICIARY** for a period of 5 years.

8. INDEMNIFICATION

8.1 The **BENEFICIARY** hereby acknowledges that it receives the grant voluntarily and that it shall keep the **MUNICIPALITY** indemnified at all times against any loss, cost, damage, injury or liability suffered by the **MUNICIPALITY** resulting from any action, proceeding or claim made by any person (including themselves) against the **MUNICIPALITY** caused directly or indirectly by the use/spending of the grant.

9. DISPUTE RESOLUTION

9.1 Any dispute arising from this Agreement shall be mediated between the Parties by a mutually agreed upon and suitably skilled mediator. Should the mediator be unsuccessful and the Parties fail to reach agreement, the dispute may be referred by the aggrieved Party to the arbitration of a single arbitrator, to be agreed upon between the Parties, or failing agreement, to be nominated on the application of any Party, by the President for the time being of the South African Association of Arbitrators. The decision of the single arbitrator shall be final and binding on the Parties.

10. NOTICES AND DOMICILIA

10.1 The parties choose as their *domicilia citandi et executandi* their respective addresses as set out in this clause for all purposes arising out of or in connection with the agreement at which addresses all processes and notices arising out of or in connection with this Agreement, its breach or termination, may validly be served upon or delivered to the Parties.
