RE: FAURE WTP RESCHEDULED SHUTDOWN

The City of Cape Town Water and Sanitation Directorate will shut down the Faure Water Treatment Plant to accommodate maintenance at the water purification facility. The shutdown has been scheduled to start on 18 November 2026, 07:00 and end on 19 November 2026, 18:00.

This shutdown will affect the Stellenbosch Municipality Raithby connection, and the City of Cape Town Reticulation.

The Stellenbosch Municipality will be supplied from the domestic reservoir during the shutdown period; however, due to limited storage capacity, Stellenbosch Municipality is requested to reduce consumption and/or make use of alternative water sources where possible.

This shutdown will significantly reduce the overall production capacity of the Bulk water system. Therefore, we kindly request that all consumers city-wide use water sparingly during this period.

All reasonable measures have been taken to minimise the impact of this shutdown. Affected parties are requested to make the necessary arrangements in advance, including ensuring that reservoirs are adequately filled to maintain supply during this period.

Thank you for your cooperation.
